Module CHE 207 Spectroscopic methods and structure elucidation in chemistry

07SMCHE207 / Lecture with Practical Exercises

Description:

General description:

Nuclear Magnetic Resonance, Mass Spectrometry, IR- und UV/VIS-Spectroscopy, Structure Elucidation

ECTS: 4

Notes:

The exam will take place on Thursday, January 14th, 2027, from 9-11h!

The follow-up exam will take place on Thursday, February 18th, 2027 from 9-11h!

Learning Outcome:

Understanding and application of the discussed contents

Target Groups:

Students of Chemistry, Biochemistry and Chemistry and Business Studies in their second year of studies

Languages of Instruction:

German

Course Materials:

lecture-accompanying scripts (see under "links"; please print in A4)

Books:

- Spektroskopische Methoden in der organischen Chemie (Hesse - Meier - Zeeh) von St. Bienz, L. Bigler, T. Fox, H. Meier, (ISBN: 9783135761091)

Online available via UZH access: <https://ezproxy.uzh.ch/login/?url=https://doi.org/10.1055/b-004-129729>

- Clayden, J., Greeves, N., & Warren, S. (2012). Organic chemistry, Chapter 3, 13 and 18. Oxford University Press.

Online available via UZH access: ebookcentral.proquest.com/lib/uzh/reader.action?docID=1591368 (<https://ebookcentral.proquest.com/lib/uzh/reader.action?docID=1591368&c=UERG&pgg=1>)

Merkmale:

Responsible instructor:

Laurent Bigler

Requirements:

Prior Knowledge:

none

Assessment:

written exam (2 hours) after the semester

The exam is held in German (in exceptional cases an English translation can be provided on request)

In case of a failed attempt, the entire module must be retaken.

Grading Scale:

Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Organisation: Division III Chemistry

Offered in:
Fall Semester 2026
Fall Semester 2025
Fall Semester 2024
Fall Semester 2023
Fall Semester 2022

Component of:

Module CHE 211 Practical course in Physical Chemistry

07SMCHE211 / Praktikum

Description:

General description:

Experiments related to the content of the lectures CHE 205 and CHE 206, introduction to data and error analysis, writing of laboratory reports

ECTS: 5

Notes:

The laboratory capacity is limited! Anyone who fulfills the requirements for the lab course and has booked before the deadline (until about one week before the start of the course - see booking period) will be considered when allocating laboratory places!

Prerequisite for the booking of CHE 211 is the successful completion of CHE 112; in case you completed CHE 173 (and need CHE 211 for the teaching diploma with 2nd subject chemistry), please contact the responsible lecturer

Usually one laboratory afternoon per week, at least one more day should be scheduled for evaluation and report.

Learning Outcome:

- In-depth understanding of physico-chemical concepts through practical application
- Professional use and understanding of the functioning of scientific instruments (absorption, fluorescence, NMR, refraction, microscopy, etc).
- Presentation and description of physical-chemical measurement setups
- Installation and use of professional software for data analysis and graphical representation of results
- Systematic error analysis and error propagation
- Writing laboratory reports in physical chemistry

Languages of Instruction:

german/english

Course Materials:

Instructions of the experiments

Merkmale:

Responsible instructor:

Peter Hamm
Stefan Seeger
Jan Helbing

Requirements:

Prerequisites:

Successful completion of the basic laboratory course in Chemistry (CHE 111 and CHE 112); attendance of CHE 207 at the same time
(If you can't attend CHE 207 in the same semester, please, contact the responsible lecturer of CHE 211 as soon as possible!)

Prerequisite for the booking of CHE 211 is the successful completion of CHE 112; in case you completed CHE 173 (and need CHE 211 for the teaching diploma with 2nd subject chemistry), please contact the responsible lecturer

Prior Knowledge:

Successful completion of CHE 101 and CHE 102 or equivalent knowledge. If

required fundamental knowledge is missing, the responsible lecturer is allowed to exclude the respective student from the lab course.

Assessment: Presence, execution and documentation of all experiments as well as achieving the performance goals according to the instructions.
All assessments have to be completed and handed in by the start of the spring semester!

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Su 06.09.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Su 11.10.2026 24:00

Module CHE 205 Physical Chemistry I: Thermodynamics

07SMCHE205 / Lecture with Practical Exercises

Description:

General description:

General Thermodynamics, chemical equilibrium, dynamics and mechanisms of chemical reactions:

A) 1st, 2nd, 3rd law of thermodynamics:

- empirical temperature, inner energy, entropy, irreversible processes and thermic equilibrium
- models and standard states: ideal gas, ideal solutions and mixtures - activity - thermodynamic standard values.
- Thermodynamics of chemical reactions: chemical potential, pressure and temperature dependency - phase equilibrium.

B) Statistical Thermodynamics:

distributions and statistics, Boltzmann relation for the entropy, distribution functions, statistical representation of function of state

C) Kinetics:

Reactions near equilibrium, subsequent reactions, approximation of quasi-steady state, diffusion-limited reactions, explosions.

ECTS: 5

Learning Outcome:

Understanding and applying the content covered

Languages of Instruction:

german (exercises might be in english)

Merkmale:

Responsible instructor: Stefan Seeger

Requirements:

Assessment:

Successful completion of the exercises is an admission requirement for the module examination.

Written module examination after the lecture period

Repetition of the exam in fall prior to the beginning of the new year of studies

The current exam schedule can be found under: <https://www.chem.uzh.ch/de/Studium/exams/hs.html>

and for the repetition exams under: <https://www.chem.uzh.ch/de/Studium/exams/rep.html>

Module CHE 304 Organic Chemistry III: Voyage into the Physical Realm

07SMCHE304 / Lecture with Practical Exercises

Description:

General description:

In this course, we will discuss the quantitative relationships between the electronic structure of organic molecules and their reactions and interactions. The main topics of the course are:

1. Molecular orbitals;
2. Acid-base chemistry and writing reasonable reaction mechanism;
3. Radicals and carbenes;
4. Photochemistry and energy transfer;
5. Electron transfer and photoredox catalysis;
6. Introduction to pericyclic reactions;
7. Cycloadditions and electrocyclizations;
8. Sigmatropic rearrangements;
9. Group transfer and cheletropic reactions;
10. Reactivity and kinetics;
11. Transition-state theory and postulates of kinetic analysis;
12. Elucidation of reaction mechanisms through kinetics.

ECTS: 4

Notes:

A mid-term exam will take place on Oct. 26th during lecture hours.

All participants are strongly encouraged to attend the sessions in person (no recording of the lecture is available). Lectures and exercises are mixed within sessions. A detailed explanation of the organization of the course and evaluation methodology will be presented in the first session of the semester

Learning Outcome:

The goal of this course is that participants will acquire the following competences:

- ability to visualize the electronic structure of organic molecules in terms of their molecular orbitals.
- draw plausible reaction mechanisms.
- evaluate the relative energies of reactants, products and intermediates.
- propose stable conformations.
- draw molecules in three dimensions.
- estimate the acidity and basicity, as well as the electrophilicity and basicity of functional groups.
- design experiments to determine the mechanism of a reaction using transition state theory.
- predict the product of a pericyclic reaction under given experimental conditions.
- propose conditions to control the outcome of a pericyclic reaction.
- explain the mechanism of a pericyclic reactions given reactants and products.
- draw a Jablonski diagram for simple photochemical reactions.
- propose mechanisms for redox reactions catalyzed by light.

Languages of Instruction:

English

Course Materials:

Eric V. Anslyn, Dennis A. Dougherty Modern Physical Organic Chemistry
University Science Books ISBN-13: 978-1891389313
Electronic materials, such as videos, tutorials, and other links will be provided
every week through OLAT.

Merkmale:

Responsible instructor: Pablo Rivera Fuentes

Requirements:

Prior Knowledge: Successful completion of CHE 204

Assessment: Entrance requirement for the final exam is participation in at least 6 out of 8 quizzes in OLAT.
A mid-term exam will take place. The grade of the mid-term exam will count 30% towards the final grade.

Written module examination after the lecture period

Repetition of the exam in fall prior to the beginning of the new year of studies

The current exam schedule can be found under: <https://www.chem.uzh.ch/de/Studium/exams/hs.html>

and for the repetition exams under: <https://www.chem.uzh.ch/de/Studium/exams/rep.html>

Module CHE 303 Inorganic Chemistry III: Synthesis and Reactivity of Elements from across the Periodic Table 07SMCHE303 / Lecture with Practical Exercises

Description:

General description:

This advanced inorganic chemistry course will build on the fundamental and practical knowledge acquired from the first and second years courses. Topics covered will include aspects of reactivity and applications in synthesis from the transition metal d-block and f-block elements.

Subtopics include:

- Inorganic reaction mechanisms (including substitutions, metal and ligand centred reactivity, electron transfer (redox) processes and photochemical reactivity of transition metal complexes)
- Applications of transition metal complexes in chemical catalysis
- Extended d-block chemistry with a focus on coordination chemistry of Werner-type complexes
- Organometallic chemistry
- Lanthanide and Actinide (f-block) chemistry

ECTS: 4

Learning Outcome:

Understanding and applying the content covered

Languages of Instruction:

english

Module PHY 113 Mechanical Workshop I

07SMPHY113 / Block Course

Description:

General description:

Der Werkstattkurs vermittelt grundlegende Kenntnisse und praktische Fertigkeiten im Umgang mit konventionellen Fertigungsmaschinen. Die Teilnehmenden werden in die sichere Bedienung von manuellen Dreh-, Fräs- und Bohrmaschinen eingeführt und lernen die wichtigsten Sicherheitsvorschriften sowie Methoden zur Gefahrenerkennung im Werkstattbetrieb kennen.

Im praktischen Teil werden einfache spanabhebende Bearbeitungsverfahren durchgeführt, um erste Erfahrungen bei der Herstellung und Bearbeitung von Werkstücken zu sammeln. Darüber hinaus erhalten die Teilnehmenden eine Einführung in die additive Fertigung (3D-Druck) und deren Anwendungsbereiche in Entwicklung und Produktion.

Ergänzend vermittelt der Kurs Grundlagen der Messtechnik zur Kontrolle und Bewertung von Werkstücken. Eine Übersicht über gängige CAD-Systeme (Computer-Aided Design) rundet den Kurs ab und gibt Einblicke in die digitale Konstruktion und moderne Fertigungsprozesse.

ECTS: 1

Notes:

<https://werkstatt.physik.uzh.ch/ausbildung/articles/praktikum.html>

Der Praktische Werkstattkurs I findet in zwei Blöcken mit jeweils 3 Gruppen (Vormittag, Mittag, Nachmittag) statt. Die Einteilung wird im November durch Dr. M. Hengsberger erfolgen. Gruppen (je Kapazität 5!)

Learning Outcome:

Nach Abschluss des Werkstattkurses können die Teilnehmenden:

- Sicherheitsvorschriften im Werkstattbetrieb anwenden und Gefahren erkennen.
- Manuelle Dreh-, Fräs- und Bohrmaschinen sicher bedienen.
- Einfache Werkstücke mit spanenden Fertigungsverfahren herstellen.
- Grundlegende Messmittel zur Werkstückprüfung einsetzen.
- Die Grundlagen und Anwendungsbereiche des 3D-Drucks erläutern.
- Die Rolle von CAD-Systemen in Konstruktion und Fertigung beschreiben.
- Vorgehensweise Auslösung eines Werkstattauftrags ist bekannt

Module MAT 182 Analysis for Natural Sciences

07SMMAT182 / Lecture with Practical Exercises

Description:

General description:

Es wird das für die Anwendungen in den Naturwissenschaften notwendige mathematische Rüstzeug aus der Analysis vermittelt. Im einzelnen werden folgende Themen behandelt:

1. Vektoren
2. Differentialrechnung
3. Integralrechnung
4. Differentialgleichungen
5. Anwendungen
6. Differentialrechnung von Funktionen von mehreren Variablen

Die Übungen bilden einen wichtigen Teil der Lehrveranstaltung und sollen mit verschiedenen Anwendungen des Vorlesungsstoffes vertraut machen.

ECTS: 6

Notes:

<http://www.math.uzh.ch/mat182.1>

Aus administrativen Gründen müssen Sie sich über das Vorlesungsverzeichnis für eine Übung einschreiben, die Wahl kann zum Vorlesungsbeginn noch angepasst werden. Genauere Informationen erhalten Sie in der ersten Vorlesung.

Learning Outcome:

Sicheres Beherrschen der grundlegenden Techniken der Analysis, welche für die Anwendung in den Naturwissenschaften wichtig sind.

Target Groups:

Studierende der Biologie, Biomedizin, der Geographie und der Erdwissenschaften

Course Materials:

1. Lehrbuch: Einführung in die mathematische Behandlung der Naturwissenschaften I: Analysis, 4. Auflage, Luchsinger/Storrer, Birkhäuser Skripten, Birkhäuser Verlag Basel. ISBN 978-3-030-40157-3.
2. Vorlesungsfolien auf dem Internet.

Merkmale:

Responsible instructor:

Reinhard Furrer

Requirements:

Prior Knowledge:

Mathematikkenntnisse der Mittelschule

Assessment:

60 % der Punkte aller Übungen und Bestehen der Modulprüfung.

Datum, Ort und Zeit der Modulprüfung wird unter <https://www.mnf.uzh.ch> veröffentlicht.

Grading Scale:

1-6, Half Grades Given

Repeatability: Can be repeated once

Module PHY 231 Data Analysis

07SMPHY231 / Lecture with Practical Exercises

Description:

General description:

This course provides the basics of data analysis for the physical sciences, focussing on statistics. The course covers the following topics:

- * Bayesian and frequentist probability
- * Statistical and systematic uncertainties
- * Probability distribution functions (PDFs)
- * Correlation and covariance
- * Error propagation
- * Hypothesis testing
- * Least squares fitting
- * Maximum likelihood method
- * Confidence and credibility

The course is structured with weekly 45 min lectures alongside bi-weekly exercises that are to be submitted via OLAT.

ECTS: 3

Module PHY 391 Proseminar Theoretical Physics

07SMPHY391 / Proseminar

Description:

General description:

Selected topics from Theoretical Physics

The proseminar will cover a wide range of topics from various fields in Theoretical Physics, such as Cosmology, Particle Physics, Statistical and Condensed Matter Physics, as well as Quantum Physics. Possible talks are

1. General Relativity
2. The Big Bang Theory
3. Inflation
4. Black hole
5. The cosmic microwave background (CMB)
6. Dark matter
7. Gravitational waves
8. Lorentz and Poincare groups
9. Symmetries and conservation laws (Noether theorem)
10. Gauge symmetries in Quantum Mechanics and Particle Physics
11. Discrete symmetries and their violation, Baryon asymmetry
12. Spontaneous Symmetry Breaking (Goldstone theorem and Higgs mechanism)
13. Higgs mechanism in Particle Physics
14. Higgs mechanism in superconductors (Meissner effect)
15. The static quark model
16. Quantum Chromodynamics (QCD)
17. Neutrinos
18. Ising model and phase transitions
19. Renormalisation group
20. Integer Quantum Hall effect
21. Random systems and Markov processes
22. Chaos theory
23. Quantum information theory
24. Quantum teleportation
25. Quantum cryptography
26. Path integrals

The proseminar will be held in English. The topics will be presented and assigned on Monday 14.09.2026.

Module PHY 401 Physics of Condensed Matter

07SMPHY401 / Lecture with Practical Exercises

Description:

General description:

This module gives an in-depth presentation of the most important physical phenomena that are observed in condensed matter (mostly in the solid state), and provides a flavour of how they can be described. Four hours of lecture per week are supplemented by two extra weekly hours for discussing problem sets and, towards the end of the semester, for short talks about selected seminal research papers, to be given by the students. A 30-minute oral exam concludes this module.

ECTS: 10

Learning Outcome:

The contents of the Solid State Physics lecture will be consolidated and expanded to cover further modern topics of condensed matter physics, and the students will be guided towards the recent literature of this research field.

In the end the students should have attained a solid understanding of the following phenomena and notions, including their description within the most basic models:

- Heat Capacity, Drude, Sommerfeld, Reciprocal Lattice
- Phase Transitions, Landau Theory, Critical Exponents, (recap statistical physics)
- Magnetism
- Phonons and quasiparticles
- Electrons, periodic potentials and Fermi liquid
- Electronic instabilities and superconductivity
- Applications: Quantum Computing
- Topical Condensed Matter Research from Guest Lectures

The material will first be discussed in textbook style and then further illustrated with the help of recent research articles. The students will contribute to the latter by preparing short talks on seminal research papers. Problem sets for each topic supplement the module.

Target Groups:

Master students in physics with focus on Condensed Matter Physics

Languages of Instruction:

English

Course Materials:

Important notions and concepts will be elaborated at the blackboard.

Slides will also be presented and be made available on the internet.

Further recommended reading:

- The Oxford Solid State Basics (Steven H. Simon)
- Basic Aspects of the Quantum Theory of Solids (Daniel. J. Khomskii)
- Optional: Introduction to Solid State Physics, Charles Kittel

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Fabian Natterer
Marc Janoschek

Module GEO 421 Critical Development Studies

07SMGEO421 / Lecture with Practical Exercises

Description:

General description:

This course engages with different debates and perspectives in the study of development: What does development mean for different actors, and how can we capture it? How do people in "poorer" countries maintain their livelihoods under difficult conditions? What is done to help improve people's lives? How is humanitarian aid understood and practiced? All these questions relate to broader concerns of "development". Development, however, is a highly contested term. It used to (and sometimes still does) describe the modernisation of societies according to the model of the "West" that was assumed to be more and better developed than countries of the so-called "Global South". Nowadays, the term development and its normative connotations are discussed more critically. Employing a critical approach, this course centres around three dimensions of development: (i) development as a discourse (normative dimension), (ii) development as change and transformation (analytical dimension), and (iii) development as purposive intervention (practical dimension). The course is run as a weekly seminar, giving students the opportunity to read and discuss key texts in development studies with a range of experts from our department. Students will gain an overview of the topical breadth of the subject and learn how to think and approach development critically. Inspired by social theories, they will learn to raise questions and to conduct analyses of development processes. Further, they will develop sensitivity towards different social realities and moralities, and be able to reflect on their own positionality in studying development.

ECTS: 6

Notes:

The lectures will take place on site. The exact schedule will be announced at the beginning of the lecture period by the person responsible for the module.

The number of participants is limited to 30. If interested students are unable to book the module due to overbooking, please contact Asebe

Regassa Debelo (asebe.debelo@geo.uzh.ch). You will then be added to a waiting list. It is important that you attend the first lecture. Students who are absent from the first lecture (without a valid excuse) will be replaced by students from the waiting list who are present.

The Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)) are a collection of 17 global goals that interact with one another and are designed to serve as a blueprint for achieving a better, more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 1; 2; 5; 8; 10 & 16

Learning Outcome:

- Students develop a critical understanding of the core terms, concepts, and theories of geographical development studies, and are aware of the problems, contradictions and paradoxes of development research, policy and practice.
- Students can apply current theories and concepts of geographical development research.
- Students learn how to make short and concise presentations.
- Students can summarise and critically discuss information from scientific texts.
- Students write a literature review of a topical theme in development studies.

Target Groups:

MSc students in Geography or related disciplines (e.g. anthropology, political science, religious studies, sociology, area studies)

Languages of Instruction:

English

Course Materials:

Provided via OLAT

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Asebe Regassa Debelo

Requirements:

Prerequisites:

none

Prior Knowledge:

none

Assessment:

The module grade is based on a portfolio consisting of four components, each weighted at 25% of the overall grade and graded on a scale of 1–6:

1. Argumentative Essay (25%) – Individual assignment.
2. Analytical Essay (25%) – Individual assignment.
3. Creative Project (25%) – Individual assignment.
4. Group Presentation (25%) – Based on mini-research conducted by the team.

Individual component grades may fall below 4.0; however, the combined overall grade must be 4.0 or above to pass the module. There are no resit opportunities for individual components. If the module is failed, it must be repeated as a whole in the following year.

Module GEO 432 Gender, Work and Space

07SMGEO432 / Lecture with Practical Exercises

Description:

General description:

The seminar course GEO432.1 "Gender, Work and Space" invites students to engage in a critical debate around the inequalities encountered in today's cities. The course draws on a rich body of literature which includes feminist geography, deconstructing established binaries and categories, and Black and anti-racist scholarship. It discusses critiques of neoliberalism, capitalism and low-wage labour. Furthermore, it includes a guest lecture at the end of the semester.

Transferring the theoretical debates to practice, we have two excursions, one at the beginning of the semester. And a second one is part of the exercise course GEO432.2. During this exercise course, students work in teams of three and develop an excursion module in which the discussed phenomena can be experienced in the city of Zurich. The individual modules are then assembled for a two-day excursion, which takes place in December.

ECTS: 6

Notes:

Students of Gender Studies can credit this module as part of "Geschlecht als Erkenntnis- und Forschungsperspektive". (graded, 6 ECTS).

The seminar takes place in room Y25-K22.

The Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 5 & 8

Learning Outcome:

Module participants acquire an in-depth understanding of gender relations, inequalities, and how they play out and intersect in different contexts in the city. Participants are acquainted with a number of theoretical approaches to gender, work and inequality as key fields of knowledge in geography. Participants know the didactical tools to develop and lead a high-quality excursion.

Target Groups:

Master "Humangeographie" and "Allgemeine Geographie", Master "Gender Studies", Master "Global Futures: Development, Sustainability, Social Justice"

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Karin Schwiter

Requirements:

Prerequisites:

BSc

Assessment:

Half of the mark (1/2) is awarded for the essay on a topic of the seminar, which is written in an exam setting in the classroom (in 60 minutes). The other half of the mark evaluates the concept (1/4) and the execution (1/4) of the excursion module.

The sub-marks can be below 4.0, but the combined total grade must be above 4.0 to pass the module.

It is not possible to repeat individual parts of the module. In case of a fail, the module can be repeated as a whole in the following year.

Module BIO 321 Modern Microscopy in Life Science Research

07SMBIO321 / Block Course

Description:

General description:

Microscopy is a major tool in life science research. Recent advances in microscopy and image analysis approaches allow investigating biological specimens at unprecedented scales. Beyond introductory theory, the major objective of this course is to apply modern microscopy and quantitative image analysis approaches to address a scientific question. Practical work will be done in small, individually guided teams that will apply state-of-the-art imaging methods, such as two-photon, light-sheet, super-resolution, and electron microscopy in a host laboratory.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE:

<https://www.mybioportal.uzh.ch>

Learning Outcome:

On completion of the module, the students should be able to

- recognize strengths and limitations of different microscopy approaches
- identify the optimal microscopy approach for a given imaging task
- operate a modern microscope with digital data acquisition
- perform basic quantitative image analyses

Key skills On completion of the module, the students should be able to

- compose a scientific presentation of the data obtained during the lab rotation
- transfer knowledge to fellow students

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Martin Müller

Requirements:

Prerequisites:

Basic studies in Biology or Biomedicine completed.

Assessment:

Online exam on microscopy theory (50%), performance during experimental project (30%), and oral presentation (20%). Each of the parts have to be passed independently (grade 4.0).

(English)

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module BIO 322 Cell Biology of Viral Infections

07SMBIO322 / Block Course

Description:

General description:

Viruses are at the interface of living and non-living matter. Outside of their hosts, they are passive carriers of genetic information with inherent capabilities to enter their hosts and rewire the genetic programme of the host cells. Viruses contain information that allows them to evade the pressure of both innate and adaptive immune systems. In their entire complexity viruses manipulate all known aspects of cell physiology. This makes them excellent tools to discover thus unknown features of cells and organisms. Exploring how viruses interact with cells offers new handles against viral disease.

In this course we will discuss and experimentally assess virus-host interactions. In particular, we will elaborate on herpes viruses, rota viruses, adeno-associated viruses and influenza viruses and compare their specific ways to interact with host cells.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE: <https://www.mybiportal.uzh.ch>

Date of oral exam: Friday 31. Oct. 2026

Learning Outcome:

On completion of the module the student should be able to

- conduct experiments with animal and human cells infected with a variety of different viral pathogens
- delineate host cell requirements for specific events during viral replication cycles
- apply quantitative molecular techniques, including infection readouts by histochemistry, GFP transgene expressions, PCR or end point cell lysis assays, and monitor cell activity and metabolism
- integrate results into preexisting cellular pathways of signal transduction, vesicular transport and nucleotide metabolism

Key Skills On completion of the module the student should be able to

- compile data to explain virus- host interactions at different stages of the viral replication cycles
- extract, compile and review scientific information from various sources and evaluate them critically in the context of viral infections
- present findings effectively and appropriately in oral presentations
- work collaboratively within small groups under the guidance of an experienced tutor

Merkmale:

Module BIO 323 Modern Genetics and Genomics

07SMBIO323 / Block Course

Description:

General description:

Genomics, Proteomics, Transcriptomics, Human Genetics, Paleogenetics, and Forensics in combination with practical exercises. As a major part of the course, the students (groups of 2-3 students) will engage in an ongoing research project in molecular life sciences at UZH or ETH. They will conduct genetic and molecular studies in model systems and analyze data using bioinformatic tools. The students will get insight into the planning of scientific projects and will learn how to summarize and present their research topic and progress in slide- and poster presentations.

ECTS: 12

Notes:

REGISTRATION FOR BLOCKCOURSES HERE:

<https://www.mybioportal.uzh.ch>

Learning Outcome:

On completion of the module the student should be able to

- Conduct genetic and molecular experiments on model organisms
- Judge and critically interpret experimental results
- Understand the principles of forensic genetics and genetic screening of diseases
- Use bioinformatic tools to identify and analyse uncharted sequences or sequence variations.
- Summarize a research topic and to present the acquired scientific data in oral presentations

Key skills

- Compile data from the literature and unpublished experiments to compose a research proposal
- Defend proposed research in oral presentations
- Conduct experiments in small groups under the guidance of an experienced tutor
- Present and discuss results of his/her project in a poster session

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Erich Brunner

Module BME 308 Human Molecular Genetics

07SMBME308 / Block Course

Description:

General description:

This practical course focuses on the molecular basis of human genetic diseases; disease-associated mutations and genetic predispositions to human disorders, biochemical and signal transduction pathways, molecular and histologic-morphologic diagnostic techniques, animal models for human diseases to study gene function and pathophysiologic mechanisms, novel therapeutic strategies including somatic gene therapy using viral vectors.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Learning Outcome:

By the end of this module, each student should be able to

- plan, conduct and interpret molecular genetic analyses to diagnose and/or treat a human (genetic) disease
- extract nucleic acids (DNA and/or RNA) from different sources (human or mouse tissue)
- carry out molecular diagnostics of human diseases by analysis of patients' DNA and/or tissue
- perform DNA amplification by polymerase chain reaction (PCR)
- perform DNA fragment analyses
- perform DNA sequence analysis by Next Generation Sequencing (NGS) as well as the Sanger technique (dideoxy chain termination method) and computer-based sequence analysis for mutation detection
- analyse proteins by Western blotting and/or immunohistochemical staining techniques

Key skills

By the end of this module, each student should be able to

- document and record experimental work and results in an informative laboratory protocol
- interpret and critically evaluate experimental data and results with respect to published work
- write a scientific paper (introduction, methods, results, discussion)
- prepare and give oral presentations in front of fellow students and supervisors

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Sean Froese

Requirements:

Prerequisites:

Basic studies completed

Assessment:

- 20 minutes English project presentation followed by public discussion
- written project summary in English in the form of a brief scientific paper
- experiments must be documented in a lab journal in English
- compulsory attendance

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

<u>Offer pattern:</u>	1 Semester (Every Fall Semester)
<u>Booking Deadline/Period:</u>	not bookable
<u>Cancellation Deadline:</u>	not cancelable

Module BIO 409 Veterinary Medicine: comparative physiology, pathophysiology and key research areas
07SMBIO409 / Block Course

Description:

General description:

Morphology and function of organ systems with large differences among species; pathophysiology of the digestive tract in zoo animals; comparative anatomy in birds and reptiles; reproduction physiology and clinical implications; experimental surgery; comparative hematology; development of vaccines; retroviral infection in animals; pathogen host interaction; infectious diseases in animals and humans; control of metabolism and pathophysiology of obesity and type 2 diabetes; registration of new drugs.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

The lecturers perform presence checks.

Learning Outcome:

By the end of the module, each student should be able to

- describe major differences in the gastrointestinal and reproductive organ systems of various domestic animal species.
- argue why selected research topics in basic, diagnostic and clinical veterinary sciences are relevant for humans and animals, and understand similarities and differences between humans and animals in this respect.
- understand the process of drug development and registration
- understand the use of animal models to study the pathophysiology of various diseases
- understand the concept of zoonotic diseases.

Key skills

By the end of the module, each student should be able to justify which veterinary disciplines should play a role in the public health sector and to understand the importance of basic and applied research specifically in veterinary medicine and more generally in life sciences.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Thomas Lutz

Requirements:

Prerequisites:

Basic studies completed.

Assessment:

- Written exam (graded): MC and essay questions, English translation (German only, if all participants are native German speakers)

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module BME 310 Research methods for studies on human health and disease

07SMBME310 / Block Course

Description:

General description:

Topics in health- and disease-related research; health and disease defined; principles of biostatistics (software package: SPSS); principles of epidemiology; types of epidemiological studies; applied epidemiology; communicable diseases and example of hospital-acquired infection; efficacy and effectiveness of health technologies; randomised clinical trial methodology; risk factors, screening programmes and disease prevention; empirical social research; economic and societal implications; health services research. Using a real dataset, students develop a research question of their own, learn to perform related statistical analyses, and present their results.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Learning Outcome:

By the end of the module the students should be able to

- distinguish the key elements of different definitions of health and disease
- explain the advantages and disadvantages of different epidemiological and clinical study designs, and of related measures of effect
- explain how epidemiological research methods contribute to the understanding and analysis of infectious disease outbreaks and epidemics
- elaborate a research hypothesis and a research plan, using a real- world epidemiological or health services research dataset and own internet searches
- apply bio-statistical principles and perform simple statistical analyses
- draw appropriate conclusions on the results of epidemiological and health services research studies

Key skills

By the end of the module the students should be able to

- prepare well-structured research abstracts and short reports
- give an effective and clear presentation of the rationale, methods and results of their own research to their fellow students

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Yuki Tomonaga

Requirements:

Prerequisites:

Basic studies completed, module 'BIO144 Data analysis in biology' (recommended)

Assessment:

Based on real datasets provided to the students, development of a research question, statistical data analysis, presentation and discussion of results (10 min. oral presentation in English language and extended abstract in English language)

- graded

Module BIO 282 Methods in Molecular Plant Biology

07SMBIO282 / Block Course

Description:

General description:

Students have the opportunity to familiarize themselves with a variety of modern techniques which are important in experimental plant biology.

These include the in vivo analysis of plant protein-protein interactions, physiological analysis of plant signal transduction processes, quantitative measurement of gene expression, as well as chromatin analysis. Lectures on the theoretical background accompany each experimental part. In addition, the student will critically assess scientific publications, and provide a written report on one of the experimental sections of the course.

ECTS: 6

Notes:

Max. Teilnehmerzahl: 12

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybiportal.uzh.ch>

Learning Outcome:

By the end of this module, each student should be able to propose an appropriate experimental strategy for biological problems such as protein-DNA interactions, protein-protein interactions, enzymatic activity measurements, gene expression, analysis of primary metabolite content, and other genetic experiments, as well as discussing the suitability of different organisms for the proposed experiments.

Key skills

The student will acquire skills regarding reviewing and presenting relevant scientific publications, identifying and compiling their conclusions, especially in respect to their specific methods.

Target Groups:

Das Modul ist Teil folgender Master-Spezialisierung (bei Modulen des Fachstudiums):

-Pflanzenwissenschaften / Plant Sciences.

Module BIO 284 Systemic Microbiology

07SMBIO284 / Block Course

Description:

General description:

Many bacteria have a "Dr. Jekyll and Mister Hide" personality: While they may be beneficial for biotechnological applications, e.g. as biocontrol organisms or for the degradation of pollutants in the environment, they may also cause severe infections in humans. Using various molecular methods light will be shed on the various facets of bacterial behaviour within this practical course.

ECTS: 6

Notes:

Begleitend zum Blockkurs BIO 284 wird der Besuch der zweistündigen Vorlesung BIO 297 "Social Behaviour of Bacteria" dringend empfohlen.
maximale Teilnehmerzahl: 20

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybiportal.uzh.ch>

Learning Outcome:

By the end of this module each student should be able to

- conduct molecular and microbiological experiments with different bacterial species.
- apply a wide variety of molecular and techniques, including proteomics, reporter gene technology, in situ hybridization, cloning, and various enzymatic bioassays.
- delineate the importance of cell-to-cell communication and biofilm formation for the lifestyle of bacteria

Key skills

By the end of this module each student should be able to

- plan and conduct experimental procedures and use laboratory equipment competently and safely.
- review and compile recent advances in microbiology and evaluate them critically.
- collect, record and analyze experimental data and present them effectively.

Target Groups:

Das Modul ist Teil folgender Master-Spezialisierung (bei Modulen des Fachstudiums):

- Zell- und Molekularbiologie/Cell- & Mol. Biol.
- Genetik / Genetics
- Mikrobiologie / Microbiology
- Pflanzenwissenschaften / Plant Sciences
- Oekologie / Ecology
- Systematik & Evolution / Systematics & Evol.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Leo Eberl

Requirements:

Prerequisites:

abgeschlossenes Grundstudium Biologie

Assessment: schriftlicher oder mündlicher Schlusstest, Vortrag

- benotet
- während der ganzen Dauer des Moduls, mit Schlusstest
- Mind. Note 4 in den Tests (wenn mehrere: Durchschnitt)
- Abgabe von Berichten; mind. 70% davon genügend

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Module BIO 285 Genetic and Epigenetic Control of Plant Development

07SMBIO285 / Block Course

Description:

General description:

In this course we introduce concepts of developmental biology at the genetic and molecular level and apply general methods for their analysis. The lecture focuses on plant reproduction and epigenetic processes and investigates how these affect development. In the laboratory we use Arabidopsis as a model system concentrating on four aspects: the identification and isolation of genes, the investigation of genetic interactions and hierarchies, and the characterization of gene expression and gene function.

ECTS: 6

Notes:

maximale Teilnehmerzahl: 16

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Learning Outcome:

Subject-specific skills

Upon successful completion of this module the student is able to

- describe the general concepts and molecular mechanisms underlying selected developmental processes, particularly those involved in plant reproduction.
- draw conclusions about developmental processes based on experimental observations and propose additional experiments aimed at testing these conclusions
- apply methods for the identification and molecular isolation of genes
- the mechanisms of epigenetic gene regulation and name the key factors involved
- apply methods to characterize gene expression and function
- explain the concept of genetic interactions and to transfer it to the analysis of other, general genetic questions
- apply statistical methods for the validation of experimental genetic data

Key skills

Upon successful completion of this module the student is able to

- apply the most important molecular methods for the analysis of DNA, RNA, and proteins
- apply methods for the genetic analysis of processes in any organism
- concisely summarize and effectively present her/his results in front of an audience

Target Groups:

Das Modul ist Teil folgender Master-Spezialisierung (bei Modulen des Fachstudiums):

- Zell- und Molekularbiologie
- Entwicklungsbiologie
- Genetik
- Pflanzenwissenschaften

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Ueli Grossniklaus

Requirements:

Prerequisites:

abgeschlossenes Grundstudium Biologie

Assessment:

schriftliche Berichte und Protokolle, Vortrag, Schlusstest.

- benotet (wird für Schlussnoten-Durchschnitt berücksichtigt)
- während der ganzen Dauer des Moduls, mit Schlusstest
- Mindestens Note 4 in den Tests (wenn mehrere: Durchschnitt)
- Ungenügende Berichte und Protokolle müssen revidiert, ungenügende Vorträge wiederholt werden.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

not bookable

Cancellation Deadline:

not cancelable

Organisation:

Department of Plant and Microbial Biology

Offered in:

Module BIO 286 Plant Sensing

07SMBIO286 / Block Course

Description:

General description:

Plants are constantly exposed to a variety of external stimuli - being either autocrine or paracrine signals controlling growth and development, or signals that directly originate from the environment.

Plant use both intracellular and cell-surface receptors (many of which being receptor kinases) to sense these signals, which allow them to transduce these inputs into a plethora of adaptive cellular responses.

During this block course, students will take part in ongoing projects within the group, dealing specifically with measuring different signalling outputs using diverse qualitative and quantitative bioassays in a range of native or heterologous experimental systems. In addition, general techniques to analyse protein expression, protein localization, as well as enzymatic activity will be introduced. The block course will be accompanied by theoretical lectures on the methods used, as well as an overview of sensing mechanisms used by plants to develop, grow, and adapt to their ever-changing environment.

ECTS: 6

Notes:

Maximale Teilnehmerzahl: 12

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybiportal.uzh.ch>

Learning Outcome:

At the end of this module students should be able to

- describe general sensing mechanisms used by plant cells
- choose appropriate experimental systems to study plant signaling
- perform bioassays relevant to the study of plant signaling
- plan and execute experiments in a real lab context
- analyze protein expression, protein localization and enzymatic activity

Key skills

At the end of this module students should be able to

- present their data effectively and appropriately in oral or written presentations
- summarize and critically evaluate research papers dealing with plant signaling

Module BIO 271 Illustrations in Natural History

07SMBIO271 / Lecture with Practical Exercises

Description:

General description:

After a general introduction to scientific illustrations, various drawing methods are explained and practiced. These methods are: Line drawings, stippled drawings, hatching, shading using pencils and ink pens.

The objects we draw are fossils and (parts of) living organisms. The last part of the class is dedicated to alter a pencil drawing digitally using GIMP, Photopea or PhotoShop. For the latter part, students are asked to bring their own laptops.

ECTS: 1

Learning Outcome:

At the end of the module, all participants should be capable

- to apply the above-mentioned drawing techniques,
- to use software like GIMP, Photopea and PhotoShop and
- to produce illustrations to communicate scientific content.

Merkmale:

Target Group: Suitable for English Speakers

Module Literaturseminar für Doktoranden und Assistenten mit Themen aus der klinischen Grundlagenforschung
04SMCHE0M009 / Seminar

Description:

ECTS: 0

Learning Outcome:

Dieses Literaturseminar für Doktoranden und Assistenten mit Themen aus der klinischen Grundlagenforschung findet wöchentlich während dem Semester statt (nach Programmankündigung).

Diese Veranstaltung richtet sich an Doktorierende und Assistierende sowie an Studierende.

Ziel ist es, mit wöchentlich wechselnden Referenten, eine Vielfalt an Interessensgebieten abzudecken, mit einem breiten Literatur-Spektrum aus der klinischen Grundlagenforschung.

Module BIO 279 Paleontological Excursions (on weekends)

07SMBIO279 / Field Trip

Description:

General description:

Usually one to three day excursions (possibly including museum visits) to deepen regional geological and evolutionary knowledge and to gain practical paleontological experience.

ECTS: 1

Notes:

The course will only take place, if specific excursions are planned for the semester: <https://www.pim.uzh.ch/studium/exkursionen/>

Only in case a planned excursion is advertised, signing up for BIO 279 will be possible via the secretary office of the Paleontological Institute, UZH main building. Limited number of participants. Consideration after receipt of the registration. Please note the respective registration deadline. Further details can be found in the respective advertisements on the above-mentioned website.

Module BIO 333 Comparative Physiology and Pharmacology of Sleep

07SMBIO333 / Course

Description:

General description:

A better understanding of mechanisms and function(s) of sleep result from physiological and pharmacological findings, including behavior and genetics in a broad diversity of creatures (from humans to drosophila) and the application of new techniques. Basic principles and new developments will be discussed.

ECTS: 1

Learning Outcome:

At the end of this module students should be capable of:

- explaining the essence of the sleep process and of sleep regulation regarding its physiology, behavior, pharmacology and genetics
- relating the manifestations of sleep between different species (from drosophila to humans)
- describing the most important methods in use in sleep research
- providing an overview of theories about the function of sleep

Module BIO 706 Group Seminar Current Research

07SMBIO706 / Seminar

Description:

General description:

Group seminar: Current research

ECTS: 1

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Cyril Zipfel

Requirements:

Assessment:

Für Masterstudenten resp. Doktoranden integraler Teil der Master- resp. Doktorarbeit. Einstündige Seminarien und Kolloquien werden in der Regel mit 1 KP honoriert, wenn ein Vortrag oder eine äquivalente Leistung nachgewiesen wird. Gilt nur für Doktoranden. Für Masterstudenten ist das Gruppenseminar Bestandteil der Masterarbeit. Die Festlegung der Anforderungen erfolgt in Absprache mit dem zuständigen Dozenten.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Semester)

Booking Deadline/Period:

not bookable

Cancellation Deadline:

not cancelable

Module BIO 711 Advanced Seminar in Microbiology

07SMBIO711 / Colloquium

Description:

General description:

Advanced Seminar in Microbiology

ECTS: 1

Learning Outcome:

Key skills

By the end of this module each student should be able to

- interpret and critically analyze experimental data and present the results effectively
- recognize the various fields in microbiology and discuss and evaluate results presented by other students.
- review and compile recent scientific literature and evaluate it critically.

Merkmale:

Module BIO 611 Colloquium for ongoing advances in infectious cell biology

07SMBIO611 / Seminar

Description:

General description:

Discussion and analyses of ongoing research projects and concepts in infectious cell biology and virology. Is held every week throughout the year.

ECTS: 0

Learning Outcome:

Presentation and analyses of research projects. Critical evaluation of results and methodologies. Development of innovative and practicable solutions for questions in infectious disease biology.

Merkmale:

Module BIO 260 Molecular Biology Course for Biology and Medicine

07SMBIO260 / Block Course

Description:

General description:

In this three weeks course we offer an introduction into common molecular biology methods. These include cloning, plasmid preparations, DNA sequence analysis, quantitative RT-PCR, protein gels, and Western blotting.

We will also introduce genome editing using the CRISPR-Cas9 system, gene-inactivation by RNAi and the auxin-inducible degradation system, gene deletion, tagging and generation analysis in yeast.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Learning Outcome:

At the end of the module students should be able to

- execute standard methods in molecular biology independently, based on written protocols.
- recall the theoretical background of standard methods in molecular biology.

Key skills At the end of the module students should be able to

- design new experiments in the field of molecular biology
- make predictions of the expected experimental results.
- document the module and/or the results of an experiment
- evaluate and interpret their own experimental data and check for possible errors.
- compile and compare their own experimental results and data from the literature, and present the results obtained in plenum.

Target Groups:

This course is designed for Bachelors students, but may be suitable for Master and early PhD.

Bring own lab coat.

Languages of Instruction:

Englisch

Course Materials:

Module BCH 203 Practical course in Biochemistry I

07SMBCH203 / Praktikum

Description:

General description:

Different booking rules and conditions apply to this module. Kindly pay attention to the notes

In this laboratory course, students are first introduced to the fundamental principles of working in a biochemical laboratory. The course then moves on to the quantitative topics covered in lecture BCH201, which are revisited and explored experimentally:

- Fundamental principles and quantification of biomolecules
- Buffer solutions
- Hemoglobin and oxygen
- Enzymology (thermodynamic and kinetic approaches)

ECTS: 5

Notes:

Booking period: from Wed 12.08.2026, 10:00 to Sun 30.08.2026, 24:00

Booking requirements:

For Bachelor's students enrolled in the study programs in Biochemistry or Chemistry, successful completion of the modules CHE101, CHE102, CHE111 and CHE112 (or equivalent modules) and booking of modules BCH201 is required. If one of the four chemistry modules has not been completed, students must have obtained at least 52 ECTS credits from programs offered by the Faculty of Science.

If repetition exams are still pending, we recommend booking module BCH203, as compliance with the requirements will only be verified after these examinations have been completed. Please note that late registrations cannot be accepted.

For students enrolled in the Minor program in Biochemistry: in accordance with the provisions of the study regulations.

Learning Outcome:

By the end of this module, students should be able to:

- explain the principles underlying each method taught at the chemical and biochemical level
- evaluate the significance and scope of application of each method taught
- define simple positive and negative controls for a standard laboratory technique
- meaningfully relate laboratory observations to mathematical, chemical, and physical principles
- correctly operate biochemical laboratory equipment

Target Groups:

Students enrolled in the Mono- or Major- studyprograms in Chemistry as well as students enrolled in the Mono program in Biochemistry

Languages of Instruction:

German/English

Course Materials: Introduction, Course Manual, Group Allocation, and Course Schedule <https://lms.uzh.ch/url/RepositoryEntry/16579362865/CourseNode/99473176861451>

Merkmale:

Responsible instructor: Cristina Manatschal

Requirements:

Prerequisites: For Bachelor's students in Biochemistry or Chemistry programs: successful completion of the modules CHE101, CHE102, CHE111 and CHE112 (or equivalent modules) and enrolment in the module BCH201 are required. If any of the four chemistry modules has not been completed, students must have obtained at least 52 ECTS credits from programs offered by the Faculty of Science.

For students enrolled in the Minor program in Biochemistry: in accordance with the provisions of the study regulations.

Assessment: ECTS credits are awarded provided that all learning activities required within the laboratory course have been properly prepared, completed, and successfully concluded. This includes passing the final assessment.

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Module BIO 267 Paleobiology and Evolution of Vertebrates

07SMBIO267 / Block Course

Description:

General description:

The vertebrate fossil record encompasses roughly 520 million years, with the first representatives appearing during the Cambrian explosion. In this long time period, they have produced an enormous variety of forms documented mostly by bones and teeth, but also by traces and soft tissue preservation. Course content: Body plans of important chordate groups; systematic history of vertebrates; transitional forms; comparative anatomy; key features. Aspects of functional and constructional morphology, biomechanics, locomotion, reproduction and nutritional aspects will be discussed and enriched by exercises on fossil and extant material.

