Module Juvenile Criminal Law

02SM90SR2 / Course

Description:

General description:

Grundlagen, Rechtsquellen, materielles und formelles Jugendstrafrecht

ECTS: 6

Notes:

Der Inhalt der Praktikerreferate gehört auch zum Prüfungsstoff. Im Rahmen der Vorlesung werden fakultative Gefängnisbesuche angeboten. Die Termine und Details zur Anmeldung werden in der ersten Vorlesungsstunde bekannt gegeben.

Eine Anmeldung erfolgt ausschliesslich über die Homepage.

Learning Outcome:

Die Studierenden lernen die Grundlagen des Jugendstrafrechts, die historische Entwicklung des speziellen jugendstrafrechtlichen Bestimmungen und die kriminologischen Erkenntnisse über die Jugendkriminalität kennen. Sie sind vertraut mit der täterstrafrechtlichen Ausrichtung des Jugendstrafgesetzes (eigenständiges Sanktionensystem, Primat des Erziehungsgedankens und der Schutzmassnahmen) und den Schnittstellen zum Erwachsenenstrafrecht. Sie kennen das Jugendstrafverfahren, die Organe der Jugendstrafrechtspflege und Grundzüge des Jugendstrafvollzuges.

Module Law of Capital Markets II

02SM90WM17 / Lecture with Practical Exercises

Description:

General description:

Teil 1: Die erste Semesterhälfte (mit D. Dedeyan) widmet sich der Regulierung der Märkte und des Marktverhaltens (von Emittenten und Investoren) mit Blick auf die realen Markt- und Kommunikationsprozesse. Vertieft werden hier u.a.

Praxis, Trends und interdisziplinäre Theorie der Kapitalmärkte, Grenzen der Transparenz, Finanz- und nachhaltigkeitsbezogene Informationen, Prospekte, Werbung, Ad-hoc-Publizität, Offenlegung von Management-Transaktionen, Beteiligungspublizität, Insiderrecht, Markt- und Kursmanipulation sowie Haftung für Kapitalmarktinformation.

Teil 2: Die zweite Semesterhälfte (mit A. Darbellay) widmet sich einerseits dem Übernahmerecht und andererseits der Produktregulierung. Im Bereich des Übernahmerechts werden insbesondere der Verfahrensablauf bei öffentlichen Kaufangeboten, die Pflicht- und freiwilligen Angebote, der Gleichbehandlungsgrundsatz, die Pflichten des Anbieters und der Zielgesellschaft sowie die Zulässigkeit von Abwehrmassnahmen behandelt. Im Bereich der Produktregulierung liegt der Fokus auf kollektiven Kapitalanlagen, einschliesslich des Angebots an nicht qualifizierte Anleger und des Basisinformationsblatts. Ein weiterer Schwerpunkt wird auf nachhaltige Kapitalanlagen gelegt, insbesondere auf die Regulierung von grünen Anleihen.

ECTS: 6

Learning Outcome:

Die Studierenden gewinnen ein vertieftes Verständnis der Kapitalmarktregulierung, also des Aufsichtsrechts (Aufsichtsinstrumente, Enforcement) und der Marktverhaltensregeln sowie der ökonomischen und sozialwissenschaftlichen Zusammenhänge. Sie lernen die Praxis der Aufsichtsbehörden, der Gerichte und der Unternehmen kennen und sind in der Lage, kapitalmarktrechtliche Fälle zu lösen.

Target Groups:

Masterstudierende der Rechtswissenschaft mit Interesse am Wirtschaftsrecht.

Auch Studierende anderer Masterstudiengänge wie z.B. der Wirtschaftswissenschaften sind willkommen.

Languages of Instruction:

Deutsch

Course Materials:

Die Materialien werden in der Vorlesung bekannt gegeben.
Literatur zum Thema:

- Daniel Dedeyan, Regulierung der Unternehmenskommunikation, Zürich/Baden-Baden 2015 (Hörerscheine erhältlich)

Module Law Clinic - Practice in Law

02SM90WM20 / Praxiskurs

Description:

General description:

In Zusammenarbeit mit dem Zürcher Anwaltsverband (ZAV) und dem Verband der Studierenden der Universität Zürich (VSUZH) wird die Master Lehrveranstaltung "Law Clinic - Anwaltliche Praxis" der Rechtswissenschaften angeboten.

Rechtsanwältinnen und Rechtsanwälte sowie andere Personen aus der Rechtspraxis geben Einblicke in die vielfältigen Tätigkeiten ihrer Berufe.

Weitere Informationen zum Ablauf finden Sie auf der Homepage des Lehrstuhls von Frau Prof. G. Godenzi.

ECTS: 3

Notes:

Die Veranstaltung bietet 50 interessierten Teilnehmenden Platz. Die Zuteilung der Plätze erfolgt nach der durch die Studierenden vergebenen Priorität und in zweiter Linie nach dem Zufallsprinzip. Die Veranstaltung richtet sich primär an Masterstudierende. Eine begrenzte Anzahl von Plätzen sind für Mitglieder der Rechtsberatung des VSUZH reserviert. Das Modul steht zudem Bachelorstudierenden als vorgezogenes Master-Modul offen.

Voraussetzung hierfür ist gemäss § 39 der ab HS 2021 gültigen Rahmenverordnung, dass zuvor bereits mindestens 150 ECTS-Punkte an der Rechtswissenschaftlichen Fakultät im Rahmen des Bachelorstudiums erworben wurden. Die aktive Teilnahme bildet den Leistungsnachweis dieses Moduls. Die Teilnahme an den Lehrveranstaltungen sowie an einem der beiden Kolloquien ist verpflichtend und wird mittels Anwesenheitsliste überprüft. Grundsätzlich gilt eine strikte Anwesenheitspflicht. Ausnahmsweise ist eine einmalige Absenz aus entschuldigen Gründen erlaubt. Jede weitere Absenz führt zum Nichtbestehen des Moduls. Die einmalige Absenz aus entschuldigen Grund gilt nicht für das Kolloquium, welches zwingend zu absolvieren ist.

Bitte beachten Sie, dass aufgrund der Anwesenheitspflicht grundsätzlich leider keine Studierenden zugelassen werden, die im selben Semester das Modul "Volontariat bei einer Justiz- oder Exekutivbehörde" besuchen.

Die Anmeldung erfolgt über das Buchungstool der UZH. Für die Law Clinic gelten die Modalitäten für Anfragemodule.

Bei Fragen steht Ihnen der Lehrstuhl Godenzi unter lawclinic@ius.uzh.ch gerne zur Verfügung.

Learning Outcome:

Die Veranstaltung "Law Clinic - Anwaltliche Praxis" soll die Studierenden befähigen, ihr juristisches Fachwissen um methodische Kompetenzen aus der anwaltlichen Praxis zu ergänzen.

Target Groups:

Masterstudierende der Rechtswissenschaften sowie Bachelorstudierende der RWF, die im Bereich von § 39 der Rahmenverordnung vom 21.09.2020 Mastermodule vorholen.

Languages of Instruction:

Deutsch

Course Materials:

Werden über die Webseite des Lehrstuhls Godenzi abgegeben.

Merkmale:

Responsible instructor:

Gunhild Barbara Godenzi

Requirements:

Prerequisites:

Interesse an anwaltlichen Fragestellungen.

Assessment:

Die aktive Teilnahme bildet den Leistungsnachweis dieses Moduls. Die Teilnahme an den Lehrveranstaltungen sowie an einem der beiden Kolloquien ist verpflichtend und wird mittels Anwesenheitsliste überprüft.

Es gilt eine strikte Anwesenheitspflicht. Jedes Fehlen führt grundsätzlich zu einem Fehlversuch und damit zum Nichtbestehen des Moduls.

Ausnahme: Eine einmalige Absenz aus entschuldbaren Gründen an den Lehrveranstaltungen ist erlaubt. Jede weitere Absenz und jedes Fehlen ohne entschuldbaren Grund führen zum Nichtbestehen des Moduls. Dies gilt auch, wenn die jeweilige Lehrveranstaltung nur teilweise besucht wird. Im Falle eines entschuldbaren Fehlens erfolgt die begründete Mitteilung der Abwesenheit per E-Mail an lawclinic@ius.uzh.ch spätestens fünf Arbeitstage nach dem Termin der Lehrveranstaltung zusammen mit den entsprechenden Bestätigungen (vgl. §§ 28 - 30 StudO RWF, §§ 24 f. RVO RWF entsprechend).

Die Absenz am Kolloquium ist nur bei Vorliegen eines entschuldbaren Grundes (vgl. §§ 28 - 30 StudO RWF sowie §§ 24 f. RVO RWF entsprechend) zulässig. Dies gilt auch, wenn das Kolloquium nur teilweise besucht wird. Im Falle eines entschuldbaren Fehlens erfolgt die begründete Mitteilung der Abwesenheit per E-Mail an lawclinic@ius.uzh.ch spätestens fünf Arbeitstage nach dem Termin des Kolloquiums zusammen mit den entsprechenden Bestätigungen (z.B. Arztzeugnis). In diesem Fall ist zwingend ein alternativer Leistungsnachweis in Form einer schriftlichen Arbeit zu erbringen.

In folgenden Fällen ist das Modul nicht bestanden:

- Absenz am Kolloquium ohne entschuldbaren Grund oder bei nicht fristgerechter begründeter Mitteilung der Absenz, es sei denn, die Fristversäumnis ist nicht verschuldet (Hinweis: die allgemeine Arbeitsbelastung während des Studiums oder das Nichteintreffen des E-Mails bei lawclinic@ius.uzh.ch ist kein Entschuldigungsgrund, bitte versenden Sie allfällige E-Mails mit der Option «Lesebestätigung anfordern»).

- Entschuldbare Absenz am Kolloquium, aber Nichterbringen, nicht fristgerechtes Erbringen oder Nichtbestehen des alternativen Leistungsnachweises.
Vorgaben des alternativen Leistungsnachweises :

- Materiell: Wählen Sie 3 Lehrveranstaltungen mit unterschiedlichen Inhalten (z.B. einen Teil zum Anwaltsrecht, ein Teil Strafrecht, ein Teil Kindesvertretung). Alle Teile sollten in etwa gleich lang sein (d.h. pro Thema ca. 3 Seiten) und die einzelnen Teile sollten wiederum ungefähr zur Hälfte aus Theorie bestehen, die andere Ihre Erfahrung/Kommentar/persönliche begründete Meinung darstellen. Bitte stellen Sie sowohl im theoretischen und praktischen Teil einen Bezug zu den Veranstaltungen her.

- Formell: Umfang insg. 8 bis 10 Seiten (ohne Deckblatt und Verzeichnisse), alle Seitenränder auf 2.5 cm, Blocksatz, Schriftart und -grösse Text Arial 12, Fussnoten Schriftgrösse 10, Zeilenabstand Text 1.5, Zeilenabstand Fussnoten 1).

- Abgabe per E-Mail als Worddokument und PDF an lawclinic@ius.uzh.ch, spätestens am Sonntag, 11.01.26 bis 24.00 Uhr. Eine angemessene Fristverlängerung ist nur möglich, wenn der die Absenz am Kolloquium entschuldigende Grund nachweisbar länger als fünf Wochen dauerte.

- Bewertung des alternativen Leistungsnachweises: Formeller Teil 40%, materieller Teil 60%, bewertet wird mit bestanden/nicht bestanden. Wird dieser alternative Leistungsnachweis nicht erbracht oder nicht bestanden, bedeutet dies das Nichtbestehen des Moduls.

Module Value Added Tax Law

02SM90WM22 / Course

Description:

General description:

Das Modul dient der Einführung in das Mehrwertsteuerrecht (Grundlagen, Verfahren und Rechtsprechung). Das Modul besteht aus der Veranstaltung Mehrwertsteuerrecht.

ECTS: 6

Merkmale:

Responsible instructor: René Matteotti

Requirements:

Assessment:

Die Leistungsüberprüfung findet im Rahmen einer schriftlichen oder mündlichen Prüfung am Ende des Semesters statt (je nach Anzahl zu prüfender Studierender). Die Art des Leistungsnachweises wird durch den Lehrstuhl festgelegt und angekündigt bzw. spätestens vier Wochen vor Ende der Lehrveranstaltungen im Web VVZ publiziert. Als Prüfungssstoff gilt der komplette Inhalt der Lehrveranstaltung Mehrwertsteuerrecht (einschliesslich der präsentierten Gruppenarbeiten). Die regelmässige Teilnahme an den Vorlesungen bildet die Basis für die Zulassung zur Prüfung.

Module Mergers and Acquisitions

02SM90WM23 / Course

Description:

General description:

Das Modul "Mergers & Acquisitions" befasst sich mit Rechtsfragen im Zusammenhang mit Fusionen und anderen Umstrukturierungen von Unternehmen. Die Vorlesung besteht aus sieben Blockveranstaltungen, welche über das Semester verteilt stattfinden und jeweils zwei Stunden dauern. In den einzelnen Veranstaltungen werden verschiedene Fälle besprochen, zu denen die Dozierenden online verschiedene Materialien abgeben (z.B. Verfügungen, Urteile, Prospekte, Verträge). Die Fälle werden daraufhin auf der Basis von Präsentationen der Studierenden in den Veranstaltungen besprochen und die jeweiligen Rechtsprobleme diskutiert. Die fachlichen Schwerpunkte liegen im Gesellschaftsrecht und im Kartellrecht.

ECTS: 3

Target Groups:

Studierende aller Masterstudiengänge der Rechtswissenschaftlichen Fakultät.

Course Materials: Diese werden von den Dozenten auf der Website zur Verfügung gestellt.

Merkmale:

Responsible instructor: Hans-Ueli Vogt

Requirements:

Prerequisites: keine

Prior Knowledge: Grundkenntnisse im Gesellschafts-, Steuer- und Kartellrecht

Assessment: Die Beiträge der Studierenden bestehen aus einer Präsentation (Vortrag und Präsentationsunterlagen) und der Teilnahme an den Diskussionen. Die Präsentation wird zu 2/3 und die Teilnahme an den Diskussionen zu 1/3 gewichtet.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated as necessary

Module Migration Law

02SM90WM24 / Course

Description:

General description:

Die Vorlesung vermittelt einen Überblick über das Schweizer Migrationsrecht und seine Grundlagen. Schlüsselfragen der Vorlesung sind: Mit welchem Vorverständnis nähern wir uns migrationsrechtlichen und -politischen Fragen? Was ist Integration, und wie weit ist sie rechtlich steuerbar? Welche zwischenstaatlichen Kooperationszwänge erzeugen Globalisierung und Europäisierung? Was sind die völkerrechtlichen Rahmenbedingungen für die staatlichen Migrationsregime? Was sind die Grundzüge des schweizerischen Ausländer- und Asylrechts? Wie spielen Ausländerrecht und Freizügigkeitsabkommen zusammen?

ECTS: 6

Module Secondary Criminal Law

02SM90SR1 / Course

Description:

General description:

Die Veranstaltung vermittelt eine allgemeine Einführung ins Nebenstrafrecht sowie ins Verwaltungsstrafrecht des Bundes (VStrR) und behandelt die Straftatbestände des Strassenverkehrsrechts (Art. 90 ff. SVG), des Betäubungsmittelrechts (Art. 19 ff. BetmG), des Ausländer- und des Asylrechts (Art. 115 ff. AIG; Art. 115 ff. AsylG) unter Einschluss der spezifischen Sanktionen sowie der für diese Deliktsbereiche relevanten prozessualen Besonderheiten.

ECTS: 6

Learning Outcome:

Aufbauend auf den im Bachelorstudiengang erworbenen Kenntnissen der allgemeinen Lehren des Straftataufbaus lernen die Studierenden die praktisch bedeutsamsten Teile des Nebenstrafrechts kennen. Aufgrund der erworbenen Kenntnisse sind die Studierenden in der Lage, Fälle aus diesen Deliktsbereichen zu bearbeiten sowie Problemstellungen aus diesen Teilbereichen des Strafrechts selbständig zu analysieren und zu bewerten.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Marc Thommen

Requirements:

Assessment: Schriftliche Prüfung

Prüfungsstoff: Allgemeine Lehren des Strafrechts (Art. 1-33 StGB); Besondere Bestimmungen des StGB im Zusammenhang mit Gegenständen des Strassenverkehrsrechts, des Betäubungsmittelrechts und des Migrationsrechts, insb. Art. 111 ff., Art. 146, Art. 237 StGB und Art. 291 StGB; Verhältnis des StGB zu andern Gesetzen des Bundes und zu den Gesetzen der Kantone (Art. 333-335 StGB); Verwaltungsstrafrecht (Art. 1-18 VStrR); Strassenverkehrsgesetz (SVG) mit dazu gehörenden Verordnungen; Ordnungsbussengesetz (OBG) und Ordnungsbussenverordnung (OBV); Betäubungsmittelgesetz (BetmG) mit dazu gehörenden Verordnungen und völkerrechtlichen Übereinkommen; Ausländer- und Integrationsgesetz (AIG) und Asylgesetz (AsylG), jeweils mit dazu gehörenden Verordnungen und völkerrechtlichen Übereinkommen.

Module Legal Relations Switzerland-EU

02SM90WM26 / Course

Description:

General description:

Die Vorlesung behandelt die vielfältigen und in ihrer Komplexität nur schwer fassbaren Rechtsbeziehungen zwischen der Schweiz und der Europäischen Union. Sie ist in vier Teile gegliedert: I. Grundlagen (völkerrechtlicher Rahmen; geschichtliche Entwicklung; Vertragsschlusskompetenzen; Geltung, Rang und Anwendbarkeit der Abkommen im schweizerischen bzw. unionalen Recht), II. Bilaterale Abkommen (Typologie, Institutionelles, materieller Inhalt), III. Autonomer Nachvollzug (Beispiele; Verhältnis zur Rechtsvergleichung, Cassis de Dijon; Auswirkungen auf die Rechtsetzungstechnik), IV. Herausforderungen und Ausblick (neue institutionelle Regeln, neue Abkommen); Optionen der schweizerischen Europapolitik, inkl. Seitenblick auf den EWR und andere Formen der Drittstaatenbez. der EU). Die Studierenden beteiligen sich aktiv (mit der Möglichkeit, benotete Präsentationen zu machen).

ECTS: 6

Module Children's Rights

02SM90WM3 / Course

Description:

General description:

Adopting a critical, reflexive view of how children's rights are theorized, discussed and applied, the course will present and discuss the normative content, implementation and monitoring mechanisms of the international children's rights instruments, in particular the 1989 UN Convention on the Right of the Child. In addition, the course will explore the interaction between the legal, social and political dimensions of the children's rights project through a discussion of themes central to the field, including debates on child labour and education, child soldiering, international child protection, juvenile justice and the politics of children's representation.

ECTS: 6

Notes:

Information about the course will be made available on the website of Prof. Kaufmann.

Learning Outcome:

To understand and analyze the content and mechanisms of implementation and monitoring of the main international children's rights instruments. To develop the ability to critically reflect, from an interdisciplinary approach, on the legal, social and political implementations of the global children's rights project.

Languages of Instruction:

English

Course Materials:

A Reader composed of book chapters and journal articles that are directly relevant to the themes discussed will be made available. Students are expected to attend class prepared.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Christine Kaufmann

Requirements:

Prerequisites:

Children's Rights

Assessment:

The type of the exam will be defined after the end of the booking period and will be published on the website of the exam office within the latest five weeks after the end of the cancellation deadline.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated as necessary

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Dates/Times/Deadlines:

The course will take place every two weeks on Monday afternoon between 14.00 and 18.00.

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Negotiation and Conflict Management

02SM90WM30 / Lecture with Practical Exercises

Description:

General description:

Effective negotiation is an essential skill in nearly every professional and many personal contexts. Whether securing employment, navigating complex organizational dynamics, or resolving disputes, negotiation competence is key to success. Beyond individual career advancement, strong negotiation skills are critical for managing societal and international conflicts - of which there is no shortage today.

Successful negotiation does not depend on innate talent. Rather, it is grounded in skills that can be learned, refined, and strengthened through intensive, practice-oriented training. Effective negotiation goes far beyond persuasive argumentation. It requires the ability to analyze complex and ambiguous situations, manage emotions (especially one's own), maintain focus under pressure, and translate strategy into measurable outcomes. Above all, effective negotiation requires continuous, deliberate practice.

- analyze and reflect on how to resolve conflicts of interest in an integrative and principled manner;
- develop practical negotiation skills through simulations, case studies, and exercises closely aligned with real-world professional challenges;
- experience negotiation under pressure and deliberately step outside their comfort zones;
- critically assess negotiation processes and outcomes, identify areas for personal development, and engage constructively in peer feedback; and
- apply the skills and insights gained in class to real-life professional and personal situations.

Some participant testimonials:

- "This course has been one of my favorite courses in my entire university career." - Andrew Harris, course participant (2025)
- "This course has been a transformative experience. It has given me the tools to approach negotiations with greater clarity, confidence, and adaptability." - Stefanie Camenzind, course participant (2024)
- "This negotiation course proved invaluable in deepening my understanding of both the strategic and interpersonal dimensions of negotiation." - Nancy Quispe Avellaneda, course participant (2024)
- "This course was about far more than just learning new concepts. It is much about getting to know oneself better ... not about optimizing my learning strategy, but about optimizing myself." - Janick Elsener, course participant (2023).

ECTS: 6

Notes:

This course is a classroom-based course only (no online instruction).

It is a highly interactive, learning-by-doing course. It combines theory and core concepts with extensive preparatory reading and hands-on training methods designed to make the learning process more sustainable and effective. These methods include structured role plays and mock negotiations, case analysis, facilitated class discussions, and self-assessment tools.

The course language is English (proficiency required).

To ensure an interactive and intensive learning environment, the number of participants is limited to a maximum of 24.

Learning Outcome:

Upon successful completion of this course, students will:

- have enhanced their negotiation skills and emotional intelligence, by having reflected critically on their own negotiation behavior, learned how to manage emotions constructively, and how to use feedback to drive continuous personal and professional development;
- have developed a robust foundation for effective negotiation across private, professional, societal, and international settings; and
- be prepared to transfer these skills to real-world contexts.

The course emphasizes transformational personal development, experiential learning, and continuous improvement, equipping students for lifelong growth in negotiation and conflict management.

Target Groups:

Master students

Languages of Instruction:

The course language is English, therefore, proficiency in English is essential.

Course Materials:

Required reading (to be completed no later than the second day of class):

Roy J. Lewicki, Bruce Barry, and David M. Saunders, Essentials of Negotiation, 8th International Edition (2024), New York: McGraw-Hill, ISBN 978-1-266-91339-6. This book explores major concepts and theories of negotiation psychology, as well as the dynamics of interpersonal and intergroup conflict and their resolution. It can be ordered from Orell Füssli and is also expected to be available at the ETH Store. Additional required readings and homework assignments (including preparation and debriefing materials) will be distributed during the course. Optional readings are available for further study.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Matthias Oesch

Requirements:

Prerequisites:

If you wish to embark on this challenging, practice-oriented, and reflective journey to improve your negotiation skills, submit a one-page motivation letter in English during the application period via the module booking tool (accessible through the Student Portal under "Announcements and Module Booking"). The letter should include:

1. your background (name, nationality, home university, field of study, and any experience in negotiation or conflict resolution);
2. your motivation for attending the course and your learning goals.

Admissions are based on available places. Waiting list procedures apply if necessary. This procedure is intended to ensure that only admitted students attend the first day of the course.

Important: Attendance for all scheduled sessions is mandatory, including a possible reserve day in early December. Unexcused absences or late submission of required work will result in a grade of 1.0.

Prior Knowledge:

-

Assessment:

Grades are based on:

- i) A research paper (6-8 pages, English) on a selected negotiation topic (33% of the final grade);
- ii) A negotiator's journal with at least four reflective entries (~3 pages each, English)

(33%);

iii) In-class performance, encompassing active participation in class, negotiation exercises, and individual and group presentations (33%).

Detailed information on these assessments, as well as on course structure, expectations, and evaluation criteria, will be provided in a booklet titled Guide to the UZH Course "Negotiation and Conflict Management", which will be distributed at the beginning of the course to all students who have been formally admitted.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated as necessary

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module Environmental Law

02SM90WM31 / Course

Description:

General description:

Das Umweltrecht ist ein jüngerer und sehr dynamisches Gebiet des Besonderen Verwaltungsrechts. Das Modul vermittelt einen Überblick über die einzelnen Teilgebiete des Umweltrechts (Schutz vor Luftverunreinigung und Lärm, Gewässerschutz, Biotopschutz, Landschaftsschutz, Schutz des Waldes, Umgang mit Abfällen und Altlasten, Klimaschutz usw.). Zugleich vertieft es die im Bachelor-Studium erworbenen Kenntnisse im Staatsrecht, im Allgemeinen Verwaltungsrecht und im öffentlichen Verfahrensrecht.

ECTS: 6

Learning Outcome:

1. Überblick über die Teilgebiete des Umweltrechts; vertiefte Kenntnisse in einzelnen Teilgebieten.
2. Vertrautheit mit den Grundprinzipien und den Instrumenten des Umweltrechts.
3. Fähigkeit, umweltrechtliche Problemstellungen zu bearbeiten.

Target Groups:

Masterstudierende, die Interesse am Öffentlichen Recht und am Schutz unserer Umwelt haben

Languages of Instruction:

Deutsch

Module White Collar Crime

02SM90SR3 / Course

Description:

General description:

Die Veranstaltung führt in die Grundlagen des Wirtschaftsstrafrechts ein. Im ersten Teil werden Begriff, Phänomenologie und aktuelle Entwicklungen im nationalen und internationalen Wirtschaftsstrafrecht vorgestellt. Der zweite Teil behandelt die besonderen Haftungsformen der Geschäftsherrenhaftung und der Unternehmensstrafbarkeit. Der Fokus des dritten Teils liegt auf ausgewählten Deliktsfeldern. Angesprochen werden Betrugsdelikte, Korruption, ungetreue Geschäftsbesorgung und Veruntreuung sowie Geldwäscherei. Neben dem materiellen Wirtschaftsstrafrecht werden die rechtlichen und forensischen Besonderheiten der Prävention (Compliance) und Aufklärung (internal investigations) von Wirtschaftsdelikten in Unternehmen behandelt.

ECTS: 6

Learning Outcome:

Sie können Fälle wirtschaftsdelinquenten Verhaltens bearbeiten sowie Problemstellungen aus dem Bereich des Wirtschaftsstrafrechts selbständig analysieren und bewerten. Das heisst insbesondere:

Sie erkennen spezielle Probleme, die das Wirtschaftsstrafrecht an den AT, BT und an das Strafprozessrecht stellt. Insb. auch in int. Fällen.

Sie kennen wirtschaftsrechtlich relevante Delikte des Strafgesetzbuchs und einzelne einschlägige Teilbereiche des Nebenstrafrechts.

Sie beherrschen Modelle und Voraussetzungen von Individualhaftung und Unternehmensstrafbarkeit.

Target Groups:

Masterstudierende, welche sich für Fragestellungen an der Schnittstelle von Straf- und Wirtschaftsrecht interessieren.

Languages of Instruction:

deutsch

Course Materials:

Die Texte zur Pflichtlektüre werden im Rahmen der Vorlesung bekanntgegeben.

Merkmale:

Module Workshop and Lecture Series on the Law and Economics of Innovation

02SM90WM36 / Course

Description:

General description:

The Workshop & Lecture Series is a joint project of ETH Zurich and the Universities of St. Gallen and Zurich. The series provides an overview of current interdisciplinary research on innovation, intellectual property, antitrust, privacy and technology policy. Scholars from law, economics, management, computer science, psychology and related fields give a lecture and/or present their current research. All speakers are internationally well-known experts from Europe, the U.S., and beyond.

ECTS: 6

Notes:

Room information: Workshops on Tuesdays are held at UZH, on Wednesday at ETH (see ETH website).

Learning Outcome:

The goal is to discuss cutting-edge research papers and to provide constructive criticism about points that deserve further analysis. An independent attitude towards scientific methods and results is to be promoted.

Target Groups:

Suitable for English Speakers

Languages of Instruction:

English

Course Materials:

The papers presented are available via the ETH web page: <https://lawecon.ethz.ch/teaching/innovation-series.html>

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Andreas Heinemann

Requirements:

Assessment:

Achievement record: In order to receive credit points, students must attend a minimum number of lectures/workshops on the program (the exact number will be announced in due course) and write an accepted comment on the posted papers in advance of the lecture/workshop (8 pages minimum).
Moreover, students participate actively in the course and provide for this purpose two questions on four of the presented papers in advance.

Grading Scale:

1-6, Half Grades Given

Module Zurich Evening Talks on Legal History

02SM90WM37 / Course

Description:

General description:

Die Lehrveranstaltung besteht aus drei Vortragsveranstaltungen im Semester mit in der Regel auswärtigen Referentinnen und Referenten.

ECTS: 3

Notes:

Die Veranstaltung bietet 11 interessierten Teilnehmenden Platz. Die Zuteilung der Plätze erfolgt nach der von den Studierenden vergebenen Priorität und in zweiter Linie nach dem Zufallsprinzip. Die Veranstaltung richtet sich primär an Masterstudierende. Das Modul steht zudem Bachelorstudierenden als vorgezogenes Master-Modul offen. Voraussetzung hierfür ist gemäss §

39 der ab HS

2021 gültigen Rahmenverordnung, dass zuvor bereits mindestens

150 ECTS-Punkte an der Rechtswissenschaftlichen Fakultät im Rahmen des Bachelorstudiums erworben wurden.

Die Anmeldung erfolgt über das Buchungstool der UZH.

Für das Modul gelten die Modalitäten für Anfragemodule. Insbesondere sind die unter ORGANISATION angegebenen Fristen zu beachten.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor:

Andreas Thier
Elisabetta Fiocchi Malaspina
Ulrike Babusiaux
José Luis Alonso

Module Contract Design I

02SM90WM4 / Course

Description:

General description:

Contract Design I is taught by Professor Stremitzer and aims to bridge the gap between economic contract theory, contract law, and the writing of real-world contracts. In this course, we take a systematic approach to contract design. This means we first analyze the economic environment in which a transaction takes place, and then engineer contracts that achieve the desired outcome.

Contracts are agreements between parties to engage in transactions. A good contract creates value by giving parties the right incentives to meet their objectives. A good contract designer scrutinizes the economic situation in which parties find themselves and tailors the contract to the challenges at hand. To help you become sophisticated contract designers, we draw from insights for which more than half a dozen Nobel Prizes were awarded in the past two decades and transfer them to the art of writing real-world contracts. In other words, Contract Design will provide you with analytical tools to design contracts that help you be better lawyers, business leaders, and startup founders.

We will cover topics such as moral hazard, adverse selection, elicitation mechanisms, relationship-specific investments, and relational contracting and apply the theoretical insights to real-life case studies ranging from purchases & sales of assets, oil & gas exploration, movie financing, production & distribution, construction & development, M&A deals, venture capital financing, to executive compensation and many other types of transactions.

The course follows a flipped-classroom model: You will watch learning videos specifically produced for this course ahead of class. We will use class time to discuss real-world case studies. The videos will be made available before the lecture each week and need to be watched to participate in the lecture. The concepts discussed in the videos will then be asked on the quizzes.

As the emphasis of this class is on class discussion, attendance is mandatory. Absent important reasons you cannot miss class more than twice.

The lectures will be recorded, but only made available to those who miss lectures with excused absence.

UZH students: Your grade will consist of four parts:

1. You will take weekly computer-based quizzes during class time. Thus, it is important that you attend the lectures to be able to finish the quizzes and pass this course.
2. You compose short responses to take-home questions on case studies we assign and upload them ahead of class (Pass/Fail).
3. You complete a 2-page assignment consisting in identifying an interesting contractual arrangement (contracts in standard-form collections, real world contracts you might find, etc.) and offer a written critique of the contract from a contract-design perspective (Pass/Fail).
4. You participate in a group project where your team prepares and records a PowerPoint presentation on an assigned comprehensive case study. You will take the role of consultants advising a company board on the design of an upcoming major transaction.

Note that ETH and UNISG students enrolling in this course need to earn less ECTS for completing this course than UZH students (due to curricula reasons; ETH: 3 ECTS; UNISG: 4 ECTS). This is why ETH students only have to complete the weekly computer-based quizzes and the take-home questions. And UNISG students have to complete the weekly computer-based quizzes, the take-home questions, and a written comment on real-life contractual provision.

Check out the Welcome Video to learn more.

Link: <https://contractdesignlab.com/videos/001-introduction>

ECTS: 6

Notes:

You can find all course materials on the course webpage (Link: contractdesign.org). You will have to log on to the course webpage with your username and password. In case your university has not purchased a license for participating students, accessing the course materials will cost 49.- CHF (Currently UZH does not have such a subscription).

Links to quizzes and class announcements will be made available through Moodle. Please log in to Moodle using your ETH or UZH credentials. Then search for "Contract Design I (851-0742-00L; Fall 2023)" and enroll. The password is "ContractDesign01".

If you have any questions regarding the course, please write an email to the teaching assistants, Lucas Gericke (lucas.gericke@gess.ethz.ch) or Serge von Steiger (serge.vonsteiger@gess.ethz.ch).

Learning Outcome:

Please refer to the general description of Contract Design I to find out more about the learning outcomes.

Target Groups:

This course targets UZH law students who are pursuing their master's degrees and are interested in transactional work. As it is a joint course together with ETH and HSG, there will also be students from these universities.

Languages of Instruction:

English

Course Materials:

Handouts, prerecorded videos, slides, and other materials

In case your university has not purchased a license for participating students, accessing the course materials will cost 49.- CHF.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Andreas Heinemann

Requirements:

Prior Knowledge:

Basic knowledge of contract law is useful, but not necessary.

Assessment:

Computer-based quizzes, take-home case study questions (Pass/Fail), take-home 2-page essay (Pass/Fail), group presentation.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated as necessary

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline:

Module Data Protection Law

02SM90WM5 / Course

Description:

General description:

Die Veranstaltung vermittelt vertiefte Kenntnisse des schweizerischen und europäischen Datenschutzrechts. Das schweizerische Datenschutzgesetz (DSG) und die Datenschutzgrundverordnung der EU (DSGVO) werden parallel behandelt. Die Veranstaltung besteht aus zwei Teilen: In einem ersten Teil werden die Grundlagen vermittelt. In einem zweiten Teil präsentieren die Studierenden einzeln oder in Kleingruppen (abhängig von der Teilnehmendenzahl) die wichtigsten Gerichtsentscheide des Bundesgerichts und des EuGH im Bereich des Datenschutzrechts.

ECTS: 6

Learning Outcome:

Die Studierenden erarbeiten sich vertiefte Kenntnisse des schweizerischen und europäischen Datenschutzrechts und sie lernen, einen Gerichtsentscheid zu präsentieren und mit einem Fachpublikum zu diskutieren.

Target Groups:

Master-Studierende in Rechtswissenschaften

Languages of Instruction:

Deutsch

Course Materials:

Folien und Gerichtsentscheide

Module Property Taxes, Inheritance and Gift Taxes

02SM90WM9 / Course

Description:

General description:

Das Modul dient der Einführung in das System und die Ordnung der Besteuerung von Grundstücksgewinnen, der Handänderungssteuer und des Grundsteuerpfandrechts sowie in die damit zusammenhängenden verfahrensrechtlichen Fragen. Ausserdem erfolgt eine Einführung in das System und die Ordnung der Besteuerung von Vermögensübergängen bei Schenkung und Erbgang sowie in die verfahrensrechtlichen Probleme im Erbschafts- und Schenkungssteuerrecht. Soweit kantonales Recht in Frage steht, erfolgen die Erörterungen zur Hauptsache am Beispiel des Kantons Zürich, aber auch weiterer ausgewählter Kantone (v.a. Aargau und Bern). Im Rahmen der Vorlesung werden Übungsfälle besprochen, und es besteht Gelegenheit zur schriftlichen Fallbearbeitung mit Leistungsnachweis.

Module Assessed Work Neurolinguistics and Psycholinguistics

06SM272-526 / Module

Description:

General description:

Students familiarize themselves with a current topic of research independently but with guidance, and prepare a larger-scale research project, with the aim of learning how to formulate hypotheses, how to test their predictions, how to conduct pilot studies and how to write a project proposal. This course lends itself to the preparation of an MA thesis research question.

ECTS: 6

Notes:

Please send an e-mail to studyadvisor@isle.uzh.ch so that we can assign you to a supervising lecturer.

Learning Outcome:

Advanced knowledge of a sub-field of neurolinguistics or psycholinguistics and practical experience in designing and presenting research questions

Languages of Instruction:

Deutsch oder Englisch - gemäss individueller Absprache mit der Betreuungsperson

Merkmale:

Responsible instructor: Martin Meyer

Requirements:

Prerequisites: This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module.

Assessment: documented practical work

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Organisation:

Offer pattern: 1 Semester (Every Semester)

Module BME 365 Cellular Modelling of Neuropsychiatry

07SMBME365 / Block Course

Description:

General description:

Since the discovery of induced pluripotent stem cells (iPSC) technology by Yamanaka and Takahashi in 2006, this powerful human stem cell technology has gained great interest worldwide across many biological and medical science fields. Mental disorders, including autism spectrum conditions, schizophrenia, anorexia nervosa, bipolar and Attention Deficit Hyperactivity Disorder (ADHD) to name a few, have genetic/polygenic, neuro-immunological, environmental and neurodevelopmental causes, with complex aetiology to be yet revealed. Patient specific iPSC-disease modelling promise new opportunities in treatment monitoring, discovery of optimal medication in homogeneous patient groups and new diagnostic markers for identifying different disease subtypes. The course will provide some insights into the technology, with background knowledge to personalized cellular modelling, and hands-on experience in the culturing and quality control (QC) techniques from somatic cells up to neural cells known in the CNS.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybiportal.uzh.ch>

Location: Schlieren Campus, Wagistrasse 12,
6th Floor (Lab and seminar room) and 5th Floor (Lab)

Learning Outcome:

On completion of the module students should be able to:

- To comprehend SOPs and carry out experiments with basic scientific question.
- To culture somatic cells (e.g. blood cells and keratinocytes), iPSC, NPC and oligodendrocytes following by QC using various techniques (e.g. ICC, qRT-PCR)
- Discuss scientific research publications in the field and present them in a comprehensive manner.

Key Skills

- Perform lab experiments using iPSC, NPCs and oligodendrocytes under guidance.
- Work collaboratively within small groups.
- Write research report, and discuss results critically.
- Comprehend and present scientific papers.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Edna Grünblatt

Requirements:

Prerequisites:

Basic studies completed
(of advantage background in cell biology, developmental biology/nervous system, molecular and cellular neurobiology, or brain disorders)

Assessment:

A short report containing description of the methods, the results, and critical discussion of the results, as well as a scientific paper presentation (in the course topic) will be required for the assessment.

- all in English

- graded

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Module Fortbildung EEG/Epileptologie/Schlaf

04SMPED21001 / Seminar

Description:

ECTS: 0

Notes:

März - Juni 2023

Donnerstag

17:00 - 18:00 Uhr

Raum: OH1.E03

(falls nicht anders angegeben)

Datum:

02.03.2023 Reifung des EEGs

Prof. Dr. med. G. Ramantani

23.03.2023 Status epilepticus

OH1.E09 Dr. med. S. Demirbas (OH1.E09)

30.03.2023 Epileptische Encephalopathien von Säuglingen Dr. med. S. Bürki

13.04.2023 High Frequency Oscillation

Prof. Dr. med. G. Ramantani

04.05.2023 Myoklonusepilepsien

Prof. Dr. med. G. Ramantani

25.05.2023 Das iktale EEG

Dr. med. A. Rüegger

08.06.2023 Koma und EEG

Dr. med. S. Bürki

15.06.2023 Pharmakotherapie in der Epileptologie und die Effekte auf das EEG

Dr. med. S. Demirbas

29.06.2023 Normales und abnormales Früh- und Neugeborenen-EEG Prof. Dr. med. B. Schmitt

Learning Outcome:

Veranstaltungsbeschreibung: (Lerninhalte / Lernziele / Unterrichtsformate / Prüfungsform)

Lerninhalte (werden innerhalb 2 Semester vollständig abgedeckt): Epileptologie

i. Kenntnisse über die wichtigsten pädiatrischen Epilepsiesyndrome, inkl. Semiologie, EEG-Merkmale, Ätiologie, Diagnosestellung, Spontanverlauf

ii. Grundlagen der Pharmakotherapie und anderer therapeutischer Möglichkeiten (z.B. Epilepsiechirurgie)

iii. Differentialdiagnose der paroxysmalen Erkrankungen Elektroenzephalographie (EEG)

i. Erlangen von theoretischen Kenntnissen wie Ger tekunde, Montage von Elektroden, Grundlagen der Potentialregistrierung, Physiologie und Pathophysiologie der EEG-Entstehung, simultane EKG, EMG und Respirationsmessungen, Grundlagen der Hirntod-Diagnostik ii. Erlangen von praktischen Kenntnissen wie selbstst ndiges Durchführen

von EEGs mittels Oberflächenelektroden, Anwendung von Provokationsmethoden, Durchführen von Reaktivitätstestungen, Durchführen von simultanen EKG und EMG-Ableitungen, Beurteilung der Hirnreifung, Einteilung der Schlafstadien, Kenntnisse von physiologischen sowie von pathognomonischen pädiatrischen und adulten EEGs Schlafdiagnostik Befundung von Polysomnographien oder anderen EEG-Polygraphien und/oder Untersuchungen der evozierten Potentiale Lernziele: Teilnehmer erlernen die Grundlagen der Elektroenzephalographie, der (pädiatrischen) Epileptologie sowie der Schlafdiagnostik im klinischen sowie im wissenschaftlichen Kontext. Der Kurs wird nach den Richtlinien der SGKN bzw. der SGNP durchgeführt. Er richtet sich an Medizinstudierende, AssistenzärztInnen, Fachpersonen für die Neurophysiologische Diagnostik und WissenschaftlerInnen. Unterrichtsformat: Seminar mit 10-20 TeilnehmerInnen, 17:00-18:00h, 12 Termine pro Semester, digitale Teilnahme an der Veranstaltung möglich Prüfungsform: Keine Abschlussprüfungen. Praktische Übungen mit Fallbeispielen in Kleingruppen während des Seminars.

Module HE: Disziplinäre Hermeneutik I

01SM23LB024 / Seminar

Description:

ECTS: 6

Notes:

Hinweise: Die im Rahmen des Moduls zu absolvierenden Veranstaltungen sollen in Absprache mit der Studienberatung Hermeneutik (michaelnathan.goldberg@uzh.ch) gebucht werden.

Learning Outcome:

Die Studierenden erarbeiten Kompetenzen in einem spezifischen disziplinär-hermeneutischen Themenfeld (i. d. R. in ihrem Major). Sie machen sich klar, welche Begrifflichkeiten, Argumentations- und Geltungsmuster im betreffenden Fall im Spiel sind. Flankierend zur Veranstaltung: Abfassung einer PS-Arbeit

Merkmale:

Responsible instructor: Matthias D. Wüthrich

Requirements:

Assessment: dokumentierte aktive Teilnahme

Grading Scale: Pass/Fail

Repeatability: Can be repeated twice

Organisation:

Offer pattern: 1 Semester (Every Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module HE: Interdisziplinäre Hermeneutik

01SM23LB023 / Seminar

Description:

General description:

Fortgeschrittene Kompetenz in allgemeiner Hermeneutik in interdisziplinären Feldern

ECTS: 6

Notes:

Hinweise: Es ist möglich, im Rahmen des Moduls eine Veranstaltung zu besuchen, die im Vorlesungsverzeichnis nicht verknüpft sind. In diesem Fall sollen die Veranstaltungen in Absprache mit der Studienberatung Hermeneutik (michaelnathan.goldberg@uzh.ch) gebucht werden.

Studierende die das Modul HE: Interdisziplinäre Hermeneutik absolvieren möchten, buchen separat eines der folgenden Module:

Die Sprache der Macht – die Macht der Sprache (10SMSTSp100)

Fake Science - Isolated Cases or a Systemic Problem? (10SMSTSp101)

Learning Outcome:

Die Studierenden vertiefen ihre hermeneutische Kompetenz in einer dezidiert interdisziplinär ausgerichteten Lehrveranstaltung. Sie üben sich ein in die Reflexion der jeweiligen disziplinären bzw. disziplinenübergreifenden Begrifflichkeiten, Argumentations- und Geltungsmuster.

Module BIO 663 The Impact of Ethics on Doing Science

07SMBIO663 / Doktorandenseminar

Description:

General description:

In this interactive 2-day course/workshop* we will examine the relationship between science and ethics.

On the one hand, science and its applications raise ethical issues in society and impact how ethical principles, such as justice or solidarity, are implemented. We will discuss the impact of science on ethical questions in society using the example of genetic research and its application in genetic tests and genome editing. On the other hand, science is also affected by ethical principles in the form of code of conducts and guidelines. We will examine the effect of ethics on the practice of science by asking: What are these codes of conduct? How do we implement them? How are they evolving? Focusing on practical examples we will address the questions - Should I? Should I ignore that data point? Should I perform that experiment?

The course includes case studies, paper discussions and exercises.

* If held remotely (online) the course will run as 4 half days.

ECTS: 1

Notes:

Exact course dates and rooms will be communicated in advance to all registered students.

Merkmale:

Module BME 316 Glycosylation

07SMBME316 / Course

Description:

General description:

The course provides an in-depth coverage of the biology of glycosylation in all domains of life. Focus is set on the structures and functions of glycans in health and disease. The role of glycosylation in protein folding and trafficking, in pathogen recognition, in diseases such as inherited disorders and cancer will be discussed. Model organisms and analytical methods will also be presented.

ECTS: 3

Learning Outcome:

On completion of the module, the students should have detailed knowledge in

1. the different areas of prokaryotic and eukaryotic glycobiology, in particular in the biosynthesis of glycoproteins and glycolipids,
2. the cellular machinery required for these pathways
3. the principles of carbohydrate/protein interaction,
4. the function of lectins,
5. the role of glycans in infectious diseases and cancer.

Module KG: Seminararbeit Antike oder Mittelalter

01SM22BL004 / Seminararbeit

Description:

General description:

Eigenständige, methodisch reflektierte Interpretation von kirchengeschichtlichen Quellentexten aus Antike oder Mittelalter

ECTS: 3

Learning Outcome:

Die Studierenden üben sich in eigenständiger, den Forschungsstand berücksichtigender Urteilsbildung im Umgang mit exemplarischen kirchengeschichtlichen Quellentexten.

Merkmale:

Responsible instructor: Silke-Petra Bergjan

Requirements:

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated twice

Organisation:

Offer pattern: 1 Semester (Every Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Organisation: Faculty of Theology and the Study of Religion

Offered in:

- Spring Semester 2027
- Fall Semester 2026
- Spring Semester 2026
- Fall Semester 2025
- Spring Semester 2025
- Fall Semester 2024
- Spring Semester 2024

Module KRI 202 Foundations of Materials Science I

07SMKRI202 / Lecture with Practical Exercises

Description:

General description:

The basic physical concepts for the description of materials are taught, partly in self-study, and applied in exercises. Basic atomistic and macroscopic concepts (e.g. phase diagrams, phase transformations, response functions) are introduced through examples. Selected topics are deepened in classroom lectures.

Contents:

- Atomic structure
- Crystalline structure and defects
- Thermodynamics, phase diagrams and phase transformations
- Diffusion
- Mechanical and thermal properties of materials

ECTS: 2

Notes:

Module together with ETH (Lerneinheit 327-0113-00L), takes place at ETH.

This module can't be booked at the UZH. Students of the UZH, please, register at the ETH and book the module through the ETH-system: <https://ethz.ch/de/studium/non-degree-angebote/fachstudierende/fachstudierende-uzh.html>

After completion of the module your grade and ECTS will be transferred automatically to the UZH-system.

Learning Outcome:

Students are able to

- name the basic concepts of materials science. (remember, 1)
- describe simple relations between atomic structure and macroscopic properties. (understand, 2)
- calculate basic material-specific quantities. (apply, 3)
- read and interpret phase diagrams, material characteristic (e.g. stress-strain) diagrams and Ashby plots (analyse, 4)

Module BIO 250 Drug efficacy and pathway assessment in pediatric brain cancer models

07SMBIO250 / Block Course

Description:

General description:

Diffuse midline gliomas (DMGs) are one of the most challenging childhood brain cancers. The average survival rate of children diagnosed is less than one year. Due to their critical anatomical location, these tumors are surgically not resectable. Furthermore their infiltrative and invasive nature are some of the major characteristics determining the poor survival. Another limitation is represented by the presence of the blood-brain barrier hindering the efficient delivery of drugs to the tumor region.

Prospective students will join a team of translational scientists who pursue discovery of effective therapies for DMG patients. As such, the course will include handling of DMG cells and performing drug response assays in a sterile environment. Furthermore, the effect of the drugs to the tumor cells will be further investigated by western blot and if necessary other methods, to confirm drug targets, study drug effect on a molecular level and perform pathway analysis.

Additionally, general discussions on how successful preclinical studies are translated into early phase clinical trials will be held.

ECTS: 6

Notes:

Die Anmeldung für Blockkurse erfolgt hier: <https://www.mybioportal.uzh.ch>

Learning Outcome:

By the end of the course, the students should be able to...

- Describe the basic biology of DMGs, the challenges in curing the patients and treating the tumour.
- Plan and set up an in vitro experiment incl. literature research, performing the experiment, analyse the data, presenting the data
- Handling and working with human cell lines
- Reproduce the manipulating and experimenting with human cell line
- Perform drug assays incl. assessment of response
- Perform morphological observation of treated and untreated DMG cells using microscopy.
- Perform western blots from treated and untreated cell lines for molecular and pathway analysis.
- Plan, prepare and present literature and results to team colleagues
- Understand the requirements and basic principles of translating laboratory findings from the bench to the clinic

The course provides an insight into current translational research and shows how challenging it is to develop new treatments.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Javad Nazarian

Requirements:

Prerequisites:

Basic studies completed

Assessment:

At the end of the course students will present their project orally to the whole team and afterwards hand in a report (5-7 pages). In English.

The report and the presentation will be graded.

Grading Scale: 1-6, Half Grades Given

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module KRI 204 Electron and Ion Microscopy in Material Science

07SMKRI204 / Lecture with Practical Exercises

Description:

General description:

A comprehensive understanding of the interaction of electrons and ions with condensed matter and details on the instrumentation and methods designed to scan, transmit, and point-project these probes in the structural and chemical analysis of various materials.

This course provides a general introduction to the electron- and ion- microscopy methods applied to characterizing inorganic and organic materials. In the first part, the basics of transmission- (TEM) and scanning electron microscopy (SEM) are presented with insights of imaging and image processing. The second part includes the most important aspects of specimen preparation strategies, focused ion-beam (FIB), atom probe tomography (APT), and in-situ microscopy methods. Throughout the semester, various applications in materials science, solid state physics, structural biology, structural geology, and structural chemistry will be reported.

ECTS: 4

Notes:

Module together with ETH (Lerneinheit 327-0703-00L), takes place at ETH.

This module can't be booked at the UZH. Students of the UZH, please, register at the ETH and book the module through the ETH-system: <https://ethz.ch/de/studium/non-degree-angebote/fachstudierende/fachstudierende-uzh.html>

After completion of the module your grade and ECTS will be transferred automatically to the UZH-system.

Learning Outcome:

A comprehensive understanding of the interaction of electrons and ions with condensed matter and details on the instrumentation and methods designed to scan, transmit, and point-project these probes in the structural and chemical analysis of various materials.

Module KRI 205 EM-Practical Course in Materials Science

07SMKRI205 / Praktikum

Description:

General description:

- Practical work on TEM, SEM, FIB and APT
- treatment of typical problems
- data analysis, writing of a report

ECTS: 2

Notes:

Maximum number of participants: 15

The practical course takes place during the week 11.-15. Jan 2027 full days in the labs of ScopeM (ETH Hönggerberg).

Module together with ETH (Lerneinheit 327-0702-00L), takes place at ETH.

This module can't be booked at the UZH. Students of the UZH, please, register at the ETH and book the module through the ETH-system: <https://ethz.ch/de/studium/non-degree-angebote/fachstudierende/fachstudierende-uzh.html>

After completion of the module your grade and ECTS will be transferred automatically to the UZH-system.

Module in-vitro techniques in animal nutrition

05SMW79 / Forschungsseminar

Description:

General description:

Semesterübergreifendes-Peer-learning-Projekt in der Tierernährung - zum Einstieg in das wissenschaftliche Arbeiten: Die Studierenden erhalten anhand praktischer Arbeiten vertiefte Einblicke in die mikrobielle Fermentation im Pansen (Wiederkäuer) bzw.

Dickdarm (Pferd und Schwein).

Sie untersuchen in Kleingruppen die Kinetik des mikrobiellen Abbaus der Nährstoffe und deren Beeinflussung durch diätetische Massnahmen.

Besonderer Fokus liegt auf den praktischen in-vitro-Versuchen, auf der Auswertung, Präsentation und Diskussion der Ergebnisse. Die Techniken werden durch ein begleitendes didaktisches Onlinemodul erlernt.

ECTS: 2

Learning Outcome:

- Kennenlernen von in-vitro Techniken zur Untersuchung der Prozesse der Pansen- bzw. Dickdarmfermentation
- Heranführung an experimentelles, wissenschaftliches Arbeiten bereits im Studium
- Präsentationstechniken erlernen und anwenden
- Kollegiales Feedback
- Generierung fachübergreifender Kompetenzen
- Orientierungshilfe für die berufliche Zukunft

Target Groups:

Bachelor- und Masterstudierende Veterinärmedizin, Doktorierende und Assistierende Veterinärmedizin

Languages of Instruction:

Deutsch

Course Materials:

Werden den TeilnehmerInnen zur Verfügung gestellt (Fachliteratur), Online-Modul der Didaktik

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Brigitta Wichert Gruber
Annette Liesegang

Requirements:

Prerequisites:

Interesse an in-vitro-Techniken in der Tierernährung, dem Erlernen wissenschaftlicher und didaktischer Techniken und kooperative Zusammenarbeit mit Kommilitonen verschiedener Semester

Assessment:

Teilnahme und abschließende Präsentation der Ergebnisse

Grading Scale:

Pass/Fail

Module Seminar: Swiss Moot Court

02SM120MC3S / Seminar

Description:

ECTS: 6

Notes:

Der Moot Court umfasst 6 ECTS und wird im Bachelor als Bachelorarbeit und im Master als Wahlmodul anerkannt.

Teilnehmende der UZH melden sich in Teams gemäss den Regeln der Organisation Swiss Moot Court für den Wettbewerb an (<http://www.swissmootcourt.ch>).

Für eine Anerkennung der Teilnahme an der Universität Zürich ist eine verbindliche Anmeldung jedes einzelnen Teilnehmenden via Kontaktformular (<https://www.ius.uzh.ch/de/studies/contact-form.html>) bis 1. Oktober erforderlich (die Buchung des Moduls wird von der Prüfungsplanung übernommen). Wählen Sie im Kontaktformular die Kategorie Modulbuchung -> Zuteilung zu Proseminar/Seminar/Fallbearbeitung/Moot Court. Im Anmeldeformular sind zwingend die Teamnummer, Matrikelnummer, Stufe (Bachelor oder Master), Anrechnungswunsch (Bachelorarbeit oder Master-Wahlmodul) und E-Mailadresse anzugeben.

Die Abgabe von Beschwerdeschrift und -antwort hat innert Frist gemäss Vorgabe der Organisation Swiss Moot Court zusätzlich zu erfolgen an: Ist.dedual@ius.uzh.ch

Module Language Skills for Teachers of Russian

06SM480-539 / Module

Description:

General description:

Das Modul «Sprachkompetenzprüfung für Lehrdiplom Russisch» richtet sich ausschliesslich an Personen, die das Lehrdiplom Russisch anstreben. «Sprachkompetenzprüfung für das Lehrdiplom Russisch» konzentriert sich auf die Sprachkenntnisse, die von Russischlehrer*innen benötigt werden:

z.B. Orientierung auf die kontrastive Linguistik (beziehungsweise Morphologie, Lexik, Semantik, Syntax, Stilistik und Pragmatik), häufige Ursachen für Sprachfehler im Russischen und Fehleranalyse, deutsch-russische Übersetzungstechniken.

ECTS: 3

Learning Outcome:

Das Modul erweitert und vertieft die Sprachkompetenzen, die von Russischlehrerinnen und Russischlehrern am Gymnasium verlangt werden. Die Studierenden vertiefen ihre Kenntnisse der Grammatik des Russischen, bauen ihre Fähigkeiten im Bereich Textverständnis,

-produktion und

-analyse aus und entwickeln ihre mündliche und schriftliche Ausdrucksweise weiter. Das abgeschlossene Modul ist Voraussetzung für den Besuch der Module «Fachdidaktik Russisch» (auch für Muttersprachler*innen) und erbringt, nach erfolgreich abgelegter Sprachkompetenzprüfung am Ende des Semesters, den für den Abschluss des Lehrdiploms erforderlichen Sprachnachweis (C1).

Languages of Instruction:

Russisch

Merkmale:

Responsible instructor:

Olga Burenina-Petrova

Requirements:

Prerequisites:

bestandenes Modul "Russisch Ausbaustufe 2" oder entsprechende Vorkenntnisse (Sprachkenntnisse Russisch auf dem Niveau von mind. B2+/C1)
Dieses Modul steht nur Master-Studierenden offen. Es darf nicht von Bachelor-Studierenden als vorgezogenes Mastermodul gebucht werden.

Assessment:

Portfolio (schriftliche Prüfung 70%, mündliche und schriftliche Übungen 30%)

Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden.
Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden.

Grading Scale:

Module Chemistry

05SM.112_chm / Course

Description:

General description:

Vorlesung, Teil 1: Allgemeine und anorganische Chemie

A. Materie, Stoffe und Stoffeigenschaften: Atome und Atombau, Typen chemischer Bindung, Erscheinungsformen der Materie, Aggregatzustände und Phasenumwandlung

B. Chemische Reaktionen:

Reaktionsgleichungen, Thermodynamik, Kinetik, Mechanismus, chemisches Gleichgewicht und Massenwirkungsgesetz

C. Die Chemie der Elemente überwiegend aus Biologischer Sicht: Wasserstoff, Alkali- und Erdalkalimetalle, Bor, Kohlenstoff, Silicium, Stickstoff, Phosphor, Sauerstoff, Schwefel, Halogene, Koordinationsverbindungen, biologische und medizinische Bedeutung von Komplexen

Vorlesung, Teil 2: Organische Chemie

A. Struktur und Eigenschaften organischer Moleküle: Bindungslehre und Spektroskopie, Stereochemie, Funktionelle Gruppen, Stoffklassen, typische Reaktionen

B. Biologisch und medizinisch relevante Naturstoffklassen: Lipide, Geruchstoffe, pflanzliche Farbstoffe, Vitamine, Steroide, Alkaloide (Gifte, Heilmittel, Genussmittel), Aminosäuren und Peptide, Kohlenhydrate, Nucleinsäuren

Praktikum:

Praktische Tätigkeiten im Labor, Herstellen von Lösungen, Analyse, Synthese eines Wirkstoffs, Katalyse, Eigenschaften von Enantiomeren

ECTS: 0

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Oliver Zerbe

Requirements:

Assessment: schriftlich

Zusammengesetzte Prüfung 10 ECTS Credits:

- Chemie (Anteil 5 ECTS Credits)

- Physik (Anteil 5 ECTS Credits)

Termine und Modalitäten werden zu Beginn des Semesters zur Verfügung gestellt.

Grading Scale: Percentage Scale *

Repeatability: Can be repeated twice

Module Locomotory System

05SM.121_bw / Lecture with Practical Exercises

Description:

General description:

Die Studierenden lernen die passiven (Knochen, Gelenke) und aktiven (Muskulatur) Bestandteile des Bewegungsapparats kennen. Die Vorlesungen dienen der Wissensvermittlung, die praktischen Übungen verfestigen das Wissen und sollen den Boden legen für die praxis-relevanten Bereiche (z.B. Chirurgie) in höheren Semestern in der Veterinärmedizin.

ECTS: 0

Learning Outcome:

Die Studierenden können den allgemeinen Bau, die Funktionen, sowie die Entwicklung von Knochen, Gelenken, Muskeln, Sehnen und Sehnenscheiden erläutern. Sie können Gelenke, klinisch wichtige Muskeln bzw. Muskelgruppen, Sehnen und Sehnenscheiden am Präparat, am lebenden Tier und an einer Abbildung auffinden, benennen und die Funktionen erläutern.

Die Studierenden können an Röntgenbildern klinisch relevante Knochenpunkte, insb. Ansatzstellen von Bändern, Muskeln und Sehnen, sowie Gelenke und Gelenkspalten auffinden und benennen und ihre Funktion erläutern.

Merkmale:

Responsible instructor: Mariusz Pawel Kowalewski

Requirements:

Assessment: schriftlich, elektronisch

Zusammengesetzte Prüfung Einführung Zellen und Gewebe 14 ECTS Credits:

- Bewegungsapparat (Anteil 3 ECTS Credits)
- Histologie, allgemeine (Anteil 2 ECTS Credits)
- Physiologie, allgemeine (Anteil 2 ECTS Credits)
- Strahlenphysik, Radiologie (Anteil 2 ECTS Credits)
- Zell- und Molekularbiologie (Anteil 4 ECTS Credits)
- Pathologie, Histopathologie Einführung (Anteil 1 ECTS Credits)

Termine und Modalitäten werden zu Beginn des Semesters zur Verfügung gestellt.

Module Histology, general

05SM.122_hi / Lecture with Practical Exercises

Description:

General description:

Die Studierenden lernen die Technik des Mikroskopierens und den mikroskopischen Aufbau aller Grundgewebetypen.

ECTS: 0

Learning Outcome:

Die Studierenden kennen die Grundlagen licht- und elektronenmikroskopischer Techniken und können ein Mikroskop für die Durchlichtmikroskopie einstellen (Köhlern). Sie kennen die Grundlagen der Herstellung von histologischen Präparaten und können die gebräuchlichsten histologischen Färbemethoden erläutern. Sie erkennen im lichtmikroskopischen Schnitt Zellen und die 5 Grundgewebetypen (Epithelien, Bindegewebe, Muskulatur, Nervengewebe und Blut), sowie Knochen und Drüsen und können deren Herkunft, Struktur und Funktionen erläutern.

Description:

General description:

Die Studierenden lernen die Funktionen der Zellen und der vier Gewebetypen (Epithelien, Bindegewebe, Muskulatur, Nervengewebe) kennen.

ECTS: 0

Learning Outcome:

Die Studierenden

- können die Funktionen der 4 Gewebetypen (Epithelien, Bindegewebe, Muskulatur und Nervengewebe) erklären
- können die Grundfunktionen der Epithelien (Absorption; Resorption und Sekretion) beschreiben
- können die elektrophysiologischen Grundlagen der Nervenaktivität beschreiben
- können die Funktionen des Gefäßendothels erläutern
- können die Funktion der Muskulatur auf zellulärer Ebene beschreiben
- können wichtige Aspekte des Muskelstoffwechsels erläutern
- können die wesentlichen Unterschiede zwischen glatter Muskulatur, Herzmuskulatur und quergestreifter Muskulatur und deren Eigenschaften erklären

Module Radiation Physics, Radiology

05SM.125_ra / Lecture with Practical Exercises

Description:

General description:

Dieser Kurs vermittelt die physikalischen Grundlagen aller bildgebenden Verfahren (Röntgen, Ultraschall, Computertomographie, Nuklearmedizin, Magnetresonanztomographie) und derer Anwendungsmöglichkeiten in der Veterinärmedizin. Des weiteren wird auf die Gefahren und Auswirkungen von ionisierenden Strahlen eingegangen, und die Strahlenschutzvorschriften werden erläutert.

Der Inhalt des eLearning-Tools (RadioSurfVet) und die Kolloquien sind Voraussetzung für das Erlernen der Bildinterpretation, was einen integralen Bestandteil der diagnostischen Aufarbeitung eines Patienten darstellt.

ECTS: 0

Learning Outcome:

- Die physikalischen Prinzipien bei der Entstehung und Ausbreitung von ionisierender Strahlung und Ultraschallwellen erklären
- Die wichtigsten Konstruktionselemente gebräuchlicher Röntgen- und Ultraschallgeräte beschreiben
- Die wesentlichen Interaktionen von Röntgenstrahlen und anderer ionisierender Strahlung sowie von Ultraschallwellen mit Materie beschreiben
- Die biologischen Konsequenzen der Interaktionen von Röntgenstrahlen und anderer ionisierender Strahlung mit Materie beschreiben und daraus erwünschte und unerwünschte Wirkungen ableiten
- Aufbau und Funktion der in der Röntgen- und Ultraschalldiagnostik gebräuchlichsten Gerätetypen, Abbildungssysteme und Hilfsmittel beschreiben
- Die physikalischen und chemischen Vorgänge bei der Entstehung eines Ultraschall- oder Röntgenbildes beschreiben
- Die im Umgang mit ionisierenden Strahlen zum Schutz von Mensch und Tier notwendigen Massnahmen treffen
- Die Prinzipien und Indikationen weiterer bildgebender Verfahren (MRI, CT und weitere) erläutern
- Röntgen- und Ultraschallbilder fachgerecht beschriften und archivieren

Module Cell and Molecular Biology

05SM.126_ze / Lecture with Practical Exercises

Description:

General description:

Die Studierenden lernen zusammen mit den anderen fünf Lehreinheiten Makromoleküle, Enzyme, Membranen/ Polysaccharide/Lipide, allgemeine Molekularbiologie und Vitamine die wichtigsten Grundlagen, welche für das Verständnis physiologischer (normaler) und pathologischer (krankmachender) Mechanismen im tierischen Körper von Wichtigkeit sind.

ECTS: 0

Learning Outcome:

Zellbiologie:

- Die wichtigsten zellbiologischen Untersuchungsmethoden (Techniken) beschreiben können
- Die Struktur von Organellen einer Zelle beschreiben und deren Funktion erklären können
- Proteinsynthese und Proteinsortierung beschreiben und erklären können
- Zellteilung (Zellzyklusphasen) und dessen Regulation und Kontrollen beschreiben und erklären können
- Zellinteraktionen und Zelldifferenzierung beschreiben und erklären können

Molekularbiologie:

- Das zentrale Dogma der Molekularbiologie kennen und seine Bedeutung für alle Lebensformen auf der Erde verstehen
- Die verschiedenen Arten von Nukleinsäuren benennen, ihre Funktion kennen und ihre Struktur beschreiben
- Die Mechanismen der DNA-, RNA-, und Proteinsynthese erläutern
- Das Prinzip der prokaryontischen und eukaryontischen Genregulation kennen und erläutern
- Die neuesten Entwicklungen in der Molekularbiologie (Genomics, Transkriptomics, Proteomics und Systembiologie) beschreiben und ihre Bedeutung für die moderne Diagnostik erläutern

Merkmale:

Module Clinical Activity, Introduction

05SM.130_kt / Course

Description:

General description:

Die Studierenden werden in die Grundlagen des tierärztlichen Denken und Handelns eingeführt.

ECTS: 1

Learning Outcome:

Die Studierenden werden in die Grundlagen des tierärztlichen Denkens und Handelns eingeführt. Dies beinhaltet das Kennenlernen der Aufarbeitung typischer oder interessanter Fälle in der Tiermedizin und des Umgangs mit Pferden, Kühen, Hunden und Katzen. Es geht also um Schnuppern und Zuhören.

Bei den Fallvorstellungen erfahren die Studierenden anhand von Beispielen aus den Kliniken des Tierspitals der Vetsuisse-Fakultät, wie wichtig Anamnesen, Untersuchungsgang und weitere Diagnostik sind, um fundiert zu einer Prognose und Therapie zu gelangen.

An den externen Kliniktagen lernen die Studiderenden den Alltag einer Tierärztin und eines Tierarztes kennen.

Module Genetics, General Animal Breeding

05SM.151_kg / Module without Credits

Description:

General description:

Klassische Genetik:

Die Studierenden lernen die Grundlagen der Vererbungslehre (oder frischen sie auf), um dieses Wissen später in den für die Veterinärmedizin wichtigen Gebieten der klinischen Genetik und Tierzucht anwenden zu können.

Allgemeine Tierzucht und Genetik:

Die Studierenden kennen die Grundlagen und unterschiedlichen Methoden der Tierzucht und können Zuchtorganisationen bei der Erstellung eines Zuchtprogrammes unterstützen.

ECTS: 0

Learning Outcome:

Klassische Genetik:

- Die drei Mendel'schen Gesetze erklären
- Das Prinzip der Weitergabe der Erbinformation über Generationen verstehen
- Besonderheiten und Erweiterungen zur Mendelgenetik kennen
- DNA und Chromosomen als Träger der Erbinformationen kennen
- Meiose und Mitose
- Die Bedeutung von Mutationen verstehen
- Einführung in die Populationsgenetik (Hardy Weinberg Equilibrium)
- Welche Kräfte verändern den Genpool einer Population?
- Geschlechtsbestimmung und -entwicklung bei den Säugetieren verstehen
- Beispiele zur klassischen Genetik aus der Human- und Veterinärmedizin kennen
- Wie fließt die klassische Genetik in die klinische Genetik ein?

Tierzucht:

- Domestikation der Wildtierarten verstehen
- Art- und Rassebegriff definieren, Rassen und Nutzungsrichtung der wichtigen Haustiere kennen
- Die in der Tierzucht verwendeten Begriffe definieren und erklären
- Variation und Vererbung von qualitativen und quantitativen Merkmalen verstehen
- Lineare Beschreibung und Einstufung von Zuchttieren (Zuchtwertschätzung) erklären
- Unterschiedliche Selektions- und Zuchtmethoden verstehen
- Weitere tierzüchterische Massnahmen beschreiben, ihre Möglichkeiten und Grenzen abschätzen
- Verordnung des BLV Tierschutz beim Züchten
- Die Rolle des Tierarztes in Zusammenhang mit forensischen Abklärungen kennen

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor:

Claude Schelling

Requirements:

Assessment:

schriftlich, elektronisch

Zusammengesetzte Prüfung 10 ECTS Credits:

- Tierschutz, Tierethik, Ethologie, Tierhaltung (Anteil 5 ECTS Credits)
- Klassische Genetik, allgemeine Tierzucht, Tierzucht und Genetik (Anteil 5 ECTS Credits)

Termine und Modalitäten werden zu Beginn des Semesters zur Verfügung gestellt.