ECTS: 6

Notes:

DIE ANMELDUNG FÜR DIE BLOCKKURSE ERFOLGT UNTER <https://www.mybiportal.uzh.ch>

Learning Outcome:

At the end of the module, the course participants can

- demonstrate the diversity of fossil and extant vertebrates
- analyze vertebrate fossils
- reconstruct the biology of extinct vertebrates

Comprehensive competences

At the end of the module, participants are able to

- take scientific information from the literature and synthesize it
- present scientific information in form of public presentation

Module BIO 112 Cell Biology

07SMBIO112 / Lecture with Practical Exercises

Description:

General description:

Wir zeigen, wie tierische und pflanzliche Zellen funktionell aufgebaut sind, und diskutieren, wie unterschiedliche mechanische und biochemische Eigenschaften zustande kommen. Die vermittelten Kenntnisse sind eine wichtige Grundlage für weiterführende Vorlesungen der Biologie. Spezielle Beschreibung

Die Zelle ist die funktionelle Einheit des Lebens und eine sehr grosse Anzahl Organismen besteht lediglich aus einer einzelnen Zelle. In mehrzelligen Organismen formen viele individuelle Zellen mit spezialisierter Funktion eine Lebensgemeinschaft wobei verschiedene Zelltypen in Geweben organisiert sind. Die Grundzusammensetzung und Funktionsweise der Zellen ist jedoch universell. Viele Details darüber sind bereits bekannt, und gewisse Prozesse können naturgetreu modelliert werden. Andere wichtige Eigenschaften lebender Materie sind jedoch noch nicht bekannt. Ziel dieser Vorlesung ist es, das Verständnis für grundlegende und spezialisierte Funktionen der Zellen zu entwickeln und entsprechende Fragestellungen über die Funktionsweise zellulärer Prozesse zu stellen.

Wir befassen uns mit folgenden Fragestellungen:

1. Wie sind tierische und pflanzliche Zellen organisiert?
2. Wie wachsen und teilen sich die Zellen, und wie erhalten sie ihre Homeostase?
3. Welches sind die funktionellen Einheiten dieser Zellen, und wie sind sie miteinander vernetzt?
4. Wie kommunizieren Zellen mit der Aussenwelt?
5. Wie spezialisieren sich Zellen?

ECTS: 3

Notes:

Wichtig: Für alle administrativen Angelegenheiten wenden sie sich bitte an die Studienkoordination: studienkoordination@biol.uzh.ch

Learning Outcome:

Am Ende dieses Moduls sollten die Studierenden

- die funktionellen Prinzipien und die Terminologie verschiedener eukaryotischer Zellen und deren Organellen beschreiben und interpretieren können.
- erklären können, warum alles, was für Leben notwendig ist, eine prägende und selektionierende Vergangenheit auf unserem Planeten gehabt hat und im Lichte der Evolution betrachtet wird.

Überfachliche Kompetenz

Die Studierenden können funktionelle Daten aus Experimenten mit eukaryotischen Zellen mittels schematischer Darstellungen analysieren und interpretieren.

Languages of Instruction:

Der Kurs wird auf Deutsch unterrichtet, gegebenenfalls werden einzelne Stunden auf Englisch unterrichtet. Die Prüfung ist auf Deutsch, mit englischer Übersetzung.

Course Materials:

Unterrichtsmaterialien

Alberts B. et al., "Molekularbiologie der Zelle" 7. Auflage, Wiley-VCH,
ISBN: 978-3-527-34072-9

oder alternativ die englischsprachige Ausgabe: Alberts B. et al., "Molecular Biology of the Cell", 7th edition, Garland Science, New York, NY, 2014, ISBN 9780815344322.

Dieses Buch gibt einen umfassenden Überblick über die moderne Zellbiologie. Es bildet das Rückgrat der Vorlesung und bietet Beispiele für Problemstellungen und Fragen sowie Selbsttests. Ein Glossar am Ende des Buches fasst die wichtigsten Begriffe zusammen.

Das Studium der englischen Version ist eine hervorragende Vorbereitung für den späteren Umgang mit englischer Fachliteratur. Obwohl nur selektive Ausschnitte dieses umfassenden Lehrbuchs für die Vorlesung direkt relevant sind, empfehlen wir dieses Buch auch im Hinblick auf die Veranstaltungen in Molekularer Biologie der höheren Semester.

Wichtig: Für alle administrativen Angelegenheiten wenden sie sich bitte an die Studienkoordination: studienkoordination@biol.uzh.ch

Assessment: Leistungsnachweis:
Schriftliche Modulprüfung vor Ort, im Januar.

Prüfungssprache: Deutsch mit englischer Übersetzung.

Termine der Modulprüfungen siehe <http://www.mnf.uzh.ch/de/studium/pruefungen.html>

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Su 06.09.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Organisation: Division IV Biology

Offered in: Fall Semester 2026
Fall Semester 2025
Fall Semester 2024
Fall Semester 2023
Fall Semester 2022

Component of:

Astronomy and Astrobiology		
Minor 60	Bachelor of Science Faculty of Science (2021)	Elective modules, Astronomy and Astrobiology
Minor 30	Bachelor of Arts UZH in Business and Economics (RVO22)	Elective modules, Astronomy and Astrobiology
Minor 30	Bachelor of Science Faculty of Science (2021)	Elective modules, Astronomy and Astrobiology
Minor 30	Bachelor of Science UZH in Informatics (RVO22)	Elective modules, Astronomy and Astrobiology
Minor 30	Master of Science Faculty of Science (120) (2021)	Elective modules, Astronomy and Astrobiology
Astronomy und Astrobiology		
Minor 60	BA UZH in Study of Religions Bologna 2020	Elective modules, Astronomy and Astrobiology
Minor 60	Bachelor of Arts (RVO19)	Elective modules, Astronomy and Astrobiology
Minor 60	Bachelor of Arts in Social Sciences (RVO 19)	Elective modules, Astronomy and Astrobiology
Minor 60	Bachelor of Science UZH in Informatics (RVO22)	Elective modules, Astronomy and Astrobiology
Minor 60	Bachelor of Science in Computational Linguistics	Elective modules, Astronomy and Astrobiology
Minor 60	Bachelor of Science in Psychology (RVO19)	Elective modules, Astronomy and Astrobiology
Minor 60	Bachelor of Theology UZH Bologna 2020	Elective modules, Astronomy and Astrobiology
Biochemistry		
Minor 60	BA UZH in Study of Religions Bologna 2020	Core elective modules, Biochemistry, group 2 <i>Core elective</i>
Minor 60	Bachelor of Arts (RVO19)	Core elective modules, Biochemistry, group 2 <i>Core elective</i>
Minor 60	Bachelor of Arts in Social Sciences (RVO 19)	Core elective modules, Biochemistry, group 2 <i>Core elective</i>
Minor 60	Bachelor of Science Faculty of Science (2021)	Core elective modules, Biochemistry, group 2 <i>Core elective</i>
Minor 60	Bachelor of Science UZH in Informatics (RVO22)	Core elective modules, Biochemistry, group 2 <i>Core elective</i>
Minor 60	Bachelor of Science in Computational Linguistics	Core elective modules, Biochemistry, group 2 <i>Core elective</i>
Minor 60	Bachelor of Science in Psychology (RVO19)	Core elective modules, Biochemistry, group 2 <i>Core elective</i>

Minor 60	Bachelor of Theology UZH Bologna 2020	Core elective modules, Biochemistry, group 2 <i>Core elective</i>
Minor 30	Master of Arts (RVO19)	Core elective modules, Biochemistry, group 2 <i>Core elective</i>
Minor 30	Master of Arts UZH in Study of Religions Bologna 2020	Core elective modules, Biochemistry, group 2 <i>Core elective</i>
Minor 30	Master of Arts in Social Sciences (RVO19)	Core elective modules, Biochemistry, group 2 <i>Core elective</i>
Minor 30	Master of Science Faculty of Science (120) (2021)	Core elective modules, Biochemistry, group 2 <i>Core elective</i>
Minor 30	Master of Science in Computational Linguistics	Core elective modules, Biochemistry, group 2 <i>Core elective</i>
Minor 30	Master of Theology UZH Bologna 2020	Core elective modules, Biochemistry, group 2 <i>Core elective</i>
Biodiversity		
Single Major 180	Bachelor of Science Faculty of Science (2021)	Core elective modules 1a «Natural Sciences» <i>Core elective</i>
Major 150	Bachelor of Science Faculty of Science (2021)	Core elective modules 1a «Natural Sciences» <i>Core elective</i>
Major 120	Bachelor of Science Faculty of Science (2021)	Core elective modules 1a «Natural Sciences» <i>Core elective</i>
Minor 60	BA UZH in Study of Religions Bologna 2020	Core elective modules 1a «Natural Sciences» <i>Core elective</i>
Minor 60	Bachelor of Arts (RVO19)	Core elective modules 1a «Natural Sciences» <i>Core elective</i>
Minor 60	Bachelor of Arts in Social Sciences (RVO 19)	Core elective modules 1a «Natural Sciences» <i>Core elective</i>
Minor 60	Bachelor of Science Faculty of Science (2021)	Core elective modules 1a «Natural Sciences» <i>Core elective</i>
Minor 60	Bachelor of Science UZH in Informatics (RVO22)	Core elective modules 1a «Natural Sciences» <i>Core elective</i>
Minor 60	Bachelor of Science in Computational Linguistics	Core elective modules 1a «Natural Sciences» <i>Core elective</i>

Minor 60	Bachelor of Science in Psychology (RVO19)	Core elective modules 1a «Natural Sciences» <i>Core elective</i>
Minor 60	Bachelor of Theology UZH Bologna 2020	Core elective modules 1a «Natural Sciences» <i>Core elective</i>
Minor 30	Bachelor of Arts UZH in Business and Economics (RVO22)	Core elective modules 1a «Natural Sciences» <i>Core elective</i>
Minor 30	Bachelor of Science Faculty of Science (2021)	Core elective modules 1a «Natural Sciences» <i>Core elective</i>
Minor 30	Bachelor of Science UZH in Informatics (RVO22)	Core elective modules 1a «Natural Sciences» <i>Core elective</i>
Biology		
Single Major 180	Bachelor of Science Faculty of Science (2021)	1st year of studies: lower-level study Biology (compulsory modules) <i>Compulsory</i>
Major 150	Bachelor of Science Faculty of Science (2021)	1st year of studies: lower-level study Biology (compulsory modules) <i>Compulsory</i>

Module BIO 259 Research Internship in Molecular and Cellular Biology

07SMBIO259 / Beteiligung an Forschungsarbeiten

Description:

General description:

Participating students work under individual guidance of an advanced researcher (PhD student, postdoc, group leader) on a specific defined research project and write a scientific report upon completion of the project. Thereby students acquire practical and theoretical insight into actual cutting edge research in Molecular and Cellular Biology.

ECTS: 4

Notes:

4-12 weeks of work in the laboratory, by arrangement

Only for Bachelor students. A research project is completed in one of the research groups at the Department of Molecular Life Sciences (DMLS).

Project and modalities of grading are defined in detail by the head of the research group and the person responsible for the module BIO 259.

Research projects in groups outside the DMLS are feasible in principle, but require advance permission by the person responsible for the module BIO 259. BIO 259 can only be chosen during the BSc program. Minimum duration is 4 weeks of full time work in the laboratory, but internships of at least 6 weeks duration are preferred. ECTS credits are according to duration, 1 ECTS per week full time laboratory work internship.

1 per participant 2 half days (1 for introduction into project, 1 for correction/discussion of report, 0 for supervision of the experimental work, since in general the TA will do experiments that are part of his PhD project) The numbers given above are a proposal; ideally the Studienkoordination should arrive at a formula that applies to all of the research internships in the various directions

Learning Outcome:

Key Skills On completion of this module, students should be able to:

- perform successfully and independently a number of experimental laboratory protocols used in molecular and cell biology
- choose appropriate positive and negative controls for these experiments
- interpret the results of these experiments
- use a lab book or an electronic lab journal to record experimental protocols, results, and analyses
- describe the purpose of the internship project, in particular with respect to the larger research program of the host laboratory
- summarize and critically analyze in a written report the findings obtained during the lab internship, and the conclusions drawn from these findings

Languages of Instruction:

Deutsch & English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Darren Gilmour
Francesca Peri

Requirements:

Assessment: Performance during the experimental work in the laboratory as well as quality of the written report (English, Deutsch auf Anfrage)

Grading Scale: 1-6, Half Grades Given

Organisation:

Offer pattern: 1 Semester (Every Semester)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Organisation: Institut für Molekulare Biologie

Offered in:

Module BME 235 Physiology and anatomy I

07SMBME235 / Course

Description:

General description:

Gewebelehre, Blut, Herz und Kreislauf, Verdauung, intestinales Mikrobiom, Ernährung, Geschmack und Geruch, Atmung, Erkrankungen dieser Systeme

ECTS: 5

Notes:

Die Vorlesung findet im Hörsaal statt, sie wird aufgezeichnet (PodCast).
Einige Daten finden nur online statt. Der genaue Plan ist auf OLAT ersichtlich.
Die Prüfung im Januar findet im üblichen Rahmen statt (on site, closed book).

Dieses Modul beinhaltet Aufgaben und Selbststudium im Umfang von zusätzlich 2 SWS.

Prüfungsplan:

<https://www.mnf.uzh.ch/de/studium/pruefungen.html>

Learning Outcome:

Nach Abschluss der Vorlesung und Prüfung haben die Studierenden ein Verständnis für grundlegende physiologische Prozesse auf zellulärer Ebene, in den verschiedenen Organen, und im systemischen Zusammenwirken der verschiedenen Organe.

Im Einzelnen werden die Studierenden folgende Kompetenzen erwerben.

Sie können:

- die wichtigsten Merkmale des makroskopischen und mikroskopischen Aufbau der Organe identifizieren
- die Funktion der behandelten Körperorgane beschreiben
- neuronale und hormonelle Regulationsmechanismen mit ihrer Wirkung auf zellulärer Ebene kombinieren
- die Integration verschiedener Organe in komplexe Körperfunktionen erläutern

Überfachliche Kompetenzen

Sie können:

- physiologische Prozesse mit Wissen aus anderen Bereichen (Biochemie, Zellbiologie, Molekularbiologie) verknüpfen
- physiologische Fragestellungen im medizinischen Kontext (z. Bsp. Klinischen Studien, Tierexperimente) einordnen und kritisch hinterfragen

Target Groups:

- Pflichtmodul für Studierende der Biomedizin
- Wahlpflichtmodul für Studierende der Biologie
- Wird für die Zulassung zum Masterstudium Biomedizin vorausgesetzt
- Obligatorisch für das höhere Lehramt im Unterrichtsfach Biologie

Languages of Instruction:

Deutsch / Englisch

Merkmale:

Responsible instructor: Carsten Alexander Wagner

Requirements:

Assessment: Multiple choice-Test am Semesterende
Prüfungssprache: Deutsch (mit englischer Übersetzung der Fragen, wenn deren Themen in der Vorlesung auf Englisch gehalten wurden).

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Module BIO 132 Microbiology, Immunology, Virology

07SMBIO132 / Lecture with Practical Exercises

Description:

General description:

Prinzipien der Organisation des Genoms. Grundlegendes zum Immunsystem, zu Viren und zu Mikroorganismen.

Evolution, Taxonomie und Phylogenie der Mikroorganismen, Stoffwechselvielfalt, mikrobielles Wachstum, Ökologie und Stoffkreisläufe, Genregulation in Prokaryoten, Aufbau und Struktur einer prokaryotischen Zelle, Bakterielle Krankheiten.

Aufbau und Klassifizierung von Viren, virale Replikationsstrategien, Beispiele humanpathogener Viren, , Prinzipien der Virusübertragung und der Pathogenese, Impfstoffe und antivirale Medikamente, Angeborene Immunantwort und virale Mechanismen zur Abwehr der angeborenen Immunantwort

Aufbau und Informationsverarbeitung im Immunsystem, Beispiele protektiver Immunantworten gegen Pathogene und Tumoren, Immunpathologie und therapeutische Anwendungen des Immunsystems.

ECTS: 3

Learning Outcome:

Am Ende des Moduls sollen die Studierenden in der Lage sein,

- Die Unterschiede zwischen Prokaryoten und Eukaryoten aus einer evolutionstheoretischen Perspektive zu erläutern
- Den Aufbau der prokaryotischen Zelle zu beschreiben
- Beispiele für die Vielfalt der prokaryotischen Stoffwechselleistungen zu nennen
- Den Einfluss der Mikroorganismen auf den globalen Kohlenstoff und Stickstoffkreislauf zu erklären
- Methoden zur Anreicherung, Selektion und Kultivierung von Prokaryoten zu beschreiben
- Mechanismen der bakteriellen Pathogenität zu erläutern
- Unterschiedliche Prinzipien und Ebenen der Genregulation zu erklären - angeborene und adaptive Aspekte des Immunsystems zu erläutern zu verstehen, wie das Immunsystem Umweltinformationen in protektive Immunantworten umwandelt, und wie fehlgesteuerte Immunreaktionen Krankheiten auslösen
- Anwendung der Mikro- und Molekularbiologie in der Biotechnologie zu beschreiben
- Aufbau und Funktion von Viruspartikeln zu erklären
- Die Vermehrung ausgewählter Viren in einer infizierten Wirtszelle zu beschreiben
- Zu verstehen, wie man Viren medikamentös oder mit Immunisierung bekämpfen kann
- Die Prinzipien der Pathogenese und Übertragung von Virusinfektionen zu beschreiben
- Zu verstehen, wie die angeborene Immunantwort bei Virusinfektionen verläuft und wie Viren diese umgehen können

Module BIO 133 Anthropology

07SMBIO133 / Lecture with Practical Exercises

Description:

General description:

Genetik, Fossilreste, vergleichende Anatomie und Verhaltensforschung belegen die Zugehörigkeit des Menschen zu den Primaten. Diese Säugetierordnung stellt Variationen desselben Themas dar. Die wichtigsten Anpassungen und die entscheidenden Etappen der Stammesgeschichte werden vorgestellt. Damit sollen Antworten auf die Fragen: "Wo steht der Mensch im Rahmen der belebten Natur und wie ist er geworden?" gegeben werden.

ECTS: 3

Notes:

Attention: podcasts will be made available 2 weeks after each lecture

Learning Outcome:

Nach erfolgreicher Teilnahme am Modul können die Studierenden

- die wichtigsten Merkmale von Primaten und insbesondere von fossilen Hominiden im evolutionären und funktionalen Kontext interpretieren;
- die genetische, phänetische und kulturelle Diversität moderner menschlicher Populationen als das Resultat evolutionärer Prozesse erklären;
- Gemeinsamkeiten und Unterschiede im Verhalten und den Kognitionsleistungen von Menschen und Tieren, insbesondere Affen, erkennen;
- erklären, warum kulturelle Evolution nur bei Menschen vorkommt;
- die Frage "Was ist der Mensch?" evolutionsbiologisch fundiert diskutieren.

Module BIO 313 Excursion Lake Zurich: Drinking Water, Fish Farming and Waste Water Treatment 07SMBIO313 / Field Trip

Description:

General description:

Drinking water supply (Water quality analyses, water treatment, and storage of tap water).

Waste water treatment plants (mechanical and biological sewage treatment, biology of activated sludge, phosphorus elimination, importance of sewage treatment plants for Lake Zurich).

Fish farming at Lake Zurich. Sampling equipment.

ECTS: 1

Notes:

Die Exkursion ist in deutscher Sprache

Interessenten sollen sich per e-mail bei T. Posch melden (posch@limnol.uzh.ch) mit Matrikelnummer und e-mail-Adresse. Sie erhalten dann die notwendigen Informationen zur Organisation und Hinweise zu den Vorlesungsunterlagen.

maximale Teilnehmerzahl: 30

Learning Outcome:

Subject specific skills

During this excursion we visit a drinking water treatment, a waste water treatment plant and the fish farming in Stäfa.

By end of this module each student should be able to:

- describe the major technical steps of a waste water treatment plant.
- recognize the importance of micropollutants.
- explain the role of sewage treatment plants for the functionality of Lake Zurich.
- relate the role of sewage treatment plants of Lake Zurich to fish diversity and fishery.
- describe the different sources and treatment processes of drinking water (springs, groundwater and lake water).

Key skills

On completion of the module, the student should be able to

- recognize both scientific and transferable skills that are recommended for professional positions in the area of applied limnology.
- summarize theoretical scientific data and information from applied sciences.

Target Groups:

Das Modul ist Teil folgender Master-Spezialisierung (bei Modulen des Fachstudiums):

- Mikrobiologie / Microbiology
- Oekologie / Ecology

Merkmale:

Responsible instructor: Thomas Posch

Requirements:

Prerequisites:

Naturwissenschaftliches Vorwissen wird vorausgesetzt, d.h. die Exkursion eignet sich für v.a. für Studenten(innen) der Biologie (alle Richtungen), Chemie und Umweltwissenschaften.

Assessment: Wird benotet. Teilnahme an allen Exkursionsteilen & Bericht schrei

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: Exkursionen, 2 1/2 Tage im Januar 2017 oder Anfang Februar

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Organisation: Department of Plant and Microbial Biology

Offered in:
Fall Semester 2026
Fall Semester 2025
Fall Semester 2024
Fall Semester 2023
Fall Semester 2022

Module Kolloquium Fundamental research in clinical Biochemistry (for doctoral students, teaching and research assistants)
04SMBCH0Y003 / Colloquium

Description:

ECTS: 0

Learning Outcome:

Das Forschungskolloquium über klinische Grundlagenforschung für Doktorierende und Assistierende findet wöchentlich während dem Semester statt (nach Programmankündigung).

Diese Veranstaltung richtet sich an Doktorierende und Assistierende sowie an Studierende.

Ziel ist es, eigene Forschungsergebnisse zu präsentieren und diese zu diskutieren. Die Forschungsgruppen der Bereiche Stoffwechsel und Klinische Chemie und Biochemie präsentieren ihre Forschungsergebnisse gemeinsam.

Module Kolloquium über aktuelle Hirnforschung, im Institut

04SMSPV0Y003 / Course

Description:

ECTS: 0

Learning Outcome:

Verschiedene wissenschaftliche Gäste aus den Bereichen Molekulares Bewusstsein, Neurochemie, Neuromorphologie und Neurophysiologie berichten über ihre neuesten wissenschaftlichen Erkenntnisse.

Es soll der Austausch von wissenschaftlichen Erkenntnissen und Daten sowie die Kommunikation und Zusammenarbeit zwischen den Forschenden gefördert werden. Studierende, welche den Kurs belegen, besuchen während eines Semesters alle Seminare und schreiben einen kritischen Report über ein Seminar ihrer Wahl. Die Anleitung dazu erhalten eingeschriebene Studierende von Prof. Dr. Sebastian Jessberger.

Es werden keine Skripte oder Lernmaterialien vorgelegt.

Target Groups:

Studierende im Bachelorstudium und im Masterstudium

Module Introductory Course Neuroscience I

04SMSPV0Y005 / Course

Description:

General description:

The course gives an introduction to the development and anatomical structure of nervous systems. Furthermore, it discusses the basics of cellular neurophysiology and neuropharmacology. Finally, the nervous system is described on a system level.

Exam Introductory Course in Neuroscience

- The exam is a three-hour written test.
 - It contains six questions covering six topics of the corresponding semester. A question should be answered roughly in about 30 minutes.
 - The answer to a question is evaluated with a scale ranging from one to six points.
 - The questions will be given in English. The answers are to be given in English.
 - No auxiliary means except a dictionary are allowed.
- No prior registration needed.

ECTS: 2

Module BIO 356 Research Internship in Developmental Biology and Genetics

07SMBIO356 / Praktikum

Description:

General description:

Participating students work under individual guidance of an advanced researcher (PhD student, postdoc, group leader) on a specific defined research project and write a scientific report upon completion of the project. Thereby students acquire practical and theoretical insight into actual cutting edge research in Developmental Biology and Genetics.

The research projects are performed in a research group and should be arranged directly with a group leader, before contacting the module leader. Work plan and evaluation of performance are individually arranged with the group leaders.

ECTS: 12

Notes:

4-12 weeks of work in the laboratory, by arrangement

Only for advanced Bachelor students. Students must arrange their research internship directly with a research group leader. Minimum duration is 4 weeks full time, but internships of at least 6 weeks duration are preferred. ECTS credits are according to duration, 1 ECTS per week full time internship.

Learning Outcome:

Key Skills On completion of this module, students should be able to:

- perform successfully and independently a number of experimental laboratory protocols used commonly in Developmental Biology and Genetics
- choose appropriate positive and negative controls for these experiments
- interpret the results of these experiments
- use a lab book to record experimental protocols, results, and analyses
- describe the purpose of the internship project, in particular with respect to the larger research program of the host laboratory
- summarize and critically analyze in a written report the findings obtained during the lab internship, and the conclusions drawn from these findings

Module BIO 412 Introductory Course in Laboratory Animal Science (LTK Modul 1)

07SMBIO412a / Kurs

Description:

General description:

This education provides expertise and practical training, that are required by the Swiss legislation for a responsible and gentle handling of laboratory animals. Practical part: handling and techniques in rodents (e.g. application of substances, sampling, anaesthesia). Theory: ethical aspects and regulations; criteria for assessment of discomfort and pain, alternative methods, laboratory animals: characteristics, needs, husbandry, breeding, normal behaviour, diseases.

This course gives also a certificate accredited by FELASA for a recognition in Europe.

ECTS: 2

Notes:

Procedure:

- Register by 31 October for the January course, by 31 March for the June course, and by 31 May for the August course via admin.biomedizin@physiol.uzh.ch.
- Submit an email confirmation from your Master's thesis supervisor stating that you will be working with rodents during your Master's thesis.
- BIO412 must be listed in your Learning Agreement (please attach a copy of the first page).
- Final registration is only possible after receiving the course confirmation from the Laboratory Animal Science Unit (after 31 October for the January course, 31 March for the June course, or 31 May for the August course).

As animals are ordered specifically for each course participant, it is essential that the number of participants is known well in advance. Therefore, cancellations must be made by 30 November for the January course, by 30 April for the June course, and by 30 June for the August course (for the same reason: ordering of laboratory animals).

- NO REIMBURSEMENT OF COURSE FEES for LTK1 courses that are booked independently and without prior consultation with the Biomedical Sciences Study Coordination Office.

Learning Outcome:

By the end of the practical part of this module the students are able to

- handle, restrain and inject mice and rats correctly and according to a specified time schedule
- assess health and sex of the animals used in practical trainings
- anaesthetize rats, monitor depth and recovery of anaesthesia and collect small amounts of blood

By the end of the theoretical part of this module the students are able to

- consult the relevant paragraphs of the Swiss animal protection law and weigh the respective interests (benefit for humans vs suffering of the animal) during an animal experiment
- explain the parameters which influence the outcome of an animal experiment and apply these in planning the experiment
- evaluate and apply the concept of 3R's with regard to the animal experiment planned

Module BCH 405 Research seminars

07SMBCH405 / Seminar

Description:

General description:

Attendance in research seminars given either by internal students, post-docs or invited speakers on relevant topics in the field of modern biochemistry. The distinction between internal/external speakers (formerly BCH403/405) no longer exists.

ECTS: 1

Learning Outcome:

At the end of this course, students should be able to

- follow the content of a scientific lecture in biochemistry
- describe current topics of scientific research at BCI
- critically question biochemical research results

Target Groups:

Students enrolled in the Biochemistry MSc and PhD study programs

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Hila Emmert

Requirements:

Assessment:

1 ECTS is awarded for participation in 28 seminars. 14 seminars must be organized by the Institute of Biochemistry (BCI). 14 seminars can be organized by other academic institutions in Zurich (ETHZ, other UZH institutes), but must all have a focus on biochemistry and be open to the public. Students will document their seminar attendance in the form of a spreadsheet in a self-generated electronic document (.docx or .pdf format, no handwriting, no template available). This spreadsheet will include the following seminar information: date, instructor, title of seminar. Instructor signatures are no longer required. This spreadsheet will be submitted twice. For ECTS approval and to the examiners of the final Master's examination. The basic content of the seminars attended can be orally examined in the module BCH501.

Grading Scale:

Fulfilled/Not Fulfilled

Repeatability:

Can be repeated as necessary

Organisation:

Offer pattern:

1 Semester (Every Semester)

Dates/Times/Deadlines:

Seminars are held at irregular intervals. The current dates are posted at the BCI.

Module BCH 301 Molecular cell biology

07SMBCH301 / Lecture with Practical Exercises

Description:

General description:

The module covers the molecular mechanisms underlying the essential functions of living cells and their regulation: structure of the eukaryotic cell, cell compartments and regulation of intracellular transport, mechanisms and regulation of cell division and cell death, the cytoskeleton and its influence on cell shape and movement, cell-cell communication and signal transduction, membrane transport, electrical properties of the cell membrane and their function in nerve cells, fundamentals of molecular immunology.

ECTS: 6

Target Groups:

Students in a bachelor's study program in Biochemistry at UZH

Languages of Instruction:

Module BIO 661 Science Writing

07SMBIO661 / Doktorandenseminar

Description:

General description:

From a predominantly scientific point of view the following topics will be discussed:

- how to structure each section of a manuscript
- how to accurately describe research data
- how to describe future research for a grant application
- how to present scientific data on a poster and in a seminar

ECTS: 1

Notes:

Exact course dates and rooms will be communicated in advance to all registered students.

Learning Outcome:

The aim of the course is to familiarize Ph.D. students with the general principles of scientific paper writing. The course covers:

- Short lectures introducing scientific writing principles
- Analysis / improvement of text examples in published papers
- Writing exercises using own work.

Languages of Instruction:

English

Module BCH 501 Master's thesis, 6-months research project

07SMBCH501 / Master Paper / MA-Arbeit MNF

Description:

General description:

Experimental project hosted in a research group and performed under the supervision of a post-doctoral fellow or advanced PhD student.

ECTS: 45

Notes:

https://www.bioc.uzh.ch/dam/jcr:ec175529-f860-4504-ab64-53c12ad2352e/Guidelines_to_modules_BCH501_and_BCH502_2021.pdf

Learning Outcome:

The students will develop skills in independent scientific work (data collection, data analysis, and interpretation) and gain a direct insight into research topics and methods of the respective research group.

Languages of Instruction:

The thesis document is written in English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Hila Emmert

Requirements:

Prerequisites:

BSc of Biochemistry and successfully completed module BCH408 Research Project

Assessment:

Attestation is based on a written thesis document upon acceptance of the hosting PI. In the case of grade 4 or lower, or grade 6, a second review by an independent qualified person is required.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Semester)

Dates/Times/Deadlines:

Application for a MSc project is submitted directly to the PI of the prospective research group. Duration is limited to 9 months (6 month experimental work + 3 months compilation of the thesis document).
http://www.bioc.uzh.ch/fileadmin/user_files/EducationFiles/pdf/Guidelines_to_modules_BCH501_and_BCH502_ver3.pdf

Before starting the master's thesis registration takes place with the person responsible for the module. The master's thesis must be submitted no later than 9 months after the start.

Booking Deadline/Period:

not bookable

Cancellation Deadline:

not cancelable

Module PHY 131 Physics III

07SMPHY131 / Lecture with Practical Exercises

Description:

General description:

Dieses Modul gibt eine Einführung in die Grundlagen der modernen Physik, also insbesondere der Relativitätstheorie und der Quantenmechanik. Sie wird im FS fortgesetzt durch PHY141 Physik IV, die speziellere Gebiete der angewandten Quantenmechanik behandelt.

Das Modul besteht aus einer Vorlesung (4 Lektionen pro Woche), wöchentlichen Uebungen (jede Woche zwei Stunden Besprechung). Das Modul wird mit einer Prüfung Anfang Januar abgeschlossen und ergibt im Total 8 ECTS.

ECTS: 8

Learning Outcome:

Am Ende der Veranstaltung sollten Studierende folgende Fähigkeiten erworben haben:

1. Wellen mit Dispersion mathematisch und physikalisch beschreiben können
2. Wellentransport von evaneszenten und propagierenden Wellen unterscheiden können
3. Den Übergang von der Wellenoptik zur geometrischen Optik mathematisch beschreiben können
4. Ursprünge und Anwendungen der Lorentz-Transformationen kennen
5. Die relativistischen Energie-Impuls-Beziehungen kennen und anwenden können
6. Den Zusammenhang zwischen Elektrodynamik und Relativitätstheorie beschreiben können
7. Grundelemente der allgemeinen Relativitätstheorie verstehen
8. Strahlungsgesetze anwenden können und deren Ursprung kennen
9. Den Dualismus von Wellen- und Teilchenbeschreibung auf der mikroskopischen Ebene kennen und anwenden.
10. Die Schrödingergleichung auf Potentialstufen und Potentialtöpfe anwenden können
11. Harmonische Oszillatoren quantenmechanisch beschreiben
12. Drehimpulse quantenmechanisch beschreiben
13. Das Wasserstoff-Atom mit Hilfe der Schrödingergleichung quantitativ beschreiben

Target Groups:

Physik-Studierende im Haupt- und Nebenfach, Naturwissenschaftler mit Interesse an den Grundlagen der Quantenphysik

Languages of Instruction:

Deutsch

Course Materials:

- Demtröder, Experimentalphysik 3, Springer
- Feynman lectures Band 3, Addison-Wesley
- Mayer-Kuckuck, Atomphysik, Täubner
- McMurray, Quantum Mechanics, Prentice Hall

Link Phy131 | Physik-Institut | UZH (<https://www.physik.uzh.ch/en/groups/aegerter/teaching/Physik-III.html>)

Merkmale:

Responsible instructor: Christof Aegerter

Requirements:

Prior Knowledge: Physik I und II (einführende experimentelle Vorlesung in Mechanik, Wärmelehre, Elektrizität und Magnetismus auf Hochschulniveau); Lösungen einfacher Differentialgleichungen

Assessment: Genügende Note in der Schlussprüfung. Zusätzlich 60 % der Uebungen sinnvoll bearbeitet

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module BIO 504 Master Thesis in Microbiology

07SMBIO504 / Master Paper / MA-Arbeit MNF

Description:

General description:

The Master Thesis covers a research project completed within maximally one year. Students will independently work on a project of broader scientific relevance. The Master Thesis is a written document on the details of the project, as well as interpretation of the data. The Master Thesis can be supervised by a professor or Privatdozierende/r.

ECTS: 60

Languages of Instruction:

Die Masterarbeit wird in Englisch verfasst.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Jakob Pernthaler

Requirements:

Prerequisites:

BSc in Biology or Biochemistry completed

Assessment:

Master thesis and talk

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Semester)

Dates/Times/Deadlines:

The students discuss and agree upon the topic and the begin of their Master Thesis with their supervisor. They register for their Master Thesis by filling out the "Learning Agreement", submit it to and discuss it with the Master coordinator (module coordinator of BIO 504).

Description:

General description:

Die Masterarbeit ist eine 52-wöchige wissenschaftliche Forschungsarbeit, in der eine grössere Problemstellung eigenständig bearbeitet werden soll. Die Masterarbeit wird durch einen umfassenden Bericht (Master Thesis) dokumentiert. Die Betreuung der Masterarbeit kann durch eine/n Professor/in, oder Privatdozent/in erfolgen. Ein Merkblatt zur Durchführung der Masterarbeit ist auf der Website der Molekular-und Zellbiologie publiziert

<https://www.biologie.uzh.ch/de/Studium/Masterstudium/MasterStudies.html>

ECTS: 60

Languages of Instruction:

Die Masterarbeit wird in Englisch oder Deutsch verfasst.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Darren Gilmour
Francesca Peri

Requirements:

Prerequisites:

Abgeschlossenes Bachelor-Studium in Biologie oder Biochemie

Assessment:

Master Thesis und Vortrag (English, Deutsch auf Anfrage)

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Semester)

Dates/Times/Deadlines:

Die Studierenden vereinbaren individuell das Thema und den Beginn der Masterarbeit mit einem Projektleiter. Die Anmeldung zur Masterarbeit erfolgt schriftlich bei der Koordinatorin oder beim Koordinator der Master-Richtung (Modulverantwortliche/r), unter Verwendung des entsprechenden Formulars (<https://www.biologie.uzh.ch/de/Studium/Masterstudium/MasterStudies/MolecularCellularBiology.html>).

Booking Deadline/Period:

not bookable

Cancellation Deadline:

not cancelable

Module BCH 502 Biochemistry: An Overview

07SMBCH502 / Prüfung ohne Lehrveranstaltung

Description:

General description:

In this cross curricular exam the students are asked to prove their understanding of biochemical processes, phenomena, concepts and interrelations.

ECTS: 10

Notes:

See the homepage of the Institute of Biochemistry (rubric Teaching):

https://www.bioc.uzh.ch/dam/jcr:ec175529-f860-4504-ab64-53c12ad2352e/Guidelines_to_modules_BCH501_and_BCH502_2021.pdf

Languages of Instruction:

German and English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Hila Emmert

Requirements:

Prerequisites:

Successful completion of module BCH501 Master thesis project

Assessment:

The exam is oral and of 60 minutes duration.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Semester)

Dates/Times/Deadlines:

The exam takes place after completion of module BCH501 Master thesis project and upon acceptance of the thesis document.

Module BIO 348 Concepts in Modern Genetics

07SMBIO348 / Lecture with Practical Exercises

Description:

General description:

This lecture focuses on the concepts of modern genetics and genomics. The topics include principles of classical and molecular genetics, analysis of developmental processes, gene mapping, reverse genetics, epigenetics and RNA interference. This module is required for participants of the experimental block course BIO 323, but it addresses also those students who wish to take the lecture without attending the experimental block course.

ECTS: 6

Notes:

In this module, presence during lectures, tests, and additional home work are required. Time input is on average about six hours per week.

Lectures are in English. This course is offered together with ETHZ.

This module is administrated at the ETH. UZH students who want to take the module must register as "Fachstudierende"/"special students" at ETH via myStudies (<https://ethz.ch/students/en/studies/academic-support/course-catalogue.html>) and then register for the course at myStudies. You must also separately register for the examination at myStudies.

Lecture hall Mondays: ETH, see course catalogue ETH

Lecture hall Tuesdays: UZH Irchel

Learning Outcome:

By the end of this module, each student should be able to

- define the key concepts and methods used in modern genetic analysis.
- apply these concepts and methods to address a specific biological problem.
- critically evaluate and discuss genetic issues relevant to society

Key skills By the end of this module, each student should be able to

- analyze publications to extract and discuss data which are collected by modern genetic techniques
- formulate a hypothesis based on a set experimental genetic data.

Merkmale:

Module BIO 383 Research Internship in Neurobiology (6-12 weeks)

07SMBIO383 / Praktikum

Description:

General description:

Participating students work under individual guidance of an advanced researcher (PhD student, postdoc, group leader) on a specific defined research project and write a scientific report upon completion of the project. Thereby students acquire practical and theoretical insight into actual cutting edge research in Neurobiology.

The research projects will be carried out in one of the research groups specialized in neurobiology. The projects will be individually arranged with the respective group leader.

ECTS: 12

Notes:

Only for Bachelor students, completed basic studies

16 half days this is one graduate student per modul for one student in one laboratory

Target Groups:

Only for Bachelor students, completed basic studies

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Stephan Neuhauss

Requirements:

Prerequisites:

Only for advanced Bachelor students (basic studies completed). Minimum duration is 6 weeks full time. Duration is between 6 and 12 weeks. ECTS credits are according to duration, 1 ECTS per week full time internship.

Assessment:

Written report (English)

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can't be repeated

Module BIO 520 Integrated Knowledge in Biology

07SMBIO520 / Prüfung ohne Lehrveranstaltung

Description:

General description:

This module, designed as a self-study period of the Master degree course and comprising of a total of 300 study hours, allows students to demonstrate a comprehensive understanding of specialised areas of the Biology curriculum, especially - but not only - in the area of their chosen Master. The supervisor of the Master thesis in collaboration with the Master coordinator discusses and designs the scope and content of the module with each individual student. At the end of the self-study period, the examination of the learning outcomes takes the form of a three-hour written and a 30-minute oral examination within the same week.

ECTS: 10

Learning Outcome:

By the end of this module students should be able to

- demonstrate their understanding and command of relevant biological facts, methods and concepts
- identify and explain interrelationships between the various facts, methods and concepts
- summarise and critically review scientific literature efficiently and effectively

Merkmale:

Target Group: Suitable for English Speakers

Requirements:

Assessment:

A three-hour written and a 30-minute oral examination within the same week

Module BIO 511 Master Thesis in Systematics and Evolution

07SMBIO511 / Master Paper / MA-Arbeit MNF

Description:

General description:

The master's thesis is a 52-week scientific research project in which a major problem is to be independently addressed. The master thesis is documented by a comprehensive report (Master Thesis). The supervision of the Master Thesis can be done by a professor or a private lecturer.

ECTS: 60

Languages of Instruction:

The master thesis is written in English.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Florian P. Schiestl

Requirements:

Prerequisites:

Completed bachelor's degree in biology

Assessment:

Master Thesis and Lecture

Grading Scale:

1-6 Quarter Grades Given

Organisation:

Offer pattern:

1 Semester (Every Semester)

Dates/Times/Deadlines:

The students agree individually on the topic and the start of the master thesis with a project supervisor. Registration for the master's thesis is made in writing to the coordinator of the master's direction (module supervisor) using the appropriate form.

Module BIO 506 Master Thesis in Neurosciences

07SMBIO506 / Master Paper / MA-Arbeit MNF

Description:

General description:

Die Masterarbeit ist eine 52-wöchige wissenschaftliche Forschungsarbeit, in der eine grössere Problemstellung eigenständig bearbeitet werden soll. Die Masterarbeit wird durch einen umfassenden Bericht (Master Thesis) dokumentiert. Die Betreuung der Masterarbeit kann durch eine/n Professor/in, oder Privatdozent/in erfolgen. Ein Merkblatt zur Durchführung der Masterarbeit ist auf der Website der Neurowissenschaften publiziert

<https://www.biologie.uzh.ch/de/Studium/Masterstudium/MasterStudies.html>

ECTS: 60

Languages of Instruction:

Die Masterarbeit wird in Englisch oder Deutsch verfasst.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Esther Stoeckli

Requirements:

Prerequisites:

Abgeschlossenes Bachelor-Studium in Biologie oder Biochemie

Assessment:

Master Thesis und Vortrag

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Semester)

Dates/Times/Deadlines:

Die Studierenden vereinbaren individuell das Thema und den Beginn der Masterarbeit mit einem Projektleiter. Die Anmeldung zur Masterarbeit erfolgt schriftlich bei der Koordinatorin oder beim Koordinator der Master-Richtung (Modulverantwortliche/r), unter Verwendung des entsprechenden Formulars:

<https://www.biologie.uzh.ch/de/Studium/Masterstudium/MasterStudies.html/MasterStudies/Neurosciences.html>.

Module BIO 509 Master Thesis in Animal Behaviour

07SMBIO509 / Master Paper / MA-Arbeit MNF

Description:

General description:

The Master Thesis covers a research project completed within maximally one year.

Students will independently work on a project of broader scientific relevance. The Master Thesis is a written document on the details of the project, as well as interpretation of the data. The Master Thesis can be supervised by a professor or another scientist entitled by the Master's Coordinator. For further details see link section.

ECTS: 60

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Marta Manser

Requirements:

Prerequisites: Basic studies completed

Assessment: Masters thesis and talk in English

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Semester)

Dates/Times/Deadlines: The students discuss and agree upon the topic and the begin of their Master Thesis with their supervisor. They register for their Master Thesis by filling out the "Learning Agreement", submit it to and discuss it with the Master coordinator who has to sign the formular Learning Agreement (see link section).

Module BIO 510 Master Thesis in Ecology

07SMBIO510 / Master Paper / MA-Arbeit MNF

Description:

General description:

The Master Thesis in Ecology comprises 52 weeks of practical scientific research, in which a question in the field of ecology is tackled independently, under the guidance of a Master Supervisor. A written thesis documents the research and is the basis of assessment.

Very important and extensive information that must be read and understood by students and MSc supervisors:

https://www.popecol.org/msc_ecology

ECTS: 60

Learning Outcome:

Learning outcome agreed with supervisor.

Languages of Instruction:

The thesis is written in English (or German with prior permission)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Arpat Ozgul

Requirements:

Prerequisites:

Bachelors degree in Biology or Biochemistry required

Assessment:

Master Thesis and presentation in English

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Semester)

Dates/Times/Deadlines:

Students arrange their research project with their chosen supervisor. The project and supervisor are entered onto a Learning Agreement, which also lists the taught courses (20 ECTS points) and plan for the Masters Exam (10 ECTS points). The needs to be checked and signed by the Masters Coordinator (Prof. Ozgul)

Module General Didactics: Teaching and Learning at Upper Secondary Schools

06SM222ADi / Module

Description:

General description:

Im Modul "Allgemeine Didaktik" des Studiengangs "Lehrdiplom für Maturitätsschulen" erwerben die Lehrdiplomstudierenden schulfachübergreifende Grundlagen für das erfolgreiche Lehren und Lernen an Maturitätsschulen. Allgemeindidaktisches Wissen und Können gehört - zusammen mit fachlichem, fachdidaktischem, pädagogisch-psychologischem Wissen und Können sowie den Fähigkeiten zur professionellen Selbstregulation, Kooperation und Reflexion - zu den zentralen Facetten der Kompetenzen von Lehrerinnen und Lehrern.

ECTS: 4

Learning Outcome:

Die Teilnehmenden sollen: - Grundmodelle schulischen Lehrens und Lernens erklären, - Merkmale von Unterrichtsqualität identifizieren, - Typische Verlaufsmuster von Unterricht beschreiben, - Schritte der Unterrichtsplanung kennen und anwenden, - Eine Palette basaler Unterrichtsmethoden benennen und Gestaltungsvarianten unterscheiden, - Sich mit spezifischen Fragen des Berufs als Lehrerin bzw. Lehrer auseinandersetzen, - Ziele und Strukturen des Gymnasiums und weiterer Maturitätsschultypen beschreiben sowie - Das Gymnasium im Bildungssystem einordnen und aktuelle Diskussionen reflektieren.

Module Subject Didactics English II

06SM090E2 / Module

Description:

General description:

Die Module Fachdidaktik I und II geben den Studierenden einen Überblick über die vielfältigen Themen und Methoden des Unterrichts in den einzelnen Unterrichtsfächern an Maturitätsschulen. Die Schwerpunkte der beiden Module liegen dabei auf der Umsetzung allgemeindidaktischer und fachdidaktischer Erkenntnisse im Unterricht an Maturitätsschulen. Die Studierenden lernen Theorie und Praxis im Unterricht zu verbinden, verschiedene Unterrichtsmethoden und -mittel einzusetzen sowie ihren Unterricht zu planen, durchzuführen und zu reflektieren.

ECTS: 3

Languages of Instruction:

Englisch

Merkmale:

Responsible instructor: Franziska Zeller

Requirements:

Prerequisites: - Abgeschlossenes Modul «FD Englisch I» - Erfolgreich absolviertes Modul «Language Skills for Teachers» (3 ECTS Credits)

Assessment: Referat, schriftliche Übung.
Aktive Teilnahme an der Lehrveranstaltung und regelmässige Präsenz in der Lehrveranstaltung wird erwartet.

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Organisation:

Offer pattern: 1 Semester (Every Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Support and Accompany Learners at the Federal Vocational Baccalaureate School

06SM090LLB2 / Module

Description:

General description:

In dieser Veranstaltung werden anhand konkreter Fallbeispiele aus dem Unterricht an Berufsfach- und Berufsmaturitätsschulen pädagogische Prozesse analysiert sowie Lern- und Sozialisationsprozesse diskutiert. Hierbei steht einerseits die Rolle und Aufgabe der Lehrperson und andererseits die Berücksichtigung individueller Lebens- und Berufssituationen der Berufslernenden im Vordergrund. Theoriewissen wird vertieft und durch Erfahrungswissen sowie Handlungsoptionen aus der Praxis ergänzt. Das Erkennen von Ressourcen bei den Berufslernenden und deren Unterstützung und Förderung bilden wichtige Elemente der Veranstaltung. Der Heterogenität (kulturell, schulisch, individuell) wird besondere Beachtung geschenkt und das Individuum ins Zentrum gestellt.

ECTS: 3

Notes:

Das Modul ist Bestandteil der Berufspädagogischen Zusatzqualifikation (BPZQ) im Studiengang "Lehrdiplom für Maturitätsschulen" für Studierende mit einem Fach, das auch an der Berufsmaturität angeboten wird. Die BPZQ kann im Studiengang "Lehrdiplom für Maturitätsschulen" im Rahmen des Wahlpflichtbereichs absolviert werden. Für das Modul gilt (aufgrund übergeordneter Interessen der Akkreditierung des Zertifikats BpZQ) eine Präsenzpflcht. Neben den zu absolvierenden Leistungsnachweisen müssen mind. 80% der Lehrveranstaltungen des Moduls in Präsenz absolviert werden, damit die ECTS Credits gutgeschrieben werden können. Dieses Modul entspricht ex. "Lehr- und Lernort Berufsfachschule 2".

Learning Outcome:

- Die Studierenden kennen vielfältige Ansätze in den Bereichen individuelle Förderung, Binnendifferenzierung, Lern- und Problemlösekompetenz sowie konstruktive Fehler- und Kritikkultur und können diese lernförderlich einsetzen.
- Die Studierenden kennen alters- und entwicklungstypische Probleme von Lernenden in der Ausbildung, können diese angemessen adressieren und dabei Beratungsangebote und die gesetzliche Vertretung der Jugendlichen angemessen einbeziehen.
- Die Studierenden können in ihrem Unterricht auf die Lernerfahrungen der Schülerinnen und Schüler in der Berufspraxis sowie auf ihre verschiedenen Lebens- und Berufskontexte Bezug nehmen und diese als Ausgangspunkt für schulische und lebenslange Lernprozesse aufnehmen.
- Die Studierenden können das Erleben und Verhalten Jugendlicher in Schule, Berufs- und Arbeitswelt aus verschiedenen Perspektiven beschreiben und erklären.

Module Teaching at the Federal Vocational Baccalaureate School: Lesson Shadowing and Lesson Design.
06SM090LLB1 / Module

Description:

General description:

Das Modul besteht aus dem Besuch eines Seminars und dem Absolvieren von 4 Lektionen Hospitation an einer Berufsmaturitätsschule. Im Seminar werden Möglichkeiten zur Umsetzung der Vorgaben im Rahmenlehrplan für den Unterricht an der Berufsmaturität erarbeitet und diskutiert, z.B. Leit motive des Berufsmaturitätsunterrichts, Rolle der Schullehrpläne, Schwierigkeiten und Herausforderungen des interdisziplinären Arbeitens, Aufgaben einer BM-Lehrperson, Besonderheiten des Qualifikationsverfahrens. In den Hospitationsstunden und den diesbezüglichen Reflexionen betrachten die Studierenden vor dem Hintergrund der im Seminar erarbeiteten theoretischen Inhalte den Unterricht an Berufsmaturitätsschulen aus der Perspektive der Beobachterin bzw. des Beobachters. Ziel der Hospitationen ist es, die eigene berufliche Orientierung und den Rollenwechsel zur Lehrperson an Berufsmaturitätsschulen in der Praxis zu reflektieren und Stärken und Schwächen der Lernenden an Berufsmaturitätsschulen zu identifizieren und zu thematisieren. Das Modul ist für Unterrichtende der Berufsmaturitätsschulen und Berufsfachschulen aller Richtungen konzipiert. Unterrichtserfahrung (z.B. Sek. I / Sek. II) ist von Vorteil.

ECTS: 3

Notes:

Die Studierenden organisieren die Hospitationsstunden an den Berufsmaturitätsschulen selbst. Im Seminar wird dazu Hilfestellung geboten. Das Modul ist Bestandteil der Berufspädagogischen Zusatzqualifikation (BPZQ) für Studierende mit einem LfM-Fach, das auch an Berufsmaturitätsschulen angeboten wird. Ausnahmen: - Studierende mit Unterrichtsfach Wirtschaft und Recht bzw. Wirtschaft und Gesellschaft absolvieren dazu die Fachdidaktik IV im Frühjahrssemester. - Studierende mit Unterrichtsfach Sport absolvieren das spezifische Modul "Lehr- und Lernort Berufsfachschule 1: Unterrichtsgestaltung (LfM Sport)" im Herbstsemester.

Learning Outcome:

- Die Studierenden können in ihrem Unterricht die Fachinhalte berufspädagogisch begründet auswählen, berufspädagogische Anforderungen der Unterrichtsgestaltung umsetzen sowie interdisziplinäre und fächerübergreifende Ansätze einbeziehen. - Die Studierenden kennen verschiedene Formen und Verfahren der Leistungsbeurteilung und -rückmeldung sowie der Unterrichtsgestaltung und können diese unter Berücksichtigung der unterschiedlichen Lebens- und Berufskontexte der Jugendlichen umsetzen. - Die Studierenden sind mit Inhalt und Bedeutung von Grundlagen wie der Berufsmaturitätsverordnung, Schullehrplänen, sowie Konzepten der Nachhaltigkeit, des lebenslangen Lernens oder der konstruktiven Fehler- und Feedbackkultur vertraut, und können diese auch für die Reflexion ihrer Rolle als Lehrperson nutzen.

Merkmale:

Responsible instructor: Katrin Kraus

Requirements:

Assessment: Portfolio: Schriftliche Arbeit und mündliche Prüfung. Die mündlichen Prüfungen zu den Hospitationen finden in den letzten Semesterwochen statt. Die konkreten Termine werden im Seminar UBM nach Absprache festgelegt. Das Modul wird als <bestanden> bewertet, wenn beide Elemente des Portfolios <bestanden> sind. Aktive Teilnahme an den Lehrveranstaltungen wird erwartet.

Module Subject Didactics Italian I

06SM090Ita1 / Module

Description:

General description:

Die Module Fachdidaktik I und II geben den Studierenden einen Überblick über die vielfältigen Themen und Methoden des Unterrichts in den einzelnen Unterrichtsfächern an Maturitätsschulen. Die Schwerpunkte der beiden Module liegen dabei auf der Umsetzung allgemeindidaktischer und fachdidaktischer Erkenntnisse im Unterricht an Maturitätsschulen. Die Studierenden lernen Theorie und Praxis im Unterricht zu verbinden, verschiedene Unterrichtsmethoden und -mittel einzusetzen sowie ihren Unterricht zu planen, durchzuführen und zu reflektieren.

ECTS: 3

Notes:

Das Modul «Fachdidaktik Italienisch II» kann im Anschluss an die Fachdidaktik Italienisch I besucht werden. Das Modul «Fachdidaktik Italienisch III» kann im Anschluss an die Fachdidaktik I und/oder parallel zur Fachdidaktik Italienisch II besucht werden.

Learning Outcome:

- Über fachdidaktisches Grundlagenwissen im Fach «Italienisch als Fremdsprache an Maturitätsschulen» verfügen
- didaktische Analysen zur Auswahl und Strukturierung von Unterrichtsinhalten durchführen - Lernziele formulieren
- fachspezifische Voraussetzungen und typische Fehlauffassungen der Schülerinnen und Schüler klären - das didaktische und diagnostische Potenzial von Aufgaben einschätzen - Unterricht in Kenntnis von dessen Qualitätsmerkmalen, Methoden und Verlaufsmustern planen - die kognitive Aktivierung der Schülerinnen und Schüler initiieren und fördern - die Lernprozesse der Schülerinnen und Schüler motivieren und unterstützen - den Unterricht und die eigenen fachspezifisch-pädagogischen Überzeugungen reflektieren.

Languages of Instruction:

Italienisch

Module Subject Didactics History II

06SM090Ge2 / Module

Description:

General description:

Die Module Fachdidaktik I und II geben den Studierenden einen Überblick über die vielfältigen Themen und Methoden des Unterrichts in den einzelnen Unterrichtsfächern an Maturitätsschulen. Die Schwerpunkte der beiden Module liegen dabei auf der Umsetzung allgemeindidaktischer und fachdidaktischer Erkenntnisse im Unterricht an Maturitätsschulen. Die Studierenden lernen Theorie und Praxis im Unterricht zu verbinden, verschiedene Unterrichtsmethoden und -mittel einzusetzen sowie ihren Unterricht zu planen, durchzuführen und zu reflektieren.

ECTS: 3

Merkmale:

Responsible instructor: Thomas Christian Müller
Philippe Jakob Weber

Requirements:

Prerequisites: Abgeschlossenes Modul «FD Geschichte I»

Assessment: Portfolio: Referate, praktische Umsetzung verschiedener Unterrichtselemente. Das Modul wird als bestanden bewertet, wenn alle Elemente des Portfolios bestanden sind. Aktive Teilnahme an der Lehrveranstaltung und regelmässige Präsenz in der Lehrveranstaltung wird erwartet.

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Organisation:

Offer pattern: 1 Semester (Every Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Subject Didactics Biology III (3 ECTS)

06SM090Bio33 / Module

Description:

General description:

Im Modul Fachdidaktik III wird am Beispiel ausgewählter Unterrichtssituationen oder Unterrichtsthemen das in den Modulen Fachdidaktik I und II erworbene Wissen unter weiterem Einbezug von fachdidaktischer und erziehungswissenschaftlicher Forschung ergänzt und vertieft. Studierende mit zweitem bzw. zusätzlichem Unterrichtsfach erbringen eine zusätzliche Leistung, in welcher das erworbene Wissen im Hinblick auf den Unterricht umgesetzt wird, und buchen daher das Modul mit 4 ECTS Credits.

ECTS: 3

Learning Outcome:

Das Modul III fokussiert im ersten Teil auf Experimente für den Biologieunterricht. In Anlehnung an die Fachleitlinien Zürcher Gymnasien werden klassische und neuartige Schulversuche durchgeführt. Folgende Themen stehen im Fokus: Botanik, Cytologie, Zellstoffwechsel, einzellige Tiere und Wirbellose, Humanbiologie, Genetik, Ökologie und Evolution.

Weitere Themen des Moduls sind: Basiskonzepte der Biologie, Maturitätsprüfungen, Betreuung von Maturaarbeiten und ausserschulische Lernorte.

Merkmale:

Responsible instructor: Dario Meier

Requirements:

Assessment: Portfolio: Schriftlicher und praktischer Leistungsnachweis. Das Modul wird als bestanden bewertet, wenn alle Elemente des Portfolios bestanden sind.
Aktive Teilnahme an der Lehrveranstaltung und regelmässige Präsenz in der Lehrveranstaltung wird erwartet. Teilnahme an der FDIII-Exkursion.

Module Subject Didactics History III (3 ECTS)

06SM090Ge33 / Module

Description:

General description:

Der Kurs geht von einem breiten Verständnis des Politischen aus und zeigt auf, wie historische Bildung immer auch politische Bildung ist und wie Lernende dieses Potential nutzen können, indem sie nach der Gegenwarts- und Zukunftsbedeutung historischer Themen und ihrer Funktionen in der Geschichtskultur fragen.

ECTS: 3

Learning Outcome:

Die Studierenden lernen Kompetenzen, Konzepte und Methoden der politischen Bildung kennen und wenden diese bei der Konzeption von Lerneinheiten im Geschichtsunterricht an. Die Studierenden wenden geschichtswissenschaftliche und fachdidaktische Zugänge zu Gegenwarts- und Zukunftsbedeutung historischen Wissens und zu Geschichtskultur an, um politische und historische Bildung in ein produktives Verhältnis zu setzen.

Merkmale:

Responsible instructor: Thomas Christian Müller

Requirements:

Module Didactics of Economics and Law I: Didactics of the individual subjects

06SM090WiRe1 / Module

Description:

General description:

In den Modulen Fachdidaktik Wirtschaft und Recht I (HS) und Fachdidaktik Wirtschaft und Recht II (FS) werden die fachdidaktischen Grundlagen für den Unterricht im Fach Wirtschaft und Recht am Gymnasium erarbeitet. Der Fokus richtet sich auf den privaten, den beruflich-unternehmerischen sowie den staatsbürgerlichen Lebensbereich, in denen die inhaltlichen und methodischen Besonderheiten der Fachbereiche Betriebswirtschaftslehre (inkl. Rechnungswesen), Volkswirtschaftslehre und Recht behandelt werden. Themen der Vorlesung Fachdidaktik Wirtschaft und Recht I: -Bildungsziele, Kompetenzen, Lehrpläne und Organisationsformen von Wirtschaft und Recht, - Didaktik der Betriebswirtschaftslehre inkl. Rechnungswesen (Ziele, Inhalte, Methoden, Lehrmittel), - Unterrichtsplanung und -durchführung (Übungslektionen an verschiedenen Gymnasien im Grossraum Zürich), - Unterrichtsbeurteilung, -Formative Lernkontrollen. Literatur: - Dubs, Rolf (2014); Unterrichtsplanung in der Praxis, Franz Steiner Verlag. - Dubs, Rolf (2009); Lehrerverhalten. Zürich, SKV, 2. Auflage. - Dubs, Rolf (1999); Unterrichtsvorbereitung, IWP. - Dubs, Rolf (1985); Kleine Unterrichtslehre für den Bereich Wirtschaft, Recht, Staat und Gesellschaft. Zürich, SKV.

ECTS: 3

Notes:

Die Gruppeneinteilung findet in der 1. Veranstaltung statt. Die Fachdidaktik-Ausbildung beginnt zwingend mit dem Modul Fachdidaktik Wirtschaft und Recht I. Ein paralleler Besuch des Moduls Fachdidaktik Wirtschaft und Recht III wird empfohlen.

Learning Outcome:

Die Studierenden sind am Ende der Module Fachdidaktik Wirtschaft und Recht I und Fachdidaktik Wirtschaft und Recht II in der Lage: - die Bedeutung und die verschiedenen Organisationsformen des Fachs Wirtschaft und Recht am Gymnasium zu erklären und zu beurteilen. - die Ziele, Inhalte und Methoden in Wirtschaft und Recht und seinen Teilbereichen zu erläutern, adäquat auszuwählen und im Unterricht einzusetzen. - Unterrichtseinheiten systematisch und kompetenzorientiert zu planen, durchzuführen und zu beurteilen. - den gezielten Einsatz verschiedener Unterrichtsverfahren zu planen, im Unterricht anzuwenden und zu beurteilen. - formative und summative Lernkontrollen zu entwickeln und zu beurteilen.

Module Subject Didactics Economy and Law III

06SM090WiRe3 / Module

Description:

General description:

In dieser Lehrveranstaltung werden für den Unterricht in Wirtschaft und Recht an Mittelschulen und kaufmännischen Berufsfachschulen zentrale Lehr- und Lernformen erarbeitet. In den dazugehörigen Microteachingübungen werden eng eingegrenzte Lehrfertigkeiten, wie Lehrvortrag, unterschiedliche Lehrgespräche und Moderationstechniken in kurzen Übungssequenzen bearbeitet und anschliessend mittels Videoaufnahmen sorgfältig analysiert. Damit soll das persönliche Verhaltensrepertoire der angehenden Lehrpersonen erweitert und die Fähigkeit zur Selbst- und Fremdwahrnehmung verbessert werden. Die Teilnehmerinnen und Teilnehmer sollen - verschiedene Lehr- und Lernstrategien inhalts- und situationsspezifisch anwenden; - das eigene Lehrverhalten kritisch analysieren; - Verbesserungsmöglichkeiten benennen und diese auch umsetzen.

ECTS: 3

Merkmale:

Responsible instructor: Thomas Roland Limacher

Requirements:

Assessment:

Aktive Teilnahme an den Lehrveranstaltungen und regelmässige Präsenz in der Lehrveranstaltung wird erwartet. Für den Erhalt der 3 ECTS ist folgender Leistungsnachweis zu erbringen: Portfolio: Lehrvortrag Alle Studierenden müssen individuell einen Lehrvortrag vorbereiten. Dieser beinhaltet eine schriftliche Vorbereitung sowie dessen Präsentation. Wird der Lehrvortrag nicht fristgerecht eingereicht, besteht kein Anspruch auf Überarbeitung der Sequenz. Bei fristgerechter Abgabe besteht die einmalige Überarbeitungsmöglichkeit. Portfolio: Lehrgespräch Alle Studierenden müssen individuell ein Lehrgespräch vorbereiten. Dieses beinhaltet eine schriftliche Vorbereitung sowie dessen Durchführung. Wird das Lehrgespräch nicht fristgerecht eingereicht, besteht kein Anspruch auf Überarbeitung der Sequenz. Bei fristgerechter Abgabe besteht die einmalige Überarbeitungsmöglichkeit. Portfolio: Moderation Die dritte Sequenz zur Moderation wird im Teamteaching abgehalten. Es muss eine Moderationsequenz vorbereitet und durchgeführt werden. Wird die Moderation nicht fristgerecht eingereicht, besteht kein Anspruch auf Überarbeitung der Sequenz. Bei fristgerechter Abgabe besteht die einmalige Überarbeitungsmöglichkeit. Das Modul wird als bestanden bewertet, wenn alle drei Elemente des Portfolios bestanden sind.

Module KRI 103 Chemical Crystallography practical course

07SMKRI103 / Praktikum

Description:

General description:

Practical aspects of crystallography, including gaining experience in different crystal growth methods, experience with data collection at single crystal X-ray diffractometers and/or refinement of crystal structures in the laboratories of the lecturers. The basic concepts and procedures will be based on some standard samples and examples, but the work will include material from some current projects ongoing in the lecturers' groups.

ECTS: 2

Notes:

Interested students should get in touch with Prof. Bernhard Spingler before the start of the semester.

Learning Outcome:

Extension of the content of KRI 101 with practical examples, which show how the technique of small-molecule crystallography is used in science.

Languages of Instruction:

German and/or English

Course Materials:

Crystal growth: work will be done mainly in the lab and at the diffractometer.
Data collection: will be done at one of the single crystal diffractometers in the Department of Chemistry.
Refinement of crystal structures: work will be done mostly at the computer

Merkmale:

Target Group: Suitable for English Speakers

Module Subject Didactics German III (3 ECTS)

06SM090De33 / Module

Description:

General description:

Im Modul Fachdidaktik III wird am Beispiel ausgewählter Unterrichtssituationen oder Unterrichtsthemen das in den Modulen Fachdidaktik I und II erworbene Wissen unter weiterem Einbezug von fachdidaktischer und erziehungswissenschaftlicher Forschung ergänzt und vertieft. Studierende mit zweitem bzw. zusätzlichem Unterrichtsfach erbringen eine zusätzliche Leistung, in welcher das erworbene Wissen im Hinblick auf den Unterricht umgesetzt wird, und buchen daher das Modul mit 4 ECTS Credits.

ECTS: 3

Merkmale:

Responsible instructor: Susanne Balmer

Requirements:

Prerequisites: Fortgeschrittenes Fachstudium

Assessment: Übungen, Lektüre von Fachtexten, dokumentierte praktische Arbeit. Der Leistungsausweis besteht aus einem Portfolio, das regelmässig zu führen ist und unterschiedliche Aufgaben umfasst. Das Modul wird als bestanden bewertet, wenn alle Elemente des Portfolios vorhanden sind und den Anforderungen entsprechen. Aktive Teilnahme an der Lehrveranstaltung und regelmässige Präsenz in der Lehrveranstaltung wird erwartet.

06SM090Geo33 / Module

Description:

General description:

Im Modul Fachdidaktik III wird am Beispiel ausgewählter Unterrichtssituationen oder Unterrichtsthemen das in den Modulen Fachdidaktik I und II erworbene Wissen unter weiterem Einbezug von fachdidaktischer und erziehungswissenschaftlicher Forschung ergänzt und vertieft. Studierende mit zweitem bzw. zusätzlichem Unterrichtsfach erbringen eine zusätzliche Leistung, in welcher das erworbene Wissen im Hinblick auf den Unterricht umgesetzt wird, und buchen daher das Modul mit 4 ECTS Credits. Die Fachdidaktik Geographie III ermöglicht eine vertiefte, anwendungsorientierte Auseinandersetzung in Bezug auf den Geographie- Unterricht. In der Veranstaltung liegt der Fokus auf ausgewählten Fallbeispielen, die von den Studierenden geplant, durchgeführt und evaluiert werden.

ECTS: 3

Notes:

Die Modulbuchung gilt als Anmeldung.

Learning Outcome:

Sie lernen: - das Implementieren von Kompetenzen, die für eine Beteiligung an einer nachhaltigen Entwicklung nötig sind, - die Bedeutung von Medienkompetenz im Geographieunterricht kennen und gewinnbringend einzusetzen, - wie Medien zur Veranschaulichung von Inhalten im Geographieunterricht eingesetzt und lernwirksam genutzt werden können, - Unterrichtssequenzen effizient zu planen, lernwirksam umzusetzen und kritisch zu reflektieren, - wie forschend-entdeckendes Lernen in den Schulalltag integriert werden kann.

Merkmale:

Responsible instructor: Julia Rafflenbeul Herren

Requirements:

Prerequisites: Abgeschlossenes Modul «FD Geographie I». Der Kurs FD Geografie III kann parallel zu FD Geographie II besucht werden.

Assessment: Portfolio: Vorstellen von Unterrichtseinheiten (BNE, Kartenkompetenz, Forschend-entdeckendes Lernen), vollständige Dokumentation und Präsentation der Übungslektionen. Das Modul wird als bestanden bewertet, wenn alle vier Elemente des Portfolios bestanden sind. Aktive Teilnahme an der Lehrveranstaltung und regelmässige Präsenz in der Lehrveranstaltung wird erwartet. ---

Module Educational Psychology

06SM222PPM / Module

Description:

General description:

Das Verständnis sowie die gezielte Förderung individueller Lernprozesse von Jugendlichen sind zentrale Bestandteile der professionellen Handlungskompetenz von Lehrpersonen. In der Vorlesung werden zentrale Themen der Pädagogischen Psychologie und der Entwicklungspsychologie behandelt. Die Teilnehmenden setzen sich u.a. mit Lern- und Motivationstheorien sowie den spezifischen Entwicklungsaufgaben und -herausforderungen von Jugendlichen auseinander. Auf dieser Grundlage werden praxisnahe Handlungsansätze für die Gestaltung von Lehr- und Lernprozessen entwickelt, die den Erwerb fachlicher und überfachlicher Kompetenzen gezielt unterstützen. Die Teilnehmenden reflektieren eigene Erfahrungen, analysieren konkrete Unterrichtssituationen und erarbeiten Strategien, um Lernprozesse individuell, entwicklungsangemessen und wirksam zu begleiten. Ziel ist es, die eigene professionelle Haltung weiterzuentwickeln und evidenzbasierte Strategien für die Entwicklung von Jugendlichen an Maturitätsschulen zu erwerben.

ECTS: 4

Notes:

Das Modul ist als Präsenzveranstaltung geplant. Es werden nur einzelne Sequenzen ggf. nachträglich als Videocast zur Verfügung gestellt. Bitte beachten Sie, dass die Inhalte der Videocasts nicht alle Inhalte, Erarbeitungen und Gespräche aus der Präsenzveranstaltung umfassen.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Yves Karlen

Requirements:

Assessment: Der Leistungsnachweis setzt sich aus verschiedenen Teilaufgaben zusammen. Daraus entsteht ein Portfolio. Dieses besteht aus mehreren Lernlandkarten, Reflexionen, Prinzipien für den Unterricht sowie einem Literaturverzeichnis. Das Modul gilt als bestanden, wenn alle Elemente des Portfolios bestanden wurden.

Module We Don't Learn for School, We Learn for Competence. Competence Orientation in School and Vocational Education
06SM222CB / Module

Description:

General description:

Der Kompetenzbegriff ist in der Diskussion um Ziele von Schule und der Berufsbildung nicht mehr wegzudenken. In diesem Seminar wird die Entwicklung zur Kompetenzorientierung in Lehrplänen und im Unterricht auf verschiedenen Schulstufen und der beruflichen Bildung einer vertieften, kritischen Betrachtung unterzogen. Ausgehend von der Diskussion um kompetenzbasierte Bildungsstandards im allgemein bildenden Bereich wird analysiert, wie sich die Tendenz zur Kompetenzorientierung im schulischen und im beruflichen Bereich in Wissenschaft und Praxis niederschlägt. Lerninhalte: Curriculumentwicklung, kompetenzbasierte Bildungsstandards und Kompetenzorientierung sowie ihre Umsetzung in verschiedenen Domänen und auf verschiedenen Schulstufen des allgemein bildenden und des beruflichen Bereichs.

ECTS: 3

Merkmale:

Responsible instructor: Anna-Katharina Praetorius

Requirements:

Assessment: Wöchentliche schriftliche Übungen

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Organisation: Institute of Education

Offered in:

Module ESS 110 Principles of Geology

07SMESS110 / Lecture with Practical Exercises

Description:

General description:

Alle Informationen werden im Vorlesungsverzeichnis der ETH publiziert. Die Angaben zu Unterrichtszeiten, Gruppen, Übungen usw. im ETH-Vorlesungsverzeichnis (<https://www.vvz.ethz.ch/Vorlesungsverzeichnis/sucheLehrangebotPre.view?lang=de>) sind verbindlich.

ECTS: 11

Notes:

Die Modulbuchung findet über die ETH statt.

UZH-Studierende müssen sich an der ETH vorgängig als Fachstudierende (<https://ethz.ch/de/studium/non-degree-angebote/fachstudierende/fachstudierende-uzh.html>) einschreiben.

ESS 110 ist ein Jahreskurs bestehend aus den Veranstaltungen:

Lehrveranstaltungsnummer ETH: 651-3001-00L Dynamische Erde I (HS)

Lehrveranstaltungsnummer ETH: 651-3002-00L Dynamische Erde II (FS)

Target Groups:

BSc-Studierende der Erdwissenschaften

Merkmale:

Responsible instructor: Benedikt Korf

Requirements:

Assessment: The information regarding assessments and examinations in the ETH course catalogue is binding.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 2 Semesters (Begins in Fall Semester)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Organisation: Department of Geography

Module Elective Module: Ethics and Law in medicine

04SM90MAS420 / Sonstiges

Description:

General description:

Studierende der Medizin und der Rechtswissenschaften erarbeiten und diskutieren gemeinsam Kenntnisse zu ethischen und rechtlichen Aspekten ausgewählter Themenbereiche der Medizin und Biowissenschaften und üben zugleich ihrer Fähigkeiten in der kritischen Reflexion und im Argumentieren.

ECTS: 4

Notes:

Die Anmeldung für RWF Studierende erfolgt über das normale Modulbuchungstool der UZH.

Learning Outcome:

Die Studierenden...

- kennen die wichtigsten theoretischen Ansätze zum Gesundheits- und Krankheitsbegriff sowie die zentralen ethischen Aspekte des Themas
- sind vertraut mit den ethischen Aspekten der wichtigsten Forschungsfelder (seltene Krankheiten, Tierversuche, Genomdaten/Biobanken)
- erarbeiten die wichtigsten ethischen Grundsätze und rechtlichen Normen im Umgang
- mit urteilsunfähigen und urteilsunmündigen Menschen,
- mit der menschlichen Leiche,
- mit Ressourcenknappheit und Fragen der Ressourcenverteilung,
- mit Pandemien

Target Groups:

Studierende der Human- und Zahnmedizin des zweiten, dritten und vierten Studienjahres, Masterstudierende der Rechtswissenschaftlichen Fakultät, (Doktoranden im Doktoratsprogramm Biomedical Ethics and Law, siehe Hinweise)

Merkmale:

Responsible instructor: Nikola Biller-Andorno

Requirements:

Prerequisites:

Platzvergabekriterien:

Studierende welche folgende Kriterien erfüllen, haben Vorrang bei der Platzvergabe. Nach absteigender Relevanz sortiert:

- Einschreibung auf Master
- Studierende im 1. Studienjahr
- Einschreibung auf Bachelor oder Bachelor-Klinische Semester oder Master-Vorbereitungsphase
- Studierende im 3. Studienjahr
- Studierende im 2. Studienjahr

Module BIO 378 Research Internship in Systematic Botany

07SMBIO378 / Praktikum

Description:

General description:

Research internships are done in the research groups of the Institute of Systematic and Evolutionary Botany. Students will perform a short research project on a topic of their choice. They will use methods currently employed in the research group, analyze the data and write a short report. Both field work and lab/greenhouse based work is possible.

Topic and details are to be agreed upon with the individual advisors.

Please contact the module leader if you are interested in performing a research internship.

ECTS: 4

Notes:

Duration: 4-12 weeks, equivalent to 4-12 ECTS credits

Target Groups:

Students in the Bachelor's program (cf. Biology Guide)

Languages of Instruction:

German and English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Florian P. Schiestl

Requirements:

Prerequisites:

Completed basic studies in biology

Assessment:

Submission of a report at the end of the module. In English or German.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Semester)

Dates/Times/Deadlines:

Spring / Summer semester break

Booking Deadline/Period:

not bookable

Cancellation Deadline:

not cancelable

Module BIO 344 Development of the Nervous System

07SMBIO344 / Course

Description:

General description:

The lecture will cover molecular and cellular processes underlying the development of the nervous system in health and disease. We will discuss different aspects of neural circuit formation, starting with neurogenesis, differentiation, cell migration, and cell death. A major focus will be on neural circuit formation (including axon growth and guidance, synapse formation and homeostasis). The importance of these processes in the context of developmental diseases will be discussed.

ECTS: 3

Learning Outcome:

On successful completion of the module the student should be able to

- relate structure and function of the nervous system to its development
- apply principles of molecular, cellular, and developmental biology to the development of the nervous system
- identify key steps in development underlying neurological syndromes and diseases

Key skills On successful completion of the module the student should be able to

- interpret and critically evaluate original research reports
- apply knowledge and relate experimental approaches from molecular, cellular and developmental biology to the developing nervous system

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Esther Stoeckli

Requirements:

Prerequisites:

Basic knowledge in neurobiology is required, for instance successful completion of BIO143 or equivalent lecture

Assessment:

Written exam 90 min (English) in January, repetition exam in February

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module Lesson Shadowing

06SM090BPEP / Module

Description:

General description:

Das Hospitationspraktikum ist Bestandteil der berufspraktischen Ausbildung zur Lehrperson an Maturitätsschulen und ist am Anfang des Studiums - in der Regel im ersten Semester und in Kombination mit dem Modul "Allgemeine Didaktik" und/oder "Pädagogische Psychologie" - zu absolvieren (vgl. Studienordnung LfM § 31).

ECTS: 1

Notes:

Das Hospitationspraktikum wird als Anfragemodul geführt. Bitte beachten Sie die entsprechenden Buchungs- und Stornierungsfristen (siehe <https://www.phil.uzh.ch/de/studium/termine.html>). Der Hospitationsplatz wird ab Mitte März (FS) / Mitte Oktober (HS) von der Administration LLBM organisiert. Die Teilnehmenden werden per E-Mail (uzh-Mail) informiert.

Der Hospitationsbericht hat inhaltliche und formale Kriterien zu erfüllen, diese sind im Merkblatt zum Hospitationspraktikum (siehe <https://www.lehrdiplom.uzh.ch>) festgehalten.

Weitere Informationen sowie die Wegleitung zum Hospitationspraktikum finden sich unter <https://www.lehrdiplom.uzh.ch>

Learning Outcome:

Im Hospitationspraktikum betrachten die Studierenden in Kenntnis bereits erarbeiteter theoretischer Inhalte den Unterricht aus der Perspektive der Beobachterin bzw. des Beobachters. Ziel des Hospitationspraktikums ist es, die eigene berufliche Orientierung und den Rollenwechsel zur Lehrperson in der Praxis zu reflektieren.

Module UWW 200 Master Thesis

07SMUWW200 / Master Paper / MA-Arbeit MNF

Description:

ECTS: 60

Target Groups:

Master students of the Specialized MSc Program in Quantitative Environmental Science

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Jordi Bascompte

Requirements:

Assessment:

Master thesis presentation/defense in English

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

2 Semesters (Begins in Fall Semester)

Booking Deadline/Period:

not bookable

Cancellation Deadline:

not cancelable

Organisation:

Inst. f. Evolutionsbiol. u. Umweltwiss.

Offered in:

Fall Semester 2027

Module Subject Didactics Mathematics III (3 ECTS)

06SM090Mat33 / Module

Description:

General description:

Im Modul Fachdidaktik III wird am Beispiel ausgewählter Unterrichtssituationen oder Unterrichtsthemen das in den Modulen Fachdidaktik I und II erworbene Wissen unter weiterem Einbezug von fachdidaktischer und erziehungswissenschaftlicher Forschung ergänzt und vertieft. Studierende mit zweitem bzw. zusätzlichem Unterrichtsfach erbringen eine zusätzliche Leistung, in welcher das erworbene Wissen im Hinblick auf den Unterricht umgesetzt wird, und buchen daher das Modul mit 4 ECTS Credits.

ECTS: 3

Merkmale:

Responsible instructor: Benedikt Binotto

Requirements:

Assessment: Schriftliche Übungen. Aktive Teilnahme an den Lehrveranstaltungen und regelmässige Präsenz in der Lehrveranstaltung wird erwartet.

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Small Animal Anaesthesia: Stand by Duty

05SMW011 / Praktikum

Description:

General description:

Praktische Anwendung der Anästhesie beim Kleintier nachts und am Wochenende.
Die Studierenden werden bei Bedarf durch die Klinik aufgeboten

ECTS: 1

Learning Outcome:

Selbstständiges Durchführen einer Inhalationsanästhesie beim Kleintier

Target Groups:

Masterstudierende Veterinärmedizin

Course Materials:

Skript allgemeine Anästhesie und Anästhesiologie beim Kleintier

Merkmale:

Responsible instructor:

Regula Bettschart-Wolfensberger

Requirements:

Prerequisites:

Lösen der bereitgestellten Casus-Fälle in Anästhesie.
5 Tage Einarbeitung in der Abteilung für Anästhesie.
Die Gruppe muss den Pikettdienst während des ganzen Jahres (inkl. vorlesungsfreier Zeit) abdecken.

Prior Knowledge:

Skript allgemeine Anästhesie und Anästhesiologie beim Kleintier

Assessment:

Teilnahme während 4 Semestern: 2 CP

Module BIO 269 Research Internship in Paleontology (in the research groups 4- 12 weeks)

07SMBIO269 / Praktikum

Description:

General description:

Research internships are carried out at the Department of Palaeontology. Schedule and details of the final assessment will be settled individually with the responsible internship manager. As indicated in the biology guidelines, these research internships are aimed at students in the Bachelor's degree program and expressly not at students in the Master's degree program.

ECTS: 4

Notes:

Duration of research internship: 4-12weeks corresponding to 4-12 ECTS-points.

Target Groups:

Studierende im Bachelor-Studiengang (vgl. Wegleitung Biologie).

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Elke Schneebeil

Requirements:

Assessment:

Final report in German or English, which will be graded. Short presentation optional.

Grading Scale:

Module Subject Didactics Spanish I

06SM090Spa1 / Module

Description:

General description:

Die Module Fachdidaktik I und II geben den Studierenden einen Überblick über die vielfältigen Themen und Methoden des Unterrichts in den einzelnen Unterrichtsfächern an Maturitätsschulen. Die Schwerpunkte der beiden Module liegen dabei auf der Umsetzung allgemeindidaktischer und fachdidaktischer Erkenntnisse im Unterricht an Maturitätsschulen. Die Studierenden lernen Theorie und Praxis im Unterricht zu verbinden, verschiedene Unterrichtsmethoden und -mittel einzusetzen sowie ihren Unterricht zu planen, durchzuführen und zu reflektieren.

ECTS: 3

Notes:

Es wird empfohlen, die Module Fachdidaktik II und III im selben Semester zu besuchen.

Languages of Instruction:

Spanisch

Merkmale:

Responsible instructor: Francisca Ruiz Gonzalez

Requirements:

Prerequisites:

Nachweis über den absolvierten Fremdsprachenaufenthalt (Dauer: mind. 26 Wochen). Los estudiantes que deseen participar en este curso tendrán que reunir los siguientes requisitos: - haber cursado un mínimo de siete semestres de estudios universitarios, - haber asistido - o estar asistiendo paralelamente - a los cursos de introducción a la didáctica, - haber realizado una estancia con fines de estudios en un país de lengua hispana (mínimo 6 meses). Además de la presencia regular en las clases a partir de la primera sesión, se exige la observación e impartición de un número determinado de lecciones en institutos de enseñanza secundaria. Como preparación para el módulo I los estudiantes tienen que tener a disposición el libro Enseñar español. Conocimientos básicos de didáctica (ELE) de Klett que se irá leyendo a lo largo del curso o Kathrin Sommerfeldt, Spanisch Methodik de Cornelsen.

Assessment:

Referat, praktische Arbeit. Aktive Teilnahme an den Lehrveranstaltungen und regelmässige Präsenz in der Lehrveranstaltung wird erwartet.

Grading Scale:

Pass/Fail

Module Subject Didactics Chemistry III: Experiments in Teaching Chemistry

06SM090Ch3 / Module

Description:

General description:

Im Modul Fachdidaktik III wird am Beispiel ausgewählter Unterrichtssituationen oder Unterrichtsthemen das in den Modulen Fachdidaktik I und II erworbene Wissen unter weiterem Einbezug von fachdidaktischer und erziehungswissenschaftlicher Forschung ergänzt und vertieft.

ECTS: 2

Notes:

Die Modulbuchung für Fachdidaktik III erfolgt über die UZH. Alle eingereichten Dokumente werden standardmässig auf Plagiate überprüft.

Learning Outcome:

Der Chemie-Unterricht lebt von Experimenten. Die Studierenden können - Experimente sicher und überzeugend demonstrieren, - theoretische Konzepte mit Experimenten erfahrbar machen, - Theorie und Praxis miteinander verbinden.

Merkmale:

Responsible instructor: Lorenz David Marti

Requirements:

Assessment: Portfolio: Referat, schriftliche Arbeit, praktische Arbeit. Das Modul wird als bestanden bewertet, wenn alle Elemente des Portfolios bestanden sind. Regelmässige Präsenz in der Lehrveranstaltung und aktive Teilnahme wird erwartet.

Module BCH 420 Advanced Protein Engineering

07SMBCH420 / Course

Description:

General description:

Proteins have become an object of intense study in modern science, ranging from their use as therapeutics to elucidating their structure and function in the cell. Moreover, it is now possible to engineer and evolve tailor-made proteins, opening up many new areas of science. This course will attempt to cover the frontiers and remaining challenges, emphasizing the biochemical foundations of the various approaches

ECTS: 2

Learning Outcome:

To understand current research strategies in protein science

Target Groups:

Students during Master studies Biochemistry, Chemistry and Biology as well as PhD students in Biochemistry

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Andreas Plückthun

Requirements:

Prerequisites:

Bachelor in Biochemistry, Chemistry or Biology

Assessment:

Accreditation is dependent on:

- Presenting an assigned paper in the course of the lecture
- A 1 hour written examination.

To obtain the credit points minimally a grade of 4 has to be obtained.

Additional tasks are not graded, but are highly recommended for successful completion of the module:

- Attending the lectures on a regular basis

Details regarding the examination will be given by the person responsible for the module at the start of the course.

The examination can be repeated once at the next module examination date or by agreement.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module BIO 430 Immunology

07SMBIO430 / Block Course

Description:

General description:

This practical course is centered on the learning of current immunological techniques applied in basic and medical immunology. The course addresses aspects of the immune system related to transplantation medicine, allergology, infectiology, autoimmune diseases and cancer.

Students will perform various experiments, such as Mantoux skin tests, cytokine ELISPOT, mixed-lymphocyte reaction, IgE sensitivity assay and flow cytometry analysis. The course covers tutorials, experiments, demonstrations and lectures. We expect a solid background understanding of Immunobiology (Text book knowledge) Attendance of the ETH courses Immunology I (551-0317-00L) and Immunology II (551-0318-00L) are strongly recommended before signing up for this course.

ECTS: 6

Notes:

DIE ANMELDUNG FÜR DIE BLOCKKURSE ERFOLGT UNTER <https://www.mybiportal.uzh.ch>

Learning Outcome:

By the end of this course, the students will be able to: - use flow cytometric methods to analyze immunogenetic defects - perform solid- phase analysis of soluble substances in blood, plasma and cell extracts

- perform analysis of different cell death processes in mammalian cells
- perform measurements of systemic immunodeficiencies with the help of rejection reactions, cytokine production, glucose-tolerance test and cell proliferation - explain principals of transplantation-tolerance, autoimmunity, anti-viral and -microbial immune responses - describe the development of vaccines

Key skills: By the end of this course the students will be able to: - recognize the connection between a specific addressed question and the appropriate experimental approach to this question - independently analyze and present acquired raw data - independently execute a scientific protocol - name the most important points of a scientific analysis report and independently write such a report

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Burkhard Becher

Requirements:

Prerequisites:

We expect a solid background understanding of Immunobiology (Text book knowledge Janeway ISBN-10: 0815345305 or Kuby ISBN-10: 1464137846) Attendance of the ETH courses Immunology I (551-0317-00L) and Immunology II (551-0318-00L) are strongly recommended before signing up for this course.

Assessment:

- Practical protocol (graded) 50 %
- Multiple Choice test (graded) 50 %

Module BIO 331 Frontiers in Animal Behaviour

07SMBIO331 / Course

Description:

General description:

We present recent topics in Animal Behaviour and discuss them within an evolutionary framework. The topics cover research questions in the fields of cooperation and competition, etho-eco-physiology, sociogenetics, communication, social cognition and conservation biology.

ECTS: 2

Learning Outcome:

At the end of the module the students will have the following competences

- appreciate current important and new concepts in animal behaviour
- summarise and critically analyse the theoretical basis of a scientific controversy
- discuss the results of a scientific project in a broader context

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Marta Manser

Requirements:

Prerequisites:

Basic studies completed

Assessment:

Weekly short essays (in writing; open book exam) on the topic of last weeks' lecture. To pass, students have to hand in at least 10 essays, and will need a total of 7 positively evaluated essays. In English

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline:

from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Organisation:

Inst. f. Evolutionsbiol. u. Umweltwiss.

Offered in:

Fall Semester 2027
Fall Semester 2026
Fall Semester 2025

Module GEO 512 Master Exam September

07SMGEO512 / Prüfung ohne Lehrveranstaltung

Description:

ECTS: 2

Target Groups:

MSc-Studierende

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Benedikt Korf

Requirements:

Assessment:

Presentation of the Master's Thesis; oral examination; graded on a scale of 1 to 6 in quarter-point increments. Both assessed components (GEO 510/511 Master's Thesis and GEO 512 Master's Exam) must be passed. If either component is not passed, the module must be repeated.

Language of examination: German or English

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Spring Semester)

Booking Deadline/Period:

from We 12.08.2026 10:00 to Mo 24.08.2026 24:00

Cancellation Deadline:

from We 12.08.2026 10:00 to Fr 11.09.2026 24:00

Module CHE 111 Basic Laboratory Course in Chemistry, Part 1

07SMCHE111 / Praktikum

Description:

General description:

Introductory laboratory course with a focus on the training of fundamental laboratory techniques as well as on experiments in general and inorganic chemistry

ECTS: 8

Notes:

Booking of the module is required!

You attend only one of the two groups (Tue/Thu OR Wed/Fri) and the experiments in physical chemistry.

The allocation of the groups will be done at the introductory presentation. After the introduction, acceptance into the course is only possible in exceptional cases (regardless of the booking deadline)! Participation in the introduction and all afternoons of the lab course during the semester is mandatory!!

FOR QUESTIONS ALWAYS USE: gpc@chem.uzh.ch

Learning Outcome:

- Knowledge and application of fundamental chemical laboratory techniques
- Fundamental knowledge in documentation of scientific experiments
- Knowledge in safe handling of chemicals and chemical reactions
- In-depth knowledge of basic chemical principles based on experiments conducted by the students

Target Groups:

First-year students in Chemistry, and Chemistry and Business Studies

Languages of Instruction:

Instructions in English, Teaching in German or English (depending on the group)

Course Materials:

Instructions for experiments, lab journal, further material according to lists.