Module Animal Welfare, Animal Ethics, Ethology, Animal Husbandry

05SM.152_tet / Course

Description:

General description:

Einführung Tierschutz und Tierethik:

Die Studierenden für Fragen des Tierschutzes und der Tierethik und für die wissenschaftliche Bearbeitung von Tierschutzproblemen auf der Grundlage biologischer Erkenntnisse sensibilisiert.

Ethologie:

Die Grundlagen der Verhaltensbiologie von Tieren und die wissenschaftlichen Theorien, Modelle und Methoden der Ethologie werden vermittelt.

Wissenschaftliche Grundlagen Tierschutz: Aufbauend auf den Vorlesungen "Einführung Tierschutz" und "Ethologie" werden wissenschaftliche Grundlagen des Tierschutzes vermittelt, mit Schwerpunkten in den Bereichen ethologische Methoden zur Beurteilung des Wohlergehens, Verhaltensstörungen und Environmental Enrichment.

ECTS: 0

Notes:

Veranstaltung in Zusammenarbeit mit der Vetsuisse-Fakultät Universität Bern.

Learning Outcome:

Die Studierenden sind in der Lage,...

Einführung Tierschutz und Tierethik:

- die relevanten Verfassungsgrundsätze und den Zweck des Tierschutzgesetzes zu benennen und fachgerecht zu erklären
- den Geltungsbereich des Tierschutzgesetzes zu benennen und zu erklären, welche Tiere aus welchen Gründen durch das Tierschutzgesetz geschützt werden
- die gesetzlich vorgegebenen Kriterien für Wohlergehen aufzuzählen und wissenschaftliche Ansätze zu deren Überprüfung anzugeben
- die Güterabwägung als Instrument zur Wahrung der Tierwürde zu erklären
- die allgemeinen Grundsätze des Tierschutzgesetzes (Art. 4) aufzuzählen und fachgerecht zu erklären
- die wichtigsten tierethischen Ansätze zu benennen und die für den Tierschutz relevanten Unterschiede zu erklären
- zu erklären, weshalb Mitgefühl (mit Tieren) eine wichtige aber unzuverlässige Grundlage für den Tierschutz darstellt
- den Begriff Speziesismus und dessen Bedeutung im Tierschutz zu erklären

Ethologie:

- die fünf Grundfragen der Ethologie zu nennen und zu erklären, welche Aspekte des Verhaltens damit untersucht werden
- den Unterschied zwischen kausalen (proximaten) und funktionalen (ultimaten) Faktoren der Verhaltenssteuerung zu erklären
- die Grundelemente zur Beschreibung des Verhaltens von Tieren zu nennen und zu erklären, was ein Ethogramm ist und wie ein solches erstellt wird
- zu erklären, wie Gene die Ausprägung von Verhaltensmerkmalen beeinflussen können und wie genetische Vererbung von Verhaltensmerkmalen nachgewiesen werden kann
- die wichtigsten Verhaltensdispositionen von Tieren für deren erfolgreiche Domestikation zu nennen und Domestikation anhand von natürlicher und künstlicher Selektion zu erklären
- die wichtigsten Prozesse der Verhaltensontogenese (Reifung, Prägung, Lernen) zu erklären
- die wichtigsten Aspekte der Verhaltenssteuerung (Erbkoordinationen, Auslösemechanismen, Hormone,

biologische Uhren) zu erklären

- den biologischen Begriff der Anpassung und die biologischen Grundlagen und Grenzen der Anpassungsfähigkeit von Tieren zu erklären
- anhand des allgemeinen Motivationsmodells verschiedene Ursprünge von Verhaltensstörungen zu erklären
- neuronalen Grundlagen der Verhaltenssteuerung zu erklären
- die Modalitäten der Nahrungsaufnahmen zu benennen
- die Grundprinzipien der optimalen Nahrungssuche zu erklären
- Paarungsstrategien aufzuzählen und deren Ursachen und Folgen zu erklären
- die Arten von Brutfürsorge bei Tieren aufzuzählen und die Konflikte bei der Brutpflege zu erklären
- die grundlegenden Lernmechanismen bei Tieren (Habituation, Prägung, assoziatives Lernen, latentes Lernen) zu beschreiben
- die vier Formen operanter Konditionierung zu erklären und diese anhand von Beispielen aus dem Training von Tieren zu erläutern
- die wichtigsten Modalitäten und Funktionen tierischer Kommunikation aufzählen und deren Eigenschaften zu beschreiben
- die Ko-evolution von Signalproduktion und Erkennungsmechanismen zu erklären
- die wichtigsten sozialen Organisationsformen von Tieren zu benennen und die Faktoren, die zu diesen Vergesellschaftungen führen, zu erklären
- die evolutionären Grundlagen sozialer Konflikte zu erklären

Wissenschaftliche Grundlagen Tierschutz:

- unterschiedliche Ansätze zur Beurteilung des Wohlergehens von Tieren zu erklären und die wichtigsten Indikatoren zu beschreiben
 - zu erklären, anhand welcher drei Kriterien mittels Analogieschluss auf Leiden bei Tieren geschlossen wird
 - den Einsatz von Wahlversuchen und Nachfrageuntersuchungen zur Entwicklung tiergerechter Haltungssysteme und zur Beurteilung des Wohlergehens von Tieren zu erklären
 - das Konzept Emotion zu beschreiben und den Unterschied zwischen dimensional und diskreten Emotionsmodellen zu erklären
 - zu erklären, wie Tests für kognitive Verzerrung funktionieren und was damit über das Wohlbefinden von Tieren ausgesagt werden kann
 - das Konzept der Umweltereicherung (environmental enrichment) und dessen Bedeutung für das Wohlergehen von Tieren zu erklären
 - die wichtigsten Ansätze zur Entwicklung tiergerechter Haltungssysteme zu benennen und deren Vor- und Nachteile zu erklären
 - Ursachen und Entwicklung von Verhaltensstereotypen zu beschreiben und deren Auswirkungen auf das Wohlergehen von Tieren zu erklären
- Spezielle Themen Tierschutz

- die Einhaltung der allgemeinen gesetzlichen Bestimmungen zu den wichtigsten Tierschutzaspekten (Tierhaltung, Tierzucht, Tiertransporte, Töten und Schlachten, Tierversuche) beurteilen zu können
 - Extremformen in Morphologie, Physiologie und Verhalten aufgrund von natürlicher und künstlicher Selektion zu erklären und in Bezug auf das Wohlergehen von Tieren zu beurteilen
 - die wichtigsten Betäubungs- und Tötungsverfahren zu beschreiben und in Bezug auf das Wohlergehen der Tiere zu beurteilen
 - die Leitsymptome für Bewusstlosigkeit beim Bolzenschuss, bei der Elektrobetäubung und bei der CO₂ Betäubung zu beurteilen
 - das unerlässliche Mass bei Tierversuchen mittels Güterabwägung zu beurteilen
 - das Bewilligungsverfahren für Tierversuche, einschliesslich Ablauf und Zuständigkeiten, zu erklären
 - das 3R Konzept bei der Planung und Durchführung von Tierversuchen anzuwenden
- Ethologie, Tierhaltung, Tierschutz:

- die ethologischen Ansprüche an die Haltung und den tiergerechten Umgang mit den häufigsten Nutz- Heim- und Versuchstieren zu beschreiben
- die wichtigsten produktions- bzw. haltungsbedingten Tierschutzprobleme der häufigsten Nutz-, Heim- und Versuchstiere zu benennen und diese bei der Vorstellung von Tieren oder im Haltungssystem der Tiere festzustellen

Module Animal Disease, Animal Welfare

05SM.415_ts / Lecture with Practical Exercises

Description:

General description:

Das Modul Tierseuchen und Tierschutz ist ein intradisziplinäres Modul, in welchem Dozentinnen und Dozenten aus verschiedenen Institutionen (Bundesamt, Kantone, Vollzug etc.) mitwirken. Dadurch wird eine Vielzahl an Kompetenzbereichen abgedeckt. Der Schwerpunkt liegt dabei auf den Fertigkeiten im Bereich "Beitrag zum Tierwohl und zum öffentlichen Gesundheitswesen": Tierärztinnen und Tierärzte fördern die Gesundheit und das Wohlergehen von Tieren und Menschen (One Health).

ECTS: 5

Learning Outcome:

Die Studentin/der Student ist in der Lage bei Veterinärdienst-Aufgaben, welche die Tiergesundheit und öffentliche Gesundheit fördern, mitzuwirken. Er/sie ist in der Lage an einer epidemiologischen Studie teilzunehmen (inklusive Sammeln, Umgang mit und Transport von geeigneten Proben). Sie/er ist in der Lage Anzeichen von grenzübergreifenden Tierkrankheiten, Zoonosen und von durch Lebensmittel übertragbaren Krankheiten zu erkennen und sie den Veterinärbehörden zu melden. Die Studentin/der Student empfiehlt Programme zur Prävention und Kontrolle von Krankheiten.

Module Infection Biology Applied

05SM.420_ib / Lecture with Practical Exercises

Description:

General description:

Aufarbeiten von aktuellen Themen der Infektionsbiologie und -immunologie in Gruppen. Die Studierenden bearbeiten eine der vier Erregerklassen (virale, bakterielle, parasitäre oder Pilz-Infektionen) mittels PBL. Die Einführung und die Schlusspräsentationen sind im Plenum.

ECTS: 2

Learning Outcome:

Die Studierenden sind in der Lage, an Hand von Beispielen die infektionsbiologischen Grundlagen zu Fällen/ Problemen viraler, bakterieller, parasitärer und Pilz-Infektionen zu erarbeiten und diese ihren Peers zu vermitteln. Die Studierenden sind in der Lage, eine klinische Fragestellung und diagnostische Daten zu interpretieren, geeignete Informationsquellen zu finden, mögliche Differentialdiagnosen zu erarbeiten und Lösungen zu formulieren.

Die Studierenden sind in der Lage, die Zusammenhänge zwischen Infektion/Replikation, Wirtsabwehr und Pathogenese zu erklären und Möglichkeiten für die Diagnostik, Prävention und Therapie zu nennen.

Module Clinical Training, Dissection Course

05SM.440_üs / Course

Description:

General description:

Strukturierte Aufarbeitung klinischer Fälle bei Hunden, Katzen, Heimtieren, Schweinen, Kühen, Pferden.
Anwendung der Spezialuntersuchungsgänge üben und vertiefen, einfache OP Übungen durchführen.
Erlernen der Sektionstechnik v. a. beim Haustier.

ECTS: 1

Learning Outcome:

- Struktur der problemorientierten Arbeitsweise bis zur Diagnosestellung kennen (SOAP System)
- Grundlegende Frage- und Kommunikationstechniken kennen
- Die Anamnese und das Signalement erheben (Kenntnisse des speziellen Signalements der gängigen Exoten, Heimtiere, Kleintiere, Pferde, Rinder, Schweine und Vögel)
- Die Vollständige klinische Untersuchung bei der jeweiligen Tierart strukturiert durchführen können (inklusive dermatologischer, gynäkologischer, kardiologischer, neurologischer und orthopädischer Untersuchung)
- Eine gewichtete Problemliste anhand der Anamnese und Befunde der klinischen Untersuchung erstellen
- Erarbeiten einer Differentialdiagnose Liste für die vorliegenden Probleme bzw. Problemkomplexe erstellen und nach Wahrscheinlichkeit gewichten
- Weiterführende Untersuchungen auswählen, interpretieren und gewichten (z.B. Blutuntersuchungen, Röntgenuntersuchung, Ultraschall, weiterführende Untersuchungen der speziellen Organsysteme etc.)
- Verdachtsdiagnose bzw. Diagnose formulieren
- Therapieplan erstellen
- Prognose einschätzen
- Operationsvorbereitung kennen: Händedesinfektion, chirurgische Vorbereitung des Patienten und des Chirurgen
- Generelle Nahttechniken und Knotentechniken beherrschen
- Sektionstechnik und Befunderhebung kennen

Module Night Duties and Weekend Duties

05SM.490_nd / Praktikum

Description:

General description:

Die Studierenden unterstützen die Tierärzt*innen in den Kliniken und nehmen aktiv am Abend- und Notfalldienst teil.

ECTS: 2

Learning Outcome:

- Kennenlernen häufiger Gründe für Notfälle;
- Erkennen lebensbedrohlicher Zustände bei im Notfalldienst eingelieferten Patienten (Triage) und Behandlung dieser Patienten;
- Erlernen und Üben praktischer Fähigkeiten (z.B. klinische Untersuchung, Notfallprozeduren mit erster Hilfe, wie z.B. Wundbehandlung, Frakturstabilisierung, etc.);
- Erkennen und Behandeln akuter Schmerzzustände; Mithelfen bei Notfalloperationen (v.a. bei Grosstieren)
- Überwachen von stationären Patienten und Erlernen praktischer Fähigkeiten wie Injektionen, Blutentnahmen, Tablettengabe, Flüssigkeitstherapie;
- Erlernen des praktischen Umgangs und Handlings von Patienten, auch von weniger vertrauten Spezies;
- Durchführung der Allgemeinuntersuchung sowie spezieller Untersuchungstechniken am Patienten;
- Erkennen und Interpretation abnormer Befunde; Überwachen von Patienten auf mögliche Medikamentennebenwirkungen;
- Vorbereitung auf die klinischen Rotationen durch praktische Anwendung der Propädeutik.
- Selbstständige Vor- und Nachbereitung von konkreten Patientenfällen

Module Script and Writing: Reading List

06SM280-004 / Module

Description:

General description:

Die Studierenden erschliessen nach Rücksprache mit den Dozierenden Sekundärliteratur über die chinesische Schrift und dokumentieren dies in einem Lektüreprotokoll. Zum Nachweis ausreichender Schriftzeichenkenntnisse nehmen sie zudem am Leistungsnachweis des Moduls 280-011 «Modernchinesisch: Schrift und Schreiben» teil.

ECTS: 6

Learning Outcome:

Die Lernenden erhalten einen Einblick in die wissenschaftliche Sekundärliteratur zur chinesischen Schrift. Im Rahmen der schriftlichen Prüfung stellen sie ihre praktischen Schriftkenntnisse unter Beweis.

Languages of Instruction:

Deutsch oder Englisch, gemäss individueller Absprache mit der Betreuungsperson

Merkmale:

Responsible instructor: Franziska Huber

Requirements:

Prerequisites: Voraussetzung für dieses Modul sind Kenntnisse der chinesischen Schrift, die dem Niveau beim Abschluss des Moduls «Modernchinesisch: Schrift und Schreiben» entsprechen.

Assessment: Portfolio (Lektüreprotokoll 50%; schriftliche Prüfung 50%)

Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden.

Schriftliche Prüfungen:

HS: 11. Januar 2027, 9:00 Uhr; FS: 23. Februar 2027, 14:00 Uhr (je 90 Minuten)

Nachholtermine:

Module BME 330 Quantitative Biomedicine

07SMBME330 / Block Course

Description:

General description:

This block course is at the interface of biomedicine, biotechnology, data science and bioinformatics. Students gain hands-on experience in the technology / methodology of their choice among those offered by the participating research groups, which include high-throughput technologies, clinical data science and machine learning, human pathogen studies, tissue culture, imaging mass cytometry, and computational image analysis. By conducting experiments and analysing data using innovative quantitative methods, students will gain deeper insight in quantitative biomedical research.

ECTS: 6

Learning Outcome:

On completion of the module the student should be able to:

- conduct experiments in wet or dry labs to collect digital data.
- explain the employed quantitative technology / methodology in detail.
- demonstrate competency in quantitative data analysis and, depending on the chosen lab project, data integration, programming and / or data modeling.
- evaluate strengths and limitations of research methods and outcomes.

Key skills

On completion of the module, the student should be able to:

- design, perform and quantitatively analyse biomedical experiments with the selected technology / methodology offered by one of the research groups.
- communicate the obtained results, as well as the underlying experimental / methodological background, appropriately and effectively to promote fellow students' understanding.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Magdalini Polymenidou
Michael Krauthammer

Requirements:

Prerequisites:

- Basic studies completed
- Basic programming skills in R, Python or similar

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

not bookable

Cancellation Deadline:

not cancelable

Module StPO Moot Court

02SM90MC6W / Seminar

Description:

ECTS: 12

Notes:

Im Bachelor wird der Leistungsnachweis als Bachelorarbeit (6 ECTS Credits) und zusätzlich als Wahlmodul (6 ECTS Credits) anerkannt (gesamthaft 12 ECTS Credits). Es ist der ganze Moot Court zu absolvieren. Die Anrechnung der beiden Studienleistungen erfolgt im selben Semester.

Im Master kann der Moot Court entweder als Masterarbeit oder als Wahlmodul anerkannt werden (je 12 ECTS Credits).

Module PHY 529DP Advanced Topics in General Relativity and Gravitational Waves

07SMPHY529DP / Course

Description:

General description:

Possible content:

- General relativistic stellar structure equations (Neutron stars)
 - Tetrad formalism
 - Spinors in GR
 - Klein-Gordon & Dirac eqs. In GR
 - Thermodynamics of black holes and Hawking radiation
 - Topics in gravitational waves: GW generation by PN sources, GW from elliptic, hyperbolic binaries
 - Tests of the equivalence principle
- This course is offered as a self-study course. Please contact Prof. Jetzer directly for more information.

ECTS: 3

Target Groups:

PhD students

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Module GEO 341 Specialisation in Physical Geography: Glaciers & Permafrost

07SMGEO341 / Course

Description:

ECTS: 3

Notes:

Die Agenda 2030 der Vereinten Nationen (UNO) umfasst 17 Ziele für nachhaltige Entwicklung Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>), die von allen UN-Mitgliedstaaten verabschiedet wurden. Sie bilden einen gemeinsamen Rahmen zur Förderung von sozialer Gerechtigkeit, Umweltschutz und wirtschaftlicher Entwicklung weltweit.

Behandelt werden in diesem Modul insbesondere: 6 & 13

Learning Outcome:

Die Vorlesung behandelt Gletscher und Permafrost im weitesten Sinn: Wir untersuchen Gletscher, Eiskappen, Eisschilde, und Eisströme, sowie den Hochgebirgs- und auch den arktischen Flachland-Permafrost.

- Sie können die wichtigsten Phänomene von Gletschern und Permafrost erkennen, benennen und deren Genese erläutern sowie die Eigenschaften dieser Phänomene räumlich und zeitlich beschreiben.
- Sie können die Wechselwirkungen mit dem Klima und daraus resultierende räumliche/zeitliche Muster von Veränderungen herleiten.
- Sie kennen die wichtigsten Informationsquellen über Gletscher und Permafrost und können diese kritisch reflektieren.

Target Groups:

BSc-Studierende Geographie

Languages of Instruction:

Deutsch

Course Materials:

Sind über OLAT zugänglich. Details sind unter "Lehrveranstaltung" vermerkt.

Merkmale:

Responsible instructor:

Martin Lüthi

Requirements:

Prerequisites:

none

Prior Knowledge:

Für Veranstaltung "Gletscher und Permafrost" wird Modul GEO 231 empfohlen.

Assessment:

Written examination (60 min)
Language of assessment: German

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Module GEO 343 Specialisation in Physical Geography: Geochronology

07SMGEO343 / Lecture with Practical Exercises

Description:

ECTS: 3

Learning Outcome:

Datierungen helfen zur Entschlüsselung sich ändernder Umweltbedingungen über die Zeit und deren Einfluss auf die Landschaft. Sie erhalten in der Vorlesung einen Einblick in verschiedene numerische und relative Datierungstechniken. Diese werden an Forschungsergebnissen diskutiert und Beispiele im Zusammenhang mit Geomorphologie, Gletschergeschichte, Boden, Ereignisdatierung (Bäume) und generell der Landschaftsentwicklung vorgestellt. Kleinere Übungen während der Vorlesung und Laborbesichtigungen ermöglichen, dass Sie einen spezifischen Einblick in die Methoden erhalten und das Erlernete direkt anwenden können.

Sie kennen die Prinzipien relativer und numerischer Datierungsmethoden (wie z.B. Radiokarbonmethode, Dendrochronologie, Datierung des Expositionsalters) sowie deren Anwendungsmöglichkeiten in der Geomorphologie, Archäologie, Bodengeographie, Ökologie, etc. Sie kennen die Vor- und Nachteile der einzelnen Methoden.

Target Groups:

BSc-Studierende Geographie

Languages of Instruction:

Deutsch und Englisch

Course Materials:

Sämtliche Materialien sind über OLAT zugänglich.

Merkmale:

Responsible instructor:

Markus Egli

Requirements:

Prerequisites:

keine

Assessment:

A portfolio exercise (written assignment) must be completed, which accounts for 40% of the final grade, along with a written examination that accounts for 60% of the final grade.

The points from the portfolio exercise are combined with the results of the written examination. Since a resit examination is not possible under this grading structure, students who do not pass must repeat the entire module, including both the portfolio exercise and the written examination.

Language of assessments: German

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Module GEO 344 Specialisation in Physical Geography: Hydrological Processes

07SMGEO344 / Lecture with Practical Exercises

Description:

ECTS: 3

Notes:

The number of participants for the course is limited to 28. If you are interested in this course, please submit a short statement of motivation (maximum 200 words) before June 30, 2026 via the following link: www.uzh.ch/zi/cl/surveys/index.php/718595?lang=en. (<https://www.uzh.ch/zi/cl/surveys/index.php/718595?lang=en>)

- Insurance is the responsibility of the participants.

The Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

This SDG is covered in this module: 6

Learning Outcome:

In depth knowledge of hydrological processes and systems.

In depth knowledge of theoretical principles of physical hydrology using experiments (hands-on hydrology, sandbox).

Hydrological calculations in theory and practice (runoff, groundwater).

Understanding hydrological literature in scientific journals

Target Groups:

BSc students in Geography and Earth System Science

Languages of Instruction:

English

Course Materials:

- Course book: Introduction to Physical Hydrology (M.R. Hendriks)
- Lecture slides (will be made available on OLAT)
- Scientific articles
- Learning videos (repetition from Geo121)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Ilja van Meerveld

Requirements:

Prerequisites:

none

Prior Knowledge:

Module GEO 121 is recommended.

Assessment:

The grade consists of a written exam (60 minutes) as well as graded exercises and a presentation.

The module is passed if all assignments are completed and submitted and a total of at least 60 out of 100 points is achieved. Individual assignments do not need to be passed separately. Students who miss an assignment must retake it when it is offered again in the following academic year.

The weight of the different components is as follows:

- Exam: 50%
- Streamflow gauging: 10%
- Hands-on-Hydrology: 25%
- Sandbox: 5%
- Seminar incl. presentation: 10%

Language of assessments: German, with important terms given in English as well. The answers can be written in German or English. An English version can be made available upon request at the start of the semester. The German version is binding.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: 25.09.2026 - Streamflow gauging (field, mandatory)

Request period: from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Place allocation at the latest: Sa 29.08.2026 22:00

Waiting list progression period: from Sa 29.08.2026 22:00 to Do 24.09.2026 24:00

Cancellation period: from Sa 29.08.2026 22:00 to So 27.09.2026 24:00

Organisation: Department of Geography

Offered in:

- Fall Semester 2029
- Fall Semester 2028
- Fall Semester 2027
- Fall Semester 2026
- Fall Semester 2025
- Fall Semester 2024
- Fall Semester 2023

Module Research Updates in Biomedical Image Analysis

04SMBMT21001 / Seminar

Description:

ECTS: 2

Notes:

Kontakt-Email:

bjoern.menze@uzh.ch

Learning Outcome:

Das Seminar richtet sich an fortgeschrittene Studierende, die im Bereich der Quantitativen Biomedizin und Biomedizinischen Bildverarbeitung eine Studien- oder Abschlussarbeit anstreben.

In dem Seminar werden Projektideen und Ergebnisse in eigenständig erstellten Vorträgen vorgestellt und in der Gruppe diskutiert. Aus der Diskussion bekommen die Teilnehmenden Rückmeldung zu den Zielen und Methoden ihrer Arbeit, sowie Anleitung für weitere Schritte, aber auch zur Präsentation selbst. Dies ermöglicht es den Präsentierenden, ihre erreichten Ergebnisse zu reflektieren und weitere Schritte zu planen.

Neben den Präsentierenden nehmen am Seminar Mitarbeitende des Lehrstuhls für Biomedizinische Bildanalyse und Maschinelles Lernen teil, die zur Diskussion beitragen, sowie jedwede Studierende und Doktoranden der Fakultät, die sich über aktuelle Themen im o.g. Bereich informieren möchten.

Voraussetzung für das Bestehen des Kurses ist die Teilnahme, bewertet wird die Präsentation und ihre abschliessende Diskussion. Eine abschliessende Prüfung findet nicht statt.

Target Groups:

Studierende im Masterstudium

Merkmale:

Responsible instructor: Bjoern Menze

Module ECO 353 Introduction to Path and Structural Equation Modeling

07SMECO353 / Block Course

Description:

General description:

Natural systems are characterized by direct and indirect connections among components. Structural equation modeling (SEM) is a suitable framework to understand such networks of interconnected variables, identifying potential pathways, as well as test theory with observational and experimental data. This is an introductory course for biologists that have no or little prior experience with fitting structural equation models. The course uses a mix of lectures, live coding sessions and exercises to learn the basics of SEM with the R package lavaan. Students will have the opportunity work on datasets and their own data.

Day 1: Introduction to path modelling (background and philosophy of path modelling, meta-models, comparison with linear/multiple regression, assumptions/limitations), exercises using common dataset (model checking and interpretation, fitting your first SEM)

Day 2: Introduction to structural equation modelling and constructs (composites, latent variables), Additional exercises, model comparison, evaluation (GOF etc.), interpretation and pruning. Self-study.

Day 3: Visualization of SEMs. Exercises and self-study with opportunities provided to consult with lecturers.

ECTS: 1

Notes:

Registration deadline: 01 November 2026, Cancellation deadline: 01 October 2026. For registration please mail phdecology@ieu.uzh.ch, include your student number, surname, name, email address and your PhD program.

Bring your laptop.

Learning Outcome:

At the end of the course, participants are able to 1) fit path and structural equation models to data, 2) assess model goodness of fit, 3) interpret the model and its coefficients, 4) plot the model and 5) report the model such that others can reproduce the process and evaluate model support.

Target Groups:

LSZGS PhD Program

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Frank Pennekamp
Debra Zuppinger-Dingley

Requirements:

Prerequisites:

Important: This course is organized for PhD students of the Life Science Zurich Graduate School. Priority will be given to students registered in the PhD Programs, however other PhD students can attend if there are available places. Participating Master students will not be awarded ECTS credits unless agreed with the lecturer and the program coordinator prior to the course.

Prior Knowledge:

Students should be familiar with the R programming language, basic statistical

techniques (i.e., multiple regression, ANOVA), enabling them to fit regression models, interpret and visualize their output.

Assessment: Active participation throughout the course. Full attendance. In English

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (Irregular)

Module GEO 342 Specialisation in Physical Geography: Applied Soil Science

07SMGEO342 / Course

Description:

General description:

Freiwillige Vertiefung in Physischer Geographie.

In dieser Lehrveranstaltung erhalten Sie Einblicke in die vielseitigen Aufgaben der angewandten Bodenkunde aus Forschung und Praxis in den Bereichen Altlasten, Agrar- und Forstsysteme, und aktuellen Forschungsprojekten zum System Boden-Pflanze im globalen Wandel.

ECTS: 3

Notes:

Die Versicherung ist Sache der Teilnehmenden.

Die Agenda 2030 der Vereinten Nationen (UNO) umfasst 17 Ziele für nachhaltige Entwicklung Sustainable Development Goals (SDGs), (<https://sdgs.un.org/goals>) die von allen UN-Mitgliedstaaten verabschiedet wurden. Sie bilden einen gemeinsamen Rahmen zur Förderung von sozialer Gerechtigkeit, Umweltschutz und wirtschaftlicher Entwicklung weltweit.

Behandelt werden in diesem Modul insbesondere: 12; 13 & 15

Learning Outcome:

Ziel der Lehrveranstaltung ist es, Ihnen einen Einblick in die vielseitigen Aufgaben der angewandten Bodenkunde aus Forschung und Praxis zu geben. Am Ende des Semester kennen Sie typische Fallbeispiele aus den Bereichen Altlasten, Agrar- und Forstsysteme, Boden-Pflanze und globaler Wandel.

Zusätzlich werden Sie sich in dieser Lehrveranstaltung methodisches Handwerkszeug erarbeiten, das Sie auch bei zukünftigen wissenschaftlichen Arbeiten (zum Beispiel in der BSc-Arbeit) verwenden können.

Target Groups:

BSc-Studierende (HF & NF)

Languages of Instruction:

Deutsch und Englisch

Course Materials:

Fachartikel, Fachzeitschriften, Vorlesungsbegleitende Übungen auf OLAT

Merkmale:

Responsible instructor:

Michael W.I. Schmidt

Requirements:

Prerequisites:

keine

Prior Knowledge:

Für Veranstaltung wird das Modul GEO 241 empfohlen.

Assessment:

In total the module consists of a practical field work, six exercises split into two subjects, and finally, a graded performance assessment in essay form.

Practical field work:

Students must participate in the one-day practical fieldwork. It is mandatory to be eligible to take the graded performance assessment (essay).

Exercises:

Additionally, there will be three exercises for Part 1 (soil protection) and three exercises for Part 2 (plant-soil systems in a changing world). Students must pass two of the three exercises in both Part 1 and Part 2 to be eligible to take the graded performance assessment (essay).

Essay:

Finally, the graded performance assessment will be an essay, which will be graded 1.0 to 6.0 in quarter-point increments and determines the final mark of the module.

The essay must be submitted in English.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module GEO 364 Specialisation in Human Geography: Economic Geographies of Globalization

07SMGEO364 / Lecture with Practical Exercises

Description:

General description:

In the advanced module GEO364, we deal with current economic geography topics that address an uneven global world in various ways. After reading basic texts, we will focus on selected topics with an emphasis on current empirical examples. We aim to deepen your existing knowledge of economic geography and give you a critical perspective on economic processes and relations. Further objectives of the seminar include reading comprehension and discussion of academic texts and improving the oral presentation of work results.

ECTS: 5

Notes:

The Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 8; 9 & 10

Learning Outcome:

- You will gain in-depth knowledge of current topics in critical economic geography.
- You will be able to understand and discuss academic texts.
- You will be able to present your findings appropriately in writing and orally.

Target Groups:

Geography Bachelor students

Languages of Instruction:

German

Course Materials: Will be made available on OLAT.

Merkmale:

Responsible instructor: Xavier Balaguer Rasillo

Requirements:

Prior Knowledge: Knowledge from the compulsory human geography modules is expected.

Assessment:

The overall assessment of the seminar is made up of two parts:

1. An individual scientific video podcast of 10 minutes on a topic of your choice from one of the seminar blocks.
2. An oral examination of 20 minutes on the content of the entire seminar.

The presentation and the scientific video podcast is worth 40% of the total mark, the oral examination 60%. Both parts of the examination must be graded as at least satisfactory (4.0).

Language of assessments: German and English

Grading Scale: 1-6 Quarter Grades Given

Module PHY 471 Physics and Mathematics of Radiotherapy Planning

07SMPHY471 / Lecture with Practical Exercises

Description:

General description:

Radiotherapy is one of the main treatment options for cancer. Today, more than 50% of cancer patients receive radiation as part of their treatment. Modern radiotherapy is a highly technology driven field.

Research and development in medical physics has improved the precision of radiotherapy substantially. Using intensity-modulated radiotherapy with photons (IMRT) and protons (IMPT), radiation can be delivered precisely to tumors while minimizing radiation exposure of healthy organs surrounding the tumor. This lecture provides a detailed introduction to radiotherapy treatment planning and consists of two blocks:

1. The first part of the course considers the physical interactions of photons and protons in tissue, which give rise to dose calculation algorithms used to calculate the absorbed radiation dose based on a CT scan of the patient. Starting from the physical interactions, the lecture will discuss pencil beam algorithms for protons and photons and the convolution-superposition algorithm for photons.

2. The second part considers the mathematical aspects of treatment planning. Mathematical optimization techniques are introduced, which are used in intensity-modulated radiotherapy to determine the external radiation fields that optimally irradiate the tumor while minimizing radiation dose to healthy organs. The lecture will discuss the fluence map optimization for IMRT and IMPT as well as advanced concepts including direct optimization of Multileaf collimator fields.

The lectures are followed by computational exercises where students implement the main components of a radiotherapy treatment planning systems in two dimensions, including visualization of CT, contours and dose distributions, a ray tracing algorithm for radiological depth calculation, pencil beam algorithms for photons and protons, and optimization algorithms for IMRT and IMPT.

ECTS: 6

Learning Outcome:

Students shall develop a thorough understanding of the foundations of radiotherapy from a physics and mathematics perspective, focusing on algorithmic components. After completing the course students should be able to implement the main components of a radiotherapy treatment planning system.

Target Groups:

Master and PhD students in a quantitative field such as physics, mathematics, computer science, engineering, etc.

Languages of Instruction:

English

Course Materials:

Lecture slides and handouts.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Jan Unkelbach

Requirements:

Prior Knowledge:

Basic programming skills in Matlab (or willingness to learn) are needed for the exercises. Basic knowledge of calculus is needed, approximately corresponding to the 3rd year of a bachelor degree in physics, mathematics, computer science, engineering or comparable discipline.

Assessment:

Computational exercises and final oral exam.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Module PHY 564 QCD and Scattering Amplitudes

07SMPHY564 / Lecture with Practical Exercises

Description:

General description:

- Review of non-Abelian gauge theories
- Spinor-helicity formalism
- Perturbation theory techniques: loops and phase space
- Renormalization of QCD and running coupling constant
- Jet observables in e^+e^- annihilation
- QCD at lepton-proton colliders
- Operator product expansion
- Multiparticle production

ECTS: 6

Module PHY 578 Effective Field Theories for Particle Physics

07SMPHY578 / Lecture with Practical Exercises

Description:

General description:

The focus of the course is on effective field theories (EFT) in the context of particle physics. EFTs provide a framework to systematically disentangle effects due to different scales. This will be discussed both in general terms and with specific phenomenological applications in mind.

ECTS: 6

Notes:

We will start by introducing the core ideas of constructing EFTs and consider cases where the effect of heavy particles or large-scale modes are integrated out. Concepts like decoupling and matching as well as applications of the method of regions and the renormalisation group will be covered.

In the second part of the course several concrete examples of EFTs are presented. They allow for a consistent description of a wide variety of physical systems, from bound states with heavy quarks, jets in collider physics, non-perturbative strong interaction at low energies, to effects of heavy physics beyond the Standard Model.

Main topics:

Introduction to EFTs

Decoupling and matching

Renormalization group resummation

Examples of EFTs

- Heavy Quark Effective Theory (HQET)
- Non-Relativistic QCD and QED (NRQCD and NRQED)
- Soft-Collinear Effective Theory (SCET)
- Standard Model and Low Energy Effective Theory (SMEFT and LEFT)
- Chiral Perturbation Theory

Learning Outcome:

Module Student Teaching Assistant 2

06SM523-516 / Module

Description:

General description:

A student teaching assistance serves the acquisition of basic teaching skills. This requires a deeper insight of the contents of the associated lecture and the ability to prepare teaching material in order to help the students to better understand it. The task also involves the preparation and correction of exercises. This module can be booked to credit the conducting of exercises/tutorials. This module can be booked with 3 or 6 ECTS points. The amount of points will be decided in consultation with the module coordinator.

ECTS: 6

Notes:

Students who have successfully completed a course and are interested in taking on a tutorial or teaching assistant role in a future semester should contact the course instructor at an early stage. The instructor reports the assignment to the program coordination office (programmkoordination@cl.uzh.ch). In addition, before each semester, students are informed by email about open tutorial positions for which they may apply.

After successful completion of the tutorial, the module is booked by the program coordination office with 3 or 6 ECTS credits, depending on the workload, and recorded as passed. Self-enrollment via the booking tool is not possible. A maximum of two "Student Teaching Assistant" modules may be booked per study program level, and they must relate to different courses.

Learning Outcome:

The students:

- cope with computational linguistics content from a teaching perspective;
- learn to prepare computational linguistics content in a way tailored to a student's audience;
- learn to correct exercises and give appropriate feedback.

Languages of Instruction:

Deutsch und/oder Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Simon Clematide

Requirements:

Prerequisites:

In the duration of a study level a maximum of two modules «Student Teaching Assistant» can be booked, whereby the two modules must differ in content (also to any previously completed student teaching assistant modules). This module is booked in order to receive credit for a second job as a student teaching assistant at master's level.

This module is an application module, the application has to be authorized by the module coordinator (per Email). The lecturers have to be included in the communication. The open positions for student teaching assistants are usually posted on the mailing list of the Institute of Computational Linguistics (cllist@lists.ifi.uzh.ch) a few weeks before the semester starts. Students interested in conducting exercises/tutorials of a specific course can apply anytime for the position directly with the lecturer and the module coordinator. The module in question must have been passed successfully beforehand.

Module Programming Project 2

06SM523-517 / Module

Description:

General description:

Programming projects aim at the consolidation of programming skills and the acquisition of software engineering skills. Starting with a particular research question and relevant literature, they work on a solution, define milestones, acquire and/or annotate data, implement a program and evaluate it using appropriate data. This module can be booked with 3, 6 or 9 ECTS points. The amount of points will be decided in consultation with the module coordinator.

ECTS: 6

Notes:

Students must independently find a supervisor at the Department of Computational Linguistics. They may either propose their own topic or work on a predefined topic. If a programming project is carried out outside the department, the student must contact the module coordinator by email before the project begins and provide the supervisor's details (full name, position, email address) together with the project topic, so that it can be clarified whether the project can be credited.

After successful completion of the programming project, the supervisor must send an email to programmkoordination@cl.uzh.ch containing the following information:

- (1) full name
- (2) matriculation number
- (3) degree program
- (4) module number 06SM523-517
- (5) project title
- (6) number of ECTS credits earned (3, 6, or 9)
- (7) confirmation that the corresponding workload (90, 180, or 270 hours) has been completed

The module is then booked by the program coordination office for the semester in which the main part of the work was carried out and recorded as passed. Self-enrollment via the booking tool is not possible. The project may begin before the official start of the semester. A maximum of two programming project modules may be booked per study level.

Learning Outcome:

The students:

- autonomously design a project;
- realise the project plan;
- use existing tools;
- do software engineering;
- document their work according to standards;
- evaluate the results;
- use software repositories.

Languages of Instruction:

Deutsch und/oder Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Simon Clematide

Requirements:

Prerequisites: In the duration of a study level a maximum of two programming projects can be booked. This module can be booked to credit work done in a second programming project. It cannot be booked by the students themselves, the booking has to be authorized by the module coordinator. Before a programming project is started, it is essential to get the permission of the module coordinator (per Email). The prerequisites will be set according to the topic.

Module Italian Language (C2)

06SM410-503 / Module

Description:

General description:

In questo corso le studentesse e gli studenti alloglotti raggiungeranno, attraverso una metodologia eclettica, il livello di competenza linguistica di padronanza C2, prossimo a quello delle persone madrelingua. Si esamineranno usi particolari dei modi e dei tempi verbali e varie tipologie di costrutti sintattici passivi, impliciti e marcati. Attraverso l'analisi degli errori si approfondiranno argomenti grammaticali che pongono problemi ricorrenti. Il modulo è composto dal corso della docente, un tutorato con focus sull'espressione orale e un modulo E-Learning di esercitazione e verifica dell'ampliamento lessicale.

ECTS: 6

Learning Outcome:

Le studentesse e gli studenti alloglotti acquisiranno competenze comunicative corrispondenti al livello C2 descritte dal Quadro comune europeo di riferimento per la conoscenza delle lingue: "l'apprendente comprende con facilità praticamente tutto ciò che sente e legge; sa riassumere informazioni provenienti da diverse fonti sia parlate che scritte, ristrutturando gli argomenti in una presentazione coerente; sa esprimersi spontaneamente, in modo molto scorrevole e preciso, individuando le sfumature di significato più sottili in situazioni complesse."

Languages of Instruction:

italiano

Merkmale:

Responsible instructor:

Johannes Bartuschat

Requirements:

Prerequisites:

Per frequentare questo modulo è necessario un solido livello C1 del Quadro comune europeo di riferimento per la conoscenza delle lingue (QCER). È dispensato dall'assolvere questo modulo chi ha conseguito una maturità in Italia, nella Svizzera italiana oppure in una scuola italiana in Svizzera, così come coloro che siano in possesso di una certificazione di lingua italiana di livello C2 ufficialmente riconosciuta (PLIDA, CELI, CILS, CERT.IT). In quest'ultimo caso, per poter essere dispensati/e dall'obbligo di frequenza è necessario rivolgersi con anticipo all'ufficio di consulenza agli studenti (Studienberatung) del Romanisches Seminar.

Assessment:

Portfolio: esame orale (30%) e scritto (70%) su diversi ambiti.

Le tre parti dell'esame di certificazione C2 si svolgeranno in luogo nelle tre lezioni del mese di dicembre 2026. Gli esami scritti vengono svolti in aula, a mano senza supporti informatici.

Grading Scale:

1-6, Half Grades Given

Repeatability:

repeatable once, book again

Module ESC 413 Computational Thinking I

07SMESC413 / Course

Description:

General description:

The course will be organized around a series of "computational challenges" which will require an understanding of a broad range of computational topics in order to successfully tackle them.

ECTS: 2

Learning Outcome:

To improve the knowledge base of all MSc and PhD students in Computational Science. This knowledge will also prepare the PhD students for questions during their eventual closed session exam, but in general will improve the performance of all students faced with computational questions during talks/conferences.

Languages of Instruction:

English

Merkmale:

Responsible instructor: Robert Feldmann
Joachim Gerhard Stadel

Requirements:

Prerequisites: Python or other high level language, Introduction to Computational Science

Assessment: Oral examination

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Spring Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Module ESC 414 Practicum in advanced simulation science

07SMESC414 / Praktikum

Description:

General description:

An independent research project is started in this module which could act as setting the foundation for the MSc thesis work.

ECTS: 10

Learning Outcome:

To begin an independent research project, with enough background to be able to write the introduction to the MSc thesis. An initial exploration into the numerical methods needed, their strengths and weaknesses understood, and some initial practical exploration and analysis of results should be achieved. In some cases the practicum can be highly focused on results, but in other cases it can be of a more exploratory nature.

Languages of Instruction:

English

Merkmale:

Responsible instructor: Joachim Gerhard Stadel

Requirements:

Prior Knowledge: Introductory Computational Science course covering simulation methods/ algorithms, Programming in Python/C++/other

Assessment: Assessment based on a written report as well as a 30min presentation with questions.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Module Elective Module: Pediatric pneumology and allergology in theory and practice

04SM21MAS200 / Sonstiges

Description:

General description:

This course provides an in-depth look at common pediatric pneumology and allergology topics in the infant, toddler through adolescent and highlights the differences from adults. It is designed to provide students with the opportunity to interactively reinforce the content of the corresponding lectures in order to recognize typical pneumological and pneumological-allergological problems, as well as to define diagnostic measures and treatment steps and to be able to carry them out in practice.

Module Scientific Writing II: Publishing Papers in Computer Science (S)

03SMDINF4005 / Doktorandenseminar

Description:

General description:

This course aims to help you identify and comply with journals' requirements for paper submission and write papers suitable for publication. The main focus is on the structure and language use of the diverse sections of research papers. Working individually, in pairs and in small groups, instruction will be based on text analysis, writing exercises, collaborative writing, peer review and discussions of best practices. The lecturer will provide individual feedback on your writing samples. This course is particularly suitable if you have a more advanced command of English language and vocabulary and would like to focus more on the conventions, stylistics, and organisation of scientific articles. To benefit from the course fully, you should be in the process of writing scientific documents or articles.

This course can be taken in conjunction with the course "Scientific Writing for PhD students (DINF4001)" (usually offered in spring semester) or as a stand-alone course.

ECTS: 2

Notes:

Students are expected to attend regularly and to participate actively in class. The number of participants is limited to 15.

For registration please send an e-mail to: sigg@ifi.uzh.ch.

Learning Outcome:

After finishing the course, participants will be able to

- tailor their writing to particular readerships and journals,
- draft and revise all sections of a scientific paper according to the disciplinary standards and conventions,
- identify strengths and weaknesses in writing, and
- write clearly, cohesively, and in a reader-friendly manner.

Target Groups:

This course is for PhD and Fast-Track Masters students at IFI, who intend to write or work with scientific texts in English, either during their studies or in their future careers.

Languages of Instruction:

English

Course Materials:

Handouts will be provided before classes.

Recommended reading:

Zobel, Justin. Writing for Computer Science. Springer, 2014.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Elaine May Huang

Requirements:

Prior Knowledge:

This course is meant for PhD students who are relatively advanced in their studies and have a high level of English (C2 and above). Doctoral students at the

beginning of their studies or with a lower level of English are encouraged to first take the course "Scientific Writing for PhD Students (Computer Science)".

Assessment: The basis of assessment will be a portfolio of biweekly written assignments. For each assignment, participants will be expected to revise their first drafts on the basis of the feedback they receive. Only the second draft will count in the final assessment.

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module STA 472 Good Statistical Practice

07SMSTA472 / Lecture with Practical Exercises

Description:

General description:

The module "Good Statistical Practice" introduces students to the concepts of research integrity that are related to the practice of statistics. This includes ethical principles of statistical practice, effective written, visual, and oral communication, and reproducible and efficient computational practice. Besides theoretical insights into the foundations of statistical practice, students acquire practical skills using modern computational tools (e.g. dynamic reporting and version control), learn how to program reproducibly in R, and effectively present and write up statistical results.

The module provides insights and practical tools that are useful throughout the curriculum of the Master Program in Biostatistics or other programs focused on quantitative research. It is taught in a flipped classroom setting: Students are required to learn about concepts using provided material and complete assignments before an in-person session. Assignments and the in-person session contain peer and staff feedback and assessment.

ECTS: 4

Learning Outcome:

Participants who successfully passed the module

- understand the link between good statistical practice, scientific integrity, and reproducibility
- master the most relevant techniques of statistical computing in R
- have the necessary computational skills for reproducible statistical work (e.g., dynamic reporting and version control)
- have the relevant written, visual, and oral skills necessary to communicate statistical results efficiently

Target Groups:

Students of the Master Program "Biostatistics", Students of the Minor Program "Applied Probability and Statistics".

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Leonhard Held

Requirements:

Prior Knowledge:

Solid knowledge of the Statistical Computing Environment R and basic knowledge in statistics.

Assessment:

Active participation: checked through quizzes, tasks and questions in the Open edX course, submitting and assessing assignment responses on Open edX and GitLab. Details are announced in class and in the Open edX course.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Module Pathophysiologie der Gefässe

04SMCHI21001 / Kurs

Description:

ECTS: 0

Notes:

Kontakt-E-Mail:

jaroslav.pelisek@usz.ch

Learning Outcome:

Darstellung des Kurskonzepts:

Gefässerkrankungen sind in unserer immer älter werdenden Gesellschaft auf dem Vormarsch und werden daher vermehrt behandelt, weil insbesondere das Alter ein bislang nicht-veränderbarer Risikofaktor in deren Entstehung und Progression entscheidende Rolle spielt.

Das Ziel des Kurses ist interessierten Medizinstudentinnen/-en eine Möglichkeit zu bieten, Erkrankungen des Gefäßsystems besser zu verstehen. Es sollten Grundlagen der Gefässmedizin vermittelt werden, unter anderem der Aufbau der Gefässe auf molekularen und zellulären Ebene, sowie die Veränderung der Gefässwand während einer Erkrankung.

Darüber hinaus soll der Kurs auch experimentelle Möglichkeiten erläutern und neue potentielle diagnostische und therapeutische Verfahren vorstellen. Im Vordergrund steht die Pathophysiologie der Atherosklerose und Aneurysma, sowie die Auswirkung verschiedener kardiovaskulärer Risikofaktoren (Hypertonus, Rauchen, Diabetes, chronische Niereninsuffizienz).

Die einzelnen Kurse bauen thematisch aufeinander auf. Es wird zunächst der anatomische und biologische Aufbau der Gefässwand erklärt, mit Fokus auf die einzelnen Komponenten der extrazellulären Matrix und die Rolle insbesondere von Endothel- und glatten Muskelzellen, um die daraus entstehenden vaskulären Erkrankungen besser zu verstehen. Es wird die Atherosklerose als gemeinsame Grundlage der meisten vaskulären Erkrankungen besprochen. Daran anschliessend werden Risikofaktoren und deren Einfluss auf das Fortschreiten der Gefässerkrankungen diskutiert.

Weiterhin wird der aktuelle Stand der Wissenschaft inklusive Epigenetik, non-coding RNA, Omics-Technologien und zukünftige diagnostische und therapeutische Strategien besprochen.

Das Unterrichtsformat sollte eine regelmässige Präsenzveranstaltung sein. Geplant ist neben der theoretischen Vermittlung der Inhalte auch das Angebot an die Studierenden, selbst und unter Anleitung praktisch im Labor tätig zu sein. Somit können die Studierenden Erfahrung in verschiedenen und modernen Untersuchungsmethoden sammeln.

Wegen der Komplexität der Inhalte, würde sich dieses Angebot an Studierende fortgeschrittener Jahrgänge wenden: z.B. Wahlmodul im Masterstudium.

Lernzieldefinitionen für die Vorlesungsreihe: Das Ziel der Vorlesungsreihe ist die Vermittlung von Grundwissen über Blutgefässe, deren Funktionalität und über biologische Vorgänge, die zu einer Gefässerkrankung führen. Dadurch erlangen die Studierenden bessere Fertigkeiten, eine korrekte Diagnose und folgende Therapie zu erstellen.

1. Atherosklerose und Aneurysma: Ursachen und Entstehung Dieser Teil des Kurses beinhaltet die Einführung in die Problematik, Pathologie des Umbaus der Gefässwand, die Rolle von Endothel- und glatten Muskelzellen, Neovaskularisierung, Klassifizierung atherosklerotischer Läsionen.

2. Gefässremodelling: Die Rolle der Inflammation und Proteasen Hier soll das Grundwissen über die Rolle und Funktion von inflammatorischen Zellen, Zytokinen und proteolytischen Enzymen, auch als mögliche prognostische Biomarker und therapeutische Target vermittelt werden.

3. Risikofaktoren der Gefässerkrankungen Dieser Teil des Kurses soll den Einfluss von bekannten Risikofaktoren wie Alter, Hypertonus, Rauchen, Diabetes, oder Niereninsuffizienz auf das Fortschreiten von Gefässerkrankungen erläutern und damit verbundenen erhöhtes Risiko eines Schlaganfalls oder einer Aneurysmaruptur.

4. Die Rolle von Epigenetik und non-coding RNA in Gefässerkrankungen Es sollen hier die Grundlagen der Epigenetik und nicht-codierenden RNAs erklärt werden, mit Fokus auf epigenetische Veränderungen in den

erkrankten Gefässen und die Rolle von nicht-kodierenden RNAs (miRNAs, lncRNAs, circRNAs)

5. Grundlagen der Methodik in der Erforschung von Gefässerkrankungen In diesem Teil des Kurses soll die Wichtigkeit der Biobank thematisiert, moderne Omics-Technologien (Transkriptomik, Proteomik, Epigenomik) erklärt und Beispiele aus unserer eigenen Forschung vorgestellt werden.

6. Gefässmedizin der Zukunft

Abschliessend soll, bezogen auf den jetzigen Stand der Forschung, ein Ausblick auf neue diagnostische und therapeutische Verfahren in der Gefässmedizin, hochauflösendes Imaging, Gentherapie vermittelt werden.

Module BIO 645 Crash Course in Statistics for Neuroscientists

07SMBIO645 / Doktorandenseminar

Description:

General description:

An annual course for students of the ZNZ to get hands-on acquaintance with statistics and its application to research. The goal of this course is to establish basic concepts required for good statistical practice and to give insights into the statistical programming environment R using RStudio and reporting tools such as Rmarkdown. Using real world examples we will show possibilities, limitations, and caveats of using statistics in neurosciences and research in general.

ECTS: 2

Notes:

The course is taking part also during the "non-lecture" time of the semester.

Target Groups:

For PhD students in the ZNZ Neuroscience program

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Christoph Luchsinger

Requirements:

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Spring Semester)

Booking Deadline/Period:

not bookable

Cancellation Deadline:

not cancelable

Organisation:

Module Essentials in Text and Speech Processing

06SM523-900 / Module

Description:

General description:

This course introduces basic concepts in Natural Language Processing. The course is most suitable for Master students from the Department of Informatics, especially students majoring in Artificial Intelligence or Data Science.

ECTS: 3

Notes:

Block course: This course will take place one week before the start of the semester, from Mon, Sep 7 to Friday, Sep 11, 2026. Time: each day from 14 - 18h

Learning Outcome:

Overall course goal: At the end of the course, students are familiar on a high level with the terminology, tasks and methods fundamental to natural language processing.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Rico Sennrich

Requirements:

Prerequisites:

At least one programming language (necessary for assignments).

Assessment:

Programming project, to be submitted roughly one month after the course ends

Grading Scale:

1-6, Half Grades Given

Repeatability:

repeatable once, book again

Organisation:

Offer pattern:

Module Corporate Tax Law I

02SM90WM69 / Lecture with Practical Exercises

Description:

General description:

Das Modul Unternehmenssteuerrecht I befasst sich mit der Besteuerung der Unternehmen (juristische Personen und Personenunternehmen) sowie mit der Besteuerung der an einem Unternehmen Beteiligten. Unter Berücksichtigung der direkten Bundessteuer, der Verrechnungssteuer und der Stempelabgaben werden insbesondere die handels- und steuerrechtlichen Gewinnermittlung besprochen. Im Fokus der Vorlesung stehen damit die ordentlichen Geschäftsvorfälle (steuerrechtliche Gewinnermittlung, zeitliche Bemessung und Verlustverrechnung, Ersatzbeschaffung und Reininvestition, Beteiligungsermässigung sowie Besteuerung von Kapitaleinlagen und Kapitalentnahmen).

ECTS: 6

Notes:

Die Veranstaltung ist als Vorlesung mit integrierten Übungen konzipiert. Der Vorlesungsstoff wird nach nur kurzer thematische Einführung anhand von Übungsfällen gemeinsam erarbeitet.

Learning Outcome:

Die Studierenden sind nach Abschluss des Moduls Unternehmenssteuerrecht I in der Lage

- die Besteuerung von Unternehmen und ihrer Beteiligten aus Sicht der einbezogenen Steuerarten zu verstehen;
- die Kernprobleme der Besteuerung von Unternehmen sowie ihrer Beteiligten zu analysieren und für umstrittene Fragen und Problemfelder wissenschaftlich fundierte Lösungen zu erarbeiten.

Target Groups:

Studierende der Master of Law UZH Studiengänge.

Languages of Instruction:

Deutsch

Course Materials:

Lehrbuch: Madeleine Simonek, Unternehmenssteuerrecht, Grundlagen für das Studium und die Praxis, Zürich 2019 (Schulthess Verlag)

Merkmale:

Responsible instructor:

René Matteotti

Requirements:

Prerequisites:

Besuch der Pflichtvorlesung Steuerrecht I des Masterstudiengangs.

Prior Knowledge:

Die teilnehmenden Studierenden sollten gute Grundkenntnisse im Steuerrecht besitzen und das schweizerische Steuersystem kennen.

Assessment:

Schriftliche oder mündliche Prüfung am Ende des Semesters. Die Art des Leistungsnachweises wird nach Ablauf der Buchungsfrist festgelegt.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated as necessary

Organisation:

Offer pattern: 1 Semester (Every Spring Semester)

Module Fintech, Blockchain & the Future of International Finance

02SM90WM44 / Course

Description:

General description:

DESCRIPTION OF THE COURSE

Finance is being reinvented in real time. From blockchain to decentralized finance, from tokenized assets to central bank digital currencies, new technologies are redrawing the boundaries of global markets—while regulators race to keep up. This course explores the frontiers of financial innovation, combining technical insights with legal, regulatory, and policy analysis.

Students will gain a solid grounding in the foundations of financial regulation, the mechanics of blockchain and smart contracts, and the rise of digital assets—from the ICO boom to today's tokenized funds and on-chain asset management. Through comparative study of landmark frameworks such as the EU's MiCA and emerging U.S. proposals, we will examine how different jurisdictions grapple with classification, licensing, custody, investor protection, and market stability in a fast-moving environment.

The course also investigates the disruptive forces of decentralized finance, the parallels between traditional shadow banking and crypto-based intermediation, and the policy challenges of shadow central banking. Special sessions on AML, RegTech, and SupTech will highlight how technology is transforming compliance.

Crucially, guest speakers from industry leaders, policymaking bodies, and regulatory authorities will join the course, providing invaluable real-world perspectives. This direct engagement will equip students to critically assess—and confidently navigate—the rapidly evolving landscape where technology, law, and finance converge.

COURSE STRUCTURE

The course will consist of lecture sessions that utilized the case law method and interactive discussion of key lecture topics derived from the readings and elaborated upon in class. The required readings and relevant documentation will be available to be downloaded from the course readings page on the course website (website link). Students should read the mandatory readings for each week's lecture and come to class ready to participate. The final lecture will include an examination review session that will cover relevant course themes and topics. The examination will be written and open book. Students will be encouraged to discuss course themes and materials in preparation for the examination.

ECTS: 6

Notes:

PODCAST

The lectures will be recorded and offered online as podcasts. Please note that due to technical difficulties not all classes may be recorded or there may be technical difficulties with the recordings. Students are encouraged to attend all lectures. If they miss lectures, they take the risk that technical problems or disturbances in the online recordings may make it difficult or impossible for them to access the lectures. The loss of access to the recordings is not sufficient cause for an appeal against the examination. Scripts or other materials declared as examination relevant take priority over the podcasts. In case of ambiguity contact the lecturer immediately. The recordings are for private use only. Redistribution in whatever form, in whole or in part, is not permitted without consent of the lecturer and may be punished by disciplinary measures or otherwise.

Module Co-Creating Knowledge with Citizens? How Citizen Science Succeeds!

10SMSTS-103 / Seminar

Description:

General description:

«Citizen Science» (CS) ermöglicht den Einbezug von Bürger*innen in wissenschaftliche Forschungsprojekte. Die Spannbreite von CS Projekten ist dabei gross und reicht von punktuelltem Einbezug zur Datenerhebung bis hin zur partizipativen Ko-Kreation von Projekten und Ko-Produktion von Wissen. Das Modul bietet eine Einführung ins Thema CS mittels konkreter Projektbeispiele aus unterschiedlichen Disziplinen. Dabei ergänzen sich E-Learning, Blockveranstaltungen vor Ort und der Austausch mit Projektverantwortlichen. Interaktiv diskutieren wir Ziele und Funktionen, Art und Intensität sowie Herausforderungen der praktischen Umsetzung im Feld. Darüber hinaus setzen wir CS in Bezug zu Kommunikation im Allgemeinen sowie Wissenschaftskommunikation im Besonderen, Diversität, Open Science und TD Forschung. Das Modul soll zur Reflexion darüber anregen, wie eine Wissensproduktion aussehen könnte, die sich durch grössere Offenheit und Teilhabemöglichkeiten von Bürger*innen auszeichnet.

ECTS: 1

Notes:

Die Veranstaltung findet als blended-learning Veranstaltung statt. Sie besteht aus E-learning Einheiten, zwei halbtägigen Präsenzveranstaltungen und praktischen Übungen. Die Teilnehmenden haben Gelegenheit, erste Ideen für ein eigenes CS-Projekt auszuarbeiten.

Kurz erklärt: <https://t.uzh.ch/1Pn>

Learning Outcome:

Die Teilnehmenden können grundlegenden Konzepte und Fragen im Bereich CS nennen, erkennen CS Projekte und können sie in Bezug auf ihren Grad an Partizipation charakterisieren. Sie kennen Chancen und Herausforderungen von CS Projekten und können verschiedene Typen von CS Projekten in Bezug auf ihren Nutzen für Forschende und Bürger*innen reflektieren. Sie haben eine erste Vorstellung davon, wie Forschung und die Lösung gesellschaftlicher Probleme miteinander verbunden werden können. Zudem können sie die Zusammenhänge zu Wissenschaftskommunikation, Open Science und TD Forschung herstellen und können Theorie und Praxis von CS einem weiteren Umfeld erklären. Die Teilnehmenden können unter Einbezug der erlernten Prinzipien von CS Forschung bestehende Projektbeschreibungen kritisch analysieren und eine eigene, zielgruppengerechte Projektbeschreibung formulieren.

Target Groups:

Bachelor, Master, Doktorat

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Nora M. Raschle

Requirements:

Prerequisites: Deutschkenntnisse. Das Modul wird auf Deutsch durchgeführt.

Assessment: Einreichen von praktischen Übungen und Reflexionen in einem Workbook zum Ende der Veranstaltung. Abgabe spätestens 4 Wochen nach dem letzten Seminar
Termin: Kritische Analyse einer vorhandenen CS Projektbeschreibung hinsichtlich der im Kurs erlernten Kriterien für gute CS Forschung oder Verschriftlichung einer

eigenen Projektbeschreibung unter Berücksichtigung der im Kurs erlernten Kriterien für gute CS Forschung.

Module UZH Innovathon: The Digitalization of Mobility

10SMSTS-106 / Seminar

Description:

General description:

This transdisciplinary course equips students with innovation skills through structured, hands-on problem-solving techniques. Innovation is essential for developed economies like Switzerland to sustain their international standing and economic wellbeing.

Students learn how to approach problems creatively, collaborate across disciplines, and develop impactful solutions. Working with practice partners, students tackle real-world challenges, contributing directly to solving these.

The area of focus is the digitalization of mobility - an area where innovation e.g., clean, autonomous systems or seamless public transport can address societal needs and sustainability goals e.g., by reducing environmental impacts or enhancing inclusivity. The course begins with input from lecturers across various disciplines, offering diverse perspectives to build a strong foundation for understanding and innovation. Then, students engage in doing: developing actionable solutions which eventually may be implemented by industry partners.

See more on our course homepage: <https://www.digitalinnovathon.uzh.ch/en.html>

ECTS: 3

Notes:

The course entails the following teaching methods:

Experiential Learning: Students learn innovation techniques by engaging in a Design Sprint, a structured, time-bound method to brainstorm, prototype, and test solutions. Further, students participate in pitching their solutions to a jury. This hones their skills in professional communication, persuasive storytelling, and delivering impactful presentations.

Professional Coaching: Innovation coaches help teams create impactful solutions, navigate challenges and pitch techniques.

Peer-to-Peer Learning: Students collaboratively explore new topics and then teach these to their peers which promotes mastery of subject matter and builds confidence in explaining and presenting knowledge.

Team-Based Learning: Students co-create solutions by pooling their expertise and backgrounds. Every team member gains new skills while contributing meaningfully to the group's success.

Guided Reflection: Structured feedback of students and firms fosters skills for collaboration and professional growth.

Blended Learning: In-person sessions are supplemented with online studies.

Course intro: <https://t.uzh.ch/1Po>

This course entails interactive collaboration and real-time teamwork. The activities thrive on the energy of being fully present-working together, exchanging ideas, and creating solutions in a vibrant environment. Thus, full on-site participation in all sessions is essential. We understand that unavoidable circumstances may occasionally prevent full participation. In such cases, participants can request an exception for up to 3 hours of absence, subject to prior approval.

Learning Outcome:

Innovation Skills: Learn techniques to ideate, prototype, and refine solutions.

Communication and Presentation Skills: Learn professional pitching, persuasive storytelling, and clear, impactful communication.

Interdisciplinary Collaboration: Experience working with diverse teams, integrating multiple perspectives, and co-creating meaningful outcomes.

Professional Interaction: Build skills in engaging with industry partners.

Interdisciplinary Knowledge: Explore the digitalization of mobility from diverse disciplinary perspectives, including informatics, law, geography, remote sensing, health sciences, or business administration.

This course entails interactive collaboration and real-time teamwork. The activities thrive on the energy of being fully present - working together, exchanging ideas, and creating solutions in a vibrant environment. Thus, full on-site participation in all sessions is essential. We understand that unavoidable circumstances may occasionally prevent full participation. In such cases, participants can request an exception for up to 3 hours of absence, subject to prior approval.

Target Groups:

Master und Doktorat

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Anja Schulze

Requirements:

Prerequisites:

The number of participants is limited.

Please register for the module within the specified deadlines via the UZH module booking tool.

UZH students register via the UZH course catalogue within the specified deadlines.

Non-UZH students who wish to complete the module as mobility students must first observe the application deadlines at UZH (<https://www.uzh.ch/en/studies/application/deadlines.html>) and, after the successful registration at UZH, book the module through the UZH course catalogue.

The course requires an English level of B1/B2.

Assessment:

Course Assessment and Participation Rules

Attendance

The course is an in-presence format. Maximum allowed absence: 3 hours (upon request and approval).

Active engagement

Evaluation covers how well students engage during all parts of the course (i.e., teaching sessions, design sprint process, pitches, and reflection workshop) including collaboration, contribution, and critical engagement with the topic.

Process adherence

Teams will follow a design sprint process. Each phase must be completed. Upon

completion, each team with all members present checks-in with the coaches and conduct a team self-reflection (development check). Completion and reflection are assessed by the coaches.

Individual written assignments (2× 500-600 words):

- Assignment I due Sept 8
 - Assignment II due Oct 1
- Grading composition
- 25% active engagement & teamwork
 - 25% design sprint process adherence
 - 25% reflection (self & with firms)
 - 25% individual written assignments

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Request period: from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Place allocation at the latest: Sa 29.08.2026 22:00

Waiting list progression period: from Sa 29.08.2026 22:00 to Fr 04.09.2026 24:00

Cancellation period: from Sa 29.08.2026 22:00 to Mo 07.09.2026 24:00

Organisation: School for Transdisciplinary Studies

Offered in:

- Fall Semester 2026
- Fall Semester 2025
- Fall Semester 2024
- Fall Semester 2022

Module Get R_eady: Introduction to Data Analysis for Empirical Research

10SMSTS-506 / Module

Description:

General description:

The course offers an introduction to data analysis in the transdisciplinary field of empirical research in the programming language R. The R system of statistical computing is openly available from <https://www.r-project.org> and provides a simple and flexible software environment for statistical analyses and graphics. Tailored to the application of empirical research the course covers basics of functions and data formats in R, as well as the essential steps of a data analysis including data manipulation, descriptive statistics, statistical tests and graphical representations. Reflections on research methodology and transdisciplinarity will take place and critical thinking will be enhanced.

ECTS: 1

Notes:

The Get R_eady module enhances digital skills in the context of data analysis and graphics. It stimulates critical thinking and provides tools for reproducible research. In applications corresponding to the course participants' backgrounds, the concepts are explained. Hands-on sessions facilitate the understanding of the participants and enhance the discussion. The course is building on problem based learning and held in an interactive and diverse format, with short lectures, demonstrations and hands on practical exercises to be solved in small groups.

Learning Outcome:

Aims of the course

- to equip participants with the essential tools to address their research questions in R,
- participants are able to perform plausibility checks, descriptive analysis, statistical tests and visualization of their research data in R,
- participants are able to critically engage with and reflect on methodological aspects of data analysis and presentation and can adapt contemporary examples for critical appraisal to their disciplinary background.

Target Groups:

Master, Doktorat

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Ulrike Held

Requirements:

Prerequisites:

Participants should have basic knowledge in statistics and should be beginners with the software R.

Assessment:

The assessment is based on the following components:

- preparatory work before course start
- active course participation
- short presentations in the second and third part of the course
- homework

The components of the assessment take place during the course, and homework

needs to be submitted during the course and 2.5 weeks after the last course date.

Grading Scale: Pass/Fail

Module Applying and Reflecting on Digital Humanities Methods

10SMSTS-511 / Seminar

Description:

General description:

Der Grundkurs ist eine Einführung in das weite und innovative Feld der Digital Humanities und richtet sich an Studierende ohne Vorkenntnisse. Er zielt auf die systematische Vermittlung digitaler Kernkompetenzen in text- und bildbasierten Wissenschaften und deren Anwendung auf wechselnde Fragestellungen. Im Fokus stehen kulturelle Artefakte, insbesondere textuelle und visuelle Werke sowie ihre Datenmodellierung und Gestaltung im digitalen Kontext.

Der Kurs gibt eine Einführung in die Themenbereiche: Daten & Information, Datenbanken, Text- und Bildverarbeitung, Programmier- und Auszeichnungssprachen, Aufbau und Funktionalität des Webs, Digitale Editionen sowie künstliche Intelligenz und deren Ethik. Die Inhalte werden interdisziplinär und praxisorientiert vermittelt, d.h. durch das Erlernen technischer Grundlagen und die Erprobung verschiedener digitaler Methoden & Tools aus verschiedenen Disziplinen.

Der Kurs besteht aus Onlinesitzungen und Selbststudium-Bausteinen.

ECTS: 3

Notes:

Der Kurs besteht aus alternierenden Wochen von Onlinesitzungen und Selbststudium.

In den gemeinsamen Onlinesitzungen (donnerstags, 10:15 - 12:00 Uhr, 14-tägig ab Semesterbeginn) werden Grundlagen zum jeweiligen Themenblock erläutert. Es wird kein Wissen zu den Themen vorausgesetzt. Die Onlinesitzungen sind interaktiv gestaltet.

In den Wochen im Selbststudium können die Kenntnisse selbstständig vertieft und reflektiert werden. Dafür steht ein E-Learningmodul (OLAT) mit interaktiven Übungen zur Verfügung. Es kommen ergänzend praxisorientierte Aufgaben dazu, durch die das Gelernte anhand konkreter Fragestellungen angewendet werden kann.

Kurz erklärt: <https://t.uzh.ch/1Pn>

Learning Outcome:

- Grundlagenkenntnisse der Digital Humanities sowie ihrer Methoden und Tools
- Einblick in aktuelle Datenstandards nach dem FAIR-Prinzip
- Fähigkeit der Datenstrukturierung (z.B. in einer relationalen Datenbank)
- Erwerb von text- und bildtheoretischen Kenntnissen, deren Digitalisierung und Enkodierung im Binärsystem
- Erste Schritte in LaTeX
- Erste Schritte in XML/HTML/CSS
- Grundlagenkenntnisse des Computational Thinking
- Grundlagenkenntnisse der künstlichen Intelligenz (Maschinelles Lernen)
- Kompetenz, kritisch über die digitale Transformation und ihre Wirkung auf Bildung, Forschung und Gesellschaft zu reflektieren

Target Groups:

Bachelor, Master

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Tristan Weddigen

Requirements:

Prerequisites: keine

Assessment: Das Bestehen von Arbeitsaufträgen zu den verschiedenen Themen während des Semesters. Aktive Teilnahme an den Onlinesitzungen ist ausdrücklich erwünscht. Portfolio: In den Stunden im Selbststudium gibt es jeweils Unterrichtsmaterialien zum selbstständigen Aneignen von Inhalten, Pflichtlektüre sowie obligatorische Arbeitsaufträge während des Semesters. Die Portfolioleistungen werden jeweils nach dem Selbststudium eingereicht. Die genauen Termine für die Abgaben der Portfolioleistungen werden am Anfang des Semesters bekannt gegeben. Keine abschliessende Prüfung.

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Request period: from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Place allocation at the latest: Sa 29.08.2026 22:00

Waiting list progression period: from Sa 29.08.2026 22:00 to Do 10.09.2026 24:00

Cancellation period: from Sa 29.08.2026 22:00 to So 13.09.2026 24:00

Organisation: School for Transdisciplinary Studies

Offered in:

Module Introduction to Research Data Management

10SMSTS-516 / Module

Description:

General description:

This introductory course on research data management (RDM) familiarizes students with important aspects and components of RDM and the data lifecycle. The course will also teach about data repositories, including how to find and cite existing data from such repositories, and about some of the legal aspects of data reuse and sharing, e.g. data licenses. After the end of this course, students are able to plan their own research data management. The introductory course is intended for bachelor students, master students and also PhD students who have little or no prior knowledge of research data management. The course takes place as a half-day on-site event with online learning components before and after the event. The online preparatory tasks need to be completed before the on-site event.

ECTS: 1

Notes:

To get a spot in this application module, please write in the application form about your next research project (e.g. for a seminar paper, BA or MA thesis) that you are planning and for which you will need to know more about data management.

Preparatory tasks will be made available on OLAT three weeks before the on-site event and need to be completed before the event. Please be aware that the tasks in the preparation phase aim to provide you with the necessary information and knowledge while the on-site event will be dedicated to the application of said knowledge. Attention: The general booking and cancellation deadlines of UZH apply to this module.

If you are a doctoral student who would like to have an introduction to both Open Data and Open Access, we encourage you to take a look at the GRC course "Open Up and Share" (FS27) instead.

Learning Outcome:

After this course, students are able to

1. recognize and describe important components of the data life cycle and Research Data Management (RDM),
2. name data repositories for their research data,
3. correctly cite existing datasets,
4. recognize, interpret and use correctly licenses for research data, and
5. write down important aspects of their research data management in a data management plan.

Target Groups:

Bachelor, Master, Doktorat

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Rudolf Mumenthaler

Requirements:

Prerequisites:

None

Assessment:

The portfolio assessment consists of
1. submission of a first draft of a data management plan during the preparation

phase,

2. a final description of research data management in the form of a data management plan, and

3. a mini-quiz on OLAT.

Please be aware that this course has a policy on the use of AI. You will need to pass the criteria of the assessments and follow the GPT policy in order to pass the course.

Grading Scale: Pass/Fail

Module Open Access Basics

10SMSTS-515 / Module

Description:

General description:

The introductory course "Open Access Basics" introduces students to the field of Open Science with a specific focus on Open Access - the online availability of articles and books. They learn about the newest developments in the publication landscape, how to access materials behind a paywall, explore the characteristics of Open Access and the difference to publications in traditional subscription-based journals. Manuscript versions and legal aspects of publishing (licenses) will also be discussed, as well as the impact that Open Access can have on society. The introductory course is intended for bachelor and master students who have little or no prior knowledge of Open Access. The course takes place as a half-day on-site event with online learning components before and after the event.

ECTS: 1

Notes:

Preparatory tasks will be made available on OLAT three weeks before the on-site event and need to be completed before the event. Please be aware that the tasks in the preparation phase aim to provide you with the necessary information and knowledge while the on-site event will be dedicated to the application of said knowledge.

Attention: The general booking and cancellation deadlines of UZH apply to this module. This course might not be suitable for first-year BA students; please contact the course administrator (Melanie Röthlisberger) to discuss your case.

If you are interested in the topic but just want some quick information, have a look at our Open Access course on OLAT [lms.uzh.ch/auth/RepositoryEntry/17790697652] (<https://lms.uzh.ch/auth/RepositoryEntry/17790697652%5D>)

Learning Outcome:

After this course, students are able to 1) name different versions of manuscripts, 2) differentiate between Open Access publications (diamond, gold, green) and traditional publications in subscription journals, 3) name various possibilities how and where to publish OA using online research tools such as the DOAJ, 4) access material that is behind a paywall and 5) distinguish between different creative commons licenses

Target Groups:

Bachelor, Master

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Rudolf Mumenthaler

Requirements:

Prerequisites:

None

Assessment:

The assessment of this course consists of three parts:

1. a preparatory task before the on-site event,
2. an exercise during the on-site event, and
3. an online quiz on OLAT after the on-site event.

Please be aware that this course has a policy on the use of AI. You will need to pass the criteria of the assessments and follow the AI policy in order to pass the

course.

Module Hands-on Urologie: Einführung in die urologische Sonographie, Katheterisierung und klinische Visite
04SMURO21001 / Kurs

Description:

ECTS: 0

Notes:

Kontakt-E-Mail:

raeto.strebel@ksgr.ch

Learning Outcome:

Im Urologischen Hands-on Kurs werden Basiskenntnisse der urologischen Sonographie (ableitende Harnwege, Restharnbestimmung, Prostatagrösse, Hodensonographie) vermittelt. Nebst der urologischen Visite und Besprechung der häufigsten urologischen Krankheitsbilder wird zudem das Katheterisieren der Blase erlernt.

Target Groups:

Studierende im Masterstudium

Merkmale:

Responsible instructor: Räto Thomas Strebel

Requirements:

Grading Scale: Pass/Fail

Organisation:

Offer pattern: 1 Semester (Every Semester)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Module Grundlagen der pädiatrischen und neonatologischen Intensivmedizin

04SMPED21003 / Seminar

Description:

ECTS: 0

Notes:

Kontakt-E-Mail:

luregn.schlapbach@kispi.uzh.ch

Learning Outcome:

Im Seminar "Grundlagen der pädiatrischen und neonatologischen Intensivmedizin" werden zweiwöchentlich Hauptthemen der pädiatrischen Intensivmedizin und der Neonatologie besprochen. Die Hauptthemen decken organspezifische Pathophysiologien und Therapien (Lungen-/Leber-/Kardiale Probleme u.ä.), sowie auch mit der Intensivmedizin eng verbundene Themen (zB Evidence Based Medicine, Palliativ-/Reanimations-Medizin und Ethik) ab.

Die Donnerstage sind themenorientiert gestaltet mit Fallbesprechungen und mehreren Theorieteilern mit genügend Zeit für Fragen und Diskussionen. Evidenz basierte Therapieempfehlungen werden besprochen und diskutiert. Die Lernziele sind es in einem interdisziplinären und interprofessionellen das Grundverständnis für die Pathophysiologie intensivmedizinischer und neonatologischer Krankheitsbilder und deren Diagnostik und Therapie anhand von aktueller Evidenz kennen zu lernen.

Studierende können durch eigene Beiträge und durch in etlichen Vorträgen angewandte live-voting-tools eine aktive Rolle einnehmen. Bitte schreiben Sie eine E-Mail an Jutta Hehli (jutta.hehli@kispi.uzh.ch) um eine persönliche Einladung mit Angaben zu Zeit, Raum und Thema zu erhalten. Die Veranstaltung findet aktuell online statt. Es ist keine Prüfung vorgesehen.

Module GEO 887 Agroecology and Food Systems

07SMGEO887 / Lecture with Practical Exercises

Description:

General description:

Die Studierenden befassen sich mit den Herausforderungen von landwirtschaftlichen Produktions- und Ernährungssystemen auf dem Weg zu einer nachhaltigen Ressourcennutzung im Sinne der Agrarökologie. Auf regionaler, nationaler und europäischer Ebene beleuchten sie die Ökosystemdienstleistungen von landwirtschaftlichen Produktionssystemen und zeigen Wege auf, die zu einer nachhaltigen Intensivierung beitragen können.

Die Vorgehensweise im Teil Agrarökologie orientiert sich am "Zwiebelaufbau" - vom Kern der Betrachtung im Sinne der Kulturpflanzenökologie über die Beurteilung von Ökosystemdienstleistungen verschiedener Landnutzungssysteme bis zu den Konsequenzen einer agrarökologischen Transformation auf gesellschaftlicher und sozialer Ebene.

Ein weiterer Schwerpunkt bildet die umfassende Analyse von Wertschöpfungsketten für regionale Produkte auch im Hinblick auf mögliche Umweltwirkungen in der Erzeugung. Zur Analyse gehört ebenfalls die systematische Darstellung der unterschiedlichen Interessens- und Betroffenheitsperspektiven entlang der Produktions- und Lieferkette und eine kritische Auseinandersetzung mit diesen.

ECTS: 6

Notes:

Der Kurs findet am Institut für Umwelt und Natürliche Ressourcen der Zürcher Hochschule für Angewandte Wissenschaften (ZHAW) in Wädenswil ZH statt.

Veranstaltungsort: Campus Grüental, Grüentalstrasse 14, Wädenswil.

Die Agenda 2030 der Vereinten Nationen (UNO) umfasst 17 Ziele für nachhaltige Entwicklung (Sustainable Development Goals, SDGs (<https://sdgs.un.org/goals>)), die von allen UN-Mitgliedstaaten verabschiedet wurden. Sie bilden einen gemeinsamen Rahmen zur Förderung von sozialer Gerechtigkeit, Umweltschutz und wirtschaftlicher Entwicklung weltweit.

Behandelt werden in diesem Modul insbesondere: 2; 12; 13 & 15

Learning Outcome:

Die Studierenden werden befähigt, * die Probleme und Herausforderungen, die sich für die Entwicklung landwirtschaftlicher Produktions- und Ernährungssysteme in Richtung Ökologie und Nachhaltigkeit stellen, zu erkennen und zu beschreiben; * diese Herausforderungen aus unterschiedlichen Interessens- und Betroffenheitsperspektiven zu betrachten, zu analysieren und kritisch zu diskutieren; * für die identifizierten Herausforderungen Lösungen entwickeln, welche die Ökosystemdienstleistung in der Produktion verbessern und zu nachhaltigeren Lieferketten beitragen; * partizipative Ansätze zur Transformation von Landnutzungssystemen und Wertschöpfungsketten zu verstehen und anzuwenden; * die Ergebnisse ihrer Recherchen und Analysen schriftlich und mündlich verständlich darzustellen und zu kommunizieren.

Target Groups:

Masterstudierende der Fachrichtungen Geographie und Erdsystemwissenschaften; Studierende anderer Fachrichtungen wenden sich an die Instruktoren

Languages of Instruction:

Deutsch, einzelne Lektionen von Gastdozierenden in Englisch

Course Materials:

Die Pflichtlektüre und weitere Beiträge für die vertiefte Auseinandersetzung mit den behandelten Themen werden zu Semesterbeginn bekannt gegeben. Zusätzlich werden zwei E-Learning-Kurse im Selbststudium erarbeitet.

Merkmale:

Responsible instructor: Patrick Laube

Requirements:

Prerequisites: BSc

Prior Knowledge: Die Studierenden sind in der Lage, * die Agrarökologie im Sinne der Definition der FAO als Mittel zur Erreichung der UN-Nachhaltigkeitsziele zu verstehen und landwirtschaftliche Produktions- und Lieferketten diesbezüglich zu analysieren; * die Land- und Ernährungswirtschaft als System zu betrachten und wichtige Elemente und Beziehungen zu identifizieren und zu beschreiben. * natürliche, technische, gesellschaftliche, wirtschaftliche und politische Akteure im System Landwirtschaft und Ernährung zu benennen, sowie Ideen und Ansätze einer agrarökologischen Transformation weiter zu entwickeln. * An ökologischen, digitalen und technischen Lösungen zu feilen, welche Wege für eine nachhaltigere Produktion aufzeigen.

Assessment:

- E-Learning-Kurse zum Einstieg ins Thema und als Vorbereitung des Moduls (Testat)
- Hausarbeit (60% Modulnote)
- schriftliche Prüfung (40% Modulnote)

Beide Teile des Leistungsnachweises (Hausarbeit und Prüfung) werden benotet. Die Gesamtnote (Schnitt Hausarbeit und Prüfung) muss genügend sein. Sonst gilt das Modul als nicht bestanden und kann ein Mal wiederholt werden.

Module Zoroastrianism

01SM41LM005 / Seminar

Description:

General description:

The seminar offers a fundamental introduction to a religious tradition and practice whose history goes back to ancient Persia and which is still practiced today in Iran, India, and various diaspora contexts. The course deals with central ritual practices, concepts, beliefs, and social institutions, as well as contemporary debates and conflicts within the community. It will therefore also discuss the most important challenges for this tradition in the present.

ECTS: 6

Learning Outcome:

The students know important aspects of the Zoroastrian tradition. They can place current internal debates and challenges for the community in the context of modern and global societies.

Module Extended Internship

06SM410-505 / Module

Description:

General description:

A partire da una lista di enti, istituzioni, organizzazioni e aziende disponibili ad accogliere un/a tirocinante, gli studenti e le studentesse potranno scegliere, sotto la supervisione del/la docente, uno specifico progetto formativo che sia professionalizzante per l'italianistica. Gli studenti e le studentesse potranno altresì effettuare degli stage di ricerca presso il dipartimento di lingue romanze, ad esempio collaborando alla preparazione di convegni, workshop ecc., oppure partecipando alle attività scientifiche di una delle cattedre di italianistica.

ECTS: 15

Notes:

<https://www.rose.uzh.ch/de/studium/italienisch/stage.html>

Learning Outcome:

Lo stage esteso ha l'obiettivo di far vivere agli studenti e alle studentesse una prima significativa esperienza professionale che si colleghi in modo diretto alla formazione universitaria nel campo dell'italianistica. Attraverso un periodo di tirocinio esteso gli studenti e le studentesse entreranno in contatto non solo con le istituzioni culturali, sociali e accademiche ma anche con aziende che usufruiscono delle competenze di chi si laurea in italianistica, al fine di acquisire competenze specifiche che favoriranno il loro inserimento nel mondo lavorativo.

Languages of Instruction:

Italienisch

Learning Outcome:

Lo stage ha l'obiettivo di far acquisire agli studenti e alle studentesse competenze professionali che riguardino il mondo dell'italianistica. Attraverso un periodo di tirocinio gli studenti e le studentesse entreranno in contatto non solo con le istituzioni culturali, sociali e accademiche ma anche con aziende che usufruiscono delle competenze di chi si laurea in italianistica, al fine di favorire il loro inserimento nel mondo lavorativo.

Module Comprehensive Traineeship / Summer School: Language

06SM278-505 / Module

Description:

General description:

This core elective approves the completion of a traineeship or summer school that helps students to improve practical communication skills or linguistic competence in one of the languages of Modern Asia or the Middle East. Students need to consult with the MAMES study advisor and then obtain approval from the respective department's study advisor within the IAOS before booking the module as to confirm that the traineeship, summer school or workshop is offered by an accredited institution and can be counted towards their degree.

ECTS: 6

Notes:

This module has to be booked via the booking agreement available on the website of the IAOS: <https://www.aoi.uzh.ch/de/studies/studyorganization/courseofstudies/booking.html>

Learning Outcome:

Completion of a Traineeship/Summer School/Workshop can help students to improve their communication skills or linguistic competences in grammar, writing, reading, or academic use of one of the languages of Asia or the Middle East.

Languages of Instruction:

gemäss Anbieter

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Nicolas Martin
David Chiavacci

Requirements:

Prerequisites:

Students must identify potential host institutions and organize their enrolment. Host institutions can either be other institutes of the UZH, external institutions in Switzerland or an overseas institution, including in the country of the language studied.

This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module.

Module **Our voice: Between linguistic and idiosyncratic information**

06SM523-531 / Module

Description:

General description:

Next to containing a linguistic message, voices play an essential role in human social interaction. Humans can recognize other individuals by their voice, rely on being recognized and recognition failure is a social misconduct that can lead to high embarrassment. Voices signal the emotional state, the fertility in females and help selecting the right mating partner. Voices are a key part of our personality and shape the trust we have in others. In this lecture series we will study the complexity of the human voice by applying a variety of technologies such as laryngography, electromagnetic articulography, ultrasound, endoscopy and myography.

ECTS: 6

Learning Outcome:

(1) Theoretical understanding of the role of voice in speech communication (2) Acquisition of articulatory procedures for measuring voice production (3) Signal processing skills for the acoustic analysis of voices

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Volker Dellwo

Requirements:

Prerequisites:

- Lecture: Fundamentals of Speech Sciences and Signal Processing - Seminar: Experiments with Speech
This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module.

Assessment:

Portfolio: (a) weekly assignments 40% (b) end of term exam 60%

Date of the written exam on site (paper pencil): Wed, 16. Dec. 2026, 12:15 - 13:45 (90 min.)

Module Forensic Medicine for Associates Master's Participants

02SM90WMB1 / Course

Description:

General description:

Diese Veranstaltung wird von der Medizinischen Fakultät der Universität Zürich in Zusammenarbeit mit der Rechtswissenschaftlichen Fakultät der Universität Zürich angeboten. Das Modul erstreckt sich über zwei Semester und besteht aus einem theoretischen und einem praktischen Teil.

Der theoretische Teil beinhaltet die Vorlesung Rechtsmedizin (Inhalt sind insbesondere rechtsmedizinische Spezialgebiete) sowie den Gruppenkurs «Leichenschau und Bildgebung».

Der praktische Teil beinhaltet:

- Verkehrsmedizin (1/2 Tag, Terminabklärung individuell): Teilnahme an einer verkehrsmedizinischen Fahreignungsuntersuchung.
- Forensische Medizin (1 Tag, Terminabklärung individuell): Begleitung des Dienstarztes während einer Schicht, um seinen Alltag kennen zu lernen.
- Rechtsmedizinische Instruktion (1/2 Tag): Einführung in die Kerngebiete der Rechtsmedizin.

Pro Durchführung können 4 Masterstudierende der Rechtswissenschaftlichen Fakultät teilnehmen.

ECTS: 6

Notes:

Anmeldungen werden ab Beginn der Modulbuchungsfrist der RWF bis zum 30. Januar 2026, 23:59 Uhr entgegengenommen.

Weitere Informationen finden sich auf OLAT

(Kursname: "Rechtsmedizin (Master) FS/HS26", Link: <https://t.uzh.ch/1pV>).

Learning Outcome:

Einblick in die Methoden der Bearbeitung von aussergewöhnlichen Todesfällen und Gewalteinwirkungen, Begutachtung und Qualifikation von Vergehen und Verbrechen gegen Leib und Leben und Beurteilungen von Fahreignungsuntersuchungen, schwerpunktmässig mit theoretischem Bezug.

Dabei sollen sowohl Möglichkeiten als auch Problemstellungen und Grenzen gezeigt werden. Es sollen hier nützliche Grundlagen für eine spätere Tätigkeit als Strafrichter/in (Richter/in, Staatsanwältin, Verteidiger/in etc.) vermittelt werden.

Target Groups:

Rechtsmedizinisch interessierte Masterstudierende der Rechtswissenschaft.

Languages of Instruction:

Deutsch

Course Materials:

Werden direkt oder über OLAT abgegeben.

Merkmale:

Responsible instructor:

Michael Thali
Brigitte Tag

Requirements:

<u>Prerequisites:</u>	Bachelorabschluss, Aufnahme als assoziierte Teilnehmende auf Masterstufe
<u>Prior Knowledge:</u>	Keine, medizinisches Vorwissen ist aber von Vorteil. Es sei darauf hingewiesen, dass die Veranstaltungen von der Medizinischen Fakultät bzw. dem Institut für Rechtsmedizin (IRM) angeboten werden. Der Inhalt kann medizinisches Vorwissen beinhalten, über das Studierende der Rechtswissenschaft nicht verfügen.
<u>Assessment:</u>	Für die Teilnehmenden besteht Präsenzpflcht an allen Veranstaltungen (inkl. der Vorbesprechung anfangs Semester). Die Leistungsüberprüfung erfolgt im Rahmen einer Abschlussbesprechung unter fachkundiger Leitung. Hier können Fragen gestellt werden und das Erlebte sowie die gewonnenen Erkenntnisse ausgetauscht werden. Hierzu müssen die Studierenden einen Erfahrungsbericht von 6-8 Seiten einreichen.
<u>Grading Scale:</u>	Pass/Fail
<u>Repeatability:</u>	Can be repeated once
Organisation:	
<u>Offer pattern:</u>	2 Semesters (Begins in Spring Semester)
<u>Dates/Times/Deadlines:</u>	Die Termine werden auf OLAT publiziert. Die Einführungsveranstaltung vom 20.02.2026 findet im KOL-G-216 statt.

Module PHY 578 Effective Field Theories for Particle Physics

07SMPHY578DP / Lecture with Practical Exercises

Description:

General description:

The focus of the course is on an advanced topic in quantum field theory, namely Effective Field Theories (EFT) and their interplay with dispersion theory. These topics will be discussed both in general terms and with specific phenomenological applications in the context of physics beyond the Standard Model, effective description of the weak interaction, as well as the description of non-perturbative strong interaction at low energies.

ECTS: 3

Notes:

This course covers the basic concepts of effective field theories (EFTs) and dispersion theory. We will start by introducing the core concept of constructing EFTs and apply them to the low-energy description of the weak interaction and the effective description of heavy physics beyond the Standard Model.

In the next part of the course, we will discuss Chiral Perturbation Theory (ChPT), the low-energy effective theory of Quantum Chromodynamics (QCD). We will briefly discuss the application of this concept to describe a class of theories beyond the SM in which the SM Higgs arises as a composite state of a new confining sector.

The second focus of the course is on dispersion theory and its interplay with EFTs. We will discuss how to make use of the constraints from unitarity of the S-matrix and analyticity of scattering amplitudes, in order to extend the range of validity of the theoretical description compared to pure EFT methods. We will also discuss how to obtain constraints on EFT parameters from unitarity and analyticity. We will discuss the application of these methods both in the context of low-energy strong interaction and physics beyond the Standard Model.

Main topics:

- * Introduction to Effective Field Theories
- * Decoupling and matching
- * Renormalization group resummation
- * The Standard Model Effective Field Theory (SMEFT)
- * Chiral Lagrangians
- * Unitarity of the S-matrix
- * Analyticity and dispersion relations

Module Comprehensive Traineeship / Summer School in MAMES

06SM278-507 / Module

Description:

General description:

This core elective approves the completion of a traineeship, summer school or workshop that deals with practical work experience or the study of thematic, theoretical, or methodological issues in relation to Modern Asia or the Middle East. Students need to consult with the program study advisor before booking the module as to confirm that the traineeship/summer school is offered by an accredited institution and can be counted towards their degree.

ECTS: 6

Notes:

This module has to be booked via the booking agreement available on the website of the IAOS: <https://www.aoi.uzh.ch/de/studies/studyorganization/courseofstudies/booking.html>

Learning Outcome:

Completion of a Traineeship/Summer School/Workshop can help students to gain practical work or research experience, deepen thematic knowledge or obtain further conceptual or methodological expertise.

Languages of Instruction:

gemäss Anbieter

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Nicolas Martin
David Chiavacci

Requirements:

Prerequisites:

Students must identify potential host institutions / international organizations / NGS and their programs and organize the stay / completion.

This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module.

Assessment:

dokumentierte praktische Arbeit

Grading Scale:

Module Surgery, Infection Control, Pharmacology and Toxicology, Propaedeutics, Animal Nutrition and Feed Science
05SM.210_tpc / Lecture with Practical Exercises

Description:

General description:

Das Modul umfasst folgende Veranstaltungen:

- Chirurgie allgemeine (Anteil 2.0 ECTS Credits)
 - Infektionskontrolle (Anteil 0.5 ECTS Credits)
 - Pharmakologie, Toxikologie (Anteil 2.0 ECTS Credits)
 - Propädeutik (Anteil 1.5 ECTS Credits)
 - Tierernährung, Futtermittelkunde (Anteil 2+2 ECTS Credits)
- Inhalte und Lernziele werden bei den Veranstaltungen abgebildet.

ECTS: 10

Languages of Instruction:

Deutsch, z.T. Englisch

Merkmale:

Responsible instructor: Annette Liesegang

Requirements:

Assessment: Präsenz, schriftlich, elektronisch

Die Leistungskontrolle umfasst die Fächer:

- Chirurgie allgemeine (Anteil 2.0 ECTS Credits)
 - Infektionskontrolle (Anteil 0.5 ECTS Credits)
 - Pharmakologie, Toxikologie (Anteil 2.0 ECTS Credits)
 - Propädeutik (Anteil 1.5 ECTS Credits)
 - Tierernährung, Futtermittelkunde (Anteil 2+2 ECTS Credits)
- Termine und Modalitäten werden zu Beginn des Semesters zur Verfügung gestellt.

Module Locomotory System

05SM.220_bw / Lecture with Practical Exercises

Description:

General description:

Der funktionierende Bewegungsapparat erlaubt dem Säugetierorganismus im Zusammenspiel mit dem intakten Nervensystem die freie räumliche Fortbewegung. "Bewegung ist Leben - Leben ist Bewegung" ist deswegen die Maxime des Orthopäden.

Im Organblock "Bewegungsapparat" werden die strukturellen und funktionellen Voraussetzungen bearbeitet, die im komplexen Zusammenspiel die freie Beweglichkeit des Körpers in all seinen Facetten ermöglichen.

Der Bewegungsapparat besteht strukturell aus dem Skelettgerüst, das über bewegliche Gelenke verbunden ist und durch die Muskulatur, Sehnen und Bänder zusammengehalten wird. Die Bewegung wird funktionell ermöglicht durch die komplexe Interaktion dieser Strukturen, die neurogen gesteuert werden sowie von der Energieproduktion und -verfügbarkeit abhängig sind.

Erkrankungen des Bewegungsapparates wirken sich in erster Linie in Form von Lahmheit oder Lähmung bis zur vollständigen Bewegungsunfähigkeit aus. Als Lahmheit ist das Unvermögen der funktionsgerechten Benutzung einer oder mehrerer Gliedmassen definiert.

Damit ein gestörter Bewegungsablauf erkannt und die Ursache lokalisiert werden kann, muss die physiologische Beweglichkeit des Körpers in allen Variationen (Stehen, Sitzen, Liegen, Aufstehen, Gehen, Traben, Galoppieren, Rennen, etc.) verstanden werden. Dabei sind sowohl die spezie-spezifischen Unterschiede als auch innerhalb einer Spezies die Rassenunterschiede zu berücksichtigen.

ECTS: 9

Learning Outcome:

Das Wissen betrifft:

- die Anatomie des Bewegungsapparates
- den Bewegungsablauf des Körpers in allen Variationen
- das Zusammenspiel von physikalischer Krafteinwirkung und Reaktion des Körpers
- die Symptomatologie und Pathogenese der Erkrankungen des Bewegungsapparates
- die Verknüpfungen zum Metabolismus, der Physiologie, der Labormedizin, der Pathophysiologie, der Endokrinologie und zum Nervensystem
- die therapeutischen und prophylaktischen Massnahmen bei Pathologien des Bewegungsapparates
- die prognostischen Aussichten von Pathologien des Bewegungsapparates
- die Notfallmassnahmen bei Traumapatienten
- die Therapiemöglichkeiten der Frakturbehandlung und Behandlung von Gelenkverletzungen

Das Können umfasst:

- das Durchführen eines orthopädischen Untersuchungsgangs
- das Erkennen von Lahmheiten
- die Identifizierung der betroffene Gliedmasse und die Zuordnung eines pathologischen Prozesses zu einer anatomischen Struktur
- Darstellung von pathologischen Veränderungen des Bewegungsapparates mit bildgebenden Verfahren und deren Interpretation
- Interpretation von Laborveränderungen im Zusammenhang mit dem klinischen Bild
- Prinzipien der Verbände

Module Blood, Laboratory Medicine, Immune System

05SM.230_bl / Lecture with Practical Exercises

Description:

General description:

Das Blut hat wichtige Funktionen inne, wie Transport und Stoffwechsel. Es versorgt alle Teile des Körpers mit lebenswichtigem Sauerstoff, Baustoffen und Energie und sorgt für den Abtransport von Schadstoffen. Krankheiten können entstehen, wenn es zu Verschiebungen in der Zahl oder Zusammensetzung der Blutzellen oder zu Veränderungen des Blutplasmas kommt. Beispielsweise spielen Anämien in der Veterinärmedizin eine wichtige Rolle. Die Anämie ist definiert als eine Verminderung der Hämoglobinkonzentration und/oder des Hämatokrits und/oder der Erythrozytenzahl unter den Referenzbereich. In der klinischen Veterinärmedizin wird vor allem der Hämatokrit als Massstab verwendet.

Anämien können vereinfacht klassifiziert werden in akute oder chronische Blutungsanämien, hämolytische Anämien oder aplastische Anämien und Eisenmangel. Anhand einer Blutuntersuchung können Krankheitsbilder charakterisiert und oft diagnostiziert werden. Die Kenntnisse über die Entstehung des Blutes, seine physiologischen Eigenschaften und von pathologischen Veränderungen sind daher von wesentlicher Bedeutung. Als Tierarzt oder Tierärztin werden Sie sich täglich mit Blutentnahmen und -untersuchungen befassen.

Die Immunorgane haben eine zentrale Bedeutung bei der Selbst-/Fremderkennung und bei der Immunabwehr. Ohne funktionierendes Immunsystem, wie dies z.B. bei Menschen mit AIDS vorkommt, kann der Körper auch einfachste Infektionserreger nicht mehr bekämpfen. In der tierärztlichen Praxis haben Sie ebenfalls täglich mit dem Immunsystem Ihrer Patienten zu tun, sei dies bei Patienten mit Infektionen oder Tumoren oder bei der periodischen/regelmässigen Routineimpfung.

In der klinischen Labordiagnostik werden hauptsächlich Proben untersucht, die von lebenden Patienten stammen. Ziel der klinischen Laboruntersuchung ist die Objektivierung eines klinischen Befundes oder, bei Fehlen einer klaren Symptomatik, die Erkennung des von einem pathologischen Prozess betroffenen Organs. Im Weiteren dient die klinische Labordiagnostik der Überwachung des Therapieerfolges. Kenntnisse der fehlerfreien Probenentnahme, der verwendeten Untersuchungsmethoden und allfälliger tierartlicher Unterschiede sowie der korrekten Interpretation der Resultate sind unabdingbar und werden in der tierärztlichen Praxis täglich zum Einsatz kommen.

ECTS: 5

Learning Outcome:

Kenntnisse:

Allgemeine und problemorientierte Anamnese bei einem Patienten mit einem Problem des Blutes erheben

Wichtigste diagnostische Labormethoden: Automatische Zellzählung, Trocken- und Nasschemie, Urinuntersuchung, Infektionsdiagnostik (molekulare und immunologische Methoden, direkter und indirekter Erregernachweis), Serumproteinelektrophorese, Coombstest, Blutgruppenbestimmung, Qualitätssicherung im Point-of-Care-Bereich

Referenzwerte, Erstellung und Anwendung

Histologische Struktur des Knochenmarks und der verschiedenen Reifungsstadien der Blutzellen

Morphologische Beurteilung des Knochenmarks, extramedullärer Blutbildungsorgane, zentraler und peripherer Immunorgane inkl. immunhistochemische Methoden

Steuerung der Hämatopoese und den Bedarf an Aufbaustoffen zur Blutbildung

Gastransport sowie die Beeinflussung der Sauerstoffbindung an Hämoglobin durch verschiedene Einflussparameter

Blutgruppen-Eigenschaften bei Tieren und deren Konsequenzen für eine Bluttransfusion

Blutstillung und -gerinnung, deren pathologische Störungen sowie Therapiemöglichkeiten

Struktur, Funktion und Anordnung des lymphatischen Systems und dessen Zellen

Funktionelle Grundlagen der spezifischen und angeborenen Abwehr

Ätiologie, Pathogenese, klinische Symptome, Diagnose, Therapie und Prognose der wichtigsten Erkrankungen des Blutbildungssystems (insbesondere Anämie) und des Immunsystems (einschliesslich Neoplasien) bei den verschiedenen Tierarten

Differentialdiagnosen zu den für den Organblock Blut typischen Leitsymptomen

Wichtige Infektionserkrankungen des Blutsystems und der Immunorgane kennen

Fähigkeiten:

Befunde der klinischen Untersuchung erheben, gewichten und auflisten Probenentnahme- und Injektionstechniken durchführen

Beurteilung von Labormethoden bez. Fehler, Richtigkeit, Präzision, analytische und diagnostische Sensitivität, Spezifität, Effizienz Beurteilung und Interpretation von Laborergebnissen

Zusammensetzung und physiologische Funktionen des Blutes und seiner zellulären und nicht-zellulären Bestandteile erklären, sowie Blutzellen erkennen und differenzieren

Ausstrichherstellung und mikroskopisches Differenzieren von physiologischen und pathologischen Blutaussstrichen, Hämatokritbestimmung

Die wichtigsten Reaktionsmuster (Entzündung, Stress, Infektion) der blutbildenden Organe und der Immunorgane und -gewebe erkennen und interpretieren

Module Bacteriology, Mycology

05SM.240_bm / Lecture with Practical Exercises

Description:

General description:

Gegenstand der Vorlesung sind die Grundlagen der Infektionslehre, der allgemeinen Bakteriologie inkl. Labordiagnostik und Prävention sowie der tiermedizinischen Mykologie. Anschliessend werden im Rahmen der klinischen Bakteriologie tiermedizinisch wichtige Gram-positive Bakterien bearbeitet. Es werden mit dem Schwerpunkt klinische Bakteriologie tiermedizinisch wichtige Gram-negative Bakterien, sowie tiermedizinisch wichtige Pilze bearbeitet.

ECTS: 5

Learning Outcome:

- Grundbegriffe der Infektions- und Seuchenlehre erklären
- Grundlagen des Aufbaus, der Genetik und der Funktion von Bakterien erklären
- Die Grundlagen der Pathogenität von Bakterien erklären
- Die Grundlagen der Bakterientaxonomie und -klassifizierung erklären
- Die Grundlagen der Probenahme und Präanalytik für bakteriologische/mykologische Untersuchungen beschreiben
- Die Begriffe Desinfektion und Sterilisation erklären und wichtige Desinfektions- und Sterilisationsverfahren erklären
- Die Empfindlichkeit und Resistenz von Bakterien gegen antibakterielle Chemotherapeutika (Antibiotika) und die Problematik der Antibiotikaresistenz in der Tiermedizin erklären
- Die Einteilung antibakterieller Wirkstoffe und deren Wirkungsmechanismus beschreiben
- Die Grundlagen der Impfung und der passiven Immunisierung bei bakteriellen Krankheiten der Tiere erklären
- Die Vielfalt der Pilze und ihre wichtigen Nutz- und Schadwirkungen erklären
- Die medizinisch wichtigen Strukturen und Funktionen einschliesslich Grundlagen der Pathogenität der Pilze erklären
- Die Labordiagnostik der Pilze beschreiben
- Medizinisch wichtige Sekundärmetaboliten von Pilzen beschreiben (Antibiotika, Mykotoxine)
- Tiermedizinisch relevante durch Pilze verursachte Erkrankungen erklären
- Die Wirkung der tiermedizinisch wichtigen antimykotischen Chemotherapeutika erklären

Module Land Registration Law

02SMNOPM5 / Course

Description:

General description:

Darstellung der Grundzüge des formellen und materiellen Grundbuchrechts: Grundbucheinrichtung, Begriffe und Prinzipien des Grundbuchrechts, Eintragungsvoraussetzungen und Eintragungsverfahren, Aufsichts- und Beschwerdewesen.

ECTS: 6

Notes:

Die Art der Durchführung der Lehrveranstaltung wird auf der Website des Lehrstuhls Michel oder Arnet publiziert. Das Modul umfasst einen theoretischen Teil, in dem an der Schnittstelle zum materiellen Immobiliarsachenrecht die Grundkenntnisse des Grundbuchrechts vermittelt werden. Auf dieser Basis wird unter Mitwirkung eines praktizierenden Grundbuchverwalters anhand konkreter Anwendungsfälle die Umsetzung der theoretischen Grundlagen dargestellt.

Die Vorlesung schliesst den (freiwilligen) Besuch eines Grundbuchamtes ein.

Learning Outcome:

Erarbeiten der Grundzüge des formellen und materiellen Grundbuchrechts: Grundbucheinrichtung, Begriffe und Prinzipien des Grundbuchrechts, Eintragungsvoraussetzungen und -verfahren, Aufsichts- und Beschwerdewesen.

Target Groups:

Studierende auf Masterstufe; Studierende des Notariatsprogramms

Languages of Instruction:

Deutsch

Course Materials: gemäss Ankündigung in der Vorlesung

Merkmale:

Responsible instructor: Margot Michel

Requirements:

Assessment: Prüfung am Semesterende, Modalität (schriftlich / mündlich) wird nach Stornierungsfrist kommuniziert.

Grading Scale: 1-6, Half Grades Given

Module Strukturierte Lehrmodule im Wahlstudienjahr am Universitäts- Kinderspital Zürich

04SMPED21004 / Kurs

Description:

ECTS: 0.2

Notes:

Kontakt-Email:

michelle.seiler@kispi.uzh.ch

Learning Outcome:

Sämtliche Medizinstudierende des Wahlstudienjahres werden während ihrer zweimonatigen Rotation am Universitäts-Kinderspital Zürich Module spezifischer Fachrichtungen besuchen. Diese Module, welche von Kaderärztinnen und Kaderärzten doziert werden, finden grundsätzlich einmal pro Monat statt und sind ausschliesslich für die Studierenden im Wahlstudienjahr. Das Ziel ist es, strukturierte Lehre anzubieten zu Themen, welche häufig Schwierigkeiten bereiten. Zum Beispiel: wie führe ich eine klinische Untersuchung bei einem Neugeborenen durch? Unter Anleitung einer Kaderärztin wird dies in Kleingruppen direkt am Bett gelehrt. Im Modul Kinderradiologie werden Fragen diskutiert wie "wann ist welche radiologische Untersuchung indiziert? Wie funktioniert ein Ultraschall und welche Fragestellungen können mit einer solchen Untersuchung beantwortet werden? Im Modul Allergologie wird gelehrt wie eine Anaphylaxie erkannt und rasch therapiert werden kann. Ebenso lernen die Studierenden die Grundlagen, wie bei einem Kind eine Gelenksuntersuchung durchgeführt wird und anschliessend kann dies direkt an Patientinnen und Patienten geübt werden. Das Ziel dieser Module ist es, die klinischen Fähigkeiten der Studierenden zu schulen und sie auf den klinischen Alltag in der Weiterbildung vorzubereiten.

Module **BIO 400 Research Project in Synthetic Biology - iGEM competition**

07SMBIO400 / Sonstiges

Description:

General description:

This research internship implies active participation in the annual International Genetically Engineered Machine (iGEM) competition (<https://igem.org>). The exact details of the project will be initially discussed with the module leader, with inputs from other appropriate faculty members. The duration of the internship will be typically from March to the official end of the competition (typically in October). The module leader should be contacted in the first place by the team.

Research internships are only offered to Bachelor students, not to students who already registered for the Master.

ECTS: 12

Learning Outcome:

Depending on the specifics of the project, students will at the end of this module possess several of the following competences:

- Ability to identify an important biological/societal problem
- Design a research project with clear measurable outputs
- Analyse data with adequate statistical methods
- Acquire deepened knowledge about literature, questions and methods within a research project in Synthetic Biology and specific research field linked to the project developed.
- Conduct experiments fairly independently
- Scientific communication & education of the project, its goals, methodology, and results obtained, in academic as well as industry and layman contexts
- Analyse the scientific impact, as well as the societal impact of the project, considering ethics, regulations, production, target groups, etc.
- Summarize all outputs of the project in the wikipage of the iGEM competition

Module Practical Course in General Chemistry C for Students of Human Medicine and Dentistry 04SM52CHE105 / Praktikum

Description:

General description:

- praktische Tätigkeiten im chemischen Labor
- Herstellung von Lösungen unterschiedlicher Konzentration, Lösungsphänomene
- Verfolgung einer chemischen Reaktion, Kinetik
- Messungen von pH-Werten, Bestimmung einer unbekannten Säure
- Bestimmung der Reduktions- und Oxidationsstärke verschiedener Verbindungen, Herstellung des Daniell-Elementes
- Synthese von Metallkomplexen, Untersuchung von Ligandaustausch- Reaktionen
- Bestimmung der Wasserhärte
- Synthese eines Wirkstoffes
- Durchführung von katalysierten Reaktionen, Vertiefung des chemischen Reaktionsverständnisses
- Praktische stereochemische Aspekte, Ermittlung von ee-Werten, unterschiedliche Eigenschaften von Enantiomeren

ECTS: 2

Learning Outcome:

Kenntnis der einfachsten Arbeitstechniken im Labor, wie sie auch in der ärztlichen Praxis durch die Laborantin oder Arztgehilfin täglich auszuführen sind, und deshalb auch dem Mediziner geläufig sein sollten.

Selbständige Durchführung von Experimenten und sicherer Umgang mit Chemikalien.

Vertiefung der Kenntnisse in allgemeiner Chemie durch Schaffung einer direkten, unmittelbaren Beziehung zu den verschiedenen Verbindungen und Reaktionen.

Target Groups:

Students of Medicine and Dentistry in the first year of studies

Languages of Instruction:

German

Merkmale:

Responsible instructor: Oliver Zerbe

Requirements:

Prerequisites: A matriculation for the first year of studies in Medicine and Dentistry is compulsory for the participation in this module or parts of this module.

Assessment: Conduction of all experiments with all required results.
Delivery of all reports with results, conclusions, and exercises.

Grading Scale: Pass/Fail

Module CHE 170 Fundamentals of Chemistry for Students of Life Sciences

07SMCHE170 / Lecture with Practical Exercises

Description:

General description:

This lecture introduces you to the fundamental aspects of general and inorganic chemistry. It aims at imparting basic chemical knowledge that will be required and applied during further studies in Biology/Biomedicine. The lecture is complemented by the basic lab course in General Chemistry where experimental work in the lab is introduced.

Main topics of the lecture are:

Matter and fundamental laws of Chemistry; elements and atoms; electronic structure and periodic table, chemical bonding; covalent, ionic and metallic bonds; Lewis structures; electronegativity; chemical reactions and equilibria; Bronsted acids and bases; Lewis acids and bases; electrochemistry and redox equilibria; solubilities; formation of complexes; fundamentals of thermodynamics and kinetics; chemistry of the elements of the periodic table from a biological point of view

ECTS: 5

Notes:

Two voluntary self-checks take place during the semester; the points acquired therein can be credited towards the module examination.

Learning Outcome:

All material presented in the lecture is content of the exam. The mentioned topics (above and script) are required.

Target Groups:

Students of Biology, Biomedicine, Earth system sciences or certain minor study programs (including Chemistry for 30 ECTS)

Languages of Instruction:

German

Course Materials:

Script

Merkmale:

Responsible instructor:

Roland K.O. Sigel

Requirements:

Prior Knowledge:

Module BIO 265 Evolution and Paleobiology of Plants

07SMBIO265 / Lecture with Practical Exercises

Description:

General description:

The biodiversity of land plants through time is a central topic in the course, including the conquest of land, first traces of plant life on continents, and the evolution of major plant groups. Fossil material will be used to illustrate steps in plant evolution and it is also used as examples for preservation potential and taphonomic considerations (macro-, meso-, and microflora). The relevance of microfloral archives to reconstruct palaeoclimate and paleoecology is discussed. The interaction between land plant evolution, climate changes, mass extinctions and radiation are highlighted, as well as the palaeogeographic and stratigraphic relevance of plant associations through geological time.

ECTS: 2

Learning Outcome:

On successful completion of the module, the students should be able to

- describe what the plant fossil record may contain (what is preserved)
- explain the importance of the interactions between evolution of plants, climate and physical environment.
- describe the major steps in plant evolution

Key Skills

On successful completion of the module, the students should be able to

- integrate the dimension of geological time into their understanding of biological events

Merkmale:

Target Group: Suitable for English Speakers

Module Master Thesis

05SM.500_ma / Master Paper / MA-Arbeit

Description:

General description:

Die Masterarbeit ist eine wissenschaftlich ausgerichtete Arbeit aus dem Gebiet der Veterinärmedizin, die von den Studierenden individuell und selbständig während des Masterstudiums verfasst wird.

Die Masterarbeit beinhaltet die Formulierung einer Fragestellung, das Erstellen eines Forschungsplans, die Durchführung der Forschungsarbeit und das Abfassen eines Berichts, der strukturiert, inhaltlich konsistent, klar formuliert und korrekt referenziert ist.

ECTS: 20

Learning Outcome:

Die Studierenden lernen unter Anleitung mittels wissenschaftlicher Denk- und Arbeitsweise selbständig eine Projektarbeit durchzuführen und in einem Bericht zu dokumentieren.

Zu den Lernzielen der Masterarbeit gehören z.B. (abhängig von der Form der Masterarbeit):

- Die Ziele zu formulieren; eine relevante und präzise Forschungsfrage zu stellen und Hypothesen zu formulieren;
- Die adäquate Forschungsmethode zur Beantwortung einer wissenschaftlichen Fragestellung zu wählen und anzuwenden;
- Die Daten korrekt zu erheben und verständlich darzustellen;
- Die für die Daten geeigneten statistischen Methoden auszuwählen;
- Die Daten korrekt zu analysieren und die Ergebnisse sachlich zu interpretieren;
- Die erhobenen Daten in den Kontext des aktuellen Wissens und - bei patientenorientierten Fragestellungen - in den Kontext der klinischen tierärztlichen Tätigkeit zu stellen;
- Die aus den Daten korrekte Schlussfolgerungen zu ziehen;
- Die Literatur und Quellen zum Thema systematisch und effizient zu recherchieren, kritisch zu bewerten und in der Arbeit korrekt zu zitieren;
- Die ein Literaturverzeichnis korrekt zu erstellen;
- Die einen wissenschaftlichen Bericht strukturiert, inhaltlich konsistent und klar formuliert abzufassen.

Module Rotations Anesthesiology, Diagnostic Imaging, Ophthalmology

05SM.520_cls / Praktikum

Description:

General description:

Die Rotationen im Departement für Klinische Diagnostik & Services ("Rotation Clinical Services") betreffen Abteilungen oder Kliniken, welche tierartübergreifende Patientenarten behandeln.

Die Einführung in die Klinik des Veterinärmedizinischen Labors ist zu Beginn der Rotationen, obschon diese Klinik auch Teil der Clinical Services ist.

Insgesamt dauern die supervidierten Rotationen 4 Wochen und sind gemäss folgendem Plan zu absolvieren:

Bildgebende Diagnostik (Röntgen): 1 Woche

Ophthalmologie: 1 Woche

Anästhesiologie: 2 Wochen

Klinik für Bildgebende Diagnostik

In der Bildgebung können die Studierenden während einer Woche auf der Röntgenabteilung praktische Fertigkeiten anwenden. Die Studierenden sollen unter Anleitung einer/s MTRA teilweise oder vollständig eine definierte Anzahl und Art von Röntgenstudien erstellen. Während des Praktikums wird eine Besprechung zum Thema Strahlenschutz und praktische Röntgentechnik durchgeführt.

Abteilung für Veterinärophthalmologie

Den klinischen Alltag auf der ophthalmologischen Abteilung des Tierspitals lernen die Studierenden während einer Woche kennen.

Abteilung für Anästhesiologie

Zwei Wochen verbringen die Studierenden auf der Anästhesiologie - entweder ist man in der Kleintierklinik oder in der Grosstierklinik (Pferde und Nutztiere) eingeteilt. Dabei lernen die Studierenden den gesamten Ablauf einer Anästhesie kennen.

ECTS: 4

Learning Outcome:

Studierende in der Anästhesiologie

...sollen die Medikamente kennen, um ein Tier zu beruhigen, eine Anästhesie einzuleiten und aufrecht zu erhalten; ...sollen die möglichen Vor- und Nachteile von Medikamenten kennen;

...sollen die Medikamente richtig anwenden können.

...sollen einen Anästhesieplan für einen Routinepatienten erstellen können;

...sollen wissen, welche Möglichkeiten es gibt bei einem Tier Schmerzen zu bekämpfen und sollen diese anwenden können.

...sollen für die Anästhesie nötige Geräte zusammensetzen und einen Dichtigkeitstest des Anästhesiegerätes durchführen können.

...sollen den sicheren Arbeitsplatz für eine Anästhesie vorbereiten können (Monitoring, Medikamente, Tuben etc.); ...sollen ein Tier intubieren können.

...sollen wissen, wie bei ausgesuchten Notfällen reagiert werden muss.

...sollen eine Anästhesie überwachen (mit und ohne Monitore) können.

Studierende bei der bildgebenden Diagnostik (Röntgen) ...sollen die Indikationen für ein Röntgen kennen ...sollen kompetent in der praktischen Durchführung der gebräuchlichsten Röntgenprojektionen/ -studien bei den entsprechenden Tierarten sein;

...sollen die theoretisch - technischen Aspekte der Röntgenpraxis wie Belichtung, Beurteilung der Bildqualität und Archivierung vertiefen;

...sollen die Prinzipien des Strahlenschutzes und deren kompetente praktische Umsetzung und Anwendung kennen.

Studierende bei der Ophthalmologie

...sollen die genaue Betrachtung von Augen mittels Lichtquelle und Linsen erlernen;

...sollen pathologische Symptome beim Auge erkennen; ...sollen Differentialdiagnosen und Diagnosen erstellen können;

...sollen die Therapien der wichtigsten/häufigsten Augenerkrankungen verstehen;

...sollen die ersten therapeutischen Massnahmen planen und einen einfachen Therapieplan erstellen können.

...sollen die spezialisierten Instrumente und Therapie-/Operationsmöglichkeiten (über die praxisüblichen hinausgehend) kennenlernen, um den Sinn von Überweisungen aus Praxen zu erkennen.

...sollen die generellen Herangehensweisen für Augenprobleme kennenlernen, um mit einfachen Mitteln, die Aufarbeitung/Diagnostik, Planung der ersten therapeutischen Massnahmen, Literatursuche und Diskussion mit Kollegen und Spezialisten zu ermöglichen.

Course Materials:

Anästhesiologie allgemein:

- Casusfälle mit besonderem Augenmerk auf Anästhesiegeräte repetieren (<http://switchaai.casus.net/>).
- Onlinevorlesungen auf OLAT (Olatkurs "Allgemeine Anästhesiologie" repetieren und Videos anschauen, vor allem das Video über Anästhesiegeräte (http://www.ictvet.uzh.ch/mosing/4_geraete_v4_1mobile.mp4) (jeder Student muss einen Dichtigkeitstest durchführen können!)).
- Unbedingt Medikamente auf OLAT mit Wirkungen und Nebenwirkungen repetieren (Olatkurs "Allgemeine Anästhesiologie").
- Zusätzliche Infomaterialien (Checklisten, SOP Anaesthetic case presentation) vor Rotationsbeginn lesen.

Anästhesiologie bei den Kleintieren:

- Skripten Allgemeine Anästhesie, Spezielle Anästhesie Kleintiere und Dosierungstabellen Kleintiere repetieren.
- Kleintierfälle aus den Vorlesungen repetieren.
- Vertiefung Kleintieranästhesie repetieren.

Anästhesiologie bei den Grosstieren:

- Skripten Allgemeine und spezielle Anästhesie Pferd und Wiederkäuer kennen.
- Anleitung zur Durchführung einer Pferdeanästhesie und SOP Katheter stecken gelesen haben.

Bildgebende Diagnostik (Röntgen):

- Skripte 1. JK zum Thema Strahlenschutz - RadioSurfVet
- Vorlesungsskripte über Bildgebende Diagnostik
- Unterlagen der Praktika im 4. Studienjahr
- Repetieren der Röntgenprojektionen
- CASUS Fälle studieren / repetieren

Ophthalmologie:

- Vorlesungsskript und Vorlesungsunterlagen (Organblock & Vertiefung), Propädeutik
- Weitere Literatur: Slatter's Fundamentals of Veterinary Ophthalmology, D.J. Maggs et al., 6. Auflage, 2017, Saunders
- Podcast 'Augenuntersuch beim Hund': <https://lms.uzh.ch/auth/RepositoryEntry/16731865252/ CourseNode/101331398149894>

- Operationen am Auge: <https://lms.uzh.ch/url/RepositoryEntry/16218882101> Abteilung für Anästhesiologie
- Kleintiere

Merkmale:

Responsible instructor: Patrick Kircher

Requirements:

Assessment:

Während des klinischen Jahres sind je nach Fachgebiet verschiedene arbeitsplatzbasierte Assessments abzulegen, welche entweder summativ (mit einer Note) oder rein formativ (ohne Note) bewertet werden. Einzelne Veranstaltungen verlangen eine schriftliche Prüfung (z.B. die Labordiagnostik). Die Assessments müssen im e-Portfolio zeitnah dokumentiert und validiert werden. Zur Vertiefung der klinischen Handlungskompetenz werden

regelmäßige Besprechungen, Diskussionen und Reflexion zu klinischen Fällen und der zugrundeliegenden Entscheidungen abgehalten. Feedback stellt ein zentrales Element dar. Des Weiteren werden bestimmte Fertigkeiten im Skills Lab vertieft.

Grading Scale: 1-6, Half Grades Given

Module Rotations Small Animal Clinic

05SM.530_kt / Praktikum

Description:

General description:

Das Modul Rotationen Kleintierklinik wird von Studierenden mit Schwerpunkt Kleintiere absolviert. Es beinhaltet zur Vertiefung der klinischen Fähigkeiten und Fertigkeiten im Kleintierbereich folgende Fachgebiete: Innere Medizin, Dermatologie, Kardiologie, Onkologie, Reproduktion, Chirurgie, Neurologie, Intensiv- und Notfallmedizin, Zoo- und Heimtiere, Bildgebende Diagnostik (Ultraschall/Befundung) und Anästhesiologie.

Studierende erhalten die Möglichkeit, unter Supervision unmittelbar an Patienten ihre Fähigkeiten und Fertigkeiten zu üben und zu vertiefen.

Dabei wird grosser Wert auf den Diskurs über spezifische Fälle und das Erarbeiten der fallspezifischen Hintergründe gelegt. Die Teilnahme an den Fallbesprechungen im Zuge des Lehrbetriebes sowie die Absolvierung von Notfalldiensten sind wesentlicher Bestandteil der klinischen Rotationen. Insgesamt dauern die supervidierten Rotationen 20 Wochen und sind gemäss folgendem Plan zu absolvieren:

Kleintierchirurgie: 3 Wochen

Neurologie Kleintiere: 1 Woche

Innere Medizin Kleintiere: 3 Wochen

Dermatologie Kleintiere: 1 Woche

Kardiologie Kleintiere: 1 Woche

Onkologie Kleintiere: 2 Wochen

Kleintierreproduktion: 1 Woche

Zoo- / Heim- und Wildtiere: 3 Wochen

Notfall- und Intensivmedizin: 2 Wochen

Bildgebende Diagnostik (Ultraschall / Befundung): 2 Wochen Anästhesiologie: 1 Woche

Kleintierchirurgie

Im Rahmen der Schwerpunktrotation auf der Kleintierchirurgie wird die Orthopädie, Weichteil- und Onkochirurgie durchlaufen. Die Studierenden nehmen aktiv an Sprechstunden, Röntgenuntersuchungen und Operationen teil. Zudem unterstützen sie die Assistierenden in der Betreuung der stationären Patienten und beim Erstellen der notwendigen Dokumentation.

Während der Rotation in der Orthopädie sowie Weichteilchirurgie nehmen die Studierenden zudem an drei Tagen der Woche an Fortbildungsveranstaltungen der Chirurgie teil.

Neben der zielgerichteten Aufarbeitung der Patienten gehört die Vertiefung praktischer Fähigkeiten (Orthopädischer Untersuchungsgang, Operations-Vorbereitung / Handhygiene, Operations-Assistenz).

Die Studierenden werden einem bestimmten Assistierenden im jeweiligen Team zugeteilt. Zusätzlich wird erwartet, dass die Studierenden während der Rotation eigenständig einen Fall aufarbeiten.

Neurologie Kleintiere

Die Studierenden werden während der Rotation in die tägliche neurologische Sprechstunde integriert, indem sie eine Neurologin / einen Neurologen begleiten. Das generelle Ziel ist das Erkennen und Beschreiben eines neurologischen Problems und dessen systematische Aufarbeitung und Behandlung. Dabei soll möglichst vor dem Einsatz weiterführender Abklärung mit einfachen klinischen Mitteln eine Lokalisation und eine sinnvolle Differentialdiagnose erstellt werden.

Durch Beobachtung des Vorgehens der Neurologen, Diskussion mit ihnen sowie Konsultation von Literatur zum jeweiligen Thema soll das Erlernte Wissen vervollständigt und vertieft werden (Learning on the job). Wenn möglich, sollten die Studierenden so viele Patienten wie möglich während ihres gesamten Aufenthalts an der Klinik verfolgen, um den ganzen Prozess von Abklärung bis Therapie zu sehen. Am Ende der Rotation sollten die

Studierenden die neurologischen Patienten einschätzen können und die diagnostischen und therapeutischen Strategien für die häufigsten neurologischen Erkrankungen kennen.

Innere Medizin, Dermatologie, Kardiologie Kleintiere

Die Studierenden rotieren durch verschiedene Abteilungen der Inneren Medizin Kleintier, um die fachlichen Grundkenntnisse aus den internistischen Vorlesungen in die Praxis umzusetzen und die verschiedenen Bereiche der Kleintiermedizin in Theorie und Praxis intensiv zu erlernen.

Hier sind Neugier und detektivische Fähigkeiten gefragt, wenn es darum geht, die problemorientierte Aufarbeitung von Patienten - vom Erstellen von Problemlisten anhand pathophysiologischer Überlegungen zur Auswahl geeigneter Diagnostik bis hin zur intensiven Therapie - zu begleiten. Die intensive Ausbildung beinhaltet zudem Patientenverantwortung; dies schließt auch die Kommunikation mit den Besitzern ein.

Die Studierenden werden in der Rotationszeit auf der Kleintiermedizin in die fachspezifischen Spezial-Sprechstunden Kardiologie und Dermatologie eingebunden, wo sie sich bei den jeweiligen Spezialisten wertvolle Fachkenntnisse aneignen können.

Onkologie Kleintiere

In der Rotation Onkologie werden die Studierenden in die onkologische Sprechstunde mit einbezogen. Sie sind bei Abklärungen neuer Tumorpatienten dabei, folgen den assistierenden Tierärztinnen / Tierärzten in der Aufarbeitung, Diagnostik und den Gesprächen mit den Besitzern. Sie beteiligen sich an den Fallbesprechungen der Abteilung und nehmen an den wöchentlich stattfindenden Weiterbildungen des Teams teil. Neben den Abklärungen folgen sie den Patienten in die Chemotherapie und Strahlentherapie, wo sie mit den jeweiligen Abläufen vertraut, gemacht werden.

Kleintierreproduktion

Während der Rotation bei der Kleintierreproduktion begleiten und helfen die Studierenden aktiv den Assistenz- und Obertierärzten/-tierärztinnen bei der Erhebung der Anamnese und Untersuchung von Patienten. Zudem helfen die Studierenden aktiv beim Erstellen von Problemlisten und begleiten die Tierärzte/Tierärztinnen bei der Durchführung weiterführender gynäkologischer oder andrologischer Untersuchungen. Neben der Aufarbeitung der Fälle assistieren die Studierenden auch bei Operationen und helfen bei der Erstellung der postoperativen Betreuungspläne der Patienten. Darüber hinaus erweitern die Studierenden ihre Kenntnisse im Bereich der Neonatologie und Pädiatrie.

Zoo-, Heim- und Wildtiere

In der Klinik für Zoo-, Heim- und Wildtiere sind die Studierenden an der Versorgung der stationären Patienten im laufenden Klinikalltag beteiligt und nehmen an der Sprechstunde teil. Die Studierenden untersuchen Patienten selbstständig und stellen diese auch in den Teambesprechungen ("Klinikrounds") vor.

Neben grundlegenden Kenntnissen in der Propädeutik erwerben sie praktische und theoretische Fähigkeiten in den Bereichen der bildgebenden Diagnostik, Chirurgie, Anästhesie, Verbandslehre, innere Medizin und Ophthalmologie.

Im Bereich Labordiagnostik werden sie in die Schnell- und Notfalldiagnostik, die bei einer fachgerechten Untersuchung von Heimsäuger-, Vogel- und Reptilienpatienten Anwendung findet, eingearbeitet.

Außerdem lernen sie vogel- und reptilienspezifische Aspekte der Virologie, Bakteriologie, Mykologie und Parasitologie kennen.

Notfall- und Intensivmedizin

Die Studierenden sind in den Rotationen bei der Notfallversorgung und auf der Intensivstation der Kleintierklinik eingeplant. Von der Versorgung von Notfallpatienten am Tag und am Abend bis hin zur intensiv-medizinischen Betreuung bekommen die Studierenden hier eine solide Grundlagenausbildung für Notfälle jeder Art.

Bildgebende Diagnostik (Ultraschall / Befundung)

Die Studierenden erhalten vertiefte Einblicke in die Befundung von Röntgenstudien wie auch in die Ultraschalldiagnostik. Während der Befundung von Röntgenstudien erhalten die Studierenden einen Fall zugeteilt,

welchen sie vorbereiten und am Ende der Woche im Plenum diskutieren. Im Ultraschall begleiten sie die / den diensthabende:n Radiologin / Radiologen, vertiefen dabei ihr Wissen und lernen dabei das Handling mit dem Tier während einer Ultraschalluntersuchung kennen.

Anästhesiologie

Die Studierenden haben die Wahl in dieser Rotation die Anästhesisten am Tag oder den/die Assistierende:n im Pikettdienst, abends/nachts und am Wochenende zu begleiten. Wählen die Studierenden aus, den/die Assistierende:n am Abend/in der Nacht zu begleiten, dann haben sie die Möglichkeit, nach den Kliniköffnungszeiten für Anästhesienotfälle vor Ort mitzuhelfen diese Patienten zu betreuen. Während dem Tag erholen sie sich von den Einsätzen in der Nacht und am Wochenende. Die Lernziele bleiben die Gleichen wie in der Kernrotation Anästhesiologie. Zusätzlich sollen die Studierenden in der Lage sein, eine Aufwachphase selbstständig zu überwachen und zu erkennen, wann eingeschritten werden muss.

Module Rotations Farm Animal Clinic

05SM.540_nt / Praktikum

Description:

General description:

Das Modul Rotationen Nutztierklinik wird von Studierenden mit Schwerpunkt Nutztiere absolviert. Es beinhaltet zur Vertiefung der klinischen Fähigkeiten und Fertigkeiten im Nutztierbereich folgende Fachgebiete: Innere Medizin, Reproduktion (Geburtshilfe und Gynäkologie), Nutztierchirurgie, Ambulanz und Bestandesmedizin, Notfallmedizin, Schweinemedizin und Veterinary public health. Studierende erhalten die Möglichkeit, unter Supervision unmittelbar an Patienten ihre Fähigkeiten und Fertigkeiten zu üben und zu vertiefen.

Dabei wird grosser Wert auf den Diskurs über spezifische Fälle und das Erarbeiten der fallspezifischen Hintergründe gelegt. Die Teilnahme an den Fallbesprechungen im Zuge des Lehrbetriebes sowie die Absolvierung von Notfalleinsätzen sind wesentlicher Bestandteil der klinischen Rotationen. Insgesamt dauern die supervidierten Rotationen

20 Wochen und sind gemäss folgendem Plan zu absolvieren:

Nutztierchirurgie: 3 Wochen

Innere Medizin Nutztiere: 3 Wochen

Ambulanz (Fahrten): 3 Wochen

Reproduktion (Geburtshilfe und Gynäkologie): 2 Wochen Variabel (Chirurgie, Innere Medizin oder Ambulanz): 1 Wochen Notfallmedizin: 3 Wochen

Bestandesmedizin (Intensivwoche): 1 Woche Schweinemedizin / AgroVet Strickhof: 3 Wochen Veterinary Public Health Nutztiere: 1 Woche

Innere Medizin, Chirurgie, Reproduktion, Ambulanz und Bestandesmedizin, Notfall

Die Schwerpunktstudierenden verbringen einen Teil ihrer Rotationszeit an der Klinik für Wiederkäuer. In der Klinik werden Patienten aus der Inneren Medizin, Weichteilchirurgie, Orthopädie, Reproduktionsmedizin untersucht, besprochen und behandelt. Neben dem Klinikalltag, können sie am wöchentlichen Kursprogramm der Klinik für Wiederkäuer teilnehmen (Journalclub, Seminaren).

Bei der Ambulanz begleiten die Studierenden die Tierärzte/Tierärztinnen in der Fahrpraxis und lernen verschiedene Betriebe kennen. Die Studierenden werden zudem an Ausfahrten zur Bestandsbetreuung und -diagnostik teilnehmen sowie aktiv in der Ergebnisauswertung eingebunden.

Der Notfalldienst der Wiederkäuerklinik ist gemeinsam organisiert, sodass sowohl Fälle aus der Chirurgie, Innere Medizin und Reproduktion in dieser Rotation betreut werden. Es ist jeweils ein Tierarzt/Tierärztin vor Ort, sodass Studierende immer in unter direkter Supervision eines Tierarztes/einer Tierärztin handeln.

Schweinemedizin / AgroVet Strickhof

Studierende in den praktischen Semestern sollen das in den Vorlesungen vermittelte Wissen anhand praktischer Fälle und Tätigkeiten vertiefen.

Neben Grundlagen wie dem Umgang mit Schweinen und Charakteristika der modernen Schweinehaltung stehen die Krankheiten der Schweine im Mittelpunkt. Die Fälle werden systematisch (Anamnese, klinische Untersuchung des Einzeltiers, Bestandesuntersuchung, Benennung von Verdachts- und Differentialdiagnosen, Diagnostische Massnahmen, kurz- und mittelfristige Therapiepläne) aufgearbeitet. Ausserdem werden Routinetätigkeiten wie künstliche Besamung, Kastration der Saugferkel, kleiner chirurgischer Eingriffe oder Impfungen durchgeführt. Weiterhin werden diagnostische Massnahmen wie die Entnahme von Kot- und Nasentupferproben, Blutproben, Liquor- oder Gelenkspunktionen, Hautgeschabsel oder Sektionen eingeübt. Grundlagen der Impfprophylaxe, Entwurmung, und der Applikation von Medikamenten sind ebenfalls Bestandteil der Übungen.

Veterinary Public Health Nutztiere

Während einer Woche werden Nutztier-relevante Aspekte aus dem VPH- Bereich als Themenblöcke bearbeitet:

Thema 1: Fleischgewinnung / sicheres Fleisch Thema 2: Salmonellen: als positives MFU-Ergebnis / als Zoonose

Thema 3: Mastitis, Resistenzen, Antibiogramm Thema 4: aktuelle Tierseuche

Thema 5: Tierschutz bei Nutztieren / beim Schlachten Die Erarbeitung erfolgt im Rahmen von Exkursionen, Vorlesungen, Seminaren, Laborarbeiten und Selbststudium.

ECTS: 28

Learning Outcome:

Studierende bei der Wiederkäuerklinik

...können einen klinischen Vorbericht (vollständige Anamneseerhebung) erheben
...lernen den Umgang mit Tierbesitzern und Tieren ...können eine exakte klinische Untersuchung durchführen ...können abnormale klinische Befunde erheben ...können eine Problem- und Differentialdiagnosenliste erstellen ...können einen logischen und adäquaten diagnostischen Plan erstellen ...können fallrelevante Röntgenbilder und Ultraschalluntersuchungen interpretieren
...verstehen Gründe für die Therapien
...können einen Behandlungsplan erstellen ...können einen Notfall erkennen
...können Kostenschätzungen durchführen
...können einen Besitzer- bzw. Tierarztbericht erstellen ...kommunizieren in jeweils passenden Ausdrücken mit Besitzern, Pflegern und Tierärzten in mündlicher und schriftlicher Form ...kommunizieren mit Fachpersonen: Strukturierte Kommunikation / Diskussion medizinischer Probleme unter Tierärzten ...wissen, wann ein Fall an einen Spezialisten verwiesen werden muss; eigene Grenzen erkennen und entscheiden, welche Fälle eine Behandlung durch einen Spezialisten bedürfen.

Studierende bei der Wiederkäuerchirurgie ...können eine aseptische Präparation eines Patienten durchführen ...kennen die systematische Exploration eines Abdomens; ...können eine systematische Exploration durchführen.

...kennen das Wundmanagement kennen bzw. können es durchführen.