Merkmale:

Responsible instructor:

Greta R. Patzke

Requirements:

Prior Knowledge:

none; favorably taken together or after CHE 101 or CHE 170

Assessment:

Presence, execution and documentation of all experiments as well as fulfilling the performance goals and deadlines according to the instructions.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: Booking of the module is required.
The compulsory introduction takes place before the semester.
The definitive allocation of the groups will be done at the introductory presentation.
Booked students who do not attend this introduction will be assigned to the different groups according to free spots.
Students who are unable to book properly, for example because they have not yet received access to the booking tool, can register directly at the obligatory introductory event and make the booking later.

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Su 11.10.2026 24:00

Module INI 401 Introduction to Neuroinformatics

07SMINI401 / Lecture with Practical Exercises

Description:

General description:

The course provides an introduction to the functional properties of neurons. Particularly the description of membrane electrical properties (action potentials, channels), neuronal anatomy, synaptic structures, and neuronal networks. Simple models of computation, learning, and behavior will be explained. Some artificial systems (robot, chip) are presented.

This course considers the structure and function of biological neural networks at different levels. The function of neural networks lies fundamentally in their wiring and in the electro-chemical properties of nerve cell membranes. Thus, the biological structure of the nerve cell needs to be understood if biologically-realistic models are to be constructed. These simpler models are used to estimate the electrical current flow through dendritic cables and explore how a more complex geometry of neurons influences this current flow. The active properties of nerves are studied to understand both sensory transduction and the generation and transmission of nerve impulses along axons. The concept of local neuronal circuits arises in the context of the rules governing the formation of nerve connections and topographic projections within the nervous system. Communication between neurons in the network can be thought of as information flow across synapses, which can be modified by experience. We need an understanding of the action of inhibitory and excitatory neurotransmitters and neuromodulators, so that the dynamics and logic of synapses can be interpreted. Finally, the neural architectures of feedforward and recurrent networks will be discussed in the context of co-ordination, control, and integration of sensory and motor information in neural networks.

ECTS: 6

Notes:

The administration is carried out at the ETH. UZH students who want to book the course must register at ETH as special students and book the course at ETH (link to registration on the next page).

Languages of Instruction:

English

Module INI 404 Neuromorphic Engineering I

07SMINI404 / Lecture with Practical Exercises

Description:

General description:

This course covers analog circuits with emphasis on neuromorphic engineering: MOS transistors in CMOS technology, static circuits, dynamic circuits, systems (silicon neuron, silicon retina, motion circuits) and an introduction to multi-chip systems. The lectures are accompanied by weekly laboratory sessions.

Neuromorphic circuits are inspired by the organizing principles of biological neural circuits. Their computational primitives are based on physics of semiconductor devices. Neuromorphic architectures often rely on collective computation in parallel networks. Adaptation, learning and memory are implemented locally within the individual computational elements. Transistors are often operated in weak inversion (below threshold), where they exhibit exponential I-V characteristics and low currents. These properties lead to the feasibility of high-density, low-power implementations of functions that are computationally intensive in other paradigms. Application domains of neuromorphic circuits include silicon retinas and cochleas for machine vision and audition, real-time emulations of networks of biological neurons, and the development of autonomous robotic systems. This course covers devices in CMOS technology (MOS transistor below and above threshold, floating-gate MOS transistor, phototransducers), static circuits (differential pair, current mirror, transconductance amplifiers, etc.), dynamic circuits (linear and nonlinear filters, adaptive circuits), systems (silicon neuron, silicon retina and cochlea) and an introduction to multi-chip systems that communicate events analogous to spikes. The lectures are accompanied by weekly laboratory sessions on the characterization of neuromorphic circuits, from elementary devices to systems.

ECTS: 6

Notes:

Registration in this class requires the permission of the instructors.

Class size will be limited to available lab spots. Preference is given to students that require this class as part of their major.

The administration is carried out at the ETH. UZH students who want to book the course must register at ETH as special students and book the course at ETH.

The link to the registration can be found on the next page.

Learning Outcome:

Understanding of the characteristics of neuromorphic circuit elements.

Target Groups:

Particular: The course is highly recommended for those who intend to take the spring semester course 'Neuromorphic Engineering II', that teaches the conception, simulation, and physical layout of such circuits with chip design tools. Prerequisites: Background in basics of semiconductor physics helpful, but not required.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Giacomo Indiveri

Requirements:

Assessment:

Oral exam (20 min.), successful completion of lab exercises

Each student attends one lab session per week. Mandatory labs and scores: We will drop your 3 lowest lab grades, but you must successfully complete the first 3 labs, which are mandatory. In addition, you are required to attend at least one of the last 2 labs.

Students, who don't fulfil these conditions, must deregister from the final exam (at ETH), otherwise it would be decreed "broken off". The final grade is based 70% on exam and 30% on lab exercises.

Grading Scale: 1-6 Quarter Grades Given

Module INI 702 Journal Club

07SMINI702 / Colloquium

Description:

General description:

The Neuroinformatics Journal club is a weekly meeting during which students present current research papers. The presentation is followed by a general discussion.

All topics concern neural computation and their implementation in biological or artificial systems.

ECTS: 2

Notes:

The journal club course includes two mandatory lectures as part of a two-session workshop on how to prepare and deliver effective scientific presentations, with a focus on short 10-minute talks for an audience with a highly interdisciplinary background

Learning Outcome:

The Neuroinformatics Journal club aims to train students to present cutting-edge research clearly and efficiently. It leads students to learn about current topics in neurosciences and neuroinformatics, to search the relevant literature and to critically and scholarly appraise published papers. The students learn to present complex concepts and answer critical questions.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Giacomo Indiveri

Requirements:

Assessment:

The credits are given after presentation of at least one journal article

Grading Scale:

Module INI 502 Basics of instrumentation, measurement, and analysis

07SMINI502 / Lecture with Practical Exercises

Description:

General description:

Experimental data are always as good as the instrumentation and measurement, but never any better. This course provides the very basics of instrumentation relevant to neurophysiology and neuromorphic engineering, it consists of two parts: a common introductory part involving analog signals and their acquisition (Part I), and a more specialized second part (Part II).

ECTS: 4

Notes:

Organised individually.

Registration in this class requires the permission of the instructors.

Class size will be limited to available lab spots. Preference is given to students that require this class as part of their major.

Learning Outcome:

The goal of Part I is to provide a general introduction to the signal acquisition process. Students are familiarized with basic lab equipment such as oscilloscopes, function generators, and data acquisition devices. Different electrical signals are generated, visualized, In Part II, the students are divided into small groups to work on individual measurement projects according to availability and interest. Students single-handedly solve a measurement task, making use of their basic knowledge acquired in the first part. Various signal sources will be provided. filtered, digitized, and analyzed using Matlab (Mathworks Inc.) or Labview (National Instruments).

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Shih-Chii Liu

Requirements:

Assessment:

Ungraded semester performance

Repetition: Re-enrolment required

For each part, students must hand in a written report and present a live demonstration of their measurement setup to the respective supervisor. The supervisor of Part I is the teaching assistant, and the supervisor of Part II is task specific. Admission to Part II is conditional on completion of Part I (report + live demonstration). Reports must contain detailed descriptions of the measurement goal, the measurement procedure, and the measurement outcome. Either confidence or significance of measurements must be provided. Acquisition and analysis software must be documented.

Module Regulation of Cardiovascular Function: Introduction to Human Physiology

07SMZIHP / Block Course

Description:

General description:

In the morning, you will receive a theoretical overview of cardiovascular physiology, focusing on the context that will help you to better understand your practical experiments. In the afternoon, you will perform the following practical work: Measuring blood pressure, pulse wave and blood flow velocity as well as recording an electrokardiogram (EKG). Furthermore, we will perform a real-time echocardiography (heart ultrasound) demonstration for you.

ECTS: 1

Notes:

- The course is open to all PhD students
- Students of the PhD Program Biomedicine (BioMed) and students of the Institute of Physiology have priority.
- To be taken during the first year of the PhD
- Lecture (morning) and practical work (afternoon)
- 12 participants max.
- Registration: by e-mail to andrea.schmitz@uzh.ch until 3 weeks before the course starts

Languages of Instruction:

Englisch

Course Materials: to be announced

Module GEO 771 Introduction to information literacy

07SMGEO771 / Block Course

Description:

General description:

Für BSc- & MSc- Studierende der UZH:

- Hauptfachstudierende der Geographie müssen GEO 186 belegen.

ECTS: 1

Notes:

Findet im Februar in der Woche 07 von Montag bis Mittwoch von 9:00-17:00 Uhr statt.

- Nicht für HF- Geographie Studierende! => Darf nicht mit GEO 186 gebucht werden!

Der genaue Ablauf wird zu Beginn der Vorlesungszeit vom Modulverantwortlichen bekanntgegeben und den aktuellen BAG-Bestimmungen angepasst

Die Agenda 2030 der Vereinten Nationen (UNO) umfasst 17 Ziele für nachhaltige Entwicklung (Sustainable Development Goals, SDGs (<https://sdgs.un.org/goals>)), die von allen UN-Mitgliedstaaten verabschiedet wurden. Sie bilden einen gemeinsamen Rahmen zur Förderung von sozialer Gerechtigkeit, Umweltschutz und wirtschaftlicher Entwicklung weltweit.

Behandelt werden in diesem Modul insbesondere: 4

Learning Outcome:

Informationsbedarf erkennen und beschreiben, Informationen suchen, finden, beurteilen, auswählen und organisieren. Die Teilnehmenden kennen geeignete Informationsquellen und relevante Fachbegriffe für ihre Recherchen. Sie können die verschiedenen Informationsquellen vergleichen und beurteilen. Sie wissen, wie sie in Bibliothekskatalogen, Datenbanken, elektronischen Zeitschriften und im Internet Informationen finden.

Languages of Instruction:

Deutsch

Course Materials: Es wird ein Foliensatz abgegeben.

Module Subject Didactics Latin III (3 ECTS)

06SM090Lat33 / Module

Description:

General description:

Im Modul Fachdidaktik III wird am Beispiel ausgewählter Unterrichtssituationen oder Unterrichtsthemen das in den Modulen Fachdidaktik I und II erworbene Wissen unter weiterem Einbezug von fachdidaktischer und erziehungswissenschaftlicher Forschung ergänzt und vertieft. Studierende mit zweitem bzw. zusätzlichem Unterrichtsfach erbringen eine zusätzliche Leistung, in welcher das erworbene Wissen im Hinblick auf den Unterricht umgesetzt wird, und buchen daher das Modul mit 4 ECTS Credits.

ECTS: 3

Merkmale:

Responsible instructor: Katja Vogel

Requirements:

Assessment: Portfolio aus selbsterstellten Unterrichtsmaterialien Das Modul wird als bestanden bewertet, wenn alle Elemente des Portfolios bestanden sind. Aktive Teilnahme an den Lehrveranstaltungen und regelmässige Präsenz in der Lehrveranstaltung wird erwartet.

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Organisation:

Offer pattern: 1 Semester (Every Second Fall Semester)

Module CHE 719 Solid State and Structural Inorganic Chemistry

07SMCHE719 / Course

Description:

General description:

This course is geared towards senior undergraduate students and other participants with basic knowledge of inorganic chemistry and a strong interest in materials sciences and the related structural chemistry. An introduction to the basic principles of structural inorganic chemistry (structure and bonding models, crystallographic principles) will be provided, followed by a detailed discussion of the most important crystal structure types that are the foundation of modern materials research. In parallel, key synthetic and analytical techniques (e.g. preparation/characterization of nanomaterials) will be illustrated, thereby preparing the participants for their own future projects in the field. During the course, an introduction to single crystal X-ray diffraction techniques and to X-ray absorption spectroscopy will be provided to complement these key techniques, together with hands-on problems from our current research. Concise introductions to other key analytical techniques in materials research, such as electron microscopy, will furthermore be provided. Selected state-of-the-art examples for the development of functional and energy materials will round off the course. Depending on the profile of the audience, special content arrangements can be made at the beginning of the course.

ECTS: 1

Notes:

The final exam will be held in form of oral examinations at the end or after the semester.

Languages of Instruction:

English and/or German

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Greta R. Patzke

Requirements:

Assessment:

Written examination at the end of the semester (In case of only few participants the exam can be held as an oral examination.)
The exam is held in English

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

Module Subject Didactics Philosophy III (3 ECTS)

06SM090Phi33 / Module

Description:

General description:

Das Modul Fachdidaktik III versteht sich als Vertiefung zu den Modulen I und II. Textarbeit, Begriffsanalyse und Gespräch stehen traditionellerweise im Zentrum des gymnasialen Philosophieunterrichts, im Kurs Fachdidaktik III lernen die Studierenden weitere Zugänge kennen, die sich in den Aktivitäten Sehen, Hören, Schreiben, Zeichnen zusammenfassen lassen. Zuletzt soll der Einsatz von online-Plattformen im Philosophieunterricht diskutiert und erprobt werden. Studierende mit zweitem bzw. zusätzlichem Unterrichtsfach erbringen eine zusätzliche Leistung, in welcher das erworbene Wissen im Hinblick auf den Unterricht umgesetzt wird, und buchen daher das Modul mit 4 ECTS Credits.

ECTS: 3

Merkmale:

Responsible instructor: Fabienne Förty
Roger Hofer

Requirements:

Prerequisites: Abgeschlossenes Modul «FD Philosophie I»

Assessment: Eingehende Lektüre der Texte, gemeinsame Diskussionen, schriftliche Visualisierung eines philosophischen Textes, 1 Microteaching (themenspezifisch, gemäss Anweisungen, nach Terminvorgabe). Aktive Teilnahme an den Lehrveranstaltungen und regelmässige Präsenz in der Lehrveranstaltung wird erwartet.

Grading Scale: Pass/Fail

Module GEO 423 Political Geography

07SMGEO423 / Lecture with Practical Exercises

Description:

General description:

This module explores the relationship between politics, space, power, and the environment. Political processes today take shape in a complex geographic context; at the same time, they also impact geography, actively writing space itself. This module brings those dynamics to the fore and locates them both in blatantly politicized sites (such as conflict zones, camps, resource extraction, refugee or climate-depleted spaces, and urban and digital 'ruins'); as well as in the intimate spaces of the everyday, ordinary, ethnic and familial. Through discussions of key texts and research in political geography, the module offers alternative ways to re-think predominant concepts like territory, the state, empires, nations, borders, digital spaces, the climate, citizenship, and sovereignty - as well as our own lives - from a geographic perspective.

This module will particularly focus on critical, decolonial, indigenous, and feminist approaches to political geography - on the past's continuity and the present's impact on the future of geographically made inequalities. We will also continually engage with the theme of what it means to theorize core political-geographic concepts - such as the state, sovereignty, borders, territory, identity, refugees and citizenship - with and from the margins.

Finally, we ask about modes of knowledge production: how do we know what we know about politics and power relations? What methodologies allow us to question taken-for-granted assumptions about political geography and generate alternative and critical conceptions of the relations between geography and politics?

ECTS: 6

Notes:

On 29 October, the event will also take place in room Y25-L-40 in addition to the regular room.

The Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 10; 16

Learning Outcome:

- Become familiar with key thinkers, concepts, theories, and illustrative case studies in political geography and apply key geography concepts to a particular case.
- Situate contemporary political events within global power relations, and political histories of colonialism, imperialism, and gendered violence.
- Cultivate critical, decolonial, and feminist approaches to research, policy, and practice. By critical, we encourage students to question how 'problems' are framed rather than start with a 'problem-solving' mindset.
- Distinguish scientific, peer-reviewed and research-based knowledge from popular media and disinformation.
- Learn methodological skills necessary for academic research, encompassing considerations of ethics and power relations in the research process.
- Writing skills: write thoroughly researched and concise texts that analyze a case study using geographical concepts and adequate references to the scientific literature.
- Creative communication and Speaking Skills: Use the classroom as a safe space for dialogue and testing ideas respectfully, and apply artistic/ creative forms for communicating research (blogs, essays, podcasts, photography, film etc.).

Target Groups:

Module Internship Journal as Part of the 1st Teaching Internship

06SM090BPPJ / Module

Description:

General description:

Begleitend zum Praktikum I verfassen die Studierenden ein Praktikumsjournal. Dieses gibt Aufschluss über Lerngelegenheiten, die im Laufe des Unterrichtspraktikums genutzt wurden, sowie über Entwicklungsperspektiven im Hinblick auf das zweite Unterrichtspraktikum. Das Praktikumsjournal ist parallel zum ersten Unterrichtspraktikum zu absolvieren und somit im gleichen Semester wie das Praktikum I zu buchen.

ECTS: 2

Merkmale:

Responsible instructor: Yves Karlen

Requirements:

Module Lessons Training as Part of the 1st Subject Didactics

06SM090BPUZ1 / Module

Description:

General description:

Die Übungslektionen werden parallel zu den Fachdidaktik-Modulen im 1. Fach absolviert und ermöglichen den Studierenden erste Praxiserfahrungen in diesem Unterrichtsfach. Die Übungslektionen werden im Rahmen der Fachdidaktikkurse - organisiert von den Fachdidaktik-Dozierenden - absolviert. Die Studierenden buchen dieses Modul im UZH-System idealerweise im Semester der FD II, die ECTS-Punkte werden eingebucht, wenn die Fachdidaktik-Dozierenden über alle Unterlagen verfügen, frühestens aber am Ende des Semesters der FD II.

ECTS: 2

Merkmale:

Responsible instructor: Yves Karlen

Requirements:

Prerequisites: Allgemeine Voraussetzung: Fundiertes fachwissenschaftliches Wissen im entsprechenden Fach. Die Übungslektionen in einem Fremdsprachenfach setzen die erfolgreich absolvierte Sprachkompetenzprüfung voraus.

Assessment: Absolvierte Übungslektionen: Das Modul ist bestanden, wenn die fünf erteilten Lektionen zuverlässig durchgeführt und insgesamt als genügend beurteilt wurden.

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Organisation:

Offer pattern: 1 Semester (Every Semester)

Module Teaching Internship II-Z

06SM090BPUP2 / Module

Description:

General description:

Die Organisation der Unterrichtspraktika erfolgt über die Administration der Abteilung Lehrerinnen- und Lehrerbildung (LLBM). Informationen über die Anmeldung finden Sie auf unserer Homepage unter "Wegleitung zum Praktikum II". Sie gelangen zum direkten Link indem Sie die Veranstaltung unten anklicken. Die Anmeldung zu den Praktika läuft auf zwei Ebenen: 1. Anmeldung via Formular bei der Administration LLBM. 2. Reguläre Modulbuchung im UZH-System.

ECTS: 4

Merkmale:

Responsible instructor: Yves Karlen

Requirements:

Prerequisites: Für die Zulassung zum Praktikum II-Z, dem Praktikum im zweiten Unterrichtsfach, wird der erfolgreiche Abschluss der entsprechenden Fachdidaktikmodule sowie der Übungslektionen vorausgesetzt. Das Praktikum II-Z kann erst nach dem Praktikum I absolviert werden.

Assessment: Der Leistungsnachweis zum Unterrichtspraktikum II-Z besteht in der bestätigten Hospitation von 10 Lektionen, in der Planung und Durchführung von 20 Lektionen sowie in den hierzu erfolgten Besprechungen. Anforderungen, welche beim Entscheid über das Bestehen berücksichtigt werden, sind in der Wegleitung zum Unterrichtspraktikum II-Z dargelegt (siehe <https://www.lehrdiplom.uzh.ch>). ---

Module INI 701 Neuroinformatics - Colloquia

07SMINI701 / Colloquium

Description:

General description:

The goal of these talks is to provide insight into recent research results. The talks are not meant for the general public, but really aimed at specialists in the field.

The topics depend heavily on the invited speakers, and thus change from week to week.

ECTS: 0

Notes:

The topics depend heavily on the invited speakers, and thus change from week to week.

Learning Outcome:

The colloquium in Neuroinformatics is a series of lectures given by invited experts. The lecture topics reflect the current themes in neurobiology and neuromorphic engineering that are relevant for our Institute.

Module Subject Didactics Chemistry I

06SM090Ch1 / Module

Description:

General description:

Die Module Fachdidaktik I und II geben den Studierenden einen Überblick über die vielfältigen Themen und Methoden des Unterrichts in den einzelnen Unterrichtsfächern an Maturitätsschulen. Die Schwerpunkte der beiden Module liegen dabei auf der Umsetzung allgemeindidaktischer und fachdidaktischer Erkenntnisse im Unterricht an Maturitätsschulen. Die Studierenden lernen Theorie und Praxis im Unterricht zu verbinden, verschiedene Unterrichtsmethoden und -mittel einzusetzen sowie ihren Unterricht zu planen, durchzuführen und zu reflektieren. Umsetzung der Erkenntnisse aus der Lehr- und Lernforschung für den Chemie-Unterricht sowie Behandlung fachspezifischer didaktischer Spezialitäten. Weitere Informationen: <http://www.vvz.ethz.ch/Vorlesungsverzeichnis>.

ECTS: 4

Notes:

Das Modul muss an der ETH gebucht werden, dazu ist eine Registrierung bei der ETH notwendig: <http://www.ethz.ch/de/studium/non-degree-angebote/fachstudierende.html>.

Merkmale:

Responsible instructor: Patrick Aschwanden

Requirements:

Assessment: Portfolio: 5 Übungen müssen eingereicht und angenommen werden, schriftliche Prüfung am Ende des Semesters. Das Modul wird als bestanden bewertet, wenn alle Elemente des Portfolios bestanden sind. Aktive Teilnahme an der Lehrveranstaltung und regelmässige Präsenz in der Lehrveranstaltung wird erwartet.

Module BCH 303 Methods in Biochemistry (Block 1-4)

07SMBCH303 / Block Course

Description:

General description:

BCH 303 is a research oriented laboratory course for students in the 5th semester of the Bachelor's program in Biochemistry. The aim of the module is to apply experimental biochemical methods in-depth and to integrate them into a coherent research project. Students take an active role in the experimental workflow and address independent scientific research questions.

The module places strong emphasis on independent work, critical analysis of experimental data, and scientific documentation and communication.

Content

The module consists of supervised laboratory work, guided self study phases, and elements of scientific communication. Topics covered include, but are not limited to:

- Molecular cloning, protein production, and protein purification
- Enzyme characterization and enzyme kinetics
- Investigation of the relationship between protein sequence and function
- Literature research and work with primary literature
- Scientific writing and oral presentation
- Reflection on experimental work and personal learning processes

Students work in changing team constellations of different sizes, jointly develop hypotheses, perform experiments, and discuss their results.

Teaching and Learning Methods

- Experimental laboratory work
- Development of theoretical content
- Self study and literature work
- Group work
- Written reports
- Oral presentations

For further information or questions regarding the concept, content, or delivery of the course, please contact the responsible lecturer: Dr. Kathrin Würth (k.wuerth@bioc.uzh.ch).

For questions regarding admission to the course, contact the course coordinator Dr. Cristina Manatschal (c.manatschal@bioc.uzh.ch).

ECTS: 18

Notes:

The module is time intensive and requires regular presence in the laboratory as well as independent preparation and follow up work. Students are strongly advised not to schedule additional regular commitments during the semester between Tuesday 13:00 and Friday 18:00, during teaching hours from 09:00 to 18:00.

The following scientific publications form the thematic basis for the experimental part of the module:

1. Sasso et al. (2009). Structure and function of a complex between chorismate mutase and DAHP synthase. EMBO Journal.
2. Burschowsky et al. (2018). Inter enzyme allosteric regulation of chorismate mutase in *Corynebacterium glutamicum*: Structural basis of feedback activation by Trp. Biochemistry.
3. Fahrig Kamarauskaite et al. (2020). Evolving the naturally compromised chorismate mutase from *Mycobacterium tuberculosis*. Journal of Biological Chemistry.

Learning Outcome:

After successful completion of the module, students are able to:

Subject Specific Competences

- independently plan, conduct, and evaluate central biochemical laboratory methods
- selectively manipulate genetic material and produce recombinant proteins in prokaryotic systems

- characterize enzymes using biochemical and biophysical methods, with particular emphasis on the analysis of enzyme kinetic data

- understand the relationship between protein structure, sequence, and function
- critically interpret experimental data and place them in a scientific context

Methodological Competences

- translate scientific questions into testable hypotheses
- plan experiments in a goal oriented manner, including appropriate controls
- research, evaluate, and use primary literature for their own project work
- document results in a structured and transparent manner
- write scientific reports clearly, precisely, and in a formally correct way

Project and Time Management

- realistically plan and prioritize their own workload
- efficiently coordinate parallel tasks in laboratory work, self study, and documentation
- independently prepare, conduct, and follow up on work phases
- respond flexibly to unforeseen experimental problems and adapt work plans accordingly

Teamwork and Communication

- work effectively in changing team constellations
- define and adhere to roles and responsibilities within a team
- discuss experimental results constructively and give as well as receive feedback
- present scientific results orally in a structured and audience appropriate manner

Personal and Scientific Attitude

- take responsibility for their own learning and work process
- apply the principles of good scientific practice
- critically reflect on experimental sources of error
- analyze their own professional and personal development through structured reflection

Target Groups:

Bachelor students of biochemistry

Languages of Instruction:

Englisch, Deutsch

Course Materials:

Course organization, materials, and submissions are handled via digital course platforms (OLAT and Microsoft Teams).

Merkmale:

Responsible instructor:

Kathrin Würth
Cristina Manatschal

Requirements:

Prerequisites:

Only students enrolled in the Biochemistry degree program with 120 ECTS credits from the Bachelor's studies in Biochemistry are admitted.

A solid background in biochemistry and molecular biology as well as practical experience from previous laboratory courses is strongly recommended.

Assessment:

The assessment consists of a final written report and an oral presentation of the results. Additional submissions are not graded but are mandatory for successful completion of the module:

- 80% attendance requirement
- experimental work
- self study tasks
- reflections
- journal club
- thematic presentation

The detailed requirements and grading criteria are communicated at the beginning of the module.

Module Subject Didactics Physics I

06SM090Phy1 / Module

Description:

General description:

Die Module Fachdidaktik I und II geben den Studierenden einen Überblick über die vielfältigen Themen und Methoden des Unterrichts in den einzelnen Unterrichtsfächern an Maturitätsschulen. Die Schwerpunkte der beiden Module liegen dabei auf der Umsetzung allgemeindidaktischer und fachdidaktischer Erkenntnisse im Unterricht an Maturitätsschulen. Die Studierenden lernen Theorie und Praxis im Unterricht zu verbinden, verschiedene Unterrichtsmethoden und -mittel einzusetzen sowie ihren Unterricht zu planen, durchzuführen und zu reflektieren.

ECTS: 4

Notes:

Die Übungslektionen müssen parallel zur FD Physik I absolviert werden. Das erfolgreich abgeschlossene Modul "FD Physik I" ist Voraussetzung für die Teilnahme am Modul "FD Physik II". Die Veranstaltung findet an der Kantonsschule Rychenberg in Winterthur statt. Zusätzlich zur Modulbuchung melden Sie sich falls möglich bis am 30.6. bei M. Oettli an, andreamichael.oettli@ife.uzh.ch.

Learning Outcome:

Fachdidaktische Grundlagen des Unterrichtens im Fach Physik auf der Basis von empirischer Lehr-Lernforschung und Best practice: Unterrichtsplanung, Lektionsgestaltung, Unterrichtsmethoden, Medieneinsatz, Experimente, Leistungsbeurteilung, Unterrichtsevaluation.

Merkmale:

Responsible instructor: Andrea Michael Oettli

Requirements:

Assessment: Referat, schriftliche Übung.
Das Modul wird als bestanden bewertet, wenn alle Elemente des Portfolios bestanden sind.
Aktive Teilnahme an den Lehrveranstaltungen und regelmässige Präsenz in der Lehrveranstaltung wird erwartet.

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Module Subject Didactics Religion III (3 ECTS)

06SM090Rel33 / Module

Description:

General description:

Im Modul Fachdidaktik III wird am Beispiel ausgewählter Unterrichtssituationen oder Unterrichtsthemen das in den Modulen Fachdidaktik I und II erworbene Wissen unter weiterem Einbezug von fachdidaktischer und erziehungswissenschaftlicher Forschung ergänzt und vertieft. Studierende mit zweitem bzw. zusätzlichem Unterrichtsfach erbringen eine zusätzliche Leistung, in welcher das erworbene Wissen im Hinblick auf den Unterricht umgesetzt wird, und buchen daher das Modul mit 4 ECTS Credits.

ECTS: 3

Merkmale:

Responsible instructor: Karel Hanke

Requirements:

Prerequisites: Abgeschlossene FD I und FD II sind Voraussetzung für den Besuch der FD III.

Assessment: Referat
Aktive Teilnahme an den Lehrveranstaltungen und regelmässige Präsenz in der Lehrveranstaltung wird erwartet.

Grading Scale: Pass/Fail

Module BIO 297 Social Behaviour of Bacteria (Course)

07SMBIO297 / Course

Description:

General description:

The view of bacteria as solitary life forms has strong roots in the tradition of culturing bacteria as suspensions in liquid media. In their natural environments, however, bacteria form surface-associated, structured and co-operative consortia, referred to as biofilms. In this lecture series different aspects of prokaryotic social behaviour, including swarming motility, biofilm formation and cell-to-cell communication, will be presented and existing links between these social phenomena are discussed.

ECTS: 3

Notes:

This lecture complements the Blockkurs BIO 284 "Systemic Microbiologie" and is offered as a master course in the Microbiology Curriculum of UZH and ETHZ. Teaching language is English.

Exam:

Learning Outcome:

By the end of this module each student should be able to

- describe the principles of social behaviour of bacteria belonging to different phylogenetic lineages.
- recognise and discuss the significance of cell-to-cell communication and biofilm formation for microorganisms.

Key skill

By the end of this module each student should be able to review and compile recent scientific literature and evaluate it critically.

Target Groups:

Das Modul ist Teil folgender Master-Spezialisierung (bei Modulen des Fachstudiums):

- Zell- und Molekularbiologie / Cell- & Mol. Biol.
- Mikrobiologie / Microbiology
- Pflanzenwissenschaften / Plant Sciences
- Oekologie / Ecology

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Leo Eberl

Requirements:

Prerequisites:

Abgeschlossenes Grundstudium Biologie

Assessment:

schriftliche Prüfung benotet
Nur Schlusstest in den letzten Unterrichtstagen Mindestens Note 4 in den Tests
(wenn mehrere: Durchschnitt)

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Module BIO 707 Group Seminar: Current Research in Microbiology

07SMBIO707 / Seminar

Description:

General description:

Group Seminar: Current Research
in Microbiology

ECTS: 1

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Leo Eberl

Requirements:

Assessment:

Für Masterstudenten resp. Doktoranden integraler Teil der Master- resp. Doktorarbeit. Einstündige Seminarien und Kolloquien werden in der Regel mit 1 KP honoriert, wenn ein Vortrag oder eine äquivalente Leistung nachgewiesen wird. Gilt nur für Doktoranden. Für Masterstudenten ist das Gruppenseminar Bestandteil der Masterarbeit. Die Festlegung der Anforderungen erfolgt in Absprache mit dem zuständigen Dozenten.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Semester)

Booking Deadline/Period:

not bookable

Cancellation Deadline:

not cancelable

Organisation:

Department of Plant and Microbial Biology

Offered in:

Module BME 324 Basics in human toxicology

07SMBME324 / Course

Description:

General description:

Introduction, sub-disciplines in toxicology; routes of exposure and dose-response relationship; quality of toxic effects; toxicokinetics, xenobiotic metabolism; basic principles of risk assessment and evaluation; chemical carcinogenesis; toxic effects of selected compounds: pesticides, metals, polyhalogenated hydrocarbons, solvents, inhalation toxins, tobacco toxins; hormonal disruptors; natural compounds.

ECTS: 2

Learning Outcome:

Students who successfully complete this course should be able to explain in detail:

- the general principles in toxicokinetics and toxicodynamics
- the toxicological profile of selected toxins with relevance to human health (such as pesticides, solvents, metals, natural compounds etc.).
- the mechanistic concepts in chemical carcinogenesis.
- the basic concepts of toxicological risk assessment.

Key skills

By the end of the module, students should be able to:

- better interpret compound-inherent toxic risk.
- put the individual risk associated with the exposure to selected compounds into a general perspective (relative contribution to overall human health challenges).

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Michael Arand

Requirements:

Prerequisites:

Prerequisites for a successful participation are i) a solid background in biochemistry and ii) basic knowledge in organic chemistry.

Assessment:

Final exam in English.

Module GEO 805 Natural hazards and risk assessment in mountain regions

07SMGEO805 / Block Course

Description:

General description:

Includes a 1-day lab modeling part, and a 3-day field part (Lauterbrunnen). The maximum number of participants is limited to 20 people.

ECTS: 3

Notes:

Register for block course via OLAT.

- Link website: <https://www.geo.uzh.ch/de/studying/during-your-studies/excursions.html>
- By booking this module you agree to the following authorisation clause: I agree that bookings or reservations within the price range of the excursion are made on my behalf.
- Insurance is the responsibility of the participants.

The Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 9; 13 & 15

Target Groups:

Master students in Geography, Bachelor students in Geography starting from the 5. semester

Languages of Instruction:

English

Merkmale:

Responsible instructor: Christian Huggel

Requirements:

Assessment: The module assessment consists of the following components:

- Modelling, field studies and exercises – including a final presentation (graded Pass / Fail)

Attendance at all four full-day sessions is mandatory and a prerequisite for passing the module.

Language of assessments: English

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Module Research Forum: Water, Cryosphere and Climate

07SMGEOFoHK / Forschungsseminar

Description:

General description:

Research Seminar Cryosphere and Geomorphology: This seminar comprises research presentations given by national and international experts as well as formal research-concept presentations of new PhD candidates in the research unit «Glaciology, Geomorphodynamics & Geochronology» (3G). Together with the «Research Seminar Water and Climate» of the research unit «Wa Climate» (H2K), this seminar is combined into the joint weekly «Res Seminar Water, Cryosphere and Climate» (3G and H2K). This combined event is intended to foster scientific exchange between the research units of the institute, provide early critical feedback to PhD candidates and to provide a forum for MSc. students to see and discuss current research at the institute and beyond.

Research Seminar Water and Climate:

This seminar comprises research presentations given by national and international experts as well as formal research-concept presentations of new PhD candidates in the research unit « Water & Climat Together with the equivalent «Research Seminar Cryosphere and Geomorphology» of the research unit « Glaciology, Geomorphodynamics Geochronology » (3G), this seminar is combined into the joint weekly «Research Seminar Water, Cryosphere and Climate» (H2K & 3G). This combined event is intended to foster scientific exchange between the research units of the institute, provide early critical feedback to PhD candidates and to provide a forum for MSc. students to see and discuss current research at the institute and beyond.

ECTS: 0

Notes:

Die Veranstaltung findet im Raum Y25-L-40 statt.

Learning Outcome:

Am Ende des Moduls können Studierende

- die Erdsystemwissenschaft definieren,
- die Konzepte der Erdsystemwissenschaft verstehen,
- anhand aktueller Fallbeispiele Interaktionen der Erdsphären über Material- und Energieflüsse identifizieren, und
- direkte und indirekte Auswirkungen von menschlichen Eingriffen auf das Erdsystem beschreiben.

Module GEO 410 Geography. Matters.

07SMGEO410 / Lecture with Practical Exercises

Description:

General description:

As the key interdisciplinary module in the Geography Master's program, the course has three aims: (1) It demonstrates the potential of interdisciplinary work in Geography by putting our main research areas into dialogue with each other; (2) students develop concrete research projects that connect their everyday lives with some of the key societal and environmental challenges confronting earth and globe; (3) students practice and develop creative ways in which to communicate research findings to a wider interested public (i.e. blog posts, podcasts).

ECTS: 4

Notes:

Der Vermerk «Siehe Hinweise» bei den Raumangaben bezieht sich auf den Raum Y25-K-22.

Am 28. September & 19. Oktober gibt es unterschiedliche Raumangaben. Der Raum Y25-H-79 steht an diesen Tagen nicht zur Verfügung.

Die Agenda 2030 der Vereinten Nationen (UNO) umfasst 17 Ziele für nachhaltige Entwicklung Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)), die von allen UN-Mitgliedstaaten verabschiedet wurden. Sie bilden einen gemeinsamen Rahmen zur Förderung von sozialer Gerechtigkeit, Umweltschutz und wirtschaftlicher Entwicklung weltweit.

Behandelt werden in diesem Modul insbesondere: 6; 10; 11; 12; 13 & 15

Learning Outcome:

- (1) Students learn and evaluate how interdisciplinary research addresses societal and environmental challenges.
- (2) Students design and execute research projects that study societal and environmental challenges in the Zurich region.
- (3) Students produce accessible outputs to effectively communicate research insights to non-specialist audiences.

Module BIO 675 Life Sciences: Transcriptomics RNA-seq course

07SMBIO675 / Lecture with Practical Exercises

Description:

General description:

Next-generation sequencing (NGS) technologies have revolutionized many fields in biology and are changing the practice of medicine. As a joint state-of-the-art research and training facility of the ETH and the University of Zurich, the Functional Genomics Center Zurich (FGCZ) offers a five-day course hands-on practical. The aim is to help participants master fast developing NGS techniques. The practical consists of a library preparation starting from polyA enriched RNA, and a sequencing run on a bench top sequencer, together with an introduction to the analyses of the resulting data and exercises. The lectures cover NGS technologies, their applications and data analysis principles. An entire module has been added for single cell transcriptomics data analysis.

ECTS: 2

Notes:

For further information please check our website <https://fgcz.ch/education/transcriptomicsCourses.html>

Room: at FGCZ Y59

Learning Outcome:

By the end of this course, participants should be able to

- Summarize the principles of current Next Generation Sequencing (NGS) technologies
- Analyze differentially expressed genes using an RNA-seq workflow
- Critically evaluate sequencing and analysis results
- Design an appropriate RNA-seq workflow to apply to their own research project

Module Writing a Post-doctoral Grant

07SMBIOGPPS / Sonstiges

Description:

General description:

Research needs funding from third parties, mainly public funding providers. Postdocs are supposed to write research proposals to acquire funding for their research ideas and their team. But to successfully obtain these third-party funds it is essential to have an all-around convincing project proposal, which exposes the own research idea in a keen manner.

In this training, participants will step-by-step learn to design a research project and write specific parts of a research proposal: the research plan, the impact chapter, the implementation, the career plan, the budget, the ethics, the gender aspects and other parts requested by the funding agencies the participants intend to address. They will furthermore discuss communication issues and how our messages are transported effectively to evaluation committees, including the presentation of the research group and CVs. To distinguish proposal writing from scientific (paper) writing is of key importance and therefore, elements in common and differences will be elaborated.

Because the proposal writing process and the acquisition of funding remains a permanent task of university research staff, we will show how to streamline the creativity process and the proposal writing within the scientific workflow. We help you to make proposal writing an integrated, valuable, and pleasant activity!

Target Group: Researchers, having a first project idea and a target funding instrument in mind

ECTS: 1

Notes:

This is a two days course

Module Subject Didactics Russian III

06SM090Rus3 / Lecture with Practical Exercises

Description:

General description:

Das Modul Fachdidaktik III vollendet den Überblick über die vielfältigen Themen und Methoden des Unterrichts in den einzelnen Unterrichtsfächern an Maturitätsschulen. Der Schwerpunkt des Moduls liegt dabei auf der Umsetzung allgemeindidaktischer und fachdidaktischer Erkenntnisse im Unterricht an Maturitätsschulen. Die Studierenden lernen Theorie und Praxis im Unterricht zu verbinden, verschiedene Unterrichtsmethoden und -mittel einzusetzen sowie ihren Unterricht zu planen, durchzuführen und zu reflektieren.

ECTS: 3

Merkmale:

Responsible instructor: Eva Regula Mäder Niederhäuser

Requirements:

Prerequisites: Russisch C1

Assessment: Portfolio, bestehend aus 2 fact sheets, 2 Vorträgen und einem Microteaching. Das Modul wird als bestanden bewertet, wenn alle fünf Elemente des Portfolios bestanden sind. Aktive Teilnahme an der Lehrveranstaltung und regelmässige Präsenz in der Lehrveranstaltung wird erwartet.

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Module CMS 103 Communication Skills for Leaders

07SMCMS103 / Kurs

Description:

General description:

Demands on today's leaders in science and business continue to get higher and higher. In addition to proven professional skills, so-called soft factors are becoming increasingly important, and are often decisive for individual careers.

No matter whether we want to successfully lead a group, recruit new colleagues, convince potential investors or funding sources about a research project, or negotiate with customers and suppliers: communication is an essential part of daily life.

We talk to each other, listen to each other, write, read, and exchange non-verbal signals. We constantly convey and reveal information while we are in contact with other people - consciously and deliberately, but also unintentionally and unknowingly.

The CMSZH Graduate School aims at providing optimum development opportunities for you as future top leaders and researchers. We have designed a two-day communication course, in cooperation with an external partner. The program is tailored to meet your needs.

In the course you will learn how to

- give convincing presentations and inspire your audience
- put your views forward, and argue persuasively
- attract the interest of a dialogue partner
- excel at elevator speeches'
- gain relevant information by steering conversations skilfully
- predict other peoples reactions, and take account of these in conversation
- interpret dialogue partners facial expressions and gestures, and react accordingly

Module CMS 201 Retreat of the Graduate School of CMSZH (with own presentation)

07SMCMS201 / Forschungsseminar

Description:

General description:

The retreat of the CMSZH takes place every winter in varying beautiful locations in different parts of Switzerland. During the 4-day retreat students present their scientific work. It is a great opportunity to exchange ideas and to network with other students and research groups.

Furthermore, we focus on a specific soft skill topic during the retreat.

Module CHE 717 Perspectives in Forensic Sciences

07SMCHE717 / Lecture with Practical Exercises

Description:

General description:

Forensic thinking with scientific background in different fields and mostly based on case studies.

- Toxicology: Detection of alcohol, drugs, and new psychoactive substances (NPS) in blood, urine, hair, nail, tissue, and inhaled air samples
- Doping: Effect and detection with regards to the regulations
- Forensic genetics: Analysis of crime scene evidence, new developments, paternity testing
- Forensic imaging: Imaging techniques in forensics, the virtual autopsy, visualisation in forensics
- Materials analysis: Examination of materials with a view to determining their history (forgery of documents, works of art, etc.)
- Language and audio analysis: voice comparisons, audio enhancement, authenticity checks
- Accident analysis: Calculation of speed and braking distance, as well as collision analyses and reconstruction of accident sequences
- Biometric data and their examination in a forensic context
- Food control: Food contaminated with mineral oil

ECTS: 2

Learning Outcome:

Understanding and applying the content covered

Target Groups:

Students (Master level and higher) of the Faculty of Science (Chemistry, Biochemistry, Biology, ...)

Languages of Instruction:

German

Merkmale:

Responsible instructor: Laurent Bigler

Requirements:

Assessment: written exam in the last lesson of the semester; the exam is held in German

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Organisation: Department of Chemistry

Offered in:

Fall Semester 2026
Fall Semester 2025
Fall Semester 2024
Fall Semester 2023
Fall Semester 2022

Module BIO 246 Genome Instability and Molecular Cancer Research

07SMBIO246 / Block Course

Description:

General description:

DNA of all living organisms is under constant assault of endogenous and exogenous damaging agents. Cells have evolved complex mechanisms to deal with these attacks and maintain genome stability, such as specific DNA repair pathways, DNA damage tolerance, cell cycle checkpoints and modulation of gene expression. A failure in one or more of these mechanisms increases genome instability, leading to disease, cancer and ageing. In this course, the students will gain theoretical knowledge and hands-on experience of state-of-the-art methods to study DNA damage and repair, checkpoint activation, DNA replication stress, cell cycle regulation and pathogen-induced tumorigenesis. The experimental section will extend from human cell culture to tumor mouse models, covering various areas of molecular biology and cell biology. The experiments will make use of a variety of techniques such as flow cytometry, western blotting, RNA interference, immunofluorescent stainings, single-molecule analysis of replicating chromosomes and physical detection of chromosomal breakage, depending on the set of laboratories visited by the individual student.

ECTS: 6

Notes:

DIE ANMELDUNG FÜR DIE BLOCKKURSE ERFOLGT UNTER <https://www.mybiportal.uzh.ch>

Learning Outcome:

On completion of the module the student should be able to:

- conduct experiments with cultured mammalian cell lines confronted with different types of DNA damage
- recognize and interpret different detectable read-outs of cellular responses to DNA damage
- assess the role of specific factors involved in genome stability and tumorigenesis by their genetic and cell biology analysis

Key skills

On completion of the module the student should be able to:

- compare different methods for the study of the DNA damage response and recognize their potential/limitations
- present critically own and published results and propose proper experiments to address the open questions
- discuss main cellular pathways required to maintain genome stability and/or involved in cancer formation/progress

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Massimo Lopes

Requirements:

Prerequisites:

basic studies completed, BIO 257 "DNA Metabolism and Cancer" taken in parallel is of great advantage

Assessment:

Two brief oral exams, one per lab visited, on the final day of each visit. Final mark is the average of the two marks, approximated to the closest half point. In English.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module MAT 115 Foundations of Mathematics

07SMMAT115 / Lecture with Practical Exercises

Description:

General description:

The goal of this lecture is to explain some of the basic concepts on which mathematics are built. This includes:

- elements of logic (propositional logic and first-order logic);
- mathematical proofs;
- an introduction to set theory;
- the structure of numbers (from natural numbers to real numbers);
- ordinals

ECTS: 3

Target Groups:

Math BSc Major students of the 1st semester/ BSc Minor students 30 or 60 at the beginning of their Math studies.

If you have already successfully passed all the four core modules of the first year (MAT111 Lineare Algebra I, MAT121 Analysis I, MAT112 Lineare Algebra II and MAT122 Analysis II), then this module is NOT for you.

Languages of Instruction:

Module MAT 211 Algebra

07SMMAT211 / Lecture with Practical Exercises

Description:

General description:

Der Kurs gibt eine Einführung in die Algebra. Es werden Standardsätze aus der Gruppentheorie, der Ringtheorie und der Körpertheorie behandelt.