Studierende auf der Reproduktionsmedizin der Wiederkäuer ...können eine gynäkologische Untersuchung durchführen ...können eine Euteruntersuchung durchführen ...können eine Puerperalkontrolle durchführen ...können eine klinische Untersuchung eines Neonaten durchführen ...kennen lokale Euterbehandlungen kennen und können diese durchführen

Studierende im Notfall bei der Wiederkäuerklinik ...lernen häufige Gründe für Notfälle bei Wiederkäuern kennen ...können lebensbedrohlicher Zustände bei im Notfalldienst eingelieferten Patienten (Triage) erkennen; ...kennen die Behandlung von Notfallpatienten; ...lernen praktischer Fähigkeiten (z.B. klinische Untersuchung, Notfallprozeduren mit erster Hilfe, wie z.B. Wundbehandlung, Frakturstabilisierung, etc.)
...können akute Schmerzzustände erkennen; ...kennen die Behandlung von Schmerzen.
...helfen bei Notfalloperationen mit
...können stationäre Patienten überwachen.
...lernen praktische Fähigkeiten wie Injektionen, Blutentnahmen, Tablettengabe, Flüssigkeitstherapie
...lernen des praktischen Umgangs und Handlings von Patienten, auch von weniger vertrauten Spezies
...erkennen und interpretieren abnormer Befunde; ...können Patienten überwachen bei möglichen Medikamentennebenwirkungen

Studierende bei der Ambulanz und Bestandesmedizin ...können die SOP (standard operational procedures) im Stall oder auf dem Felde beim Tierbesitzer, wie man sie an den Kliniken lernt; adaptieren

Studierende bei der Schweinemedizin

...können eine klinische Untersuchung von Schweinen und Bestandesuntersuchung durchführen
... Umwelteinflüsse kennen erkennen und kennen die Managementmassnahmen in Bezug auf die Tiergesundheit
...können von Betriebsaufzeichnungen und Leistungsdaten interpretieren ...kennen der Routineabläufe in einem Schweinebestand

Veterinary Public Health Nutztiere

Ziel ist, dass die Studierenden verschiedene Schnittstellen zwischen VPH und der Nutztierpraxis kennenlernen und

deren Bedeutung einschätzen können.

- Thema 1: Studierende kennen die verschiedenen Kontrollen zur Gewährleistung der Sicherheit von Fleisch auf Stufe Schlachtbetrieb (Schlachttieruntersuchung, Fleischuntersuchung, Selbstkontrollpflicht)
- Thema 2: Studierende verstehen die Grundlagen der Mikrobiologischen Fleischuntersuchung
- Thema 3: Studierende kennen die Bedeutung verschiedener euterpathogener Erreger und können Mastitisdiagnostik und Resistenzprüfung eigenständig durchführen
- Thema 4: Studierende können die Bedrohungslage respektive einen Ausbruch einer Tierseuche mit nachfolgenden Massnahmen korrekt einschätzen und erklären.
- Thema 5: Studierende kenne die verschiedenen «Problemfelder»

Course Materials:

- Innere Medizin, Chirurgie, Notfall
- Inhalt der Nutztierchirurgie-Skripten wissen
- Propädeutik Skripten
- Skripten der Nutztier-Medizin
- Merkblatt für Praktikum

Reproduktion (Geburtshilfe und Gynäkologie)

- Vorlesungsunterlagen zur Gynäkologie, Andrologie, Geburtshilfe, Neonatologie und Assitierten Reproduktion beim Rind studieren.
- Gynäkologische Propädeutik beim Rind (gelbes Heft) studieren
- Geburtshilfe (OLAT-Kurs "Geburtshilfe beim Rind") studieren.
- Während der Rotation bei Grunert/Berchtold "Fertilitätsstörungen beim Rind", Richter/Götze "Tiergeburtshilfe", McKinnon/Voss "Equine Reproduction" und Szenci et al. «Bovine Prenatal, Perinatal, and Neonatal Medicine» (sind in den Bibliotheken vorhanden) die in der Klinik vorgekommenen Krankheiten nachlesen. Abteilung für Ambulanz und Bestandesmedizin
- Gynäkologische Propädeutik beim Rind (gelbes Heft) studieren
- OLAT-Kurs "Geburtshilfe beim Rind" studieren
- «Geburtshilfe» (blaues Heft) studieren
- «Ambulanz-Büechli» (weisses Heft) studieren und bereithalten

Schweinemedizin / AgroVet Strickhof -Vorlesungsunterlagen

- Skript Propädeutik Schwein VPH Nutztiere
- Gynäkologische Propädeutik beim Rind (gelbes Heft) studieren
- Vorlesungsunterlagen zur Gynäkologie, Andrologie und Assitierten Reproduktion beim Rind studieren.
- Unterlagen zur Bestandesmedizin aufarbeiten AgroVet Strickhof Tage

Veterinary Public Health Nutztiere

- VPH-Unterlagen 3. Jahr zum Schlachtprozess und Schlachthygiene repetieren
- VPH-Unterlagen 3. Jahr zu Mastitis repetieren Alle weiteren Unterlagen werden am ersten Tag im Rahmen der Einführung abgegeben.

Merkmale:

Module Rotations Equine Clinic

05SM.550_pf / Praktikum

Description:

General description:

Das Modul Rotationen Pferdeklinik wird von Studierenden mit Schwerpunkt Pferd absolviert. Es beinhaltet zur Vertiefung der klinischen Fähigkeiten und Fertigkeiten im Pferdebereich folgende Fachgebiete: Chirurgie, Innere Medizin, Reproduktion, Notfallmedizin, Anästhesiologie und Bildgebende Diagnostik. Studierende erhalten die Möglichkeit, unter Supervision unmittelbar an Patienten ihre Fähigkeiten und Fertigkeiten ("Hands on") zu üben und zu vertiefen. Studierende werden intensiv in das praktische Arbeiten integriert. Es wird im Besonderen auf das Erlernen von praktischen Fertigkeiten (inkl. Kommunikationsfähigkeiten), eingegangen, auf das Erstellen von Behandlungsplänen nach Prinzipien von Evidence-based Medicine, antibiotic/microbial stewardship und Good Veterinary Practice, und es werden auf Tierschutz-relevante Aspekte eingegangen. Dabei wird großer Wert auf den Diskurs über spezifische Fälle und das Erarbeiten der fallspezifischen Hintergründe gelegt. Die Teilnahme an den Fallbesprechungen im Zuge des Lehrbetriebes sowie die Absolvierung von Nachtdiensten sind wesentlicher Bestandteil der klinischen Rotationen.

Insgesamt dauern die supervidierten Rotationen 20 Wochen und sind gemäss folgendem Plan zu absolvieren:

Pferdechirurgie: 6 Wochen

Innere Medizin Pferd: 6 Wochen

Notfallmedizin (Critical Care Pferd): 4 Wochen Reproduktion Pferd: 2 Wochen

Bildgebung Grosstier (weitere bildgebende Modalitäten): 2 Wochen Anästhesiologie Grosstier: 1 Woche

Klinik für Pferdechirurgie

Die Rotation auf der Klinik für Pferdechirurgie dient dazu, die Anwendung des erlernten Wissens im klinischen Alltag zu üben sowie die theoretischen und praktischen Fertigkeiten zu erweitern. Die Studierenden beteiligen sich aktiv bei der Versorgung der sich in stationärer Behandlung befindlichen Pferde sowie der diagnostischen Aufarbeitung neuer Patienten und assistieren bei Operationen. Einige Aufgaben wie Medikamentengabe und Wundtoiletten übernehmen die Studierenden nach entsprechender Einweisung eigenverantwortlich. Des Weiteren wird Wert auf die praktische Ausbildung von essentiellen Fertigkeiten wie Verbände anlegen, chirurgischer Händedesinfektion und korrektes Anlegen von Handschuhen, Durchführung intravenöser Injektionen und Legen von Venenverweilkathetern gelegt. Diese Fertigkeiten können unter tierärztlicher Supervision in der klinischen Praxis geübt werden.

Klinik für Pferdemedizin

Die Studierenden absolvieren die Rotation auf der Klinik für Pferdemedizin um das Basiswissen aus den internistischen Vorlesungen in die Praxis umzusetzen und die verschiedenen Bereiche der Inneren Medizin des Pferdes in Theorie und Praxis intensiv zu erlernen.

Hier sind Neugier und detektivische Fähigkeiten gefragt, wenn es darum geht, die problem-orientierte Aufarbeitung von Patienten - vom Erstellen von Problemlisten anhand pathophysiologischer Überlegungen zur Auswahl geeigneter Diagnostik bis hin zur intensiven Therapie - zu begleiten.

Studierende haben zugewiesene Fälle, die sich auch auf der Visite vorstellen und in deren Behandlung sie aktiv eingebunden sind. Die Studierenden übernehmen Aufgaben teilweise eigenverantwortlich nach Absprache mit Assistenztierärzten/-tierärztinnen (z.B.

Medikamentenapplikation, Infusionstherapie, intensivmedizinische Überwachung, POC Labor Untersuchungen) und teilweise unter Supervision eines Assistenztierarztes/-tierärztin (z.B. Katheter stecken, Blutentnahme, Assistenz bei invasiven bzw. weiterführenden Untersuchungen wie Endoskopie, Ultraschall, Liquorentnahme, Rektaluntersuchung).

Notfallmedizin (Critical Care Pferd)

Der Notfalldienst der Pferdeklunik ist gemeinsam organisiert, sodass sowohl Fälle aus der Pferdechirurgie, Innere Medizin für Pferde, Reproduktion und Ophthalmologie in dieser Rotation betreut werden. Es sind ständig ein oder mehrere Tierärzte/Tierärztinnen vor Ort, sodass Studierende immer in unter direkter Supervision eines Tierarztes/einer Tierärztin handeln. Die Studierenden absolvieren die Rotation im Notfallbetrieb der Pferdeklunik, um das Basiswissen aus den internistischen und chirurgischen Vorlesungen in die Praxis umzusetzen und die verschiedenen Bereiche der Notfallmedizin bei Pferden in Theorie und Praxis intensiv zu erlernen. Hier sind Belastbarkeit, detektivische Fähigkeiten und schnelles Denken gefragt, wenn es darum geht, Notfall- Patienten in gemäss einer Triage aufzuarbeiten und zu behandeln. Mithilfe bei Operationen im Rahmen vom Notfalldienst ist ebenfalls Bestandteil dieser Rotation. Ein zweiter Schwerpunkt dieser Rotation ist die Betreuung und Überwachung von Intensivpatienten an der Pferdeklunik.

Die Studierenden übernehmen Aufgaben teilweise eigenverantwortlich nach Absprache mit Assistenztierärzten/-tierärztinnen und teilweise unter Supervision eines Assistenztierarztes/-tierärztin.

Reproduktion Pferd

Studierenden vom Schwerpunkt Pferd haben die Möglichkeit während einer Woche auf der Klinik der Reproduktion unter Supervision praktische Tätigkeiten der Geburtshilfe zu üben und vertiefen. Zusätzlich wird von April bis Juli eine Praktikumswoche in Avenches auf dem Schweizerischen Nationalgestüt angeboten.

Klinik für Bildgebende Diagnostik

Abteilung für Anästhesiologie

Studierende mit Schwerpunkt Pferd sind, anschliessend an die zwei Wochen Kernrotation, eine weitere Woche auf der Abteilung für Anästhesiologie eingeteilt. Sie können so weiter in der Pferdeanästhesie mitarbeiten und die erlernten Fähigkeiten der vergangenen 1 Wochen anwenden. Bei Routinepatienten dürfen sie die Anästhesie vorbereiten und helfen durchzuführen, Jugularis Katheter stecken, intubieren, Monitoring am anästhesierten Patienten anbringen, Flüssigkeitstherapie steuern und einen postoperativen Analgesieplan entwerfen.

Module Rotation Veterinary Public Health

05SM.564_vph / Praktikum

Description:

General description:

Das Modul Rotationen Veterinary Public Health wird von Studierenden mit Schwerpunkt VPH absolviert. Es beinhaltet die Vertiefung des theoretischen Wissens sowie praktischer Tätigkeiten in folgenden Themengebieten: One Health, Fleischgewinnung, Fleisch- und Milcherzeugnisse, Fisch/Aquakulturen, Geflügel/Eier, Bienen/Honig, Rückstände, Antibiotikaresistenzen, Tierseuchen/Zoonosen, Labor, Schlachthof, Veterinäramt und FTVT (fachtechnisch verantwortliche:r Tierarzt/Tierärztin. Ziel ist die Annäherung an die Anforderungen an die beruflichen Qualifikationen amtlicher Tierärzte/Tierärztinnen.

Die Inhalte werden im Rahmen von Vorlesungen, Kolloquien, Workshops, Selbststudium, Vorträgen, Betriebsbesuchen und Praktika vermittelt.

Insgesamt dauern die supervidierten Rotationen 16 Wochen und sind gemäss folgendem Plan zu absolvieren:

One Health und präventive Veterinärmedizin: 4 Wochen

Fleischgewinnung: 2 Wochen

Geflügelfleischkette und Laborpraktikum: 2.5 Wochen

Milcherzeugnisse, Fleischerzeugnisse, Fisch: 1.5 Wochen

Rückstände, Resistenzen, Tierseuchen, Honig/Bienen, FTVT Kurs: 2 Wochen

Schlachthofpraktikum: 1-2 Wochen

Veterinäramtpraktikum: 2-3 Wochen

One Health

In einem vierwöchigen Themenblock erhalten die Studierenden Einblick in das Gebiet One Health. Dabei sollen die Zusammenhänge der Gesundheit von Mensch, Tier und Umwelt beleuchtet und One Health Herausforderungen besprochen werden.

Fleischgewinnung

In diesem Themenbereich wird der Fokus gezielt auf all jene Massnahmen gelegt, welche zu «sicherem Fleisch» beitragen. Namentlich gehören die Schlachthygiene und Selbstkontrollpflicht, die Schlacht tieruntersuchung und Fleischuntersuchung (pathologisch- anatomische Beurteilung von Organveränderungen), die Mikrobiologische Fleischuntersuchung sowie die Entsorgung tierischer Nebenprodukte.

Geflügel- und Laborpraktikum

Zum einen werden Kenntnisse über die integrierte Geflügelfleischkette sowie über Eier als Lebensmittel vermittelt. In diesem Zusammenhang wird auch die Bedeutung von Zoonoseerregern (Salmonellen, Campylobacter) besprochen.

Zum anderen werden im Rahmen eines Praktikums grundlegende Labormethoden wie beispielsweise kulturell-mikrobiologische sowie auch molekularbiologische Methoden erlernt.

Milcherzeugnisse, Fleischerzeugnisse, Fisch

Dabei werden Themen wie Milchverarbeitung, Milcherzeugnisse, Fleischverarbeitung, Fleischerzeugnisse, Aquakulturen und Fisch als Lebensmittel besprochen. Dazu werden jeweils die rechtlichen Grundlagen (der EU und CH) beigezogen und es wird ein Augenmerk auf Qualitätsmanagement-Systeme gelegt.

Rückstände, Antibiotikaresistenzen, Tierseuchen, Honig/Bienen, FTVT Kurs

Während dieser beiden Wochen werden verschiedene VPH-relevante Themen beleuchtet und deren Bedeutung erläutert. Zudem muss der Kurs zum/zur fachtechnisch verantwortlichen Tierärztin/Tierarzt (FTVT) absolviert werden.

Schlachthofpraktikum

Im Rahmen des Aufenthaltes an einem Schlachthof sollen insbesondere die Schlachtier- und Fleischuntersuchung praktisch geübt werden. Zudem sollen zahlreiche weitere Aufgabengebiete von amtlichen Tierärzten und amtlichen Fachassistenten am Schlachtbetrieb kennengelernt werden.

Veterinäramt

Während des Praktikums auf einem kantonalen Veterinäramt sollen die Strukturen sowie die vielfältigen und breit gefächerten Aufgaben des öffentlichen Veterinärwesens kennengelernt werden.

ECTS: 20

Learning Outcome: One Health

- Erkennen von «One Health» Herausforderungen und diese begründen können
- Elemente eines sozio-ökologischen Systems strukturieren und einzelne Aspekte qualitativ und quantitativ analysieren können
- Themenfelder Wirkstoff-Resistenzen, Feed to Food, Mensch-Tier-Beziehung und Zoonosen aus verschiedenen Perspektiven erklären können
- Methoden der Co-Produktion (Transdisziplinäres Arbeiten) bezeichnen und den Mehrwert der Zusammenarbeit verschiedener Disziplinen darstellen können
- Anhand von exemplarischen Fallbeispielen klinische und diagnostische Informationen interpretieren, auf die zugrundeliegenden Probleme schliessen und dementsprechende therapeutische Massnahmen und vorbeugende Programme erarbeiten und erläutern können

Fleischgewinnung

- Grundlagen amtlicher Kontrollen: Ziele, Vorgehen und praktische Durchführung von Schlachtieruntersuchung STU, Fleischuntersuchung FU (inkl. Pathologisch-anatomischer Beurteilung von Organveränderungen) sowie mikrobiologischer Fleischuntersuchung MFU kennen
- Schlachthygiene: Benennen von Schlachtprozessstufen, welche zur Oberflächenkontamination von Schlachtierkörpern beitragen und erklären, wie der Schlachtbetrieb die Schlachthygiene im Rahmen der Selbstkontrolle systematisch überwachen muss/kann. (Schlachtierkörper- Kontrollen, Reinigungs- und Desinfektionskontrollen)
- Verschiedene Wege der Entsorgung tierischer Nebenprodukte beschreiben können
- Erarbeitung der nationalen und internationalen rechtlichen Grundlagen im Selbststudium

Geflügelfleischkette und Laborpraktikum

- Grundlagen der Geflügelfleischproduktion in der Schweiz kennen: Haltungsformen in der Geflügelmast, Geflügelkrankheiten, Schlachttechnologie sowie STU/FU in der Geflügelschlachtung, Zerlegung und Verarbeitung von Geflügelfleisch
- Grundlagen des Lebensmittels EI kennen: Produktion, Qualitätsparameter, Haltbarkeit, Mikrobiologie
- Beschreiben von Campylobacter sowie Salmonellen als latente Zoonoseerreger
- Erlernen und selbständige Durchführung verschiedener Labormethoden .Kulturell-mikrobiologisch: Mastitisdiagnostik, Keimzählung, Antibiogramme u.a.
- .Molekularbiologisch: PCR konventionell / real-time, MALDI-TOF-MS u.a.

Milcherzeugnisse, Fleischerzeugnisse, Fisch

- Grundlagen «Milch»: Beschreibung der Milchgewinnung mittels Melkro sowie der Milchpulverherstellung (Rohmilchqualität, Technologie, HACCP, Produktkontrolle). Dazu die gesetzlichen Grundlagen zu Milch und Milcherzeugnissen anwenden können.
- Grundlagen «Fleisch»: Herstellung von Kochpökelwaren, Brühwurstwar Rohwurstwaren (Technologie, HACCP, Produktkontrolle) unter Zuhilfenahme gesetzlicher Grundlagen analysieren können
- Grundlagen der Fischmast kennen: Haltung, Fütterung und Schlachten von Fischen
- Zoonosepotential erklären, welches von Fisch und Krustentieren ausgeht

Rückstände, Antibiotikaresistenzen, Tierseuchen, Honig/Bienen, FTVT Kurs

- Ausgewählte Beispiele an Rückständen (z.B. Antibiotika...) sowie Resistenzproblematiken erläutern können
- Die Bedrohungslage respektive einen Ausbruch einer Tierseuche mit nachfolgenden Massnahmen korrekt einschätzen und in einem Vortrag erklären können.
- Grundlagen zu Bienen als Nutztiere kennen: Bienenhaltungsformen, Bienenkrankheiten / -seuchen, Eigenheiten der Lebensmittelmatrix Honig, Infant Botulismus
- FTVT: Tiergesundheitsaspekte, Fütterungsarzneimittel und deren Anwendung

Schlachthofpraktikum

- Schlacht tieruntersuchung bei Rind, Schwein, evtl. andere Tierarten: Kontrolle Begleitdokument, Kontrolle Einhaltung Tierschutzbestimmungen, Massnahmenim Anschluss an die Schlacht tieruntersuchung
- Fleischuntersuchung: Durchführung und Massnahmen im Anschluss (Beurteilung Genuss tauglichkeit)
- Weitere Untersuchungen: Trichinellenuntersuchung, Mikrobiologische Fleischuntersuchung
- Probenahmen: z.B. für nationalen Rückstandskontrollplan, MFU-Proben, Oberflächenproben von Schlacht tierkörpern und Einrichtungsgegenständen (Hygieneüberwachung Räume, Geräte, Personal, Prozesse, Reinigung, Desinfektion, Eigenkontrolle, Schlachthygiene etc. gemäß § 17; den Grundsätzen der guten Hygienepaxis und des HACCPKonzeptes.)
- Inspektionen und Berichte: Beurteilung Schlachthygiene, Beurteilung Gebindekonzept, Beurteilung Selbstkontrollkonzept, Beanstandung bei Genussuntauglichkeit

Vetrinär amtpraktikum

- Grundsätzliches: Strukturen und Aufgaben amtlicher Tierärzte; Vorbereitung/Durchführung/Nachbereitung von Kontrollen, Erkennen von Mängeln und Wege zur Behebung (Mängelschreiben, Verfügung mit Rechtsmittelbelehrung, Anzeige); amtliche Datenbanken
- Lebensmittel: Betriebskontrollen (z.B. Schlachtbetrieb, Zerlegebetrieb, Verarbeitungsbetrieb, Kühlhaus etc.); Selbstkontrolle/Hygienekontrolle in Lebensmittelbetrieben
- Tiergesundheit/Tierseuchen: Bekämpfung und Monitoring ausgewählter Tierseuchen (z.B. BVD u.a.), Tierseuchenklassen und Tierseuchenmeldesystem; Arbeiten mit TRACES (Einfuhr/Ausfuhr von Heim- und Nutztieren sowie Produkten tierischen Ursprungs); Kadaversammelstellen, amtstierärztliche Gesundheitszeugnisse, Tierverkehr Rinder / Equiden
- Tierschutz: Bewilligungen Wildtierhaltungen / Zoos, Ausstellungen, Tierheime etc.; Tiertransportkontrollen; Kontrollen von Tierschutzmeldungen und im Rahmen der Primärproduktion; Tierversuchsbewilligungen; Problemkreis gefährliche Hunde
- TAM/Veterinärberufe: Kontrolle tierärztlicher Privatapotheken, Kontrollen im Rahmen der Primärproduktion, Bewilligungen im Tierärztesektor

Course Materials:

- VPH 1 -Unterlagen zum Schlachtprozess und Schlachthygiene repetieren
- VPH 2 -Unterlagen zu Tierseuchen und Tierarzneimitteln repetieren
- Unterlagen zu Mastitis repetieren
- Homepage <https://www.blv.admin.ch>; Bereiche 'Lebensmittel und Ernährung' sow 'Tiere'
- Relevante Gesetztestexte (Gesetze, Verordnungen, Technische Weisungen) herausuchen
- Alle weiteren Unterlagen werden im Vorfeld der Rotationswoche abgegeben.

Merkmale:

Responsible instructor: Roger Stephan

Requirements:

Assessment: Jeder Themenbereich wird mit einem sogenannten Fachgespräch (schriftliche Erfolgskontrolle mit anschliessender Diskussion) abgeschlossen. Der FTVT-Kurs sowie die Praktikas auf dem Schlachthof und dem Veterinäramt müssen entsprechend separater Evaluationsbögen erfolgreich absolviert werden. Die Assessments werden im e-Portfolio zeitnah dokumentiert und validiert.

Die Vertiefung und Verbesserung praktischer Fähigkeiten soll anhand von regelmässigen Besprechungen, Reflexionsmöglichkeiten sowie Feedbackrunden gefördert werden.

Module Rotations Small Animal Clinic, Equine Clinic

05SM.576_kp / Praktikum

Description:

General description:

Studierende mit Schwerpunkt Nutztiermedizin erhalten die Möglichkeit in diesem Modul ihre klinischen Fähigkeiten und Fertigkeiten in der Kleintier- und Pferdeklinik zu vertiefen. Sie können unter Supervision unmittelbar an Patienten ihre Fähigkeiten und Fertigkeiten ("hands on") zu üben und zu vertiefen. Studierende werden intensiv in das praktische Arbeiten integriert. Es wird im Besonderen auf das Erlernen von praktischen Fertigkeiten (inkl. Kommunikationsfähigkeiten), eingegangen, auf das Erstellen von Behandlungsplänen nach Prinzipien von Evidence-based Medicine, antibiotic/microbial stewardship und Good Veterinary Practice, und es werden auf Tierschutz-relevante Aspekte eingegangen.

Dabei wird großer Wert auf den Diskurs über spezifische Fälle und das Erarbeiten der fallspezifischen Hintergründe gelegt. Die Teilnahme an den Fallbesprechungen im Zuge des Lehrbetriebes sowie die Absolvierung von Notfalldiensten auf der Pferdeklinik sind wesentlicher Bestandteil der klinischen Rotationen.

Insgesamt dauern die supervidierten Rotationen 8 Wochen und sind gemäss folgendem Plan zu absolvieren:

Kleintierchirurgie: 2 Wochen

Innere Medizin Kleintier: 2 Wochen

Pferdechirurgie: 2 Wochen

Innere Medizin Pferd: 1 Woche

Notfallmedizin (Critical Care Pferd): 1 Woche

ECTS: 16

Learning Outcome:

-Siehe Modul Rotation Kleintierklinik (Chirurgie / Innere Medizin)

-Siehe Modul Rotation Pferdeklinik (Chirurgie / Innere Medizin / Notfallmedizin)

Course Materials:

-Siehe Modul Rotation Kleintierklinik (Chirurgie / Innere Medizin)

-Siehe Modul Rotation Pferdeklinik (Chirurgie / Innere Medizin / Notfallmedizin)

Merkmale:

Responsible instructor:

Patrick Kircher

Requirements:

Assessment:

Während des klinischen Jahres sind je nach Fachgebiet verschiedene arbeitsplatzbasierte Assessments abzulegen, welche entweder summativ (mit einer Note) oder rein formativ (ohne Note) bewertet werden. Einzelne Veranstaltungen verlangen eine schriftliche Prüfung (z.B. die Labordiagnostik). Die Assessments müssen im e-Portfolio zeitnah dokumentiert und validiert werden. Zur Vertiefung der klinischen Handlungskompetenz werden regelmäßige Besprechungen, Diskussionen und Reflexion zu klinischen Fällen und der zugrundeliegenden Entscheidungen abgehalten. Feedback stellt ein zentrales Element dar. Des Weiteren werden bestimmte Fertigkeiten im Skills Lab vertieft.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated twice

Module Extramural Practicals

05SM.580_exp / Praktikum extern / Berufspraktikum

Description:

General description:

Die externen Praktika sind integrale und wichtige Bestandteile der praktischen Ausbildung. Die Studierenden absolvieren insgesamt 12 Wochen (60 Arbeitstage) externe Praktika. Sie wählen die Art der Praktika individuell aus und bewerben sich eigenständig.

Die Studierenden sind selbst in der Verantwortung ein Praktikumsplatz so auszuwählen, dass am Schluss des Studiums die entsprechenden Anforderungen der VetPROFILES abgedeckt werden.

Das Praktikum in einer tierärztlichen Praxis oder Klinik in der Schweiz ist an vertragliche Bedingungen gebunden. Dazu sind Verträge vor Antritt des Praktikums abzuschliessen.

ECTS: 15

Learning Outcome:

Der Tätigkeitenkatalog für die externen Praktika orientiert sich an den VetPROFILES Ausbildungszielen bzw. vertrauenswürdigen beruflichen Tätigkeiten (EPA) und integriert die Erwartungen und Möglichkeiten von Praktikumsbetrieben.

Es ist eine Zusammenstellung von beruflichen Tätigkeiten und Kompetenzen, die Studierende der Veterinärmedizin während eines klinischen Praktikums mit unterschiedlichem Betreuungsgrad durchführen sollen. Die Ausführung der beruflichen Tätigkeiten benötigen eine gleichzeitige Integration mehrerer Kompetenzen, dazu gehören die veterinärmedizinische Expertise, Kommunikation, Teamarbeit, Professionalität, Health Advocate und das lebenslange Lernen. Das Externe Praktikum verfolgt das Ziel, dass Studierende das bereits Erlernte anwenden und weitervertiefen.

Die Auflistung der Ausbildungsziele erfolgt anhand der jeweiligen EPAs.

Studierende sollen am Ende des Praktikums die Tätigkeiten unter dem gekennzeichneten Supervisionslevel / Betreuungsgrad ausüben können.

Module iPSZürich Lecture

04SMIRM21001 / Seminar

Description:

ECTS: 0

Notes:

Kontakt-E-Mail:

melanie.general@uzh.ch

Learning Outcome:

The discovery of so-called induced pluripotent stem cells (iPSCs, i.e. embryonic-like cells created from ordinary body cells) by Prof. S.

Yamanaka at the Center for iPS Cell Research and Application (CiRA), Kyoto University, has ignited a new era of cell-based therapy initiatives and rewarded Yamanaka and his coworkers with the Nobel Prize for Medicine in 2012. iPSC-technology has experienced tremendous progress in the field of disease modelling, early drug discovery and regenerative medicine.

The iPSZürich lecture series, brings together early-career researchers (Undergraduate Students, PhD students and postdoctoral fellows) and experts working on exciting new innovations in the field. The main goal is to provide a forum to disseminate state-of-the art iPSC research, trigger free-ranging discussions and help to inspire ideas of current research projects in the field of iPSC technologies.

Module Rotation Pathobiology

05SM.566_pb / Praktikum

Description:

General description:

Studierende mit Schwerpunkt Pathobiologie erhalten im 9. Semester während vier Wochen Einblick in das Gebiet One Health und präventive Veterinärmedizin. Die Zusammenhänge der Gesundheit von Menschen, Tier und Umwelt wird den Studierenden in Vorlesungen, Kolloquien, Übungen und Exkursionen nähergebracht. Anschliessend vertiefen die Studierende ihr Wissen und die praktischen Fertigkeiten während je zwei Wochen (8 Wochen total) in den verschiedenen Pathobiologie-Instituten in den verschiedenen Pathobiologie-Instituten (Virologie, Bakteriologie, Pathobiologie, Parasitologie). Der letzte Teil des Moduls beinhaltet die Vorbereitung auf die Masterarbeit in denen sich die Studierenden während 4 Wochen auf die Masterarbeit im gewählten Institut und Thema vorbereiten. Die Vorbereitung beinhaltet zum Beispiel Literaturstudium, Einführung in die Labormethoden, Probensammlung und erste Pilotuntersuchungen.

ECTS: 20

Learning Outcome:

One Health und präventive Veterinärmedizin

Die Studierenden:

- Erkennen von unzählbaren «One Health» Herausforderungen und können diese begründen.
- Können Elemente eines sozio-ökologischen Systems strukturieren, und einzelne Aspekte qualitativ und quantitativ analysieren.
- Können die Themenfelder Wirkstoff-Resistenzen, Feed to Food, Mensch- Tier-Beziehung und Zoonosen aus verschiedenen Perspektiven erklären.
- Können die Methoden der Co-Produktion (Transdisziplinäres Arbeiten) bezeichnen und den Mehrwert der Zusammenarbeit verschiedener Disziplinen darstellen.
- Die Studierenden können anhand von exemplarischen Fallbeispielen klinische und diagnostische Informationen interpretieren, auf die zugrundeliegenden Probleme schliessen und dementsprechende therapeutische Massnahmen und vorbeugende Programme erarbeiten und Programme erarbeiten und erläutern.

Block Vertiefung in den pathobiologischen Instituten

Die Studierenden: Institut

- Können Labormethoden zum Nachweis von virologischen, bakteriologischen, mykologischen und parasitologischen Erregern sowie die in der Pathologie angewandte Verfahren erklären, auswählen, praktisch durchführen und deren Test-Eigenschaften beurteilen.
- Interpretieren der Resultate von infektionspathologischen Untersuchungen und Rückschlüsse ziehen könne auf die zugrundeliegende Erkrankung.
- Gewichten der Bedeutung von pathobiologischen Befunden und ableitende Handlungsmassnahmen.

Course Materials:

- Vorlesungsunterlagen der Semester 1-8 in den Fächern Virologie, Bakteriologie, Pathobiologie, Parasitologie und Epidemiologie
- Weitere Unterlagen werden während dem Kurs abgegeben (laufend)

Merkmale:

Responsible instructor:

Module BIO 416 Microscopy

07SMBIO416 / Course

Description:

General description:

This lecture series provides in-depth knowledge of the theoretical foundations and diverse applications of light and electron microscopy - indispensable tools in modern research and diagnostics. Throughout the lectures, students will gain a deep understanding of how various microscopy techniques are used to make the invisible visible. Additionally, essential concepts of image processing, which are crucial for analyzing microscopic images, will be covered. The course concludes with a written exam encompassing all covered topics.

ECTS: 3

Notes:

- The module BIO416 with credit points is also open for PHD and MD-PhD students.

Learning Outcome:

By the end of this module, participants will be able to:

- Understand and explain the fundamental concepts and techniques of light and electron microscopy.
- Describe the physical principles of light and electron microscopy, including image formation, resolution, and contrast mechanisms.
- Identify the differences between various light microscopy techniques.
- Understand and explain the basics of advanced microscopy techniques using appropriate technical terminology
- Discuss the advantages and limitations of electron microscopy compared to light microscopy and select appropriate methods for specific scientific questions.
- Describe sample preparation methods for electron microscopy.
- Understand, explain, and apply the fundamentals of digital image processing.
- Assess the selection and application of appropriate microscopy methods for specific biological research questions.

Module BME 317 Metabolism and Nutrition

07SMBME317 / Lecture with Practical Exercises

Description:

General description:

After an introduction into the concepts of metabolism and nutrition, the subsequent topics will be energy metabolism, role of macronutrients in energy homeostasis, the metabolic challenges of pregnancy and lactation, of growth, physical exercise and of ageing, and specific nutrient requirements of the brain. Further, the control of energy metabolism by the brain (homeostatic and hedonic systems) and the periphery will be discussed. Finally, dysmetabolic situations and their influence on the cardiovascular system and in cancer cachexia will be discussed. The course format will be based on 1-h lectures (based on the Textbook: Nutrition and Metabolism edited by Susan A. Lanham-New, Ian A. Macdonald, Helen M. Roche) and 1-h journal clubs presented by students on the corresponding topic using recent literature.

ECTS: 3

Notes:

- Attendance is compulsory

Learning Outcome:

The students understand the factors that contribute to the control of energy metabolism. The students understand the pathophysiology of frequent dysmetabolic conditions. The students learn to interpret original scientific literature. The students learn to present research findings in the scientific literature and to discuss these findings with their colleagues.

By reviewing current scientific literature, students will be exposed to the basics of experimental design, and understand how and when various experimental techniques can be implemented.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Christina Boyle

Requirements:

Assessment:

Evaluation

Students will be graded on:

- Journal club presentation (40%)
- Unannounced quizzes (10%)
- Final exam (50%)

The 30-min journal club will be presented in English. The final exam consists of multiple-choice and short answer questions in English.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module BME 322 Molecular and Cellular Neurobiology

07SMBME322 / Course

Description:

General description:

This lecture gives insight into the molecular and cellular bases of neurotransmission and signal transduction in the CNS, including sensory neurons (retina, olfactory epithelium), beyond the basic concepts covered in the "Grundstudium" (BIO143). The main topics include the structure and function of ion channels and receptors, the biochemical basis of synaptic neurotransmission, the functional properties of neurons and glial cells, and the principles of intra- and extracellular signal transduction.

ECTS: 3

Learning Outcome:

Upon successful completion of the module students should be able to:

- describe key properties of ion channels and G-protein coupled receptors in relation to signal transduction in the nervous system
- describe the principles of synaptic transmission
- explain why neurotransmitter receptors and reuptake transporters are targets of psychoactive drugs
- compare the functional properties of neurons, astrocytes, microglial cells, and oligodendrocytes
- describe the function of signal transduction cascades for detection of external stimuli and their role in neurodegeneration

Key Skills

Upon successful completion of the module students should be able to:

- integrate knowledge in molecular and cell biology relevant for understanding intracellular signal transduction cascades
- discuss the roles of second messengers in neurons and astrocytes
- formulate hypotheses about the relevance of intra- and extracellular signaling cascades for neuronal maturation and neurodegeneration

Target Groups:

Appropriate for Master students in Biomedicine and in Neurobiology.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Bruno Weber

Requirements:

Prerequisites:

Basic studies completed.

Recommended: BME235/245 "Physiologie und Anatomie I & II".

Other modules of interest include BIO344 "Developmental Neurobiology", BIO 343 "Structural Plasticity and Repair of the Nervous System" and BME302 "Systems Neurobiology"

Assessment:

written examination in English (60 minutes)

Grading Scale:

1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Organisation: Master's degree program Biomedicine

Offered in:
Fall Semester 2026
Fall Semester 2025

Module Einführung in die empirische Wirtschaftsforschung (V+Ü) (Introductory Econometrics)

03SM22BO0002 / Lecture with Practical Exercises

Description:

General description:

Zielsetzung der empirischen Wirtschaftsforschung ist es, ökonomische Fragestellungen mit Hilfe empirischer Methoden zu beantworten. Empirische Methoden in diesem Zusammenhang sind aber nichts anderes als statistische Methoden. Teilweise sind es Methoden, die wir in der Vorlesung "Statistik" schon kennengelernt haben, teilweise sind es neue Methoden, die es erst noch zu besprechen gilt. Allgemein formuliert, untersuchen diese neuen Methoden die Beziehung von zwei (oder mehreren) Zufallsvariablen. Existiert eine solche Beziehung? Falls ja, wie kann diese Beziehung quantifiziert werden und welche Einsichten können daraus gewonnen werden? Die angebrachten statistischen Methoden zur Untersuchung der Beziehung von Zufallsvariablen hängt von deren Natur ab, d.h. davon, ob kategorische oder numerische Variablen vorliegen.

Methoden für die Behandlung von kategorischen Variablen können unter der Rubrik "Kontingenz-Tabellen" zusammengefasst werden und werden schon in der Vorlesung "Statistik" behandelt. Diese Vorlesung befasst sich mit der Behandlung von numerischen Variablen; die zugehörigen Methoden können unter der Rubrik "Regression" zusammengefasst werden.

ECTS: 6

Notes:

Kein Podcast. Vorlesungen werden zwar aufgezeichnet, stehen jedoch nicht als Podcast zur Verfügung.

Bei organisatorischen Fragen zur Veranstaltung senden Sie bitte eine e-mail an stat_ewf@econ.uzh.ch. E-mails an den Dozenten werden nicht beantwortet.

Module Mikroökonomik II (V) (Microeconomics II)

03SM22BO0003 / Course

Description:

General description:

Die in Mikroökonomik I erworbenen Grundkenntnisse werden erweitert.

ECTS: 3

Notes:

Dieses Modul wird nicht aufgezeichnet/kein Podcast.

Bei organisatorischen Fragen schreiben Sie bitte ein Mail an: teaching@econ.uzh.ch. Mails an den Dozierenden werden nicht beantwortet.

Learning Outcome:

Grundlegende Konzepte, Methoden und Ergebnisse der Mikroökonomie einschliesslich der Fähigkeit, diese auf konkrete Fragestellungen anwenden zu können.

Target Groups:

Studierende der Bachelorstufe

Languages of Instruction:

Deutsch, englischsprachige Literatur

Course Materials:

Alle Unterlagen (Folien, Übungsaufgaben inkl. Lösungen, alte Prüfungen) und notwendigen Informationen zur Veranstaltung Mikroökonomik II werden im Verlauf des Semesters im OLAT aufgeschaltet.

Merkmale:

Responsible instructor:

Module Angewandte Physiologie anhand kinderanästhesiologischer Fallbeispiele
04SMPED22001 / Seminar

Description:

ECTS: 0

Notes:

Vorlesungen/Seminare für das Herbstsemester 2026

17.09.2026

PD Dr. med. Jörg Thomas

ASS B113

16:30 – 18:00

Welchen Blutdruck braucht das Kind?

01.10.2026

PD Dr. med. Achim Schmitz

ASS B113

16:30 – 18:00

Gerinnung

15.10.2026

PD Dr. med. Alexander Schmidt

ASS B113

16:30 – 18:00

Kinderanästhesie bei Shuntvitium

29.10.2026

PD Dr. med. Jörg Thomas

ASS B113

16:30 – 18:00

Chronische postoperative Schmerzen (CPSP)

12.11.2026

PD Dr. med. Alexander Schmidt

ASS B113

16:30 – 18:00

Lungenprotektive Beatmung beim Neonaten

26.11.2026

PD Dr. med. Achim Schmitz

ASS B113

16:30 – 18:00

Aspekte der Säuglingsanästhesie

10.12.2026

PD Dr. med. Alexander Schmidt

ASS B113

16:30 – 18:00

Pulmonale-Arterielle-Hypertonie

Themen:

Chronische postoperative Schmerzen (CPSP)
Allgemeinanästhesie für nichtkardiale Eingriffe bei Vitium Cardis
Lungenprotektive Beatmung beim Neonaten
Co-Analgetika in der postoperativen Schmerztherapie
Schockformen und Management
Nephrektomie bds beim Neugeborenen
Welchen Blutdruck braucht das Kind?
Gerinnung
Kinderanästhesie bei Shuntvitium
Aspekte der Säuglingsanästhesie
Pulmonale-Arterielle-Hypertonie

Learning Outcome:

Lerninhalte:

Anwendung physiologischer Prinzipien und Gesetzmässigkeiten anhand kinderanästhesiologischer Fallbeispiele
Beispiele für Physiologie sind Thermoregulation, Atemmechanik, pulmonale Perfusion- und Distributionsstörungen, Katecholamine und Nebennierenrindenhormone, Frank-Starling Mechanismus, Neuronale Innervation, peripartale Kreislaufumstellung
Beispiele für Kinderanästhesiologische Szenarien sind Positive Pressure Ventilation, Thorax- und Abdominaleingriffe im Säuglingsalter, Laparoskopische Eingriffe, typische kinderanästhesiologische Atemwegskomplikationen, Mediastinal Mass Syndrom, usw.

Lernziele:

Die Studierenden sollen lernen, welche physiologischen Probleme den klinischen Szenarien zugrunde liegen bzw. welche physiologischen Gesetze angewendet werden, um in bestimmten Fallkonstellationen und Krisensituationen erfolgreich zu handeln
Unterrichtsformat: Seminar- bzw. Kolloquium: Nach Vorstellung eines klinischen Falls mit Illustration des klinischen Kontextes durch den Referenten wird die zugrundeliegende Problematik gemeinsam erarbeitet und die physiologischen Gesetzmässigkeiten sowie die mögliche Anwendung zur klinischen Problemlösung diskutiert; die physiologischen Gesetze werden abschliessend vom Referenten zusammengefasst und als Handout zur Verfügung gestellt (Wird z.B. Pandemie-bedingt die Teilnehmerzahl zu hoch bzw. eine Präsenzveranstaltung unmöglich, so wird eine Online-Übertragung angeboten)

Prüfungsform:

Multiple-Choice Test. Zu jedem Fallbeispiel/Thema werden 2 - 3 Fragen erstellt. Die Teilnahme am Test ist freiwillig, er wird online durchgeführt und die Benutzung von Hilfsmitteln ist erlaubt. Die Multiple-Choice Fragen werden mit Google.forms zur Verfügung gestellt, die Teilnehmer können den Zeitpunkt, wann sie den Test durchführen, innerhalb einer bestimmten Frist selber bestimmen. Alle Teilnehmer, die einen Test ausfüllen, erhalten eine Korrektur mit Kommentaren per Email zugesandt. Sie können bei Bedarf auch persönlich, ggf auch videotelefonisch Rückfragen zu den Inhalten stellen.

Target Groups:

Studierende im Bachelor- und im Masterstudium

Merkmale:

Responsible instructor: Achim Johannes Schmitz

Module Informatik und Wirtschaft (V) (Informatics and the Economy)

03SM22AINF01 / Course

Description:

General description:

Computer haben unser Leben tiefgreifend verändert. Um die heutige Gesellschaft und Wirtschaft und deren stetigen Veränderungen zu verstehen, muss man wissen, wie Computer funktionieren. Das Ziel der Vorlesung Informatik und Wirtschaft ist es, Ihnen eine Basis zu vermitteln, um unsere informationstechnisch gesteuerte Welt zu verstehen und darin erfolgreich zu sein.

ECTS: 3

Notes:

Sämtliche Angaben zu den Vorlesungen werden in OLAT publiziert. Die wichtigsten Informationen sowie Hilfestellungen zur Anmeldung in OLAT finden sie in der Kurzversion des Syllabus.

Learning Outcome:

Um die heutige Gesellschaft und Wirtschaft als Ganzes zu begreifen, muss man verstehen, wie Computer funktionieren und wie sie unser wirtschaftliches Umfeld verändern. Ziel der Vorlesung Informatik für Ökonomen ist es, diese zwei Bereiche zu beleuchten.

Zunächst beschäftigen wir uns also mit der Frage wie Computer und Informationssysteme funktionieren. Dabei werden wir ergründen auf welchen Prinzipien die Geräte basieren und wie diese programmiert werden können.

- Wie funktioniert ein Computer wie z. B. mein Smartphone?
- Was sind die technischen Grundlagen für die Vielzahl von Informationen auf dem Web?

Als weiteres wollen wir verstehen, wie sich Informationssysteme auf unser wirtschaftliches Umfeld auswirken.

- Weshalb lohnt es sich in Computer zu investieren?
- Welchen Mehrwert leisten diese für eine Firma?
- Wie, wo, und mit welcher Zielsetzung werden und sollen Computer demnach in Firmen und Organisationen eingesetzt werden?
- Warum haben Supermarktketten und Warenhäuser moderne Scannerkassen eingeführt?
- Welche Besonderheiten haben Digitale Güter -- also Produkte, die nur aus einer Ansammlung von Daten bestehen, wie Musik, Filme, oder Software -- und wie wirken sich diese auf deren Handel aus?

Target Groups:

Für Assessmentstufe Bachelor Inf und Oec sowie entsprechende Nebenfachstudierende.

Languages of Instruction:

Deutsch

Course Materials:

Skript

Merkmale:

Responsible instructor:

Abraham Bernstein

Requirements:

Assessment:

Bestehen der Übungen (d.h., Erreichen von 50% der Gesamtpunktzahl aller Übungen) sowie der Abschlussprüfung. Für ein erfolgreiches Bestehen des Moduls müssen zwingend sowohl die Übungen, als auch die Abschlussprüfung bestanden werden. Die Endnote ergibt sich aus dem Ergebnis der

Abschlussprüfung.

Prüfungsrelevant sind alle in der Vorlesung angegebenen Inhalte, insbesondere die Vorlesung selbst, das Skript, die assoziierten Filme, sowie allfällig angegebene weitere Literatur. Eine genaue Spezifikation findet sich im Syllabus.

Die Prüfung zum Modul findet vor Ort als schriftliche Prüfung auf Papier an der "Messe Zürich" in Oerlikon statt. Angaben zu Ort und Zeit finden Sie hier: <https://www.oec.uzh.ch/de/studies/exams/dates/assessment.html>

Module Informatics I (L+E)

03SM22AINF02 / Lecture with Practical Exercises

Description:

General description:

The lecture gives an introduction to programming. The students learn to use the computer as a tool for creating software. Based on the programming language "Python", basic concepts in programming, such as variable assignment, control structures, classes and objects, as well as advanced subjects such as inheritance and polymorphism are taught.

The theoretical concepts taught in the lecture are augmented with numerous examples, demonstrating the practical application of the presented concepts.

The students also receive regular assignments to practice writing programs individually throughout the semester.

ECTS: 6

Notes:

See the course website: www.ifi.uzh.ch/seal/teaching/courses/info1.html (<https://www.ifi.uzh.ch/en/seal/teaching/courses/info1.html>)

Learning Outcome:

By successful participation, the students obtain competence in the following areas:

- * Analyzing problem statements towards writing software
- * Designing programs and algorithms
- * Writing software
- * Basic concepts of hard- and software

Target Groups:

Bachelor's students in informatics

Languages of Instruction:

The primary lecture language is English. All materials (slides, exercises, and exams) are in English.

Course Materials:

Check the course page (<http://www.ifi.uzh.ch/seal/teaching/courses/info1.html>) and the associated OLAT course (Link on the course page above) for more information about how the course is conducted and to obtain the materials used in the lecture and exercises.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Harald Gall

Requirements:

Prior Knowledge:

Basical mathematics knowledge from the general qualification for university entrance (Matura) and a firm grasp of using a computer running a common operating system (MacOS, Linux or Windows) are required. No pre-existing programming skills are expected.

Assessment:

There are two exams: a midterm exam (Monday, 02.11.2026 between 18:15 -20:00) and a final exam (Tuesday, 15.12.2026 between 18:15 and 20:15).

<https://www.oec.uzh.ch/en/studies/exams/dates/assessment.html>

Both are electronic exams, conducted on-site, as "Bring Your Own Device" (BYOD).

For BYOD, you must bring your own laptop (Linux, Windows or macOS), with all necessary software installed and restrictions implemented, as outlined in the lecture. The exam cannot be taken on tablets. Digital exam supervision (proctoring) is possible and is agreed upon booking the module.

Students who pass the final exam will be granted a 0.25 bonus on their final grade if they achieved at least 75% of points in the midterm exam. Attending the midterm exam is mandatory.

After the final exam is corrected, students may voluntarily submit very minor corrections via OLAT to lessen the impact of catastrophic mistakes in their exam. This correction phase will last from January 7th until January 12th, 2027 and will be explained in the lecture.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Mikroökonomik für Informatikstudierende (V+Ü) (Microeconomics for Informatics)

03SM22AINF03 / Lecture with Practical Exercises

Description:

General description:

Mikroökonomik für Informatikstudierende ist eine grundlegende Einführungsveranstaltung der Assessmentstufe für die Studienrichtung Informatik.

ECTS: 6

Notes:

Die Veranstaltung findet zusammen mit dem Modul Mikroökonomik I(AOEC03) statt. Angaben zu den Räumlichkeiten finden Sie dort.

Vorlesung und Übungen werden nicht aufgezeichnet / kein podcast.

Bitte schreiben Sie sich in den OLAT Kurs AOEC03 Mikroökonomik I (Tab Einschreibung Informatiker) ein, um Zugang zu allen Unterlagen zu erhalten.

Bei organisatorischen Fragen schreiben Sie bitte ein Mail an:
teaching@econ.uzh.ch.

Mails an den Dozierenden werden nicht beantwortet.

Learning Outcome:

Die ökonomische Denkweise kennenlernen und auf gesellschaftliche und wirtschaftliche Fragen anwenden.

Detaillierte Lernziele finden Sie im OLAT Selbstlernbereich.

Target Groups:

Studierende der Assessmentstufe.

Languages of Instruction:

Deutsch

Course Materials:

Pflichtlektüre: Robert H. Frank, Microeconomics and Behavior, McGraw-Hill.

Weitere Vorlesungsunterlagen finden Sie zum Semesterstart auf OLAT (im AOEC03 Kurs Mikroökonomik I).

Merkmale:

Responsible instructor:

Ulf Zölitz

Requirements:

Assessment:

Die Prüfung zum Modul findet vor Ort als schriftliche Prüfung auf Papier an der "Messe Zürich" in Oerlikon statt. Angaben zu Ort und Zeit finden Sie hier: <https://www.oec.uzh.ch/de/studies/exams/dates/assessment.html>

Grading Scale:

1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: Gesamte Vorlesung findet zusammen und zeitgleich mit AOEC03 Mikroökonomik I statt (allerdings nur bis zum 13.11.2026).

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Organisation: Institut für Volkswirtschaftslehre

Module People-Oriented Computing (L+E)

03SM22AINF04 / Lecture with Practical Exercises

Description:

General description:

Developments in technology have had a profound impact on people and the world in which we live, work, and interact. These developments are simultaneously enabling and challenging, and the co-evolution of computing and people's use of it has led to important issues for the design, development, adoption of technology, as well as the understanding of its impact on how we live.

This course provides an introduction to human-oriented aspects of computing, and serves as a foundation for further study in people-oriented computing. Fundamental human issues of technology will be covered at the level of individuals, groups, organizations, and society.

The course will provide a general introduction to key areas in people-oriented computing, and also touch upon relevant topics such as roles and potential careers in computing, methods and approaches employed in these areas, and future directions for technology.

ECTS: 6

Notes:

Materials and assignments will be distributed and collected via OLAT.

Learning Outcome:

Students should gain familiarity with various topics related to people-oriented computing, including important challenges and questions relating to computing at the human, group, organizational, and societal levels. They should have an understanding of connections between technological and human issues.

Target Groups:

BSc students in the first semester of study

Languages of Instruction:

English and German

Course Materials:

Materials and assignments will be distributed and collected via OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Elaine May Huang

Requirements:

Prior Knowledge:

As course materials and the exam will be primarily in English; students should have a good command of spoken and written English.

Assessment:

Performance in the course will be assessed based on a final examination (60%) as well as two project assignments (20% each). Students must pass the exam in order to pass the course.

The exercises and assignments will help students to develop collaborative problem-solving skills. The final exam will cover the entirety of the material covered in the course.

The examination of the module will take place onsite as written "paper and pencil" exam at "Messe Zürich" in Oerlikon. Details about the location and time can be found here: <https://www.oec.uzh.ch/de/studies/exams/dates/assessment.html>

Module Betriebswirtschaftslehre I (V + Ü) (Business Administration I)

03SM22AOEC01 / Lecture with Practical Exercises

Description:

General description:

Das Studienmodul BWL I besteht aus zwei Teilen:

Der Vorlesungsteil "Grundlagen des Managements" (Prof. Dr. A. G. Scherer) führt in wesentliche Fragestellungen des Managements, der Managementwissenschaften und deren wissenschaftstheoretische Grundlagen ein. Begleitend findet hierzu die Übung "Gründungsmanagement" statt, welche die Herausforderungen des Managements am Beispiel des Gründungsprozesses eines jungen Unternehmens veranschaulicht.

Der Vorlesungsteil "Grundlagen des Marketing" (Prof. Dr. M. Natter) führt in Grundzüge des Marketing ein, befasst sich mit der Entwicklung des Thema Marketings, der Marktforschung, den vier Marketinginstrumenten sowie dem Marketing-Management. Begleitend dazu findet eine Übung zu den behandelten Marketingthemen statt.

ECTS: 3

Notes:

Dieses Modul findet vor Ort und online (Podcast, Livestream SWITCH) statt.

Die Übungsgruppen finden vor Ort statt, wobei die erste Übungsgruppe (Di, 08:00 - 09.45 Uhr) aufgezeichnet wird und als Podcast auf OLAT abrufbar ist.

Die Prüfung findet onsite in der Messe Oerlikon statt.

Nähere Angaben zur Prüfung und zum Durchführungstermin finden Sie unter:
<https://www.oec.uzh.ch/de/assessment>

Siehe Websites der beteiligten Lehrstühle:

* Grundlagen des Managements (Prof. Dr. Scherer):

<https://www.business.uzh.ch/de/professorships/as/teaching/overview.html>

* Grundlagen des Marketing (Prof. Dr. Natter):

<https://www.business.uzh.ch/en/professorships/marketing2.html>

Learning Outcome:

Das erfolgreiche Absolvieren dieses Studienmoduls versetzt Sie in die Lage:

1. Herausforderungen des Managements mit Hilfe managementwissenschaftlicher Theorien zu erfassen.
2. Managementwissenschaftliche Theorien auf Basis ihrer wissenschaftstheoretischen Position zu hinterfragen.
3. Den Gründungsmanagementprozess in dessen spezifischen Managementherausforderungen zu verstehen.
4. Die Denkweise und Aufgaben des Marketing in seinen Grundzügen nachzuvollziehen.
5. Die Methoden der Datengewinnung zu verstehen.
6. Die wesentlichen Marketinginstrumente zu kennen und anzuwenden.

Languages of Instruction:

Deutsch

Course Materials:

Die Unterlagen werden auf OLAT bereitgestellt.

Siehe auch Websites der beteiligten Lehrstühle:

* Grundlagen des Managements (Prof. Dr. Scherer): <https://www.business.uzh.ch/de/professorships/as/teaching/overview.html>

* Grundlagen des Marketing (Prof. Dr. Natter): <https://www.business.uzh.ch/en/professorships/marketing2.html>

Merkmale:

Responsible instructor: Andreas Scherer

Requirements:

Assessment: Leistungsüberprüfung durch schriftliche Klausur für den Teil Management (50%) und für den Teil Marketing (40%) sowie Zwischentests während des Semesters für den Teil Marketing (10%).

Die Prüfung zum Modul findet vor Ort als schriftliche Prüfung auf Papier an der "Messe Zürich" in Oerlikon statt. Angaben zu Ort und Zeit finden Sie hier: <https://www.oec.uzh.ch/de/studies/exams/dates/assessment.html>

Module Mikroökonomik I (V+Ü) (Microeconomics I)

03SM22AOEC03 / Lecture with Practical Exercises

Description:

General description:

Mikroökonomik I ist eine grundlegende Einführungsveranstaltung der Assessmentstufe für alle wirtschaftswissenschaftlichen Studienrichtungen (VWL, BWL, B&F).

ECTS: 9

Notes:

Vorlesung und Übungen werden nicht aufgezeichnet/kein Podcast.

Bei organisatorischen Fragen schreiben Sie bitte ein Mail an: teaching@econ.uzh.ch. Mails an den Dozierenden werden nicht beantwortet.

Learning Outcome:

Die ökonomische Denkweise kennenlernen und auf gesellschaftliche und wirtschaftliche Fragen anwenden.

Detaillierte Lernziele finden Sie im OLAT Selbstlernbereich.

Target Groups:

Studierende der Assessmentstufe.

Languages of Instruction:

Deutsch

Course Materials:

Pflichtlektüre: Robert H. Frank and Edward Cartwright, Microeconomics and Behaviour, McGraw- Hill.

Weitere Vorlesungsunterlagen finden Sie zum Semesterstart auf OLAT.

Merkmale:

Responsible instructor:

Ulf Zölitz

Requirements:

Module Mathematik I (V+Ü) (Mathematics I)

03SM22AOEC04 / Course

Description:

General description:

Mengen, Folgen, Funktionen, Grenzwerte, Stetigkeit, Differentialrechnung, Eigenschaften reeller Funktionen, Bestimmung lokaler und globaler Extrema reeller Funktion, Integralrechnung.

Weitere Details:

<https://www.business.uzh.ch/de/professorships/math/lehre/adds.html>

ECTS: 6

Notes:

Vorlesung und Übungen finden vor Ort statt. Zusätzlich werden Podcasts angeboten.

Aus administrativen Gründen müssen Sie sich über das Vorlesungsverzeichnis für eine Mathematik-Übung einschreiben, die definitive Gruppenzuteilung in die Mathematik-Übungen erfolgt allerdings erst zum Vorlesungsbeginn in der ersten Veranstaltungswoche. Genauere Informationen erhalten Sie in der ersten Vorlesung.

Übungsleiter der Mathematik-Übungen ist Simon Laumer. Die Übungen werden von diversen TutorInnen unterstützt.

Learning Outcome:

Vermittlung mathematischer Grundlagen für die Wirtschaftswissenschaften und Informatik.

Target Groups:

Assessmentstudierende Bachelor of Arts und Bachelor of Science

Languages of Instruction:

Deutsch

Course Materials:

siehe OLAT bzw. Moodle-Kurs Mathematik I

Merkmale:

Responsible instructor:

Christiane Barz

Requirements:

Prior Knowledge:

Maturastoff in Mathematik

Assessment:

Die Prüfung zum Modul findet vor Ort als schriftliche Prüfung auf Papier an der "Messe Zürich" in Oerlikon statt. Angaben zu Ort und Zeit finden Sie hier: <https://www.oec.uzh.ch/de/studies/exams/dates/assessment.html>

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Finance I (L+E)

03SM22AOEC05 / Lecture with Practical Exercises

Description:

General description:

Diese Vorlesung ist eine Einführung in die Finance und soll den Studierenden grundlegende Kenntnisse und Fähigkeiten in diesem Bereich vermitteln und auf die nachfolgenden Veranstaltungen im Bachelorstudium in Finance vorbereiten. Der Kurs gliedert sich in unterschiedliche Themenbereiche: Behandelt werden verschiedene Verfahren der Investitionsrechnung sowie die Grundlagen der Unternehmensfinanzierung und der Unternehmensbewertung. Zudem wird aufgezeigt, wie Banken und Versicherungen funktionieren und erläutert, welche Aufgaben Banken und Versicherungen in einer Volkswirtschaft übernehmen. Auch wird auf die Regulierung von Banken und Versicherung eingegangen.

ECTS: 3

Notes:

Bei Fragen zum Modul wenden Sie sich bitte an assessment@df.uzh.ch.

Bis zum HS26 wurde dieses Modul unter dem Namen "Banking and Finance I" geführt.

Learning Outcome:

- * Verständnis der Grundlagen in Finance
- * Kenntnis der Konzepte für Investitionsentscheidungen sowie Unternehmensfinanzierung
- * Verständnis der Funktionsweise von Banken sowie Versicherungen

Target Groups:

Erstsemestrige

Languages of Instruction:

Deutsch

Course Materials:

Die Unterrichtsmaterialien (inkl. Skript) werden auf OLAT bereitgestellt.

Merkmale:

Responsible instructor:

Pablo Koch Medina

Requirements:

Assessment:

Abgabe und Bestehen von Einzelaufgaben in Excel sowie der Abschlussprüfung. Die Prüfung zum Modul findet vor Ort als schriftliche Prüfung auf Papier an der "Messe Zürich" in Oerlikon statt. Angaben zu Ort und Zeit finden Sie hier: <https://www.oec.uzh.ch/de/studies/exams/dates/assessment.html>
Keine Nachprüfung möglich.

Module Foundations of Computing II (L+E)

03SM22BI0001 / Lecture with Practical Exercises

Description:

General description:

Required second-year course covering topics from discrete math and formal methods building the foundations of computing. The material of this course is pervasive in the areas of algorithms, data structures and programming but appears virtually in all areas of computer science as well. The course will cover topics such as, but not limited to, proof methods, formal languages, deterministic and nondeterministic finite automata, grammars and pushdown automata, Turing machines, computability, decidability and complexity, P and NP, NP-completeness.

ECTS: 6

Learning Outcome:

The goal of the course is to familiarize the student with formal methods of computing and their value for computer science and related disciplines, and to provide basic training in applying formal methods to many different kinds of problems. Students should learn the fundamental limits of computation and extend their knowledge on formal languages as well as on formal programming models. Principles of interference, deduction, induction and contradiction should regularly be applied to demonstrate the formal correctness of models and limits.

Target Groups:

Recommended for students in BSc from 3rd semester and also for students in NF from 3rd semester.

Languages of Instruction:

English

Course Materials:

Automata Theory, Languages and Computation, 3rd Edition. John E. Hopcroft, Rajeev Motwani, Jeffrey D. Ullman. Addison Wesley.

Additional material (not obligatory): Theoretical Computer Science: Introduction to Automata, Computability, Complexity, Algorithmics, Randomization, Communication, and Cryptography. Juraj Hromkovic. Springer.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Dan Olteanu

Requirements:

Prior Knowledge:

It is recommended that students take the module "Foundations of Computing I" offered each Spring term, before taking this module.

Assessment:

There will be mandatory in-class exercises and a mandatory written final exam.

To pass the module, students must pass the in-class exercises and the final exam.

The final exam of the module will take place onsite on Friday, 8.1.2027, 14:15 - 17:15. The exam itself will take 2 hours and 30 minutes.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Numerical Methods in Informatics (L+E)

03SM22BI0003 / Lecture with Practical Exercises

Description:

General description:

The course presents the basic numerical and linear algebra techniques to solve mathematical problems that arise in computer science. The topics cover a wide range such as e.g.: basic concepts of scientific programming, solution of systems of linear equations and of nonlinear equations; interpolation and least-square approximation of data and functions; eigenvalues and eigenvectors computation; integration and differentiation and numerical optimization. The course consists of lectures, exercises and homework assignments.

ECTS: 6

Notes:

Every student is required to install and work with Python and use additional required packages on her or his personal computer for this course as instructed (support instructions will be communicated via OLAT).

Learning Outcome:

By the end of the course, the students will be able to identify a suitable method to solve basic problems of scientific computing, understand the main implications of the method and implement it directly or apply it using existing libraries. The students will learn how to solve such problems and to implement required algorithms and solutions in Python. The course will provide to the students the basis to understand more complex numerical tools that they may encounter in future courses or in their professional career.

Languages of Instruction:

English

Course Materials:

Lecture slides as well as exercises will be made available and distributed via OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Renato Pajarola

Requirements:

Prior Knowledge:

Introductory university level math courses (such as Math I and II), as well as a good experience in programming (i.e. using Python) and knowledge of basic data structures and algorithms.

Assessment:

To complete and pass this course, the participation and completion of several paper and online exercises, as well as in-class quizzes is required. A minimum level of exercises completion is required to pass the class. In-class live quizzes allow you to earn points counting towards the final grade. The grade is determined primarily by the written final exam, and partially by the exercises and quizzes scores, given the necessary exercises have been completed as required.

The examination of the module will take place onsite. Written examination on Thursday, 7 January 2027 from 14 - 16h.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Software Construction (L+E)

03SM22BI0004 / Lecture with Practical Exercises

Description:

General description:

Knowing how to program does not make a student a software designer. The next step involves learning and practicing the fundamental principles and techniques for designing long-lived software systems. This course helps students learn software design by building examples of small versions of tools that programmers use every day. The course includes a practical component, highlighting the engineering skills needed to design robust software systems. Primarily, the course is taught using Python, with the final lectures introducing Java.

ECTS: 6

Notes:

The course consists of weekly lectures and laboratory sessions.

This module (as well as Software Engineering, Software Engineering Lab and Database Systems) is a prerequisite for admission to the mandatory internship (Informatik-Praktikum).

Learning Outcome:

As a result of this course, students will acquire:

A solid understanding of the principles and techniques of modern software design, including:

A.1 Concepts and issues of software quality and maintainability

A.2 Code as data

A.3 Object-oriented programming

A.4 Fundamental design patterns (recognized best practices of software architectures)

A.5 Fundamentals of software testing

A.6 Fundamentals of modern software engineering tools

B. Experience in collaborative tasks applying these principles and techniques

Languages of Instruction:

English

Course Materials:

- Wilson, Greg. Software Design by Example A Tool-Based Introduction with Python. Chapman & Hall, 2024. (freely available online at: <https://third-bit.com/sdxdpy/>)
- Lecture slides
- Provided supplementary material

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Alberto Bacchelli

Requirements:

Prerequisites:

Informatics I (or equivalent)

Assessment:

Assessment:
* Final exam: 70%

* Lab: 30%

The lab consists of several graded assignments and an optional interview that can be taken to achieve the highest possible lab grade.

To pass the course, students must receive a passing grade (4.0 or higher) for both the final exam and the lab.

If either component is below 4.0, the course is not passed. In that case, the final course grade will then be the highest component grade that is still below 4.0. For example:

* Exam: 3.5; Lab: 4.0 → Final grade: 3.5

* Exam: 3.5; Lab: 3.75 → Final grade: 3.75

The examination of the module will take place onsite as written "paper and pencil" exam at "Messe Zürich" in Oerlikon. Details about the location and time can be found here: <https://www.oec.uzh.ch/de/studies/exams/dates/assessment.html>

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module Wirtschaftsinformatik II (V+Ü) (Business Informatics II)

03SM22BI0005 / Lecture with Practical Exercises

Description:

General description:

- Die Vorlesung behandelt Prozessmanagement und ERP Systeme. Sie hat folgenden Aufbau: Einführung in die Lehrveranstaltung
- Prozesse
- Business Process Model and Notation (BPMN)
- Strategisches Prozessmanagement
- Ist/Soll-Modellierung
- Implementierung
- Process Mining
- Enterprise Resource Planning (ERP)
- Organisatorische Implementierung
- Die begleitenden Übungen behandeln das Modellieren von BPMN, die Ist/Sollmodellierung, die Implementierung mit einer Process Engine sowie die Nutzung von ERPSim. Projektaufgabe.

ECTS: 6

Notes:

- Dieses Modul findet vor Ort und online (Podcast) statt. Wir werden die Vorlesungen in MS Teams oder Zoom übertragen und aufzeichnen.
- Gewisse Übungsleistungen können nur bei Anwesenheit vor Ort und nicht online erbracht werden.
- In der Vorlesung wird das ERP-SIM-Spiel zu Lernzwecken gespielt. Jeder Studierende muss einen Kostenanteil von ca. 40 Franken für seinen persönlichen Zugang übernehmen.

Learning Outcome:

Lernziel 1: Betrieblich Prozesse analysieren, modellieren, implementieren und managen können.

Lernziel 2: ERP Systeme nutzen und implementieren können. (ERP = Enterprise Ressource Planning)

Target Groups:

Hauptfach-Studierende der Wirtschaftsinformatik Hauptfach-Studierende anderer Informatikstudiengänge (Wahlbereich) OEC-Nebenfach-Studierende der Wirtschaftsinformatik OEC-Nebenfach-Studierende Informatik (Wahlbereich)

Languages of Instruction:

Deutsch; Hintergrundliteratur und Software kann auf Englisch sein

Course Materials:

1. Folien, Übungsblätter
2. Skript mit Literatur
3. Modellierungstools
4. Umgebungen zur Implementierung von Prozessen in ERP-Systemen und Process Engines
5. ERP-Simulationsspiel ERP-Sim

Merkmale:

Responsible instructor: Gerhard Schwabe

Requirements:

Prior Knowledge:

Die Teilnehmer müssen Kenntnisse folgender Vorlesungen haben:

1. "Informatik und Wirtschaft"
2. "Informatics I"

Die Teilnehmer sollten Kenntnisse haben von: "Business Informatics I"

Assessment:

- Hausaufgaben, Übungsleistungen vor Ort (33,33333%)

- Abschlussklausur (66,66666%)

Die genauen Regeln zu den Hausaufgaben und Übungsleistungen vor Ort werden zu Semesterbeginn bekanntgegeben.

Die schriftliche Prüfung zum Modul findet am 15.1.27, 10-12 Uhr vor Ort statt.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Computer Networks and Distributed Systems (L+E)

03SM22BI0006 / Lecture with Practical Exercises

Description:

General description:

The Information and Communications Technology (ICT) age has arrived within our daily life, not only during work and business hours, but at a good deal of entertainment and social interactions, too. Thus, the society has to cope with such

developments of digitization. Many of those human-centric statements only refer to or try to analyze the impact of these changes and the society. However, in very many cases the fundamentals to derive reliable, correct, and transparent conclusions requires a detailed know-how of Communication Networks and Distributed Systems (CNDS). Therefore, once stand-alone systems are discussed, their interconnection across physical boundaries of an office or building site forms the major development of the ICT society. While fundamental communication architectures did introduce communications by technical means, achieved over the past 100 years, the development of telephone communications to today's Internet will be covered. Protocols, reliable, unreliable, and secure services, algorithms for finding the corresponding receiver, routing, and basic mechanisms for Internet operations will form this lecture's part one.

Furthermore, once stand-alone systems have been interconnected, they constitute Distributed Systems, which form a collection of independent computers that appear to their users as a single coherent system, embedding hardware, within which all machines are fully autonomous, and software, for which users think they deal with a single system. Thus, basic theory and techniques of Distributed Systems are covered in this lecture's part two. Driven by an introduction, naming principles and distributed file systems are outlined. To ensure an application-driven interoperability, approaches for synchronization and coordination are discussed. Examples of Distributed Systems in use are overviewed. Finally, part three will overview the role of security in Computer Networks and Distributed Systems concludes this class.

ECTS: 6

Learning Outcome:

Students will receive the required insights into basic foundations on Communication Networks and Distributed Systems. More specifically, the lecture will teach communication architectures, network building blocks, shared links, packet switching, end-to-end protocols, selected Internet applications, naming principles, distributed file systems synchronization, coordination, and basic security elements as well as mechanisms. Overall, students will be able to understand which communication systems exist, how Internet-based systems operate world-wide, which communications can be reliable, how the basic inter-operations of Distributed Systems work, and which ones may be secured.

Target Groups:

Informatics Bachelor students from 3rd semester onwards.

Languages of Instruction:

English

Course Materials:

Books as well as lecture slides can be found on the lecture's Web site, which is part of the CSG's teaching material's collection at <https://www.csg.uzh.ch/csg/en/teaching.html>.

Merkmale:

Target Group: Suitable for English Speakers

Target Group: Open to School Students

Responsible instructor:

Burkhard Stiller

Requirements:

Prior Knowledge:

The lecture "Communication Networks and Distributed Systems CNDS" runs as a

basic course on basically no specific technical requirements, however, basic mathematical and programming language skills do certainly help.

Assessment: Sufficient and successful completion of exercises during the semester.

The examination of the module will take place onsite. Final written exam on 7.1.2027, 8 - 10h

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Module Seminar: Internet Economics (BSc)

03SM22BIS001 / Seminar

Description:

General description:

The content of this seminar will address current topics and questions on Internet Economics - covering technical and economic aspects, always in an inherent manner. The dedicated topics will be announced during the kick-off meeting for all people interested. They will most likely include communications, blockchains, incentives, security, and decentralized systems aspects.

ECTS: 3

Notes:

Each student will receive one topic. The language is English.

The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>.

Application for this seminar is via the new module booking tool :<https://studentservices.uzh.ch/uzh/launchpad>

Learning Outcome:

This seminar addresses the integration of technical and economic aspects into homogeneous overall systems and its application in today's economy. This determines the key goal. In terms of a seminar and didactic school, the seminar report, presentation, and discussion determines the second goal. Thus, all these three areas will be guided by a local supervisor, which will result in a basic and small research work. The final marking of this seminar will embrace a pre-step on scientific work and research documentations. Content (technology and economics) and its homogeneous integration are of importance.

Target Groups:

Studies in BSc (term 5 and 6)

Languages of Instruction:

English

Course Materials:

Literature will be offered as a kick-start within the kick-off meeting, further literature study is a must! Depending on the number of interested students, the seminar will be run as one person/one report and presentation manner or with a two persons/ one report and presentation manner.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Burkhard Stiller

Requirements:

Prior Knowledge:

The knowledge of communications (Internet, telecommunications) is important, and a basic economic background would be very good, but not essential.

Assessment:

A talk and presentation of 45 min by utilizing slides on-site will be followed by a 45 min moderated discussion with theses and questions posed to the seminar audience. These tasks have to be complemented by a written, complete report (publishable quality), including bibliographic references, by utilizing a mandatory

LaTeX report template. More details will be available on the seminar's Web page, which can be found as a sub-directory of <https://www.csg.uzh.ch/csg/en/teaching.html>.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Request period: from Mi 12.08.2026 10:00 to So 30.08.2026 24:00

Place allocation at the latest: Di 08.09.2026 23:59

Module Seminar: Software Developer Experience (BSc)

03SM22BIS004 / Seminar

Description:

General description:

The global demand for software continues to exceed our capacity to produce it. Enhancing software development productivity is key to meeting this challenge.

This seminar explores selected topics in Software Engineering, with a particular focus on the human aspects of software development. We will examine factors that influence developer productivity and experience, the impact of generative AI, challenges related to task context switching, and strategies for effective communication and coordination in software teams.

In this seminar, students will gain a deeper understanding of how to optimize software development processes and improve team dynamics, in addition to designing studies for software engineering research.

ECTS: 3

Notes:

The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>.

Application for this seminar is via the new module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>

Learning Outcome:

At the end of the seminar, students should:

- Have gained a deeper and broader understanding and knowledge of Software Engineering research by reading, analyzing, reflecting, and discussing current and classic literature;
- be able to discuss study methods common in software engineering research, as well as develop a suitable research question given a hypothesis and study method;
- be able to identify and discuss research problems and questions as well as identify relevant related work;
- be able to write a research proposal in the form of a scientific report.

Target Groups:

Students in their bachelor's program, from fourth semester on.

Languages of Instruction:

English

Course Materials:

The course materials will consist of current and seminal research papers in the field of software engineering research.

The list will be put on the web page of the course and announced in the first meeting, but is subject to change.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Thomas Fritz

Requirements:

Prior Knowledge:

Content of Software Engineering and Programming.

Assessment:

This seminar-style course is a project- and paper-based. The research proposal is the primary deliverable at the end of the course.

To pass this course, you must pass the research proposal (obtain at least 50%) and must obtain a 50% overall mark that is based on the following:

- Active Participation: including active reading of selected papers, writing brief responses or giving presentations, as well as discussing the papers and taking part in class activities

- Research Proposal: including continuous progress, meetings, write-ups (including draft and final proposal), and presentation.

Details on the deliverables will be provided on the course website as well as presented in the kick-off.

Attendance is mandatory at all events.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Requirements Engineering I (L+E)

03SM22BMI003 / Lecture with Practical Exercises

Description:

General description:

Specifying requirements is a crucial prerequisite for successful software development.

This course gives an introduction to the principles, practices, languages, methods, processes, and tools for specifying and managing requirements.

ECTS: 3

Notes:

This module can be credited towards either the Bachelor's or the Master's level. (Please note that this module can be credited towards a degree only once.) A failed attempt will be credited towards the level at which the student is enrolled at that time.

Learning Outcome:

The students acquire basic knowledge, understanding and skills in the core principles, practices, languages, methods, and processes of Requirements Engineering.

Target Groups:

Recommended for BSc students enrolled in the BSc in Informatics program (all concentrations, usually in the 5th semester). Students with concentration in software systems are strongly advised to take this course.

MSc students enrolled in the MSc in Informatics program (all concentrations).

Students with concentration in software systems should take this course unless they have passed this course or a similar one during their undergraduate studies.

Languages of Instruction:

English

Course Materials:

Lecture notes; required and/or additional reading will be announced in the lectures.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Thomas Fritz

Requirements:

Prerequisites:

Basic knowledge of software development and modeling. Having taken a course in Software Engineering or read a SE textbook is strongly recommended. Students enrolled in the BSc in Informatics program must have passed the assessment level successfully.

Prior Knowledge:

Basic knowledge of software development and modeling.

Assessment:

Successful completion of two homework assignments and written exam passed.

The written exam will take place onsite on Monday, 11 January 2027 10am.

In case of only few participants, the written exam will be replaced by oral exams (with individual exam dates). For details, see the course website.

Grading Scale:

1-6 Quarter Grades Given

Module Einführung in das wissenschaftliche Arbeiten (Ü) (Introduction to research and scientific writing)
03SM22BO0004 / Exercise Group

Description:

General description:

Erarbeitung der theoretischen Grundlagen des wissenschaftlichen Arbeitens mittels E-Learning im Selbststudium;
Praktische Anwendung anhand verschiedener Übungsaufgaben und Besprechung im Rahmen der Übungen.

ECTS: 3

Notes:

ACHTUNG: Für dieses Modul gelten spezielle Einschreibefristen! Sie können vom Start der Modulbuchung am 12.8.2026 10:00 bis am Dienstag 15.09.2026 24:00, direkt im Modulbuchungstool ihre Präferenzen für die Übungsgruppen angeben.

Die definitive Zuteilung in eine Übungsgruppe findet am Mittwoch, 16.09.2026 statt und Sie erhalten eine Mitteilung per E-Mail mit der Zuteilung.

Die Nachrückfrist endet am 18.09.2026 um 23:59.

Die Stornofrist endet am 22.09.2026 um 23:59.

Danach endet die Modulbuchungsfrist für dieses Modul und es kann nur in begründeten Ausnahme- und Härtefällen und auf Antrag überprüft werden, ob noch eine nachträgliche Einschreibung, Umschreibung oder Zwangszuteilung auf eine Übungsgruppe möglich ist.

BITTE BEACHTEN: Sie müssen zwingend bis zum 15.9.2026 ihre Auswahl getroffen haben. Bei der Zuteilung werden Ihre Präferenzen berücksichtigt.

Bei organisatorischen Fragen schreiben Sie bitte ein Mail an: ewa@econ.uzh.ch.

Learning Outcome:

- Essentielle Grundlagen wissenschaftlichen Arbeitens verstehen und auf eigene Arbeiten anwenden können
- Studierende können insbesondere...
- ... die Bedeutung wissenschaftlichen Arbeitens sowie grundlegender Forschungsethik und akademischer Integrität erklären.
- ... wissenschaftliche Forschungsfragen entwickeln und das geeignete methodische Vorgehen für die Beantwortung der Forschungsfrage bestimmen
- ... qualitative und quantitative Forschungsmethoden verstehen
- ... Recherche-Tools und -Methoden nutzen, um relevante Literatur und Daten zu finden, und verschiedene Zitierstile korrekt anwenden.
- ... generative KI in der Forschung einsetzen, ethische Überlegungen ansprechen und inklusive Prompts erstellen.
- ... ein vollständiges wissenschaftliches Paper von der Einleitung bis zur Schlussfolgerung erstellen

Target Groups:

Studierende der Bachelorstufe im 3. Semester

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Dina Pomeranz

Requirements:

Prerequisites:

Zulassung zur Aufbaustufe

Assessment:

Der Kurs wird mit "Bestanden/Nicht Bestanden" bewertet. Die Leistungsbeurteilung setzt sich aus dem eigenständigen Lösen praktischer Aufgaben (40%), dem Lösen von Aufgaben während der Übungen (40%) und der Anwesenheit und Mitarbeit in den Übungen (20%) zusammen.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Module Corporate Finance (L+E)

03SM22BO0008 / Lecture with Practical Exercises

Description:

General description:

Grundlagen der Corporate Finance (Finanzierung und Investition) mit Schwergewicht auf den Themen Bewertung (DCF-Methode), Risiko, Capital Asset Pricing Model, Kapitalbeschaffung, Kapitalstruktur und Dividendenpolitik.

ECTS: 6

Notes:

Bei Fragen wenden Sie sich an: cf1@df.uzh.ch.

Die Vorlesung findet als Präsenzveranstaltung statt. Die Präsenzveranstaltung kann alternativ zur Vorlesungszeit als Live Stream oder aber als Podcast asynchron online verfolgt werden.

Learning Outcome:

Die Studierenden beherrschen die Grundlagen der Corporate Finance und haben eine solide E-Learning-Kompetenz erarbeitet.

Target Groups:

BA (Core Course)

Languages of Instruction:

Deutsch

Course Materials:

Die Unterrichtsmaterialien (inkl. Skript) werden auf OLAT bereitgestellt.

Weiterführende Literatur: R. Volkart und A. Wagner: Corporate Finance, Versus Verlag, Zürich, aktuelle Auflage.

Merkmale:

Responsible instructor:

Stefan Zeisberger

Requirements:

Prior Knowledge:

Assessmentstufe

Assessment:

Bestehen der Gruppenübungen sowie der schriftlichen Prüfung am Donnerstag, 14. Januar 2027, 16:00-20:00 Uhr. Die Prüfung findet als Bring Your

Own Device (BYOD) Onlineprüfung vor Ort statt. Um die Prüfung absolvieren zu können, müssen Sie Ihren eigenen Laptop (Windows oder MacOS) mitbringen. Die Prüfung kann nicht auf Tablets absolviert werden. Ausserdem ist eine Online-Prüfungsaufsicht (Proctoring) möglich und wird mit Buchung des Moduls zugestimmt. Für die Teilnahme an der Prüfung muss eine Probeproofung mit Ihrer individuellen technischen Ausrüstung absolviert werden. Genaue Informationen zum Funktionstest und sonstigen Details erhalten Sie im Laufe des Semesters. Der Funktionstest findet im Verlauf des Semesters statt und die Teilnahme am Funktionstest ist freiwillig.

Module Banking and Insurance (VU)

03SM22BO0009 / Lecture with Practical Exercises

Description:

General description:

Der Kurs Banking and Insurance gibt Bachelorstudierenden eine fundierte Einführung ins Bank- und Versicherungsgeschäft. Dabei erhalten die Studierenden eine theoretisch fundierte Übersicht über das Bankgeschäft mit Fokus Kredit- und Hypothekengeschäft sowie Bankenregulierung. Die theoretischen Konzepte werden mit Praxisvorträgen und einer Bank-Simulation ergänzt. Im zweiten Teil wird auf den Versicherungsmarkt eingegangen und aufgezeigt, wie Versicherungen funktionieren sowie sie reguliert werden.

ECTS: 6

Notes:

Dieses Modul findet vor Ort und online (Podcast) statt.

Bei Fragen zum Modul wenden Sie sich bitte an banking@df.uzh.ch.

Bis zum HS26 wurde dieses Modul unter dem Namen "Banking" geführt.

Learning Outcome:

Zu Beginn des Kurses erhalten die Studierenden eine Einführung in die Grundlagen von Banken, Geld und Geldschöpfung. Anschliessend werden das Kredit- und Hypothekengeschäft, die Refinanzierung von Banken und das Risikomanagement behandelt. Ein weiteres zentrales Thema ist die Regulierung von Banken. Der Kurs deckt zudem theoretische Modelle ab, die die Existenz von Banken erklären oder ihre Anfälligkeit für Bank Runs aufzeigen. Im zweiten Teil des Kurses geht es um Versicherungen: Es werden die Funktionsweisen und Typen von Versicherungen, die Risiken, das Risikomanagement sowie das Asset- und Liability-Management behandelt.

Target Groups:

Bachelorstudierende

Languages of Instruction:

Deutsch

Course Materials:

Module Introduction to Operations Research (L+E)

03SM22BO0010 / Lecture with Practical Exercises

Description:

General description:

In business and technology settings, organizations often make decisions with limited resources, competing priorities, and complex constraints. This course introduces operations research as a practical toolkit for modeling, solving, and interpreting such decision problems. Students will learn to formulate optimization models and solve them using appropriate methods and software tools. Examples are drawn from areas such as supply chain management, logistics, scheduling, resource allocation, network design, and analytics-based decision-making. The course covers linear programming, including model formulation, the simplex method, duality, and sensitivity analysis, and introduces mixed-integer optimization, dynamic programming, and nonlinear programming. Excel Solver will be used for numerical examples, with optional Gurobi and Python materials provided for students interested in advanced computational tools.

ECTS: 6

Notes:

This module takes place on-site and online (podcast).

To take this class effectively, access to a computer is required.

Learning Outcome:

Students will learn to identify decision problems in business and technology contexts where quantitative tools can improve decision-making. They will develop an understanding of the main building blocks of quantitative decision models, including decision variables, objectives, constraints, and trade-offs. Students will also learn to formulate, solve, and analyze optimization models using spreadsheets and, where appropriate, more advanced software tools, and to interpret the results to support managerial decision-making.

Target Groups:

Bachelor students who completed the assessment.

Languages of Instruction:

English

Course Materials:

Course materials will be published on OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Target Group: Open to School Students

Responsible instructor:

Oleg Prokopyev

Requirements:

Prerequisites:

"Mathematik I" and "Mathematik II".

Prior Knowledge:

Content of "Mathematik I" and "Mathematik II", in particular matrix notation and systems of equations.

Assessment:

Written final exam. Written final exam (100%). Exam duration: 90 minutes. The exam is open book/open notes.

The exam of the module will take place as a Bring Your Own Device (BYOD) online exam on site on Tuesday, 05.01.2027 between 14:00 pm and 15:30 pm. To take the final exam, you must bring your own laptop with Excel installed.

Digital exam supervision (proctoring) is possible and is agreed upon booking the module.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Theorien der Multinationalen Unternehmung (S) (Theories of Multinational Corporation)

03SM22BO0059 / Seminar

Description:

General description:

Das Seminar beschäftigt sich mit den Theorien der Multinationalen Unternehmen (MNU) in einer globalisierten Wirtschaft. Aus einer interdisziplinären Sichtweise wird dabei die neue Verantwortung der Unternehmung im Prozess der Globalisierung beleuchtet. Die Globalisierung führt zu einer Verengung der Handlungsspielräume nationalstaatlicher Politik. Die wirtschaftlichen Austauschprozesse entweichen der Regelungsgewalt nationalstaatlicher Ordnungen.

Insbesondere die Multinationalen Unternehmen sind der nationalstaatlichen Rechtsordnung nicht mehr vollumfänglich unterworfen, sondern können unter alternativen Rahmenbedingungen nach ökonomischen Gesichtspunkten auswählen.

Diese Entwicklungen erfordern eine Neubestimmung der Rolle der multinationalen Unternehmung. Dabei werden in diesem Seminar u.a. Ansätze aus der Ökonomie, der Philosophie und der Politischen Theorie im Hinblick auf ein neues Verständnis des "Global Corporate Citizenship" und der "Corporate Social Responsibility" der MNU untersucht und kritisch diskutiert.

Der Kurs bietet einen Überblick über die grundlegenden Theorien der Unternehmung und deren Antworten auf die Herausforderungen der Globalisierung.

Die Teilnehmer lernen, sich mit den Theorien kritisch auseinanderzusetzen und über aktuelle Themen der Unternehmensverantwortung sowie der Globalisierung zu diskutieren.

Parallel dazu werden im Kurs Anleitungen und Hilfestellungen bereitgestellt, um Studierende bei ihrer oftmals ersten längeren Seminararbeit zu unterstützen.

Die Seminararbeiten bieten eine gute Vorbereitung für eine spätere Bachelorarbeit.

Sehen Sie für weitere Informationen bitte: <https://www.business.uzh.ch/de/research/professorships/as.html>

ECTS: 3

Notes:

Die Teilnehmerzahl ist auf 18 beschränkt.

Studierende reichen bitte eine aktuelle Leistungsübersicht ein. Bitte bewerben Sie sich für dieses Modul per E-Mail an renate.busstra@business.uzh.ch

Learning Outcome:

Das Phänomen der Globalisierung verstehen und erklären. Theorien der Unternehmung analysieren, vergleichen und in den Kontext der Globalisierung einordnen. Das Verhalten von Multinationalen Unternehmen erklären und bewerten.

Target Groups:

Studierende mit Interesse an Unternehmenstheorien, Unternehmensverantwortung und Fragen der Globalisierung. Die Veranstaltung vertieft Inhalte der Vorlesung "Globalisierung und Multinationale Unternehmen" von Prof. Scherer.

Languages of Instruction:

Deutsch

Course Materials:

Scherer, A.G. & Palazzo, G. (Eds.): Handbook of Research on Global Corporate Citizenship, Cheltenham (UK): Edward Elgar 2008.
Weitere Literatur wird zu Beginn des Semesters bereitgestellt.

Merkmale:

Module Finance with Excel (S)

03SM22BO0016 / Seminar

Description:

General description:

Individuelle Erarbeitung eines Excel-Tools für finanzwirtschaftliche Problemstellungen, Corporate Finance und Asset Management vor dem Blockseminar.

Während des Blockseminars werden Praxisfälle in Gruppen gelöst. Für Teilnahme am Seminar sind jedoch keine besonderen Informatikkenntnisse erforderlich.

ECTS: 3

Notes:

Dieses Modul findet in externen Seminarräumen statt.

Obligatorische Vorbesprechung findet statt am Dienstag, 14.04.2026, um 18.00 Uhr.

Bewerbung bereits im FS26 über den OLAT link. Den OLAT Link finden Sie

unter Links.

Learning Outcome:

Du kannst selbstständig ein Excel-Tool aufbauen, mit welchem spezifische Fragestellungen aus der Praxis der Finance gelöst werden können. Dadurch weisst du auch, wie die in den Vorlesungen "Corporate Finance" und "Asset Pricing" erworbenen theoretischen Kenntnisse im Praxisalltag mit Computerunterstützung umgesetzt werden können. Zudem lernst du in kurzer Zeit einen Case zu lösen, eine Präsentation zu erstellen sowie diese zu halten.

Target Groups:

Studierende im Bachelorstudium

Languages of Instruction:

Deutsch

Course Materials:

Die Literaturempfehlungen werden an den Vorbesprechung bekannt gegeben.

Merkmale:

Responsible instructor:

Alexander Wagner

Requirements:

Prerequisites:

Inhalt von Corporate Finance und Asset Pricing.

Assessment:

Seminararbeit und Präsentation; regelmässiger Seminarbesuch

Module Intermediate Corporate Finance (S)

03SM22BO0017 / Seminar

Description:

General description:

The course builds on Corporate Finance 1, in which students will have learnt the basic tools and concepts of corporate finance. The course introduces few new tools, but it applies the tools learnt in Corporate Finance I to a range of corporate finance problems (specifically, the analysis of financial statement data, project appraisal, valuation, capital structure, willingness to pay and hedging foreign exchange risk). These are studied in the context of real cases. An important aspect of the course is its attempt to open the (financial) 'black box' that is a firm to reveal the mechanism that measures and determines firm value, and to explain the workings of this mechanism and the interactions amongst its components.

ECTS: 3

Notes:

No pre-registration required for UZH students.

Exchange students are asked to submit their home institution transcripts.

Attendance is compulsory.

Learning Outcome:

The course is likely to be the last corporate finance course taken by students who choose to work after completing their Bachelor's studies.

Consequently, the goal of the course is to equip students with the knowledge and the skills they will need successfully to solve the corporate finance problems they may encounter in the early stages of their careers.

Target Groups:

Bachelor students.

Languages of Instruction:

English

Course Materials:

Notes and cases to be downloaded from OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Michel Habib

Requirements:

Prerequisites:

Bachelor course Corporate Finance (Prof. Alexander Wagner)

Prior Knowledge:

A good understanding of the basic tools (NPV, IRR, CAPM) and concepts (Cash Flows, Discount Rates) of corporate finance is required. These will have been taught in Corporate Finance.

Assessment:

Group case studies to be handed in digitally.
The assessment also includes an oral examination.
The final grade might be adjusted based on class participation.
Attendance is mandatory.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Unternehmensberichterstattung und Corporate Governance (S) (Value Reporting and Corporate Governance) 03SM22BO0019 / Seminar

Description:

General description:

Im Seminar werden die theoretischen sowie praktischen Kenntnisse vermittelt, die es den Studierenden ermöglichen, einen Geschäftsbericht zu verstehen und zu beurteilen. Die inhaltlichen Schwerpunkte liegen dabei auf der wertorientierten Unternehmensführung, Nachhaltigkeit und der Corporate Governance.

ECTS: 3

Notes:

Bewerbung (Lebenslauf, Leistungsausweis und aktuelle Kurswahl) bitte bis zum 29.05.2026 an Arun Vasudevan (arun.vasudevan@df.uzh.ch) senden.

<https://www.df.uzh.ch/en/studies/bachelor-master/bachelor/ba-seminars.html>

Learning Outcome:

Die Seminarteilnehmenden sollen befähigt werden, einen Geschäftsbericht inhaltlich auf seinen Informationswert zu beurteilen.

Target Groups:

Studierende, die sich für Unternehmenskommunikation und Corporate Governance interessieren.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Alexander Wagner

Module Introduction to Game Theory (L+E)

03SM22BO0020 / Lecture with Practical Exercises

Description:

General description:

This is an introductory course of Game Theory. Game Theory is a standard tool to analyze the behaviour of agents in strategic situation and is widely used in many fields including economics, finance, biology, political science... The objective of the course is to give the student working knowledge of Game Theory needed to understand and model strategic situations and provide an overview of the wide range of its applications, both in economics and in other fields. The participants need a good background in mathematics, probability theory and microeconomics. The examination will test the theory knowledge as well as the capabilities to solve different types of games, for this reason participation in the Lectures and Exercises sections is strongly recommended.

ECTS: 6

Target Groups:

This is a third year course for Bachelor's students.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Jakub Steiner

Requirements:

Prerequisites:

Microeconomics I & II completed

Assessment:

The examination of the module will take place onsite. Written exam on Tuesday 12.1.2027, 4:15 - 5:45 pm (90 minutes)

Module Fixed Income Markets (V)

03SM22BO0022 / Course

Description:

General description:

Fixed Income Märkte haben eine grosse volkswirtschaftliche Bedeutung und machen auch volumenmässig einen grossen Teil der Finanzmärkte aus. Die Vorlesung bietet einerseits die theoretischen Grundlagen für das Verständnis von Fixed Income Märkten als auch einen Einblick in die praktische Verwendung von Fixed Income Instrumenten. Die Vorlesung behandelt diverse Themen wie die Bewertung, Zinskurven, Derivate, Portfoliomanagement oder Nachhaltigkeit.

ECTS: 3

Notes:

Dieses Modul findet vor Ort und online (Podcast) statt.

Learning Outcome:

Verstehen von Fixed Income Märkten sowie die Bewertung und der Einsatz von festverzinslichen Wertpapieren.

Target Groups:

Bachelorstudierende im fünften Semester

Languages of Instruction:

Deutsch (Unterrichtssprache und Materialien), Englischkenntnisse, je nach Literaturwahl

Course Materials:

Die Unterrichtsmaterialien werden auf OLAT bereitgestellt.

Merkmale:

Responsible instructor:

Thorsten Hens

Requirements:

Prior Knowledge:

Besuch der Bachelorvorlesung Asset Pricing wird empfohlen. Wer diese Voraussetzung nicht erfüllt, belegt die Veranstaltung auf eigene Verantwortung und muss für den erfolgreichen Besuch eventuell mit einem höheren Anteil an Eigenleistung rechnen.

Assessment:

Abgabe von Einzelübungen. Die schriftliche Prüfung findet am 14. Januar 2027 zwischen 8:00 Uhr und 12:00 Uhr als Bring Your Own Device (BYOD) Onlineprüfung vor Ort statt.

Um die Prüfung absolvieren zu können, müssen Sie Ihren eigenen Laptop (Windows oder MacOS) mitbringen. Die Prüfung kann nicht auf Tablets absolviert werden. Ausserdem ist eine Online-Prüfungsaufsicht (Proctoring) möglich und wird mit Buchung des Moduls zugestimmt. Für die Teilnahme an der Prüfung muss eine Probeprüfung mit Ihrer individuellen technischen Ausrüstung absolviert werden.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Umwelt- und Ressourcenökonomik (V) (Environmental and Resource Economics)

03SM22BO0023 / Course

Description:

General description:

In der Vorlesung wird die Interaktion zwischen wirtschaftlicher Aktivität und natürlicher Umwelt analysiert. Insbesondere wird untersucht, in welchen Situationen umweltpolitisch motivierte staatliche Eingriffe ins Wirtschaftsgeschehen wünschenswert sind und welche Form sie gegebenenfalls annehmen sollten. Die Erkenntnisse der Veranstaltung werden auf aktuelle umweltpolitische Themen angewandt.

ECTS: 3

Notes:

Die Vorlesung wird nicht aufgezeichnet/kein podcast.

Learning Outcome:

Die Theorie der Umweltökonomik verstehen. Diese Theorie auf aktuelle umweltpolitische Fragen anwenden.

Target Groups:

Haupt- und Nebenfachstudierende mit abgeschlossener Assessmentstufe

Languages of Instruction:

Deutsch

Course Materials:

Slides werden auf OLAT zur Verfügung gestellt.

Merkmale:

Responsible instructor:

Armin Schmutzler

Requirements:

Prior Knowledge:

Module Change Management (L)

03SM22BO0032 / Course

Description:

General description:

Die Initiierung und Umsetzung notwendiger Veränderung in Unternehmen stellt Führungskräfte häufig vor grosse Herausforderungen. Einerseits wird die Notwendigkeit eines Wandels häufig zu spät erkannt, andererseits wird den Umsetzungsbemühungen oft mit Widerstand von Seiten der Mitarbeiter begegnet.

Wie Organisationen vor diesem Hintergrund organisationalen Wandel gestalten können, wird im Rahmen der Veranstaltung "Change Management" behandelt.

Ausgehend von den theoretischen Grundlagen des Change Managements werden in der Vorlesung verschiedene führungs- und organisationsbezogene Aspekte des geplanten Wandels behandelt und die Leistungsfähigkeit entsprechender Massnahmen diskutiert.

ECTS: 3

Notes:

Weitere Informationen zu dieser Veranstaltung finden Sie unter:

<https://www.business.uzh.ch/en/research/professorships/om/teaching/CM.html>

Für Rückfragen zur Veranstaltung wenden Sie sich bitte an unser Lehrstuhlteam (om@business.uzh.ch).

Languages of Instruction:

Deutsch

Course Materials:

Zur Veranstaltung gibt es ein Folienskript und weitere Literatur, welche auf OLAT zur Verfügung gestellt werden.

Merkmale:

Target Group: Open to School Students

Responsible instructor:

David Seidl

Requirements:

Prerequisites:

Am Ende der Veranstaltung sollten Sie über ein fundiertes Verständnis des Wandels in Organisationen verfügen, die Grenzen und Schwierigkeiten des geplanten Wandels kennen, grundlegende Massnahmen des geplanten Wandels kennen und ihre Leistungsfähigkeit beurteilen können, ethische Fragestellungen im Bezug auf Wandel erkennen und diskutieren können.

Assessment:

Die 60-minütige Prüfung zum Modul findet am 14.01.2027 zwischen voraussichtlich 10:15-11:15 Uhr als Bring Your Own Device (BYOD) Onlineprüfung vor Ort statt. Eine Online-Prüfungsaufsicht (Proctoring) ist möglich und dieser wird mit der Buchung des Moduls zugestimmt. Prüfungsantworten sind auf Deutsch sowie auf Englisch möglich.

Um an der Prüfung teilzunehmen, müssen Sie Ihren eigenen Laptop (Windows oder macOS) mitbringen. Die Prüfung kann nicht auf Tablets abgelegt werden. Für die Teilnahme an der Prüfung müssen Sie vorab den Safe Exam Browser (SEB) installieren und mit Ihrem individuellen Gerät einen Funktionstest durchführen. Genaue Informationen zur erforderlichen SEB-Version sowie weitere Details erhalten Sie im Laufe des Semesters.

Der Funktionstest findet am 07.01.2027 statt. Die Teilnahme am Funktionstest ist

verpflichtend. Studierende, die den Funktionstest nicht absolviert haben, werden nicht zur Abschlussprüfung zugelassen und haben die Lehrveranstaltung nicht bestanden.

Module Startup Seminar Banking & Finance 2.0 (S)

03SM22BO0036 / Seminar

Description:

General description:

Dieses Seminar vereint Banking & Finance mit internetspezifischen und Social Media-relevanten Themen. Betreut von Coaches aus der Praxis wird in Gruppen eine zukunftsorientierte Geschäftsidee entwickelt, ein Businessplan erstellt und ein Prototyp realisiert, welcher zum Abschluss präsentiert wird.

ECTS: 3

Notes:

Die erste Veranstaltung (15. September 2026) ist lediglich eine Info-Veranstaltung, in der alle Details, auch zur Bewerbung und Fristen bekannt gegeben werden. Das Einreichen der Bewerbungsunterlagen ist erst nach der Info-Veranstaltung möglich.

Interessierte legen ihre vollständigen Bewerbungsunterlagen in einer einzigen PDF-Datei bis und mit So, 20.09.26, 24:00 Uhr auf OLAT ab.

Weitere Informationen sowie der Link zum OLAT-Kurs sind unter https://www.df.uzh.ch/en/studies/bachelor-master/bachelor/ba-seminars.html:_Startu_p_Seminar_Banking_&_Finance_2.0 abrufbar.

Bei Fragen zum Seminar wenden Sie sich bitte an:
svenchristian.steude@uzh.ch.

Learning Outcome:

In Kleingruppen entwickeln die Studierenden eine Geschäftsidee mit dem Ziel, diese zu konkretisieren, in Form eines Prototypen zu realisieren und zu präsentieren.

Dieses Seminar bietet Plattform für innovatives und praxisorientiertes Denken und Handeln. Die Teilnehmer können ihr in diversen Veranstaltungen erlangtes theoretisches Wissen (insb. in den Fachgebieten Banking & Finance und/oder Wirtschaftsinformatik) aktiv anwenden.

Target Groups:

Fortgeschrittene Bachelorstudierende der Bereiche Wirtschaft (insbesondere Banking & Finance) und Wirtschaftsinformatik.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Thorsten Hens

Requirements:

Prerequisites:

Bestandene Assessmentstufe.
Teilnahme an der Kickoff-Veranstaltung und allen Seminarterminen.

Prior Knowledge:

Vorkenntnisse im Bereich Banking & Finance und/oder Wirtschaftsinformatik sind erwünscht.

Module International Management (L)

03SM22BO0038 / Course

Description:

General description:

In today's business environment, companies face a wide range of choices regarding markets, locations for key activities, outsourcing and ownership modes, and organization and processes for managing across borders. This course provides students with a framework to understand the key challenges of international management and work effectively in today's global environment. The goal is to provide the foundations for taking effective action in the world of international business. The course will first cover frameworks for identifying and taking advantage of the opportunities presented in a dynamic global environment at the level of the country and industry. Next firm-level strategic choices will be covered regarding where to engage in which activities. Finally challenges of integrating the multiple perspectives, functions, and interests that constitute the multinational firm will be discussed.

ECTS: 3

Notes:

Attendance in all meetings is strongly encouraged

Learning Outcome:

After the course, students should

- understand the economic, financial, organizational, and political factors affecting international businesses
- know basic strategic and operational choices in international management
- understand and appreciate the differences between managing domestic and international businesses

Target Groups:

Bachelor level students

Languages of Instruction:

English

Course Materials:

Please see syllabus on the Chair's website

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Thomas Keil

Requirements:

Prior Knowledge:

Contents of the assessment level

Assessment:

The exam of the module will take place as a Bring Your Own Device (BYOD) online exam on site on 07.01.2027 from 14:00-16:00.

To take the exam, you must bring your own laptop (Windows or macOS). The exam cannot be taken on tablets. To take the exam, you must install the Safe Exam Browser (SEB) in advance and take a functional test using your individual technical equipment. Exact information on the required SEB version and other details will be provided to you during the semester.

The mandatory functional test will take place on 17.12.2026. Completion

of the functional test is mandatory. Students who have not completed the functional test will not be admitted to the final exam and fail the course.

Students who attend all guest speaker lectures will receive 5% bonus points on the final exam. Additionally, students who participate in all interactive sessions will also earn 5% bonus points. The total maximum bonus points available are 10%. Students must pass the final exam to obtain these bonus points.

Module Asset Management: Investments (L+E)

03SM22BO0041 / Lecture with Practical Exercises

Description:

General description:

Die Vorlesung gibt eine Übersicht über die wichtigsten Bereiche des Anlageprozesses, von der Selektion der Anlageinstrumente bis hin zum Aufbau und Monitoring von optimalen Portfolios. Im ersten Teil der Vorlesung werden wir uns mit der Kapitalmarkttheorie sowie der Optimierung von Portfolios beschäftigen. Im zweiten Teil werden unterschiedliche Anlagestrategien thematisiert sowie die Frage diskutiert, ob sich die Suche nach Alpha lohnt.

Abgeschlossen wird die Vorlesung mit der Betrachtung von Aktien- und Anleihen-Instrumente

Die Vorlesung wird mit einem Blended Learning Konzept durchgeführt, d.h. neben der Präsenzveranstaltung, in welcher insbesondere auf die aktuelle Entwicklung eingegangen wird, werden Selbstlernvideos, Multiple-Choice Fragen sowie Excel-Übungen eingesetzt.

ECTS: 6

Notes:

Dieses Modul findet vor Ort und online (Livestream über Zoom sowie Podcast) statt.

Learning Outcome:

Verstehen und Anwenden der theoretischen und praktischen Grundlagen des Anlagegeschäfts.

Target Groups:

Bachelorstudierende im 5. Semester

Languages of Instruction:

Deutsch

Course Materials:

OLAT-Kurs mit eLearning-Materialien (Videos, Selbsttests und Excel-Übungen)
Enzo Mondello: Finance, aktuelle Auflage, Springer Verlag

Merkmale:

Responsible instructor:

Markus Leippold

Requirements:

Prerequisites:

Besuch der Vorlesung Corporate Finance wird empfohlen. Wer diese Voraussetzungen nicht erfüllt, belegt die Veranstaltung auf eigene Verantwortung und muss für den erfolgreichen Besuch eventuell mit einem höheren Anteil an Eigenleistung rechnen.

Assessment:

Abgabe von Einzelübungen.

Die Prüfung findet als Bring Your Own Device (BYOD) Onlineprüfung vor Ort am Montag, 18. Januar 2027, 10:00-12:00 statt. Um die Prüfung absolvieren zu können, müssen Sie Ihren eigenen Laptop (Windows oder MacOS) mitbringen. Die Prüfung kann nicht auf Tablets absolviert werden. Ausserdem ist eine Online-Prüfungsaufsicht (Proctoring) möglich und wird mit Buchung des Moduls zugestimmt. Für die Teilnahme an der Prüfung muss eine Probeproofung mit Ihrer individuellen technischen Ausrüstung absolviert werden. Genaue Informationen zum Funktionstest und sonstigen Details erhalten Sie im Laufe des Semesters.

Module Wissenschaftsphilosophie für Wirtschaftswissenschaftler/innen (S) (Philosophy of Economics)

03SM22BO0042 / Seminar

Description:

General description:

Wenn Sie sich fragen, wie die Wirtschaftswissenschaften funktionieren, von welchen geistesgeschichtlichen Strömungen sie beeinflusst sind, wo Potential und Grenzen der Methoden wie auch der begrifflichen Konzepte und Fragestellungen liegen und was Alternativen sein könnten, dann interessieren Sie sich für Themen der Wissenschaftsphilosophie.

In dieser Veranstaltung diskutieren wir das Buch der Wissenschaftsphilosophin Nancy Cartwright aus dem Jahr 2022: «A philosopher looks at science». Die zum Verständnis nötigen Voraussetzungen erarbeiten wir uns gemeinsam, etwa anhand von Auszügen klassischer Texte wie der von R. Carnap, K. Popper, T. S. Kuhn oder I. Lakatos.

Abhängig von Ihrem Interesse werden wir mit dieser Grundlage Fragen wie die Folgenden diskutieren: Worin liegt die Stärke von Reduktionismus und mathematischer Modellierung und wie wird der Bezug zur Wirklichkeit hergestellt? Wie funktioniert Theoriebildung und welche Rolle spielen empirische Daten? Was gilt als wissenschaftlicher Fortschritt und warum?

Ich freue mich bei dieser interdisziplinären Veranstaltung nicht nur auf Studierende der Wirtschaftswissenschaften, sondern auch anderer Studiengänge.

ECTS: 3

Notes:

Die Teilnahme am Seminar ist auf 12 Studierende begrenzt.

Bitte schicken Sie ein einseitiges aussagekräftiges Motivationsschreiben, das zeigt, was Sie für diese Veranstaltung mitbringen und was Sie erwarten, bis zum 11. September an:
suzannviola.renninger@uzh.ch.

Verfassen Sie das Motivationsschreiben ohne die Hilfe von Programmen wie Chat-GPT.

Es gilt Anwesenheitspflicht in allen Sitzungen. Eine konzentrierte Vorbereitung sowie eine aktive Beteiligung an den Diskussionen sind für den Erfolg dieser Veranstaltung unerlässlich.

Die Sitzungen werden nicht aufgezeichnet oder übertragen.

Target Groups:

Fortgeschrittene Studierende der Bachelorstufe. Das Seminar ist interdisziplinär ausgerichtet und gewinnt durch die Teilnahme von Studierenden anderer Fakultäten.

Languages of Instruction:

Unterrichtssprache ist Deutsch; die Unterrichtsmaterialien (Texte) sind auf Deutsch oder Englisch.

Course Materials:

Bitte besorgen Sie sich das Buch von Nancy Cartwright: «A philosopher looks at science» (2022), das Sie physisch wie auch digital in der Bibliothek finden.

Weitere Unterrichtsmaterialien werden via Olat zur Verfügung gestellt.

Merkmale:

Responsible instructor: Ernst Fehr

Requirements:

Assessment: Die Note setzt sich zusammen aus aktiver Mitarbeit (60%) sowie einer schriftlichen Prüfung (40%, Verfassen eines kurzen Essays).
Schriftliche Prüfung, vor Ort, am Donnerstag 14.01.2027, 9:15 bis 11:45 (150 Minuten).

Grading Scale: 1-6 Quarter Grades Given

Module Interaktive Marketingkommunikation (VU) (Interactive Marketing Communication)

03SM22BO0043 / Lecture with Practical Exercises

Description:

General description:

Die Studierenden erhalten im Rahmen des Moduls "Interaktive Marketingkommunikation" (vormals unter dem Titel "Personalisiertes Marketing") eine umfassende Einführung in die Instrumente und Kanäle, die zur Personalisierung von Marketingmassnahmen sowie zur Interaktion mit Kundinnen und Kunden eingesetzt werden.

Dabei steht insbesondere die Vermittlung des Konzepts des Customer Relationship Managements (CRM) im Mittelpunkt - mit Fokus auf Kundenbindung ebenso wie auf Kundengewinnung.

Das Modul behandelt sowohl Online- als auch Offline-Aspekte der interaktiven Marketingkommunikation. Schwerpunktthemen sind unter anderem:

- der psychologische Kontext,
- der Customer Lifetime Value,
- digitale KPIs und geeignete quantitative Bewertungsmethoden,
- Customer Targeting sowie
- Direct Marketing.

Der Schwerpunkt der Veranstaltung liegt auf der (theoretischen) Konzeption und Erfolgsmessung von Massnahmen im interaktiven Marketingumfeld. Zahlreiche Praxisbeispiele dienen dazu, die theoretischen Inhalte anschaulich und anwendungsnah zu vermitteln.

ECTS: 3

Notes:

- Die Anmeldung für diese Lehrveranstaltung erfolgt über das UZH Modulbuchungstool.

Module Marketing Strategy (S)

03SM22BO0044 / Seminar

Description:

General description:

The seminar offers the possibility to apply marketing knowledge in the context of a marketing strategy simulation game. The objective of the strategy game is to successfully position a new product in a competitive market. For this purpose students have to make several important marketing decisions such as market selection, new product launch, positioning, pricing, and advertising. Students have to apply sales forecasting methods and anticipate competitive reactions.

ECTS: 3

Notes:

- Please pre-register for this course during the given time window: Monday, 06 July to Sunday, 19 July 2026.
- Pre-registration is mandatory - all registrations are binding (please pre-register only if you are available throughout the whole duration of the seminar).
- Please note the recommended pre-requisites and the mandatory software license fees.
- The number of participants is limited to 30. Allocation of limited seminar places: 1.) First priority for students who successfully completed the course New Product Marketing (Neuproduktmarketing, 03SM22BO0088), based on a random allocation. 2.) Allocation of remaining course seats based on a random allocation.
- Written notifications will be sent out by e-mail within two weeks after the deadline. Please check your UZH e-mail account regularly during this period.
- Please pre-register by using the respective online form published on our website. The form will be accessible online from Monday, 06 July 2026: <https://tiny.uzh.ch/XK> (go to Education, Courses, Fall Semester, Pre-registration).
- More information will be provided on OLAT.
- Point of contact for questions regarding the seminar: before the course starts: Sara Amirsardari (sara.amirsardari@business.uzh.ch), during the course Dr. Margit Kastner (margit.kastner@wu.ac.at).

Learning Outcome:

Students learn to analyze competitive markets and make targeting as well as new product decisions in a team.

Target Groups:

Bachelor students

Languages of Instruction:

English

<u>Course Materials:</u>	Lecture slides and other learning materials will be provided/announced at the seminar. License fees for using the marketing strategy simulation game to be paid by the participants prior to the seminar. Personal laptop with Excel and internet browser required on all seminar days.
<u>Merkmale:</u>	Target Group: Suitable for English Speakers
<u>Responsible instructor:</u>	Martin Natter
Requirements:	
<u>Prerequisites:</u>	Assessment
<u>Prior Knowledge:</u>	Recommended pre-requisite: New Product Marketing (Neuproduktmarketing, 03SM22BO0088), Microsoft Excel skills including Solver application and regression analysis.
<u>Assessment:</u>	Grading based on seminar assignments: - Marketing Strategy presentation to be submitted within 2 weeks after the last day of the seminar. - Assignments to be presented during seminar. - Active participation throughout seminar. - Participation throughout the entire seminar is mandatory. Details on topics and seminar assignments will be given at the introductory session on the first day of the seminar.
<u>Grading Scale:</u>	1-6 Quarter Grades Given

Module Banking: Structured Products (S)

03SM22BO0046 / Seminar

Description:

General description:

Das Seminar wird sehr interaktiv im Flipped-Classroom Konzept gestaltet. In jeder Veranstaltung wird eine Case Study in Gruppen gelöst.

Im ersten Teil des Seminars wird ein Überblick über das Thema Strukturierte Produkte gegeben. Zunächst werden die Funktionsweise und die Einsatzmöglichkeiten der wichtigsten Strukturierten Produkte im Schweizer Markt behandelt. Hauptaugenmerk wird anschliessend auf die einzelnen Bestandteile wie Bonds, Optionen und Barriere Optionen, die Bewertung und Aspekte des Hedging aus Sicht der Emittenten gelegt. Zuletzt wird aus Sicht der Anleger auf Chancen und Risiken beim Einsatz von Strukturierten Produkten eingegangen.

ECTS: 3

Notes:

Die Teilnehmerzahl ist beschränkt. Die Anmeldung erfolgt ab dem 15. September 2026 über OLAT. Für den Zugang zum OLAT-Kurs ist eine Anmeldung im Modulbuchungstool notwendig (Fristen und Studiengang beachten!).

Dieses Modul findet vor Ort statt.

Learning Outcome:

- Ich kann die in der Schweiz gebräuchlichen Strukturierten Produkte in die einzelnen Bestandteile zerlegen.
- Ich kann Produkte mit und ohne Barriere-Optionen bewerten und verstehe wie die Bewertung von Produkten mit Worst-of-Mechanismus funktioniert.
- Ich weiss, wie Emittenten Strukturierte Produkte absichern und welche Kosten beim Hedging entstehen.
- Ich kann ein Termsheet aufbauen und weiss, wie Strukturierte Produkte vermarktet werden.
- Ich kenne den Lebenszyklus von Strukturierten Produkten von der Idee bis zur Abwicklung am Laufzeitende.
- Ich weiss, wie Strukturierte Produkte im Portfolio-Kontext eingesetzt werden und in welchen Marktsituationen der Einsatz sinnvoll ist.
- Weitere aktuelle Themen

Target Groups:

Bachelorstudierende im 5. Semester

Languages of Instruction:

Deutsch

Course Materials:

werden auf OLAT zur Verfügung gestellt.

Merkmale:

Responsible instructor:

Thorsten Hens

Requirements:

Prerequisites:

Besuch der Vorlesung Asset Pricing wird empfohlen. Wer diese Voraussetzung nicht erfüllt, belegt die Veranstaltung auf eigene Verantwortung und muss für den erfolgreichen Besuch eventuell mit einem höheren Anteil an Eigenleistung rechnen.

Prior Knowledge: Mathematische Kenntnisse sowie Kenntnisse in Optionstheorie.

Assessment: - Abgabe von mehreren Gruppenarbeiten

- Präsentationen in Gruppen

Die Leistungsüberprüfung zum Modul findet vor Ort statt, in Form von

Präsentationen am 10.11.2026, 17.11.2026 und 24.11.2026,

14:00-18:00.

Module Introduction to Labor Economics (L+E) (Arbeitsmarktökonomik)

03SM22BO0047 / Course

Description:

General description:

This lecture addresses three central questions: (i) Who is employed? (ii) Why do workers earn different wages? (iii) What determines the level and duration of unemployment?

These questions are analyzed using different theoretical explanations and are illustrated with empirical evidence from current research.

The focus is on interactions in the labor market and their influence on wage structures, as well as on the incidence and duration of unemployment.

ECTS: 6

Notes:

No podcast.

Learning Outcome:

Understanding the labor market

Target Groups:

Bachelor Students

Languages of Instruction:

English

Course Materials:

Will be published on OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Josef Zweimüller

Requirements:

Prior Knowledge:

If you have not yet attended the lecture 'Einführung in die Empirische Wirtschaftsforschung (EWF),' you should expect additional workload.

Assessment:

The examination of this module takes place on site.

Written exam: Friday, 15.01.2027, 10.15-11.45 am (90 minutes).

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module HRM and Organizational Behavior (L+E)

03SM22BO0050 / Course

Description:

General description:

Human Resource Management (HRM) and Organizational Behavior (OB) concern the study of individuals and groups within an organizational context, and the study of internal processes and practices as they affect individuals and groups. The course gradually broadens the level of perspective, starting out with an individual level perspective on, for example, perceptions, personality, attitudes, motivation, and emotions; proceeding to a dyadic and group level perspective on, for example, leadership, and team processes; and culminating in the organizational level perspective on, for example, an organization's climate, culture, and management practice.

ECTS: 6

Learning Outcome:

The principal aims of the course are:

- to provide students with a broad and critical understanding of the key issues and concepts in HRM and OB
- to allow students to reflect on their own experience, extrapolate and develop better people skills
- to prepare students for future general management or HR roles in organizations

Target Groups:

Bachelor Students

Languages of Instruction:

English

Course Materials:

The course book is Robbins & Judge: Organizational Behavior, Global Edition, ISBN: 978-1-292-44996-8 (ebook)
<https://www.pearson.de/organizational-behavior-global-edition-9781292449968>

In addition, for each lecture, the slides contain references that point to further literature.

Module Personal Branding and Life Design (L)

03SM22BO0051 / Course

Description:

General description:

The course is a hands-on introduction to the best practices of brand management and digital marketing proven to build and foster a personal brand. Branding is one of the core marketing disciplines. It describes the process of creating a unique name and image for a product or a service in the consumer's mind through consistent communication themes.

Branding aims to establish a significant and differentiated presence in the market to attract and retain customers.

The course, conceived as an "interactive, ongoing workshop," introduces bachelor students to the cultural terrain of brand-building and digital marketing. Students will become accustomed to, understand, and apply branding techniques typically used in digital channels. The program is designed to motivate and encourage participants to practice these concepts in hands-on exercises, develop a spirit of problem-solving, and enhance their ability to think in business terms. The course presents best-in-class examples offering both strategic and operational perspectives of marketing management.

This course should (a) support students in creating an understanding of personal brands and branding strategies, (b) demonstrate the advantages and disadvantages of using different digital marketing techniques, (c) develop strategic thinking needed to create and feedback on a digital marketing plan, (d) build up an ecosystem of social media platforms supporting the launch of a new brand in the digital environment, and (e) help students to feed, grow and analyze the digital performance of brands.

ECTS: 6

Notes:

Important note:

This module has changed its name from "Personal Branding and Digital Marketing" to "Personal Branding and Life Design". As the theoretical and practical content provided and graded in the final exam remains, students who already got credited the module "Personal Branding and Digital Marketing" can not enroll for the new module "Personal Branding and Life Design."

Classes will not be recorded, and alternative learning methods (e.g., flipped classroom) are unavailable for this course due to its unique and practical setting. Individuals unable to attend lectures must review the .ppt presentation independently and catch up with the regular exercises.

For detailed information, please have a look at our website and the syllabus (<https://t.uzh.ch/1zp>).

Learning Outcome:

The course is fast-paced, practical, and interactive. There will be a mix of lectures, case studies, group exercises, and self-reflecting tasks throughout the course.

In this course, we:

- Discuss personal brands as an essential professional asset.
- Review different branding strategies and how to align them to professional career objectives.

- Emphasize how digital marketing theories and frameworks support the brand-building process.
- Set up a social media ecosystem consisting of several platforms to self-organize and promote a brand in the digital environment and beyond.
- Introduce AI-based software and other tools for digital marketing management to feed, grow, analyze, and automate your performance.
- Lay your hands on brands to gain practical experience through regular interactive exercises.

The course content is designed to be maximally practical and help students acquire highly demanded digital skills in the marketplace. Each session represents a "building block" connected, which enables students to apply all learned principles, week after week, to their branding project.

Target Groups:

The ideal target audience for this course is young students who have always wanted to turn their own ideas and visions into a personal brand and their own company, but who have not yet been able to muster the right mindset, confidence, or the appropriate tools. Students who have already successfully established their own brand can also benefit from the course, but the course does not provide a detailed introduction to specific tools, such as Google Analytics or similar.

This introductory course is less suitable for students working in a corporate context with a corporate brand.

Languages of Instruction:

English

Course Materials:

To be announced

Merkmale:

Target Group: Suitable for English Speakers

Target Group: Open to School Students

Responsible instructor:

René Algesheimer

Requirements:

Prior Knowledge:

This course does not require prior knowledge of the subject. However, a hands-on and can-do attitude is highly recommended as ongoing exercise is needed next to the class.

Assessment:

The Binary Gate (pass, no pass):

Students are asked to contribute to the class by submitting a series of documents and files. Students who submitted complete documents as described in detail in the syllabus will pass the class. The categories are:

- a) The presentation of their brand (doing)
- b) Executing their brand strategy (applying)
- c) Deep synthesis (thinking)
- d) Learning by teaching (teaching)
- e) The closing argument (reflecting)

We will also validate a new test approach in class that will however not affect the above mentioned grading system.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Module Behavioral Finance (L +E)

03SM22BO0054 / Lecture with Practical Exercises

Description:

General description:

Behavioral finance studies "real people" rather than stylized, perfectly rational agents, using both empirical analysis and theoretical models. The first part of the course covers asset pricing: How should investors form portfolios? What would we expect asset prices to be? Empirically, how do prices deviate from standard predictions? Why are markets sometimes unable to correct mispricings? The second part of the course covers consumer finance. What are typical investor mistakes? How can consumers make better financial decisions? How do markets respond to consumer naivete, and how can consumers be protected? The third part covers bubbles and financial crises. The course is intended for third year students who are comfortable with formal economic models and who have a basic understanding of empirical methods such as regression analysis.

ECTS: 6

Notes:

The module will not be recorded/no podcast.

Learning Outcome:

Students will acquire fluency with models of finance and know empirical regularities, both traditional and behavioral. Students will acquire the skills to analyze financial data.

Module Smart Contracts and Blockchain Technology (L+E)

03SM22BO0058 / Lecture with Practical Exercises

Description:

General description:

This course provides an introduction to the economics of blockchain.

Topics covered in lecture include decentralized ledgers, consensus protocols, cryptographic fundamentals, mining, cryptocurrencies, tokens, smart contracts, stablecoins, NFTs, use cases, crypto exchanges, decentralized exchanges, blockchain oracles, and DAOs.

ECTS: 6

Notes:

The module will not be recorded/ no podcast.

Learning Outcome:

Basic understanding of smart contracts and blockchain technology

Game-theoretic underpinning of mining and consensus formation

Knowledge of key players and institutions in the blockchain space

Ability to interact with public blockchains via appropriate platforms

Ability to implement basic use cases as a smart contract

Target Groups:

The target audience is BA students majoring in economics, business administration, and banking and finance.

Languages of Instruction:

English

Course Materials:

Selected articles in economics and finance journals

Antonopoulos, A.M., Wood, G. (2018), Mastering Ethereum, O'Reilly.

Merkmale:

Target Group: Suitable for English Speakers

1 Semester (Every Fall Semester)

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Organisation:

Institut für Volkswirtschaftslehre

Offered in:

Fall Semester 2026

Fall Semester 2024

Fall Semester 2023

Fall Semester 2022

Component of:

Faculty of Business, Economics and Informatics

Business Administration

Major 150	Bachelor of Arts UZH in Business and Economics (RVO22)	B: Core elective area: Management Science (BWL6) <i>Core elective</i>
Minor 60	BA UZH in Study of Religions Bologna 2020	B: Core elective area: Management Science (BWL6) <i>Core elective</i>
Minor 60	Bachelor of Arts (RVO19)	B: Core elective area: Management Science (BWL6) <i>Core elective</i>
Minor 60	Bachelor of Arts in Social Sciences (RVO 19)	B: Core elective area: Management Science (BWL6) <i>Core elective</i>
Minor 60	Bachelor of Science Faculty of Science (2021)	B: Core elective area: Management Science (BWL6) <i>Core elective</i>
Minor 60	Bachelor of Science in Computational Linguistics	B: Core elective area: Management Science (BWL6) <i>Core elective</i>
Minor 60	Bachelor of Science in Psychology (RVO19)	B: Core elective area: Management Science (BWL6) <i>Core elective</i>
Minor 60	Bachelor of Theology UZH Bologna 2020	B: Core elective area: Management Science (BWL6) <i>Core elective</i>
Minor 30	Bachelor of Arts UZH in Business and Economics (RVO22)	B: Core elective area: Management Science (BWL6) <i>Core elective</i>
Minor 30	Bachelor of Science Faculty of Science (2021)	B: Core elective area: Management Science (BWL6) <i>Core elective</i>
Minor 30	Bachelor of Science UZH in Informatics (RVO22)	B: Core elective area: Management Science (BWL6) <i>Core elective</i>

Economics

Major 150	Bachelor of Arts UZH in Business and Economics (RVO22)	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>
Minor 60	BA UZH in Study of Religions Bologna 2020	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>

Minor 60	Bachelor of Arts (RVO19)	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>
Minor 60	Bachelor of Arts in Social Sciences (RVO 19)	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>
Minor 60	Bachelor of Science Faculty of Science (2021)	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>
Minor 60	Bachelor of Science in Psychology (RVO19)	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>
Minor 60	Bachelor of Theology UZH Bologna 2020	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>
Minor 30	Bachelor of Arts UZH in Business and Economics (RVO22)	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>
Minor 30	Bachelor of Science Faculty of Science (2021)	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>
Minor 30	Bachelor of Science UZH in Informatics (RVO22)	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>
Economics 2026		
Minor 60	BA UZH in Study of Religions Bologna 2020	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>
Minor 60	Bachelor of Arts (RVO19)	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>
Minor 60	Bachelor of Arts in Social Sciences (RVO 19)	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>
Minor 60	Bachelor of Science Faculty of Science (2021)	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>
Minor 60	Bachelor of Science in Computational Linguistics	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>
Minor 60	Bachelor of Science in Psychology (RVO19)	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>
Minor 60	Bachelor of Theology UZH Bologna 2020	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>
Minor 30	Bachelor of Science Faculty of Science (2021)	B: Core elective area: Microeconomics (ECON2/VWL2) <i>Core elective</i>

Finance		
Major 150	Bachelor of Arts UZH in Business and Economics (RVO22)	B: Core elective area: Finance (FIN1) <i>Core elective</i>
Minor 60	BA UZH in Study of Religions Bologna 2020	B: Core elective area: Finance (FIN1) <i>Core elective</i>
Minor 60	Bachelor of Arts (RVO19)	B: Core elective area: Finance (FIN1) <i>Core elective</i>
Minor 60	Bachelor of Arts in Social Sciences (RVO 19)	B: Core elective area: Finance (FIN1) <i>Core elective</i>
Minor 60	Bachelor of Science Faculty of Science (2021)	B: Core elective area: Finance (FIN1) <i>Core elective</i>
Minor 60	Bachelor of Science in Computational Linguistics	B: Core elective area: Finance (FIN1) <i>Core elective</i>
Minor 60	Bachelor of Science in Psychology (RVO19)	B: Core elective area: Finance (FIN1) <i>Core elective</i>

Module Information Management (L+E)

03SM22MI0001 / Lecture with Practical Exercises

Description:

General description:

This lecture covers the management challenges and opportunities posed by information systems and offers methods to solve those problems. After completion of this course, the student is able to describe the problems and the tasks related to IT management, to explain these problems and tasks and to solve example tasks.

Topics covered:

1. Intro, IT and Strategy
2. Business Models
3. IT Outsourcing
4. IT Governance + IT Organization
5. Portfolios
6. Architectures
7. IT Projects
8. IT Benefits Management
9. Agile IT
10. IT Service Management
11. ITIL
12. Oracle Guest Lecture
13. Digital Organizations
14. Future of Work

Exercises will include case studies, small projects and paper reading.

There will be guest lectures.

ECTS: 6

Notes:

1. The lecture is held in English (homework may be handed in either in German or English, presentations and class interactions are in English, the exam may be written in German or English).
2. The lecture will be interactive: There will typically be one lecture session per week and one exercise session. Exercise participation is part of the grade. Exercises require on site (!) presence in both the prior lecture and in the exercise sessions. For attendance, we will give attendance points.
3. Note that all written announcements will only be made using OLAT.

Learning Outcome:

This lecture covers the management challenges and opportunities posed by information systems and offers methods to solve those problems. After completion of this course, the student is able to describe the problems and the tasks related to IT management, to explain these problems and tasks and to solve example tasks. Furthermore, students will be able to critically reflect on information management literature.

Target Groups:

Master students in Computer Science as well as Minors, Master students in Business Administration or Finance

Languages of Instruction:

English

Course Materials:

Will be announced in the course.

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Gerhard Schwabe

Requirements:

Prior Knowledge: Basic knowledge in Business Administration and Information Systems. For business students: Minor in Informations Systems (=Wirtschaftsinformatik)

Assessment: The students need to pass two parts in order to pass the course:

1. During the semester, the students need to pass three of the four homework tasks. They can furthermore collect points from attendance and successful homeworks that count towards the exam.

2. At the end of the semester, there will be a written exam (scheduled for 14.01.2027 (10-12)). The examination of the module will take place onsite.

The exam grade will be course grade.

If students do not successfully pass three homework task or fail the exam they do not pass the course.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Fundamentals of Software Systems (L+E)

03SM22MI0002 / Lecture with Practical Exercises

Description:

General description:

Introduction to advanced topics pertaining to the development and evolution of software systems, particularly distributed, data-intensive systems.

ECTS: 6

Notes:

The course consists of weekly lectures and laboratory sessions.

Learning Outcome:

The students will acquire and be able to apply knowledge on:

- Encoding and Distributed Systems
- Unreliable Communication Systems
- Consistency and Consensus in Distributed Systems
- Distributed Concurrency Control
- Distributed Reliability
- The Technical Evolution of Software
- Software Architecture
- Social Aspects of software development
- Open Source, Sustainability and Inclusion

This will enable students to develop and analyze on their own, at a later stage, maintainable, efficient, performing, and reliable distributed software systems.

Languages of Instruction:

English

Course Materials:

Lecture notes and slides will be provided during the semester.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Ivan De Oliveira Nunes

Requirements:

Prior Knowledge:

Knowledge of bachelor level topics of distributed systems, databases, and software engineering are necessary for both the lab assignments and following the lectures.

Assessment:

There will be a mandatory written exam and mandatory practicals. To pass the module, the students must pass the written exam and complete the practicals. The final grade will be determined based on the written exam and on bonus/malus points given to the practical solutions.

Final written exam onsite: Tuesday, 12 January 2027, 10 - 12h

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Fundamentals of Human-Centered Computing

03SM22MI0003 / Lecture with Practical Exercises

Description:

General description:

This course is an introductory module for Human-Centered Computing.

Students will gain learn knowledge and skills in individual and collaborative work, to work with scholarly literature, and to conduct scholarly discourses.

They will learn concepts and processes from cognitive psychology and how to apply them to improve their thinking and work by themselves and with others.

Students will learn several conceptual frameworks that could help them understand and assess research contributions. They will learn about components and forms of arguments and critiques. This course will use the scholarly literature from various fields related to Human-Centered Computing.

ECTS: 6

Notes:

Before 2024, this module was organized in a self-study format. From 2024 onward, this module is a lecture course. Before 2026, this module is named "Fundamentals of People-Oriented Computing"

Until HS26, this module was called "Fundamentals of People-Oriented Computing"

Learning Outcome:

1. Students understand concepts and processes in cognitive psychology and can articulate how these theories apply to work situations.
2. Students know conceptual frameworks for understanding and assessing research contributions.
3. Students can identify the primary contributions of research papers.
4. Students can assess the credibility of sources of scholarly publications.
5. Students can analyze scholarly arguments and assess their quality.
6. Students can synthesize knowledge from multiple readings.
7. Students can formulate and communicate constructive critiques in scholarly contexts.
8. Students can articulate the strengths and weaknesses of selected research methods.

Target Groups:

MSc students with a major in POC.

Languages of Instruction:

English

Course Materials:

Lecture slides and scientific texts will be provided during the semester.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Elaine May Huang

Requirements:

Assessment:

1. Written assignment (20%)
2. Group discussion (30%): This part is done in groups comprises a written assignment and a oral exam. Grouping and scheduling will take place after the add-drop deadline.

3. Final exam (50%): The exam will be on 14 January 2027, 16:00 - 18:00. The first part will be pen-and-paper, and the second part will be BYOD.

Verifiable citation requirement

Citations in your written work submitted during the semester must refer to a source that exists.

A source exists if it can be confirmed by any of the following methods:

- a publicly accessible academic database,
- a library catalog entry, a verifiable ISBN/DOI, or
- a stable URL accompanied by a timestamped archived copy (e.g., via the Wayback Machine or a similar archival service) submitted alongside the work, confirming accessibility at or before the time of submission.

If a source cannot be verified, this mistake will be taken into consideration for the grading of the written submission in question.

This requirement applies to the final graded submission (not to drafts).

Module Advanced Topics in Artificial Intelligence (AI) (L+E)

03SM22MI0004 / Lecture with Practical Exercises

Description:

General description:

Artificial Intelligence (AI) techniques have become ubiquitous: we all repeatedly interact with artefacts that are driven by some AI technology.

The goal of this course is to go beyond the foundational approaches (which are covered in other classes) and explore advanced topics in artificial intelligence such as large-scale knowledge processing, encoding mechanisms for unstructured and structured data, the combination of various AI approaches to provide intelligent systems, as well as notions of human-AI collaboration and coordination spanning from collective intelligence to ensuring notions of fairness, accountability, transparency and diversity.

ECTS: 6

Learning Outcome:

The students can

- apply the theory and practice of advanced AI methods to realistic scenarios
- develop novel AI methods & applications based on existing cutting-edge research
- reason about the impact of AI applications on society and devise methods that exploit the technology's advantages whilst mitigating the risks

Target Groups:

For students of the Artificial Intelligence MSc Program.

Languages of Instruction:

English

Course Materials:

To be announced. Please check course web-site as well as the course's OLAT page.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Abraham Bernstein

Requirements:

Prerequisites:

This course assumes that you have taken an introductory AI course such as Introduction to Artificial Intelligence (offered in the spring term) or the previously offered Practical AI.

This is roughly equivalent to covering Chapters 1 - 18 in the Book Artificial Intelligence: A Modern Approach 4th Ed.

Prior Knowledge:

You are expected to write large pieces of code in the assignments whilst relying on various programming library/frameworks.

Assessment:

25% group project (2 people), 75% exam. Both grading parts need to be passed individually.

Written examination onsite: 13.01.2027 10:15-12:00

Active participation in the evaluation event on the 9.12.26 and 16.12.26 as well as

additional intermediary evaluation events during class time is required: The precise schedule for these events will be published at the beginning of the term.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Organisation: Institut für Informatik

Offered in:
Fall Semester 2026
Fall Semester 2025
Fall Semester 2024
Fall Semester 2023
Fall Semester 2022

Module Foundations of Data Science (L+E)

03SM22MI0005 / Lecture with Practical Exercises

Description:

General description:

Introduction to data science and different paradigms of machine learning; Linear prediction, Regression; Maximum Likelihood; Regularization, Generalization, Cross Validation; Optimization; Logistic Regression; Generative Models for Classification, Gaussian Discriminative Analysis, Naïve Bayes; Support Vector Machines; Kernel Methods; Neural Networks, Backpropagation; Clustering; Dimensionality Reduction, PCA.

ECTS: 6

Learning Outcome:

This course introduces supervised and unsupervised learning. Students will learn the algorithms that underpin popular machine learning techniques. They will also develop an understanding of the theoretical relationships between these algorithms. The practicals will concern the implementation of machine learning algorithms and applications of machine learning.

Target Groups:

MSc in Data Science; MSc in Artificial Intelligence; MSc in Software Systems; MSc in Information Systems

Languages of Instruction:

English

Course Materials:

Lecture slides, lecture notes, and code will be provided during the semester.

Main book references:

- C. M. Bishop. Pattern Recognition and Machine Learning. Springer 2006.
 - I. Goodfellow, Y. Bengio, A. Courville. Deep Learning, MIT Press 2016.
 - K. P. Murphy. Machine Learning: A Probabilistic Perspective. MIT Press 2012.
- These books are also available in electronic format.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Dan Olteanu

Requirements:

Prerequisites:

Introductory courses on continuous mathematics, linear algebra, probability theory, such as: WWF courses Mathematics I, Mathematics II, and Statistics.

Prior Knowledge:

Familiarity with Python is necessary for the practical project.

Assessment:

There will be a mandatory written exam and mandatory coursework during the semester. To pass the module, the students must pass the written exam and successfully complete the coursework. The final grade will be determined based on the written exam and coursework.

The examination of the module will take place onsite. Written examination on Monday, 11.1.2027, 16:15 - 18:45. The exam itself will take 2 hours and 15 minutes.