Wichtigste Themen:

1. Grundbegriffe der Gruppentheorie; Beispiele von Gruppen; endliche Gruppen; endlich erzeugte abelsche Gruppen, zyklische Gruppen, Gruppenoperationen; Bahnengleichung, Klassengleichung und die Sätze von Fermat, Cayley, Cauchy und die Sylowschen Sätze
2. Grundbegriffe über Ringe, Ideale und Moduln; kommutative Ringe; Primideale, Maximalideale, Radikalideale, Polynomringe, Nenneraufnahme; ganze Ringerweiterungen; Hauptidealringe; Faktorielle Ringe; Noethersche Ringe. Grundbegriffe über Körper; Körpererweiterungen; algebraisch abgeschlossene Körper, Zerfällungskörper; Transzendenzbasen.

ECTS: 9

Notes:

Mathematical field: Algebra

Target Groups:

Math students in their third semester

Merkmale:

Responsible instructor: Joseph Ayoub

Requirements:

Prerequisites: Linear Algebra I/II

Assessment: Modulprüfung ist schriftlich, die Repetitionsprüfung kann allenfalls auch mündlich sein.

Voraussetzung für die Teilnahme an der Modulprüfung ist die erfolgreiche Teilnahme an den Übungen, d.h. ein gewisser Prozentsatz der Übungen muss sinnvoll bearbeitet sein (Details durch Dozentin in der Vorlesung).

Lecture and exam in English.

Module MAT 602 Functional Analysis

07SMMAT602 / Lecture with Practical Exercises

Description:

General description:

The course will provide an introduction to methods of the Functional Analysis.

This subject is now one of the cornerstones of modern mathematics, and it involves the study of infinite-dimensional spaces and maps between them using a combination of algebraic and analytic methods.

Main topics:

- Banach spaces, Hilbert spaces, and topological vector spaces;
- Duality and Hahn-Banach theorem;
- Convexity and fixed point properties;
- Baire category and open mapping theorem;
- Weak topologies;
- Compact and Hilbert-Schmidt operators;
- Spectral theory and Functional Calculus of operators;

ECTS: 9

Notes:

Lecture in the mathematical field of Analysis

Learning Outcome:

Understanding the basic concepts of functional analysis

Target Groups:

BSc students in their 3rd year and MSc students

Languages of Instruction:

English or German

Course Materials:

Lecture Notes will be provided

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Alexander Gorodnik

Requirements:

Prior Knowledge:

Analysis I / II / III
Linear Algebra I / II

Assessment:

Written or Oral exam (depending on number of students)

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Irregular)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Organisation: Department of Mathematics

Offered in:
Fall Semester 2026
Fall Semester 2025
Fall Semester 2024
Fall Semester 2023
Fall Semester 2022

Component of:

Mathematics		
Single Major 180	Bachelor of Science Faculty of Science (2021)	Lectures, 2nd and 3 year of studies Mathematics

Module Frontiers in Social Neuroscience and Neuroeconomics (S)

03SMDOEC0068 / Doktorandenseminar

Description:

General description:

The seminar provides an overview of important topics of social neuroscience and neuroeconomics.

ECTS: 3

Notes:

Enrollment is limited. Those interested in taking this course must preregister by contacting Cornelia Schnyder (cornelia.schnyder@econ.uzh.ch).

Target Groups:

Course instructors' doctoral students

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Todd Anthony Hare

Requirements:

Prerequisites:

Previous participation in at least two of the following courses: "Cognitive Neuroscience," "Cognitive Economics (Decision Theory)", "Decision Neuroscience," or "Neuroeconomics Seminar"

Assessment:

5-page term paper discussing what the course participants have learned in the course. Pertinent additional material might be sent in advance. To be sent to cornelia.schnyder@econ.uzh.ch no later than November 30, 2026.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Dates/Times/Deadlines:

14.09.2026 - 15.09.2026; 09:00-17:00

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module AST 201 Introduction to Astrobiology

07SMAS201 / Lecture with Practical Exercises

Description:

General description:

An overview of astrobiology - the study of the origin, evolution of life on Earth, the possibility of life on other worlds and how we can discover its presence. We address some old and fascinating questions: where we came from, where we are going, are we alone in the universe and what life could be like out there amongst the stars.

Content

1. What is life? Characteristics from replication to thermodynamics.
2. How life works I: Biochemistry of life, from the cell to the ribosomes and genetic code
3. How life works II: Extremes of life on Earth, from archaea to tardigrades
4. Evidence for first life, conditions on the early Earth
5. Abiogenesis I: The last common ancestor and the origin of organic molecules
6. Abiogenesis II: How to form a replicating evolving living thing
7. Habitability I: Lessons from Earth, our evolving Sun, climate history, feedback loops
8. Habitability II: Carbon cycle, history of oxygen, role of our Moon
9. Life in our solar system - the grand tour, Mercury to Mars
10. Life in our solar system - the Moons of Jupiter and Saturn
11. Planet formation - origin of the Earth
12. Exoplanets, discovery, characterisation and properties
13. The search for life out there
14. Galactic habitability and alien anatomy

ECTS: 5

Target Groups:

All students of the University

Languages of Instruction:

Lectures are in English

Course Materials:

Lectures, lecture notes, research papers and popular articles

Merkmale:

Target Group: Open to School Students

Responsible instructor:

Ben Moore

Requirements:

Prior Knowledge:

None

Assessment:

Written exam which is carried out in english and semester performance within exercise classes.

Exam date:

Module International Geochronology Summer School

07SMGEODIPL / Block Course

Description:

General description:

The Summer School is open to young researchers (PhD students and Post- Docs) worldwide.

Topics to be covered in lectures, excursions and workshops include:

- Dating techniques: such as numerical methods (radiocarbon, exposure dating with cosmogenic nuclides, OSL, etc.); dendrochronology, ice-core chronologies, as well as relative methods like soil weathering and Schmidt-hammer technique
- Reconstruction of environmental parameters (using dendroecology, stable isotopes,)
- Climate and landscape history
- Reconstructing geomorphic processes: Avalanches, mud flows, land slides, rock fall, Forest fires, charcoal identification and dating.
- Presentation of the participants own research

ECTS: 2

Notes:

Further information and the registration informations can be found at <https://www.geo.uzh.ch/en/units/gch/geochronologysummerschool.html>. (<https://www.geo.uzh.ch/en/units/gch/geochronologysummerschool.html>)

Learning Outcome:

Learning outcomes are:

Insight into up-to-date dating techniques in landscape and climate research, mutual exchange of research results and activities

Target Groups:

PhD-Studierende oder Postdoc

Languages of Instruction:

English

Course Materials:

Skripte

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Markus Egli

Requirements:

Prerequisites:

MSc or PhD

Assessment:

Each candidate has to attend the whole summer school and has to give a presentation.

Prüfungssprache: Deutsch oder Englisch

Module MAT 141 Linear Algebra for Natural Sciences

07SMMAT141 / Lecture with Practical Exercises

Description:

General description:

Einführung in die Lineare Algebra:

1. Lineare Gleichungssysteme: Gauss-Algorithmus
2. Matrizen: Rechenregeln, Inverse einer regulären Matrix, symmetrische Matrizen
3. Determinanten: Definition und Eigenschaften, Zusammenhang mit dem Lösen von Gleichungssystemen
4. Komplexe Zahlen
5. Vektorräume über den reellen/komplexen Zahlen: Unterraum, Basis, Dimension, Orthogonalität
6. Lineare Abbildungen und deren Zusammenhang mit Matrizen, Koordinatentransformation
7. Eigenwertprobleme: Eigenwerte, Eigenvektoren, Eigenwertproblem von symmetrischen Matrizen
8. Einführung in die Theorie der Differentialgleichungen

ECTS: 5

Notes:

Aus administrativen Gründen müssen Sie sich über das Vorlesungsverzeichnis für eine Übung einschreiben, die Wahl kann zum Vorlesungsbeginn noch angepasst werden. Genauere Informationen erhalten Sie in der ersten Vorlesung.

Target Groups:

Pflichtmodul für: Erdsystemwissenschaften, Chemie, Wirtschaftschemie, Biochemie und Minor Applied Probability & Statistics

Wahlpflichtmodul für: Biologie, Biodiversität, Biomedizin, Computer Science

Alle Studierenden dürfen die Übungsgruppe frei wählen.

Die Übungen bestehen aus einer obligatorischen Übungsstunde und einer nachfolgenden freiwilligen Fragestunde

Module Medical Law I

02SMPRM1_30 / Course

Description:

General description:

Es werden folgende Themen behandelt:

- * Die Rechtsquellen und Normenhierarchie im Medizinrecht
- * Das Arzt-Patienten-Verhältnis
- * Haftung wegen Behandlungs- und Aufklärungsfehlern
- * Wesen und Inhalt des Medizinrechts
- * Strafrecht im Arztalltag
- * Der nicht entscheidungsfähige Patient
- * öffentliches Spitalhaftpflichtrecht und Berufsrecht
- * Haftpflichtrecht des Arztes und des privaten Spitals- Versicherungsdeckung der damit verbundenen Risiken; Machine Learning.

Für den Erwerb der Kreditpunkte müssen sowohl das Kurzreferat als auch die Prüfung mit "bestanden" bewertet werden. Zudem besteht Anwesenheitspflicht. Jeder Teilnehmende hat zu Beginn einer Lerneinheit ein Kurzreferat zu halten. Die Teilnehmenden haben sich in die Themenliste über den folgenden Link (<https://www.bmel.uzh.ch/de/law/module/hs/medizinrecht1.html>) einzutragen.

ECTS: 6

Notes:

Die Einschreibung erfolgt über die Webseite (<https://www.bmel.uzh.ch/de/law/module/einschreibunghs/>) des PhD BmEL. Für die Einschreibung gilt die Modulbuchungsfrist auf der Webseite des PhD BmEL.

Target Groups:

- Doktorierende des BmEL und weitere interessierte Doktorierende
- Fast Track Teilnehmende
- Assoziierte Teilnehmende

Interessierte Masterstudierende setzen sich bitte mit dem BmEL Team in Verbindung (bmel@ius.uzh.ch)

Languages of Instruction:

Deutsch

Course Materials:

Werden auf der folgenden Webseite (<https://www.bmel.uzh.ch/de/law/module/hs/medizinrecht1.html>) publiziert oder in der Veranstaltung verteilt.

Merkmale:

Responsible instructor:

Julian Mausbach
Brigitte Tag

Requirements:

<u>Prerequisites:</u>	Bachelorabschluss (siehe Zielgruppe)
<u>Assessment:</u>	Kurzreferat und schriftliche Prüfung. Das Datum der Prüfung wird im OLAT publiziert. Zudem besteht Anwesenheitspflicht.
<u>Grading Scale:</u>	Pass/Fail
<u>Repeatability:</u>	Can be repeated as necessary

Module Introduction to the Medical and Health Care Law

02SMBMRM02 / Course

Description:

General description:

The course begins by defining the notions of health care, medical and biomedical law. This is followed by an overview of the sources of national health care law. In this regard, special attention is given to federal powers and fundamental rights in the context of medicine and health care matters.

The relevant sources of international health care law, in particular international treaties and soft law, are then explored. Two sessions are dedicated to the regulation of drugs and transplant medicine. The course will be conducted by alternating theoretical inputs with case studies and short presentations by the participants.

ECTS: 3

Notes:

Enrolment takes place via the PhD BmEL website (<https://www.bmel.uzh.ch/de/law/module/einschreibungen/>). The deadline is the same as the one for the other modules of the RWF.

If the module is booked by less than three persons, it will not be realized.

Target Groups:

- Doctoral Candidates of the PhD BmEL/Law Track and other interested Doctoral Candidates
- Fast Track-Participants

Languages of Instruction:

Englisch

Course Materials:

Will be published here (<https://www.bmel.uzh.ch/de/law/module/hs/introduction.html>) or distributed during the lecture.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Julian Mausbach

Requirements:

Prerequisites:

- bachelor's degree (see Zielgruppen)
- command of english

Assessment:

- A short presentation that must be valued as "pass". The topics are to be choosed on the website (<https://www.bmel.uzh.ch/de/law/module/einschreibungen/>) of the PhD BmEL.
- attendance during all lectures

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated as necessary

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Request period: not bookable

Place allocation at the latest:

Module BIO 513 Master Thesis Quantitative Biology and Systems Biology

07SMBIO513 / Master Paper / MA-Arbeit MNF

Description:

General description:

Die Masterarbeit ist eine 52-wöchige wissenschaftliche Forschungsarbeit, in der eine grössere Problemstellung eigenständig bearbeitet werden soll. Die Masterarbeit wird durch einen umfassenden Bericht (Master Thesis) dokumentiert. Die Betreuung der Masterarbeit kann durch eine/n Professor/in, oder Privatdozent/in erfolgen. Ein Merkblatt zur Durchführung der Masterarbeit ist auf der Website der Molekular-und Zellbiologie publiziert <https://www.biologie.uzh.ch/de/Studium/Masterstudium/MasterStudies.html>

ECTS: 60

Languages of Instruction:

Die Masterarbeit wird in Englisch oder Deutsch verfasst.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Christof Aegerter

Requirements:

Prerequisites:

Abgeschlossenes Bachelor-Studium in Biologie oder Biochemie

Module Doktorats- und Habilitationskolloquium für Rechtsgeschichte, Kirchenrecht, Rechtstheorie und Privatrecht
02SMIUS_AD2 / Colloquium

Description:

General description:

Das Kolloquium richtet sich an Doktorierende und Habilitierende.

Vorstellung des Forschungsprojekts, Diskussion der Thesen, Argumentationslinien und Forschungsergebnisse inkl. gemeinsame Diskussionsrunde.

ECTS: 6

Notes:

Das Seminar findet als Blockveranstaltung statt. Nähere Einzelheiten werden gesondert bekanntgegeben.

Learning Outcome:

In der Diskussion über eigene und fremde Projekte sollen die Perspektiven und Fragestellungen an Kontur gewinnen.

Target Groups:

Doktorierende und Habilitierende vor allem der Rechtswissenschaften mit den Schwerpunkten Rechtsgeschichte, Kirchenrecht, Rechtstheorie und Privatrecht

Merkmale:

Responsible instructor: Andreas Thier

Requirements:

Prerequisites: Abgeschlossenes rechtswissenschaftliches Lizentiats- oder Masterstudium.

Prior Knowledge: Vertiefte rechtswissenschaftliche Kenntnisse.

Assessment: Ein Leistungsnachweis wird erteilt, wenn das eigene Projekt vorgestellt wird (Präsentation ca. 15-20 Minuten).

Grading Scale: Pass/Fail

Repeatability: Can be repeated as necessary

Module EEE 324 Project Development in Biodiversity

07SMEEE324 / Block Course

Description:

General description:

In 4 groups of 3 people each, we develop research projects at Master level (max. 1 year, 5000 CHF) in the area of biodiversity research/biogeography, and write 5-page proposals. The aim is to have time to fully explore the challenges of first designing a suitable project, then developing the appropriate experimental setup, and finally to put this into clear and convincing words. The core of the course are intensive daily one-to-one meetings (1-2 hours per day with each group).

At the end of the course, the groups review each others proposals, which provides a different perspective and feedback. In parallel, there is a series of lectures on various aspects of biodiversity and biogeography research (e.g., island biogeography, diversity-functionality relationships, global diversity patterns; this varies with the interests of the participants), plus a general introduction to writing proposals, and an intro to managing data and using scite.ai (by our librarian).

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE <https://www.mybioportal.uzh.ch>

Learning Outcome:

On completion of the module the students should be able to:

- design approaches to deal with these questions
 - identify some main current research questions in biogeography and biodiversity research
- Key skills On completion of the module the students should be able to
- analyse and discuss primary literature on the topic
 - formulate a hypothesis based on the literature and design an experiment that is suitable to test this hypothesis
 - write a research plan like a "real" research proposal

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Module CMS 104 Management Skills for Business Excellence

07SMCMS104 / Kurs

Description:

General description:

Profound scientific knowledge has to be complemented with soft skills like organizational efficiency and management competence for a successful career in industry as well as in academia.

This course provides you with the best qualifications for management duties: The intense three-day training in management skills focuses specifically on the needs of future leaders.

The first two days provide you with the necessary basics, which you will deepen in a one-day refresher within four month.

As part of the CMSZH education on soft skills competence Communication-Management-Leadership in collaboration with BSP.International, this course follows the Communication Skills for Leaders training and focuses on your business needs.

The Management Skills for Leaders course

- introduces the concepts of project management
- explains how to develop an effective work schedule
- shows how to deal with different characters and personalities
- enables you to effectively pass on tasks and mandates
- explicates the difference between delegating a job and passing on a task
- trains you how to arrange and run effective business meetings
- makes you aware of common pitfalls in management

Module Task Culture and Complex Teaching and Learning Environments

06SM222ALL / Module

Description:

General description:

Das Kernelement des Lehrberufs ist der Unterricht. Dieser soll zu selbstorganisiertem Lernen anleiten und für lebenslanges Lernen vorbereiten. Ziel dieser Veranstaltung ist, zahlreiche Inputs für Arbeitsblätter, Aufgabenstellungen und Unterrichtsmethoden zu erhalten und umzusetzen, bei denen die Schüler und Schülerinnen möglichst passend zu ihrem Vorwissen kognitiv aktiviert werden und die Lernfreude aufrecht erhalten oder entwickelt wird. Der Fachbegriff dazu ist innere Differenzierung, welcher im heutigen Maturitätsunterricht anzustreben ist und besonders in komplexen Lehr-Lernumgebungen erreicht werden kann. Zudem werden im Seminar etliche Methoden kooperativen Lernens angewendet (z.B. Gruppenpuzzle, strukturierte Kontroverse und Multiinterview), denn diese sind eine grundlegende Methode, um innere Differenzierung zu ermöglichen. Die Auswahl der vorgestellten Lernumgebungen wird anhand von Fachliteratur theoretisch begründet. Der Leistungsnachweis besteht aus einem Portfolio mit mündlichen und schriftlichen Anteilen.

ECTS: 3

Merkmale:

Responsible instructor: Anna-Katharina Praetorius

Requirements:

Assessment: Das Portfolio besteht aus mündlichen (Referat/Moderation) und schriftlichen (schriftliche Übungen) Teilleistungsnachweisen. Das Modul wird als «bestanden» bewertet, wann alle Elemente des Portfolios «bestanden» sind.

Grading Scale: Pass/Fail

Repeatability: Can be repeated once/can be replaced

Module BIO 617 Principles of biosafety in medical and biological research

07SMBIO617 / Lecture with Practical Exercises

Description:

General description:

Goal of the course is to

- (i) give an overview of safety regulations, biosafety risk groups and containment levels with focus on viruses; (ii) demonstrate and provide training for working at biosafety level 2 (BSL- 2);
- (iii) teach the use of biosafety cabinets class II and personal protective equipment;
- (iv) teach participants how to handle and inactivate infectious waste and to decontaminate laboratory equipment and rooms; and (v) give an overview of the concept of a BSL-3 lab including airlock systems for persons and materials, management of solid and liquid wastes, and demonstration of biosafety cabinet class III (glove box).

ECTS: 1

Notes:

For Master students and PhD students. Two-day course with exam on the second day.

Takes place twice a year (HS in January / FS in June).

Minimum number of participants: 5

In case of overbooking, please contact teaching@virology.uzh.ch

Learning Outcome:

At the end of this course the students should be able to:

- To become familiar with the necessity of biosafety measurements
- To become familiar with regulations and regulatory offices (biosafety officers, AWEL, WHO, UN)
- To learn how to proceed (risk evaluation, application to BAFU via ECOGEN) when planning an experiment with infectious material
- To know how to (i) handle infectious material, (ii) use personal protective equipment and biosafety cabinets, (iii) inactivate infectious material, and (iv) decontaminate lab benches, equipment and rooms
- To understand the concepts of BSL-2 and BSL-3 laboratories

Module BIO 625 Bioacoustics

07SMBIO625 / Seminar

Description:

General description:

Research seminar on topics related to bioacoustics, including acoustic analysis programs, statistics, technical advances in recording and analysis equipment, as well as the latest research papers introducing new concepts.

ECTS: 0

Notes:

1 hour per week, (time to be discussed)

Learning Outcome:

By the end of the module each participant should be able to:

- identify the correct acoustic analyses
- apply the correct statistics for the specific research question
- explain the most recently used techniques
- present the latest advances in research and theoretical concepts

Merkmale:

Target Group: Suitable for English Speakers

Module Interdisciplinary Teaching

06SM222FüU / Module

Description:

General description:

Der neue Rahmenlehrplan Maturitätsschulen von 2024 verlangt, dass Schüler*innen nicht nur in den einzelnen Fächern, sondern auch fächerübergreifend lernen. Ein zentrales Gestaltungselement des Seminars ist es, dass die Studierenden in interdisziplinären Tandems fächerübergreifende Unterrichtseinheiten entwerfen, den Mitstudierenden vorstellen bzw. sie mit ihnen erproben und diskutieren. Dadurch sollen die Studierenden Wissen und Können erarbeiten, auf dem sie in der eigenen Unterrichtspraxis aufbauen können. Die Tandems erbringen ihren Leistungsnachweis zeitlich gestaffelt über den Verlauf des Semesters. Themen (Auswahl): Bildungswert von fächerübergreifendem Unterricht, Qualitätskriterien, Themenwahl, Formen der Fächervernetzung, Praxisbeispiele, Methoden und Arbeitsformen, Leistungsnachweise im fächerübergreifenden Unterricht.

ECTS: 3

Merkmale:

Responsible instructor: Anna-Katharina Praetorius

Requirements:

Assessment: Referat Aktive Teilnahme an der Lehrveranstaltung und regelmässige Präsenz in der Lehrveranstaltung wird erwartet.

Module BIO 554 Topics in Evolutionary Biology

07SMBIO554 / Course

Description:

General description:

Topics in Evolutionary Biology is a survey course and will be taught by members of the PhD Program in Evolutionary Biology: each will give a 2- hour lecture on their favorite field, outlining the 'big' questions a current approaches in it.

ECTS: 1

Learning Outcome:

Providing an overview of research topics in Evolutionary Biology

Merkmale:

Responsible instructor: Anton Weingrill

Requirements:

Prerequisites: Registered PhD Student

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Organisation: Institut für Evolutionäre Anthropologie

Offered in:

Module BIO 249 Research Internship in Quantitative and Systems Biology

07SMBIO249 / Praktikum

Description:

General description:

Participating students work under individual guidance of an advanced researcher (PhD student, postdoc, group leader) on a specific defined research project and write a scientific report upon completion of the project. Thereby students acquire practical and theoretical insight into actual cutting edge research in Quantitative and Systems Biology.

The research projects are performed in a research group and should be arranged directly with a group leader, before contacting the module leader. Work plan and evaluation of performance are individually arranged with the group leaders.

ECTS: 4

Notes:

Only for advanced Bachelor students. Students must arrange their research internship directly with a research group leader. Minimum duration is 4 weeks full time, but internships of at least 6 weeks duration are preferred. ECTS credits are according to duration, 1 ECTS per week full time internship.

Learning Outcome:

Key Skills On completion of this module, students should be able to

- perform successfully and independently a number of experimental laboratory protocols used commonly in Quantitative and Systems Biology
- choose appropriate positive and negative controls for these experiments
- interpret the results of these experiments
- use a lab book to record experimental protocols, results, and analyses
- describe the purpose of the internship project, in particular with respect to the larger research program of the host laboratory
- summarize and critically analyze in a written report the findings obtained during the lab internship, and the conclusions drawn from these findings

Module AJ6: Learning Contract for Studying at Another Academic Institution

01SM1aj006 / Selbststudium mit Leistungsnachweis

Description:

General description:

Falls für einzelne Studierende ein Studium an einer weiteren akademischen Institutionen mit Angeboten zum antiken Judentum nicht möglich ist, wird für die entsprechende Anzahl KP ein Learning Contract für ein Selbststudium abgeschlossen. Der Learning Contract wird von der Studienkommission genehmigt.

ECTS: 30

Learning Outcome:

Die Studierenden lernen ein anderes akademisches Umfeld kennen und setzen sich alternativen Zugängen zum Studium des Antiken Judentums aus.

Merkmale:

Responsible instructor: Konrad Schmid

Requirements:

Assessment: Kommentierte Portfoliomappe: Die Portfoliomappe dokumentiert die geleisteten Studien und wird in einem Gespräch (25 min.) evaluiert (pass/fail).

Grading Scale: Pass/Fail

Repeatability: Can be repeated twice

Module MDS 201 Master's Research in Chemical and Molecular Sciences

07SMMDS201 / Master Paper / MA-Arbeit MNF

Description:

General description:

The objective of the Master's Research course is, over a 3 semester period, to complete a Master's research project, prepare a written thesis, complete an oral examination and make a public presentation of the thesis work (60 KP total). In each semester of the program, students have to attend MDS 201.1, Laboratory Research. In the final semester (typically the 3rd semester) the students must additionally complete MDS 201.2 (Master's Thesis and Defense) and MDS 201.3 (Master's Exam). MDS 201.1 accounts for the execution of the individual research project. MDS 201.2 accounts for the preparation of a formal written Master's thesis and an associated public Defense. MDS 201.3 accounts for an oral evaluation of the student's scientific development by a committee of the faculty. A single Note is assigned for completion of MDS 201.

ECTS: 60

Notes:

This module is not bookable and will only be added to the transcript of records once it has been successfully completed.

Languages of Instruction:

english

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Bernhard Spingler

Requirements:

Assessment:

Evaluation of overall student performance by a committee of the faculty.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

3 Semesters (Irregular)

Dates/Times/Deadlines:

Students arrange a project individually with one of the group leaders of the Department of Chemistry. The start of the Master's thesis is then registered with the teaching coordinator of the Department.

Description:

General description:

This course explores organic matter dynamics and biogeochemical cycles within plant-soil systems. The course focuses on carbon and nitrogen processes and their role in ecosystem functioning and climate interactions. Through a combination of lectures, group work, and various homeworks students develop both conceptual understanding and practical research skills. Assessment is based on a series of individual and group assignments, including data analysis, scientific writing, presentations, and a finally essay writing. These homeworks are designed to build competencies in critical thinking, communication, and the application of soil science to real-world challenges.

This course will cover:

- Soil plant concepts
- Soil organic matter dynamics: why is it important?
- Vegetation in natural- and anthro-ecosystems
- Roots and rhizosphere
- Peatlands - sources of greenhouse gases in a warming world?
- Microbiology
- Interactions between carbon and nitrogen, and other biogeochemical cycles in the soil
- Carbon stabilisation processes
- Interactions and feedbacks between plants and soils

ECTS: 6

Learning Outcome:

General

Knowledge objectives

- Know the main physical, chemical and biological properties of soils and how they interact.
- Define what soil organic matter is.
- Know the interactions between the C cycle and the N cycle in the plant-soil system.
- Know the main processes related to soil microbiology.
- Understand the role of roots in the system - particularly in the C cycle.
- Know the main processes of C stabilisation in the plant-soil system.
- Identify the implications of organic matter management in applied situations like agriculture.
- Understand the different aspects related to plant biomass production: Needs, limits, and plant contribution to soil organic matter.
- Know the main interactions between plant and soil and understand the different feedbacks that can regulate plant-soil interactions.

Skill objectives

- Gain fundamental research skills.
- Write a synthesis; present and discuss the related information in English.
- Present your work in written and oral format in a clear manner.
- Scientifically debate and graphically present science.
- Analyse data and sum them up in adapted illustrations.

- Work as a team both in small and larger groups.
- Re-activate the knowledge acquired in the class in another scientific context.

Target Groups:

MSc students ESS GEO

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Michael Rowley

Requirements:

Assessment:

The module grade is composed of several assessed components:

1. Individual forum entry (OLAT) (5%)
2. A figure submitted as an individual (5%)
3. A Master thesis proposal submitted as an individual (15%)
4. A group presentation and executive summary, submitted in a group of 3-5 students (25%)
5. A Poster, presented and submitted as a group or as individuals (15%)
6. Finally an essay submitted as an individual (35%)

The module grade is composed of the individual grades of the various assessed components. Students may fail individual components, but can compensate for this through strong performance in the remaining parts, provided the final module grade is 4 or above. There are no resit opportunities for individual assessed components. If the module is not passed (below 4), the entire module must be repeated in the next available semester.

Please note that physical attendance in class is mandatory for this course. A maximum of two absences during the semester will be accepted. In case of more absences, an explanation must be communicated by e-mail with an official confirmation (e.g. a medical certificate or a letter from the military service).

Module MAT 922 Probability II (probability theory)

07SMMAT922 / Lecture with Practical Exercises

Description:

General description:

The purpose of the course is to introduce to the main concepts and results on discrete time martingales and Markov chains with values in a discrete space. An introduction to Brownian motion will be made.

ECTS: 9

Notes:

Mathematical Field: Stochastics

This is the Module for BSc and MSc students, PhD students please book MAT922DP please

Learning Outcome:

Introduction into Martingales, Markov Chains and Brownian motion.

Target Groups:

Students of Mathematics from 5th semester onwards

Languages of Instruction:

English

Course Materials:

LE GALL, Jean-François. Measure Theory, Probability, and Stochastic Processes. Springer Nature, 2022.

WILLIAMS, David. Probability with martingales. Cambridge university press, 1991.

NORRIS, James R. Markov chains. Cambridge university press, 1998.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Ashkan Nikeghbali

Requirements:

Prerequisites:

MAT111 Lineare Algebra I & II MAT121 Analysis I & II

MAT221 Analysis III

MAT901 Stochastik

Assessment:

Module exam in English

There will be a Testat (mandatory exercises of which a certain percentage have to be passed to be able to attend the exam, failing the testat, means failing the module)

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module Elective Module: Imaging methods

04SM93MAS423 / Sonstiges

Description:

General description:

Bildgebende Methoden spielen Diagnose, Therapieentscheide, Therapie- Monitoring, Diagnose-Ausschluss, Clinical Trials, perkutane Gewebegewinnung und Therapie eine immer wichtiger Rolle.

Auf verschiedenen Gebieten hat in den letzten Jahrzehnten eine beträchtliche technische Innovation stattgefunden. Die Vielfalt der Methoden erfordert ein immer breiteres technisches und physikalisches Wissen. Auch steigen die Anforderungen an Kenntnisse von Sicherheitsmassnahmen (z.B. Strahlenschutz, Sicherheitsmassnahmen im MR-Bereich).

Die Frontalvorlesungen können nur einen ersten Einblick in solche Fragen geben. Die praktischen Radiologie-Kurse richten sich eher auf die Diagnosefindung aus als auf die Beschreibung des technischen Hintergrundes.

Im Mantelstudium Bildgebende Methoden sollen die physikalischen Hintergründe, die technischen Parameter und deren Einfluss auf die Bildgebung, Sicherheitsmassnahmen sowie relevante Bildartefakte und deren Korrekturmöglichkeiten erarbeitet werden.

Jeder teilnehmende Studierende soll unter Anleitung durch den Dozenten ein 10-Minutenreferat zu den physikalischen Grundlagen vorbereiten und jeweils am Anfang des Gruppenpraktikums präsentieren. Die Dozenten sollen diese Vorträge kommentieren und ergänzen. Ein grosser Teil jedes Blocks ist für praktische Anwendungen vorgesehen, um die technischen Parameter, Sicherheitsmassnahmen und Artefakte zu verstehen. In einer Schlussveranstaltung am Schluss des Mantelstudiums soll das erarbeitete Wissen im Plenum präsentiert werden. Das Modul wird ab Herbstsemester 2010 angeboten.

ECTS: 4

Notes:

Veranstaltungstermine und weitere Infos: siehe <http://www.vam.uzh.ch> > Mantelstudium

Learning Outcome:

1. Verstehen der physikalischen Grundlagen der wichtigsten bildgebenden Methoden
2. Kennen der typischen Bildakquisitionsparameter und deren Einfluss auf die Bildgebung
3. Verstehen und kennen von Sicherheitsmassnahmen, die für die verschiedenen bildgebenden Methoden erforderlich sind
4. Kennen der wichtigsten Artefakte und deren Korrekturmassnahmen
5. Können die oben genannten Aspekte einem Patienten erklären und seine Fragen beantworten.

Module Elective Module: Communication of benefits and risks

04SM94MAS424 / Sonstiges

Description:

General description:

In der Medizin, dem Wissen über den Gesundheitszustand eines Patienten, spielen Wahrscheinlichkeiten eine zentrale Rolle. Diagnose ist das Wissen über die Wahrscheinlichkeit einer Erkrankung, Prognose ist das Wissen über die Wahrscheinlichkeiten des weiteren Verlaufs einer Erkrankung und Ätiologie ist das Wissen über die Wahrscheinlichkeiten ursächlicher Faktoren einer Erkrankung.

In der Medizin ist das Wissen praktisch immer probabilistischer und nur selten deterministischer Natur.

Die Herausforderungen für einen Arzt sind erstens die korrekten Wahrscheinlichkeiten zu kennen, die Begriffe in denen die Wahrscheinlichkeiten quantifiziert werden zu kennen und zu verstehen, und über diese Wahrscheinlichkeiten mit dem Patienten adäquat zu kommunizieren. Wahrscheinlichkeiten sind immer mit Unsicherheit assoziiert.

Das notwendige Wissen und die dazu erforderlichen Fähigkeiten sind bei den Ärzten, wie verschiedene Studien gezeigt haben, nicht oder nur unzureichend vorhanden. Meines Wissens werden diese Inhalte während der Medizinstudiums nicht oder nur unzureichend gelehrt.

Die Absicht ist ein Modul für das Mantelstudium zu planen und gemeinsam mit anderen Interessierten anzubieten. Das Modul wird ab Herbstsemester 2010 angeboten.

ECTS: 4

Notes:

Veranstaltungstermine und weitere Infos: siehe <http://www.vam.uzh.ch> > Mantelstudium

Learning Outcome:

1. Verstehen des Begriffs der Wahrscheinlichkeit und deren unterschiedliche Bedeutungen (subjektive versus frequentistisch, objektive Probabilität). Die Resultate der Forschung, und auf diesem Wissen basiert die Medizin, produziert objektive Wahrscheinlichkeiten, die für Patienten so aufbereitet und transformiert werden müssen, dass sie diese Informationen für ihre Entscheidungen verwenden können.
2. kennen und verstehen die unterschiedlichen Arten der numerischen Darstellung von Probabilitäten (Risiken in Form von ARR, RR, RRR, odds; Sensitivität, Spezifität, natürliche Häufigkeiten am Beispiel des Screening), base rate
3. können die Wahrscheinlichkeiten graphisch darstellen um sie den Patienten besser und verständlicher zu erklären
4. können die Wahrscheinlichkeiten dem Patienten im Gespräch erklären
5. kennen die Konzepte des shared und informed decision making und üben deren Anwendung.

Module CMS 105 Leadership Skills for Executives

07SMCMS105 / Kurs

Description:

General description:

Which skills are asked when I am head of a group? What are the important points to conduct an interview with a job applicant? How do I bring people together to work as a team? Why are aims so important in a leadership position? And where is control needed? These and other questions will be answered during a three-day course about leadership skills. The aim of the course is to make you familiar with the tasks and tools of a leader. This course is the third module of the CMSZH education on soft skills competence Communication-Management-Leadership in collaboration with BSP.International, and focuses on your future needs as a leader. The Leadership Skills course

- introduces the concepts of teambuilding
- enables you to effectively interview job applicants
- shows you the importance of leading with goals
- qualifies you to hold appraisal interviews
- points out the significance and difficulties of control in the guiding of employees
- trains you how to solve conflicts

Module Subject Didactics Economy and Law VII

06SM090WiRe7 / Module

Description:

General description:

Lernziele "Prüfen und Bewerten" In diesem Teil der Lehrveranstaltung werden schriftliche und mündliche Prüfungen erstellt und anhand verschiedener Kriterien analysiert. Prüfungskorrektur und Notengebung sind weitere Schwerpunkte, ebenso die Durchführung mündlicher Prüfungen. In allen Themen sollen die Teilnehmer auf Fehlerquellen sensibilisiert werden und ihre eigenen (zum Teil impliziten) Beurteilungs- und Bewertungskriterien hinterfragen können. Die Studierenden können am Ende des Moduls: - Prüfungen systematisch und lernzielorientiert vorbereiten und durchführen. - Prüfungen anhand der Gütekriterien kritisch reflektieren und Fehlerquellen erkennen. - Prüfungen vor dem Hintergrund didaktischer Ziele rechtfertigen. Lernziele "Projektbegleitung" In diesem Teil der Lehrveranstaltung geht es darum, die Planung, Durchführung und Bewertung von Schülerprojekten (insbesondere Matura- und vergleichbare Arbeiten) kennen zu lernen bzw. kritische Aspekte der Projektbegleitung zu reflektieren und mögliche Interventionen anhand von praktischen Beispielen zu erkennen und zu erarbeiten. Wir werden uns auch damit auseinandersetzen, wie die Projektarbeit in der aktuellen Bildungsdiskussion und in der Schulentwicklung gewichtet ist. Die Studierenden können am Ende des Moduls: - Projekte im Unterricht prozess- und produktbezogen planen, durchführen, begleiten und beurteilen. - Psychologische Mechanismen in der Projektarbeit / Zusammenarbeit erkennen und mögliche Interventionen seitens Lehrkraft diskutieren und fallbezogen erarbeiten. - Strategien und Instrumente zur Betreuung und Beurteilung von Maturarbeiten und weiteren Projektarbeiten anwenden. - Die Aufgaben der Lehrperson als Betreuer/in, Berater/in und Beurteiler/in identifizieren und erfüllen.

ECTS: 4

Module BCH 408 Research Project

07SMBCH408 / Praktikum

Description:

General description:

Independent experimental work on a research project hosted by a research group, under the supervision of a post-doctoral fellow or an advanced PhD student.

ECTS: 12

Notes:

The project can be completed or started in the time between terms of the sixth and seventh semester, upon agreement with the hosting group.

Learning Outcome:

The participants will acquire skills in independent scientific work (data acquisition, data processing, interpretation) and obtain a direct insight into the research topics and methods of the respective research group.

Target Groups:

MSc students of Biochemistry

Languages of Instruction:

English, German

Merkmale:

Target Group: Suitable for English Speakers

Module Elective Module: Psychiatry 1 - Bioscience methods for the study of psychiatric disorders
04SM81MAS304 / Sonstiges

Description:

General description:

Die Veranstaltung ist praxisorientiert. Nach einer kurzen theoretischen Einführung durch den Kursleiter nehmen die Studenten als Beobachter an einem Labor-Experiment teil. Das Experiment wird durch einen erfahrenen Untersucher durchgeführt. Anschliessend werden Auswertung und Interpretation mit den Studenten besprochen und erläutert. Die Veranstaltung schliesst mit einer halbstündigen freien Diskussion mit dem Kursleiter über das zu dem Experiment gehörige Gesamtprojekt der jeweiligen Institution. Bei Untersuchung von Probanden sind gegebenenfalls separate Erklärungen zur ärztlichen Schweigepflicht und zum Datenschutz erforderlich. Die Unterrichtssprache ist in der Regel Deutsch - einzelne Kursvormittage können aber teilweise oder ganz in Englisch gehalten werden.

ECTS: 4

Notes:

Veranstaltungstermine und weitere Infos: siehe <http://www.vam.uzh.ch> > Mantelstudium

Der Modulleiter führt am Anfang des ersten Kurstages in die Ziele und Abläufe des Lehrangebots ein und nimmt an der Abschlussdiskussion des letzten Kurstages teil. Er nimmt Feedback der Studenten entgegen und bietet eine zusätzliche Diskussion zu übergreifenden Themen der psychiatrischen Forschung an.

Learning Outcome:

Die Studenten lernen aktuelle wissenschaftliche Methodik zur Erforschung der Ätiologie psychiatrischer Erkrankungen sowie zur Verbesserung der Frühdiagnostik und zur Entwicklung neuer therapeutischer und präventiver Ansätze kennen. Der Schwerpunkt dieses Lehrangebots liegt auf dem Einblick in die experimentell-methodischen Aspekte der Forschung und deren Anwendung im Rahmen von Studien in Tiermodellen (transgene Mäuse) sowie im Rahmen von Clinical Trials an Patienten mit psychiatrischen Störungen. Die demonstrierten Methoden umfassen transgene Mausmodelle, Systembiologie, Genetik, Elektrophysiologie, Magnetresonanztomographie und experimentelle Psychologie.

Merkmale:

Responsible instructor: Silvia Brem

Requirements:

Assessment: Regelmässige, aktive Teilnahme an den Kursvormittagen (Präsenzkontrolle). Zu jedem Kursvormittag wird ein kurzes Protokoll verfasst (Umfang 1 Seite; Gliederung: Fragestellung, Methodik, Ergebnisse, Diskussion, Schlussfolgerung, das vom Kursleiter gegengelesen und ggf. kommentiert wird.

Module Elective Module: Psychiatry 4 - Medical psychotherapy

04SM81MAS320 / Sonstiges

Description:

General description:

Die Gestaltung dieses Lehrangebotes ist praxisorientiert und fördert die aktive Teilnahme der Studierenden. An jedem Vormittag gibt es eine theoretische Einführung, Patientenvorstellungen, interaktive Diskussionen und ein Kurzreferat von Studierenden (Ausnahme: Kein Referat am 1. Vormittag). Weitere Lehrmethoden, wie Rollenspiele oder

Kleingruppenarbeit, können je nach Referent und Verlauf der Veranstaltung zum Einsatz kommen. Es werden den Studierenden am ersten Vormittag insgesamt 6 Referatsthemen (die Inhalte beziehen sich auf die Vormittage 2-7) vorgestellt und die Studierenden werden in Gruppen eingeteilt (5 Studierende pro Referatsthema). An den Vormittagen 2-

7 wird dann je ein Referat präsentiert und anschliessend diskutiert (also zum Beispiel am 2. Vormittag ein Referat zu einem Thema der kognitiven Verhaltenstherapie). Die 5 Referierenden fungieren bei der Diskussion als die Experten für ihr Thema (ggf. unterstützt durch den jeweiligen Kursleiter), die anderen Studierenden stellen Fragen.

ECTS: 4

Notes:

Veranstaltungstermine und weitere Infos: siehe <http://www.vam.uzh.ch> > Mantelstudium

Aufgaben als Modulleiter:

Vor Beginn des Moduls

- o Absprache der Referatsthemen mit den einzelnen Dozenten.

Am ersten Kurstag

- o Einführung der Studierenden in die Ziele und Abläufe des Lehrangebotes.

- o Einteilung der Studierenden für die Referatsthemen am ersten Kurstag, nachfolgend Information der anderen Dozenten über die Gruppeneinteilung.

Am Ende des letzten Kurstages

- o Entgegennahme von Feedbacks der Studierenden.

- o Zusammenfassung der Lerninhalte des Moduls und der

Learning Outcome:

Die Studierenden lernen wissenschaftlich anerkannte Psychotherapieverfahren und ihre Anwendungsmöglichkeiten im Rahmen von ärztlichen Tätigkeiten kennen. Sie bekommen Einblick in die psychotherapeutische Diagnostik und daraus abgeleitete Behandlungsstrategien. Die Lernziele der einzelnen Vormittage bauen aufeinander auf: Zu Beginn geht es um allgemeine Aspekte ärztlicher Psychotherapie, nachfolgend werden spezifische Verfahren vorgestellt und im dritten Teil des Moduls dann um deren Anwendung in speziellen Behandlungsfeldern. Am Ende dieser Lehrveranstaltung können die Studierenden ärztlich-psychotherapeutische Basisfertigkeiten beschreiben und deren Bedeutung für die Behandlung von somatisch wie auch psychisch kranken Menschen erläutern.

Merkmale:

Responsible instructor:

Michael Rufer

Requirements:

Assessment:

Regelmässige, aktive Teilnahme an den Kursvormittagen (Präsenzkontrolle).
Referat inklusive anschliessender Diskussion.

Module MAT 503 Introduction to Algebraic Topology

07SMMAT503 / Lecture with Practical Exercises

Description:

General description:

Algebraic topology provides tools to study topological spaces by computing their algebraic invariants. Important examples of such invariants are homology and cohomology groups used in all branches of modern mathematics.

This course focuses on various constructions of homology (simplicial, cellular, singular, axiomatic), on the study of their properties and on the development of effective computational tools (such as Universal Coefficient Theorem, Mayer-Vietoris exact sequence, etc.). In addition, this course covers cohomology rings, the Künneth Theorem and Poincaré duality.

ECTS: 9

Module BIO 610 Introduction to Machine Learning for Genomics

07SMBIO610 / Lecture with Practical Exercises

Description:

General description:

This course is a hands-on introduction to machine learning with Python for biologists with focus on genomics and evolution. It focuses on analyzing gene expression and experimental data. You will start with the basics, like preparing data and making graphs, then move on to practical tasks. Workflow of the Functional Genomics Center Zurich is used for the hands-on of next-generation sequencing data. We will also use Large Language Models (LLMs) as a powerful helper to make programming and data analysis easier.

ECTS: 1

Notes:

2 day course. Priority will be given for PhD programs of Evolutionary Biology, Plant Science, Ecology and NCCR Evolving Language.

PSC students should register via the online portal of the Swiss Plant Science Web (<https://www.plantsciences.uzh.ch/en/teaching/courseregistration.html>).

EvoBio students should register with Tony Weingrill (evobio@aim.uzh.ch), any other students should also register with Tony Weingrill (evobio@aim.uzh.ch).

Learning Outcome:

By the end of the module the students should be able to

- Understand concepts of NGS technologies
- Understand fundamentals of data analysis
- Design a research experiment and the data analysis involving biologically relevant issues affecting populations of plants or animals
- Run machine learning analysis process
- Understand basic bioinformatics of large datasets for practical use in genetic analyses

Module MAT 001 Cryptography

07SMMAT001 / Lecture with Practical Exercises

Description:

General description:

The lecture gives an introduction to cryptography. In the course we will work on the mathematical foundations from number theory, complexity theory and algebraic geometry. Based on this, we will study the practical protocols such as AES, RSA and ElGamal.