Module Protocols for Multi-media Communications (PMMK) (L+E)

03SM22MI0010 / Lecture with Practical Exercises

Description:

General description:

Based on the basic course on communication networks, this PMMK lecture will deepen concepts and principles of efficient networking, advanced communication protocols, data formats and procedures, and their respective Quality-of-Service (QoS) management. It does address the basics in high-speed networks and optical networks, including Passive Optical Networks (PON) being complemented by ADSL, the IP Technology, and MPLS.

It is important to note that the PMMK lecture does address an integrated viewpoint of a full communication system, which does outline dependencies of networks, protocols, QoS and network or protocol architectures, especially by addressing QoS basics and its modeling, QoS methods, and QoS monitoring.

Additionally, protocols for an operations management, multimedia transport protocols (RTP, SCTP), messaging and overlays (VPN, CDN), optimized transport for multimedia and real-time streaming, and Software-defined Networks (SDN) are introduced and discussed.

ECTS: 6

Learning Outcome:

Students will receive a deep insight into protocols for multi-media communications, Quality-of-Service (QoS) models, and supporting network technologies. More specifically, the lecture will teach up-to-date knowledge in networks, covering available technology and research. This will enable students to develop on their own at a later stage efficient, performing, and globally applicable multi-media communications. Those protocols and mechanisms taught may leave the grounds of typical text books, which provides hooks to students to see in which way research in that field is undertaken. The finalizing discussion of technologies and QoS-based services offered takes into account where applicable economic incentives, which may limit or encourage the use of a dedicated communication service.

Target Groups:

Recommended for students in the MSc program.

Languages of Instruction:

English

Course Materials:

Relevant material as well as lecture slides can be found on the lecture's Web site, which is part of the CSG's teaching material's collection at <https://www.csg.uzh.ch/csg/en/teaching.html>.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Burkhard Stiller

Requirements:

Prerequisites:

The lecture "Computer Networks and Distributed Systems (CNDS)" is recommended highly, but formally not mandatory, in case of a personal dedication to get hold of those basics on the students' own will.

Prior Knowledge:

see «Voraussetzungen»

Assessment:

The examination of this module will take place onsite. A written exam will be held on 6.01.2027, 08:00 hours. In case of a smaller attendance, this written exam may be replaced by an oral exam for each student separately, for which dates and timing will be communicated at a later stage, latest at the last class in term.

Module Object-Oriented Software Development (V) (Objektorientierte Softwareentwicklung)

03SM22MI0011 / Course

Description:

General description:

The lecture provides a comprehensive overview of object-oriented software development. After a short introduction to the basics of object-orientation, the focus is on class libraries, design patterns, and frameworks. Primarily Java and Java-based frameworks such as Spring are used for illustration.

ECTS: 3

Learning Outcome:

The participants know the core concepts of object-oriented software development. They can apply common design patterns to typical problems.

Furthermore, they are able to evaluate a simple software design, suggest improvements and also implement them.

Target Groups:

MSc students in Informatics

Languages of Instruction:

English

Course Materials:

Documents and literature will be announced in the lecture.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Thomas Fritz

Requirements:

Prior Knowledge:

Prior knowledge of programming and software engineering at Bachelor level as well as Java knowledge

Assessment:

The examination of the module will take place onsite. Written examination on Wednesday, 6.01.2027, 14.00 - 15.45h. In case of a low number of students there will be an oral exam (date and place by arrangement with the lecturer).

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Module Enterprise IT-Architectures (L+E)

03SM22MI0012 / Lecture with Practical Exercises

Description:

General description:

The course addresses Enterprise IT Architectures in a digital world by providing an introduction to the work of an architect in the IT industry. Architectural Methods are used to structure, describe, and specify solutions, and to define scope and context as well as logical and runtime architectures based on functional and non-functional requirements. Work products, documents, diagrams and models are discussed and used in order to specify and communicate the architecture of a solution. The students will work in a team on a proposal of a real case and will present their case studies in one of the lectures. In addition, current important technology concepts like cloud computing, web security, SOA (Service Oriented Architecture) and BPM (Business Process Management) will be introduced. Finally, Enterprise Architecture concepts and Governance of architectures within a complex organizational structure of a company will be discussed.

ECTS: 3

Notes:

This module will be an onsite course. The course includes work for a team presentation, for which attendance in the classroom is mandatory.

Learning Outcome:

Students learn how architects work and which basic work products are used to specify architectures.

Target Groups:

Recommended for students in the MSc studies.

Languages of Instruction:

English

Course Materials:

Slides of the lectures and additional reading material are made available via OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Gerhard Schwabe

Requirements:

Prerequisites:

Basis in Software Engineering and Modeling

Prior Knowledge:

Basis in Software Engineering and Modeling

Assessment:

The evaluation is based on the grading of the team presentation as well as the result of the exam, the team presentation counts 1/3, the oral exam 2/3. There will be face-to-face oral exams on January 4 & 5, 2027.

Grading Scale:

1-6 Quarter Grades Given

Module Human Aspects of Software Engineering (L+E)

03SM22MI0014 / Lecture with Practical Exercises

Description:

General description:

Producing great software as fast as the market demands requires great, productive developers. Yet, what does it mean for an individual developer to be productive, and how can we best help developers to be productive? To answer these questions, researchers in software engineering have been, and are still predominantly looking at the output that software developers create, such as the applications, the source code, or the test cases. This output-oriented focus misses one of the most essential parts in the process of software development: the individual developer who creates the software.

Recent advances in technology afford the opportunity to collect a wide variety of detailed information on a software developer and her work, ranging from the number of resolved work items all the way to the cognitive load the developer experiences while working. The availability and accessibility of data on each developer is enabling us to explore questions about developer productivity in powerful new ways.

In this course, we investigate how we can ensure the human ingenuity and smarts are being amplified by the processes and tools used to create systems, rather than the humans spending precious cognitive effort dealing with mundane or unnecessary problems.

This is an overview of the kinds of topics we cover in this course:

- * quantitative & qualitative evaluation of software engineering research
- * (biometric) sensing in software development
- * developer retrospection, productivity, and well-being
- * work fragmentation and interruptions
- * code navigation and exploration
- * program comprehension
- * software development tools and environments.

ECTS: 6

Notes:

In this course, you will be reading research papers, leading interactive paper discussion(s), critiquing papers, participating in peer reviews, and undertaking steps involved in a research project. The research project component will be flexible but likely involve activities such as identifying research questions, designing (and potentially developing) an approach or study to address these research questions, analyzing data, and writing up the steps. Depending on the class size, certain parts of the research project component may be completed in groups of up to three. The intent of the project is to get students to think about a research problem, identify a research question, investigate it, and write it up in a scientific manner.

Target Groups:

Graduate students with an interest in software engineering research.

Languages of Instruction:

English

Course Materials:

List of references will be on the course website.

Requirements:

Prior Knowledge:

An undergraduate software engineering or human-computer interaction course and experience developing software as part of a team, as well as familiarity with issues in software engineering and with reading research papers are helpful.

Assessment:

This course will be a project and paper-based course. The research project component is the primary component of the course; the outcome of all projects and/or project steps will be presentations and write-ups (similar to research papers or parts thereof). To pass this course, you must pass the research project component (obtain at least 50%) and must obtain a 50% overall mark that is based on the following:

- 65%: Project, including write-ups (including proposal and intermediate reports), presentation, continuous progress, and meetings;
- 35%: Readings, including response papers, class participation & leading discussion (in-person class attendance is mandatory), and peer reviews of project write-ups.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline:

Module Network Science (L+E)

03SM22MI0019 / Lecture with Practical Exercises

Description:

General description:

Network Science is an interdisciplinary field of research that has become synonym with the study of multiple complex systems that pervade social and economic systems. Network refer to representations of systems whose constituents are linked together because of social ties, information flow, economic relations, etc. Network modelling is a methodology with ample applications in modern data-intensive fields which has multiple applications in management, marketing, informatics, among multiple others.

The course covers topics a wide range of topics: it starts with an introduction to the basic concepts about networks; it then deals with the most important properties that real-world networks exhibit, and how they can be modelled; then, it introduces network analytic techniques to uncover the most important properties of empirical networks. Finally, an introduction to the diffusion of technologies, opinions and rumours (and viruses!) are taught.

During the course, special emphasis is employed in introducing network analysis and visualisation tools. The course is highly interactive. All the lectures consist of a theoretical part, then, the students must develop (in small groups and always supported by the instructors) the some practical exercises themselves. This permits them to gain direct experience and familiarity with the concepts taught and the techniques involved. In this participatory environment, multiple exercises and the creation of visualisations play an important role.

ECTS: 6

Notes:

This course replaces "Network Science for Business, Economics, Informatics and Social Sciences" (MOEC0572), which will be discontinued from HS21. Students which have already successfully passed "Network Science for Business, Economics, Informatics and Social Sciences" (MOEC0572), are not allowed to book this course.

Learning Outcome:

At the end of the course students:

- are able to construct network representations of complex datasets
- characterise and understand topological properties of networks
- know the typical characteristics of networks in social, economic and technology systems
- can understand mechanisms that lead to the emergence of large scale network properties

Target Groups:

Students from Data Science and AI tracks will use constantly these results.

Students from Economics, Management, Management and related areas (like those from Social Sciences) will also have the opportunity to learn new tools of great value in their work life.

Languages of Instruction:

English

Course Materials:

Lecture slides, online resources.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Claudio Tessone

Requirements:

<u>Prior Knowledge:</u>	Fundamental courses in statistics (e.g. Empirical Methods MO0010). Basic to medium programming skills (the course is taught in Python, so an introductory material to the level of Hot to Think Like a Computer Scientist: Learning with Python 3 [Chapters 1 - 15] is sufficient) Bibliography: http://openbookproject.net/thinkcs/python/english3e/
<u>Assessment:</u>	30 % Final Grade - Mid-Term Exam (26.10.2026, 11:00-11:45) 60 % Final Grade - Final Project (Involving research, report submission and oral presentation) 10 % Final Grade - Assignments
<u>Grading Scale:</u>	1-6 Quarter Grades Given
<u>Repeatability:</u>	Can be repeated once

Module Communication Systems Lab Course (PR)

03SM22MI0021 / Praktikum

Description:

General description:

During this lab course, students study the setup and configuration of wired and wireless IP networks. Additionally, the operation of selected applications are analyzed in order to identify application requirements. Both Windows and Linux are used as underlying operating systems. In this lab course, students have to solve practical exercises on different topics. The set of solutions is discussed and prepared in groups of students. Exercises include topics about network protocols, setup and configuration of a LAN network, firewalls, iptables, DNS, honeypot analysis, Web application security, wargames, Blockchain basics, Smart Contract development, and data forensics.

ECTS: 6

Notes:

As the number of participants is limited to 16, students are required to send an email to Thomas Grühl (gruebl@ifi.uzh.ch) and Andy Aidoo (aidoo@ifi.uzh.ch) for registration. A first come, first serve approach is implemented. A waiting list will be maintained.

The Lab takes place in room BIM 2-028.

Learning Outcome:

This practical course exists to strengthen and deepen the knowledge within the range of the communication and distributed systems by a set of selected practical tasks.

Target Groups:

Recommended for students in the MSc studies.

Languages of Instruction:

English

Course Materials:

Material will be handed out during the first Lab session.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Burkhard Stiller

Requirements:

Prerequisites:

Interest in communication systems; attendance of "Computer Networks and Distributed Systems (CNDS)" is highly recommended.

Prior Knowledge:

Basic knowledge of IP networks, which can be based on "Computer Networks and Distributed Systems (CNDS)".

Assessment:

In order to pass the lab course, all of the three following criteria have to be met individually: Attendance of all lab sessions; fulfillment of all exercise tasks; 10 min oral presentation on a self-chosen topic from the areas covered by the lab course.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Module Seminar: Internet Economics (MSc)

03SM22MIS001 / Seminar

Description:

General description:

The content of this seminar will address current topics and questions on Internet Economics - covering technical and economic aspects, always in an inherent manner. The dedicated topics will be announced during the kick-off meeting for all people interested. They will most likely include communications, blockchains, incentives, security, and decentralized systems aspects.

ECTS: 3

Notes:

Each student each will receive one topic. The language is English.

The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>.

Application for this seminar is via the new module booking tool :<https://studentservices.uzh.ch/uzh/launchpad>

Learning Outcome:

This seminar addresses the integration of technical and economic aspects into homogeneous overall systems and its application in today's economy. This determines the key goal. In terms of a seminar and didactic school, the seminar report, presentation, and discussion determines the second goal. Thus, all these three areas will be guided by a local supervisor, which will result in a basic and small research work. The final marking of this seminar will embrace a pre-step on scientific work and research documentations. Content (technology and economics) and its homogeneous integration are of importance.

Target Groups:

Studies in MSc

Languages of Instruction:

English

Course Materials:

Literature will be offered as a kick-start within the kick-off meeting, further literature study is a must! Depending on the number of interested students, the seminar will be run as one person/one report and presentation manner or with a two persons/one report and presentation manner.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Burkhard Stiller

Requirements:

Prior Knowledge:

The knowledge of communications (Internet, telecommunications) is important and a basic economic background would be very good, but not essential.

Assessment:

A talk and presentation of 45 min by utilizing slides on-site will be followed by a 45 min moderated discussion with theses and questions posed to the seminar audience. These tasks have to be complemented by a written, complete report

(publishable quality), including bibliographic references, by utilizing a mandatory LaTeX report template. More details will be available on the seminar's Web page, which can be found as a sub-directory of <https://www.csg.uzh.ch/csg/en/teaching.html>.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Request period: from Mi 12.08.2026 10:00 to So 30.08.2026 24:00

Place allocation at the latest: Di 08.09.2026 23:59

Waiting list progression period: from Mo 07.09.2026 00:00 to Fr 18.09.2026 24:00

Module Seminar: Software Developer Experience (MSc)

03SM22MIS004 / Seminar

Description:

General description:

The global demand for software continues to exceed our capacity to produce it. Enhancing software development productivity is key to meeting this challenge.

This seminar explores selected topics in Software Engineering, with a particular focus on the human aspects of software development. We will examine factors that influence developer productivity and experience, the impact of generative AI, challenges related to task context switching, and strategies for effective communication and coordination in software teams.

In this seminar, students will gain a deeper understanding of how to optimize software development processes and improve team dynamics, in addition to designing studies for software engineering research.

ECTS: 3

Notes:

The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>.

Application for this seminar is via the new module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>

Learning Outcome:

At the end of the seminar, students should:

- Have gained a deeper and broader understanding and knowledge of Software Engineering research by reading, analyzing, reflecting, and discussing current and classic literature;
- be able to discuss study methods common in software engineering research, as well as develop a suitable research question given a hypothesis and study method;
- be able to identify and discuss research problems and questions as well as identify relevant related work;
- be able to write a research proposal in the form of a scientific report.

Target Groups:

Recommended for students in the MSc program

Languages of Instruction:

English

Course Materials:

The course materials will consist of current and seminal research papers in the field of software engineering research.

The list will be put on the web page of the course and announced in the first meeting, but is subject to change.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Thomas Fritz

Requirements:

Prior Knowledge: Content of Software Engineering and Programming.

Assessment: This seminar-style course is a project- and paper-based. The research proposal is the primary deliverable at the end of the course.

To pass this course, you must pass the research proposal (obtain at least 50%) and must obtain a 50% overall mark that is based on the following:

- Active Participation: including active reading of selected papers, writing brief responses or giving presentations, as well as discussing the papers and taking part in class activities

- Research Proposal: including continuous progress, meetings, write-ups (including draft and final proposal), and presentation.

Details on the deliverables will be provided on the course website as well as presented in the kick-off.

Attendance is mandatory at all events.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module Seminar: Modern Data Analytics (MSc)

03SM22MIS100 / Seminar

Description:

General description:

Each participant: prepares a presentation based on a research paper; answers follow-up technical questions; reads the other papers in the seminar session; and actively participates in the technical discussions in the seminar. Each participant has a buddy, who will help improve their presentation by making suggestions for improvements and attending dry runs of the presentation. The first complete draft of the presentation is due one month after the kickoff meeting. The best presentation of the seminar will be selected by the participants and receive a prize.

ECTS: 3

Notes:

The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>.

Application for this seminar is via the new module booking tool : studentservices.uzh.ch/uzh/launchpad

Seminar website: <https://www.ifi.uzh.ch/en/dast/teaching/SMDA26.html>

Learning Outcome:

The goal of the seminar is to expose the students to the recent trends in academia and industry on:

- rethinking components of database management systems using machine learning and
- how to unify knowledge on both machine learning and databases to scale data science workloads.

Target Groups:

MSc in Data Science; MSc in Artificial Intelligence; MSc in Software Systems

Languages of Instruction:

English

Course Materials:

During the seminar: List of required reading (research papers)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Dan Olteanu

Requirements:

Prior Knowledge:

Database Systems; Foundations of Data Science

Assessment:

- Active participation during the seminar and attendance of all sessions.
 - Presentation of a research topic including a follow-up Q&A session.
- The assessment depends on the quality of the presentation, active participation during the seminar, and input as a buddy.

Module ME1: Personnel Economics (L+E)

03SM22MO0001 / Lecture with Practical Exercises

Description:

General description:

Introduction to Personnel Economics with a focus on current empirical research in the field.

ECTS: 6

Notes:

The course includes a closed-book exam, a group term paper, group presentations, and mandatory group assignments.

This module takes place on-site and will not be recorded.

Learning Outcome:

1. Theoretical Foundations: Understand the core theories and models of personnel economics, including incentives, contracts, and labor market matching.
2. Empirical Applications: Gain insight into how theoretical frameworks are applied to real-world organizations and labor market settings.
3. Policy Implications: Explore how personnel economics informs HR practices on employment, training, and incentives.
4. Economic Analysis of HR Practices: Analyze hiring, promotion, and compensation strategies using economic principles.
5. Evaluation of Interventions: Critically assess interventions such as training programs or performance incentives, with a focus on causal inference.

Target Groups:

Advanced students interested in empirical research and personnel economics from a business perspective.

Languages of Instruction:

English

Course Materials:

You can use "Kuhn, Peter. Personnel Economics. Oxford: Oxford University Press, 2017" as an additional resource.

Research papers.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Anne Ardila Brenoe

Requirements:

Prior Knowledge:

Bachelor's degree in business administration, economics or a related field.

Assessment:

The course includes mandatory group assignments, a group term paper, a group presentation, and a 90-minute written final exam (Friday, 15.01.2027, 10:15-11:45).

The exam for this module takes place on-site as a closed-book exam with pen and paper.

5% Assignments
10% Presentation
20% Term paper
65% Written final exam

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module ME4: Accounting and Economics (L+E)

03SM22MO0004 / Lecture with Practical Exercises

Description:

General description:

This course covers both financial and managerial accounting theory, with an emphasis on the role of accounting as an information source and its usefulness for facilitating and influencing decision making. Focusing on the different needs of different user groups (such as investors, firms or managers), the course discusses fundamental concepts from financial and managerial accounting and applies them to a series of economic problems. Topics include firm valuation, incentive contracting, budgeting, transfer pricing and earnings management. Related to these topics, some current practices and problems will be discussed.

ECTS: 3

Learning Outcome:

- Evaluate the relative usefulness of accounting information for valuation purposes and incentive contracting
- Identify potential conflicts of interests between different uses of accounting information
- Use management accounting information for performance evaluation (budgeting, transfer pricing, incentive schemes)
- Understand the economic role of financial accounting to reduce incentive problems between a firm and their stakeholders
- Understand the basic determinants of voluntary disclosure

Target Groups:

Master Students

Languages of Instruction:

Englisch

Course Materials:

Course materials and lecture notes will be available on OLAT. A reading list will be provided in the lecture notes.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Robert Göx

Requirements:

Assessment:

The examination for the module takes place as a Bring Your Own Device (BYOD) online exam on site on Tuesday, 15.12.2026 between 12:30 and 13:30h.

Digital exam supervision (proctoring) is possible and is agreed upon booking the module.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Managerial Economics (L+E)

03SM22MO0005 / Course

Description:

General description:

The course provides basic knowledge of micro-economics including decision theory and market equilibrium through case studies.

ECTS: 6

Notes:

Business administration students (BWL) must register for this mandatory master module.

Economics (VWL) and M&E students must register for the mandatory module "Advanced Microeconomics 1" (MO0012).

This module takes place on-site.

Learning Outcome:

Solving case studies using microeconomics

Languages of Instruction:

English

Course Materials:

Angner, E. (2020). A course in behavioral economics. Bloomsbury Publishing.
Microeconomics for Managers, by David M. Kreps
Microeconomics for MBAs: The Economic Way of Thinking, by Richard B. McKenzie, Dwight R. Lee

Module Applied Empirical Methods for Business Administration

03SM22MO0006 / Lecture with Practical Exercises

Description:

General description:

This course aims to provide master students in business administration with both the knowledge and a critical understanding of standard statistical methods applied in modern management. The course will emphasize the application of regression analysis for managerial decision-making. Students are expected to develop a thorough understanding of applied statistics which will enable them to analyze business data and interpret and report their findings. A series of entertaining yet realistic case studies are a central element of the course.

ECTS: 6

Notes:

This module takes place on site and online (podcast).

The lecture with practical exercises takes only place in the fall semester.

In the spring semester, there is offered a re-examination, for students who failed the exam.

Target Groups:

Master students

Languages of Instruction:

English

Course Materials:

Statistics for Business: Decision Making and Analysis
3rd edition (January 5, 2017) Robert A. Stine (Author), Dean Foster (Author)
Publisher: Pearson Language: English Hardcover: 830 pages ISBN-10:
0134497163 ISBN-13: 978-0134497167

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Oleg Prokopyev

Requirements:

Prior Knowledge:

A course in probability and statistics as well as basic knowledge of linear algebra.

Assessment:

Assignments (10%), Final exam (90%).

There will be 5 online assignments each worth 2%.

The exam of the module will take place as a Bring Your Own Device (BYOD) online exam on site on Tuesday, 12.01.2027, 16:15 - 17:45 (90min).

To take the exam, you must bring your own laptop.

Grading Scale:

Module Corporate Finance (L+E)

03SM22MO0007 / Course

Description:

General description:

This course develops and refines tools for evaluating investments (capital budgeting), capital structure, and corporate securities. With respect to capital structure, we start with the famous Miller and Modigliani irrelevance proposition and then move on to study the effects of taxes, bankruptcy costs, information asymmetries between firms and the capital markets, and agency costs. In this context, we will also study how leverage affects some central financial ratios that are often used in practice to assess firms and their stock. Other topics include corporate cash holdings, the use and pricing of convertible bonds, and risk management. The latter two topics involve option pricing. With respect to capital budgeting, the course pays special attention to tax effects in valuation, including in the estimation of the cost of capital. We will also study payout policy (dividends and share repurchases). The course seeks to deepen students' understanding of the link between corporate finance theory and practice. Cases may be assigned to reach this objective.

For further information please contact bangxin.cheng@df.uzh.ch.

ECTS: 6

Notes:

The lectures and exercise sessions will take place on-site.

Until HS26, this module was called "Advanced Corporate Finance I"

Learning Outcome:

Topics covered

1. Capital structure: Perfect markets and irrelevance
2. Risk, leverage, taxes, and the cost of capital
3. Leverage and financial ratios
4. Payout policy: Dividends and share repurchases
5. Capital structure: Taxes and bankruptcy costs
6. Capital structure: Information asymmetries, agency costs, cash holdings
7. Valuation: DCF, adjusted present value and WACC
8. Valuation using options
9. The use and pricing of convertible bonds
10. Corporate risk management

Target Groups:

Master of Banking and Finance students.

Languages of Instruction:

English

Course Materials:

Notes are to be downloaded from OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Kjell G. Nyborg

Requirements:

Assessment:

Exam and group projects may also be assigned during the semester.

The examination for the module takes place as a written exam on
Tuesday, 05.01.2027 2-4pm.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module Intermediate Corporate Finance (L)

03SM22MO0008 / Course

Description:

General description:

In this course, students will be introduced to essential issues and concepts for financing firms. The course will be conceptual while at the same time being also practical and relevant. The module covers applied topics in finance. The module is built around lecture notes, which deliver the content and case studies that apply the content. The purpose of this course is the introduction of techniques to analyze major financial decisions made by firms. The course focuses on corporate finance concepts that can be applied directly to real-life financial decision making. Main topics covered in the course include hurdle rates and the cost of capital (i.e., the investment decision), the mix of debt and equity and the choice of the right kind of debt (i.e., the financing decisions), and basic valuation concepts (i.e., discounted-cash flow and multiples valuation). The course also discusses concepts related to sustainable finance or ESG issues as relevant for a corporate finance context. The course enables participants to make and assess complex corporate financial decisions.

ECTS: 3

Notes:

This module takes place onsite.

Presence is not compulsory. However, please bear in mind that in-class participation and attendance will help you understand and master the course content. If you have questions for me, you should ask them in class rather than by email; if I have an announcement to make, I shall make it in class rather than post it on the course website.

You should contact the teaching assistant Yann Joël Cerasi (yannjoel.cerasi@df.uzh.ch) for any question regarding the course.

Until HS26, this module was called "Corporate Finance"

Learning Outcome:

Students will acquire expert knowledge to analyze and solve practical issues in corporate finance and develop problem-solving skills to conceptually and critically appraise challenge faced in corporate financial decision making in the future.

Target Groups:

Management and Economics students.

Master of Science UZH ETH in Quantitative Finance students.

Languages of Instruction:

English

Course Materials:

The course will cover large parts of the book by Damodaran Applied Corporate Finance. The author also has made a PDF version of the 3rd edition of the book available:
http://pages.stern.nyu.edu/~adamodar/New_Home_Page/ACF3E/manuscript.htm

Slides are made available that cover the material discussed in class. Parts of the slides closely follow the book and you should be able to understand the basic concepts based on the slides. The slides include a series of exercises.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor: Zacharias Sautner

Requirements:

Prerequisites: Basic knowledge of Finance and Accounting

Assessment: Passing a group case study assignment (pass/fail only) and written examination. The case study assignment takes place during the semester (20% of final grade if passed successfully). The written examination of the module will take place onsite (80% of final grade). Written examination on: 5 January 2027, 14.00-15.30.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module Environmental and financial sustainability (L)

03SM22MO0009 / Course

Description:

General description:

Sustainability refers to the long-term viability and resilience of interconnected environmental and social systems, including culture, values, governance, economic organisation, and finance. These subsystems are deeply interdependent, and disruptions in one can cascade into others. Global challenges such as inequality, climate change, and biodiversity destruction threaten the stability of these systems at multiple scales.

This course explores key dimensions of sustainability, with particular emphasis on the environmental and financial drivers of systemic change and their interactions.

Environmental and social sustainability, the first part of the course, taught by Sascha Nick in the first seven sessions, focuses on the main scientific frameworks defining ecological limits, such as Planetary Boundaries, alongside wellbeing and human needs approaches and their interrelations. Building on this foundation, systems thinking and governance principles are used to examine societal and sectoral transformations.

Financial risks and instability, the second part of the course, taught by Marc Chesney in the following seven sessions, covers the systemic risks generated by the financial system, particularly its derivatives. Possible solutions will be discussed. The monopoly and dangers of the mainstream school of thought in economics and finance, will also be addressed, along with the links between climate change, social inequalities and economic growth.

ECTS: 3

Notes:

This module takes place onsite and will be available as podcast.

Attendance to the lecture is highly recommended. Both the abilities to think qualitatively and quantitatively are required.

Module Empirical Methods (L+E)

03SM22MO0010 / Lecture with Practical Exercises

Description:

General description:

The course has two primary objectives. First, it explores the standard tools of modern empirical economic research, beginning with the linear regression model and then moving to more advanced methods such as generalized least squares, two-stage least squares, and maximum likelihood estimation. Second, it aims at sharpening your understanding of the prospects for, and limitations of, valid causal inferences from observational data. Tutorial exercises and case studies from the literature offer hands-on experiences in utilizing these concepts and methods.

ECTS: 6

Notes:

This module takes place on-site and online (podcast).

Please contact EmpiricalMethodsTA@econ.uzh.ch if you have any questions.

Target Groups:

Master students

Module Advanced Microeconomics I (L+E)

03SM22MO0012 / Course

Description:

General description:

This course covers standard topics in non-cooperative game theory, such as normal and extensive form games, repeated games, and games with incomplete information. The course also covers extensions of non-cooperative game theory to important economic contexts, including contracting. The course also presents an introduction to behavioral approaches to game theory. No previous knowledge of game theory is required.

ECTS: 6

Notes:

Master's students in Economics and Management & Economics have to book this course.
Business Administration students have to book "Advanced Microeconomics for Business Administration".

This module takes place on-site; no podcast.

Languages of Instruction:

English

Course Materials:

Gibbons, R. (1992): A Primer in Game Theory.
Additional reading material will be provided.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Roberto A. Weber

Requirements:

Prior Knowledge:

passed exams Microeconomics I and II

Assessment:

The examination of the module will take place onsite. Written
examination on: 13 January 2027, 10:15-11:45 am (90 min).

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Research Seminar Finance (MA)

03SM22MO0030 / Seminar

Description:

General description:

Research seminar in which external speakers present their work. The seminar takes place weekly during the semester. Each seminar runs 75 minutes. Topics cover a wide range of topics, including asset pricing, corporate finance, banking, ESG, and macro-finance.

ECTS: 3

Notes:

No restrictions on the number of participants. No separate registration is required. Those students wanting to take the examination must register via the Modulbuchungstool.

Learning Outcome:

To be exposed to and become familiar with cutting-edge research in finance

Target Groups:

Advanced Master students

Languages of Instruction:

English

Course Materials:

Presentation of research papers by invited speakers and the related paper. Titles/topics/speakers can be found at <https://www.df.uzh.ch/en/research/seminars/finance-seminar.html>

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Steven Ongena

Requirements:

Prior Knowledge:

Advanced knowledge of finance and economics

Assessment:

Written discussion (c. 3 pages per paper, c. 10 pages in total) of, and oral examination (c. 10 minutes per paper, 30 min in total) on three research papers presented. Date, time and location: End of January 2027; further details to be communicated. Until the end of December 2026 students suggest six papers to Francisco Amaral (francisco.amaral@df.uzh.ch) who then chooses and communicates to the students those three papers they will be examined on.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Counterparty Credit Risk Management (L)

03SM22MO0034 / Course

Description:

General description:

One of the challenges that the financial industry is facing after the crisis is to reach consensus on how to correctly assess counterparty credit risk. In particular, the two following practices emerged as consequence of the 2008 breakdown: (a) the splitting of the LIBOR curve in multiple curves (so to account for the different levels of credit risk embedded) and (b) the explicit inclusion of credit risk in the price of the trades. Additionally, (c) the new Basel III legislation brought much tighter rules on capital, defining RWA as the key parameter to assess the feasibility of any business strategy. Here below, more details on a)-c):

a) Multi-curves pricing: the market participants realized after the financial crisis that the banks contributing to LIBOR can also default.

This fact brings a plethora of basis spreads which need to be considered when pricing financial instruments. E.g. a forward rate agreement (FRA) which is fully collateralized (i.e. risk free) cannot be priced as an uncollateralized one. In addition, banks charge differently tenors on the yield curve (e.g. 3m vs 6m) taking into account the higher probability of default over the longer period of re-payment. Given that every market participant has a main funding currency, cross currency swaps are required to fund transactions in other currencies. The credit risk present in this process is reflected in a further cross currency basis that is included in pricing the trades.

b) CVA / DVA: financial institutions should charge for the counterparty risk they are taking, entering trades with defaultable counterparties.

The, so called, Credit Value Adjustment (CVA) is this additional component of the product's price. When CVA is taken into account even linear instruments, for instance vanilla swaps, acquire option-like characteristics. In bilateral agreements the counterparty risk is charged by both counterparties to ensure symmetry in the price-payoff [Bilateral CVA, i.e. CVA and Default Value Adjustment (DVA)].

c) Basel III: the new regulation which focus on the counterparty risk space (through the introduction of a capital charge for CVA) needs to be examined in focus by financial institutions to ensure optimal capital allocation/management, where a risk-return analysis will be actively part of the daily work and exposure.

These aspects will be discussed in a multi-asset class framework, working on real trading examples and complex portfolios. Best practices on modelling Counterparty Credit Risk, pricing under CVA and capital management will be added to the module to stimulate students who want to follow a Risk Management/Trading Career in Investment Banking.

ECTS: 3

Notes:

This module takes place on-site (no recording)

Learning Outcome:

The module aims to introduce the new reality for banking and financial institutions in the aftermath of the 2008 crisis. Highly debated topics such as counterparty credit risk modeling, pricing of counterparty risk (CVA/DVA), cost of funding and collateral management will be examined in depth.

Target Groups:

MSc QF students, MA BF students

Languages of Instruction:

English

Course Materials:

Recommended literature

- a) Discounting, Libor, CVA and Funding: Interest Rate and Credit Pricing, Kenyon, Chris and Stamm, Roland, 2012, Palgrave
- b) Counterparty Credit Risk, Collateral and Funding: With Pricing Cases for All Asset Classes, Brigo, Damiano and Morini, Massimo and Pallavicini, Andrea, 2013, Wiley Finance
- c) Interest rate models-theory and practice: with smile, inflation and credit, Brigo, Damiano and Mercurio, Fabio, 2006, Springer

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Erich Walter Farkas

Requirements:

Prerequisites: Bachelor Degree

Prior Knowledge: Knowledge of calculus and basic statistics. Complementary introductory material on rudiments of stochastic calculus will be provided.

Assessment: The examination of the module will take place onsite.
Written exam on Monday, 16 November 2026, 14:00 - 15:30 (90 min)

Module CFA Investment Challenge (S)

03SM22MO0036 / Seminar

Description:

General description:

The course is intended to familiarize you with the work of financial analysts and to teach you how to conduct a hands-on, in-depth analysis of a specific company in its market environment. As do professional financial analysts, you will give an oral presentation of your results (max. 10 minutes) and hand in a written report (max. 10 pages).

The best team of the seminar will represent UZH at the CFA Investment Challenge. The CFA Investment Challenge is part of a Swiss-wide competition to be held in February 2027. The Swiss winning team will qualify for the European eliminator competition to be held in Spring 2027. The European winning team will in turn qualify for the final competition to be held in Spring 2027. For more information about the Challenge please see:

<https://www.cfainstitute.org/en/societies/challenge>

ECTS: 6

Notes:

This module takes place on-site. This course is a competition, and the number of participants is limited. Enrollment is restricted to students who have already taken advanced courses in corporate finance and accounting or the seminar CFA Institute Research Challenge Training and Preparation.

Selection procedure: Please register until 4 September on OLAT:

The exact dates and links can be found on the DF website. Please visit the DF website for further information:

www.df.uzh.ch/en/studies/bachelor-master/master/ma-seminars.html#Master:_CFA_Investment_Challenge (https://www.df.uzh.ch/en/studies/bachelor-master/master/ma-seminars.html%23Master:_CFA_Investment_Challenge)

Learning Outcome:

To learn how to analyze and value a company, to write a professional analyst report, and to give a professional analyst presentation.

Target Groups:

MA Students in WWF.

Languages of Instruction:

English. All presentations will be conducted and all reports written in English.

Course Materials:

Presentations by academics and practitioners.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Michel Habib

Requirements:

Prerequisites:

Students must have a very strong background in corporate finance and accounting.

<u>Prior Knowledge:</u>	This course is open to Master level students in their second year only.
<u>Assessment:</u>	Several in-class presentations and a written report. The final grade will be adjusted for class participation. Attendance is compulsory.
<u>Grading Scale:</u>	1-6 Quarter Grades Given
<u>Repeatability:</u>	Can be repeated once
Organisation:

Module Portfolio Management Implementation 1 (S)

03SM22MO0037 / Seminar

Description:

General description:

Following a year of insight into the theoretical foundations of portfolio management and asset allocation, students are given the unique opportunity to implement what has been learned. They actively manage a portfolio, following an academic, fundamental or quantitative approach. Students provide regular performance updates in the form of monthly reporting sheets and regularly present on their portfolio holdings and performance to their peers, professors, and industry experts.

ECTS: 3

Notes:

The number of participants is limited. Only open to students who successfully completed Portfolio Management Theory 1 and 2.

This course takes place on site.

Learning Outcome:

Under the supervision of professors and practitioners, students learn to actively manage a portfolio, in a group setting, according to a predetermined investment strategy.

Target Groups:

Masters students with an interest in portfolio management.

Languages of Instruction:

English

Course Materials:

None

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Thorsten Hens

Requirements:

Prerequisites:

Successful completion of Portfolio Management Theory 1 and 2

Prior Knowledge:

Portfolio Management Theory 1 and 2

Assessment:

Participation in regular meetings and performance presentations.
Submission of monthly reports. Slides of the presentations and monthly reports must be submitted electronically. The presentation themselves are held on site.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Module Backtesting for Portfolio Management (L)

03SM22MO0038 / Course

Description:

General description:

This course provides an introduction to programming for portfolio management applications, in particular the backtesting of quantitative investment strategies. The class is designed to provide students with tools for other classes, in particular the Portfolio Management Theory and Portfolio Management Implementation seminars. It is also useful for students planning to write a master thesis in the area of portfolio management.

ECTS: 3

Notes:

This course takes place on site.

The mandatory test run for this examination takes place on December 16, 2026 in the lecture hall.

Target Groups:

Master's students with an interest in portfolio management.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Thorsten Hens

Requirements:

Prerequisites:

Prior or simultaneous enrollment in the course "Asset Management: Advanced Investments."

Prior Knowledge:

Good knowledge of Python, finance in general, the functioning of financial instruments, and portfolio management as well as familiarity with quantitative investment strategies.

Assessment:

The examination for the module takes place as a Bring Your Own Device (BYOD) online exam on site on January 13, 2027 between 10:15am and 12:45pm.

Students must bring their own computer for the exam.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Economic Foundations for Finance (L+E)

03SM22MO0039 / Lecture with Practical Exercises

Description:

General description:

The course explains the basics of decision theory and general equilibrium theory which belong to the two main foundations for financial theory. Decision theory is needed for modeling investors' behavior in financial markets. General equilibrium theory is needed for asset pricing and valuation.

ECTS: 6

Notes:

This module takes place on-site.

Languages of Instruction:

English

Course Materials:

1. Slides and lecture notes

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Thorsten Hens

Requirements:

Prerequisites:

Basic calculus knowledge is required.

Assessment:

The examination of the module will take place on site. Written exam on Monday, 11.01.2027, 10:15-12:00 hrs. The Midterm examination of the module will take place on site on November 4, 2026, 10:15-12:00 hrs.

The final grade for the course will be computed by taking the average of the midterm and final exam grades, with equal weight given to both assessments.

(Each exam will contribute 50% to the final grade.)

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Asset Management: Advanced Investments

03SM22MO0040 / Course

Description:

General description:

The lecture covers financial market theory, strategic and tactical asset allocation, and methods used in the development of investment strategies. The course also covers a wide range of investment strategies spanning predictability and the cross-section of expected returns in equity, bond, currency, and options markets.

ECTS: 3

Notes:

This module takes place on site.

Learning Outcome:

The aim of this lecture is to provide students with the theoretical and empirical foundations of the key facets of modern asset management and to introduce them to advanced tools for quantitative asset management.

Target Groups:

Masters students with an interest in portfolio management.

Languages of Instruction:

English

Course Materials:

Slides with bibliographical references.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Thorsten Hens

Requirements:

Prerequisites:

BA degree, ideally with a focus on Banking and Finance.

Prior Knowledge:

Very good knowledge of finance, solid background in mathematics and statistics (calculus, linear algebra, probability theory, regression analysis), and ideally knowledge in portfolio management.

Assessment:

The examination of the module will take place on site. Written exam, Monday, 04.01.2027, 14:00-16:00 (90 Min.)

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Seminar Corporate Governance (S)

03SM22MO0041 / Seminar

Description:

General description:

This course will provide students with a synthesis of Corporate Governance theory, key findings of the empirical academic literature, and actual examples from the market. The aim is to use the theoretical models and findings of the empirical literature to evaluate and qualify governance frameworks of individual companies as well as legal and regulatory proposals that are widely discussed in the media. The course will cover the main actors of Corporate Governance, from shareholders to the board of directors to auditors and regulators. Note that the course is not intended as a pure classical lecture, but also involves a fair amount of discussion about current governance developments and actual cases.

ECTS: 3

Notes:

The number of students is limited. Please register by Email and include a copy of your latest Leistungsausweis (christoph.wenk@uzh.ch).

The course intends to allow for a fair amount of time for discussion.

Please only take the course if you intend to actively participate in a discussion.

Learning method: case studies

Learning Outcome:

- Governance Foundations
- Governance Models
- Legal Framework and Stewardship
- CSR & ESG
- Shareholders
- Stakeholders & Proxy Advisors
- Board of Directors
- Compensation
- Reporting & Audit
- Disciplining Mechanisms

It is further planned to have a talk by a company as well as an investor representative on the topic of governance.

Target Groups:

MA Students in Banking and Finance and WWF in general

Languages of Instruction:

English

Course Materials:

The Seminar will include some E-learning elements which you are asked to do / follow prior to class sessions.
Class sessions are mandatory to attend.

The course will not follow a specific textbook. We will look at academic papers and other resources on corporate governance that are available online. A reading list will be distributed at the beginning of the course.

Further reading (voluntary):

- Corporate Governance Matters by David Larcker & Brian Tayan, ISBN: 978-0-13-351850-4
- Handbook of the Economics of Corporate Governance, Editors: Benjamin E. Hermalin & Michael S. Weisbach, ISSN: 2405-4380

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Alexander Wagner

Requirements:

Prior Knowledge: A sound understanding of Corporate Finance is required. Attendance in the classroom is mandatory.

Assessment: Final Presentations on Saturday, 12. December 2026 (08:00 - 12:00h) and/or Monday, 14. December 2026 (16:00 - 20:00h) The performance assessment is carried out by means of a final presentation and written reports on mini case studies.
Reports on case studies: 40% (two cases), final presentation: 40%, involvement/contribution to class discussion: 20%.
The course intends to allow for a fair amount of time for discussion. Please only take the course if you intend to actively participate in a discussion.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module Portfolio Management Theory 1 (S)

03SM22MO0042 / Seminar

Description:

General description:

This seminar is the second component of the Portfolio Management Program (PMP), a comprehensive program spanning four semesters that combines recent developments in academic and applied research and "real-money" asset management. The seminar makes extensive use of the content covered in the "Asset Management: Advanced Investments" and "Backtesting for Portfolio Management" courses, which are prerequisites for admission to this course. The topics covered include financial market theory, strategic and tactical asset allocation, methods used in the development of investment strategies, and investment strategies spanning predictability and the cross-section of expected returns in equity, bond, currency, and options markets.

ECTS: 3

Notes:

The number of participants is limited. The application details can be found on the DF homepage: <https://www.cpm.uzh.ch/en/application-process.html>. Once admission has been confirmed it is necessary to book the course through the relevant tool.

This course takes place on site.

Learning Outcome:

The aim of the Portfolio Management Program (PMP) is to provide students with a fundamental theoretical and practical education in all key facets of modern asset management. The first two semesters, Portfolio Management Theory 1 and 2, enable students to develop a basis of theoretical knowledge. A special emphasis is placed on academic, fundamental, and quantitative approaches with an eye towards practical applications. Based upon this, the students are afforded the rare opportunity to apply said knowledge in a practical setting during the Portfolio Management Implementation phase.

Target Groups:

Masters students with an interest in portfolio management.

Languages of Instruction:

English

Course Materials:

Diverse materials.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Thorsten Hens

Requirements:

Prerequisites:

BA degree, ideally with a focus on Banking and Finance. Prior or simultaneous enrollment in the courses "Asset Management: Advanced Investments" and "Backtesting for Portfolio Management."

Prior Knowledge:

Very good knowledge of finance, solid background in mathematics and statistics (calculus, linear algebra, probability theory, regression analysis), and ideally knowledge in portfolio management.

Assessment:

Active participation in the seminars; group presentations and exercises. Slides of the presentations and exercises must be submitted electronically.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module Advanced CFA Investment Challenge (S)

03SM22MO0043 / Seminar

Description:

General description:

The purpose of the seminar is to prepare the team representing the University of Zurich for the Swiss semi-final and final of the CFA Investment Challenge.

That team in the vast majority of cases will be comprised of those students who won the Zurich final of the CFA Investment Challenge, but changes in team composition may occur in exceptional circumstances.

ECTS: 3

Learning Outcome:

Develop a convincing and appealing equity story based on a thoroughly-grounded, consistent and precise valuation model.

Prepare a professional equity story presentation.

Target Groups:

Limited to the best performers among the students who took the CFA Investment Challenge.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Michel Habib

Requirements:

Prior Knowledge:

Limited to the best performers among the students who took the CFA Investment Challenge.

Assessment:

In-class presentations and written report.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Irregular)

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline:

Module Stress Testing of Banks (L)

03SM22MO0044 / Course

Description:

General description:

In the aftermath of the financial crisis, regulators looked to ensure banks and financial institutions could survive a severe economic shock and no longer pose systemic risk. As a consequence, bank-wide stress tests became a key tool for risk management.

Bank-wide stress tests measure the resilience against a severe scenario such as a recession. A major advantage of stress tests, compared to more complex risk measures, is that its results are relatively easy to understand which facilitates the communication and usage. However, building a sound stress testing framework and stress testing models is complex.

ECTS: 3

Notes:

This module takes place on-site.

Learning Outcome:

Participants will gain an understanding of key concepts of bank-wide stress testing including an overview of the structure of a bank and key risk types. Based on practical examples and publicly available data, participants will be provided hands-on deep dives in stress testing models as well as an overview of regulatory requirements and management usage. Stress testing will be illustrated for a sample bank.

Target Groups:

MScQF students, MA BF students

Languages of Instruction:

English

Course Materials:

Recommended literature will be provided throughout the course.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Erich Walter Farkas

Requirements:

Prerequisites:

Bachelor's Degree

Prior Knowledge:

Knowledge of quantitative risk management techniques is desirable.

Assessment:

The examination of the module will take place onsite.
Written examination on Friday, 08 January 2027, 08:00-9:45 (60 minutes)
Closed book. One handwritten cheat sheet, no printouts.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

Module Brennpunkt Wirtschaftspolitik – Ökonomie im Kampf der Argumente (S) Focus on Economic Policy - Economics
03SM22MO0045 / Seminar

Description:

General description:

Die Veranstaltung "Brennpunkt Wirtschaftspolitik - Ökonomie im Kampf der Argumente" ist auf Themen der wirtschaftspolitischen Debatten ausgerichtet. Sie wird teilweise als Blockveranstaltung durchgeführt. Ziel ist es, das ökonomische Rüstzeug (Theorie der Marktversagen, Public Choice, Ordoliberalismus) auf konkrete wirtschaftspolitische Fragestellungen anzuwenden und zu diskutieren.

ECTS: 3

Notes:

Dieses Seminar wird von zwei externen Dozenten durchgeführt: Dr. Christoph Eisenring ist Senior Fellow, Dr. Jürg Müller Direktor beim Think Tank Avenir Suisse. Bei Fragen zum Seminar bitte die Dozierenden (Ch. Eisenring, christoph.eisenring@avenir-suisse.ch oder J. Müller, juerg.mueller@avenir-suisse.ch) kontaktieren.

Das Seminar findet vor Ort statt und wird nicht aufgezeichnet.

Learning Outcome:

Anwendung des wirtschaftswissenschaftlichen Instrumentariums auf konkrete Herausforderungen der Schweiz.

Languages of Instruction:

Deutsch

Course Materials:

Module Unternehmensbewertung in der Praxis (S) (Valuation in practice)

03SM22MO0049 / Seminar

Description:

General description:

Zum Thema Bewertung von Unternehmen und Vermögenswerten bietet das Blockseminar Unternehmensbewertung in der Praxis Studierenden die Chance, erworbenes Wissen aus dem Studium zu vertiefen und in spezifischen Fallstudien praxisnah anzuwenden. Dabei werden die Studierenden von Fachexperten mit jahrelanger Praxiserfahrung durch das Seminar begleitet.

Die TeilnehmerInnen bearbeiten im Vorfeld ausgewählte Praxisfälle und präsentieren ihre Lösungen im Rahmen des Seminars. Während des Seminars werden verschiedene Fragestellungen anhand von realitätsnahen Fallstudien gelöst und diskutiert. Dabei nehmen die Studierenden u.a. die Rolle von Beratern im Rahmen einer Unternehmenstransaktion ein.

Die Bedeutung und Umsetzung von Unternehmensbewertungen und M&A in der Praxis wird zusätzlich durch einen Gastreferenten eines Unternehmens erläutert.

Zudem geben Berater Einblicke in die Bewertungs- & Transaktionspraxis anhand ihrer Erfahrung.

ECTS: 3

Notes:

Die Teilnehmerzahl ist beschränkt. Anmeldungen sind unter Einreichung eines Lebenslaufes, eines aktuellen Leistungsausweises und eines kurzen Motivationsschreibens (Begleitbrief) möglich. Anmeldungen senden Sie bitte per Email bis 17. August 2026 an natalia.schweizer@ifbc.ch. Die definitiven Teilnehmer werden per Email informiert. Nach Erhalt der Zulassungsbestätigung ist zusätzlich eine Anmeldung im Modulbuchungstool notwendig (Fristen und Studiengang beachten!).

Die Teilnehmer werden anlässlich einer Veranstaltung über den genauen Ablauf des Seminars orientiert und die Praxisfälle für die Gruppenarbeiten vergeben. Weitere Informationen finden sie auf: <https://www.df.uzh.ch/en/studies/bachelor-master/master/ma-seminars.html>

Learning Outcome:

Anwendung der theoretischen Kenntnisse im Bereich der Unternehmensbewertung anhand der Bearbeitung von Praxisfällen.

Target Groups:

Masterstudenten

Languages of Instruction:

Deutsch

Course Materials:

Spezifische Seminarunterlagen werden bei der Vorbesprechung abgegeben. Hintergrundliteratur zur Unternehmensbewertung sind: Volkart, R.: Unternehmensbewertung und Akquisitionen, 3. Auflage, Zürich 2010 und Volkart, R./Wagner A.F.: Corporate Finance, Grundlagen von Finanzierung und Investition, 7. Auflage, Zürich 2018 und Koller, T./Goedhart, M./Wessels D.: Valuation - Measuring and Managing the Value of Companies, 7th edition, New York 2020.

Merkmale:

Responsible instructor: Alexander Wagner

Requirements:

Prior Knowledge: Fundierte Kenntnisse in Corporate Finance werden erwartet. Diese werden in den BA-Veranstaltungen "Corporate Finance" und "Corporate Finance 2" sowie "Unternehmensbewertung und M&A" vermittelt.

Assessment: Eigenständiger Seminarbeitrag in Gruppen (Lösung der Praxisfälle und Präsentation).

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: Vorbesprechung: 07. September 2026, 08.15 - 10.00 Uhr

Seminar: Dienstag, 17. November und Mittwoch 18. November 2026
Ort: extern / Hotel Sorell, Zürichberg (Orellistrasse 21, 8044 Zürich)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Organisation: Department of Finance

Offered in:

Module Case Studies: Organisationsberatung (mit Kooperationspartnern aus der Praxis) (S) (Organizational Consulting)
03SM22MO0050 / Seminar

Description:

General description:

Im Rahmen des Kurses werden Fallstudien aus dem Themenfeld "Organisationsberatung" / "Strategieberatung" in Kleingruppen bearbeitet sowie Lösungsansätze entwickelt, präsentiert und im Plenum diskutiert. Die einzelnen Sitzungen sind zwei unterschiedlichen Konzeptionen zuzuordnen:

Zum einen werden Fallstudien in Teams bearbeitet und die Ergebnisse in den Sitzungen an der Universität vorgestellt. Zum anderen finden Veranstaltungen mit kooperierenden Unternehmensberatungen statt, in denen Fallstudien in Form von Workshops durchgeführt werden.

Die Teilnehmerzahl ist auf 12 Personen beschränkt.

Bewerbungsfrist: 30.08.2026

ECTS: 6

Notes:

Die Lehrveranstaltung setzt eine individuelle Bewerbung (über das Modulbuchungstool) mit Motivationsschreiben, CV und Notenübersicht am Lehrstuhl für Organisation und Management voraus. Nähere Informationen zum Bewerbungsprozess finden Sie unter:

<https://www.business.uzh.ch/en/research/professorships/om/teaching/CaseStudies>

Die Anmeldung zu diesem Seminar erfolgt über das Modulbuchungstool
:<https://studentservices.uzh.ch/uzh/launchpad>

Learning Outcome:

- (1) Studierende erwerben Einblicke in die praktische Anwendung von bekannten Management-Tools.
- (2) Studierende werden an die Methodik (die systematische Bearbeitung und Lösung) von Case Studies herangeführt.
- (3) Studierende erhalten die Möglichkeit ihre Soft-Skills (wie z.B. Präsentationstechniken, Slidewriting und Teambuilding) weiterzuentwickeln.

Target Groups:

Engagierte Masterstudierende mit Interesse an oder Affinität zu Consulting und Projektarbeit.

Languages of Instruction:

Externe Termine primär in Englisch. Interne Termine auf Deutsch.

Merkmale:

Responsible instructor: David Seidl

Requirements:

Prerequisites: Grundlegende Kenntnisse der Organisations- und Managementlehre und

Interesse an der Lösung und Präsentation von Fallstudien (Case Studies) im Rahmen von limitierten Ressourcen.

Prior Knowledge: Praktika und allgemeine erste Arbeitserfahrungen.

Assessment: Kombination aus mündlicher Bewertung (Teilnahme an den Seminaren, Präsentation, Diskussion) und schriftlicher Beurteilung (Aufsatz).

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: Die erste und letzte Veranstaltung findet Freitagvormittags an der UZH im Zentrum statt. Die externen Sessions finden bei den jeweiligen Beratungen idR. am Freitagnachmittag statt und schliessen mit einem gemeinsamen Apéro ab. Durch die Zusammenarbeit mit Externen kann es evtl. mittelfristig zu leichten Veränderungen bei den Veranstaltungszeiten kommen.

Module The Practice of Strategic Management (S)

03SM22MO0052 / Seminar

Description:

General description:

While strategy is often understood as something organizations have, the strategy-as-practice perspective emphasizes strategy as something people in organizations do. In other words, strategy is seen as a social practice that is constituted by the daily activities of strategy actors. Taking this perspective, in this seminar we will discuss a range of important topics in strategic management research, including the activities of different strategy actors (top and middle managers), the dynamics of strategic decision making, the process of strategic change, and the practices and tools used in strategizing. This seminar is primarily research-oriented and aims to provide students with the foundations to understand the practice-based approach to studying strategic management.

Based on papers published in top international journals, we will discuss concrete research exemplars as to how strategists produce, reproduce and change strategy.

This seminar is highly participative. In each session, students are required to actively take part in discussions. During the semester, students are in charge of presenting papers of one session and to animate discussions in another one.

ECTS: 3

Notes:

Places in the seminar are limited.

Application required by August 30, 2026.

To apply, please upload the following documents in the module booking tool:

- Your CV
- A motivational statement
- Your transcript of records (incl. current GPA)

In case of questions, please contact Dr. Tania Räcker.

Application for this seminar is the module booking tool
: <https://studentservices.uzh.ch/uzh/launchpad>

Learning Outcome:

At the end of the course, you should be able to:

- Understand the practice approach to studying strategic management.
- Understand how practices shape important aspects of strategic management.
- Understand the role of strategists in the strategy process.

Target Groups:

Für Englischsprachige geeignet

Languages of Instruction:

Englisch

Course Materials:

Primarily journal articles. Course materials will be accessible via OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Module Impact Investing and Financial Inclusion (L)

03SM22MO0055 / Course

Description:

General description:

Impact investing has become an increasingly visible part of the broader field of sustainable investing. This course draws from economics, management, and finance frameworks to explain the existence and explore the functioning and challenges of impact investing.

The course examines the characteristics and claims related to impact investing through a deep dive into the field of financial inclusion, also called microfinance. The financial inclusion industry in emerging and developing economies offers a variety of financial services to low-income and vulnerable customers who, in the past had been deemed "unbankable" because of their lack of assets, income, or security.

Specialized banks and non-bank institutions are offering services, commercial banks are "downscaling", mobile network operators offer financial services. Funding through aid agencies has long been complemented or substituted by impact and commercial investments.

Financial sector regulators are covering microfinance. Specialized investment funds and asset managers (a large share of whom are based in Switzerland), rating agencies, training institutes, and credit reference bureaus complement the industry, which, till today, receives a large share of development-oriented impact investments, much of it in private placements.

The course focuses on financial inclusion because this field is considered a pioneer and flagship in impact investing and an engine of growth to achieve a range of sustainable development goals. Financial inclusion is located at the intersection of public policies, regulations and public sector funding on the one hand, and private sector investments on the other hand, thus allowing to explore the links between impact investing and blended finance. Yet, the course also touches other industries which are considered recipients of impact investments.

ECTS: 3

Notes:

This module takes place onsite and will be recorded as podcast.

Learning Outcome:

- (1) Define and explore the concept and practices of impact investing.
- (2) Apply empirical methods to assess the performance of impact investing, with applications to financial inclusion.
- (3) Analyze the investment universe, practices and performance of financial institutions that serve low-income customers in developing economies.
- (4) Construct and critically appraise business cases for investment in other targeted impact sectors.

Target Groups:

Master Students

Languages of Instruction:

English

Course Materials:

Reading list and materials will be made available in the syllabus and lecture notes.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Zacharias Sautner

Requirements:

Prerequisites:

Bachelor Degree

<u>Prior Knowledge:</u>	"Banking" (bachelor programme level)
<u>Assessment:</u>	The examination of the module is carried out as a combination of a group assignment and an exam. Written examination: December 16, 2026, 12:15-13:45
<u>Grading Scale:</u>	1-6 Quarter Grades Given
<u>Repeatability:</u>	Can be repeated once
Organisation:	
<u>Offer pattern:</u>	1 Semester (Every Fall Semester)
<u>Booking Deadline/Period:</u>	from We 12.08.2026 10:00 to Tu 06.10.2026 24:00
<u>Cancellation Deadline:</u>	from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Intermediate Statistics (L+E)

03SM22MO0059 / Lecture with Practical Exercises

Description:

General description:

This course is specifically designed for students interested in entering a Ph.D. program in economics or finance after finishing their Master degree (be it at UZH or elsewhere). This is because Ph.D. courses in these two fields require certain knowledge in statistics and probability theory that is not taught at the Bachelor level. On the other hand, students who plan to find a job in industry after finishing their Master degree might not find this course to be overly useful to them.

ECTS: 6

Notes:

The module will not be recorded/no podcast.

Languages of Instruction:

English

Course Materials:

John A. Rice: Mathematical Statistics and Data Analysis (with CD Data Sets).
Brooks/Cole, International student edition, 2006.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Michael Wolf

Requirements:

Prerequisites:

Bachelor courses in Statistics and Introductory Econometrics

Assessment:

The examination of the module will take place onsite. Written exam on
11.01.2027, 4:15-5.45 pm (90 min).

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Public Debt Management (L)

03SM22MO0060 / Course

Description:

General description:

This course addresses a current hot topic in economic and fiscal policymaking that has important implications for asset and risk management. It analyses both practical and theoretical aspects related to public debt management. After a general description of the prevailing global situation, the financing instruments and selling methods used by public debt managers will be discussed.

This will be followed by a derivation of the fundamental equation which constraints fiscal policymakers' and debt managers' actions. Against this backdrop, the two main approaches in public debt management pursued in the literature on the one hand, and in practice on the other, will be examined. The macroeconomic perspective focuses on welfare aspects of debt management decisions. Its main objective is to provide fiscal insurance to the government, the key element being 'risk minimisation'. By contrast, the 'micro portfolio optimisation perspective' focuses on debt servicing costs. Both approaches will be critically analysed. Students who successfully complete the course will gain a strong background on public debt management from a theoretical, empirical and practical perspective, as well as a better understanding of present challenges for public debt managers and bond investors in a world overloaded with debt.

ECTS: 3

Notes:

This lecture is held by an external lecturer, Dr. Enzo Rossi, who is currently working as an Economic Advisor at the Swiss National Bank (SNB). Email address: enzo.rossi@snb.ch.

The lecture will not be recorded.

Module Principles of Neuroeconomics (L)

03SM22MO0061 / Course

Description:

General description:

This course will cover the basic principles of neuroeconomics, research methods, and current literature on neuroeconomics.

ECTS: 3

Learning Outcome:

Course participants will learn the basic principles of neuroeconomics and relevant research methods.

Target Groups:

Neuroscientists, psychologists, biologists, computer scientists, economists

Languages of Instruction:

English

Course Materials:

OLAT

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Philippe Tobler

Requirements:

Prior Knowledge:

This course is designed to provide a basic understanding of neuroeconomics. Thus, no advanced training is required.

Assessment:

Written exam on January 13, 2027 (60 minutes, 4.30 - 5.30 pm). The examination of the module is carried out onsite.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Global Strategic Management (L+E)

03SM22MO0063 / Lecture with Practical Exercises

Description:

General description:

Global Strategic Management addresses the challenges confronting managers and firms competing internationally. The course focuses on multinational enterprises ("MNEs"), which own or control significant resources and operations in several, often disparate countries, cultures, and markets. An MNE's performance depends on internal and external income streams denominated in multiple currencies. MNEs have operations situated in localities with different and often face conflicting public policy priorities, product preferences, and standards of ethical conduct. The context creates strategic challenges that are distinctly different from operating in a single country. The overall theme of the course is understanding the MNE: how it is structured, how it competes, and how we explain persistent differences in performance between the MNC and its various rivals. The overall aim of the course is to understand how strategies carried out by the MNE in an international context is different from firm strategy in a purely domestic setting. The course will consist of lectures and case studies.

ECTS: 6

Notes:

Attendance at all meetings is strongly encouraged.
Students who have attended all guest speaker lectures will receive extra 5 points (out of 100) in the final exam, provided that they pass the final exam without this bonus.

Learning Outcome:

After the course, students should

- Understand the challenges created by operating in multiple international markets
- Know key managerial challenges faced by managers of MNE and the solutions available to address these
- Understand the differences between domestic and international strategy

Target Groups:

Masters level students

Languages of Instruction:

English

Course Materials:

Please see the syllabus on the Chair's website.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Thomas Keil

Requirements:

Assessment:

The exam of the module will take place as a Bring Your Own Device (BYOD) online exam on site on 14.01.2027 from 10:00-12:00.

To take the exam, you must bring your own laptop (Windows or macOS). The exam cannot be taken on tablets. To take the exam, you must install the Safe Exam Browser (SEB) in advance and take a functional test using your individual technical equipment. Exact information on the required SEB version and other details will be provided to you during the

semester.

The mandatory functional test will take place on 17.12.2026. Completion of the functional test is mandatory. Students who have not completed the functional test will not be admitted to the final exam and fail the course.

The course has mandatory exercises (Pass or Fail). These mandatory assignments require physical presence in lectures scheduled during the last months of the semester.

Provided that the students have completed and passed the mandatory assignments, the final grade of the course is based on the results of the final examination. Students who have attended all guest speaker lectures will receive extra 5 points (out of 100) in the final exam, provided that they pass the final exam. The exam will be based on the lectures and textbooks. To pass the course, at least 50% of the total points are required.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module Bank Treasury Management (L)

03SM22MO0064 / Course

Description:

General description:

The course Bank Treasury Management provides an introduction to relevant concepts, models, and methods from a practitioner's perspective, which are crucial in the daily management of a bank's balance sheet risk.

The main topics are:

- Bachelier's option pricing model
- The capital structure irrelevance principle and the debt overhang problem
- The four-moment CAPM and the Arbitrage Pricing Theory (APT)
- Mandelbrot's main criticism of modern Finance
- The fundamental theorem of asset pricing (FTAP) and the risk-neutral measure Q
- The term structure equation for interest rates
- The zero lower bound and the Hicksian liquidity trap
- Bertrand competition and the Nash equilibrium
- Valuation in the forward and the futures market
- The Black option pricing formula via Margrabe's formula
- Term structure modeling
- The consumption CAPM and the forward measure
- The normal and lognormal LIBOR market model

ECTS: 3

Notes:

The module only takes place onsite.

Learning Outcome:

Students know and can apply relevant methods and concepts of Bank Treasury Management.

Languages of Instruction:

English

Course Materials:

Lecture Slides

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Steven Ongena

Requirements:

Prerequisites:

Your basic knowledge regarding statistics, linear algebra, analysis, microeconomics, financial economics, corporate finance, and monetary economics is needed.

Prior Knowledge:

From stochastic calculus, we will apply (but not prove) Itô's lemma, the Feynman-Kac formula, and the Radon-Nikodym theorem.

Assessment:

Multiple Choice. Closed book: one handwritten A4 «cheat sheet» (both sides) allowed.

Written Exam on Monday, 4 January 2027, 08:00 - 10:00 h (60 min)

The examination of the module is carried out onsite.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (One-Time)

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Labor Economics (L)

03SM22MO0066 / Course

Description:

General description:

This course introduces students to theoretical concepts and empirical research in labor economics. It covers topics such as labor supply and demand, human capital investment, gender differentials, the impacts of technology and trade on the labor market, and the intergenerational persistence of labor market inequalities.

ECTS: 3

Notes:

Please note: You should not take this course, if you are also taking the "Empirical Methods" compulsory course this semester, because lecture AND exam of both courses are at the same time (no exceptions possible).

The lecture will not be recorded/no podcast. Lecture takes place at SOF-G-21.

Learning Outcome:

At the end of the course, students will be familiar with core topics of labor economics.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

David Dorn

Requirements:

Prior Knowledge:

You are assumed to be familiar with undergraduate-level microeconomics and statistics/econometrics.

Assessment:

The examination of the module will take place onsite. Written examination on Monday 11.1.2027, 10:15-11:45 am (90 minutes).

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Consumer Insights (VU)

03SM22MO0069 / Lecture with Practical Exercises

Description:

General description:

Die Studierenden erhalten durch das Modul "Consumer Insights" eine Einführung in das wissenschaftliche Arbeiten als Vorbereitung für empirische Masterarbeiten im Bereich Konsumverhalten und Marketing.

Im Rahmen eines Flipped Classroom Kurses erhalten die Studierenden anhand von diversen angewandten Beispielen aus der aktuellen Forschung eine Einführung in den Forschungsprozess. Als Basis dafür erhalten die Studierenden einen Überblick über zentrale Theorien, Forschungsfelder, Methoden, Open Science Standards und Trends. Die Studierenden werden nach diesem Kurs in der Lage sein (1) konkrete Forschungsfragen und Hypothesen aus bestehender Literatur abzuleiten, (2) experimentelle Forschungsdesigns zu entwickeln, (3) Fragebogen zu erstellen und (4) erhobene Daten zu analysieren und diese im Hinblick auf Forschungsfragen/Hypothesen zu interpretieren und diskutieren.

Die Inhalte dieses Kurses werden interaktiv vermittelt und im Rahmen von verschiedenen Übungen angewendet. Schliesslich werden die Studierenden ihre Kenntnisse zum Forschungsprozess anhand einer eigenen Forschungsidee im Rahmen einer Einzelarbeit (zu eigenem Experiment) sowie einer Gruppenpräsentation vertiefen.

ECTS: 3

Notes:

- Die Anmeldung für diese Lehrveranstaltung erfolgt über das UZH Modulbuchungstool.
- Weitere Informationen werden auf OLAT zur Verfügung gestellt.
- Bitte das Modul bis 1 Woche vor Beginn der Blockveranstaltung, d.h. bis spätestens Dienstag, 1.9.2026, 24:00, buchen.
- Kontaktperson für Fragen zur Lehrveranstaltung: Dr. Sabrina Stöckli (sabrina.stoeckli@business.uzh.ch).

Learning Outcome:

Ziel ist es, die wichtigsten psychologischen Theorien, Konstrukte und Methoden des Konsumentenverhaltens kennenzulernen. Nach der Lehrveranstaltung sollen die Studierenden in der Lage sein evidenz-basierte Forschungsfragen und Hypothesen zu formulieren. Zudem sollen die Studierenden die Methoden der Konsumentenverhaltensforschung so einsetzen können, dass eine systematische Verzerrung von Ergebnissen vermieden wird. Die Studierenden sollen Wissen über das Studien-/Experimentdesign für eigene Forschungsideen einsetzen können. Die Studierenden sollen grundlegende statistische Konzepte wie die Moderations- und Mediationsanalyse verstehen und anwenden können.

Target Groups:

Studierende des Masterprogramms

Languages of Instruction:

Deutsch (Unterrichtsmaterialien Englisch und Deutsch)

Course Materials:

Folien und Literatur werden während des Kurses bekanntgegeben.

Merkmale:

Responsible instructor: Martin Natter

Requirements:

Prerequisites:

- Zulassung zum Master Programm.
- Kenntnisse der Programmiersprache R werden vorausgesetzt.

Assessment:

- Individueller Bericht zu eigener Forschungsidee (inkl. Experiment). Inhalt, Form, Umfang und Abgabedatum werden in der Vorlesung kommuniziert.
- Durchgehende Anwesenheit wird vorausgesetzt.
- Benotung: 60% individueller Bericht, 40% Mitarbeit (dazu gehört u.a. eine Gruppenpräsentation).
- Die aktive Teilnahme an Experimenten bildet einen zentralen Teil der Lerninhalte. Diese Teilnahme kann nur garantiert werden, wenn das Modul bis 1 Woche vor Beginn der Blockveranstaltung, d.h. bis spätestens Dienstag, 1.9.2026, 24:00, erfolgt.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module Machine Learning - A non-technical introduction with applications to Marketing (L)

03SM22MO0072 / Course

Description:

General description:

Machine Learning has become one of the core pillars of information technology. Since the amount of available data is steadily increasing, smart data analysis will become more and more important in the future. This course introduces Machine Learning in a non-technical, hands-on way with integrated exercises.

ECTS: 3

Notes:

Please visit our website at <https://tinyurl.com/Edu-Master-Classes> for current information and details about the course.

Learning Outcome:

- Get familiar with the concept of machine learning.
- Understand the basic theory behind various machine learning techniques.
- Apply different machine learning techniques and interpret the results.