--

Die Vorlesung gibt eine Einführung in die Kryptographie. Im Kurs werden wir die mathematischen Grundlagen aus der Zahlentheorie, der Komplexitätstheorie und der algebraischen Geometrie erarbeiten. Basierend darauf werden wir die praktischen Protokolle wie AES, RSA und ElGamal studieren.

ECTS: 9

Notes:

Mathematical Field: Algebra

Doctoral students have to book the module MAT001DP

Target Groups:

Math students from their 5th semester onwards

Course Materials:

- I. Blake, G. Seroussi, and N. Smart. Elliptic Curves in Cryptography. Lecture Note Series 265. London Mathematical Society, 1999.
- N. Koblitz. Algebraic Aspects of Cryptography. Springer-Verlag, Berlin, 1998. With an appendix by A. J. Menezes, Y.-H. Wy and R. J. Zuccherato.
- A. J. Menezes, P.C. van Oorschot, and S. A. Vanstone. Handbook of Applied Cryptography. CRC Press Series on Discrete Mathematics and its Applications. CRC Press, Boca Raton, FL, 1997. With a foreword by Ronald L. Rivest.
- R. A. Mollin. An Introduction to Cryptography. CRC Press Series on Discrete Mathematics and its Applications. CRC Press, Boca Raton, FL, 2000.

Module Scientific programming for neuroeconomic experiments (S)

03SMDOEC0267 / Doktorandenseminar

Description:

General description:

Collection, analysis, and visualisation of neuroeconomic data depend crucially on proficiency with dedicated computer programs and programming environments. This course is aimed at researchers and students with little expertise in these areas but will also contain valuable tips for students who already have some programming experience. The course will provide a hands-on introduction and exercises to the Python and MATLAB programming languages as well as the PsychoPy and PsychToolbox frameworks, which are essential for conducting and publishing neuroeconomic experiments.

The first part of the course will provide a general introduction to programming in Python and MATLAB, covering basic data types, data import/export, and fundamental programming concepts. The second part will introduce PsychoPy and PSychoToolbox, powerful open-source libraries for designing and running behavioral experiments, including synchronizing data acquisition with external devices (e.g., fMRI scanners, eye trackers). The third part will focus on scientific data analysis and visualization using Python's scientific stack (NumPy, pandas, matplotlib, seaborn, etc.) and dedicated MATLAB toolboxes, as well as best practices for reproducible research and efficient programming workflows. By the end of the course, students will be able to program their own experiments, analyze and present their data, and use modern tools for scientific computing in Python and MATLAB.

ECTS: 3

Notes:

This course will take place in BLU-003 (Blümlisalpstrasse 10, 8006 Zürich).

If you wish to attend this course, please send an e-mail with your student ID number (Matrikelnummer) to cornelia.schnyder@econ.uzh.ch. Students should bring their own notebook - if available - as we will be doing programming exercises in class (software will be provided).

Module BIO 434 Electrophysiological Recording Techniques

07SMBIO434 / Block Course

Description:

General description:

The course provides the background knowledge and hands-on experience and training in various electrophysiological recording techniques. The scope of the course is to provide a thorough training of these techniques. Practical work and demos will cover a broad range of techniques, including intra- and extracellular recordings, patch-clamp recordings from individual neurons, electrical field potential measurements in neural tissue, and in vivo recordings in the brain.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Learning Outcome:

Students who successfully complete this course should be able to:

- describe and compare different electrophysiological techniques used in neuroscience
- explain the molecular and cellular basis of electrical excitability in neurons
- fabricate electrodes for recordings in neural tissue
- employ electrophysiological recording techniques in selected experimental settings by themselves
- recognize problems with tissue preparation and maintenance, chemical solutions, and electrical noise

Key skills

Students who successfully complete this course should be able to:

- analyze the recorded data, graphically depict and interpret the results
- document the experimental details, outcome and interpretation in a lab book
- present their results and put them in the context of previous studies

Target Groups:

For advanced students of Biomedicine, Biology and Neurosciences.

Languages of Instruction:

english

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Fritjof Helmchen

Requirements:

Prerequisites:

Basic studies completed

Assessment:

- analyze the recorded data, graphically depict and interpret the results at debriefings
- document the experimental details, outcome and interpretation in a lab book
- present their results and put them in the context of previous studies

(Language of the assessment: English)

Grading is based on:

- weekly homework sheets (33%)
- participation during the course (33%)
- final presentation of a relevant paper or on your acquired data / own analysis (33%)

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Module BIO 372 Virology: Methods in Molecular Biology, Pathogenesis, and Control of Human Viruses 07SMBIO372 / Block Course

Description:

General description:

This course provides an introduction to molecular methods and principles in molecular virology, with an experimental focus on the pathogenicity and control of clinically important human viruses such as HIV, influenza and coronavirus. Participants will experience state-of-the art technologies currently being employed in modern virology research and diagnostic laboratories, including: virus quantification; cloning of viral genes from patient material; sequencing and analysis of viral genes; testing of antivirals that act at different stages of the virus life cycle (particularly entry); and assessment of human factors that control infection.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Introduction and discussion take place in Y36-M-52, the practical part takes place in the lab.

Learning Outcome:

- Compare the life cycles of select viruses, particularly their replication strategies
- Explain the modes of transmission and tropism of select viruses
- Understand and apply different methods for virus quantification
- Analyze effects of antiviral compounds, neutralizing antibodies or human genes against select viruses
- Demonstrate experience in analysis of complex experimental and/or sequencing data
- Implement principles of biosafety measures for working with infectious agents, such as viruses
- Prepare oral and written scientific presentations suitable for their peers, and participate in critical discussions of data

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Benjamin Geoffrey Hale

Requirements:

Prerequisites:

- Basic studies in Biology or Biomedicine completed.
- Students who completed BIO132 "Mikrobiologie, Immunologie, Virologie" are given priority.
- The associated lecture module BIO615 should be attended in the same semester, if possible.

Assessment:

Final oral presentation (40%), Practical work (10%), Written submission (25%), Journal club presentation (25%): all in English

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module Molecular biology methods

07SMZIHP / Block Course

Description:

General description:

This course is intended to provide a general overview, as well as deep insights into different molecular biology methods for gene and protein expression profiling, analysis of promoter regulation and gene silencing (including real-time quantitative PCR, Chromatin immunoprecipitation, Western blot, High throughput screening, etc.). The course is intended to be of direct practical application and will cover experimental design, different methodology approaches, method limitations, troubleshooting, protocols reagents and kits, and presentation of results. Real life case scenarios and practical issues will be also discussed.

ECTS: 1

Notes:

Registration by e-mail to andrea.schmitz-derron@uzh.ch until 2 weeks before the course starts.

Target Groups:

Recommended: To be taken during the first year of the PhD

Languages of Instruction:

Englisch

Course Materials:

Students are requested to bring real case scenarios or issues from their own research for discussion.

Merkmale:

Target Group: Suitable for English Speakers

Module BIO 366 Topics in Evolutionary Genetics and Computational Biology

07SMBIO366 / Seminar

Description:

General description:

This is a research seminar where students learn to present, discuss, and defend their own research projects and research results, as well as observations from the recent literature.

ECTS: 2

Notes:

Regular presence and active participation in research discussions is mandatory for this course. This course is offered every semester, but PhD students can get credit for it only once during their residence time in a PhD program.

Learning Outcome:

After having successfully passed this seminar students should be able to

- present their own research in a clear and cogent manner to an audience of peers.
- defend this research against critical comments.
- explain the importance of their work in the broader context of recent research.

Target Groups:

PhD students in PhD programs at UZH or ETHZ

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Andreas Wagner

Requirements:

Assessment:

Students need to present and defend their own research projects and research results at least twice.

Module ECO 401 Zurich Interaction Seminar: Ecology & Evolution

07SMECO401 / Seminar

Description:

General description:

The Zürich Interaction Seminar (ZIS) provides an informal and engaging environment for graduate students (MSc and PhD) to discuss current research in ecology and evolutionary biology. Each 20-40 minute talk reviews exciting developments in a research field or highlights the presenter's current work. Discussions and networking opportunities foster connections within Zürich's ecology and evolution research community.

The seminar is jointly hosted by University of Zürich and ETH Zürich, students from both institutions are encouraged to participate.

ECTS: 1

Notes:

There is no need to register to attend - all are welcome to participate! ETH students should register for course 551-0737-00L through myStudies; for UZH students, ZIS is officially listed as ECO401 under the PhD Program in Ecology.

For up to date seminar schedule see: tb.ethz.ch/education/zis.html (<https://pe.ethz.ch/education/zis.html>)

Learning Outcome:

Getting familiar with scientific arguments and discussions. Overview of current research topics. Making contacts with fellow students in other groups.

Target Groups:

PhD-students

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Debra Zuppinger-Dingley

Requirements:

Assessment:

To receive credit points you must attend at least 5 sessions (2/3 of all course events) and give a presentation. If you are interested, email the current semester organizers as soon as possible to be added to the schedule. In English

Module BIO 325 Systems dynamics in cell and developmental biology

07SMBIO325 / Block Course

Description:

General description:

This blockcourse covers new methods in cell and developmental biology using quantitative imaging and computational image analysis. You will learn how quantitative information can be extracted from bioimage data using advanced computer vision methods, how to obtain dynamic and/or multiplexed measurements from such data, and how this can be used for mathematical modelling of biological systems. This will be applied to reveal how variation in cellular behavior emerges, both in space and in time, and what the underlying causes and mechanisms may be.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Learning Outcome:

- Understanding the power of quantitative imaging and image analysis
- Ability to do basic image analysis and statistical modeling
- Realizing that variability is not necessarily noise
- Understanding how variability can be used to uncover new cell biology and developmental biology.

Target Groups:

Students with specialisation in: Genetics, Developmental Biology Molecular and Cellular Biology Quantitative Biology and Systems Biology

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Lucas Pelkmans

Requirements:

Prerequisites:

Basic studies in Biology or Biomedicine completed; affinity with computer programming and quantitative modeling

Assessment:

Final exam (English)

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

not bookable

Cancellation Deadline:

not cancelable

Module BME 319 Prospects of molecular diagnostics in pediatrics

07SMBME319 / Block Course

Description:

General description:

Students will develop, discuss and investigate three cases, as implied by problem based learning, in the areas of pediatric immunology, oncology and metabolic disorders. These cases will be translated into practical diagnostic work.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybiportal.uzh.ch>

Learning Outcome:

At the end of this PBL module, students are able to

- analyse a complex problem according to concepts, terms and knowledge that are needed to solve it
- apply their existing knowledge and identify additional knowledge required to solve the problem (subject-specific learning objectives)
- construct their own knowledge: i.e. identify what they need to learn and what resources they are going to use to accomplish that learning
- present all compiled findings to the other students in their PBL-group
- synthesise the results from all contributions and judge the extent to which the problem has been solved
- judge if the learning objectives were sufficiently answered or if additional tasks are needed to accomplish these.

Module CHE 421 Master's Exam

07SMCHE421 / Prüfung ohne Lehrveranstaltung

Description:

General description:

The Master's exam is multidisciplinary and is held as an oral exam after completion of the Master's thesis. The students proof their ability to capture, explain and critically discuss scientific contexts.

The topics of the oral exam will be defined by the examiners and are based on the modules attended during the program but will also include general knowledge from the Bachelor studies.

ECTS: 10

Notes:

After submission of the Master's thesis, a preparation period of at least 4-6 weeks is recommended for the exam (general and advanced chemical knowledge).

Languages of Instruction:

German or English

Merkmale:

Responsible instructor: Sandra Luber

Requirements:

Prerequisites: completed Master's thesis

Assessment: multidisciplinary Master's exam on general and advanced chemical knowledge (in English or German)

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Semester)

Dates/Times/Deadlines: The Master's exam takes place on a different day than the defense of the Master's thesis. It lasts 60 minutes and is held by the supervisor of the Master's thesis and a lecturer of the Department who was not involved in the thesis. The candidate is informed about the second examiner at least three weeks before the exam. After completion of the Master's thesis a preparation time of at least 4-6 weeks for the exam is recommended.

Module Subject Didactics Pedagogy/Psychology I

06SM090PP1 / Module

Description:

General description:

Die Module Fachdidaktik I und II geben den Studierenden einen Überblick über die vielfältigen Themen und Methoden des Unterrichts in den einzelnen Unterrichtsfächern an Maturitätsschulen. Die Schwerpunkte der beiden Module liegen dabei auf der Umsetzung allgemeindidaktischer und fachdidaktischer Erkenntnisse im Unterricht an Maturitätsschulen. Die Studierenden lernen Theorie und Praxis im Unterricht zu verbinden, verschiedene Unterrichtsmethoden und -mittel einzusetzen sowie ihren Unterricht zu planen, durchzuführen und zu reflektieren. Die beiden binnendifferenzierten Disziplinen 'Pädagogik' und 'Psychologie' bieten viele Möglichkeiten für einen kompetenzfördernden Unterricht im gymnasialen Unterrichtsfach 'Pädagogik und Psychologie'. Der erste Teil des Basiskurses soll dazu anregen, das eigene fachdidaktische Wissen und Handeln im Fach Pädagogik & Psychologie zu reflektieren und zu erweitern. Entsprechend stehen im ersten Kursteil diese Fragen im Zentrum: - Wie wird das Doppelfach Pädagogik & Psychologie an den Maturitätsschulen angeboten (WF, EF, SPF)? Durch welche Rahmenbedingungen wird es konstituiert? - Welche Ziele verfolgt der Unterricht im Fach Pädagogik & Psychologie? Was sollen die Schüler*innen lernen? - Welche Inhalte der Herkunftsdisziplinen Pädagogik und Psychologie eignen sich für den gymnasialen Unterricht? Welche Inhalte eignen sich weniger? - Wie können die Unterrichtsinhalte strukturiert, übersichtlich und handhabbar gemacht werden? - Woran wird guter PP-Unterricht erkennbar und was können die Lehrperson als auch die Schüler*innen dazu beitragen, damit das Lernen gelingt? - Wie kann sichtbar gemacht werden, ob das Unterrichtsarrangement 'funktioniert' und die Schüler*innen ihre Kompetenzen erweitern? Neben strukturellen und theoretischen Aspekten steht die konkrete Unterrichtspraxis im Zentrum. Deshalb planen die Kursteilnehmer*innen gemeinsam mit der Kursleiterin eine Unterrichtssequenz, die an der Kantonsschule Küsnacht erprobt und durchgeführt wird.

ECTS: 3

Notes:

Die Einschreibung erfolgt via Buchungstool. Die Buchung gilt als verbindliche Anmeldung zur Veranstaltung. Das fachdidaktische Lehrangebot wird über zwei Semester geführt. Der Besuch der Fachdidaktik Pädagogik und Psychologie I ist Voraussetzung für die Anschlussveranstaltung Fachdidaktik Pädagogik und Psychologie II im Frühlingssemester. Es ist empfehlenswert (aber nicht Pflicht), das Modul Fachdidaktik Pädagogik und Psychologie III im selben Semester wie das zweite Modul zu belegen. Die erste Veranstaltung ist obligatorisch, da eine grundlegende Einführung erfolgt, Gruppeneinteilungen vorgenommen und Übungslektionsplätze verteilt werden.

Learning Outcome:

Sie können: - die Perspektive der Schüler*innen auf pädagogische und psychologische Phänomene, Konzepte, Fachmethoden und Befunde einnehmen und Methoden nutzen, um deren Perspektive und Lernen der zum Ausgangspunkt Ihrer Unterrichtsplanung zu machen. - ausgehend von Lehrplänen aktivierende (über-)fachliche Lernziele formulieren. - für die Unterrichtsplanung dienliche Sachanalysen erstellen. - lernförderliche Aufträge finden oder entwickeln. - den geplanten Unterrichtsverlauf in einer übersichtlichen Disposition darstellen. Einzelne PP-Lektionen und kleine Unterrichtseinheiten durchführen und - das Klassenzimmer so einrichten, dass das Lernen und der Austausch produktiv unterstützt werden, - die Ziele und Leistungserwartungen explizit machen, - die zum Inhalt passenden Unterrichtsmethoden, Sozialformen und Materialien lernförderlich einsetzen. Ihre Rolle als Lehrperson reflektieren und - eigene fachliche, fachdidaktische, pädagogische und persönliche Kompetenzen realistisch einschätzen, - Entwicklungsziele für das Modul 'Übungslektionen' formulieren und konkrete Lernschritte definieren.

Module Subject Didactics Biology III (4 ECTS)

06SM090Bio34 / Module

Description:

General description:

Im Modul Fachdidaktik III wird am Beispiel ausgewählter Unterrichtssituationen oder Unterrichtsthemen das in den Modulen Fachdidaktik I und II erworbene Wissen unter weiterem Einbezug von fachdidaktischer und erziehungswissenschaftlicher Forschung ergänzt und vertieft. Studierende mit zweitem bzw. zusätzlichem Unterrichtsfach erbringen eine zusätzliche Leistung, in welcher das erworbene Wissen im Hinblick auf den Unterricht umgesetzt wird, und buchen daher dieses Modul mit 4 ECTS Credits.

ECTS: 4

Learning Outcome:

Das Modul III fokussiert im ersten Teil auf Experimente für den Biologieunterricht. In Anlehnung an die Fachleitlinien Zürcher Gymnasien werden klassische und neuartige Schulversuche durchgeführt. Folgende Themen stehen im Fokus: Botanik, Cytologie, Zellstoffwechsel, einzellige Tiere und Wirbellose, Humanbiologie, Genetik, Ökologie und Evolution.

Weitere Themen des Moduls sind: Basiskonzepte der Biologie, Maturitätsprüfungen, Betreuung von Maturaarbeiten und ausserschulische Lernorte.

Merkmale:

Responsible instructor: Dario Meier

Requirements:

Assessment: Portfolio: Schriftlicher und praktischer Leistungsnachweis. Das Modul wird als bestanden bewertet, wenn alle Elemente des Portfolios bestanden sind.
Aktive Teilnahme an der Lehrveranstaltung und regelmässige Präsenz in der Lehrveranstaltung wird erwartet. Teilnahme an der FDIII-Exkursion.

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Module Subject Didactics Geography III (4 ECTS)

06SM090Geo34 / Module

Description:

General description:

Im Modul Fachdidaktik III wird am Beispiel ausgewählter Unterrichtssituationen oder Unterrichtsthemen das in den Modulen Fachdidaktik I und II erworbene Wissen unter weiterem Einbezug von fachdidaktischer und erziehungswissenschaftlicher Forschung ergänzt und vertieft. Studierende mit zweitem bzw. zusätzlichem Unterrichtsfach erbringen eine zusätzliche Leistung, in welcher das erworbene Wissen im Hinblick auf den Unterricht umgesetzt wird, und buchen daher das Modul mit 4 ECTS Credits. Die Fachdidaktik Geographie III ermöglicht eine vertiefte, anwendungsorientierte Auseinandersetzung in Bezug auf den Geographie- Unterricht. In der Veranstaltung liegt der Fokus auf ausgewählten Fallbeispielen, die von den Studierenden geplant, durchgeführt und evaluiert werden.

ECTS: 4

Notes:

Die Modulbuchung gilt als Anmeldung.

Learning Outcome:

Sie lernen: - das Implementieren von Kompetenzen, die für eine Beteiligung an einer nachhaltigen Entwicklung nötig sind, - die Bedeutung von Medienkompetenz im Geographieunterricht kennen und gewinnbringend einzusetzen, - wie Medien zur Veranschaulichung von Inhalten im Geographieunterricht eingesetzt und lernwirksam genutzt werden können, - Unterrichtssequenzen effizient zu planen, lernwirksam umzusetzen und kritisch zu reflektieren, - wie forschend-entdeckendes Lernen in den Schulalltag integriert werden kann.

Merkmale:

Responsible instructor: Julia Rafflenbeul Herren

Requirements:

Prerequisites: Abgeschlossenes Modul «FD Geographie I». Der Kurs FD Geografie III kann parallel zu FD Geografie II besucht werden.

Assessment: Portfolio: Vorstellen von Unterrichtseinheiten (BNE, Kartenkompetenz, Forschend-entdeckendes Lernen), vollständige Dokumentation und Präsentation der Übungslektionen. Das Modul wird als bestanden bewertet, wenn alle vier Elemente des Portfolios bestanden sind. Aktive Teilnahme an der Lehrveranstaltung und regelmässige Präsenz in der Lehrveranstaltung wird erwartet. ---

Module Subject Didactics History III (4 ECTS)

06SM090Ge34 / Module

Description:

General description:

Der Kurs geht von einem breiten Verständnis des Politischen aus und zeigt auf, wie historische Bildung immer auch politische Bildung ist und wie Lernende dieses Potential nutzen können, indem sie nach der Gegenwarts- und Zukunftsbedeutung historischer Themen und ihrer Funktionen in der Geschichtskultur fragen.

ECTS: 4

Learning Outcome:

Die Studierenden lernen Kompetenzen, Konzepte und Methoden der politischen Bildung kennen und wenden diese bei der Konzeption von Lerneinheiten im Geschichtsunterricht an. Die Studierenden wenden geschichtswissenschaftliche und fachdidaktische Zugänge zu Gegenwarts- und Zukunftsbedeutung historischen Wissens und zu Geschichtskultur an, um politische und historische Bildung in ein produktives Verhältnis zu setzen.

Merkmale:

Module Subject Didactics Russian III (4 KP)

06SM090Rus34 / Lecture with Practical Exercises

Description:

General description:

Das Modul Fachdidaktik III vollendet den Überblick über die vielfältigen Themen und Methoden des Unterrichts in den einzelnen Unterrichtsfächern an Maturitätsschulen. Der Schwerpunkt des Moduls liegt dabei auf der Umsetzung allgemeindidaktischer und fachdidaktischer Erkenntnisse im Unterricht an Maturitätsschulen. Die Studierenden lernen Theorie und Praxis im Unterricht zu verbinden, verschiedene Unterrichtsmethoden und -mittel einzusetzen sowie ihren Unterricht zu planen, durchzuführen und zu reflektieren.

ECTS: 4

Merkmale:

Responsible instructor: Eva Regula Mäder Niederhäuser

Requirements:

Prerequisites: Russisch C1

Assessment: Portfolio: Portfolio, bestehend aus 2 fact sheets, 2 Vorträgen und einem Microteaching. Das Modul wird als bestanden bewertet, wenn alle fünf Elemente des Portfolios bestanden sind. Aktive Teilnahme an der Lehrveranstaltung und regelmässige Präsenz in der Lehrveranstaltung wird erwartet.

Module Subject Didactics Philosophy III (4 KP)

06SM090Phi34 / Module

Description:

General description:

Das Modul Fachdidaktik III versteht sich als Vertiefung zu den Modulen I und II. Textarbeit, Begriffsanalyse und Gespräch stehen traditionellerweise im Zentrum des gymnasialen Philosophieunterrichts, im Kurs Fachdidaktik III lernen die Studierenden weitere Zugänge kennen, die sich in den Aktivitäten Sehen, Hören, Schreiben, Zeichnen zusammenfassen lassen. Zuletzt soll der Einsatz von online-Plattformen im Philosophieunterricht diskutiert und erprobt werden. Studierende mit zweitem bzw. zusätzlichem Unterrichtsfach erbringen eine zusätzliche Leistung, in welcher das erworbene Wissen im Hinblick auf den Unterricht umgesetzt wird, und buchen daher dieses Modul mit 4 ECTS Credits.

ECTS: 4

Merkmale:

Responsible instructor: Fabienne Föry
Roger Hofer

Requirements:

Prerequisites: Abgeschlossenes Modul «FD Philosophie I»

Assessment: Eingehende Lektüre der Texte, gemeinsame Diskussionen, schriftliche Visualisierung eines philosophischen Textes, 1 Microteaching (themenspezifisch, gemäss Anweisungen, nach Terminvorgabe). Aktive Teilnahme an den Lehrveranstaltungen und regelmässige Präsenz in der Lehrveranstaltung wird erwartet.

Module Organization, Management, and Theories of the Firm (S)

03SMDOEC0348 / Doktorandenseminar

Description:

General description:

This seminar is intended for doctoral and young scholars to present their research in front of an audience constituted of senior professors from different universities across Switzerland. The spirit of this seminar is mainly to provide constructive feedback to presenters and to get to know research fellows with similar research interests.

ECTS: 3

Notes:

This seminar is open by invitation only.

Learning Outcome:

At the end of the seminar, you should be able to:

1. Think more critically about your own work.
2. Strengthen your arguments and the presentation of your work.

Target Groups:

Doctoral students and young scholars

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

David Seidl

Requirements:

Assessment:

Written assesment (essay or update of research paper).

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Dates/Times/Deadlines:

The seminar will take place at UZH Campus Central on October 1-2, 2026.

Booking Deadline/Period:

Module STA 426 Statistical Analysis of High- Throughput Genomic and Transcriptomic Data

07SMSTA426 / Lecture with Practical Exercises

Description:

General description:

A range of topics will be covered, including basic molecular biology, genomics technologies and in particular, a wide range of statistical and computational methods that have been used in the analysis of DNA microarray, high throughput sequencing and cytometry experiments.

In particular, lectures will include: microarray preprocessing; normalization; exploratory data analysis techniques such as clustering, PCA, multidimensional scaling, UMAP, tSNE; controlling error rates of statistical tests (FPR versus FDR versus FWER); limma (linear models for microarray analysis); mapping algorithms (for RNA/ChIP-seq); RNA-seq quantification; statistical analyses for differential count data; isoform switching; epigenomics data including DNA methylation; gene set analyses; classification; analysis of single-cell cytometry and gene expression datasets

ECTS: 5

Notes:

Doctoral students have to book the module STA426DP

Learning Outcome:

- Understand the fundamental "scientific process" in the field of Statistical Bioinformatics
- Be equipped with the data science skills to preprocess, visualise and explore genomic data (using R, Unix, Bioconductor, etc.) while ensuring reproducible research (knitr)
- Have a general knowledge of the types of data and biological applications encountered with microarray, sequencing and cytometry data
- Have the general knowledge of the range of statistical methods that get used with microarray, sequencing and cytometry data
- Gain the ability to apply statistical methods/knowledge/software to a collaborative biological project
- Gain the ability to critical assess the statistical bioinformatics literature
- Write a coherent summary of a bioinformatics problem and it's solution in statistical terms

Target Groups:

Students of the Master program "Biostatistics" Students of the Master program "Mathematics"

Students of the Master program "Computational Biology and Bioinformatics"

Students of other Masters or PhD programmes where genomic data is being analysed

The lecture is relevant for everybody who has an interest in the areas of applied statistics, bioinformatics and molecular life science.

Languages of Instruction:

English

Course Materials:

Lecture notes, published manuscripts

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Mark D. Robinson

Requirements:

Prior Knowledge:

Basic knowlegde of the programming language R, sufficient knowledge in statistics

Grading Scale:

1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Organisation: Division VI Computational Science and Neuroinformatics common area

Module Subject Didactics Mathematics III (4 ECTS)

06SM090Mat34 / Module

Description:

General description:

Im Modul Fachdidaktik III wird am Beispiel ausgewählter Unterrichtssituationen oder Unterrichtsthemen das in den Modulen Fachdidaktik I und II erworbene Wissen unter weiterem Einbezug von fachdidaktischer und erziehungswissenschaftlicher Forschung ergänzt und vertieft. Studierende mit zweitem bzw. zusätzlichem Unterrichtsfach erbringen eine zusätzliche Leistung, in welcher das erworbene Wissen im Hinblick auf den Unterricht umgesetzt wird, und buchen daher dieses Modul mit 4 ECTS Credits.

ECTS: 4

Merkmale:

Responsible instructor: Benedikt Binotto

Requirements:

Assessment: Schriftliche Übungen. Aktive Teilnahme an den Lehrveranstaltungen und regelmässige Präsenz in der Lehrveranstaltung wird erwartet.

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module GEO 475 Hydrological Modelling

07SMGEO475 / Course

Description:

General description:

Hydrological models are widely used to address different kinds of hydrological questions. This course provides a general introduction to hydrological modeling, in-depth knowledge of selected models and exercises in hydrological programming.

ECTS: 6

Notes:

Die Veranstaltungen mit dem Vermerk siehe Hinweise finden im Raum Y25-K-22 statt.

Die Agenda 2030 der Vereinten Nationen (UNO) umfasst 17 Ziele für nachhaltige Entwicklung (Sustainable Development Goals, SDGs (<https://sdgs.un.org/goals>)), die von allen UN-Mitgliedstaaten verabschiedet wurden. Sie bilden einen gemeinsamen Rahmen zur Förderung von sozialer Gerechtigkeit, Umweltschutz und wirtschaftlicher Entwicklung weltweit.

Behandelt wird in diesem Modul insbesondere: 6

Learning Outcome:

After having completed this module the students should have a general understanding of hydrological modeling and a good knowledge of selected models. They should be able to decide on and apply suitable modeling approaches for solving different hydrological questions. The students should also be aware of opportunities and limitations of modelling.

Furthermore, the students should be able to implement smaller model calculations in programming languages such as Matlab or R using suitable numerical methods.

Target Groups:

MSc students

Languages of Instruction:

English (in case of foreign students - otherwise in German)

Course Materials:

Course book, selected scientific papers, exercise material

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Jan Seibert

Requirements:

Prerequisites:

GEO 121 and GEO 351.5 (or similar knowledge from courses at other universities)

Prior Knowledge:

GEO 121 and GEO351.5

Assessment:

The module grade is composed of the following assessed components:

1. Programming assignment and model calibration – mandatory submission without grading
2. Project work – group assignment with presentations in December
3. Written examination – early January

The module is considered passed provided the written examination is completed

with a grade of at least 4.0.

Language of assessments: English

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Spring Semester)

Request period: from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Place allocation at the latest: Sa 29.08.2026 22:00

Waiting list progression period: from Sa 29.08.2026 22:00 to Do 24.09.2026 24:00

Cancellation period: from Sa 29.08.2026 22:00 to So 27.09.2026 24:00

Module BIO 319 Cell motility control in invasive brain tumors

07SMBIO319 / Block Course

Description:

General description:

BIO319 gives an introduction to research in molecular oncology with focus on the regulation of cancer cell motility and invasion. Neuro- oncological disorders will be presented and current challenges for effective cancer treatments discussed. The course will give an introduction to tumor cell motility and its deregulation in disease. Using brain tumor cell models, the students will practically explore how the impact of drug treatments on tumor cell growth, viability and motility can be addressed experimentally.

ECTS: 6

Notes:

The course is modular consisting of theoretical modules and practical work at the bench. Students are expected to participate actively in the theoretical part.

DIE ANMELDUNG FÜR DIE BLOCKKURSE ERFOLGT UNTER <https://www.mybiportal.uzh.ch>

Learning Outcome:

On completion of the course, the students should be able to:

1. Name the major malignant neuro-oncological disorders and describe their characteristics
2. Comprehend molecular mechanisms of cell motility regulation
3. Analyse and discuss primary literature relevant to cancer research
4. Formulate a hypothesis and plan an experiment to test it
5. Apply a selection of basic methodologies in laboratory- based cancer research
6. Evaluate and interpret raw data and draw conclusions
7. Concisely present experimental approaches and outcomes orally and in written

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Martin Baumgartner

Requirements:

Prerequisites:

Basic studies completed

Assessment:

4 assessments, in English, each counting 25%

- Cooperation in practical
- Oral manuscript presentation
- Oral data presentation
- Written abstract and experimental data analysis

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Module BIO 320 Sleep and wake regulation

07SMBIO320 / Block Course

Description:

General description:

A block course on the neurobiology of sleep and wake regulation using a problem based learning methodology. The mutual interaction of sleep and wake brain activity will be compiled starting from the cell to the systems level.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE <https://www.mybiportal.uzh.ch>

Takes place at the Children's Hospital Zurich

Learning Outcome:

By the end of the module students should be able to

- analyse a complex problem according to concepts, terms and knowledge that are needed to solve it
- apply their existing knowledge and identify additional knowledge required to solve the problem (subject-specific learning objectives)
- construct their own knowledge: i.e. identify what they need to learn and what resources they are going to use to accomplish that learning
- present all compiled findings to the other students in their PBL-group
- synthesise the results from all contributions and judge the extent to which the problem has been solved
- judge if the learning objectives were sufficiently answered or if additional tasks are needed to accomplish these.

Key skills

- critically review the current scientific literature about mutual interactions of sleep and waking
 - identify key questions related to the interplay between sleep and waking and use the relevant resources to address these questions
 - manage goal directed group discussions using the existing and newly acquired knowledge
- Additionally, the participants gain practical experiences in measurements of sleep.

Module Econometrics for Research Students Part I (Ph.D.) (L+E)

03SMDOEC0379 / Lecture with Practical Exercises

Description:

General description:

This course covers foundations of basic asymptotic econometric theory.

This is then applied to regression models, instrumental variables models, generalized method of moments, penalized and nonparametric regression models.

Emphasis is placed on understanding sampling distributions and how asymptotic theory translates into practical understanding of common estimation and inferential techniques. The topics are illustrated using theoretical, simulation, and empirical examples.

Module Macroeconomics for Research Students Part I (Ph.D.) (L+E)

03SMDOEC0380 / Lecture with Practical Exercises

Description:

General description:

This course is an introduction to macroeconomic theory at the PhD level. We develop tools that are commonly used in macroeconomics but also other areas of economics, notably recursive methods and discrete and continuous time dynamic optimization. We apply these tools to some of the most important topics of macroeconomics, including general equilibrium with complete and incomplete markets, consumption-savings problems, investment, dynamic contracts, fiscal policy, economic growth and climate macroeconomics.

ECTS: 9

Notes:

Module Microeconomics for Research Students Part I (Ph.D.) (L+E)

03SMDOEC0381 / Lecture with Practical Exercises

Description:

General description:

This course is the first part of the first-year micro sequence that prepares beginning doctoral students for their career in research. Specific topics of Part I include Choice Theory, Demand Theory, Stochastic Choice, Choice under Uncertainty, and General Equilibrium Theory. The course covers both advanced textbook material and recent research contributions.

Module STA 491 Research practical in biostatistics

07SMSTA491 / Praktikum

Description:

General description:

Individual project work under supervision on specific topics or within an industry internship, only by prior and specific agreement with the module coordinators and the studies coordinator.

ECTS: 4

Notes:

ECTS depending on the scope of the class: minimally 2 ECTS, maximally 5 ECTS.

Target Groups:

Students of the Master Program in Biostatistics.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Leonhard Held
Torsten Hothorn

Requirements:

Assessment:

Written report and presentation.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Semester)

Booking Deadline/Period:

not bookable

Cancellation Deadline:

not cancelable

Organisation:

Division VI Computational Science and Neuroinformatics common area

Module Corporate Finance (PhD)

03SMDFOEC007 / Course

Description:

General description:

This course is a doctoral level introduction into corporate finance. It covers the major themes of corporate finance, including investment policy, capital structure, payout policy, and corporate governance. It also covers important concepts in the economics of information.

ECTS: 9

Learning Outcome:

Learning about research, primarily, corporate finance theory.

Target Groups:

Primarily doctoral students, but the course is also open to interested students in the MSc UZH ETH in Quantitative Finance program.

Languages of Instruction:

English

Course Materials:

See the syllabus for a detailed list of references.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Alexander Wagner

Requirements:

Prior Knowledge:

Good knowledge of microeconomics.

Assessment:

Class participation, problem sets, presentation, and term paper or a written exam (which would take place on 04.01.2027, from 09:00 until 12:00).

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module STA 121 Statistical Modeling

07SMSTA121 / Course

Description:

General description:

Multiple regression, logistic regression, multifactor experimental design, nonparametric smoothing, principal component analysis, bootstrap, survival data, using the programming language R

ECTS: 5

Learning Outcome:

- solid knowledge in applied statistics
- a practical basic education in important basic and modern methods of statistics
- comprehensive capabilities of using the programming language R

Target Groups:

Students of the Minor program Applied Probability and Statistics, students of the Master program Biostatistics and other interested students.

Languages of Instruction:

Englisch

Course Materials:

lecture script

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Reinhard Furrer

Requirements:

Prerequisites:

STA 120 Introduction to Statistics or basic knowledge in probability and statistics

Assessment:

- Active participation in the lecture and the exercises: checked through activity in discussions, presenting solutions and/or turning in exercises.
- Successful participation in the exercises is a prerequisite for admittance to the exam
(Failing the exercise testat means failing the module!)
- Written exam, repetition exams may be oral.
- Further details are announced in the lecture.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

Module BIO 612 Seminars in Bioinformatics: Methods and Emerging Solutions

07SMBIO612 / Colloquium

Description:

General description:

In this seminar series, participants (group members, invited guests, (volunteers) present aspects of their ongoing research, with emphasis on the application of advanced bioinformatics methods applied during their projects. The seminar series also provides opportunities for presentations by visitors and "hot topic" discussions.

ECTS: 0

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Michael Baudis

Requirements:

Prerequisites:

General interest in bioinformatics, computational genomics or topics making use of related methodologies

Grading Scale:

Pass/Fail

Module Elective Module: Philosophy for Medical Professionals

04SM12MAS510 / Sonstiges

Description:

General description:

Was ist der Mensch?

Eine Einführung in die medizinische Anthropologie.

Die Vorstellung davon, was eine Krankheit ist, und wie sie behandelt werden soll, hängt stark von der jeweiligen Vorstellung ab, was ein Mensch sei, für Immanuel Kant die zentrale Frage der Philosophie überhaupt. Es macht beispielsweise einen Unterschied, ob wir den Menschen als eine Maschine oder als psychosomatischen Organismus verstehen. Die Anthropologie ist der Zweig der Philosophie, der sich mit dieser Frage beschäftigt. Wir werden in diesem Kurs in impliziten und meist unbewussten Menschenbilder der Medizin heute und in der Vergangenheit untersuchen.
heisst, das Ich zu überwinden.

ECTS: 4

Notes:

Kontaktperson:

Strassberg Daniel. Dr.med. Dr.phil.
Weinbergstr. 145, 8006 Zürich

dastrass@swissonline.ch

Learning Outcome:

- Wissensvermittlung im Seminarstil
- Lektüre kurzer Texte, Diskussion,
- Kurze Referate

Target Groups:

- Kennenlernen philosophischer Zugänge zu Fragen, die für den ärztlichen Alltag von Belang sind
- eine andere Form des Fragens, Denkens und Problematisierens kennenlernen.
- Lernen, einen Text zu lesen und zu verstehen

Course Materials:

Reader, die im Voraus abgegeben wird

Merkmale:

Responsible instructor:

Daniel Strassberg

Requirements:

Prerequisites:

In einem kurzen Referat oder einem kurzen Essay muss das Verständnis eines Textes und die Fähigkeit, einen eigenständigen Gedanken zu formulieren, ausgewiesen werden

Grading Scale:

Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (Every Semester)

Dates/Times/Deadlines: Der Ort der Veranstaltungen und Angaben zu einzelnen Modulen werden separat auf VAM publiziert.

Module Business Administration for Research Students: Theory (L+E)

03SMDOEC0439 / Lecture with Practical Exercises

Description:

General description:

Ph.D. Course for Ph.D. program Finance and Economics.

This course is the first part of the first-year micro sequence that prepares beginning doctoral students for their career in research. Specific topics of Part I include Choice Theory, Demand Theory, Stochastic Choice, Choice under Uncertainty, and General Equilibrium Theory. The course covers both advanced textbook material and recent research contributions.

ECTS: 9

Notes:

This course takes place together with "Microeconomics for Research Students Part I".

Venue: see module DOEC0381 "Microeconomics for Research Students Part I"

This module will not be podcasted or recorded.

Target Groups:

PhD students

Languages of Instruction:

English

Course Materials:

Course Material will be provided on OLAT (see module DOEC0381 "Microeconomics for Research Students Part I").

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Nick Netzer

Requirements:

Assessment:

The examination of the module will take place onsite.
Written examination on: Thursday, 07.01.2027, 14:00-16:00

Grading Scale:

Module Introductory Maths Course (L+E)

03SMDOEC0447 / Lecture with Practical Exercises

Description:

General description:

As preparation for the first semester we offer an introductory maths course for new Ph.D. students. The course consists of three elements: Mathematical Preliminaries for Microeconomics, Basics of Probability Theory, Introduction to Dynamic Programming and Optimal Control.

ECTS: 6

Notes:

Please refer to the syllabus for the exact schedule.

This module will not be podcasted or recorded.

Learning Outcome:

-

Target Groups:

PhD students

Languages of Instruction:

English

Course Materials:

OLAT

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Roberto A. Weber

Requirements:

Prerequisites:

-

Prior Knowledge:

-

Assessment:

There will be one joint exam for all three introductory math courses (Mathematical Preliminaries for Microeconomics, Basics of Probability Theory, Introduction to Dynamic Programming and Optimal Control).

The examination will take place onsite.

Module Business Administration for Research Students: Empirical Methods (L+E)

03SMDOEC0454 / Lecture with Practical Exercises

Description:

General description:

This course covers foundations of basic asymptotic econometric theory. This is then applied to regression models, instrumental variables models, generalized method of moments, penalized and nonparametric regression models. Emphasis is placed on understanding sampling distributions and how asymptotic theory translates into practical understanding of common estimation and inferential techniques. The topics are illustrated using theoretical, simulation, and empirical examples.

ECTS: 9

Module GEO 512 Master Exam November

07SMGEO512 / Prüfung ohne Lehrveranstaltung

Description:

ECTS: 2

Target Groups:

MSc-Studierende

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Benedikt Korf

Requirements:

Assessment:

Presentation of the Master's Thesis; oral examination; graded on a scale of 1 to 6 in quarter-point increments. Both assessed components (GEO 510/511 Master's Thesis and GEO 512 Master's Exam) must be passed. If either component is not passed, the module must be repeated.

Language of examination: German or English

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Spring Semester)

Booking Deadline/Period:

from Mo 28.09.2026 10:00 to Mo 19.10.2026 00:00

Cancellation Deadline:

from Mo 28.09.2026 10:00 to Fr 06.11.2026 24:00

Module MAT 101 Programming

07SMMAT101 / Lecture with Practical Exercises

Description:

General description:

The course is a basic introduction to Python for BSc Math students in preparation for Numerics I.

The following topics will be covered:

- Basic notions: computer, algorithms, programming languages
- Introduction to Python and Visual Studio, interpreter and scripts
- Basic data types (Numbers, booleans, strings and lists)
- Control flow (if, for and while)
- Functions
- Modules, Packages
- Numpy
- Matplotlib
- Advanced data types (tuples, dictionaries and classes)
- Input/output

ECTS: 4

Notes:

The lecture will be recorded.

Language of lecture and exam: English

Course page: <https://www.math.uzh.ch/course/mat101/>

Math BSc students can choose between MAT101 Programming, AINF Informatik 1 (economics faculty) and PHY124 Scientific Computing (spring semester) to fulfill the core module requirement.

Target Groups:

Math students in their first semester.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Joachim Rosenthal

Requirements:

Assessment:

There will be a final coding exam similar to the exercises discussed in the exercise sheets.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module BIO 382 Research internship in Virology

07SMBIO382 / Praktikum

Description:

General description:

Participating students work under individual guidance of an advanced researcher (PhD student, postdoc, group leader) on a specific defined research project and write a scientific report upon completion of the project. Thereby students acquire practical and theoretical insight into cutting edge research in Developmental Biology and Genetics.

The research projects are performed in a research group and should be arranged directly with a group leader, before contacting the module leader. Work plan and evaluation of performance are individually arranged with the group leaders.

ECTS: 4

Notes:

4-12 weeks of work in the laboratory, by arrangement.

Only for advanced Bachelor students. Students must arrange their research internship directly with a research group leader. Minimum duration is 4 weeks full time, but internships of at least 6 weeks duration are preferred. ECTS credits are according to duration, 1 ECTS per week full time internship.

Learning Outcome:

On completion of this module, students should be able to:

- perform successfully and independently a number of experimental laboratory protocols used commonly in Developmental Biology and Genetics
- choose appropriate positive and negative controls for these experiments
- interpret the results of these experiments
- use a lab book to record experimental protocols, results, and analyses
- describe the purpose of the internship project, in particular with respect to the larger research program of the host laboratory
- summarize and critically analyze in a written report the findings obtained during the lab internship, and the conclusions drawn from these findings

Module BIO 680 DNA Next Generation Sequencing – from theory to practice

07SMBIO680 / Lecture with Practical Exercises

Description:

General description:

Next-generation sequencing (NGS) technologies have revolutionized almost all fields in biology and are changing the practice of medicine. With the falling equipment and sequencing costs, they are becoming indispensable techniques in research and diagnostic laboratories. As a joint state-of-the-art research and training facility of the ETH Zurich and the University of Zurich, the NGS team at the Functional Genomics Center Zurich (FGCZ) offers a five-day course with hands-on practicals.

The lectures cover NGS technologies, their applications and data analysis principles. The practicals consist of sequencing library preparation from gDNA, sequencing run set up on bench top sequencer, and sequencing data analysis. Additionally, single molecule sequencing is covered during this course, including a practical session.

ECTS: 2

Notes:

For further information please check our website <https://fgcz.ch/education/genomics-courses.html>

Room: at FGCZ Y59

Learning Outcome:

By the end of this course, participants should be able to

- Explain the principles and operations of all currently available NGS platforms
- Discuss research possibilities using NGS technologies
- Practice the entire process of sequencing including library preparation from genomic DNA, sequencing on the bench top sequencer
- Select and apply software tools for basic NGS data analysis tasks
- Critically evaluate sequencing and analysis results

Description:

General description:

Die Organisation der Unterrichtspraktika erfolgt über die Administration der Abteilung Lehrerinnen- und Lehrerbildung (LLBM). Informationen über die Anmeldung finden Sie auf unserer Homepage unter "Wegleitung zum Praktikum II". Sie gelangen zum direkten Link indem Sie die Veranstaltung unten anklicken. Die Anmeldung zu den Praktika läuft auf zwei Ebenen: 1. Anmeldung via Formular bei der Administration LLBM. 2. Reguläre Modulbuchung im UZH-System.