Target Groups:

Master students

Languages of Instruction:

English

Course Materials:

Hastie, T., Tibshirani R., Friedman, J. (2013): The Elements of Statistical Learning
- Data Mining, Inference, and Prediction, 2nd edition, Springer.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

René Algesheimer

Requirements:

Prior Knowledge:

Recommended: Marketing Analytics, R - a non-technical introduction with applications to Marketing

Assessment:

The following components comprise the final grade:

1. Daily coding exercises: every day of the class (20%): on-site assessments (computer-based, BYOD format; bring a charger)
2. Kaggle competition (10%): on-site assessment (computer-based, BYOD format; bring a charger)
3. Final exam on Friday, 04.09.2026 09:30-10:00 (50%): on-site, written examination, multiple choice format (Room PLM 103/104)
4. Online exercises on DataCamp (to be completed after the course) (20%)

Absence Policy for Daily Coding Exercises:

In the event that a student is unable to participate in a daily coding exercise due to a valid medical reason, the student must promptly submit a doctor's certificate to the instructor (within one week of the missed assessment).

With a valid doctor's certificate, students are thus permitted to miss a maximum of two daily coding exercises. Assessments missed under these circumstances will not be factored into the final grade calculation.

Consequently, only those assessments taken will contribute to the final grade. If any further daily coding exercises are missed, these will be graded as "1".

Failure to provide the necessary documentation within the stipulated one-week period will result in the missed assessment(s) being graded with a "1" and counting towards the final course grade.

This policy does not apply to the Kaggle Competition and Final Exam. In cases where the final day (i.e., Day 5) of the course must be unavoidably missed, the official regulations and procedures outlined by the Dean's Office apply.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module Global Poverty and Economic Development (L+E)

03SM22MO0073 / Course

Description:

General description:

This course will examine major current issues in development economics, with a focus on the application of econometric evaluation methods in development economics. Topics include: poverty and inequality measurement, access to finance, private sector development, environment and climate change.

ECTS: 6

Notes:

Some exercise slots might be used for lecture sessions (and vice versa).

The module will not be recorded/no podcast.

Target Groups:

MA students

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Lorenzo Casaburi

Requirements:

Prior Knowledge:

Master-level micro and econometrics

Assessment:

The grade will be based on problem sets (20%) and a final exam (80 %).

Written exam on January 8, 2027 (90 minutes, 2.15 - 3.45 pm).

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

Module Business Cycles: Empirics and Theory (L)

03SM22MO0077 / Course

Description:

General description:

This lecture aims at providing first answers to questions around the following topics:

Empirics: what are the empirical properties of the business cycle? How do applied economists monitor the business cycle in real time? Where do Switzerland and the world's most important economies currently stand in their cycles? What are the main shocks causing the business cycle and how can we identify these shocks?

Modern business cycle theory: what are the most important elements of the modern workhorse model? What can the model be used for? What are its shortcomings? In which directions does current research go? Normative questions: Why do people care about the business cycle? How costly are economic fluctuations and inflation? Should governments attempt to stabilize the cycle?

We will start each lecture with a short student presentation (5-10 minutes) on an important economic indicator that has been published during the past week.

The goal is to get to know the most prominent economic indicators and to develop a feeling for the current state of the business cycle in Switzerland and the most important other economies. For each indicator there is a limited number of slots available that are allocated on a first come, first served basis. Each student must enrol for one indicator, submit her/his chartbook in time, be present at the day they chose, and hold the presentation in case that they are selected. To be admitted to the written final exam the weekly indicator review task has to be passed.

ECTS: 3

Notes:

This lecture is held by two external lecturer: Dr. Yannic Stucki, who is an economist in the Forecast and Analysis Switzerland unit at the SNB. Contact: yannic.stucki@snb.ch and Dr. Matthias Burgert, who is an economist in the Monetary Policy Analysis unit at the SNB. Contact: matthias.burgert@snb.ch.

The lecture will not be recorded/no podcast.

Target Groups:

This class is aimed at Master students.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Mathias Hoffmann

Requirements:

Prior Knowledge:

You should know basic microeconomics (profit and utility maximisation) and econometrics (OLS regression). It also helps if you have already encountered the Ramsey model, monopolistic competition, and structural vector autoregressions (SVAR).

Assessment:

The examination of the module will take place onsite. Written examination on Monday 11.1.2027, 60 minutes, 4.15-5.15 pm.

To be admitted to the written final exam the weekly indicator review task has to be passed (see end of course description for details).

Grading Scale: 1-6 Quarter Grades Given

Module Seminar on Responsible Leadership (S)

03SM22MO0080 / Seminar

Description:

General description:

A globalized business world poses numerous challenges for business leaders, decision makers, managers, and employees. In particular, leading in a responsible and sustainable manner has become one of the major challenges managers need to deal with. Triggered by recent developments including high-scale business scandals and an ever increasing societal pressure for companies to operate responsibly and sustainably, those working in organizations frequently feel the need for guidance when it comes to simple questions like "What does responsibility mean?", "Why be responsible?" or "How can I be responsible?", etc. At the same time, being able to deal with these challenges, pressures, and questions offers a wide range of opportunities for business leaders to develop sound strategies, create long-term value and sustainability, and to have a positive impact which makes a difference. The objective of this course is to familiarize students with the challenges and opportunities of responsible leadership.

ECTS: 3

Notes:

The seminar is limited to a maximum of 18 students. To apply, please send your CV, an overview of attended courses and a short motivation for your participation (max 1 page) until August 26 by email to Christian Vögtlin (voet@zhaw.ch).

The seminar will take place onsite on the following dates:

Introduction and assignment of presentation topics:

- Wednesday, 16 September 2026, 14:00-18:00

Block 1:

- Wednesday, 21 October 2026, 12:15-18:00

- Thursday, 22 October 2026, 08:00-13:45

Block 2:

- Wednesday, 25 November 2026, 12:15-18:00

- Thursday, 26 November 2026, 08:00-13:45

Further information will be placed on our homepage:

<http://www.business.uzh.ch/professorships/as/teaching/overview.html>

Learning Outcome:

The objective of this course is to familiarize students with the challenges and opportunities of responsible leadership. Students will thereby

- Learn to understand the current debates on the responsibility and ethicality of leadership in the global business environment
- Reflect about responsible leadership in general and their own leadership values in particular
- Understand and learn ways to engage with the challenges of leadership
- Train their analytical, reflective, holistic, and creative thinking

Languages of Instruction:

English

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Andreas Scherer

Requirements:

Assessment: In order to get credit for the course, students have to participate in the seminar meetings (10% of the final grade), present their findings on the chosen topic to the class (30% of the final grade) and write and submit a seminar paper (60% of the final grade).

Grading Scale: 1-6 Quarter Grades Given

Module Monetary Policy and Financial Markets (S)

03SM22MO0083 / Seminar

Description:

General description:

Overview: The objective of the seminar "Monetary Policy and Financial Markets" is to give students theoretical and practical insights into linkages between monetary policy implementation and central bank activities, on the one hand, and financial markets, on the other. We will cover foundational material as well as topics of current and ongoing interest in practice. Topics may include, but are not limited to, different approaches to monetary implementation, how central banks control interest rates, the role of collateral frameworks, quantitative easing, the functioning of money markets, the role of banks and maturity transformation, bank regulation, central bank digital currencies (CBDCs), stablecoins, the role and value of reserves, liquidity management, and central bank reserve management.

ECTS: 3

Notes:

This module takes place on-site.

Master students, maximum 20 participants. Students must apply for the course by email (incl. brief motivation letter, latest academic record & CV) and will be selected by the lecturers. Please submit your application until September 2, 2026 to secretariat.nyborg@df.uzh.ch.

Learning Outcome:

The seminar seeks to deepen students' understanding of the linkages between monetary policy implementation and central bank activities, on the one hand, and banking and financial markets, on the other.

Target Groups:

Master students with an interest in monetary policy, the functioning of money, and financial markets.

Languages of Instruction:

English

Course Materials:

Bindseil, U. (2014). Monetary Policy Operations and the Financial System. Oxford University Press.

Nyborg K. G. (2016). Collateral Frameworks: The Open Secret of Central Banks. Cambridge University Press.

Additional reading material will be announced in the lecture.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Kjell G. Nyborg

Requirements:

Prior Knowledge:

This seminar is for Master students.

Assessment:

A report on a topic related to the seminar as agreed with the lecturers as well as a presentation on the report. Students are graded on both the report itself and the presentation.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

<u>Offer pattern:</u>	1 Semester (Every Fall Semester)
<u>Dates/Times/Deadlines:</u>	Weekly lectures at the beginning of the semester followed by a block event towards the end of the semester.
<u>Booking Deadline/Period:</u>	from We 12.08.2026 10:00 to Tu 06.10.2026 24:00
<u>Cancellation Deadline:</u>	from We 12.08.2026 10:00 to Tu 06.10.2026 24:00
<u>Organisation:</u>	Department of Finance
<u>Offered in:</u>	Fall Semester 2026 Fall Semester 2025 Fall Semester 2024 Fall Semester 2023 Fall Semester 2022

Module FinTech & InsurTech – Digitization of the Financial Services Industry (L+E) (Digitalisierung der Finanzindustrie)
03SM22MO0085 / Lecture with Practical Exercises

Description:

General description:

The lecture "FinTech - Digitalization of the Financial Industry" is intended to give an introduction to the topic and consist of two parts: (1) Theory:
This part contains a mixture of scientific content and practical contributions.

(2) Lab:

This part includes the development of a concept for a FinTech solution of your choice (e.g. mock-up / prototype). The theoretical part takes place as a 1.5 day block seminar, the lab part is part of a half-day block course. The students have the opportunity to present their developed concepts to a jury of specialists consisting of start-up entrepreneurs, venture capitalists and digitization experts from financial service providers and to receive feedback.

ECTS: 3

Notes:

This module takes place on site.

Learning Outcome:

Introduction to the theory and practice of Fin-Tech and InsurTech as well as acquiring skills to develop your own Fin-Tech and InsurTech concepts.

Target Groups:

Students in the Master of Arts in Economics and the Master of Science in Business and Economics or Informatics

Languages of Instruction:

English

Course Materials:

Textbook and other literature

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Thorsten Hens

Requirements:

Prerequisites:

Passed Bachelor-Level, Branch of Study: Bachelor of Arts UZH in Business and Economics or Informatics

Assessment:

The examination of the module will take place on-site.
Seminar paper in groups, (20 pages, 80%), with final presentation (20%)
(Wednesday, 9.12.2026, 09:00-18:00 Uhr).

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Meta-Analysis (S)

03SM22MO0092 / Seminar

Description:

General description:

Meta-analysis is a statistical technique for combining findings from multiple independent studies and is often used to assess the effectiveness of interventions. In this seminar, we will cover how to 1) evaluate and select studies to include in a meta-analysis, 2) conduct common meta-analyses, and 3) present and interpret the findings.

ECTS: 3

Notes:

This seminar is limited to 30 participants and requires an application. Application and allocation is handled via the module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>.

Personal attendance at all sessions of a seminar is mandatory. If demand exceeds capacity, priority is given to Economics majors.

IMPORTANT: Seminar booking periods differ from regular lecture module booking periods.

Please be aware that the deadline for application ends before the start of the semester and that this seminar has a shortened module booking period (see under Organization). After the request period has passed it is no longer possible to apply for a place in the seminar or on the waiting list.

More information on the process can be found on our website:

<https://www.econ.uzh.ch/en/study/undergraduate/ma/seminar.html>

Learning Outcome:

Participants in this seminar will be able to appropriately design, conduct and present results of a meta-analysis.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Module The Economics of Human Capital (S)

03SM22MO0100 / Seminar

Description:

General description:

This seminar examines (theoretically and empirically) the processes of skill (or human capital) formation throughout an individual's life. The theory of human capital applies generalized cost-benefit analysis to the investment in skills. In light of this theory, we will discuss in detail who would be willing to invest in socially productive skills, and under what conditions. Our discussion will not be limited to investments in cognitive skills (via investment in education, for example) but also will include investments in non-cognitive (or "soft") skills. We will examine the evidence about the relative importance of these skills to labor market outcomes and the optimal timing of investments.

ECTS: 6

Notes:

Please note, the number of students that can participate in this seminar is limited. To determine who is allowed to participate, each interested student will be asked to prepare a short assignment. Students who are interested in taking the seminar should e-mail Professor Segal (carmit.segal@business.uzh.ch) before September 14, 2026. Students will be notified of the acceptance decision on September 15, 2026

Learning Outcome:

Students will acquire knowledge about the economic models of investments in skills and the empirical evidence regarding the relationship between different skills and labor market outcomes.

Through their work on the homework assignments and seminar paper, students will learn how to construct hypotheses based on theories learned in class or on a combination of such theories and inputs from the "real world" (such as newspaper articles or their own experiences as workers and students). They will understand what data is relevant to test such hypotheses (both ideally and in practice) and know where to look for such data, how to use such data to determine whether it supports the hypotheses and what conclusion (and limitation) can be drawn based on the relationships found in the data.

Languages of Instruction:

The course is taught in English. All the assignments, presentations, as well as the seminar paper must be written in English.

Course Materials: Papers will be distributed electronically.

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Carmit Segal

Requirements:

Prerequisites: Successful completion of a bachelor's degree.

Prior Knowledge: Microeconomics and econometrics

Assessment: The seminar is composed of mandatory weekly meetings, in which we will discuss different theories and the evidence supporting them. Part of the meetings will be devoted to student presentations of their homework assignments, which are designed to help the students learn how to construct testable hypotheses from theories and/or real world inputs and provide them with the tools to find the appropriate data in order to empirically test their hypotheses. In addition to homework presentations throughout the semester, students will be presenting their

final work in the last weeks of the semester (see the "Termine" section for details) and are expected to submit a seminar paper summarizing that work.

The module grade will be determined based on the student's seminar paper and its presentation (50% of the grade), homework (40% of the grade), and class participation (10% of the grade). To pass the class a student needs to have a passing grade in each of these components.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (One-Time)

Dates/Times/Deadlines: The tentative dates and times for seminar paper presentations are: December 10, 2026 (between 12:00 and 16:00) and December 11, 2026 (between 10:00 and 16:00). Please note that some of these dates/times do not coincide with the seminar's usual hours and/or days, they have been assigned to accommodate up to 20 students. In case they are unnecessary, some of these dates/hours will be canceled. Participation in classmates' presentations is mandatory. However, conflicting classes' schedules will be taken into consideration. The exact times and dates of each individual presentation will be determined during the course of the seminar.

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Statistical Foundations for Finance (Mathematical and Computational Statistics with a View Towards Finance and
03SM22MO0103 / Course

Description:

General description:

We begin with a very fast-paced review of the measure-theoretic underpinnings of probability spaces and random variables. This should be a review, because the class is designed explicitly for the quant-finance-masters students, who are expected to have had this material. We will also review moment generating (MGF) and characteristic functions (CF), the standard inversion theorems, convolutions and other functions of two random variables, as well as other topics in the theory of probability. We will also cover the use of saddlepoint approximations for inverting the MGF, derivation of the central limit theorem, and, extensively, stochastic convergence concepts.

We will then cover financial risk measures, notably Value-at-Risk and Expected Shortfall. The rest of the course is dedicated to statistical inference in the so-called IID setting, with emphasis on distribution theory, likelihood, use of inversion theorems, simulation, optimization, and other computational methods. Topics include the bootstrap for confidence intervals, goodness-of-fit measures from the empirical CDF, distributional hypothesis testing, the (mis-)use of p-values, various alternative estimators, shrinkage estimation, discrete mixture distributions, the EM-algorithm, theory of order statistics and tail estimation (Hill and POT).

ECTS: 6

Learning Outcome:

On successful completion of this module, students should be able to: Be fluent with the major aspects of the aforementioned (large) list of topics, and have confidence and competence in (i) being able to implement the methods computationally, and (ii) be able to read, understand, and implement theory and methods from the academic literature in quantitative finance, financial econometrics, and quantitative risk management.

Target Groups:

The course has been designed and optimized for the students in the Masters of Quantitative Finance program, but is open and encouraged to well-prepared masters students in the regular Banking and Finance program, as well as Data Science and Economics.

Languages of Instruction:

English

Course Materials:

I will send you via OLAT email my notes for the course. We further require my textbook "Fundamental Statistical Inference: A Computational Approach".

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Marc Paoletta

Requirements:

Prerequisites:

same as 'Vorkenntnisse'

Prior Knowledge:

Real analysis, ideally an exposure to the basics of abstract measure theory, and calculus-based courses in probability theory, and mathematical statistics. A good command of one (or more) of the major prototyping computer languages is necessary, e.g., Python, Matlab, R, etc.

Assessment:

There is no final exam during the usual final-exams-week. Instead, we will have three written exams that take place during lecture time on October 6, November 10, and December 15, 2026.

<u>Grading Scale:</u>	1-6 Quarter Grades Given
<u>Repeatability:</u>	Can be repeated once

Module BME 311 Animal experimentation and alternative methods in biomedical research

07SMBME311 / Course

Description:

General description:

In research, it is crucial to find the right methods to answer scientific questions. In this lecture, we will take a closer look at methods and models that are often used in biomedical research. Our focus here is on animal experiments and alternatives to these like 3D cell culture or in silico approaches. The quality of science (study design, transferability, validity, scientific rigor, open science) and science ethics issues (animal ethics, biomedical ethics, 3Rs and animal welfare) will also be discussed.

ECTS: 3

Learning Outcome:

At the end of this module, students are able to:

- discriminate common methods of biomedical research, especially animal experiments and alternatives to animal experimentation.
- use important criteria for method and model choice.
- explain the basic legal regulation of animal experiments in Switzerland and the 3R principles (Replace, Reduce, Refine).
- use different ethical theories and concepts (in the field of science and medicine).
- explain the principles of good scientific practice and evaluate the validity of scientific results.

Merkmale:

Responsible instructor: Paulin Jirkof

Requirements:

Prerequisites: Master students Biology and Biomedicine

Assessment: 15 min presentation in English (graded)
Group work with presentation on a field of research (application of the principles learnt). Using a specific research area as an example, students discuss criteria for the choice of methods, experimental design, legal requirements and the associated ethical considerations.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module BME 345 Biomaterials and Applied Technologies in Dentistry

07SMBME345 / Block Course

Description:

General description:

Advances in the field of biomaterials and digital technologies changed the conventional applications in the dental profession and introduced many therapy options for tooth-, implant- and mucosa-borne solutions. In this course, fundamental knowledge and current developments in the field of dental biomaterials, namely metals, high performance ceramics, polymers and composites will be introduced and formative, computer-aided subtractive and additive digital technologies will be demonstrated and practiced. Practical part of the course will allow for experiencing fabrication technologies for reconstructions and tissue substitutes as well as practising digital impression technologies, designing, manufacturing artificial materials and testing their stability. The course topic is at the interface between material science and biomedical engineering. Students are expected to approach a specific topic by self- study, literature and data analysis and at the end of the course present their work to the members of the group and write a short report.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybiportal.uzh.ch>

Max. participants: 12

Learning Outcome:

At the end of this course, students will be able to

- identify chemical, physical and mechanical properties of dental biomaterials
- apply conventional and modern fabrication, processing methods and design parameters for reconstructive materials
- recognize limitations and potential developments in current dental materials science and integration of digital technologies
- assess quality and durability of dental biomaterials with a critical approach
- perform literature search and basic data analysis on mechanical, chemical and biological stability
- statistically analyse quantitative data
- summarize and critically review scientific literature
- prepare and present scientific presentations independently
- can evaluate use cases of material property simulation based on ML approaches

Module BME 368 Translational Medicine in Neuroscience and Infection

07SMBME368 / Block Course

Description:

General description:

Translational medicine is a rapidly growing discipline in biomedical research with the overall goal to translate new knowledge, mechanisms, and techniques generated by advances in basic research into new approaches for prevention, diagnosis and treatment of disease.

In this course we provide insights into current research including ongoing randomized clinical trials, and discipline-specific laboratory and clinical research using multi-disciplinary, "bench-to-bedside" approaches. Students will be able to choose between a wetlab microbiology project for urinary tract infections or an in-vivo neurophysiology/imaging project (places limited per project), and will be joined for lectures in clinical sciences. Students will be asked to voluntarily participate in non-invasive study procedures, but participation is not required and will not be factored into the evaluation.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybiportal.uzh.ch>

Learning Outcome:

At the end of this course, students will be able to:

- Explain the emerging discipline of translational medicine and the process of taking research from bench-side to bed-side through participation in a hands-on example
- Explain the relevance of randomized clinical trials and suitable control groups
- Explain the frameworks for working with patients and/or patient samples
- Explain the basic mechanisms of function and dysfunction of the neurological control of the lower urinary tract and related problems
- Understand the context antimicrobial resistance (AMR) and its effect on public health and drug development
- Perform experimental planning in terms of time schedules, resources, and preparation
- Conduct experiment according to standard operating procedure
- Interpret and critically evaluate data in the context of theories and lecture information
- Perform data analysis using appropriate statistical tests
- Communicate their research findings in the form of a scientific abstract and poster presentation

Merkmale:

Responsible instructor: Shawna Elise McEvoy

Requirements:

Prerequisites: Basic studies completed

Assessment:

- Scientific abstract (group; English): 20%
- Scientific poster (group; English): 30%
- Poster presentation (individual; English): 20%
- Lab notebook (individual; English or German): 10%
- Active participation (individual; English): 20%

Module Mastercolloquium

06SM254-891 / Module

Description:

General description:

Das Kolloquium für Masterarbeiten bietet den Studierenden eine Plattform zur Erarbeitung und Präsentation des eigenen Forschungskonzepts sowie zur kritischen Diskussion der Konzepte anderer. Die Gruppe (Abteilungszuordnung) wird jeweils nach Massgabe der Betreuung ausgewählt.

ECTS: 6

Notes:

<https://www.ikmz.uzh.ch/de/studies/graduation/master.html>

Learning Outcome:

Das Masterkolloquium bereitet die Studierenden auf die selbständige Erarbeitung der Abschlussarbeit vor und befähigt sie zur kritischen Reflexion der eigenen Arbeit sowie der Konzepte anderer Studierender.

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Responsible instructor: Mark Eisenegger
Frank Esser

Requirements:

Prerequisites: Modulgruppe Methoden und Forschungslogik erfolgreich absolviert
Dieses Modul steht nur Master-Studierenden offen. Es darf nicht von Bachelor-Studierenden als vorgezogenes Mastermodul gebucht werden.

Assessment: Portfolio

Module Colloquium in International Litigation

02SM90WM79 / Colloquium

Description:

General description:

Das dreitägige Kolloquium besteht aus der Besprechung von neueren Fällen zum internationalen Zivilprozessrecht (IPRG und LugÜ) aus der Rechtsprechung des EuGH und des schweizerischen Bundesgerichts. Ziel ist eine vertiefte Auseinandersetzung mit dieser neueren Rechtsprechung und eine genaue Analyse der Entscheide.

ECTS: 6

Learning Outcome:

Vertiefung der Kenntnisse des internationalen Zivilprozessrechts; Verbesserung der Fähigkeit, Entscheide des EuGH und des Bundesgerichts genau zu lesen und zu analysieren.

Target Groups:

Masterstudierende

Languages of Instruction:

Deutsch

Course Materials:

Wird auf der Website des Lehrstuhls bekanntgegeben.

Merkmale:

Responsible instructor:

Samuel P. Baumgartner

Requirements:

Prerequisites:

Teilnahme an der Einführung und am dreitägigen Kolloquium sowie Teilnahme an der Diskussion während des Kolloquiums sind obligatorisch.

Prior Knowledge:

Kenntnis des schweizerischen oder eines ausländischen Zivilverfahrensrechts (inkl. Vollstreckungsrecht) sowie Grundkenntnisse des internationalen Zivilverfahrensrechts sind erforderlich.

Assessment:

Vortrag, Qualität und Quantität der Beteiligung während des Kolloquiums sowie mündliche Prüfung

Module Theory and Practice of Law

02SM120WM10 / Course

Description:

General description:

Il corso è tenuto in lingua italiana ed è aperto a tutti gli studenti che non soltanto parlano la lingua italiana ma anche hanno una conoscenza passiva.

Gli obiettivi sono:

- di apprendere la principale terminologia giuridica svizzera nella lingua italiana, tenendo sempre presente come riferimento quella tedesca e anche francese.
 - di discutere in italiano alcuni temi di diritto svizzero prendendo in esame non soltanto derminate leggi ma anche la giurisprudenza del Tribunale federale
- Per maggiori informazioni consultare il sito del docente

ECTS: 3

Notes:

Consultare il sito web del docente

Learning Outcome:

Module BME 334 Applied statistics for biomedicine and biology: advanced linear models

07SMBME334 / Block Course

Description:

General description:

Linear models lie at the heart of many statistical approaches, yet applying them to biomedical or biological data is no trivial task. In this course, we start with a review of the basic linear model (OLS regression), and gradually extend its framework in R to arrive at Generalized Linear Mixed Models (GLMMs) which can accommodate for most common complications inherent to data in the life sciences. During the last week of the course, participants will be introduced to, and learn to apply, a Bayesian framework to build linear models.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Participants should bring their own laptops with a recent version of R (and highly recommended, RStudio) installed

Learning Outcome:

Within the statistical software package R, participants will learn how to deal with:

- heterogeneity of variance
- non-normal response variables
- dependencies among observations
- spatial, temporal and phylogenetic autocorrelation
- the co-occurrence of any of the above

Merkmale:

Responsible instructor: Erik Willems

Requirements:

Prerequisites:

- Basic studies completed.
- Participants are expected to have some previous experience with statistical analyses and linear models in R.

Assessment:

Two graded assessments (English), each contributing equally to the final mark halfway through the module, students independently write an annotated R-script towards the end an oral presentation on a group project is expected. Written exam.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Module IDB 143 Neurobiology

07SMIDB143 / Course

Description:

General description:

This lecture provides an introduction to the structure and function of the nervous system. Molecular, physiological, cellular, and systemic aspects of neurobiology are presented using selected examples. Topics discussed include: Development and structure of the nervous system, electrical properties of neurons, sensory and motor systems, plasticity, learning, memory, circadian rhythms, sleep, and neurological diseases.

ECTS: 2

Learning Outcome:

After successful participation in the module, students will be able to:

- describe the basic anatomical structure of the nervous system including its development
- explain the biophysical properties of neurons and how they interact in the generation of resting and action potentials
- recognize the integrative function of sensory and motor systems
- explain the neurobiological basis of complex behaviors such as sleep, learning, and memory
- explain neurological and psychiatric diseases in the context of underlying neurobiological processes

Supra-disciplinary competencies

After successful participation in the module, students will be able to:

- Integrate knowledge from cell biology, genetics, biochemistry, and physics to understand brain function

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Gerhard Schratt

Requirements:

Prerequisites:

The course is addressed primarily at students enrolled in the MSc IDB programme. Other students may enrol upon permission of the module coordinator and space availability.

Assessment:

Session examination in English (calendar week 51), written, MC questions, 60 min.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

Module IDB 201 Laboratory Preparatory Course

07SMIDB201 / Praktikum

Description:

General description:

In this course, the elementary basics of working in the biochemical laboratory are trained using appropriate experiments: - elementary principles and quantification - buffer solutions - enzyme kinetics - digestive enzymes - SDS PAGE

ECTS: 3

Notes:

Number of participants limited to 16. Mutually exclusive with BCH 203 and BCH 205 modules.

Learning Outcome:

Subject competencies: At the end of this course, the students should be able to:

- explain the functioning of each learned method on a chemical- biochemical level
- assess the meaningfulness and area of application of each learned method
- define simple positive and negative controls for a standard technique.

General competencies: At the end of this course, the students should be able to:

- combine observations in the laboratory with mathematical, chemical and physical principles in a meaningful way
- use biochemical laboratory equipment correctly

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Séverine Lobet

Requirements:

Prerequisites:

The lab course is addressed primarily at students enrolled for the MSc IDB program. Students from the MD-PhD Program or Medical Biology Program can enrol to the course, if required, by sending a request to: sophie.masneuf@neuroscience.uzh.ch.

Assessment:

The credit points are awarded when all experiments have been correctly prepared, carried out and evaluated and the online MC-test has been passed. Assessment in English.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

Module IDB 401 Brain Biology

07SMIDB401 / Block Course

Description:

General description:

The block course is divided into 1 week of lectures followed by a 6- week laboratory work. Additional course days/ hours may be integrated. The students will:

- get an overview of the CNS and PNS, with a focus on anatomical organization, cell type differences and basic connectivity.
- get a basic overview of neural gene regulatory mechanisms, with a focus on RNA biology, transcriptomics, proteomics and epigenetics.
- get a basic overview of the immune system with a focus on neuroimmunology, inflammation and autoimmunity.

ECTS: 12

Notes:

The last day of the block course is reserved for possible interactive re-assessment and discussion with course lecturers.

Learning Outcome:

- Will obtain a basic knowledge of the main gene regulatory mechanisms involved in neuronal development and plasticity
- Will be able to apply appropriate omics technologies to the study of neuronal gene regulatory functions.
- Demonstrate basic knowledge of immunological processes and define central immunological principles and concepts
- Identify the main cellular players in the CNS in health and disease, particularly during inflammation and in autoimmune settings

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Gerhard Schratt

Requirements:

Prerequisites:

The course is addressed primarily at students enrolled in the MSc IDB programme. Students from UZH and ETHZ may enrol upon permission of the module coordinator and space availability. These students should have completed BIO143 or equivalent.

Assessment:

- Written lab report, presentation and labwork.
- Final written exam (1 hour), MC questions. Exam on weeks 2-5.
- Assessment in English.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module IDB 402 Systems, Computation and Neural Technology

07SMIDB402 / Block Course

Description:

General description:

The block course is divided into 1 week of lectures followed by a 6- week laboratory work. Additional course days/ hours may be integrated.

Introduction to systems neuroscience, neural networks and current neural technologies, including neuromorphic engineering as well as invasive and non-invasive research methods.

ECTS: 12

Notes:

The last day of the block course is reserved for possible interactive re-assessment and discussion with course lecturers.

Learning Outcome:

Good understanding of neural computation within networks, artificial intelligence, and recent technological advances. Students will understand how populations of neurons can compute, and how this can be implemented in artificial systems.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Daniel Ch. Kiper

Requirements:

Prerequisites:

The course is addressed primarily at students enrolled in the MSc IDB programme. Students from UZH and ETHZ may enrol upon permission of the module coordinator and space availability. These students should have completed BIO143 or equivalent.

Module IDB 500 Master Thesis in Interdisciplinary Brain Sciences

07SMIDB500 / Master Paper / MA-Arbeit MNF

Description:

General description:

The Master Thesis covers a research project completed within 6 months full time (including the write up) in one of the participating laboratories/research groups of the program.

The students independently work under individual guidance of an advanced supervisor on a specific defined research project and write a scientific report upon completion of the project. Thereby students connect theoretical knowledge to practical work and acquire practical insight into actual cutting-edge research in Interdisciplinary Brain Sciences.

ECTS: 30

Notes:

The project and work plan should be arranged directly with the host lab PI/supervisor, before contacting the mentor. The students ensure that the host lab PI/supervisor and the mentor agree with the planned course of the thesis. The students register for their Master Thesis by filling out the "Learning Agreement" and the "Master Thesis Registration Form", and submit them to the IDB Scientific Coordinator.

Merkmale:

Target Group: Suitable for English Speakers

Module IDB 501 Master Thesis Exam Interdisciplinary Brain Sciences

07SMIDB501 / Mündliche Prüfung

Description:

General description:

During 10 minutes the student presents a concise summary of his/her thesis work followed by 20 minutes of questions.

ECTS: 5

Notes:

The MSc thesis must be completed and the final thesis approved and sent to the IDB Scientific Coordinator before the oral examination can take place. Supervisor needs to check that all data are original and that no plagiarism has occurred. A time slot for the exam must be scheduled by the student directly with the supervisor and IDB mentor. The student must book a room for the exam.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Theofanis Karayannis
Gerhard Schratt

Requirements:

Prerequisites:

Only for students enrolled in the MSc IDB program.

Module IDB 520 Internship in Company or Clinic

07SMIDB520 / Praktikum

Description:

General description:

The internship consists of a minimum of 8-week full-time project in a clinic or a company, with analysis of real cases and application of the acquired knowledge. The internship offers a direct contact with the clinical/business world and opportunities for future potential employment.

ECTS: 8

Notes:

The students register for their internship by filling out the "Learning Agreement" and the "Internship registration form", and submit them to the IDB Scientific Coordinator. Internship duration total work time must sum up to 2 months full time minimum (including the write up). The program provides a list of pre-informed contacts. The students independently contact a clinic or a company during the study period. The project and work plan should be arranged directly with the external supervisor. The final written report must be sent to the IDB Scientific Coordinator.

Merkmale:

Module Ancient Legal History

02SM90GL1DE / Course

Description:

General description:

An den meisten europäischen Universitäten ist es üblich, die Jurastudierenden nicht nur in den eigenen Rechtssystemen, sondern ebenso in deren historische Grundlagen zu unterrichten. Dies lässt sich einfach begründen: Das Rechtswesen ist ein Produkt der Geschichte und lässt sich daher besser im Lichte seiner jeweiligen Historizität verstehen. Im Falle der meisten kontinentalen Rechtssysteme reicht diese Geschichte über die Neuzeit und das Mittelalter bis zum römischen Recht zurück.

Das römische Recht wird daher in Europa als historische Grundlage unserer modernen Rechtssysteme studiert, wobei der Schwerpunkt darin liegt zu ergründen, inwiefern dieses in den heutigen Rechtssystemen noch vorhanden ist und wie es angewandt wird. Dies führt zu einer vertiefenden Befassung mit unserer eigenen Rechtstradition und in die diese artikulierenden rechtlichen Kategorien und Strukturen. Die Gefahr besteht darin, dass wir sie nicht als kontingent sehen, und daher nicht als eine Möglichkeit unter vielen erkennen, die unser rechtliches Denken tatsächlich prägt.

Rechtsvergleichung, wie sie üblicherweise in Form von Vergleichen innerhalb der heute geltenden Rechtssysteme praktiziert wird, erweitert diesen Horizont nur wenig: In einer weitgehend globalisierten Welt ist der Einfluss des westlichen Rechtswesens und damit mehr oder weniger direkt der westlichen Rechtskategorien, die letztlich auf dem römischen Recht beruhen, allgegenwärtig.

In diesem Sinne liegt in den antiken Rechtstraditionen, die der römischen vorausgehen -die mesopotamische, die ägyptische, die griechische- und daher nicht von ihr beeinflusst sind, eine hervorragende Gelegenheit, unsere Rechtstradition von aussen zu betrachten und sich ihrer spezifischen Züge bewusst zu werden. Der Kurs "Antike Rechtsgeschichte" bietet eine Einführung in diese "anderen" Rechtstraditionen anhand ihrer eigenen schriftlichen Quellen: von den Keilschrifttafeln und den ägyptischen Hieroglyphen bis zu den enormen Mengen an erhaltenen Papyri aus Ägypten und dem Nahen Osten, über einen Zeitraum von vier Jahrtausenden, von ca. 3000 v. Chr. bis zu den ersten Jahrhunderten unserer Zeitrechnung.

Ein grosser Teil dieses Materials besteht aus privaten Urkunden, durch die wir einen Einblick in das tatsächliche Rechtsleben der Bevölkerung und die rechtlichen Vorstellungen gewinnen, die diesem zugrunde lagen. In dieser Form gestaltet sich der Kurs weitgehend als Workshop, in dem vermittelt wird, wie Urkunden aus der Rechtspraxis zu interpretieren sind. Und da es sich um Rechtstraditionen aus vorrömischer Zeit handelt, erlaubt uns dieses Studium, das römische Recht und damit auch unsere eigene Rechtstradition in ihrer wahren historischen Perspektive zu erfassen.

ECTS: 6

Learning Outcome:

Neben der Reflexion historischer Zusammenhänge und kultureller Gegebenheiten des Rechts sollen die TeilnehmerInnen an die Lektüre und Auslegung von Quellentexten juristischer Prägung herangeführt werden. Damit zielt die Veranstaltung auf eine Kernkompetenz der juristischen Ausbildung: der souveräne und informierte Umgang mit Texten jeglicher Provenienz.

Target Groups:

Alle Masterstudierenden der Rechtswissenschaftlichen Fakultät und der Philosophischen Fakultät.

Languages of Instruction:

Deutsch

Course Materials:

Die wesentlichen Quellentexte und weitere Materialien werden ab Beginn der Veranstaltung auf der Homepage des Lehrstuhls kontinuierlich publiziert.

Merkmale:

Responsible instructor: José Luis Alonso

Requirements:

Prerequisites: Keine. Es wird mit übersetzten Quellen gearbeitet, keine Kenntnisse Antiker Sprachen nötig.

Prior Knowledge: Keine Vorkenntnisse in Antikem Recht inkl. Römischen Recht nötig.

Assessment: Die Leistung wird durch eine mündliche Prüfung zum Semesterende überprüft. Bei einer grossen Teilnehmerzahl behält sich der Examinator vor, auf eine schriftliche Prüfungsform zu wechseln.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated as necessary

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module CHE 711 Environmentally Safe Chemicals

07SMCHE711 / Course

Description:

General description:

In this course, the overall goal is to explore the opportunities for developing chemicals and materials that are environmentally safe besides fulfilling the desired functionality, which is the major goal of many recent sustainability and green chemistry strategies at the Swiss, European and global level. To this end, you will first be introduced to the key concepts of environmental safety assessment for chemical products. Second, you will learn about databases, computational tools and experimental testing strategies that support the consideration of environmental safety at the early stage of research and development in chemical industry. Last, we will look at concrete "benign-by-design" examples and investigate success stories and challenges in implementing environmental safety considerations in the design of new chemicals and chemical products. You will deepen these concepts and experience the use of specific tools by developing your own case study as part of the course.

ECTS: 2

Learning Outcome:

This course complements the process-oriented "Green chemistry" course (CHE 328) with a product focus. Together the two courses provide you with a comprehensive view on and toolbox for implementation of green chemistry principles in the development of new chemical processes and products.

Languages of Instruction:

Module Introduction to Epidemiology

04SM22CL_001 / Module

Description:

General description:

The overall goal of this 4-week block course is to introduce students to the major questions of clinical and epidemiologic research and to methods to address these questions. The course follows an overall framework describing the course of scientific discovery from the detection and burden of disease and its causes to diagnosis and prognosis of disease up to the development and evaluation of preventive and treatment interventions and their consequences for population health. We will discuss study designs in the context of existing knowledge and the type of evidence needed to advance knowledge and methods expertise to design, conduct and interpret substantive medical research. In the first part, this course follows a practice-based learning approach in which students work in groups to design, conduct, analyse and report an entire study during the course. Input lectures introduce to concepts, which are then conceptualized and applied to the studies. The second part (1.5 days) is organized as a mix of short input lectures and interactive, hands-on group work. The course will provide a basis for further studies and research in the fields of Medicine and Public Health (on Master or PhD level), both of which are very dynamic and diverse fields.

ECTS: 3

Notes:

For questions please contact: miloalan.puhan@uzh.ch

Target Groups:

PhD students from the Epidemiology and Biostatistics Program, the Clinical Science Program, and the Care & Rehabilitation Sciences Program, as well as Master students in Biostatistics

Course Materials:

Course material is available on Switchdrive. Communication and course instructions will be sent via E-mail.

Module Winning the publication game

04SM22CR_505 / Module

Description:

General description:

Within this (online) course the participants will be guided through all stages before submitting a manuscript to a peer reviewed journal. The inputs are from the facilitator but also from all participants. Each participant works on her/his own material which will be shared on Dropbox.

The first course date will be onsite and during the second day everyone is working on Zoom (in breakout rooms). During this writing retreat everyone works with individual support from the facilitator. But this day should not be used for data analysis, literature search etc. Such work should be done between the two course dates. In the afternoon of the writing retreat topics about the submission process, responses to reviewers and post publishing marketing will be addressed.

The course is based on the Tim Albert Training <https://www.timalbert.co.uk/training/accredited-trainers/> but is adapted to an innovative setting.

Each participant has to hand in two papers of the target journal with a similar structure as the manuscript to be submitted. A short questionnaire has to be filled in. The PhD student should have an agreement with the supervisor on which piece to work during the course.

It is better to start with the course too early than too late! You need some results and then you can start writing.

The course covers topics from humanities to medicine. Any types of manuscripts are fine!

Information about the trainer can be found here: <https://www.juergen-barth.de>

ECTS: 1

Notes:

The first course day will take place at Careum, Gloriastrasse 18, 8006 Zurich.

The second course day will take place via Zoom.

Learning Outcome:

By the end of the course participants will be able to:

- Develop writing skills and confidence in writing for peer-reviewed journals
- Understand what makes it likely that a paper is accepted
- Apply principles of effective scientific writing, by cutting unnecessary information, using correct verbs and developing better sentences and paragraphs
- Organise and streamline the writing process from the beginning, to submitting and conducting revisions
- Apply the writing skills in the format of an original manuscript
- Optimise results presentation, by creating clear and understandable figures that are informative for the readers
- Understand the peer review process and respond to the reviewer's comments.
- Use AI tools to develop and improve parts of the manuscript.

Module BIO 242 Translational cancer research: new technologies, mouse models and clinical approaches 07SMBIO242 / Course

Description:

General description:

This course will illustrate the genetic and cellular complexity of cancers, providing an overview of current and emerging technologies that are used in basic, translational and clinical research to study and treat cancers. Several tumour types (liver, lung, breast, colon, melanoma gynaecological) will serve as case studies.

ECTS: 3

Learning Outcome:

On completion of the module the student should be able to:

- explain the mechanisms through which different types of cooperating genetic alterations often cause tumours
- compare the strengths and weaknesses of the use of various technologies (cell culture, mouse models, genetic screening, gene expression, DNA sequencing and spectrometry-based cell and protein analyses, online data sets) in cancer research
- understand how integrative research approaches contribute to the development of new molecularly targeted cancer therapies
- utilise online databases and resources to analyse the molecular alterations found in human cancers

Key skills

On completion of the module, the student should be able to recognise how different aspects of cancer research fit into the context of broader integrated approaches aiming to understand and treat the disease. Students will gain an overview of the newest technologies used in cancer research.

Module BIO 251 Cancer and the immune system

07SMBIO251 / Course

Description:

General description:

This lecture series covers three topics that link the human immune system and cancer. First, we will explore how common viral and bacterial infections can cause cancer, either by promoting chronic inflammation of the infected organ or through direct cell-transforming events. The examples of tumor-promoting infectious agents to be discussed in detail include the bacterial pathogen *Helicobacter pylori* with its link to stomach cancer, and viruses of the hepatitis B and C, papilloma and Herpes families, which cause liver and cervical cancer and B-cell lymphoma, respectively. The second topic deals with the role of the tumor microenvironment in cancer progression and metastasis. A particular focus here will be on the contribution of specific immune cell compartments, chemokines and the tumor vasculature in both processes. Finally, we will explore the mechanisms that allow certain tumors to prevent anti-tumor immunity and will discuss new treatment strategies that aim to promote anti-tumor immune responses and tumor control.

ECTS: 3

Learning Outcome:

At the end of this lecture series, participants should be able to

- explain mechanisms through which human viral and bacterial pathogens promote cancer
- describe the biology, life cycle and preferred host cell type of various cancer-causing infectious agents
- list strategies that cancer-causing agents use to persist in the host and to avoid clearance
- name chemokines and their cellular targets and sources, as well as immune cell and stromal cell populations that have been implicated in promoting tumor progression and metastasis
- describe the constituents and conditions of a tumor microenvironment that is conducive to tumor cell growth and survival
- list the immune cell compartments and molecular mediators that are involved in tumor control by the immunocompetent host
- describe mechanisms that tumor cells use to impair or evade tumor-specific immunity and explain how these may be targeted for therapeutic purposes

Module BIO 113 Evolution

07SMBIO113 / Lecture with Practical Exercises

Description:

General description:

Dieser Kurs besteht aus zwei Teilen. Der erste Teil (donnerstags) führt in die Artenvielfalt lebender und ausgestorbener Wirbelloser und Wirbeltiere ein, wobei der Schwerpunkt auf makroevolutionären Mustern, morphologischer und ontogenetischer Evolution und Interaktionen zwischen den Arten liegt. Im zweiten Teil (der freitags unterrichtet wird) werden die evolutionären Konzepte vorgestellt, die jeder Biologe kennen sollte. Dazu gehören Mutation, natürliche Selektion, Gendrift, Evolution der Life-history und Trade-offs sowie die Evidenz der Evolution von Fossilien bis hin zur experimentellen Evolution. Bio113 bildet die Grundlage für EEE103 Evolution II und ist eng mit diesem abgestimmt.

Im Praktikum werden Themen selektiv vertieft.

ECTS: 5

Notes:

Die Vorlesung wird als Livestream und als Podcast angeboten.

Learning Outcome:

- Verstehen der grundlegenden Mechanismen, die die Biodiversität hervorgebracht haben und weiterhin hervorbringen
- Verfolgen der Evolutionsgeschichte und der wichtigsten Muster der Evolution von Wirbeltieren und Wirbellosen.
- Verstehen der Zusammenhänge zwischen mikroevolutionären Mechanismen und makroevolutionären Mustern

Lernen, eine evolutionäre Perspektive auf Fragen der Biologie, Medizin usw. anzuwenden.

Languages of Instruction:

Der Kurs wird auf Deutsch unterrichtet, gegebenenfalls werden einzelne Stunden auf English unterrichtet. Die Prüfung ist auf Deutsch.

Merkmale:

Target Group: Open to School Students

Responsible instructor:

Lukas Keller

Requirements:

Assessment:

Schriftliche Modulprüfung im Januar, mit Multiple Choice, Essay-, Vervollständigungs- und Kurzantwortfragen.

Die fünf Praktika sind obligatorisch (jedoch ohne Anwesenheitskontrolle), der in den Praktika behandelte Stoff ist Teil des Prüfungsstoffs.

Die Prüfungsfragen werden nur auf Deutsch gestellt.

Die Essayfragen können auf Deutsch, Italienisch, Französisch und Englisch beantwortet werden.

Termine der Modulprüfungen siehe <http://www.mnf.uzh.ch/de/studium/pruefungen.html>

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Module BIO 243 Epigenetics

07SMBIO243 / Course

Description:

General description:

This course will explore Epigenetics in animals and plants. Cell fates are orchestrated by transcription factors, chromatin changes, DNA methylation, non-coding RNAs, RNA and protein modifications, and other signals. As epigenetics represents an additional layer of complexity to the genetic code, aberrant activity of epigenetic regulators is often observed in several human disorders and cancer. Therefore, epigenetic factors and their regulation are currently the subject of intense research.

ECTS: 3

Notes:

The course does not include an experimental part.

The form of teaching and a detailed plan will be provided in the first lecture.

Learning Outcome:

After this series of special lectures, the students should be able to explain:

- molecular signals of epigenetic states
- metabolism of cytosine methylation in the DNA
- histone code
- genomic imprinting, Polycomb group regulation and transgenerational inheritance
- 3D chromatin organization and gene expression
- long non-coding RNA as epigenetic signals

Moreover, the students should be able to:

- describe appropriate methods to investigate DNA methylation, histone code, chromatin organization, long non-coding RNAs.

Merkmale:

Module Randomized Algorithms (L)

03SM22MI0023 / Course

Description:

General description:

This lecture covers several aspects of randomness in computation. Firstly, we establish basic probabilistic tools, such as linearity of expectation and bounds on probabilities. Building on these we cover the design and analysis of randomized algorithms. Such an algorithm is allowed to use "coin flips" in its decision making. Some randomized algorithms yield significantly better runtimes and/or solution qualities as their deterministic counterparts. We also treat stochastic processes, e.g. Markov chains in the lecture, and give classical applications like 3-SAT. More advanced topics like random graphs, the probabilistic method, and randomized rounding are also covered.

Mathematically sound analysis is an important and integral part of this lecture. That is, we will not only state the properties of an algorithm, e.g. its correctness or running time, but also prove them mathematically.

In particular, we plan to treat the following topics:

Introduction

Linearity of Expectation: Concept, Balls-Into-Bins, Coupon Collector, Quicksort

Bounds on Probabilities: Markov, Chebyshev, Chernoff, Balls-Into-Bins, Coupon Collector, Quicksort

Markov Chains: Concept, Hitting Times and Probabilities, Random Walks, Invariant Distributions, 3-SAT

Randomized Rounding: Concept, SET COVER, MAX SAT, Derandomization

Probabilistic Method: First- and Second Moment Method, MAX SAT, Random Graphs

ECTS: 6

Notes:

This course replaces "Randomized and Online Algorithms" (BMINF014), which will be discontinued from HS22. Students which have already successfully passed "Randomized and Online Algorithms" (BMINF014), are not allowed to book this course.

Learning Outcome:

The goal is to learn about the most important algorithmic design principles and techniques for their analysis related to randomness in computation.

Target Groups:

Recommended for all MSc students with an interest in topics at the intersection of computer science and mathematics.

Languages of Instruction:

English

Course Materials:

Lecture notes will be supplied. Further reading will be indicated.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Dan Olteanu

Requirements:

Prerequisites:

The content of the following lectures are mandatory prerequisites: 1. Informatics I, 2. Informatics II, 3. Foundations of Computing I

Prior Knowledge:

Knowledge of algorithms is required. Knowledge of basic probability theory is

helpful. Students need to be proficient in math to solve the theoretical homework exercises.

Assessment: To pass the module, students must pass the final written exam. The examination of the module will take place onsite on Wednesday, 13.01.2027, 16:00- 18:00.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Second Fall Semester)

Module BIO 257 DNA metabolism and cancer

07SMBIO257 / Course

Description:

General description:

DNA of all living organisms is under constant assault by endogenous and exogenous damaging agents and is intrinsically unstable during fundamental cellular processes, such as replication and transcription.

In order to maintain genome integrity, cells have evolved complex mechanisms to face these challenges, including specific DNA repair pathways, DNA damage tolerance, cell cycle checkpoints and modulation of gene expression. A failure of one or more of these mechanisms leads to genome instability, which predisposes to cancer and ageing. In this course, designed to foster student participation, the students will gain theoretical knowledge on the cellular mechanisms required to protect genome integrity and to avoid malignant transformation, such as DNA repair pathways, checkpoint activation, replication stress response, genome maintenance during transcription and telomere homeostasis.

ECTS: 3

Learning Outcome:

On completion of the module the student should be able to:

- discuss the main cellular pathways and mechanisms required to maintain genome stability
- explain why and how genomic instability contributes significantly to cancer onset
- interpret a set of experimental data from genome stability studies, formulate hypotheses and elaborate experimental strategies to address them

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Massimo Lopes

Requirements:

Prerequisites:

Completed basic studies

Assessment:

written mid-term exam and final exam, in English.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module BIO 203 Great Ape Behaviour

07SMBIO203 / Block Course

Description:

General description:

This hands-on primatology course provides the opportunity to study current hot topics related to great ape behavioural research, such as communication, culture and conservation. The course is highly interactive and involves Journal Clubs, Meet the Expert sessions (invited speakers), a research project on great ape behaviour (group work in Zoo Zurich), 'How to' sessions (guiding your research project), a written final report, and a final presentation in a student symposium.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Learning Outcome:

By the end of the course students should:

- have a grasp of key scientific literature
- be able to design and execute a basic research project
- have acquired an advanced level of written and oral communication
- be able to produce reports according to scientific standards

Merkmale:

Responsible instructor: Kathelijne Koops

Requirements:

Prerequisites: Basic studies completed; course BIO 201 highly recommended (can be taken before or in the same semester as BIO 203)

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Module EEE 358 Introduction to Limnology (Inland Water Ecosystems)

07SMEEE358 / Course

Description:

General description:

Characteristics of lakes: origin, artificial and natural systems.

Seasonality of lakes (physical, chemical and biological parameters).

Rivers as ecosystems. Production processes in lakes (Eutrophication, phosphorus and nitrogen, biogeochemistry).

Community and population ecology, aquatic food webs. Aquatic chemical ecology (toxins, allelochemicals, communication). Techniques for the analysis of relevant limnological parameters. Restoration of lakes, origin of tap water, waste water treatment. Limnology of Lake Zürich.

ECTS: 3

Notes:

Die Texte zur Vorlesung sind als .pdf-Files im Internet zu finden unter OLAT--Institut für Pflanzenbiologie/ Mikrobiologie . Der Text zur Charakterisierung von Seen' sollte in die erste Vorlesung mitgebracht werden. Alle weiteren Texte zu den entsprechenden Vorlesungs-Blöcken.

Kursort:

Hörsaal Y34-J-01

Universität Zürich Irchel

Winterthurerstrasse 190

8057 Zürich

Prüfung: Montag, 14.12.2026:

Learning Outcome:

Nach erfolgreicher Teilnahme am Modul sollen die Studierenden in der Lage sein

- die Bedeutung von wichtigen Gebieten der Limnologie, d.h.

Tektonik, Thermik, Licht, Anorganischer Kohlenstoff und Phosphor zu erklären.

- ein gezieltes Selbststudium in Form einer vertieften Beschäftigung mit dem gebotenen Stoff (schriftliche Unterlagen und abgegebene Fragen) durchzuführen, und in Kurzprüfungen den Lernerfolg zu zeigen.

Überfachliche Kompetenz

Die Studierenden können sich im Selbststudium Wissen effizient aneignen.

Target Groups:

Das Modul ist Teil folgender Master-Spezialisierung (bei Modulen des Fachstudiums):

- Mikrobiologie / Microbiology

- Oekologie / Ecology

Languages of Instruction:

English/Deutsch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Jakob Pernthaler

Requirements:

Assessment:

Art des Leistungsnachweises:

- Schriftliche Prüfungen
 - Die Prüfungen werden benotet
 - während der ganzen Dauer des Moduls, mit Schlusstest
- Anforderungen für die Erteilung der Kreditpunkte:
- Mindestens Note 4 in den Tests (aus Gesamtpunktzahl ermittelt)

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Start! Teaching Essentials

10SMSTS-500 / Module

Description:

General description:

In diesem Modul werden didaktische Grundlagen vermittelt. Sie lernen, wie Sie Wissen vermitteln und andere bei ihrem Lernprozess unterstützen können. Das Modul eignet sich ideal als Vorbereitung auf eine Tätigkeit als Tutor:in. Es besteht aus einem OLAT Online-Kurs, der selbstständig bearbeitet wird, und einem 3-stündigen synchronen Workshop (wahlweise online oder in Präsenz).

Der OLAT-Kurs besteht aus 5 Bereichen:

1. Standort- und Rollenbestimmung
2. Feedback und Bewerten
3. Präsentieren und Auftreten
4. Unterrichtsplanung
5. Online Lehre

English:

This module imparts essential didactic principles. You will learn how to convey knowledge and support others on their learning journey. It is an ideal preparation for a tutor role. The module includes a self-paced OLAT online course and a 3-hour workshop (online or in-person).

The OLAT course consists of 5 sections:

1. Defining roles
2. Feedback and evaluation
3. Presentation skills
4. Lesson planning
5. Online teaching

ECTS: 1

Notes:

E-Learning, keine festen Wochentermine. Einmalige Teilnahme an einem der 3-stündigen Workshops (wahlweise online oder vor Ort) ist obligatorisch.

- Onlineworkshop (Englisch): 03.11.2026, 8:00-11:00 Uhr
- Präsenzworkshop (Deutsch): 05.11.2026, 8:00-11:00 Uhr

English version:

E-learning, no weekly dates. Attending one 3-hour workshop (either online or in-person) is mandatory.

- Online workshop (in English): November 3rd, 2026, 8:00-11:00 AM
- In-person workshop (in German): November 5th, 2026, 8:00-11:00 AM

Learning Outcome:

Studierende setzen sich mit der Bedeutung verschiedener Erfolgsfaktoren guter Lehre auseinander und reflektieren ihren Kompetenzerwerb in den folgenden Bereichen:

- Grundverständnis akademischer Lehrtätigkeit
- Standortbestimmung bez. Lehr- und Auftrittskompetenz
- Rollenverständnis
- Umgang mit Konflikten
- Feedback geben und bewerten

- Auftrittskompetenzen analysieren und stärken
- Unterrichtsplanung und Aktivierung
- Einsatz digitaler Technologie für den Lehr- und Lernprozess

English:

Students engage with the significance of various success factors in effective teaching and reflect on their competencies in the following areas:

- Basic understanding of academic teaching
- Assessing own teaching and presentation skills
- Role comprehension
- Handling conflicts
- Providing and evaluating feedback
- Analyzing and enhancing presentation skills
- Lesson planning and student activation
- Use of digital technology in the teaching and learning process

Target Groups:

Bachelor, Master

Languages of Instruction:

Deutsch oder Englisch: siehe Sprache der Lehrveranstaltung

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Dana Kube

Requirements:

Prerequisites:

Keine Vorkenntnisse notwendig. Dieses Modul ist insbesondere geeignet für (angehende) Tutor:innen mit keiner oder wenig Lehrerschaft, sowie für Studierende, die sich didaktische Kompetenzen aneignen möchten.

English:

No prior knowledge required. This module is especially suitable for (aspiring) teaching assistants with no or little teaching experience, as well as for students who wish to develop didactic skills.

Assessment:

Abgabe eines Portfolios. Das Portfolio beinhaltet verschiedene Übungen und Reflexionsaufgaben. Abgabe bis spätestens 13. Dezember 2026.

English:

Submission of a portfolio is required. The portfolio includes different exercises and reflection tasks. The deadline for submission is December 13th, 2026.

Grading Scale:

Pass/Fail

Repeatability:

repeatable once, book again

Organisation:

Offer pattern:

1 Semester (Every Semester)

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module BIO 437 Human Adaptation

07SMBIO437 / Course

Description:

General description:

Morphology and genetics of the human body are subject to ongoing evolution. Changes of the environment, disease burden or culture demand constant adaptation.

This course consists of a series of different lectures on topics related to human adaptation and aims to cover a spectrum of influencing factors and resulting adaptations in humans.

Particular emphasis is placed on physiological and pathological processes. A background in human anatomy, genetic analysis or pathophysiology is highly recommended

ECTS: 3

Notes:

Form of teaching: on site and online

Learning Outcome:

By the end of this module each student should be able to

- describe some general mechanisms of evolution from the past to the present
- explain examples of human adaptive responses
- engage in a scientific discussion on the aetiology of physiological adaptations in humans

Merkmale:

Module BIO 615 Virology: Principles of Molecular Biology, Pathogenesis, and Control of Human Viruses 07SMBIO615 / Course

Description:

General description:

The goal of this lecture series is to discuss the molecular biology, pathogenesis and control of human viruses. Topics include: (i) an introduction to human virology (classification, structures, genome replication strategies of DNA and RNA viruses); (ii) detailed molecular biology of virus life cycles; (iii) basic principles of infection, transmission and tropism of human viruses; (iv) biology of individual pathogenic human viruses, including influenza, HIV, SARS-CoV-2, herpesviruses and hepatitis viruses; (v) the innate and adaptive immune systems and viral strategies to evade them; (vi) epidemiology and evolution of viruses; (vii) translational virology, including modern diagnostics, vaccines, antivirals and biotechnology.

ECTS: 3

Notes:

Questions and queries can always be addressed directly to teaching@virology.uzh.ch

Podcasts: Where possible, individual lectures will be recorded at the Instructor's discretion and will be made available as podcasts. Note that availability of recordings cannot be guaranteed.

Remote participation: No.

Learning Outcome:

At the end of this course the students should be able to:

- classify viruses according to their genome and structure
- analyze the life cycles of RNA and DNA viruses, in particular their replication strategies
- explain the modes of transmission and the tropism of human viruses
- discuss the different strategies of viral evasion of the innate and adaptive immune systems
- evaluate different vaccination strategies against viral infections and discuss their advantages and disadvantages
- describe the epidemiology of human pathogenic viruses and analyze the driving forces of viral evolution
- appraise the inhibitory activity of antiviral compounds considering their viral target and their mechanism of action

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Benjamin Geoffrey Hale

Requirements:

Prerequisites:

For advanced Bachelor students, Master students, PhD students or MDs. BIO615 is open to all students interested in virology. BIO615 is recommended for students conducting BIO372/BIO374 and is compulsory to fulfill the requirements for the Master in Virology concentration.

Assessment:

written exam in January, duration 1 hour, MC questions, in English

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module Videos in the Classroom: How to Use and Design Them to Support Learning?

06SM222Vic / Module

Description:

General description:

In this seminar, students will learn how to edit and design instructional videos, based on theoretical and empirical research in multimedia learning. Two projects are completed throughout the semester (one video edit, one video design) using freely available software and serve as a basis for assessment.

The aim is to provide participants with both theoretical design recommendation and practical skills to foster their use of video in their classrooms. The seminar will be held in English. Student papers will be submitted in English.

ECTS: 3

Learning Outcome:

Acquiring competence in video editing and creation based on multimedia learning theory.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Sascha Schneider

Requirements:

Assessment:

Portfolio: Modified video with presentation and written report.
The module is assessed as passed if all elements of the portfolio are passed.

Grading Scale:

Pass/Fail

Repeatability:

repeatable once, book again

Organisation:

Offer pattern:

1 Semester (Every Semester)

Request period:

from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Module BME 350 From stem cell analysis to application

07SMBME350 / Block Course

Description:

General description:

Regenerative therapies are gaining importance for treating a wide range of diseases, including cardiovascular conditions and bone injuries. This interdisciplinary course is jointly organized by the University Hospital Zurich (USZ) and the Institute for Regenerative Medicine (IREM), focusing on two key areas: bone regeneration and cardiovascular tissue repair.

In the lecture sessions, students will explore the fundamentals of stem cell technologies, their application in disease modelling, and their therapeutic potential in regenerative medicine.

In the practical component, students will:

1. Learn how to culture, differentiate, and characterize human stem cells and their derivatives,
2. Gain insights into tissue engineering strategies,
3. Apply complementary techniques for biomarker analysis.

The course also includes self-study, data interpretation exercises, and concludes with group presentations.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE <https://www.mybiportal.uzh.ch>

Learning Outcome:

By the end of this module, students should be able to:

- describe and discriminate between different types of stem cells and their differentiation potential
- perform basic cell culture work with human cells
- stain and analyze stem cells or their derivatives
- learn the basics of Tissue Engineering
- review and summarize scientific literature
- prepare a scientific presentation and deliver results to other participants

Module BIO 214 Of ape men and man apes

07SMBIO214 / Course

Description:

General description:

Elemente einer neuen Geschichte der Biologie und Anthropologie. An unterschiedlichen Stationen der neuzeitlichen Biologie und Anthropologie lernen Sie die grundlegenden Mechanismen der Wissensproduktion kennen: Vom mittelalterlichen Glauben an hunds-köpfige Erdrandsiedler bis zu den modernen Evolutionsmodellen.

ECTS: 3

Notes:

Präsenzunterricht

Learning Outcome:

Sie kennen nicht nur Wege und Umwege die zur heutigen Forschung am Menschen führten, sondern sind auch vertraut mit wichtigen Mechanismen der Wissensproduktion.

Themenblöcke sind beispielsweise:

Mittelalterliche Erdrandsiedler

Empirischer Druck und Ordnungssysteme

Von der Naturgeschichte zur Geschichte der Natur Nation und Volkskörper

u.S.w.

Module BIO 201 Primate Evolutionary Biology

07SMBIO201 / Course

Description:

General description:

This course integrates evolutionary and ecological approaches to explore the diverse order of the Primates. We will cover anatomy and taxonomy, primate evolution, reproductive strategies, food and foraging, communication, cognition, and conservation. Examples are presented from "the classic" field studies as well as recent studies to illustrate the variation of behaviour across primates.

ECTS: 3

Notes:

Form of teaching: on site

Learning Outcome:

By the end of this course, students should be able to:

- interpret primate socioecology, social behaviour and cognition within an evolutionary framework
- understand the significance of these insights for primate conservation

Merkmale:

Responsible instructor: Anton Weingrill

Requirements:

Prerequisites: Basic knowledge in evolution and behaviour, e.g. BIO 113, BIO 115, and BIO 122

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Organisation: Institut für Evolutionäre Anthropologie

Offered in:

Module Coaching für wissenschaftliches Arbeiten (S) (Coaching for scientific working)

03SM22MO0105 / Seminar

Description:

General description:

In einem zweitägigen Workshop (in der Woche vor Semesterstart) erwerben Sie die Fähigkeiten, die Grundlagen des wissenschaftlichen Arbeitens zu vermitteln und lernen, worauf es beim Coaching und der Organisation von Gruppen ankommt. Sie übernehmen anschliessend zwei Tutorate pro Woche der Bachelorvorlesung "Einführung in das wissenschaftliche Arbeiten". Dabei führen sie die Bachelorstudierenden in die verschiedenen Themen des wissenschaftlichen Arbeitens, wie zum Beispiel quantitative und qualitative Forschungsmethoden, Nutzung und Umgang mit KI sowie wissenschaftsethische und -philosophische Fragestellungen ein. Zudem können Sie damit die im Rahmen des Workshops erarbeiteten Kenntnisse direkt praktisch anwenden. Neben der Leitung der Übungsgruppen beinhaltet der Erwerb der 6 ECTS-Punkte die Betreuung von E-Learning-Aktivitäten, die Korrektur praktischer Übungsaufgaben, die Beantwortung von Fragen der Studierenden sowie die Unterstützung der Dozierenden bei organisatorischen Aspekten des Managements mehrerer Gruppen.

ECTS: 6

Notes:

Die Teilnehmerzahl ist beschränkt. Bewerbungen für einen Seminarplatz sind bis zum 30.4.2026 per Mail an teaching@econ.uzh.ch zu senden.

Inhalt der Bewerbung:

Lebenslauf inklusive Personalien (Name, Vorname, Adresse, E-Mail (uzh), Matrikelnummer, Olaf-Benutzername, Anzahl Semester und Studienrichtung)
Studienvoraussetzungen (aktueller Leistungsausweis)
Begleitschreiben (Motivation für die Teilnahme, maximal eine halbe Seite)

Das Auswahlverfahren findet im Mai/Juni 2026 statt.

Für Fragen wenden Sie sich bitte an Deborah Kistler
(deborah.kistler@econ.uzh.ch)

Learning Outcome:

1. Grundlagen des wissenschaftlichen Arbeitens anwenden und vermitteln Studierende erlernen die Prinzipien wissenschaftlichen Arbeitens und sind in der Lage, diese strukturiert und verständlich weiterzugeben.
2. Berufsrelevante Kompetenzen erwerben Entwicklung von Fähigkeiten in den Bereichen Coaching, Gruppenorganisation und Anleitung von Teams.
Strategien für die gleichzeitige Betreuung und Koordination mehrerer Gruppen entwickeln und anwenden.
Förderung von Kommunikations- und Sozialkompetenzen für die Leitung und Zusammenarbeit in Teams.
3. Kernkompetenzen für die Anleitung von Studierenden entwickeln Übungen methodisch und inhaltlich vorbereiten und auf spezifische Bedürfnisse der Bachelorstudierenden eingehen.
Übungen bewerten sowie typische Schwierigkeiten und Herausforderungen von Bachelorstudierenden erkennen und adressieren

Target Groups:

Sie haben:

- ein Flair für die Anleitung von Gruppen von Studierenden im Rahmen von Übungen
- Interesse am wissenschaftlichen Arbeiten
- Interesse an und gute Grundkenntnisse von quantitativen Forschungsmethoden
- Interesse an wissenschaftsphilosophischen und -ethischen Fragestellungen
- eine selbstverantwortliche, zuverlässige und motivierende Persönlichkeit und können sich vorstellen, Ihr Wissen und Ihre eigenen Erfahrungen aus dem Studium an die neuen Studierenden weiterzugeben
- Freude daran, Teil eines jungen und dynamischen Teams zu sein und Bereitschaft zur Selbstreflexion

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Dina Pomeranz

Requirements:

Prerequisites: Zulassung zum Masterstudium

Assessment: Anwesenheit und Mitarbeit im zweitägigen Workshop; Vorbereitung, Durchführung und Nachbereitung von Übungssitzungen und Dokumenten; Korrektur von praktischen Aufgaben

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: Zweitägiger Workshop zur Vorbereitung auf das Coaching für wissenschaftliches Arbeiten (für alle): Montag, 7.9.2026 und Dienstag, 8.9.2026 (09:00-16:00)

Fünf Termine zur Vorbereitung und Erfahrungsaustausch, d.h. Reflexion der Führungserfahrung und Herausforderungen wissenschaftlichen Arbeitens (Anwesenheitspflicht für alle):

Mo 21.09.2026 12.00 - 14.00

Module IDB 412 Introductory Course in Laboratory Animal Science (LTK Module 1 - Theory part) 07SMIDB412 / Course

Description:

General description:

This module provides the theoretical knowledge in laboratory animal science that is required by the Swiss legislation as basic education for experimenters.

Topics discussed include: ethical aspects and regulations; criteria for assessment of discomfort and pain; alternative methods; laboratory animals: characteristics, needs, husbandry, breeding, normal behaviour, diseases.

ECTS: 1

Notes:

Registration upon instructions from the IDB Scientific Coordinator. IDB 412 must be listed in the Learning Agreement.

Learning Outcome:

By the end of this module the students are able to:

- consult the relevant paragraphs of the Swiss animal protection law and weigh the respective interests (benefit for humans vs suffering of the animal) during an animal experiment
- explain the parameters which influence the outcome of an animal experiment and apply these in planning the experiment
- evaluate and apply the concept of 3R's with regard to the animal experiment planned

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Philippe Bugnon

Requirements:

Prerequisites:

The course is open for MSc IDB students only.

Assessment:

Written examination: approx. 180 min

Date of the performance record: written final test after the course (answer by email 1-2 weeks after the test).

Assessment in English or in German.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Semester)

Booking Deadline/Period:

not bookable

Cancellation Deadline:

not cancelable

Module IDB 413 Introductory Course in Laboratory Animal Science (LTK Module 1 - Practical part) 07SMIDB413 / Praktikum

Description:

General description:

This education provides expertise and practical training that are required by the Swiss legislation for a responsible and gentle handling of laboratory animals.

Topics included: handling and techniques in rodents (e.g. application of substances, sampling, anaesthesia).