ECTS: 4

Merkmale:

Responsible instructor: Yves Karlen

Requirements:

Prerequisites: Für die Zulassung zum Praktikum ZF wird der erfolgreiche Abschluss der Fachdidaktikmodule sowie der Übungslektionen im entsprechenden Unterrichtsfach vorausgesetzt.

Assessment: Der Leistungsnachweis zum Unterrichtspraktikum ZF besteht in der bestätigten Hospitation von 10 Lektionen, in der Planung und Durchführung von 20 Lektionen sowie in den hierzu erfolgten Besprechungen. Anforderungen, welche beim Entscheid über das Bestehen berücksichtigt werden, sind in der Wegleitung zum Unterrichtspraktikum II-Z dargelegt (siehe <https://www.lehrdiplom.uzh.ch>). ---

Module Lessons Training Z

06SM090BPUEZ / Module

Description:

General description:

Die Übungslektionen werden parallel zu den Fachdidaktik-Modulen absolviert und ermöglichen den Studierenden erste Praxiserfahrung im zusätzlichen Unterrichtsfach. Die Übungslektionen werden im Rahmen der Fachdidaktikkurse - organisiert von den Fachdidaktik-Dozierenden - absolviert. Die Studierenden buchen dieses Modul im UZH-System idealerweise im Semester der FD II. Die ECTS-Punkte werden eingebucht, wenn die Fachdidaktik-Dozierenden über alle Unterlagen verfügen, frühestens aber am Ende des Semesters der FD II.

ECTS: 2

Merkmale:

Responsible instructor: Yves Karlen

Requirements:

Prerequisites: Allgemeine Voraussetzung: Fundiertes fachwissenschaftliches Wissen im entsprechenden Fach. Die Übungslektionen in einem Fremdsprachenfach setzen die erfolgreich absolvierte Sprachkompetenzprüfung voraus.

Assessment: Absolvierte Übungslektionen: Das Modul ist bestanden, wenn die fünf erteilten Lektionen zuverlässig durchgeführt und insgesamt als genügend beurteilt wurden.

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Module BME 682 Principles of teaching in human physiology

07SMBME682 / Tutorat

Description:

General description:

The module provides the theoretical and practical fundaments in four topics of human physiology. After acquisition of the theoretical backgrounds, the participants develop their teaching skills by supervising medical students in accomplishing specific experiments.

ECTS: 2

Notes:

1 introductory session and maximally 8 afternoons per semester during 4 semesters

Learning Outcome:

On completion of the module, the students should be able to:

- describe the interactions and interdependencies of organ functions
- explain the contributions of specific physiological pathways in complex regulatory processes
- perform non-invasive measurements on human subjects

Target Groups:

Students of the PhD Program in Biomedicine and PhD students of the Institute of Physiology

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Vartan Kurtcuoglu

Requirements:

Assessment:

Direct assessment during module.

Module Subject Didactics Latin III (4 ECTS)

06SM090Lat34 / Module

Description:

General description:

Im Modul Fachdidaktik III wird am Beispiel ausgewählter Unterrichtssituationen oder Unterrichtsthemen das in den Modulen Fachdidaktik I und II erworbene Wissen unter weiterem Einbezug von fachdidaktischer und erziehungswissenschaftlicher Forschung ergänzt und vertieft. Studierende mit zweitem bzw. zusätzlichem Unterrichtsfach erbringen eine zusätzliche Leistung, in welcher das erworbene Wissen im Hinblick auf den Unterricht umgesetzt wird, und buchen daher dieses Modul mit 4 ECTS Credits.

ECTS: 4

Merkmale:

Responsible instructor: Katja Vogel

Requirements:

Assessment: Portfolio aus selbsterstellten Unterrichtsmaterialien Das Modul wird als bestanden bewertet, wenn alle Elemente des Portfolios bestanden sind Aktive Teilnahme an den Lehrveranstaltungen und regelmässige Präsenz in der Lehrveranstaltung wird erwartet

Module Banking and Contract Economics (S)

03SMDOEC0481 / Doktorandenseminar

Description:

General description:

This course is to introduce the student to the scientific literature dealing with the economics and econometrics of banking and insurance, both theoretical and empirical.

ECTS: 9

Notes:

The re-examination is only open to students who did not pass the examination in the spring term 2026 (due to failing or illness on day of exam). Students who do not fulfill this requirement may not take the examination.

Students who fulfill this requirement can book the re-examination via my modules.

Target Groups:

1st year doctoral students

Languages of Instruction:

English

Course Materials:

Text Books: Freixas, X., and J. C. Rochet, 2023, Microeconomics of Banking (MIT Press).
Degryse, H., M. Kim, and S. Ongena, 2009, Microeconometrics of Banking (Oxford University Press).

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Steven Ongena

Requirements:

Prerequisites:

Master recent developments in banking economics

Assessment:

Re-examination on Monday, 26 October 2026, 14:00 - 15:45.

Module Research Seminar in Accounting, Auditing & Governance (S)

03SMDOEC0523 / Doktorandenseminar

Description:

General description:

The seminar provides a platform for research papers and projects of invited speakers, faculty and PhD students in the area of the excellence topic "Accounting, Auditing & Governance".

ECTS: 3

Notes:

ECTS credits can only be obtained by doctoral students supervised by one of the organizing professors upon prior approval by the course coordinator. Interested students must contact the course coordinator (dar@business.uzh.ch) before the beginning of the term (31.07.2026) and ask for admission prior to booking the module.

Learning Outcome:

Understanding and doing cutting edge research in the area of Accounting, Auditing & Governance

Target Groups:

Doctoral students in the area of Accounting, Auditing & Governance.

Languages of Instruction:

English

Course Materials:

<https://www.business.uzh.ch/professorships/managerialaccounting/lehre/aag>

Merkmale:

Module Experimental and Behavioral Economics Seminar (S)

03SMDOEC0524 / Doktorandenseminar

Description:

General description:

In-depth study of economics, in particular in the areas of personnel and organizational economics, labor market economics, altruism, and neuroeconomics.

ECTS: 3

Notes:

This course will take place in BLU-003 (Blümlisalpstrasse 10, 8006 Zürich).

Learning Outcome:

An in-depth study of the topics presented in the seminar.

Target Groups:

Graduate students in economics or neuroeconomics with a strong interest in personnel and organizational economics, labor market economics, altruism, and/or neuroeconomics.

Languages of Instruction:

English

Course Materials:

Will be provided electronically

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Roberto A. Weber

Requirements:

Prerequisites:

Excellent knowledge of English, strong knowledge of the fields of economics and neuroscience.

Prior Knowledge:

Students should have already begun their graduate studies in economics or neuroeconomics.

Assessment:

3-4-page term paper that discusses the connections found between the course participant's own research and the research presented in class.
To be sent to roberto.weber@econ.uzh.ch no later than January 4, 2027.

Module Research Design in Neuroeconomics (S)

03SMDOEC0525 / Doktorandenseminar

Description:

General description:

This is an internal seminar for the course instructors' doctoral students, in which proposed projects are presented for approval.

ECTS: 3

Notes:

This course will take place in BLU-003 (Blümlisalpstrasse 10, 8006 Zurich).

If you wish to attend this course, please send an e-mail with your name and student ID number (Matrikelnummer) to cornelia.schnyder@econ.uzh.ch

Live stream available.

Learning Outcome:

In-depth study of the materials presented

Target Groups:

Course instructors' doctoral students

Languages of Instruction:

English

Course Materials:

The seminar organizer will distribute the readings electronically on a regular basis.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Todd Anthony Hare

Requirements:

Prerequisites:

In order to take this course, students should have already successfully completed the following four courses: Cognitive Neuroscience, Cognitive Economics (Decision Theory), Decision Neuroscience, and Cognitive Foundations of Economics (Neuroeconomic Foundations of Decision Making).

Assessment:

Project presentation (60%) Regular active attendance (40%)

Module Non-Invasive Brain Stimulation for Neuroeconomics (S)

03SMDOEC0530 / Doktorandenseminar

Description:

General description:

This course will introduce the non-invasive brain stimulation methods commonly used in neuroeconomic and cognitive neuroscience research. More specifically, the course will introduce transcranial magnetic stimulation (TMS), transcranial direct current stimulation (tDCS), and other forms of transcranial electric stimulation through a series of lectures and practical demonstrations. We will cover the basic physical principles of each technique, common forms of usage in empirical research, some landmark findings, and safety aspects.

ECTS: 3

Notes:

This course will take place in BLU-003 (Blümlisalpstrasse 10, 8006 Zürich).

If you wish to attend this course, please send an e-mail with your student ID number (Matrikelnummer) to cornelia.schnyder@econ.uzh.ch

Learning Outcome:

The aim of this course is to familiarize the students with these techniques so that they can start planning experiments that employ these techniques to address questions about causal brain-behavior relations.

Target Groups:

Doctoral students in economics, neuroscience, and psychology with an interest/focus in interdisciplinary research; postdoctoral researchers

Languages of Instruction:

English

Course Materials: OLAT

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Christian Ruff

Requirements:

Prerequisites: -

Prior Knowledge: Basic knowledge of the brain and neuroeconomics / cognitive neuroscience

Assessment: Oral report, written summary, regular active attendance (whereby each make up one-third of final grade)

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Module MAT 820 Practical training in numerics

07SMMAT820 / Seminar

Description:

General description:

The numerical practical can formally consist of a seminar and a seminar paper or just a seminar paper.

In terms of content, the aim is to apply a learned numerical method to a specific problem and to carry out numerical experiments in order to analyze its behavior (convergence, robustness, applicability, efficiency) and compare it with the theory.

A numerical practical can form the basis for a subsequent master's thesis and is typically linked to current research directions of the Numerical Research Group at I-Math in close collaboration with the members of the working group.

ECTS: 3

Notes:

Interested students can contact the head of the Numerical Methods research group, Professor Stefan Sauter, at any time.

Registration for the Numerical Methods Practicum: The Numerical Methods Practicum is generally offered every semester. The prerequisite is successful completion of the MAT801 Numerical Methods 1 module. The Numerical Methods Practicum counts as a seminar in the degree program.

If you are interested, please send an email to Prof. Dr. Stefan Sauter by September 6, 2026, for fall semester 26, providing information about which lectures you have already attended in the field of numerical analysis and where you are in your studies. The topic will then be assigned in a joint discussion.

Target Groups:

Bachelor or master students in mathematics

Module EEE 330 Population Ecology

07SMEEE330 / Block Course

Description:

General description:

This course is designed to expose students to concepts and models in population ecology, and their application to conservation and management of wildlife populations.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Maximum participants 20

Learning Outcome:

The aim is to equip students with basic quantitative tools for analyzing and predicting wildlife population responses to their environment and to potential management interventions. By the end of the course, students will be able to:

Describe and explain in detail various models of population dynamics;

Apply concepts and models in population ecology to conservation and management of wildlife populations;

Master quantitative techniques for estimation of animal abundance and related population parameters.

Design and conduct experiments for investigating population dynamics in a lab system.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Arpat Ozgul

Requirements:

Prerequisites:

Third year Bachelors and Masters students

Assessment:

One exam (2 hour long), a lab report, participation to paper discussions. In English.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Module AST 512 Theoretical Astrophysics

07SMAS512 / Lecture with Practical Exercises

Description:

General description:

This course covers the foundations of theoretical astrophysical: fluid dynamics, the structure of stars, radiative transfer, and the theory of collisionless system. We will mostly follow the book "Lectures on Astrophysics" by Steven Weinberg.

ECTS: 10

Course Materials: Lectures on Astrophysics by Steven Weinberg

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Jaiyul Yoo

Requirements:

Prerequisites:

- Introduction to Astrophysics
- Mathematical Methods for the Physicist
- Quantum Mechanics

(All preferred but not obligatory)

Prior Knowledge:

Mechanics
Quantum Mechanics and atomic physics
Thermodynamics
Fluid Dynamics
Electrodynamics

Assessment: Oral Exam.

Exam dates are published here:

Module STA 880DP Epidemiology and Biostatistics Methods Seminar (fall semester)

07SMSTA880DP / Seminar

Description:

General description:

This seminar provides the students of the Epidemiology and Biostatistics PhD program with a common background on important topics of general interest and with specialized views on some research subjects. The modus of teaching is a mix of student and research seminar, with different activities taking place each semester.

- Input sessions by researchers mostly in collaboration with a subset of students and with incorporated group work sometimes including preparatory tasks for the entire audience.

- Colloquium talks by faculty members sometimes with active components for the entire audience.

Topics vary between semesters, e.g.

- Misconceptions and Misspecifications in the Interpretation of Evidence

- Reproducibility and ethics

- Visualization

- Personalized Medicine.

ECTS: 1

Target Groups:

Students of the PhD Program in Epidemiology and Biostatistics.

Languages of Instruction:

English

Merkmale:

Module STA 404DP Clinical Biostatistics

07SMSTA404DP / Lecture with Practical Exercises

Description:

General description:

Uncertainty is the rule in medicine and the science of managing medical uncertainty is biostatistics. The aim of the lecture "Clinical Biostatistics" is to give students an introduction to the most important statistical methods used in different areas of clinical research. First, quantifying clinical measurement error is central to the analysis of diagnostic studies and the assessment of agreement.

Second, the randomized controlled trial (RCT) is the key concept to assess therapy, and advanced statistical methods are used in the design, implementation and analysis of RCTs. Finally, techniques for meta-analysis will be discussed.

The following topics will be addressed: Confidence intervals for proportions, analysis of diagnostic studies, ROC curves, analysis of agreement, randomized controlled trials, hypothesis tests and sample size calculation, randomization and blinding, analysis of continuous and binary outcomes, multiplicity, subgroup analysis, protocol deviations, some special designs (crossover, equivalence, and cluster-randomized trials), principles of survival analysis, meta-analysis.

ECTS: 3

Notes:

IMPORTANT: Please note that the time between noon and the lab session should be reserved for the preparation of the lab session in groups.

Master students in Biostatistics must book the module STA 404 Clinical Biostatistics.

Target Groups:

- Students of the PhD program in Clinical Science
- Students of the PhD program in Care and Rehabilitation Sciences
- Students of the PhD program in Epidemiology and Biostatistics

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Leonhard Held

Requirements:

Assessment:

- Active participation in the lecture and the lab: checked through activity in discussions and presentations.
- The preparation for the lab is group work, groups will be meeting between lecture and lab (12-15).
- Successful participation in the lab is a prerequisite for admittance to the exam.
- Written exam in January, repetition exams in June may be oral.
- Further details are announced in the lecture.

Grading Scale:

1-6, Half Grades Given

Module GEO 871 Retrieving Geographic Information

07SMGEO871 / Lecture with Practical Exercises

Description:

General description:

Unstructured information in the form of text forms a central, but often unexploited source of geographic information. Such text can for example take the form of historic corpora of newspaper articles, social media in the form of Tweets or blog entries or other digital corpora relating to specific domains such as mountaineering, ecology or travel diaries. In this course we will explore how large volumes of text can be processed, indexed, analysed and retrieved using a broad range of approaches, and the potential of unstructured text to add value to more traditional forms of geographic information.

ECTS: 3

Learning Outcome:

- You can demonstrate the importance of unstructured text as a source of geographic information through examples
- You can discuss the strengths and weaknesses of a range of approaches to adding spatial references to text
- You can describe approaches to indexing textual information and their implications for retrieval effectiveness and efficiency
- You can suggest ways of analysing and exploring large text corpora
- You can suggest and apply a range of approaches to evaluating geographic information retrieval

Target Groups:

Master's students in Geography and other related areas

Languages of Instruction:

English

Course Materials:

Lecture, seminar, practical exercises

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Ross Stuart Purves

Requirements:

Prerequisites:

BSc

Assessment:

All students participate in a group presentation (pass/fail) as a prerequisite for completing their individual projects. Individual projects consist of a written report and a lightning talk. Project grading is weighted as follows:

- Lightning talk 10%;
- written report on project work 90%.

Grades are 1-6 in quarter steps.

Individual written paper which may be submitted in English or German.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module BIO 230 Cancer Stem/Propagating Cells and their Microenvironment

07SMBIO230 / Block Course

Description:

General description:

This course introduces state of the art experimental approaches and techniques in cancer biology with a focus on the study of the malignant hematopoietic system and cancer stem cells. After a short introduction, students will be offered a focused project in one of the four participating research groups. The experiments will be components of an ongoing project of these laboratories. Techniques include among others mouse models of malignant disease, ex-vivo modelling of cancer propagating cells and their microenvironment, microscopy, flow cytometry and cell sorting, functional assays in cell cultures, clonogenic assays, automated microscopy and image analysis, molecular and cell biology applications

ECTS: 6

Notes:

To be performed before starting a master thesis. Participation to at least two other modules of the cancer biology master program.

DIE ANMELDUNG FÜR DIE BLOCKKURSE ERFOLGT UNTER <https://www.mybiportal.uzh.ch>

Learning Outcome:

By the end of this module students should be able to

- Demonstrate their understanding and command of relevant concepts in the context of their project as well as the experimental methodology
- Identify, summarise and discuss scientific literature in relation to the proposed project
- Recognise the basic requirements for correct experimental design
- Critically discuss the results obtained and illustrate their relevance and relation to the concept studied.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Jean-Pierre Bourquin

Requirements:

Assessment:

Evaluation in English based on

- oral presentation of the project (2/5)
- written short report (2/5)
- learning of and performance in laboratory tasks (1/5)

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module BME 312 Epigenetics and Disease

07SMBME312 / Block Course

Description:

General description:

Aberrant epigenetic modifications play major roles in many disease, including cancer and metabolic disorders. In this course we introduce the basics of epigenetics at the molecular level in physiological and pathological conditions and apply the most important techniques to measure and analyze epigenetic modifications such as DNA methylation and histone modifications in cells.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Learning Outcome:

Students who successfully complete this course should be able to:

- explain the basics of epigenetics at molecular levels in healthy and disease states
- describe the basics of the most important molecular methods for the analysis of DNA, RNA, and proteins to study epigenetic regulation
- describe array and sequencing technologies to study epigenetic features as well as some statistical and computational methods applied in epigenetics
- apply techniques to identify, measure and analyse epigenetic modifications in healthy and disease cells

Key skills

Students who successfully complete this course should be able to:

- draw conclusions based on experimental observations and propose additional experiments aimed at testing these conclusions
- understanding research papers in the field of epigenetics of an audience

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Raffaella Santoro

Requirements:

Prerequisites:

- Basic studies completed
- Skill and competence in biochemistry and molecular biology

Assessment:

Student assessment is a graded semester performance based on individual performance in the laboratory (written reports and protocols) and written exam. All parts of the assessment are in English. Insufficient reports and protocols must be revised, insufficient written exam will be repeated.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module AST 291 Proseminar Astrophysics

07SMAS291 / Seminar

Description:

General description:

Introduction to Astrophysics Research

ECTS: 2

Notes:

Either AST 291 or AST 295 have to be completed. (Both can be completed if the student wishes to do both. In that case, the number of ECTS from the electives changes accordingly).

Learning Outcome:

An introduction to the research literature of astronomy and astrophysics, presentation of research articles, synthesis of research ideas.

Target Groups:

Students have to be enrolled in the Astrophysics or the Astronomy and Astrobiology minor and already have taken at least 10 ECTS counting towards the minor.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Module GEO 299 Reflecting geographical thought and impact

07SMGEO299 / Seminar

Description:

General description:

Small Group Teaching - 3rd Semester

Overview

1. Reading Assignments: Students receive three readings (e.g. newspaper articles, textbook chapters, or academic papers) aligned with their semester level and covering key areas in Geography: Human, Physical, and Remote Sensing/GIScience.
2. Group Discussions: Each reading is discussed in groups of 4-6 students, led by a discussion facilitator. Sessions last 60 minutes, beginning with clarifying questions before moving into deeper analysis. The focus is on applying and critically engaging with scientific knowledge-not rote learning.
3. Productive Task with Feedback: Students complete an assignment integrating the readings and receive formative feedback to support academic skill development.

ECTS: 1

Notes:

Tuesday, 22 September 2026 is a mandatory event for all participants, and four additional dates will follow.

Registration for a specific tutorial time slot is available through OLAT:

(<https://lms.uzh.ch/auth/RepositoryEntry/17878024353/CourseNode/85421310414617>) and will remain open until September 20, 2026 (23.59h). After this date, tutorial sessions will be allocated by Module organizers.

Learning Outcome:

- You can effectively read and summarise the key discussion points in a range of literature related to geography as an academic discipline;
- You can identify areas of a text which you have difficulty with, and formulate questions to resolve these;
- You can discuss, based on your reading, the implications of a text with a group of peers;
- You gain in-depth insights into a specific thematic domain relevant to geography in a broader sense; and
- You can complete a pre-defined scholarly task, either oral or written, presenting a cogent argument related to a given question.

Target Groups:

BSc students

Languages of Instruction:

Englisch

Course Materials:

Will be available through OLAT

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Sara Fabrikant

Requirements:

keine

Prior Knowledge:

keine

Assessment:

To pass the module Geo 299 students must (all pass/fail):

- Register for a specific tutorial time slot is available through OLAT (<https://lms.uzh.ch/auth/RepositoryEntry/17878024353/CourseNode/85421310414617>) until September 20, 2026.
- Participate in the in-person introductory lecture and tutor meet-up on Tuesday, 22 September 2026.
- Participate in all four 60 min. tutorial sessions throughout the semester and deliver an oral presentation in CW 49/50.

If a tutorial session is missed with a valid excuse (doctor's notice), a one-time-only 1000-word make up essay can be delivered of the tutorial session that was missed. This is to be delivered before the next tutorial session.

Module BIO 381 Research Internship Immunology

07SMBIO381 / Praktikum

Description:

General description:

Das Forschungspraktikum wird in einzelnen Forschungsgruppen ausgeführt. Arbeitsprogramm und Details der Leistungsprüfung werden mit dem jeweiligen Gruppenleiter individuell vereinbart. Am Schluss verfasst der/die Kandidat/in einen Bericht in Form einer wissenschaftlichen Publikation mit Zusammenfassung, Einleitung, Resultaten, Diskussion sowie Literaturangaben. Der/die Kandidat/in schickt den Bericht innert nützlicher Frist an den direkten Betreuer/in und den/die Modulverantwortlichen.

ECTS: 4

Notes:

Die Forschungspraktika werden in den Forschungsgruppen des Institutes für Experimentelle Immunologie und der medizinischen Fakultät ausgeführt.

Diese Forschungspraktika richten sich, wie in der Wegleitung der Biologie präzisiert, an Studierende im Bachelor-Studiengang und ausdrücklich nicht an Studierende im Master-Studiengang.

Learning Outcome:

Durchführung eines Forschungsprojekts im kleinen Rahmen. Der Student/in lernt, eine wissenschaftliche Hypothese anhand einschlägiger Literatur zu formulieren. Er/sie lernt, diese Hypothese mit Hilfe von Experimenten systematisch und sorgfältig zu überprüfen. Dabei wird vom direkten Betreuer/in besonderer Wert auf richtig durchgeführte Messungen gelegt, inklusive Kontrollmessungen mit Background-, Negativ- und Positiv- Kontrollen. Der Student/in lernt, die Hypothese und die gemachten Experimente in einem wissenschaftlichen Bericht zu formulieren und die Daten im Kontext bestehender Literatur zu diskutieren.

Target Groups:

Studierende im Bachelor-Studiengang (vgl. Wegleitung Biologie).

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Burkhard Becher

Requirements:

Assessment:

Arbeitsprogramme und Details der Leistungsüberprüfung werden mit der Abteilungsleitung individuell vereinbart und müssen im voraus beim Modulverantwortlichen und dem Masterkoordinator gemeldet werden. Die Arbeit wird in der Regel auf Englisch verfasst. Der direkte Betreuer/in der Arbeit macht zuhänden des/der Modulverantwortlichen einen Notenvorschlag, der gegebenenfalls vom Modulverantwortlichen modifiziert werden kann.

Grading Scale:

1-6, Half Grades Given

Module STA 426DP Statistical Analysis of High- Throughput Genomic and Transcriptomic Data

07SMSTA426DP / Lecture with Practical Exercises

Description:

General description:

A range of topics will be covered, including basic molecular biology, genomics technologies and in particular, a wide range of statistical and computational methods that have been used in the analysis of DNA microarray, high throughput sequencing and cytometry experiments.

In particular, lectures will include: microarray preprocessing; normalization; exploratory data analysis techniques such as clustering, PCA, multidimensional scaling, UMAP, tSNE; controlling error rates of statistical tests (FPR versus FDR versus FWER); limma (linear models for microarray analysis); mapping algorithms (for RNA/ChIP-seq); RNA-seq quantification; statistical analyses for differential count data; isoform switching; epigenomics data including DNA methylation; gene set analyses; classification; analysis of single-cell cytometry and gene expression datasets

ECTS: 3

Notes:

- Phd students of the Epidemiology and Biostatistics program
- Students of other PhD programmes where genomic data is being analysed

Learning Outcome:

- Understand the fundamental "scientific process" in the field of Statistical Bioinformatics
- Be equipped with the data science skills to preprocess, visualise and explore genomic data (using R, Unix, Bioconductor, etc.) while ensuring reproducible research (knitr)
- Have a general knowledge of the types of data and biological applications encountered with microarray, sequencing and cytometry data
- Have the general knowledge of the range of statistical methods that get used with microarray, sequencing and cytometry data
- Gain the ability to apply statistical methods/knowledge/software to a collaborative biological project
- Gain the ability to critical assess the statistical bioinformatics literature
- Write a coherent summary of a bioinformatics problem and it's solution in statistical terms

Languages of Instruction:

English

Course Materials: Lecture notes, published manuscripts

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Mark D. Robinson

Requirements:

Prior Knowledge: Grundkenntnisse in der Programmiersprache R

Basic knowlegde of the programming language R

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Module BIO 631 Current Immunological Research in Zurich

07SMBIO631 / Seminar

Description:

General description:

This monthly meeting is a platform for Zurich-based immunology research groups to present and discuss their ongoing research projects. At each meeting three PhD students or Postdocs from the participating research groups present an ongoing research project in a 30 min seminar followed by a plenary discussion.

4.6.2026 ETH Room HCI J6

3.9.2026 ETH Room HCI J6

ECTS: 0

Notes:

Alternating between Irchel and ETH Hönggerberg <http://www.immunology.uzh.ch/events.html>

If you want to be on the mailing list for this seminar, please send an email to: annika.hausmann@hest.ethz.ch

4.6.2026 ETH Room HCI J6

3.9.2026 ETH Room HCI J6

Learning Outcome:

By the end of this module each participant

- is updated in diverse topics of immunology and has insight in the current research projects carried out in Zurich.
- knows better other research groups, which fosters the establishment of science- and technology-based interactions.

Module GEO 815 Quantification and modelling of the Cryosphere

07SMGEO815 / Lecture with Practical Exercises

Description:

General description:

This course introduces quantitative approaches and models to processes of the cryosphere in high mountain areas. The main focus are dynamic and thermal processes related to glaciers and permafrost. During the course, simple mathematical and numerical models will be used to investigate ground temperature profiles as well as glacier evolution and dynamics in relation to climate.

For the modeling and project parts of the course, programs written in the Python programming language are used. Prior Python or programming knowledge is not necessary, and introductory tutorials are given.

The course starts with lectures introducing the basic concepts of the different topics. The main focus lies on extensive computer practicals in which the related quantitative methods and models are applied and explored. Extensive group work on a topic of choice, using the quantitative models, will give a deep understanding how computer models are used in applied science.

ECTS: 3

Notes:

GEO815 can be combined with GEO 851 (HS), GEO 856 (FS) or GEO 857 (FS) for consolidation (Vertiefungsblock) in Physical Geography.

The Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

This SDG is covered in this module: 13

Learning Outcome:

This course combines lectures providing the background on the physical processes and methods with computer practicals in which quantitative methods are applied to glaciers and permafrost processes. These lectures and practicals run as 2-hour blocks per week and are combined with group and individual exercises. Topics indicative for the content of this course are:

- Heat flow processes in the ground and in glaciers, and their solution with numerical models.
- Glacier dynamics and evolution in relation to climate change.
- Simple and reduced mathematical models for glaciers flow.
- Numerical models for glacier dynamics.

Target Groups:

MSc students with special interest in high-mountain environments

Languages of Instruction:

English (Deutsch)

Course Materials:

Course information and documents will be provided on OLAT

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Martin Lüthi

Requirements:

Prerequisites: GEO 341 Specialisation in Physical Geography: Glaciers & Permafrost

Assessment: The module grade is composed of the following components:

- Three individual homework problems – the average counts for 50% of the final grade
- Group project with presentation – counts for 50% of the final grade

There are no resit opportunities for assessed components. All homework problems are graded and have to be passed. If the module is not passed, the entire module must be repeated in the next available semester.

Language of assessments: English

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module BIO 621 Training in Neuroscience Laboratory Research

07SMBIO621 / Praktikum

Description:

General description:

This block course is specifically designed for Master students in the Neurobiology Master program that have already started their Master thesis. The students arrange a full-time research project in a neuroscience lab, with must be different from the experimental approach of their Master project. The course entitles a short proposal (before the internship), a final report and an oral presentation after the course.

ECTS: 12

Notes:

This course can only be taken by Master's students in Neurosciences, as an alternative for BIO 328. Student who are accepted for BIO 328 are not eligible. This course can only be booked after consultation with Prof.

S. Neuhauss or Prof. E. Stoeckli.

Cannot be repeated.

Learning Outcome:

The aim of this course is to acquire valuable experimental skills in a research laboratory. The techniques should be complementary to those used during the Master project. The student should be able to produce a concise and convincing research plan, perform experiments and present the results in both written and oral form. On successful completion of this module the student should be able to:

- propose and execute a research project
- write a concise report on the obtained results
- structure and present a concise scientific talk

Module GEO 113 Fernerkundung und Geographische Informationswissenschaft I: Erdperspektiven

07SMGEO113 / Lecture with Practical Exercises

Description:

General description:

In this course you will be introduced to concepts, data, methods and the interpretation of spatial data in geography. The course will open by introducing key concepts related to the conceptual modelling and representation of spatial-temporal data. You will learn how remote sensing and surveying methods can collect data from the ground, the air and space and be aware of the strengths and weaknesses of different sensors and methods. We will explore how spatial data can be mapped and analysed, focussing on the built and natural environments and the use of spatial data to both measure and understand processes in the real world.

We will give examples of both applied and research applications of spatial data in diverse domains such as building cadasters, humanitarian relief, global land cover change, animal behaviour and natural hazards.

The course will be taught through lectures, introducing key concepts, theories, data and methods and practical exercises where you will have the chance to put these ideas into practice. It serves as a foundation for further courses in Geographic Information Science and Remote Sensing throughout your studies. Should you have questions about this module, please contact Ross Purves (ross.purves@geo.uzh.ch).

ECTS: 5

Learning Outcome:

After this course you will:

- Understand different ways in which spatial data can be represented and collected
- Be able to explain the strengths and weaknesses of different remote sensing and surveying methods with respect to the collection of spatial data
- Know how to import and represent spatial data given appropriate software
- Be able to carry out simple spatial analysis tasks and critically interpret the results

Target Groups:

Bachelor students majoring and minoring in Geography and related subjects.

Languages of Instruction:

English

Course Materials: Lecture slides and practical information will be provided through OLAT.

Merkmale: Target Group: Open to School Students

Responsible instructor: Ross Stuart Purves

Requirements:

Prerequisites: None

Prior Knowledge: Basic computer literacy

Assessment: Lecture component: a 60-minute written examination, sat in person without aids, graded 1.0–6.0 in quarter-point increments.
Seminar component: a portfolio comprising five exercises, each graded 1.0–6.0 in quarter-point increments. Unsatisfactory exercises may be revised once.

Participation in the examination is permitted only with a portfolio mark of ≥ 4.0 .

Module mark: 1.0–6.0 in quarter-point increments (50% examination, 50% portfolio).

Passing requirements: both the exercises and the examination must be passed with a mark of ≥ 4.0 .

Language of assessments and examination: English

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Organisation: Department of Geography

Offered in:
Fall Semester 2026
Fall Semester 2025
Fall Semester 2024
Fall Semester 2023
Fall Semester 2022

Module GEO 112 Humangeographie I: Geographien der Globalisierung

07SMGEO112 / Lecture with Practical Exercises

Description:

General description:

Das Modul GEO112 "Humangeographie I: Geographien der Globalisierung" besteht aus einer zweistündigen Vorlesung (GEO112.1) mit einem Äquivalent von 3 ECTS und einer begleitenden Übung (GEO112.2) mit einem Äquivalent von 2 ECTS. Der Leistungsnachweis für GEO112 besteht aus einer 1-stündigen schriftlichen Klausur (GEO112.1) und Übungsaufgaben (GEO112.2).

ECTS: 5

Notes:

Die Agenda 2030 der Vereinten Nationen (UNO) umfasst 17 Ziele für nachhaltige Entwicklung Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>), die von allen UN-Mitgliedstaaten verabschiedet wurden. Sie bilden einen gemeinsamen Rahmen zur Förderung von sozialer Gerechtigkeit, Umweltschutz und wirtschaftlicher Entwicklung weltweit.

Behandelt werden in diesem Modul insbesondere: 1; 8; 10; 11; 12; 16 & 17

Learning Outcome:

Sie können theoretische Basisgrundlagen, Fakten und Konzepte zu folgenden Themenkreisen der Humangeographie darlegen und auf einfache Beispiele anwenden:

- Gesellschaft und Raum: Grundperspektiven der Humangeographie, Raumkonzepte, Gesellschaftsformen, Globalisierung.
 - Staat in der Globalisierung: Souveränität, Grenzen, Nation, Identität.
 - Wirtschaft im globalen Zeitalter: Warenketten, Arbeitsbeziehungen und Unternehmensstrategien.
 - Städte im Kontext globaler Transformationen: Globale Urbanisierungsprozesse, städtische Raumentwicklungen, urbane Lebensbedingungen.
- Sie kennen die Grundlagen wissenschaftlichen Arbeitens in der Humangeographie und können diese in einem kleinen Projekt anwenden.

Target Groups:

Erstsemestrige Hauptfach und Nebenfach Geographie

Languages of Instruction:

Deutsch und Englisch; Prüfungsfragen (Deutsch) können auch auf Englisch beantwortet werden.

Course Materials:

Materialien werden auf OLAT zur Verfügung gestellt.

Merkmale:

Target Group: Open to School Students

Responsible instructor:

Benedikt Korf

Requirements:

Prerequisites:

keine

Prior Knowledge:

keine

Assessment:

Lecture component: a 60-minute written examination, sat in person, without any aids, graded on a 1.0–6.0 scale in quarter-point increments.

Seminar component: a portfolio comprising four assessed tasks:

- Task 1: citation exercise, pass/fail;
- Task 2: writing exercise, pass/fail;
- Task 3 (group work): presentation, graded 1.0–6.0; contributes 40% of the seminar mark;
- Task 4: short seminar paper, graded 1.0–6.0; contributes 60% of the seminar mark.

Assignments 1 and 2 can be resubmitted once if not passed. A grade deduction of 0.5 will be applied to the assignment grade in the case of a resubmission. The assignments must be passed in order to be admitted to the written examination.

Module mark: 60% examination, 40% portfolio. The module is passed with an overall mark of 4.0.

Language of assessments: German. Responses may also be provided in English.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module GEO 111 Physical Geography I: Basics and spheres

07SMGEO111 / Lecture with Practical Exercises

Description:

General description:

Basics of scientific concepts and global relationships regarding the atmosphere, lithosphere, cryosphere, hydrosphere, pedosphere and biosphere

ECTS: 5

Notes:

The Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 2; 3; 6; 7; 9; 11; 12; 13; 14 & 15

Learning Outcome:

- You will learn the basics of physical geography and apply some of these exercises to the lectures.
- You know the basics of physical geography and can use its definitions and technical terms correctly.
- You acquire the physical-geographical background of current problems (climate change, erosion,...).
- In practical exercises they apply the principles of scientific work (analysis, interpretation, written summary).

Target Groups:

1. Semester BSc

Languages of Instruction:

English and German (only 2 to 3 lectures in English)

Course Materials:

Script, references to textbooks

Merkmale:

Target Group: Open to School Students

Responsible instructor:

Maria J. Santos

Requirements:

Prerequisites:

None applicable

Prior Knowledge:

None applicable

Assessment:

Three exercises (pass/fail) and one written examination.

The three exercises are submitted individually and assessed on a pass/fail basis. Failed exercises may be resubmitted once within the same semester. The examination takes place at the time and date specified by the MNF and is graded on a 1–6 scale.

The module is passed when all exercises and the examination have been successfully completed; the pass mark for the examination is 4. An examination review is possible and grades may be adjusted where appropriate. A resit

examination is available; students may take the examination a maximum of two times.

All exercises must be passed for the final grade and the ECTS credits to be awarded.

Language of assessments: German

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module BCH 100 What is Biochemistry

07SMBCH100 / Seminar

Description:

General description:

Introduction to the structure of the study course biochemistry, studying in the times of Bologna, first insights into current biochemical research, career opportunities after graduation.

Web Link: <https://lms.uzh.ch/auth/RepositoryEntry/16579362865>

ECTS: 1

Notes:

Web Link: <https://lms.uzh.ch/auth/RepositoryEntry/16579362865>

Learning Outcome:

At the end of this course, students should have gained an insight into:

- the structure and organization of the study course biochemistry
- possible career opportunities after graduation
- basic topics in biochemistry

Target Groups:

Students of Biochemistry

Languages of Instruction:

German and English.

Merkmale:

Responsible instructor: Cristina Manatschal

Requirements:

Assessment: Written essay in the last hour of the semester.

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Module GEO 231 Physische Geographie III: Geomorphologie und Glaziologie

07SMGEO231 / Lecture with Practical Exercises

Description:

General description:

Gruppe 2 trifft sich im Raum Y25-K-22.

ECTS: 5

Notes:

- Die Versicherung ist Sache der Teilnehmenden.
- Ermächtigungsklausel: Die Studierenden erklären sich damit einverstanden, dass das Geographische Institut in ihrem Auftrag Buchungen bzw. Reservationen im angegebenen Kostenrahmen für die Exkursion vornehmen kann.

Die Agenda 2030 der Vereinten Nationen (UNO) umfasst 17 Ziele für nachhaltige Entwicklung Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>), die von allen UN-Mitgliedstaaten verabschiedet wurden. Sie bilden einen gemeinsamen Rahmen zur Förderung von sozialer Gerechtigkeit, Umweltschutz und wirtschaftlicher Entwicklung weltweit.

Behandelt wird in diesem Modul insbesondere: 13

Target Groups:

BSc-Studierende

Languages of Instruction:

German

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Andreas Vieli

Requirements:

Prior Knowledge:

Modul GEO 111

Assessment:

Assessment components for the module GEO 231:

- Three exercises
- Two one-day excursions
- A written examination (60 minutes)

All three exercises are assessed on a pass/fail basis. Any exercise receiving an unsatisfactory assessment must be revised until it attains a pass. In addition, both excursions (Steingletscher and Uetliberg) must be completed; where an exemption has been approved, an equivalent substitute task must be completed successfully.

All exercises and the excursions must be passed in order to be admitted to the examination.

The written examination is graded and must be passed.

Written examination; language of examination: German

Grading Scale:

1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module GEO 232 Human Geography III: Geographies of difference

07SMGEO232 / Lecture with Practical Exercises

Description:

General description:

This course enables students to think through and about difference geographically: multi-scalar, critically, spatially. Students learn to understand selected theoretical perspectives in human geography. Focusing on a chosen thematic area of human geography, they train using these perspectives to interpret empirical phenomena and raise questions about them.

Following an introductory lecture, students will split into four smaller seminar groups, focused on different thematic areas from urban, political and economic geography. Seminars will be based on a close reading of selected material and designed for interactive participation and discussion.

Rather than meeting in the seminar groups, lectures will be held for participants from all groups in weeks 3, 5 and 7.

Each seminar consists of theory-oriented sessions, where students will gather first insights into selected theoretical perspectives of human geography; Using these perspectives, students develop their knowledge of each seminar group's thematic area of focus and practice applying theory to empirical fields of research.

ECTS: 5

Notes:

After the introductory lecture in week 1, students must enroll in one of four seminar groups via OLAT. Attendance of the introductory lecture is a prerequisite for participation in the first group session.

The first lecture (introductory lecture) will take place on 15.09.2026.

The Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

This SDG is covered in this module: 11

Learning Outcome:

- To understand selected theoretical perspectives in human geography that problematize questions of difference;
- To use these theoretical perspectives to interpret empirical phenomena of social difference and inequality and raise questions about them.
- To deepen knowledge on empirical phenomena of social difference in one specific topic of human geography.
- To write conceptually grounded texts, using empirical material.

Target Groups:

Major and Minor Geography (BSc)

Languages of Instruction:

English/German

Course Materials:

See OLAT

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor: Hanna Hilbrandt

Requirements:

Prerequisites: none

Prior Knowledge: none

Assessment: To pass the module Geo 232 students write an exam in the last session of the module in addition to three assignments:

A) Three reflection notes, in which students reflect on a chosen topic through each of the key concepts discussed in the course (pass/fail)

B) An annotated bibliography of material students discuss in their extended abstract (assignment C) (pass/fail)

C) And extended abstract that applies one of the theoretical perspectives to the topics that students researched for assignment B) (pass/fail)

D) A written exam (100% of the grade; Notenskala 1 bis 6)

Additional conditions: Students need to pass all submissions to pass the course. If a submission of assignments A-C is submitted more than 2 weeks after the deadline, it will count as failed.

Students must attend 80% of the seminar to pass. The course is failed, if they do not submit medical certificates for the sessions that they miss beyond the 80% threshold.

Language of assessments: German or English.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module GEO 233 Fernerkundung und Geographische Informationswissenschaft III: Vom Signal zum Produkt 07SMGEO233 / Lecture with Practical Exercises

Description:

General description:

The course "Grundlagen der Fernerkundung" (Principles of Remote Sensing) introduces the underlying principles of remote sensing and a range of fundamental concepts for understanding, handling and manipulating remote sensing data and images. It provides first details on optical image geometries as well as image classification and time series analysis. These topics lay the foundation to explore the role that remote sensing can play in understanding the system Earth. This course aims to provide (1) an introduction to computational, physical and geographical methods for image understanding in remote sensing, (2) a general framework for image interpretation and spectral data analysis in optical remote sensing, and (3) practical analytical and computational skills for image analysis. The course is composed of the lecture module GEO 233.1, which teaches the underlying principles of remote sensing, and the lab exercise module GEO233.2, which conveys important methods and skills of data understanding and digital image interpretation. The contents of this module are further consolidated and expanded during the following autumn semester (GEO371).

ECTS: 5

Notes:

The Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 13 & 15

Learning Outcome:

The learning goals of this module comprise the following aspects:

- Understanding and being able to explain fundamental concepts of remote sensing
- Knowing basic image understanding techniques and being able to apply these to optical imagery.
- Being able to choose and apply appropriate data analysis methods to solve a given remote sensing task
- Being able to interpret data, critically discuss the results and draw reasonable conclusions

Languages of Instruction:

German and English

Course Materials:

Lecture materials and lab exercises are provided via OLAT.

Merkmale:

Responsible instructor:

Mathias Kneubühler

Requirements:

Prior Knowledge:

Modul GEO113, Modul GEO123

Assessment:

In order to successfully pass the course, the lab exercises and the final written exam on the course need to be passed individually. Passing the lab exercises is a requirement for being able to write the final exam. In case one fails an exercise, it can be repeated once to pass it successfully.

If one of the lab sessions has not been successfully completed, the whole course

needs to be repeated. However, if the final exam is not passed, it may be repeated.

The final grade is determined entirely by the written exam.

Language of examination: German

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: Wöchentlich im Herbstsemester

Module GEO 363 Specialisation in Human Geography: Political Geography

07SMGEO363 / Lecture with Practical Exercises

Description:

General description:

GEO 363 is subtitled 'Critical Geopolitics: Critical Reading and Writing Seminar'. This course aims to train students in critical skills to read, digest, work with, and criticize core readings in the field of political geography and to learn and practice critical writing skills to engage this literature and to apply its insights to real-world problems of global politics. The course is taught in English with all writing exercises to be written in English. It is based around a sequence of in- class sessions and home work assignments for students. Students will receive in-depth, formative feedback on these assignments to continually improve their writing skills. These seminars and assignments will engage in focused reading and critical discussion around assigned readings and group exercises.

ECTS: 5

Notes:

- Bitte beachten Sie, dass es sich bei der ersten Session um eine Pflichtveranstaltung handelt!
- Sollten Sie ohne Begründung bei der ersten Session zum genannten Termin nicht anwesend sein, nehmen wir an, dass Sie GEO 363 doch nicht belegen möchten und werden Ihren Platz an eine/n Studierende/n von der Warteliste weitergeben.
- Weitere Details werden auf OLAT zur Verfügung gestellt.

Die Agenda 2030 der Vereinten Nationen (UNO) umfasst 17 Ziele für nachhaltige Entwicklung Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>), die von allen UN-Mitgliedstaaten verabschiedet wurden. Sie bilden einen gemeinsamen Rahmen zur Förderung von sozialer Gerechtigkeit, Umweltschutz und wirtschaftlicher Entwicklung weltweit.

Behandelt werden in diesem Modul insbesondere: 4; 5 & 16

Learning Outcome:

- To understand key concepts and core debates in contemporary political geography and critical geopolitics
- To apply theory/theoretical debates to specific geographical contexts and real-world problems.
- To be able to critically reflect on academic literature and learn to grapple with contradictory arguments.
- To strengthen skills in critical writing and making arguments based on evidence.

Target Groups:

Bachelor students of geography

Languages of Instruction:

English

Course Materials:

Will be provided on OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Christine Giulia Schenk

Requirements:

Prior Knowledge:

Students ideally have completed GEO 232 Humangeographie III: Geographies of Difference and the core modules GEO 112 Humangeographie I and GEO 122 Humangeographie II.

Assessment:

Assessment and Grading: The course includes both pass/fail and graded assessment components.