ECTS: 1

Notes:

Limited number of participants. Registration upon instructions from the IDB Scientific Coordinator. IDB 413 must be listed in the Learning Agreement. Confirmation by e-mail from the lab PI that vertebrate animals are used during the laboratory / research project.

Learning Outcome:

By the end of this module the students are able to:

- handle, restrain and inject mice and rats correctly and according to a specified time schedule
- assess health and sex of the animals used in practical trainings
- anaesthetize rats, monitor depth and recovery of anaesthesia and collect small amounts of blood

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Philippe Bugnon

Requirements:

Prerequisites:

The course is open for MSc IDB students only.

Assessment:

During the whole duration of the module (fulfilled / not fulfilled).

Description:

General description:

Das Modul bietet die Möglichkeit einer konzentrierten Auseinandersetzung mit zentralen Gegenstandsbereichen und Forschungsfeldern der Kunstgeschichte des Mittelalters. Im Vordergrund steht die Verortung von Kunstwerken in konkreten räumlichen Kontexten. Das Modul sensibilisiert dafür, die für einzelne Orte oder Regionen typische Wahl bestimmter Materialien, Formen und Themen zu beachten und deren Einsatz mit den politischen, ökonomischen, geographischen und ökologischen Rahmenbedingungen des jeweiligen Raumes zu verknüpfen. Die Konzentration auf einen ausgewählten räumlichen Kontext geht Hand in Hand mit dem Augenmerk auf Austausch- und Transferbeziehungen, die die behandelten Kunstwerke mit Werken aus anderen Räumen verbinden.

ECTS: 6

Learning Outcome:

Die Studierenden sind sich der regionalen Prägung von Kunstwerken bewusst und in der Lage, diese anhand von Kriterien wie der Bevorzugung bestimmter Materialien, Techniken, Formen und Themen zu beschreiben. Sie verstehen den Zusammenhang zwischen den lokalen Besonderheiten einzelner Werke und ihren ortsspezifischen Funktionen und Verwendungszusammenhängen. Die Studierenden sind mit spezifischen Arbeitsweisen der Erforschung mittelalterlicher Bildkunst vertraut und imstande, diese auf ein eingegrenztes Korpus von Gegenständen anzuwenden.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Carola Jäggi

Requirements:

Assessment:

Portfolio.

Der Leistungsnachweis besteht aus Referat und mündlicher Mitarbeit (1/3) sowie schriftlicher Arbeit (2/3). Die schriftliche Seminararbeit muss bis zum 6. Januar 2027 eingereicht werden.

Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul als nicht bestanden.

Grading Scale:

1-6, Half Grades Given

Repeatability:

repeatable once, book again

Module Introduction to Machine learning for Plant Scientists

07SMBIOGPPS / Seminar

Description:

General description:

This course will introduce machine learning with emphasis on plant sciences. In Module 1 we will discuss topics like data pre-processing, feature extraction, clustering, regression, and classification. In Module 2, we will take first steps towards modern deep learning. Both modules consist of 50% lectures and 50% hands-on programming in python, where students will directly implement learned theory as a software to help solving problems in plant sciences. Module 2 also includes homework that has to be submitted. On 11th December, a feedback session in the morning will allow participants to receive feedback regarding their homework, while participants will give short talks about their own PhD projects in the afternoon to get advice from machine learning experts.

ECTS: 3

Notes:

This is a six days course. Dates: 16-20.11 & 02.12.2026

For further information please check the course catalogue on our website: <https://www.plantsciences.uzh.ch/en/teaching/phdplantscience.html>

For details concerning dates and registration: <https://ethz.ch/staffnet/en/service/courses-continuing-education.html> (select "Plant Sciences")

Students should bring their laptops to the exercises because we will program on laptops directly. It is required that students enrolling in this course have successfully passed a course in basic data science and are familiar with programming (preferably in Python). Teaching assistants will help with all programming exercises.

Module Seminar: Blockchain Platforms (BSc)

03SM22BIS016 / Seminar

Description:

General description:

The goal of this Seminar is to give students first-hand overview of the most popular blockchain protocols, including - but not limited to - Bitcoin, Ethereum, Cardano, Algorand, Casper, Tezos, Cosmos, and Polkadot. This seminar sheds light on selected advances of Blockchain platforms in terms of their structure, performance, security, and use cases, while the challenges and deficits will be critically and objectively analyzed, too.

ECTS: 3

Notes:

Students will be offered a set of topics from which they can pick one in groups of 1 - 2 and will present the topic. The presentation will need a preparation done by students and under the supervision of their supervisor. This seminar requires a short report as well, which is a documentation of the studied (and presented) topic be produced by the students of each group.

The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>.

Application for this seminar is via the new module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>

Learning Outcome:

At the end of this seminar, students will gain knowledge in most popular blockchain platforms including, but not limited to, Bitcoin, Ethereum and Polkadot. Students will research on the technical and economic aspects of blockchains via multiple resources such as official documentation of the blockchain protocols.

Target Groups:

Bachelor students in Information Systems, Software Engineering, Data Science

Module Blockchain and Crypto Economics (L&E)

03SM22MI0036 / Lecture with Practical Exercises

Description:

General description:

This course aims to give students a fundamental overview of a set of Blockchains and Crypto Economic concepts and incentives.

Much is spoken about the trading markets around cryptocurrencies and other tokenized assets. However, little is discussed about different economic and social aspects that enable the functioning of blockchain-based systems. Thus, this course overviews the incentive schemes embedded at different levels that ultimately determine the long-term functioning of these systems and digs into real-world use-cases of this technology, critically analyzing the suitability of their implementation within each context.

This course is designed as a combination of theoretical and practical sessions to provide first-hand experience in employing decentralized applications on the most popular blockchain protocols, including - but not limited to - Bitcoin, Ethereum, Cardano, IOTA, and Polkadot.

During the hands-on practical sessions, students will be given theoretical and technical guidance and technical infrastructure such as forks of before-mentioned blockchains to work on a set of practical exercises as mini-projects on their own deploying or developing decentralized applications on platforms akin to the original ones.

Examples of these platforms include implementing Decentralised Finance (DeFi) protocols (like Uniswap, SushiSwap, or Aave), using Smart Contract functionalities on Ethereum or other blockchains, deployment of second-layer solutions, forking and development of own blockchains, and deployment of monitoring tools. Based on the theoretical and technical concepts covered in sufficient detail, students will be able to start working on their own projects. Prior programming knowledge and experience are required, not necessarily in blockchain technologies.

During their project work, students are expected to develop and deploy their selected applications in two different protocols, followed by critically assessing all relevant technical aspects of their developed application within a comparative fashion. Students will assess the usability of decentralized applications compared to centralized solutions and provide an in-depth comparison of the technical and efficiency differences of employed blockchains.

ECTS: 6

Learning Outcome:

At the end of the lecture students will gain practical knowledge in programming new decentralised applications on the most popular blockchain protocols, including, but not limited to, Bitcoin, Ethereum, Cardano, Hedera, and Polkadot. They will learn how to setup their own blockchain forks for research and development. They will learn how to research technical information (white papers) and read official documentation of the blockchain protocols, as well as (if needed) their source code to solve technical challenges while developing their decentralized applications.

Target Groups:

MSc Students in Information Systems, Software Systems, Data Science, People-Oriented Computing and AI.

Languages of Instruction:

English

Course Materials:

Online documentation / Course Material

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Claudio Tessone

Requirements:

Prerequisites: Recommended: Distributed Systems

Prior Knowledge: Programming skills in any of the popular general purpose programming languages (C++, Java, Python). Optional experience in Web technologies (HTML, CSS, JavaScript) for building Web applications.

Assessment: Assignments: 40% of final grade
Final Exam: 60% of final grade

Written final exam will take place onsite on 5 January 2027, 14 - 16h.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module Seminar: Programming Languages and Paradigms (BSc)

03SM22BIS009 / Seminar

Description:

General description:

Programming languages can be classified into one or more paradigms. Going beyond the most popular and frequently encountered ones, such as object-orientation, students will learn about the reasoning and constituents of a variety of programming paradigms, including but not limited to: functional, logic, event-driven, reactive, concurrent, imperative vs. declarative, and side-effect-free programming as well as lambda calculus, message passing, pipelines and assembly. The course will begin with a few lectures giving a broad overview of programming paradigms. During the semester, each student will learn to solve problems in multiple programming languages. Students will need to create and solve programming exercises, give a presentation and implement a small software project.

Attending all sessions physically is mandatory.

ECTS: 3

Notes:

The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>.

Application for this seminar is via the new module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>

Learning Outcome:

At the end of this course, students should be able to recognize and explain different programming paradigms and know their concepts and features, motivation, advantages and disadvantages. They will also have attained basic skills in multiple additional programming languages.

Target Groups:

Bachelor's students who wish to enrich their knowledge in programming para and learn an additional programming language.

Languages of Instruction:

English

Course Materials:

There will be an overview lecture with slides. Other than that, language-specific online resources will be the primary source of information

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Harald Gall

Requirements:

Prerequisites:

Absolutely necessary are a solid understanding of assessment-level programming concepts (functions, calls, variables, classes, interpreter/compiler etc.) and an ability to program well in at least one programming language. Also, the willingness to seriously learn another programming language is required.

Assessment:

The assessment consists of three parts:

- Programming project (40%)
- Tutorial presentation (30%)
- Exercises (30%)

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Request period: from Mi 12.08.2026 10:00 to So 30.08.2026 24:00

Place allocation at the latest: Di 08.09.2026 23:59

Waiting list progression period: from Mo 07.09.2026 00:00 to Fr 18.09.2026 24:00

Cancellation period: from Mo 07.09.2026 00:00 to Mo 21.09.2026 24:00

Organisation: Institut für Informatik

Offered in:
Fall Semester 2026
Fall Semester 2025
Fall Semester 2024
Spring Semester 2023

Module Seminar: Programming Languages and Paradigms (MSc)

03SM22MIS009 / Seminar

Description:

General description:

Programming languages can be classified into one or more paradigms. Going beyond the most popular and frequently encountered ones, such as object-orientation, students will learn about the reasoning and constituents of a variety of programming paradigms, including but not limited to: functional, logic, event-driven, reactive, concurrent, imperative vs. declarative, and side-effect-free programming as well as lambda calculus, message passing, pipelines and assembly. The course will begin with a few lectures giving a broad overview of programming paradigms. During the semester, each student will learn to solve problems in multiple programming languages. Students will need to create and solve programming exercises, give a presentation and implement a small software project.

Attending all sessions physically is mandatory.

ECTS: 3

Notes:

The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>.

Application for this seminar is via the new module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>

Learning Outcome:

At the end of this course, students should be able to recognize and explain different programming paradigms and know their concepts and features, motivation, advantages and disadvantages. They will also have attained basic skills in multiple additional programming languages.

Module Advanced Banking (L+E)

03SM22MO0017 / Lecture with Practical Exercises

Description:

General description:

The objective of this class is to get a better understanding of the role of banks in the economy, and how new financial products and technologies have changed traditional banking.

The course addresses the following questions:

- Why do banks exist?
- How does the loan market work?
- How has banking changed in response to globalization?
- How do banks manage credit risk?

Topics covered: The role of financial intermediaries, the lender- borrower relationship, credit market rationing, competition in the banking sector, the transmission of monetary policy, credit risk management and global banking.

ECTS: 6

Notes:

The re-examination is only open to students who did not pass the examination in the spring term 2026 (due to failing or illness on day of exam). Students who do not fulfill this requirement may not take the examination.

Students who fulfill this requirement can book the re-examination via my modules.

Learning Outcome:

We will develop simple theoretical models with information asymmetry and review the recent empirical literature on bank stability and regulation.

At the end of the course, you should be able to understand the functioning of these models and be able to analyze and interpret banking data.

Target Groups:

Master Students and MSC UZH/ETH in Quantitative Finance Students

Languages of Instruction:

English

Course Materials:

Book: Microeconomics of Banking (Jean-Charles Rochet). For availability of the required reading please refer to "Link(s)" Freixas, X. and J.C. Rochet.
"Microeconomics of Banking", MIT Press, second edition Degryse, H., M. Kim and S. Ongena. "Microeconometrics of Banking", Oxford University Press Various scientific papers

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Steven Ongena

Requirements:

Prerequisites:

Advanced Microeconomics recommended

Prior Knowledge:

Microeconomics

Assessment:

Re-examination will take place on 22.10.2026, 10.15 - 12.00 h.

Module Derivatives portfolio valuations: advanced computational methods for real world business applications
03SM22MO0111 / Lecture with Practical Exercises

Description:

General description:

The module addresses how to value derivatives portfolios for computationally very challenging business applications, that require modelling and numerical technics beyond the standard fair value theory of pricing. Advanced valuation methodologies based on Monte Carlo simulations, Adjoint Algorithmic Differentiation (AAD) and supervised machine learning will be presented with a hands-on approach; showing how these cutting edge computational methods can be efficiently implemented in Python and introducing standard coding practices for quant developers.

Widely used metrics taken from the financial industry, such as XVA, Value-At-Risk (VAR), Expected Shortfall (ES) and regulatory capital, will be discussed extensively, by explaining their practical usage and directly implementing them in Python. In specifics, students will learn how the above-mentioned valuation methodologies can be leveraged to overcome major computational challenges.

ECTS: 3

Notes:

The re-examination is only open to students who did not pass the examination in the spring term 2026 (due to failing or illness on day of exam). Students who do not fulfill this requirement may not take the examination.

Learning Outcome:

Upon successful completion of the course, the students should achieve a practical understanding of:

- The numerical challenges of portfolio level valuations for derivatives.
- How to implement an efficient framework for Monte Carlo simulations over the life of the portfolio, based on industry standard models for Risk Factors Evolution (RFE) and pricing; as well as using advanced numerical technics such as multi-level Monte Carlo and Richardson extrapolation.
- How to implement AAD to compute portfolio Greeks in a scalable fashion.
- How to apply supervised machine learning to derivatives pricing.
- How to implement the most common portfolio level metrics used in the context of derivatives (XVA, VAR, ES, IM, regulatory capital).

Target Groups:

Master MScQF, Master B&F

Languages of Instruction:

English

Course Materials:

No text book is required for the course; provided material will be self-consistent. Additional references for people interested will be provided during lectures.

Module Applied Quantitative Finance (S)

03SM22MO0141 / Seminar

Description:

General description:

The seminar covers current research in applied quantitative finance. The topics span new contributions in option pricing/hedging and variance/jump risk premia modelling, with special focus on applications of machine learning techniques in quantitative finance.

ECTS: 3

Notes:

Deadline for application (sending CV and motivation letter): Monday 07. September 2026 (EOD)

Deadline for selection of topics: Wednesday 23. September 2026 (EOD),

Deadline for submission of essays / reports: Sunday 29. November 2026

(EOD) Distribution of topics for discussion: Monday 30. November 2026

(EOD)

Learning Outcome:

This seminar serves as continuation of MSc Quant. Finance UZH/ETH course Financial Engineering. The main goal is to gain insights into and to critically assess current research in quantitative finance. In particular, the seminar puts an emphasis on applied topics in financial engineering and work with financial data.

Target Groups:

Advanced master students who have completed MSc Quant. Finance UZH/ETH course Financial Engineering.

Languages of Instruction:

English

Course Materials:

References to relevant research papers will be provided at the beginning of the seminar. Additional materials will be available online.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Markus Leippold

Requirements:

Prerequisites:

Before taking the seminar, students should have passed the exam in Financial Engineering (MSc Quant. Finance UZH/ETH course).

Prior Knowledge:

It is assumed that students have a good knowledge of mathematics, statistics, and financial theory.

Assessment:

Paper/essay and presentation on a selected topic to be carried out in groups of three students, plus discussion of a project carried out by another group.

Attendance on all three days is required.

Grading components:

Seminar paper/essay (60%), presentation (30%), discussion (10%).

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: Intro Lecture: Monday 14. September 2026 (16:15-18:00)
Presentation Session 1: Monday 07. December 2026 (08:00-12:00)
Presentation Session 2: Tuesday 08. December 2026 (08:00-12:00)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Seminar zur betriebswirtschaftlichen Steuerlehre (Seminar Taxation of Companies)

03SM22MO0149 / Seminar

Description:

General description:

Das Seminar zur Betriebswirtschaftlichen Steuerlehre vermittelt vertiefte theoretische und praxisnahe Kenntnisse im Bereich der Unternehmensbesteuerung.

Die Teilnehmenden setzen sich mit aktuellen steuerlichen Herausforderungen und Entwicklungen auseinander, darunter z. B. die internationalen Regelungen im Zusammenhang mit BEPS 2.0 (Pillar), die Mehrwertsteuer, Altreserven, die Verrechnungssteuer im Finanzsektor sowie steuerliche Aspekte bei M&A-Transaktionen.

ECTS: 3

Notes:

Das Seminar umfasst zwei einführende Vorlesungen à 5 Stunden. Im weiteren Verlauf des Semesters sind eine Präsentation inklusive anschließender Fragerunde und Diskussion verpflichtend. Die Teilnehmerzahl ist begrenzt. Die Anmeldung erfolgt mit einer kurzen Begründung, einem CV sowie einem Notenauszug direkt bei PwC unter ch_students_team@pwc.ch. Anmeldeschluss ist der 14. August 2026. Für die Teilnahme an dieser Lehrveranstaltung ist zudem der Besuch aller Seminartermine erforderlich.

Learning Outcome:

Vertiefen der theoretischen und praktischen Kenntnisse im Bereich Unternehmenssteuern.

Target Groups:

Masterstudierende

Languages of Instruction:

Deutsch und Englisch

Course Materials:

Die Seminarunterlagen werden via OLAT zur Verfügung gestellt.

Merkmale:

Responsible instructor:

Module Behavioral Economics: An Introductory Course (L+E)

03SM22MO0162 / Lecture with Practical Exercises

Description:

General description:

This course introduces students to methods, findings and theories in behavioral economics. Behavioral economists have documented various ways in which human behavior differs from standard economic models. Knowledge of when, and how, human behavior departs from standard economic predictions is relevant for the better design of markets, organizations and policies. By the end of this course, students will have an improved understanding of several key insights produced by behavioral economic research, how these phenomena can be modeled and why they matter for economic behavior and policy.

ECTS: 6

Notes:

This module will not be recorded/no podcast.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Module Elective Module: Digital Health in Practice

04SM22MAS100 / Sonstiges

Description:

General description:

Digital health tools include, for example, electronic surveys, wearable sensors, or machine learning tools to harness unstructured information from free text or speech. These digital technologies offer novel approaches to create evidence for prevention and management of non-communicable diseases (NCDs) and common mental disorders (CMDs).

But how can digital tools be integrated meaningfully, safely, and ethically into digital health studies (DHS) to inform and scale long-term management of chronic illnesses? Students will examine this question through input lectures, discussions, and by planning, executing and analyzing their own mock DHS. This module also aims at helping students to better understand the practical design requirements, implementation, and evaluation of DHS.

The following topics are covered:

- Defining DHS for prevention, management, and treatment of NCDs and CMDs
- Strategies for long-term compliance with DHS
- Conceptual design of a wearable- and smartphone-based DHS
- Technical implementation of a wearable- and smartphone-based DHS
- Evaluation of a wearable- and smartphone-based DHS.

The module consists of live input sessions with interactive group exercises and group discussions. Complementary learning material is provided in the form of tutorial video clips. Additional coaching sessions are offered to support the groups with the development of their DHI and with the preparation of their presentations. In addition to the Talk2UZH/Research Information Management System platform (an easy-to-use DHS platform), students will gain hands-on experience with wearable fitness trackers. Basic/intermediate R or Python skills are desirable for data analyses of the mock DHS.

The module is structured as follows:

1. Students are equipped with relevant foundational knowledge (2 sessions)
2. Students build groups and develop a wearable- and smartphone-based DHS (3 sessions)
3. Students participate in the wearable- and smartphone-based DHS of their peers (ca. 10 days)
4. Students in groups evaluate their wearable- and smartphone-based DHS (1 session)
5. Students in groups present and critically discuss their findings (1 session).

ECTS: 4

Learning Outcome:

- To understand the potential and limitations of digital health tools for creating evidence for the prevention, management, and treatment of NCDs and CMDs.
- To be aware of sound methodologies and frameworks for applying digital health tools in health research (e.g., for data collection with wearables, smartphone- and large language model-based analysis methods).
- To gain hands-on experience in the conceptual design, implementation and evaluation of a wearable- and smartphone-based digital health study.

Module Masterprojektarbeit in Informatik (Master's Project in Informatics)

03SM22MP_INF / Master Paper / MA-Arbeit

Description:

General description:

The Master's Project is a large group project for 2 to 5 students. It is an intensive and demanding piece of work worth 15 ECTS credits. The Master's Project is supervised by an IfI professor.

The factsheet and registration form can be found here: <https://www.ifi.uzh.ch/en/studies/msc-info.html>

ECTS: 15

Notes:

You can find project topics on the websites of the research groups, further Master's Projects are presented at the Master Project Market every semester. You have to search for group members for project work on your own.

The department of Informatics is offering a Master's project market every semester. Details to be found here: <https://www.ifi.uzh.ch/en/studies/msc-info.html>

Target Groups:

Master students majoring in Informatics

Languages of Instruction:

Deutsch, English

Merkmale:

Responsible instructor: Alberto Bacchelli

Requirements:

Assessment: The proof of achievement of the Master's Project usually consists of a presentation or demonstration of the solution and the mandatory final report. The responsible person may specify further requirements.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Semester)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Module MAT 776 Seminar Complex Dynamics

07SMMAT776 / Seminar

Description:

General description:

Complex Dynamics is a beautiful and deep field of mathematics. Its central objects of study are the famous complicated fractal sets called Julia sets. One of the main goals of complex dynamics is to explain the geometry of these sets through a detailed study of the underlying dynamical systems.

This course will cover the basic methods for analysing complex dynamical systems and their applications to the study of Julia sets.

ECTS: 3

Notes:

The topics of complex dynamics can be approached very technically and using tools from many different fields, but we will take the opposite approach in this seminar. We will start by discussing many examples “by hand”, then move on to developing the basic theory only using elementary topology and complex analysis, which we will apply to the geometric and dynamical study of Julia and Fatou sets.

Mathematical Fields: Analysis & Geometry/Topology

Learning Outcome:

Learn the basics of the theory of 1-dimensional complex dynamics. The list of topics is the following: Classification of periodic orbits, Dynamical properties of neutral periodic points, Geometric and dynamical properties of Julia and Fatou sets, Classification of Fatou components.

Target Groups:

BSc and MSc students

Languages of Instruction:

English

Course Materials:

The seminar will follow the book “Iteration of Rational Functions” by Alan F. Beardon. This is the most elementary introduction to the subject.

Merkmale:

Responsible instructor:

Corinna Ulcigrai

Requirements:

Prerequisites:

Complex analysis and topology at the level of standard Bachelor courses.

Assessment:

- Prepare a talk and present it in class.
- Hand in a typed (LaTeX) version of the talk
- Be present throughout the semester and participate actively in discussions

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Module MAT 640 Seminar Introduction to Fourier Series

07SMMAT640 / Seminar

Description:

General description:

Fourier series are a fundamental tool in mathematics as well as its applications. They allow to represent periodic functions as sums of trigonometric functions with varying frequencies. Switching to the point of view of frequencies is a powerful tool to analyse problems in signal processing, physics, and engineering.

In this seminar we give an introduction to the theory of Fourier series and their applications. We begin with the basic concepts of periodic functions, orthogonality, and trigonometric systems. We then discuss the construction of Fourier series as well as questions of convergence.

Throughout the seminar we illustrate the theory with examples arising from mathematics, physics, and engineering.

ECTS: 3

Notes:

Mathematical Field: Analysis

Learning Outcome:

Understanding of basic concepts in the theory of Fourier series. Making statements about the convergence properties of Fourier Series

Target Groups:

Math BSc students from 3rd semester and MSc students

Languages of Instruction:

English

Course Materials:

- Valery Serov: Fourier series, Fourier Transform and Their Applications to Mathematical Physics, Springer (2017).
- Elias M. Stein and Rami Shakarchi: Fourier Analysis: An Introduction, Princeton University Press (2003).

Module Online Course II: Introduction to Legal Data Science

02SM90WM82 / Lecture with Practical Exercises

Description:

General description:

This online course aims to introduce students to legal data science and teach them competences in the statistical software R and basic statistics. The course is designed for law students who are interested in expanding their skillset to data science and intend to use these skills to conduct simple legal data science projects, for example as part of their master's thesis or dissertation.

The course is conducted solely online and will be self-paced.

Course structure:

- What is Legal Data Science?
- R Basics
- Analyzing Data and Data Visualization in R
- Descriptive Statistics in R
- Statistical Inference in R
- Linear regression in R
- Tidy Data
- Text as Data Basics

ECTS: 6

Learning Outcome:

The students

- know how legal data science shapes legal science, jurisprudence and lawmaking;
- know basic concepts and methods of statistics;
- have basic data science skills in R;
- have the competence to carry out simple statistical analyses with legal data in R.

Target Groups:

Master students

Languages of Instruction:

English

Course Materials:

All materials will be available on
<https://elearn2.mnf.uzh.ch/courses/course-v1:RWF+02SM90WM82+HS26>

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Tilman Altwicker

Requirements:

Prerequisites:

As the course is conducted online and using the statistical software R, students

should have access to a notebook on which they can install the statistical software R and R Studio.

Prior Knowledge: No programming skills necessary; all essential basics are taught in the course.

Online Course II does not build on Online Course I, so it can be taken independently.

Assessment: online exam on-site (multiple choice, with Inspera)

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated as necessary

Organisation:

Offer pattern: 1 Semester (Every Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Categories of Linguistic Analysis (Supplement: Research Paper)

06SM450-510 / Module

Description:

General description:

In this research module the acquired knowledge from the seminar «Linguistische Analysekategorien/Categories of Linguistic Analysis» will be applied to a case study.

ECTS: 3

Learning Outcome:

Students will a) design their own case study, b) do an in depth literature review on their topic, c) carry out the study and d) write an extended report on the study.

Languages of Instruction:

Englisch

Merkmale:

Responsible instructor: Marianne Hundt

Requirements:

Prerequisites:

Participants must have successfully completed the seminar «Linguistische Analysekategorien/Categories of Linguistic Analysis» in the previous spring semester.

This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module.

Assessment:

Schriftliche Arbeit

Paper deadline: 18 December 2026

Grading Scale:

1-6, Half Grades Given

Repeatability:

Module Hybridbildgebung: Vom Bild zum Befund

04SMRAD22001 / Kurs

Description:

ECTS: 1

Learning Outcome:

Lerninhalte:

Klinische relevante Themen und Fallvorstellungen zum Thema Hybridbildgebung mit Schwerpunkt Tumorstaging und Befundung von PET/CT sowie PET/MR

Lernziele:

Interessierte Studierende erhalten einen vertieften Einblick in die klinische Befundung von PET/CT und PET/MR. Das daraus erworbene Wissen ergänzt das Angebot an Vorlesungen und Kursen.

Unterrichtsformat:

Vortrag vor Ort (Raum NUK A33). Der Kurs ist als Fellows-Vorlesung konzipiert (PET/CT- und PET/MR-Neulinge aus dem In- und Ausland), eignet sich aber auf Grund der praktischen Beispiele sehr gut für das neue Curriculum, wo es um das Einüben praktischer Fähigkeiten (hier: Befundung von PET mit CT oder mit MR) geht. Kleingruppen ermöglichen ein besonders hohes Mass an Interaktion, was in den aktuellen Angeboten (Mantelstudium und Kursnachmittage für die gesamte Studentenschaft mit Minimum 8 Studierende pro Dozent) nicht erreicht werden kann.

Der Kurs eignet sich besonders auch für Studierende, die sich spezifisch für die Befundung, bzw. die «black box» hinter dem Befund und dem Bild interessieren. Diese Studierenden wollen wir damit gezielt ansprechen.

Themen:

PET Hybrid Imaging: Distinguishing Normal from Abnormal PET Hybrid Imaging in the Staging of NSCLC as Illustrated by Case Studies

PET Hybrid Imaging in Malignant Melanoma Imaging of oncologic Emergencies

Hybrid Imaging of Head and Neck Cancer

PET Hybrid Imaging Gastro-Esophageal Cancers PET Hybrid Imaging in Colorectal Cancer

PET Hybrid Imaging in Prostate Cancer

PET Hybrid Imaging in Inflammation and Infection PET Hybrid Imaging in The Heart

Prüfungsform:

Der behandelte Stoff wird durch Aktivierungstools während des Vortrags informell geprüft.

Wo und wann findet der Kurs statt?

Kurstunden werden auf VAM bekannt gegeben. Raum bereits bekannt: NUKA

33. Zeiten voraussichtlich: Mo-Fr 09.15 - 10.15h. Genauer Plan wird noch bekannt gegeben.

Wieviele Studierende dürfen teilnehmen?

Max. 3 Studierende pro Kursstunde

Für Studierende aus welchem Studienjahr ist der Kurs gedacht?

5./6. Studienjahr.

Bis wann brauchen Sie die Teilnehmerliste? Kurzfristige Anmeldung für einzelne Stunden bis am Freitag der Vorwoche ist möglich.

Module Research Project MAMES (Master Thesis)

06SM278-509 / Module

Description:

General description:

Presentation and discussion of Master thesis project. Students have two primary options: a presentation with a follow-up handout, or a written excerpt or chapter from their thesis for discussion.

Option 1: Presentation and Follow-up Handout Students may choose to present an outline of their thesis, covering aspects like their research design, research questions, or the interpretation of their results. Subsequent to this presentation, they are required to provide a handout of 1200-1500 words. This handout summarises the main points of the presentation and explicates how the student plans to manage any substantial criticism or feedback received during the presentation. It will address the main criticisms, utilising additional resources such as research literature, scholarly references, and theoretical concepts if applicable, in order to demonstrate how the feedback can be integrated to enhance their thesis.

Option 2: Written Excerpt or Chapter Alternatively, students can opt to share a written excerpt or a chapter (up to 8000 words) from their thesis. This piece will serve as the discussion point with MAMES professors and fellow students. Like the first option, the goal is to gain valuable feedback that can help in refining their thesis further.

ECTS: 3

Notes:

This module can only be booked by students who have already found an advisor for their master thesis. The module has to be booked via the booking agreement available on the website of the IAOS:
<https://www.aoi.uzh.ch/de/studies/studyorganization/courseofstudies/booking.html>

Please consult with Kathrin Ensinger directly (studentadmin@aoi.uzh.ch) and early before the booking-deadline in order to sign the agreement in due time.

Learning Outcome:

This colloquium aims to provide students with an opportunity to present their Master thesis project in class and to develop the ability to formulate and present a relevant and feasible research question. Students will learn about how to contextualize research questions within the scholarly literature (both theoretical and regional) and evaluate the different types of evidence they might use to answer them.

Languages of Instruction:

Module Sex and Biology

06SM245-503 / Module

Description:

General description:

In der Vorlesung wird zunächst auf biologische Grundlagen der Sexualität eingegangen (Fortpflanzungsarten, Genetik, Geschlechtsdifferenzierung, Reproduktionsphysiologie). Danach werden ultimate und proximate Aspekte der Sexualität adressiert (Evolutionsbiologie von Geschlechtsunterschieden und Lebenszyklusstrategien). Der Fokus liegt dabei auf Säugetieren, im speziellen Primaten. Eine Zusammenschau aus Primatologie, Anthropologie und Psychologie wird die Vorlesung abrunden (Sozialstrukturen der Primaten, Evolutionsbiologie menschlichen Verhaltens, evolutionär-psychologische Aspekte).

ECTS: 3

Learning Outcome:

Nach Teilnahme am Modul können die Studierenden: 1) Grundlagen der Entwicklungsbiologie und Fortpflanzungsphysiologie von Säugetieren einschliesslich des Menschen beschreiben; 2) Geschlechtsdimorphismus, Fortpflanzungsstrategien und Partnerwahl mit evolutionsbiologischen Ansätzen erklären; 3) Faktoren erkennen, die für die soziale Organisation innerhalb einer Primatengruppe von Bedeutung sind; 4) die Ursachen für sexuellen Konflikt und die daraus resultierenden Konsequenzen identifizieren

Überfachliche Kompetenzen: 1) mit biologischen Ansätzen Geschlechtsunterschiede analysieren und diskutieren; 2) die populärwissenschaftliche und wissenschaftliche Literatur zu Geschlechtsunterschieden kritisch überprüfen.

Merkmale:

Module Master's Thesis

06SM368-MA / Master Paper / MA-Arbeit

Description:

General description:

Die Masterarbeit ist ein wissenschaftlicher Beitrag, der dem Nachweis der Befähigung dient, ein wissenschaftliches Thema selbstständig sowie inhaltlich und methodisch angemessen bearbeiten zu können. Im TAV- Programm ist es möglich, aber nicht zwingend, praktische Arbeitsproben innerhalb einer theoretischen Reflexion mit einem fachwissenschaftlichen Gegenstand zu verbinden.

ECTS: 30

Learning Outcome:

Die Masterarbeit ist der Ausweis über die Fähigkeit, eine stufenspezifische wissenschaftliche Aufgabenstellung innerhalb der vorgegebenen Frist selbstständig zu bearbeiten und adäquat darzustellen. Die Studierenden sind in der Lage, relevante wissenschaftliche Literatur adäquat zu recherchieren, zu diskutieren sowie systematisch und korrekt zu zitieren. Sie vermögen eine wissenschaftliche Arbeit zu konzipieren und durchzuführen, in der sie sich kritisch mit der vorhandenen Forschung auseinandersetzen und eine eigenständige Perspektive auf den gewählten Gegenstand entwickeln. Sie können je nach gewählter Themenstellung einen Anwendungsbezug zum fachwissenschaftlichen Gegenstand herstellen und so Praxis mit Theorie verbinden.

Module Theory/Practice

06SM360-534 / Module

Description:

General description:

Das Modul widmet sich der Interdependenz von Theorie und Praxis im Feld der Literatur, ausgehend vom Axiom, wonach Literatur selber konstitutiv immer sowohl im theoretischen wie im praktischen Bereich verortet ist. Literarizität wird in diesem Sinne doppelt verstanden: einerseits als ein spielerisches Generieren von literarischen Fiktionen, in dessen Zug sich Literatur ihre Theorie als Poetologie selber gibt; andererseits als Praxis, in der sie an gesellschaftliche Kontexte, an konkrete Datenträger, an Editionen, an Übersetzungen, an Rechtsgrundlagen, an Aufbewahrungspraktiken etc. gebunden ist. Nicht zuletzt sind auch Institutionen wie Theater, Archive, Übersetzungs- und Verlagshäuser, aber auch Lesungen, Messen, Literaturfestivals, Spokenword-Events unhintergehbare Teil dessen, was «Literatur» ist. Insbesondere diesen Medien und Orten, durch die und an welchen Literatur «stattfindet» gilt der Fokus des Moduls, das den Teilnehmenden die Möglichkeit eröffnet, Literatur als konkrete Gesellschaftspraxis und als Berufsfeld kennenzulernen und im Rahmen des Leistungsnachweises erste eigene Erfahrungen im Literaturbetrieb zu sammeln.

ECTS: 15

Learning Outcome:

Die Studierenden gewinnen im Modul "Theorie/Praxis" einen Überblick über die Institutionen und Tätigkeitsfelder, die Literatur einerseits als ein «betriebliches» Phänomen strukturieren, andererseits aber auch auf die Literatur in ihrer Entstehung zurückwirken. Fokussiert werden daher zum einen die Produktionsbedingungen, die sozialen, medialen und ökonomischen Realitäten der Literatur (von der Edition über die Übersetzung bis hin zur Literaturförderung), zum anderen die poetologische Reflexion der Literatur auf ihre jeweiligen performativen Bedingungen, ihren Status als Ware, als Unterhaltung, als Wettbewerb, als Beruf etc. Zentrales Lernziel ist das Erwerben der Fähigkeit, die literaturbetriebliche Praxis in der Auseinandersetzung mit literarischen Gegenständen sowohl sichtbar als auch hermeneutisch fruchtbar zu machen. Eingübt wird dieses Verständnis im reflektierenden Nahkontakt mit Literaturbetrieb und literarischer Praxis.

Module Elective Module: The Musculoskeletal System: Treatment pathways of pain in and around the bones
04SM22MAS006 / Sonstiges

Description:

General description:

Der Bewegungsapparat ist täglich und fast ununterbrochen im Einsatz, Verletzungen und Abnutzungserscheinungen schränken die Lebensqualität der Patienten stark ein. Die moderne Medizin verfügt über viele diagnostische und therapeutische Möglichkeiten, welche für jeden Patienten individuell zusammengestellt werden sollen. So entsteht ein individueller Behandlungspfad. In diesem Modul vertiefen die Studierenden ihr Wissen und ihre Skills um den Bewegungsapparat und lernen, ein ganzheitliches Konzept zur Behandlung dieser in unserer Gesellschaft häufig vorkommenden Schmerzen zu erstellen. Sie erleben den Umgang mit Fachexperten, im akademischen interprofessionellen Umfeld und begleiten diese in der klinischen Versorgung von Patienten in der Form von Bedside Teachings, ambulant, stationär und im intensivmedizinischen Setting. Die Studierenden erlernen Grundlagen, sowie erweiterte Skills in der Sonographie und begleiten Fachspezialisten wie z.B. interventionelle Schmerztherapeuten und Chiropraktiker im Alltag.

ECTS: 4

Learning Outcome:

1.) Die Studierenden erkennen häufige orthopädische Erkrankungen, Verletzungsmuster und Gründe für Schmerzen, nach klinischem Untersuch und können korrekte weitere diagnostische und therapeutische Massnahmendefinieren.
2.) Sie vertiefen und erweitern ihr Wissen und ihre Skills in der erweiterten Schmerzdiagnostik (inkl. Einblick in die genetische Prädisposition und ""personalized medicine"") und Schmerztherapie, sowie in der diagnostischen und interventionellen Sonographie.
3.) Die Studierenden vertiefen ihr Wissen in der Anatomie und den Krankheitsbildern des Bewegungsapparates, sowie ihre Skills in der körperlichen Untersuchung.
4.) In praktischen Übungen werden grundlegende praktische Fähigkeiten in der Sonographie erworben und vertieft.
5.) Die Studierenden erstellen einen Treatment Pathway, ein interdisziplinäres Behandlungskonzept, welches sämtliche angegliederten Fachdisziplinen und Fachspezialisten einbezieht (Orthopädie, Rheumatologie, Schmerzspezialisten und Anästhesie, Intensivmedizin, Physiotherapie und chiropraktische Medizin).
6.) Die Studierenden erlernen und erleben den Umgang im interprofessionellen Team, sowie den Umgang zwischen Patienten und Fachpersonen im Rahmen der klinischen Arbeit.

Module Elective Module: Nutrition Medicine

04SM22MAS007 / Sonstiges

Description:

General description:

Ernährungsphysiologie, Abklärung Ernährungszustand Ernährungszusammensetzung - Makro-, Mikronährstoffe Ernährung in Schwangerschaft/ Stillzeit, im Alter, bei Sport Ernährung in Onkologie, Intensivmedizin, perioperativ und bei Stoffwechselkrankheiten Kurzdarmsyndrom Künstliche Ernährung (enteral, parenteral)

ECTS: 4

Learning Outcome:

Studenten können nach dem Mantelstudium die Physiologie der Ernährung erklären, die Komponenten einer gesunden Ernährung (Makro- und Mikronährstoffe) aufzählen, den Ernährungszustand eines Patienten mit geeigneten Mitteln evaluieren, die Bedeutung der Ernährung in spez. Lebensphasen (z.B. Schwangerschaft, Alter) erläutern, Ernährungsinterventionen bei Krankheiten (z.B. Krebs, Intensivmedizin etc.) beschreiben, Produkte der künstlichen Ernährung (enteral, parenteral) nennen und erklären.

Languages of Instruction:

Deutsch

Course Materials:

Zeitgerechte Publikation der Hand-Outs auf VAM Aufschaltung der zu besprechenden Publikationen auf VAM Empfehlung Online Lehrliteratur UZH (z.B. Thieme "Ernährungsmedizin")

Merkmale:

Responsible instructor:

Philipp Gerber

Requirements:

Assessment:

Pro Doppelstunde (je nach Anzahl Studenten auch pro Lektion oder pro Vormittag) wird jeweils ein Student in einem Kurzreferat (10min) eine durch den Dozenten vorgegebene Studie vorstellen und kritisch kommentieren, jeder Student wird diesen Leistungsnachweis erbringen müssen.

Grading Scale:

Pass/Fail

Repeatability:

Can't be repeated

Organisation:

Offer pattern:

1 Semester (Every Semester)

Module Perspectives on Literary History

06SM360-117 / Module

Description:

General description:

Das Modul, bestehend aus einer Vorlesung und einem Seminar, bietet literaturhistorische Perspektiven an, indem es repräsentative Texte der neueren deutschen Literatur in ihren literarhistorischen Besonderheiten und Kontexten analysiert. Die Vorlesung bietet eine allgemeine Orientierung über einen Schwerpunkt der neueren deutschen Literaturgeschichte ab 1700 bis zur Gegenwart an. Gegenstand und Inhalt der Vorlesung können die Einführung in eine literarische Strömung, in größere Zusammenhänge oder exemplarische Konstellationen der Literaturgeschichte unter Berücksichtigung der historischen Poetik sein.

Das Seminar widmet sich Themen, die eine theoretisch reflektierte Vertiefung der Literaturgeschichte anhand jeweils einer Gattung, einer Autorin/ eines Autors oder eines Einzelwerks unter dem Aspekt der kultur- und epochenspezifischen sowie der formalen, poetologischen und medienhistorischen Besonderheiten der Texte ermöglichen. Vorlesung und Seminar unterstützen die Studierenden dabei, literarhistorisches Wissen der Neueren deutschen Literatur zu vertiefen und Kenntnisse über spezifische und exemplarische Zusammenhänge der Literaturgeschichte sowie über Epochen, Gattungen, Formen und Werke zu erwerben.

ECTS: 9

Learning Outcome:

Ziel ist der Erwerb und die Diversifizierung literaturgeschichtlichen Wissens.

Die Studierenden gewinnen in Vorlesung und Seminar einen vertieften Einblick in zwei literaturhistorische Konstellationen (Epochen, Strömungen, Gattungen, Autor*innen) und die entsprechende historische Poetik. Sie reflektieren die historische Signatur und die Kontextgebundenheit von Literatur und üben in exemplarischen Lektüren den hermeneutischen Umgang damit ein. Sie erlernen den reflektierten Umgang mit Forschungsliteratur und erwerben die Kompetenz zur Entwicklung einer eigenen, thesengeleiteten Interpretation historischer Texte. Diese Kompetenzen befähigen sie zum Verfassen einer kleineren schriftlichen Arbeit.

Languages of Instruction:

05SM.305_bk / Course

Description:

General description:

Vetsuisse-Tierärztinnen und Tierärzte und externe Tierärztinnen und Tierärzte stellen den Studierenden den Tierärzte-Beruf vor.

ECTS: 2

Learning Outcome:

Die Studierenden sollen den Beruf der Tierärztin und des Tierarztes in verschiedenen Bereichen kennen lernen. Sie sollen Fragen über den Beruf stellen können und kompetente Antworten aus der Praxis erhalten. Die Studierenden erhalten die Grundlagen, um sich fundiert für eine Schwerpunktrichtung im Master entscheiden zu können.

Merkmale:

Module Food Safety

05SM.315_Is / Course

Description:

General description:

Der Fachbereich der tierärztlichen Lebensmittelsicherheit und -hygiene ist ein wesentlicher Teilbereich der Veterinary Public Health (VPH) Aufgaben und damit auch ein Baustein im «One Health Konzept». Jeder Eingriff bei einem Nutztier entspricht auch einem Eingriff in die Lebensmittelproduktionskette. In diesem Modul geht es darum, Ihnen Grundlagen im Bereich der tierärztlichen Lebensmittelhygiene zu vermitteln. Im möglichen weitergehenden Vertiefungstrack VPH wird dann auf diesem Grundwissen aufgebaut.

ECTS: 3

Learning Outcome:

- Schlachtprozessstufen bei Rind und Schwein vor dem Hintergrund Technologie, Tierschutz und Schlachthygiene beschreiben
- Grundsätze der food safety Massnahmen bei der Fleischgewinnung kennen
- Qualitätsparameter bei rohem Fleisch kennen
- Grundsätze der food safety Massnahmen bei der Milchgewinnung kennen
- Grundkenntnisse der Qualitätsparameter der Milch
- Grundkenntnisse über Verfahren zur Verlängerung der Haltbarkeit
- Grundkenntnisse der Technologie ausgewählter Fleisch- und Milcherzeugnisse
- HACCP-System als Werkzeug der Inprozesssicherung kennen
- Grundkenntnisse über ausgewählte Lebensmittelinfektions- und -intoxikationserreger

Module Gastrointestinal System

05SM.320_vd / Lecture with Practical Exercises

Description:

General description:

Der Verdauungstrakt von der Mundhöhle bis zum Anus stellt die grösste Kontaktfläche des Körpers zur Aussenwelt dar. Über Gangsysteme angeschlossen sind die so genannten darmassoziierten Drüsen Leber und Pankreas. Funktionell dient das Verdauungssystem dazu, neben Wasser vor allem Nährstoffe, Eiweiss und Kohlenhydrate, die zum Teil unter Mithilfe von Mikroorganismen aufgespalten werden, Mineralstoffe, essentielle Fettsäuren und Vitamine aufzunehmen und Unverdauliches und Endprodukte des Stoffwechsels auszuschcheiden.

Ein Ausfall dieser Funktionen führt zu verschiedensten Erkrankungen und Funktionsstörungen (Mangelernährung, Durchfall usw.).

Die Schleimhaut des Verdauungstraktes setzt sich andererseits mit Hilfe des schleimhaut-assoziierten Immunsystems mit Mikroorganismen und Parasiten (Kommensale, Symbionten, Pathogene) sowie potenziell schädlichen Stoffen auseinander, die über die Nahrung aufgenommen werden. Dazu ist ein hochdifferenziertes System unterschiedlicher Strukturen und Funktionen der Schleimhaut, d.h. verschiedener Zellen mit differenzierten Funktionen erforderlich. Störungen dieses Systems verursachen unter anderem Entzündungen oder auch Unverträglichkeiten von Futterbestandteilen.

Nach Überwinden der Schleimhautbarriere, in welcher erste Stoffwechselprozesse stattfinden, erfolgt die weitere Verarbeitung aufgenommenen Stoffe im Wesentlichen in der Leber, damit diese dann dem Organismus zur Aufrechterhaltung der Funktion und Leistung zur Verfügung stehen.

Die darmassoziierten Drüsen Leber und Pankreas nehmen neben den Aufgaben im Ablauf der Verdauung an verschiedensten weiteren Funktionen im Organismus teil. Die Leber erfüllt dabei lebenswichtige Aufgaben wie z.B. die Verarbeitung chemischer Substanzen und deren Speicherung und Abgabe im Bedarfsfall, den Abbau von Stoffwechselprodukten und Giften und die Herstellung und Abgabe von Gallenflüssigkeit. Ein Ausfall von Leberfunktionen hat u.a. zur Folge:

- Das Versagen der Eiweiss-synthese führt zu Störungen der Hormon- und Enzymherstellung, auch dem Mangel an Gerinnungsfaktoren im Blut.
 - Die Störung des Blutdurchflusses durch die Leber führt zu einer Erhöhung des Druckes im Pfortadersystem; dies zusammen mit dem gestörten Mineral- und Eiweißgehalt des Blutes führt zur Ansammlung von freier Flüssigkeit im Bauchraum.
 - Nicht abbaubare, toxische Stoffwechselprodukte führen zu rascher Schädigung der Gehirnzellen.
- Das Pankreas beteiligt sich an der Verdauung über die Bereitstellung von Verdauungsenzymen (exokriner Teil) und über die Sekretion von Hormonen wie z.B. Insulin und Glukagon (endokriner Teil) an der Verwertung der aufgenommenen Nährstoffe. Die Aufgaben des endokrinen Anteiles der Bauchspeicheldrüse werden im Organblock Endokrinologie abgehandelt.

- Störungen des pankreatischen Systems verursachen demgemäss Verdauungsstörungen (Maldigestion) und / oder hormonelle Störungen (Diabetes mellitus).

Um die Entstehung und den Verlauf von Erkrankungen des Verdauungssystems in den einzelnen Teilen bei verschiedenen Tierspezies zu verstehen und diese damit auch diagnostizieren und schliesslich therapieren bzw. verhindern zu können, ist es erforderlich, Struktur und Funktion der verschiedenen Abschnitte des Verdauungstraktes und der assoziierten Drüsen, der dabei beteiligten Zelltypen sowie deren Schädigungsmuster und deren Vernetzung mit dem gesamten Organismus zu verstehen und interpretieren zu lernen.

ECTS: 11

Learning Outcome:

Der Erwerb von Kenntnissen über Grundstrukturen und Funktionen des Verdauungstraktes und der assoziierten Drüsen, um damit Reaktionsmuster des Organsystems nach Einwirken verschiedenster Noxen zu verstehen. Daraus entwickelt sich das Verständnis der Bedeutung dieser Reaktionsmuster bei der Entstehung von

Erkrankungen dieses Organsystems und den damit verbundenen Allgemeinerkrankungen, die sich auf den gesamten Körper auswirken. Diese Grundlagen ermöglichen die Diagnose, Therapie und Prophylaxe von Erkrankungen des Verdauungssystems.

Module Kidneys, Fluid and Electrolyte Balance

05SM.330_nsw / Lecture with Practical Exercises

Description:

General description:

Der Organblock umfasst die Niere, den Salz- und Wasserhaushalt und die ableitenden Harnwege.

Die Harnorgane haben eine zentrale Bedeutung für den gesamten Stoffwechsel des Organismus, da die Nieren u.a. für die Ausscheidung von Stoffwechselendprodukten, der sog. harnpflichtigen Substanzen, verantwortlich sind. Daneben stellen die Nieren ein zentrales Organ für die Aufrechterhaltung des sog. milieu intérieur, d.h. für die Homöostase zahlreicher Parameter dar. Darunter fallen z.B. über spezifische Sekretions- und Absorptionsprozesse in den Nierentubuli der Elektrolyt- und Wasserhaushalt und der Säure- und Basenhaushalt. Daneben sind die Nieren essenziell an der Regulation des Blutdrucks beteiligt (auch Regulation der Erythropoese). Infolge der zahlreichen Funktionen der Harnorgane ist die klinische Symptomatik bei funktionellen Störungen der Harnorgane vielgestaltig und nur z.T. durch die fehlende Ausscheidungsfunktion der Nieren bedingt. Die ableitenden Harnwege sind für die Ableitung des gebildeten Endharns zuständig. Störungen im Bereich der ableitenden Harnwege können infolge eines Rückstaus von Harn massive systemische Störungen nach sich ziehen.

ECTS: 7

Learning Outcome:

- den makroskopischen und mikroskopischen Aufbau der Niere und die Funktionen der verschiedenen Abschnitte für Harnbildung, -konzentrierung und Harnausscheidung kennen
- Lage und makroskopische Anatomie von Nieren, Harnleiter, Harnblase und Harnröhre einschliesslich der Blutgefässversorgung, der Innervation und der wichtigsten Unterschiede zwischen den Tierarten beschreiben können
- Grundzüge der Entwicklung der Harnorgane mit den wichtigen möglichen Fehlbildungen erläutern können
- die Regulation des Salz-, Wasser- und Säure/Basen-Haushalts sowie die sich daraus ergebenden Grundsätze für die pharmakologische Behandlung etwelcher Störungen beschreiben können
- die Untersuchungsmethoden für den Harntrakt kennen und selbstständig eine Untersuchung des Harnapparats durchführen können
- pathologische Erscheinungsmuster und pathologische Befunde der Nieren und der ableitenden Harnwege erkennen
- typische klinische Symptome bei Erkrankungen der harnbildenden und harnableitenden Organe sowie typische Laborveränderungen erkennen und interpretieren können. Risikofaktoren, welche zu Erkrankungen führen, sowie Prophylaxemassnahmen kennen.
- Präanalytik und Methodik der Urinuntersuchung, sowie der "Nierenparameter" kennen
- die zu einer Niereninsuffizienz führenden Störungen und Mechanismen beschreiben können
- die zum klinischen Bild der Urämie und des nephrotischen Syndroms führenden Erkrankungen erläutern können
- Erkrankungen der harnbildenden und harnableitenden differentialdiagnostisch gegen andere Erkrankungen abgrenzen können
- die Entstehung und Therapie von Urolithiasis erläutern können
- die Entstehung und Therapie von Harnabsatzstörungen bzw. Harninkontinenz erläutern können
- die wichtigsten chirurgischen Therapiemöglichkeiten kennen: Chirurgische Entfernung der Harnsteine, Urethrotomie, Laparozystotomie, laparoskopische Eingriffe, Nephrektomie

Module Parasitology

05SM.325_p2 / Lecture with Practical Exercises

Description:

General description:

Parasitologie I

Lehrinhalt sind die Helminthen (parasitische Würmer) von Heim- und Nutztieren: Cestoden, Trematoden und Nematoden.

Parasitologie II

Lehrinhalt sind die parasitischen Protozoen von Heim- und Nutztieren und die veterinärmedizinische Arachno-Entomologie.

ECTS: 5

Learning Outcome:

Parasitologie I

- Die Studierenden kennen die Biologie, Epidemiologie, Pathogenese, Immunologie, Klinik und die Bedeutung von veterinärmedizinisch wichtigen Helminthen, bzw. den von ihnen verursachten Infektionen.
- Die Studierenden können die für Parasitosen relevanten diagnostischen Strategien nennen.
- Die Studierenden können Stadien von Parasiten in diagnostischem Material anhand der Morphologie identifizieren.
- Die Studierenden können auf der Basis der vermittelten Grundlagen Bekämpfungsstrategien für die jeweiligen Parasitosen diskutieren.

Parasitologie II

- Die Studierenden kennen die Biologie, Epidemiologie, Pathogenese, Immunologie, Klinik und die Bedeutung von veterinärmedizinisch wichtigen parasitischen Protozoen und Arthropoden.
- Die Studierenden können die für Parasitosen relevanten diagnostischen Strategien nennen.
- Die Studierenden können Stadien von Parasiten in klinischem Material anhand der Morphologie identifizieren.
- Die Studierenden können auf der Basis der vermittelten Grundlagen Bekämpfungsstrategien für die jeweiligen Parasitosen diskutieren.

Module Virology

05SM.335_vr / Course

Description:

General description:

In Virologie I werden die Prinzipien der Allgemeinen Virologie vermittelt. Die Studierenden lernen was ein Virus überhaupt ist, wie es sich im Umfeld der Zelle, seines Wirtes, bzw. in einer Wirtspopulation verhält. In Zweiergruppen wählen die Studierenden zu Beginn des Semesters eine spezifische Prüfungsfrage aus einem Katalog aus und beantworten diese im Laufe des Semesters im Rahmen eines Kurzvortrags.

In Virologie II befassen sich die Studierenden mit spezifischen Virusinfektionen bei Tieren. Schwerpunkte sind Aetiologie, Epidemiologie, Pathogenese, Immunantwort, Diagnostik, prophylaktische und therapeutische Möglichkeiten sowie gegebenenfalls staatliche Bekämpfungsmassnahmen.

ECTS: 5

Learning Outcome:

Virologie I

- Prinzipien der Allgemeinen Virologie kennen und verstehen
- Grundlagen der Virus-Zell-Interaktion, der Virus-Wirts- Interaktion und der Virus-Wirtspopulations-Interaktion verstehen

Virologie II

- Kenntnis der Besonderheiten spezifischer Virusinfektionen bei Haus- und Nutztieren

Module Legal Gender Studies

02SM120WM13 / Course

Description:

General description:

The course "Legal Gender Studies" explores the relationships between gender and the law, with a focus on feminist and queer approaches to law. It introduces students to the historical development, methods, and key theoretical frameworks of legal gender studies, shedding light on how law both shapes and is shaped by gendered assumptions, identities, and power structures.

Alongside its engagement with feminist and queer theories, intersectionality, vulnerability, and masculinities theories, the course will focus on a range of contemporary topics, including gender-based violence and the legal questions surrounding trans and non-binary people. Methodologically, students will critically engage with legal scholarship, case law, and relevant research from the social sciences at the intersection of gender and law.

In addition to the core teaching, the course will feature guest lectures by invited experts and a guided thematic visit to the Kunsthaus Zürich, exploring representations of gender, femininity, and womanhood through art.

ECTS: 3

Learning Outcome:

By the end of the course, students will be able to:

- Explain the key concepts, methods, and theoretical approaches of Legal Gender Studies, including feminist and queer approaches to law.
- Critically analyse the concepts of equality, discrimination, diversity, and gender from historical, comparative, and global perspectives.
- Examine and critically assess how law shapes, reflects, and challenges gendered assumptions, identities, and power structures.
- Apply feminist, queer, intersectional, vulnerability, and masculinities perspectives to the analysis of legal issues and contemporary questions of gender and law.
- Analyse and evaluate legislation and case law concerning gender-related issues, including gender-based violence and the legal recognition and protection of trans and non-binary people.
- Engage critically with legal scholarship and relevant interdisciplinary research at the intersection of gender and law.

Languages of Instruction:

English

Course Materials:

Sources and reading materials will be uploaded to OLAT (<https://lms.uzh.ch/url/RepositoryEntry/17916887358>) together with the slides.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Alice Margaria

Requirements:

Prior Knowledge:

Information für Studierende ausserhalb des BLaw-Mono-Studienprogrammes:
Bitte beachten Sie, dass Teile der Vorlesung "Legal Gender Studies" genuin rechtswissenschaftlich ausgerichtet sind und dafür Kenntnisse der

rechtswissenschaftlichen Methoden vorausgesetzt werden; die Vorlesung selbst bietet keine spezifische Einführung in die rechtswissenschaftlichen Methoden.

Assessment: Essay or oral examination based on the source texts provided on the subject matter.
More info will be provided during the first class and published here / onOLAT (<https://lms.uzh.ch/url/RepositoryEntry/17916887358>).

Module General Theory of State From a Legal Perspective

02SM120WM14 / Course

Description:

General description:

Das «Allgemeine Staatsrecht» bzw. die Allgemeine Staatslehre wird an der Universität Zürich seit Jahrzehnten gepflegt. Anders als bei den staatsrechtlichen Vorlesungen des ersten Studienjahres stehen weniger die geltenden Bestimmungen des schweizerischen Verfassungsrechts im Vordergrund als vielmehr die historische und vergleichende Analyse grundlegender Problembereiche der Staatslehre: z.B. Allgemeine Staatsformenlehre, Föderalismus in einer breiteren Perspektive, Demokratische Beteiligungsformen, Ausgestaltungen der verschiedenen Staatsorgane. Zunächst wird jeweils die Theorie erarbeitet, bevor diese in vertiefenden Fallanalysen (mit zusätzlichen Lesematerialien) veranschaulicht wird.

ECTS: 3

Target Groups:

Studierende der Rechtswissenschaft im Aufbaustudium, die ihre Kenntnisse im öffentlichen Recht um vergleichende und historische Aspekte erweitern möchten.

Studierender anderer Studienrichtungen, die Rechtswissenschaft im Nebenfach belegen und ihre Kenntnisse im öffentlichen Recht vertiefen wollen.

Languages of Instruction:

Deutsch

Course Materials:

Walter Haller/Alfred Kölz/Thomas Gächter, Allgemeines Staatsrecht, 6. Auflage, Zürich/Basel/Genf 2020; zusätzliche Lesematerialien, die online zur Verfügung gestellt werden.

Module Law of the Legal Profession

02SM90WM86 / Course

Description:

General description:

Anwältinnen und Anwälte bewegen sich in einem Spannungsfeld: Einerseits sind sie unabhängige, unternehmerisch tätige Berufsleute, die entgeltliche Dienstleistungen erbringen. Andererseits spielen sie für den Zugang zur Justiz - und damit für die Verwirklichung der Rechtsordnung - eine wichtige Rolle. Anwältinnen und Anwälte haben insofern besondere Pflichten, aber auch Rechte. Der Ausgleich dieser teilweise gegenläufigen Interessen ist Gegenstand des Anwaltsrechts, das seinerseits zwei Pole aufweist: Es ist teilweise öffentlich-rechtlicher Natur (Zulassung, Berufsregeln, Aufsicht, Freizügigkeit), teilweise privatrechtlich geregelt (Mandatsverhältnis zur Klientschaft). Die Darstellung dieser komplexen Rechtslage ist Gegenstand dieser Vorlesung.

ECTS: 6

Learning Outcome:

Kenntnis des für die praktische Tätigkeit als Anwältin/Anwalt massgeblichen Rechts vor dem Hintergrund der Relevanz dieses Berufs im Rechtsstaat.

Target Groups:

Masterstudenten

Languages of Instruction:

Deutsch

Module Residential and Commercial Tenancy Law

02SM90WM89 / Course

Description:

General description:

Ziel des Kurses ist es, die Studierenden in die theoretischen und praktischen Probleme des sozialen Mietrechts einzuführen. Unter sozialem Mietrecht werden die Vorschriften zur Wohn- und Geschäftsraummiete im Anwendungsbereich des OR, des ZGB, der ZPO und von Nebenrechten wie der Verordnung über die Miete und Pacht von Wohn- und Geschäftsräumen (VMWG) verstanden.

Die Lehrveranstaltung umfasst Fragen rund um die Mietzinsgestaltung, den Kündigungsschutz (einschliesslich Mieterstreckung) und Mängelrechte. Ferner werden die Übertragung von Mietverträgen, die vorzeitige Rückgabe des Mietobjekts und die Untermiete thematisiert. Insbesondere mit Blick auf die Geschäftsraummiete gehören Rohbaumiete und Triple-Net-Mietverträge zum Inhalt der Veranstaltung.

ECTS: 6

Notes:

Die Art der Durchführung der Lehrveranstaltung wird auf der Website der Dozentin bzw. des Dozenten publiziert.

Target Groups:

Studierende auf Masterstufe

Module BIO 340 Biology, Evolution, and Ecology of Marine Mammals

07SMBIO340 / Course

Description:

General description:

Marine mammals are a diverse group of 129 species from different Orders that rely on aquatic habitats for their existence. This diverse group has evolved several specialised aquatic traits, which allowed it to adapt to the marine environment. Some marine mammal species have also evolved many traits found in humans and primates, such as large brain size, slow life history, and advanced cognitive abilities, making them an ideal group for the study of convergent evolution. The course will cover these intriguing evolutionary aspects, but also address pressing conservation issues in the light of ever-increasing anthropogenic threats.

ECTS: 3

Notes:

The course will be accompanied by a field course (BIO341) in Shark Bay, Western Australia, with only a limited number of places available.

Students who would like to participate in the course will need to apply separately.

Learning Outcome:

By the end of the course, you will

- have a taxonomic overview of extinct and extant marine mammal species
- understand why and how often tetrapods went back to the sea
- have a grasp of aquatic adaptations and how they arose
- understand how the marine environment influences social structure of marine mammal populations
- understand similarities and differences between primate and marine mammal populations and to what extent convergent evolution took place
- be able to evaluate short- and long-term threats faced by marine mammals due to climate change and other anthropogenic threats

Module BME 646 Research in Orthopedic Computer Science

07SMBME646 / Forschungsseminar

Description:

General description:

Recent publications and research projects from the fields of digital technologies in surgery (Augmented Reality, AI, surgical robotics), as well as other related machine learning computer vision disciplines, are presented and discussed by the attendees.

ECTS: 2

Notes:

Registration by email to rocs@balgrist.ch

Learning Outcome:

Students will be updated with cutting edge developments in the field of computer-aided surgery, both by actively presenting papers and by participating in a group discussion. Discussions will enable them to reflect on pros and cons of selected state-of-the-art methods, and offer guidance for the presentation of own research results at major computer science conferences.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Philipp Fürnstahl

Requirements:

Prerequisites:

Interest in the field of computer-aided surgery, prior exposure to computer vision and machine learning is helpful.

Assessment:

Oral presentations with active participation.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated as necessary

Organisation:

Offer pattern:

1 Semester (Every Semester)

Dates/Times/Deadlines:

The course is taking part also during the "non-lecture" time of the semester.

Module Dermatochirurgische Fortbildung für UnterassistentInnen

04SMDER22001 / Seminar

Description:

ECTS: 1

Notes:

Kontakt-E-Mail: christian.greis@usz.ch

Learning Outcome:

Die Veranstaltung soll Studierenden im fortgeschrittenen Semester die Dermatochirurgie näherbringen. In diesem Rahmen werden praktische dermatochirurgische Fälle vorgestellt, besprochen, sowie auch typische Krankheitsbilder der Dermatochirurgie aufgezeigt.

Inhaltsschwerpunkte:

- Indikationen in der Dermatochirurgie
- Klassische Nahttechniken
- Klassische Verschlussstechniken (inkl. Lappenplastiken)
- Praktische, interaktive Fallbesprechungen
- (Nahtkurse bei Präsenz)

Target Groups:

Studierende im Masterstudium

Merkmale:

Responsible instructor: Peter Schmid-Grendelmeier

Module MINTerlink: Formation of Knowledge in STEM Fields in Primary and Secondary School

06SM090MINT / Module

Description:

General description:

Das Projekt MINTerlink wurde lanciert, um einen Wissensaustausch zwischen Lehrdiplomstudierenden in den MINT Fächern (Mathematik, Naturwissenschaften, Informatik) und Volksschullehrpersonen aller Stufen in den MINT-Fächern zu etablieren. Dabei absolvieren Lehrdiplom- Studierende ein vorbereitendes Blockseminar um dann anschliessend mit einer Lehrperson von der Volksschule gemeinsam auf der Primar- oder Sekundarstufe zu unterrichten. Diese Assistenzzeit beinhaltet in der Regel einen Einsatz von 10 bis 16 Lektionen in der Klasse. Die Veranstaltung findet gemeinsam mit der ETHZ statt.

ECTS: 2

Notes:

Das Modul ist geeignet für Lehrdiplomstudierende mit den Fächern Mathematik, Informatik, Biologie, Chemie, Physik, Geographie. Dieses Modul kann nur nach erfolgreichem Abschluss von Modul 222PPM "Pädagogische Psychologie" belegt werden. Dozierende: Ursina Markwalder, Kai Niebert.

Die Modulbuchung erfolgt über die ETH, dazu ist eine Registrierung bei der ETH erforderlich: <http://www.ethz.ch/de/studium/non-degree-angebote/fachstudierende.html>.

Für die Anmeldung oder bei Fragen melden Sie sich bitte bei info@minterlich.ch oder direkt bei Ursina Markwalder ursina.markwalder@inf.ethz.ch

Merkmale:

Responsible instructor: Kai Niebert

Requirements:

Assessment: Portfolio: Mündliche, schriftliche und praktische Übungen.
Das Modul wird als bestanden bewertet, wenn alle Elemente des Portfolios bestanden sind.

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Module Doctoral Seminar in Graphics and Visualization

03SMDINF1139 / Doktorandenseminar

Description:

General description:

The course consists of two parts: A 3 day workshop including individual presentations of research projects, as well as group work on and presentations of new approaches in specific research fields. The second part consists of regular meetings which include researchers and doctoral students presenting their PhD research progress, current paper projects, conference reports, presentation rehearsals, new research projects or guest lectures, as well as the review and evaluation of other student projects.

ECTS: 2

Notes:

Room: TBA

Learning Outcome:

The PhD students learn to know how to design and present a scientific publication, as well as how to manage their PhD project, and how to manage, supervise and evaluate student projects.

Target Groups:

PhD students in computer graphics and visualization

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Renato Pajarola

Requirements:

Assessment:

One Presentation of a paper project, conference presentation or research project.

Module Fundamentals of Digital Marketing (L+E)

03SM22MO0197 / Lecture with Practical Exercises

Description:

General description:

Digital marketing has transformed how business and other organizations communicate with their audiences. The objective of this lecture is to give you an overview of the fundamentals of digital marketing. The lecture will be structured as follows:

1. Introduction to Digital Marketing
2. Value Proposition Design
3. Metrics and Analytics
4. Website Development
5. Search Engine Optimization
6. Marketing on Social Media
7. Advertising Online (display and paid search)
8. Email Marketing

Throughout bi-weekly exercise sessions, students will apply theoretical knowledge to a collaborative group project. Each group is tasked with developing their own project ideas, such as a book exchange platform, a landing page to promote an app launch, or a platform to find sports buddies. The practical application involves setting up a basic website, optimizing it for

search engines, promoting their projects on social media, implementing a paid online advertising campaign, and conducting an email marketing campaign. In the final lecture and exercise session, each group will present their project along with the insights gained from the experience.

Active participation is crucial for success in this course. Your engagement in these activities will directly influence your assessment. As group projects begin in the very first session and groups are formed during this class, attendance from the first lecture is essential; because active participation is part of the final grade, non-attendance will negatively affect the participation component.

ECTS: 6

Notes:

- This lecture will take place on-site.
- Slides, documents, and further information will be provided in OLAT at the beginning of the course
- The registration for this course takes place via the UZH Module booking tool.
- This course forms part of the marketing minor program in the master program

Learning Outcome:

Students...

- ...are able to apply the value proposition framework in the context of digital marketing.
- ...understand how to plan and integrate digital marketing strategy to traditional marketing and business strategy.
- ...are able to define and implement different approaches to realize and manage the digital marketing strategy using a digital marketing mix (i.e., website development, search engine optimization, paid online advertising, email marketing, marketing on social media)
- ...understand how to evaluate and optimize digital channel performance.

Target Groups:

Students of the Master program

Languages of Instruction:

English

Course Materials: Slides and reading material (will be announced in the lecture)

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Andrea Giuffredi-Kähr

Requirements:

Prerequisites: Admission to the Master program

Assessment: Group Projects (60%): Tasks from exercise sessions, including website setup, SEO optimization, social media, paid advertising, and email marketing, contribute to 60% of your grade. Each task requires a corresponding written report.

Presentation of Group Project (30%): A significant part of your assessment (30%) is based on presenting your group project, demonstrating your understanding and practical application of course concepts.

Participation in the Course (10%): Active engagement in the course (i.e., lecture and exercise sessions) accounts for 10% of your overall grade. This reflects your commitment to the collaborative learning experience.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)