Pass/Fail Requirements: The following assignments must be completed on a pass/fail basis:

- One individual essay
- One blog entry
- One co-authored essay

The first individual essay and the co-authored essay will receive formative feedback from the lecturers. The blog entry will be assessed through peer feedback. At least two must be passed.

Graded Components: The final grade is based on the following assignments:

- Handwritten essay (individual): 20%
- Typed essay (individual): 20%
- Typed essay (individual): 20%
- Final synthesis essay (individual): 40%

Lecturers provide feedback on all three individual essays and on the final synthesis essay.

Submission: All assignments, with the exception of the handwritten essay, must be submitted via OLAT.

Assessment Criteria: Grading follows a rubric that is aligned with the course content and learning objectives related to academic reading and writing skills.

Language of assessments: English

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Request period:

Module GEO 371 Specialisation in Remote Sensing: Passive technologies

07SMGEO371 / Lecture with Practical Exercises

Description:

General description:

The module "Specialisation in Remote Sensing: Passive technologies" introduces students to passive remote sensing technologies (i.e., optical, thermal) and enables students to apply standard methods for data processing and analysis. The course provides students with a thorough understanding of various topics, including:

- i) the radiative transfer in the optical and thermal spectral domain,
- ii) data preprocessing strategies to compensate confounding factors and artefacts in optical and thermal remote sensing data,
- iii) methods to extract information from optical and thermal data,
- iv) the use of optical and thermal remote sensing data to support research across earth spheres.

Furthermore, the module provides students with the skills to use state-of-the-art software and programming languages (e.g., SNAP, QGIS, Python) to process image data and develop new tools within existing frameworks. The module is composed of the lecture module GEO 371.1, which introduces the underlying theory, and the exercise module GEO371.2, which conveys important methods and skills of data analysis. The contents of this module are complemented by the module GEO374 and are further consolidated and expanded by our master courses (e.g., GEO441, GEO442, GEO443, GEO444, GEO445).

ECTS: 5

Target Groups:

Mandatory module if the specialisation remote sensing is chosen in the bachelor's program

Languages of Instruction:

German and English

Course Materials:

Lecture supplements, exercise sheets will be made available on OLAT

Merkmale:

Responsible instructor:

Alexander Damm-Reiser

Requirements:

Prerequisites:

GEO 233

Assessment:

Lecture component: a 60-minute written examination, sat in person without aids, graded on a 1.0–6.0 scale in quarter-point increments.

Seminar component: a portfolio of five exercises, each assessed on a pass/fail basis. Failed exercises may be revised once.

Students may sit the examination only if all exercises have been passed.

Language of examination: English

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module CHE 101 Fundamentals of Chemistry: Basic Terms and Concepts of General Chemistry 07SMCHE101 / Lecture with Practical Exercises

Description:

General description:

In the module "Fundamentals of Chemistry", students acquire a solid understanding of the basic concepts of chemistry. These form the foundation for an understanding of atomic and molecular properties, structures, and reactivities.

The core topics covered in this course include:

- Atomic structure and electronic configuration of atoms
- Periodic table of the elements and periodic trends
- Chemical bonding
- States of matter
- Fundamentals of thermodynamics
- Chemical equilibrium
- Solutions and their properties
- Acid-base reactions
- Complex formation
- Redox reactions and redox equilibria
- Kinetics and mechanisms of chemical reactions

The fundamental concepts taught in the lectures are reinforced in exercise sessions to ensure that the acquired knowledge can be effectively applied. The exercises consist of two components:

1. Online exercises on the OLAT platform (mandatory learning path)
2. On-site exercise sessions, where solution approaches are discussed in detail, refined, and explored further.

This module establishes a solid foundation for further studies in chemistry and related sciences. It prepares students to understand and apply the more complex concepts covered in subsequent semesters.

I look forward to exploring the fascinating world of chemistry with you!

ECTS: 7

Notes:

Mid-term exams will be held in weeks 8 and 13 of the semester (on Fridays during the class session, on 6 November and 11 December from 10:15-11:00h).

Learning Outcome:

Upon completion of this module, students are able to understand and apply the fundamental principles and concepts of chemistry. The content covered in lectures and exercises is examinable: the topics listed above and in the course script will be tested.

Languages of Instruction:

German (one exercise group can be taught in English if needed)

Course Materials:

Script & the following textbooks:

- C. E. Mortimer, U. Müller: Chemie, Thieme, 2019, 13. edition (also electronically via UB Zürich)
- C. E. Housecroft, E. C. Constable: Chemistry, 4th Ed., Pearson Ed. Ltd., Harlow UK, 2010 (also electronically via UB Zürich UB Zürich)
- G. Rayner-Canham, T. Overton: Descriptive Inorganic Chemistry, W. H. Freeman, 2014, 6th Ed.

Merkmale: Target Group: Open to School Students

Responsible instructor: Eva Freisinger Sigel

Requirements:

Prior Knowledge: -

Assessment: To be eligible for the final exam, students must successfully complete the OLAT exercises and mid-term exams.

The written module exam will take place after the end of the lecture period, during the semester break.

Repetition of the exam is offered in the fall before the start of the new academic year.

The current exam schedule can be found under: <https://www.chem.uzh.ch/de/Studium/exams/hs.html>

and for the repetition exams under: <https://www.chem.uzh.ch/de/Studium/exams/rep.html> (<https://www.chem.uzh.ch/de/Studium/exams/rep.html>)

The exam is held in German; an English translation can be provided on request

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Module CHE 173 Laboratory Course in Organic Chemistry for the Life Sciences

07SMCHE173 / Praktikum

Description:

General description:

Introductory laboratory course; continuation of CHE 171 (Basic Laboratory Course in Chemistry for the Life Sciences) with a focus on experiments in organic chemistry

ECTS: 4

Notes:

Booking of the module is required.

The days of the week on which the lab course takes place are determined by the responsible lecturer before the start of the semester. You have to attend on one fixed afternoon per week.

The allocation of the groups will be done in OLAT before the start of the semester! All booked students will receive more detailed information about this via OLAT!

FOR QUESTIONS ALWAYS USE: gpc@chem.uzh.ch

Learning Outcome:

- Application of already known laboratory techniques
- In-depth expertise in documenting scientific experiments
- Knowledge about the safe handling of chemicals and chemical reactions
- Knowledge of organic chemical principles on the basis of self- conducted experiments
- Environmental knowledge from a chemical point of view

Languages of Instruction:

Instructions in English, Teaching in German or English (depending on the group)

Course Materials: Instructions for experiments, lab journal, further material according to lists.

Merkmale:

Responsible instructor: Greta R. Patzke

Requirements:

Prerequisites: Required are:

- Completion of CHE 171 or the proof of equivalent practical knowledge
- Successful completion of CHE 172 or the proof of equivalent theoretical knowledge
- Successful completion of CHE 170 or the proof of equivalent theoretical knowledge

Prior Knowledge: basic chemical laboratory techniques; theoretical knowledge from CHE172 oder CHE102

Assessment: Presence, execution and documentation of all experiments as well as fulfilling the performance goals and deadlines according to the instructions.

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: The course takes place on several afternoons of the week. You have to visit the course on one afternoon per week.
Booking of the module is required before the start of the semester.
The booking of a respective laboratory group is possible until one week before the start of the semester on OLAT. In case of later booking you will be assigned to one of the groups by the responsible lecturer.
Persons who do not attend on the first day of the lab course loose their allocated laboratory spot

Booking Deadline/Period: from We 12.08.2026 10:00 to Su 06.09.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Su 27.09.2026 24:00

Organisation: Division III Chemistry

Offered in: Fall Semester 2026
Fall Semester 2025
Fall Semester 2024
Fall Semester 2023
Fall Semester 2022

Component of:

Biology

Module KRI 104 Advanced crystallography practical course

07SMKRI104 / Praktikum

Description:

General description:

Execution of a project involving advanced crystal structure analyses in the labs of the lecturers. The work may involve crystallization experiments, data collections at a single-crystal X-ray diffractometer, analysis of the data, development and refinement of a suitable model, analysis of results. Models involving disorder and/or twinning might be encountered.

ECTS: 4

Notes:

Interested students should get in touch with Prof. Bernhard Spingler before the start of the semester.

Languages of Instruction:

German and/or English

Course Materials:

Work will be done mostly at the computer using freely available crystallographic software, which participants will have already used during KRI 102.

Merkmale:

Responsible instructor:

Bernhard Spingler

Requirements:

Prior Knowledge:

Registration for this course requires satisfactory completion of KRI 101 and KRI 102.

Assessment:

Project report (in English)

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

Module BIO 111 Molecular and Classical Genetics

07SMBIO111 / Lecture with Practical Exercises

Description:

General description:

In dieser Grundvorlesung werden die klassischen und molekularen Konzepte der Vererbungslehre erarbeitet: Rolle der Genetik in der Biologie, Chromosomen und Zellteilung, Grundprinzipien der Vererbung, Kopplung und Rekombination, Kartierung von Genen, Assoziationsanalysen und genomweite Assoziationsstudien (GWA), Chromosomale Variationen, Struktur der Gene, Replikation der DNA, Transkription, RNA Prozessierung, Translation, Regulation der Genexpression, Methoden der Gentechnologie, Mutationen und DNA Reparatur, Grundprinzipien der rekombinanten DNA-Technologie und Genomik und wie diese neuen Technologien die moderne Gesellschaft beeinflussen, Ausblick auf weitere Themen der Genetik wie Quantitative Genetik, Transgene Individuen und Krebs.

ECTS: 5

Notes:

Vorlesung: Deutsch (Unterlagen z.T. in Englisch)

Praktikum: Deutsch, aber mit teilweise nur englisch-sprachigen Assistierenden

Learning Outcome:

Am Ende dieses Moduls sind die Studierenden in der Lage

- Fachbegriffe der klassischen und molekularen Genetik zu definieren und auf biologische Phänomene anzuwenden
- Vererbungsmuster zu erkennen, sie quantitativ und qualitativ voraussagen, sowie Rückschlüsse auf deren genetische Grundlagen zu ziehen
- Prozesse der Genexpression und deren molekulare Komponenten zu beschreiben
- die für die Genetik relevanten zellbiologischen Prozesse zu beschreiben und mit genetischen Abläufen zu verknüpfen
- genetische Grundlagen und Konzepte an ausgewählten Problemstellungen der Medizin und der Biologie anzuwenden
- Standardmethoden der Molekularbiologie zu beschreiben und deren Anwendungen zu erklären
- einfache molekularbiologische Protokolle selbständig durchzuführen

Überfachliche Kompetenzen

Am Ende dieses Moduls sind die Studierenden in der Lage

- selbständig zu entscheiden, welches die wesentlichen Konzepte und Inhalte für die Molekularbiologie und die klassische Genetik sind und welche Beispiele und Ausführungen nur als Ausblick oder zur Veranschaulichung dienen

- Informationen und Zusammenhänge selbständig zu verstehen und auszuwerten
- mit statistischen Verfahren abzuschätzen, ob praktische Beobachtungs- und theoretische Erwartungswerte übereinstimmen

Target Groups:

Studierende mit Hauptfach Biologie, Biomedizin oder Biodiversität.

Languages of Instruction:

Vorlesung: Deutsch

Praktikum: Deutsch, aber mit teilweise nur englisch-sprachigen Assistierenden

Course Materials:

Empfohlenes Lehrbuch: "An Introduction to Genetic Analysis" von Anthony J.F. Griffiths et al., 12th Edition

Merkmale:

Target Group: Open to School Students

Responsible instructor:

Alex Hajnal

Requirements:

Assessment:

Im Modul BIO111 finden eine Prüfung zum Vorlesungsstoff und zwei Kurz-Tests zum Praktikum statt.

Prüfung zum Vorlesungsstoff:

Es wird eine Modulprüfung im Januar 2027 durchgeführt.

Prüfungsformat:

- Online Prüfung vor Ort in verschiedenen Hörsälen (BYOD: bring-your-own-device, ohne safe exam browser)
- Aufgabentypen: Multiple Choice (verschiedene Fragetypen)
- Kurze Freitext-Aufgaben
- Prüfungssprache: Deutsch mit englischer Übersetzung

Praktikums-Tests:

Es werden zwei Tests zum Praktikumsstoff durchgeführt, jeweils unmittelbar nach dem Praktikum. Beide Tests müssen mit einem „bestanden“ abgeschlossen werden, um an die Modulprüfung im Januar zugelassen zu sein.

Prüfungsformat:

- Online Prüfungen vor Ort im Praktikumsraum (BYOD: bring-your-own-device, ohne safe exam browser)
- Aufgabentypen: Multiple Choice Aufgaben
- Prüfungssprache: Deutsch mit englischer Übersetzung

Prüfungsdaten:

- Test-1: Im Anschluss an Kurs-3, ca. von 17:00 – 17:30 Uhr
- Test-2: Im Anschluss an Kurs-5, ca. von 17:10 – 17:40 Uhr

Hinweis: die exakten Kursdaten hängen von der jeweiligen Buchung der Praktikumsgruppe ab.

Module MAT 111 Linear Algebra I

07SMMAT111 / Lecture with Practical Exercises

Description:

General description:

- Mengenbegriffe, Aussagenlogik, Relationen
- Gruppen, Körper, Ringe
- Matrizen und Lineare Gleichungssysteme
- Vektorräume
- Lineare Abbildungen
- Determinanten
- Polynome
- Eigenwerte und Diagonalisierbarkeit
- Blocktrigonalisierbarkeit und Trigonalisierbarkeit

ECTS: 9

Notes:

HS26:

Die Vorlesung wird im Herbstsemester 26 auf Deutsch stattfinden. Einige der Übungen können auf Englisch sein.

Mehr Informationen: www.math.uzh.ch/mat111

ACHTUNG: Dieses Modul ist nur für Mathematik und AMML Studierende, Physikstudierende und Astrophysikstudierende buchen MAT111P Lineare Algebra I

Target Groups:

Math students in their first semester

Merkmale:

Target Group: Open to School Students

Responsible instructor:

Andrew Kresch

Requirements:

Assessment:

Voraussetzung für die Teilnahme an der Modulprüfung sind:

- Erfolgreiche Teilnahme an den Übungen, d.h. 50% der Übungen bearbeitet (Details durch DozentIn in der Vorlesung)

Achtung: Bestehen Sie das Übungstestat nicht, bestehen Sie auch das Modul nicht.

Die Modulnote ist identisch mit der Modulprüfungsnote. Die Modulprüfung ist schriftlich.

Sprache des Leistungsnachweises:

HS26: Die Sprache der Prüfung ist Deutsch.

Grading Scale:

1-6, Half Grades Given

Module MAT 121 Analysis I

07SMMAT121 / Lecture with Practical Exercises

Description:

General description:

Einführung in die Differential- und Integralrechnung für reellwertige Funktionen in einer Variablen:

- Zahlssysteme, Vervollständigung von $\mathbb{Q}$ nach $\mathbb{R}$ und komplexe Zahlen
- Folgen und Reihen; Grenzwerte;
- Elementare Funktionen
- Stetigkeit von Funktionen; Zwischenwertsatz
- Ableitung; lokales Verhalten von Funktionen (Extrema); Mittelwertsätze;
- Riemann Integral; Hauptsatz der Integralrechnung; uneigentliche Integrale
- Potenzreihen und Taylorentwicklung

ECTS: 9

Notes:

HS26: Die Vorlesung findet auf Deutsch statt.

Die Übungen sind teilweise auf Englisch.

Übungsblätter wie auch die Prüfung können in Deutsch oder Englisch gemacht werden.

Modulwebseite: www.math.uzh.ch/mat121

ACHTUNG: Dieses Modul (MAT121 ohne P) ist nur für Mathematikstudierende sowie AMML Minor Studierende. AMML (Major) und Physik- sowie Astrophysikstudierende buchen MAT121P Analysis I.

Target Groups:

Math students in their first semester

Merkmale:

Target Group: Open to School Students

Responsible instructor:

Benjamin Schlein

Requirements:

Assessment:

schriftliche Modulprüfung.

Es wird zwei Übungs-Assessments geben in der Vorlesung vom 30. Oktober und 4. Dezember. Diese sind freiwillig, dort gesammelte Übungs-Punkte können die Note der Modulprüfung erhöhen (Details durch Dozenten in der Vorlesung).

Sprache des Leistungsnachweises:

HS26: Deutsch

Die Prüfung und Übungen können in Deutsch oder Englisch abgegeben werden.

Grading Scale:

Module GEO 110 Switzerland 2050

07SMGEO110 / Lecture with Practical Exercises

Description:

General description:

Das Modul besteht aus acht zweistündigen Vorlesungseinheiten (GEO110.1) und einer begleitenden Übung (GEO110.2). In der Vorlesung wird aus der Perspektive der Teilbereiche des Faches (Humangeographie, Physische Geographie, GIS und Fernerkundung) zunächst in ausgewählte geographische Querschnittsthemen eingeführt. Den Studierenden werden Übungsaufgaben gestellt, die in Einzelarbeit gelöst werden. Im zweiten Vorlesungsteil erhalten die Studierenden beispielhaft Einblick in integrative Themen zur Vertiefung des bisher Gelernten. Diese Vorlesungsblöcke schliessen mit einer Einführung zur Postererstellung und dienen zur Vorbereitung der Gruppenarbeit (GEO110.2). Die Studierenden sollen dort in Abstimmung mit anderen Gruppen ein integratives Thema ihrer Wahl erarbeiten und die Ergebnisse in Form eines Posters darstellen. Zur Begleitung des Arbeitsprozesses werden zwei betreute Gruppentreffen durchgeführt. Die Poster werden in der vorletzten Semesterwoche gemeinsam präsentiert.

ECTS: 3

Notes:

Gruppe 4 im Raum Y25-K-22.

Gruppe 5 im Raum Y25-L-40.

Die Posterausstellung am 4. Dezember 2026 findet im Kettelikunstraum am Irchel statt.

Die Agenda 2030 der Vereinten Nationen (UNO) umfasst 17 Ziele für nachhaltige Entwicklung Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)), die von allen UN-Mitgliedstaaten verabschiedet wurden. Sie bilden einen gemeinsamen Rahmen zur Förderung von sozialer Gerechtigkeit, Umweltschutz und wirtschaftlicher Entwicklung weltweit.

Behandelt werden in diesem Modul insbesondere: 4; 6; 7; 13 & 15

Learning Outcome:

- Studierende erhalten aus einer zeitgemässen geographischen Perspektive Einblick in die regionale Geographie der Schweiz
- Studierende lernen ausgewählte geographische Perspektiven kennen und lernen diese über die jeweiligen Teilbereiche hinweg zu verknüpfen
- Studierende lernen Schlüsselqualifikationen aktiven Studierens kennen (v.a. Bewertungsverfahren, Methoden, Postererstellung und -präsentation, Gruppenarbeit)

Target Groups:

HauptfachgeographInnen Bachelor

Languages of Instruction:

Deutsch

Course Materials:

Module BIO 632 Introductory course in flow cytometry

07SMBIO632 / Lecture with Practical Exercises

Description:

General description:

The course delivers a systematic introduction to the flow cytometry through series of lectures combined with exercises and hands-on sessions. The basic concepts covered include fluorescence, spectral spillover, compensation and unmixing along with general flow cytometer layouts. Experiment planning involving panel design and controls as well as data acquisition using various cytometers are covered in exercises and hands on sessions. Manual cytometry data analysis principals are applied during a guided practical training session additionally.

ECTS: 1

Notes:

Further information: <https://www.cytometry.uzh.ch/en/Education/Bio-632-Introductory-Online-Course.html>

Registration: <https://www.cytometry.uzh.ch/en/Education/Bio-632-Introductory-Online-Course/Bio632-Course-Registration.html>

Assessment must be fulfilled in accordance with the generally applicable requirements for this module; if the situation does not allow this, the exam will be carried out remotely in digital form on the specified date.

Learning Outcome:

The students who successfully complete the course should be able to:

- Understand the working principles of a flow cytometer and range of applications that can be performed
- Design and execute simple immunophenotyping experiment
- Analyse simple datasets
- Present analysis results

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Claudia Dumrese

Requirements:

Prerequisites:

Completed basic studies

Assessment:

- Written exam, 20 minutes
 - Final exam towards the end of the module
- Assessment must be fulfilled in accordance with the generally applicable requirements for this module; if the situation does not allow this, the exam will be carried out remotely in digital form on the specified date.

Grading Scale:

Module UWW 161 Professional Internship

07SMUWW161 / Praktikum extern / Berufspraktikum

Description:

General description:

A work placement gives you the chance to gain hands-on experience of the working world and can be invaluable to entering into your chosen career. The work placement last eight weeks and has to be registered and discussed with Claudia Hegglin, office Y13-G-40.

ECTS: 8

Notes:

The professional internship must be discussed with and approved by the module coordinator in advance. During the semester, students can attend a meeting on Mondays from 11:00 a.m. to 12:30 p.m. with the completed registration form without prior appointment in the study coordination office Y13-G-40. More information on the professional internship and the report can be found in the professional internship information sheet here: <https://www.biodiversitaet.uzh.ch/de/bachelor/berufspraktikum.html>

Learning Outcome:

At the end of the module, students should be able to:

- gain an insight into the professional world
- acquire experience by independent processing of a project
- promote communication skills, teamwork, and organizational skills as a supplement to the university teaching work
- get a better orientation for the future career choice
- Recognize the prospects for advanced training
- establish initial contacts with stakeholders in the environmental sector
- develop and implement a concept
- build an intelligible, reflected and critical line of argument
- comply with the formal structure of a scientific work
- put the own contribution into a larger context and to classify properly

Target Groups:

UWW Minor 60 ECTS

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Claudia Hegglin Braun

Requirements:

Prior Knowledge:

Empfohlen ab dem 4. Semester

Assessment:

Als Leistungsnachweis für das Praktikum dienen eine Bescheinigung der Praktikumsstelle sowie ein ausführlicher Bericht, der von Mitarbeitenden des Instituts für Umweltwissenschaften beurteilt wird.
Die Berichte können auf Deutsch oder auf Englisch geschrieben werden.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Semester)

Dates/Times/Deadlines: Jederzeit möglich, Dauer mindestens acht Wochen

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Organisation: Inst. f. Evolutionsbiol. u. Umweltwiss.

Module UWW 163 Practical Term Paper

07SMUWW163 / Semesterarbeit

Description:

General description:

The term paper provides students with the opportunity to gain practical experience in scientific work. The term paper must be announced and discussed with the supervisor.

ECTS: 3

Notes:

Once students have found a supervisor and put together a concept for their thesis, they must register their thesis with Claudia Hegglin (Y13G40) at the Student Office and discuss it with her in advance.

For the semester programme, repeat exams, etc., see https://www.ieu.uzh.ch/de/teaching/minor_umweltwissenschaften.html

Learning Outcome:

At the end of the module, the students are able to:

- formulate an interesting and precise question
- develop and implement a concept
- answer the research question with scientific literature and possibly empirical data
- build an intelligible, reflected and critical line of argument
- comply with the correct formal structure of a scientific work
- put the own contribution into a larger context and classify properly

Target Groups:

Module UWW 164 Event Organisation in the Environmental Field

07SMUWW164 / Praktikum

Description:

General description:

The module includes the organization of an environmental event. While organizing, various phases have to be completed: event idea, concept, planning, implementation and postprocessing.

ECTS: 2

Notes:

Always possible, minimum effort 80 hours. The project must be discussed in advance with Claudia Hegglin (claudia.hegglin@ieu.uzh.ch).

Learning Outcome:

At the end of the module, the students are able to:

- plan, structure and realize an event
- identify potential risks and find appropriate solutions
- design and evaluate a project portfolio
- characterize possible stakeholders and communicate effectively

Target Groups:

Minor Environmental Studies

Merkmale:

Target Group: Suitable for English Speakers

Module ESS 401 Current Themes in Earth System Science

07SMESS401 / Lecture with Practical Exercises

Description:

General description:

Earth System Science research covers a wide variety of fields, topics and research methods and data. In this course, at the beginning of your Master's program in Earth System Science, we will unpack what it means to do research in Earth System Science. We will cover the outstanding research questions in the fields of Earth System Science, review the most recent research about the Earth System, and discuss with an editor of a journal that publishes on Earth System Science on the process of publication and assessing quality of scientific results. Finally, we will conduct a literature in a systematic way (i.e. synthesis) to:

- (i) gain knowledge of the controversies and agreements in the scientific literature around a current topic in Earth System Science and
- (ii) identify the knowledge gaps around that topic.

Through this structure the course aims to decompose Earth Systems into distinct components, identify the relationships between these components, and how these are currently being researched.

ECTS: 3

Notes:

The Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 2; 3; 6; 7; 9; 11; 12; 13; 14 & 15

Languages of Instruction:

English

Course Materials:

Lecture notes, Readings

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Maria J. Santos

Requirements:

Prerequisites:

None apply

Prior Knowledge:

None apply since this is a starting course

Assessment:

The module consists of the following assessed components:

- Two exercises in the semester: paper review and metaanalyses

The two exercises contain both a presentation and a written report. Both are graded between 1-6. Grade is distributed as Assignment 1: Peer review 20%; Assignment 2: Meta-analysis 70%. Class attendance and participation 10%.

Feedback forms are given for each assignment with comments on the presentation and report, and the final grade is communicated

If the grade for the written report is insufficient, it may be retaken once.

Language of assessments: English

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Description:

General description:

We interact with the environment on a daily basis. For this, we developed elaborate spatial abilities and behaviors. These differ in many interesting ways from how computers (e.g., GIS) deal with spatial information. In this course, we will study the fundamentals of spatial cognition-the science of how humans reason and communicate about space, and how this drives spatial behavior, for example in using geographic information displays or navigation and wayfinding.

For the practical part of this course, you will run your own empirical study (group work) to evaluate one aspect of spatial decision making and behavior. This will include selecting the appropriate method for your research questions, run a study with participants, analyze the collected response data, and appropriately communicate results to peers.

ECTS: 3

Notes:

The on-site lab portion of this course will be done in groups using appropriate software. Presence in lectures and in labs are required. The finalized course schedule will be announced in the first mandatory course meeting (for enrolled or not yet enrolled people) by the person responsible for the module.

The Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

Learning Outcome:

- You can read, summarize, and explain the content of a scientific paper in spatial cognition research to your peers.
- You can list and explain the fundamental concepts related to human spatial information processing, navigation, and wayfinding behavior.
- You can describe basic principles of how humans perceive space, how they mentally represent it, and how they navigate through space.
- You can conduct a small empirical study with participants.
- You can appropriately analyze collected empirical data using statistical software and run respective scripts.
- You can present your empirical findings to peers.

Target Groups:

Master's students majoring in geography or GIScience; students from other disciplines contact the instructor.

Languages of Instruction:

English

Course Materials:

Interactive lectures, reading and discussion of papers, oral presentations, empirical group project. All class materials will be available through OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Sara Fabrikant

Requirements:

<u>Prerequisites:</u>	BSc
<u>Assessment:</u>	You can reach a maximum of 100 points in this course. The points will be the sum of: 1. Component Lecture (873.1): presentations/discussions/participation (max. 50 points). 2. Component Practical (873.2): empirical study (max. 50 points). You need a minimum of 60 points to pass the entire module. This means you need to earn at least 30 points in the lecture portion (reading/discussion assignment), and at least 30 points in the practical portion of this course (group project) to pass the entire module. You need to repeat the entire module if your project grade is less than 30 points. Lecture and lab attendance is required. Students must attend in person all lectures, and 80% of the practical to pass the course or submit medical certificates. Language of assessments: English
<u>Grading Scale:</u>	1-6 Quarter Grades Given

Module AST 801 Astrophysical thinking HS

07SMAS801 / Seminar

Description:

General description:

In this "shotgun seminar", students will calculate order of magnitude estimates of astrophysical interest, such as: the size of an active galactic nucleus, the height of tides on the earth, the lifetime of radiatively supportive star.

ECTS: 2

Learning Outcome:

Acquire broad knowledge of astrophysical phenomena and the ability to estimate quantities so that astrophysical scales become intuitive.

Target Groups:

Required for all students in the Astrophysics PhD program

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Jaiyul Yoo

Requirements:

Prior Knowledge:

For students in the Astrophysics PhD program only

Assessment:

Presentation and leadership of a seminar

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

Module AST 245 Computational Astrophysics

07SMAS245 / Course

Description:

General description:

1. Integration of ODE, Hamiltonians and Symplectic integration techniques, time adaptivity, time reversibility.
2. Large-N gravity calculation, collisionless N-body systems and their simulation.
3. Fast Fourier Transform and spectral methods in general.
4. Eulerian Hydrodynamics: Upwinding, Riemann solvers, Limiters
- 5 Lagrangian Hydrodynamics: The SPH method
5. Resolution and instabilities in Hydrodynamics
6. Initial Conditions: Cosmological Simulations and Astrophysical Disks
7. Physical Approximations and Methods for Radiative Transfer in Astrophysics

ECTS: 6

Notes:

This module can be taken in combination with the practicum AST246.1 Computational Astrophysics (LAB). To do so, book the module AST246 Computational Astrophysics (L & P).

Learning Outcome:

Acquire knowledge of main methodologies for computer-based models of astrophysical systems, the physical equations behind them, and train such knowledge with simple examples of computer programmes

Target Groups:

Students taking the minor in Astronomy, students preparing for research involving scientific computing.

Course Materials:

"Galactic Dynamics" (Binney & Tremaine, Princeton University Press)
"Computer Simulation using Particles" (Hockney & Eastwood CRC Press)
Targeted journal reviews on computational methods for astrophysical fluids (SPH, AMR, moving mesh)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Lucio Mayer

Requirements:

Prior Knowledge:

Some knowledge of UNIX, scripting languages (see <http://www.physik.uzh.ch/lectures/informatik/python/> as an example), some prior experience programming, knowledge of C, C++ beneficial

Assessment:

A project that has to be present in an oral session.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module Teaching Internship I

06SM090BPP1 / Module

Description:

General description:

Die Organisation der Unterrichtspraktika erfolgt über die Administration der Abteilung Lehrerinnen- und Lehrerbildung (LLBM). Informationen über die Anmeldung finden Sie auf unserer Homepage unter "Wegleitung zum Praktikum I". Sie gelangen zum direkten Link indem Sie die Veranstaltung unten anklicken. Die Anmeldung zu den Praktika läuft auf zwei Ebenen: 1. Anmeldung via Formular bei der Administration LLBM. 2. Reguläre Modulbuchung im UZH-System. Zum ersten Unterrichtspraktikum (Praktikum I) gehört zudem das Praktikumsjournal, das auch zu buchen ist.

ECTS: 8

Merkmale:

Responsible instructor: Yves Karlen

Requirements:

Prerequisites: Für die Zulassung zum Praktikum I wird der erfolgreiche Abschluss der Fachdidaktikmodule und der Übungslektionen im entsprechenden Unterrichtsfach vorausgesetzt.

Assessment: Der Leistungsnachweis zum Unterrichtspraktikum I besteht in der bestätigten Hospitation von 20 Lektionen, in der Planung und Durchführung von 30 Lektionen sowie in den hierzu erfolgten Besprechungen. Anforderungen, welche beim Entscheid über das Bestehen berücksichtigt werden, sind in der Wegleitung zum Unterrichtspraktikum I dargelegt (siehe <https://www.lehrdiplom.uzh.ch>).

Grading Scale: Pass/Fail

Module Lessons training

06SM090BPUE / Module

Description:

General description:

Das Modul Übungslektionen wird parallel zu den Fachdidaktik-Modulen absolviert und ermöglicht den Studierenden erste Praxiserfahrung im Unterrichtsfach. Die Übungslektionen werden im Rahmen der Fachdidaktikkurse - organisiert von den Fachdidaktik-Dozierenden - absolviert. Die Studierenden buchen dieses Modul im UZH-System idealerweise im Semester der FD II, die ECTS-Punkte werden eingebucht, wenn die Fachdidaktik-Dozierenden über alle Unterlagen verfügen, frühestens aber am Ende des Semesters der FD II.

ECTS: 2

Merkmale:

Responsible instructor: Yves Karlen

Requirements:

Prerequisites: Allgemeine Voraussetzung: Fundiertes Fachwissen im entsprechenden Unterrichtsfach. Die Übungslektionen in einem Fremdsprachenfach setzen die erfolgreich absolvierte Sprachkompetenzprüfung voraus.

Assessment: Absolvierte Übungslektionen: Das Modul ist bestanden, wenn die fünf erteilten Lektionen zuverlässig durchgeführt und insgesamt als genügend beurteilt wurden.

Module Colloquium for Exam Candidates

06SM222DKo / Module

Description:

ECTS: 2

Notes:

- Bitte beachten Sie die unter «Anforderungen» beschriebenen Teilnahmevoraussetzungen.
- In der ersten Sitzung werden bereits Termine verteilt (vgl. Rubrik «Hinweise» in der Beschreibung der Lehrveranstaltung), bis zur zweiten Sitzung ist ein Fallbeispiel einzureichen.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor:

Dominik Petko

Requirements:

Prerequisites:

Für die Teilnahme am Kolloquium für Diplomkandidatinnen und -kandidaten (DK) müssen mindestens die Fachdidaktikmodule I und II in einem Unterrichtsfach erfolgreich abgeschlossen sein. Zudem wird Unterrichtserfahrung im Rahmen des obligatorischen Hospitationspraktikums, der Übungslektionen und des Unterrichtspraktikums in mindestens einem Unterrichtsfach vorausgesetzt. Das Unterrichtspraktikum kann allenfalls parallel zum DK absolviert werden. Wo dies nicht der Fall ist, müssen bereits substantielle Unterrichtserfahrungen ausserhalb der Ausbildung vorliegen und schriftlich nachgewiesen werden.

Assessment:

Portfolio: Schriftliches Fallbeispiel, Poster, schriftliche Posterkommentierung. Das Modul wird als bestanden bewertet, wenn alle drei Elemente des Portfolios bestanden sind.

Module Current Topics in Neuroeconomics and Decision Neuroscience (S)

03SMDOEC0634 / Doktorandenseminar

Description:

General description:

This is an internal seminar for the course instructor's doctoral students.

ECTS: 3

Notes:

This course will take place in BLU-003 (Blümlisalpstrasse 10, 8006 Zurich).

If you wish to attend this course, please send an e-mail with your name and student ID number (Matrikelnummer) to cornelia.schnyder@econ.uzh.ch

Learning Outcome:

In-depth study of the materials presented

Target Groups:

Course instructor's doctoral students

Languages of Instruction:

English

Course Materials:

The seminar organizer will distribute the readings electronically on a regular basis.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Christian Ruff

Requirements:

Prerequisites:

Successful completion of all compulsory modules in the Doctoral Program in Neuroeconomics.

Prior Knowledge:

-

Assessment:

- Regular prepared class attendance (read focus papers; 10%)
 - Active class participation (discuss focus papers and others' presentation; 10%)
 - Oral presentation (30%)
 - Completed manuscript* of a review article or empirical report (50%)
- *Note that the manuscript written for this course may not be used as one of the three papers in the PhD thesis. However, it may be included in the PhD thesis if there are at least three other papers included as well.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

Module Educational Testing and Measurement

06SM222LMB / Module

Description:

General description:

Im Modul "Leistungsmessung und -bewertung» des Studiengangs "Lehrdiplom für Maturitätsschulen» erwerben die Lehrdiplomstudierenden schulfachübergreifende Grundlagen für die Erhebung, Beurteilung und Bewertung von Kompetenzen an Maturitätsschulen. Entsprechendes Wissen und Können gehört - zusammen mit weiterem allgemeindidaktischem, fachlichem, fachdidaktischem, pädagogisch-psychologischem Wissen und Können sowie den Fähigkeiten zur professionellen Selbstregulation, Kooperation und Reflexion - zu den zentralen Facetten der Kompetenzen von Lehrerinnen und Lehrern.

ECTS: 2

Notes:

Das Modul ist als Präsenzveranstaltung mit Interaktionen vor Ort geplant. In den Veranstaltungen vor Ort werden regelmässig formative Lernkontrollen zur Selbstreflexion durchgeführt. Die Vorlesung wird nicht auf Video aufgezeichnet. Für einzelne Themen werden Vodcasts zur Verfügung gestellt. Diese Themen mit Vodcasts sind im Syllabus, der zur ersten Vorlesung kommuniziert wird, ersichtlich.

Learning Outcome:

Die Lehrdiplomstudierenden können insbesondere...

- Funktionen von Kompetenzbeurteilungen erläutern und im Bildungssystem einordnen.
- Standards und Gütekriterien beschreiben sowie bei der Erfassung und Beurteilung von Kompetenzen anwenden.
- summative und formative Lernkontrollen für die eigene Unterrichtspraxis professionell entwickeln, durchführen und auswerten sowie deren Ergebnisse an Schülerinnen und Schüler zurückmelden.
- Ergebnisse von Beurteilungen transparent kommunizieren und zur Lernförderung nutzen.
- (erweiterte) Formen der schriftlichen und mündlichen Kompetenzerfassung beschreiben und adaptiv anwenden.
- die eigene Haltung als Lehrperson im Spannungsfeld von Förderung und Selektion sowie den eigenen Umgang als Lehrer*in mit Beobachtungs- und Beurteilungsfehlern reflektieren.
- psychologische und rechtliche Aspekte zur schulischen Leistungsbeurteilung darstellen und in der Praxis berücksichtigen.

Module CHE 201 Inorganic Chemistry I: Main Group Chemistry - Exploring Elemental Diversity

07SMCHE201 / Lecture with Practical Exercises

Description:

General description:

This lecture familiarises you with the fundamental aspects of inorganic chemistry, with a focus on the main group elements.

It deals specifically with:

- Origin of the elements
- Molecular symmetry and group theory
- MO theory of complex molecules
- Chemistry of the main group elements: Hydrogen, s-block elements, p-block elements, cluster chemistry.

The aim is to apply the basic principles learnt in the first year of study, to delve deeper into the chemistry of the elements and to understand their structure and reactivity, and to predict chemical reactivities and properties based on trends in the periodic table.

ECTS: 4

Notes:

Exercises take place in 3 groups approx. every second week during the lecture period (exact dates will be provided at the beginning of the semester).

Active participation in the exercises is expected!

Learning Outcome:

You understand the basic principles of molecular symmetry and group theory of inorganic molecules and you can apply them in the field of MO theory for more complex molecules, and have the basis for further concepts in spectroscopy and other areas of chemistry.

You will also understand the origin and formation of the elements, the properties, structures, bonding relationships and reactivities of the main group elements.

The lecture and exercise material is examination material: The topics mentioned above or in the script/slides are required.

Languages of Instruction:

german (single exercise groups might be taught in english)

Course Materials:

M. Weller, J. Rourke, T. Overton, F. Armstrong Inorganic Chemistry 2018, 7th Edition, Oxford University Press, ISBN 978-0-19-252295-5
C. E. Housecroft, A. G. Sharpe Inorganic Chemistry 2018, 5th Edition, Pearson, ISBN 978-1-292-13414-7

Merkmale:

Responsible instructor: Roland K.O. Sigel

Requirements:

Prior Knowledge: Fundamentals of Chemistry (CHE 101+102), Basic Laboratory Courses in Chemistry (CHE 111+112) or equivalent knowledge

Assessment: Written module examination after the lecture period

Repetition of the exam in fall prior to the beginning of the new year of studies

The current exam schedule can be found under: <https://www.chem.uzh.ch/de/Studium/exams/hs.html>

and for the repetition exams under: <https://www.chem.uzh.ch/de/Studium/exams/rep.html> (<https://www.chem.uzh.ch/de/Studium/exams/rep.html>)

The exam is held in German; an English translation can be provided on request.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Module CHE 203 Organic Chemistry I: Mastering Molecular Magic

07SMCHE203 / Lecture with Practical Exercises

Description:

General description:

Organic Chemistry I is based on the "Fundamentals of Chemistry" and provides an introduction to the structure and reactivity of organic molecules based upon the chemistry of functional groups.

Special emphasis will be placed on learning reaction mechanisms and developing synthetic strategies.

ECTS: 4

Learning Outcome:

Specialized Skills: At the end of this course module, students should master:

- Structure, bonding, polarity and acidity
- Hybrid atomic orbitals
- Lewis dot and resonance structures
- Conformations and energies of 4-, 5-, and 6-membered rings
- Functional group chemistry including alkanes, alkenes, alkynes, ethers, alcohols, aldehydes and ketones
- Types of isomers including enantiomers and diastereomers
- Types of reactions including radical halogenation, reduction, oxidation, SN1, SN2, E1 and E2 reactions

Module CHE 154 Physical Chemistry I for the Life Sciences

07SMCHE154 / Lecture with Practical Exercises

Description:

General description:

The two-hour lecture covers the foundation of thermodynamics. It focuses on the equations of state of ideal gases, main laws of thermodynamics, work, heat, thermodynamic state variables and chemical potential. Building on these fundamentals, phase transformations and phase diagrams, mixtures, colligative properties and chemical reactions in equilibrium are discussed. Special attention is paid to topics of particular relevance to the life sciences, such as energy conversion in chemical reactions, interpretation and significance of free enthalpy and osmosis.

The exercises are meant to consolidate students' knowledge and problem solving abilities. The weekly exercises comprise questions and problems from thermodynamics to be solved by the students. They are reviewed in the class.

ECTS: 3

Learning Outcome:

Understanding and applying the content covered

Languages of Instruction:

german (single exercise groups might be taught in english - depending on the respective assistant)

Course Materials:

Script (see link)

Merkmale:

Responsible instructor:

Stefan Seeger
Georg Artus

Requirements:

Prior Knowledge:

The knowledge of the lectures in Fundamentals of Chemistry (CHE 170/172 or CHE 101/102) is required.

Assessment:

Written module examination after the lecture period

Repetition of the exam in fall prior to the beginning of the new year of studies

The exam is held in German!!

The current exam schedule can be found under: <https://www.chem.uzh.ch/de/Studium/exams/hs.html> and for the repetition exams under: <https://www.chem.uzh.ch/de/Studium/exams/rep.html>

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Organisation: Division III Chemistry

Offered in:
Fall Semester 2026
Fall Semester 2025
Fall Semester 2024
Fall Semester 2023
Fall Semester 2022

Component of:

Biochemistry		
Single Major 180	Bachelor of Science Faculty of Science (2021)	Compulsory modules, 2nd year of studies Biochemistry <i>Compulsory</i>

Module CHE 312 Experimental Coordination Chemistry and Analytics

07SMCHE312 / Praktikum

Description:

General description:

The lab course consists of three parts. For three weeks, students do one analytical experiment and two advanced literature experiments. The experimental instructions for the literature syntheses have to be found by a literature search in different databases. For another three weeks, students do an advanced project in a research group, whose members will also provide the supervision. This gives a fascinating insight into the current research activities. In the seminar, the work groups in Inorganic Chemistry present themselves. The final part takes place in the last week, in which the students present the results from their research projects.

ECTS: 5

Notes:

The laboratory capacity is limited! Anyone who fulfills the requirements for the lab course and has booked before the deadline (until about one week before the start of the course - see booking period) will be considered when allocating laboratory places!

fee of 170 CHF

Learning Outcome:

Independent work in the laboratory based on literature procedures
Documentation of experiments according to the standards of a Master's thesis
Acquisition of new laboratory techniques

Languages of Instruction:

German, English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Bernhard Spingler

Requirements:

Prerequisites:

Experimental and theoretical knowledge of the level of CHE 213 ("Synthese-Praktikum, Teil 1")

Prior Knowledge:

Practical classes of the first two years and lectures in inorganic chemistry of the 3rd and 4th semester.
If knowledge of these topics is insufficient, we reserve the right to exclude students from the course.

Assessment:

Presence in the laboratory, successful completion of all experiments and reports, and fulfilment of all requirements specified in the laboratory instructions.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Su 25.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Su 15.11.2026 24:00

Module CHE 311 Multi-step Organic Syntheses

07SMCHE311 / Praktikum

Description:

General description:

Multi-step syntheses of complex molecules as project work including introduction of advanced laboratory techniques.

ECTS: 5

Notes:

The laboratory capacity is limited! Anyone who fulfills the requirements for the lab course and has booked before the deadline (until about one week before the start of the course - see booking period) will be considered when allocating laboratory places!

Pre-Discussions will be held in the week before the start of the lecture period by individual appointment. Please note that you cannot start the laboratory work without this preliminary discussion. Prolonged absences have to be discussed with the heads of the course or the TA.

fee of 170 CHF

Learning Outcome:

Independent work in the laboratory based on literature procedures Documentation of experiments according to the standards of a Master's thesis
Acquisition of new laboratory techniques

Languages of Instruction:

German, English

Course Materials:

Current scientific literature and hand-outs

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Nina Hartrampf

Requirements:

Prerequisites:

Experimental and theoretical knowledge of the level of CHE 213 ("Synthese-Praktikum, Teil 1")

Prior Knowledge:

Practical classes of the first two years and lectures in organic chemistry of the 3rd and 4th semester.
If knowledge of these topics is insufficient, we reserve the right to exclude students from the course.

Assessment:

Presence, execution and documentation of all experiments as well as achieving the performance goals according to the instructions. Evaluated will be: the quality of preparation for the experiments and the practical work in the laboratory (grade 1) as well as the documentation of the results in form of a final report (grade 2). Both grades have to be "passed" (≥ 4.0); the final grade results as the arithmetic mean of the grades 1 and 2.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module CHE 313 Practical course in Physical Chemistry II

07SMCHE313 / Praktikum

Description:

General description:

Experiments related to the content of the lectures Physical Chemistry I- III and current physical chemistry research at the institute. Students will get to use modern research equipment and learn advanced data evaluation methods.

ECTS: 5

Notes:

The laboratory capacity is limited! Anyone who fulfills the requirements for the lab course and has booked before the deadline (until about one week before the start of the course - see booking period) will be considered when allocating laboratory places!

The course is compatible with one of the other two advanced practical courses in the fall semester. Accordingly, students can choose to do the experiments either in the first or the second half of the term.

fee of 170 CHF

Learning Outcome:

- Understanding of modern research areas and experimental setups in the research laboratories of physical chemistry
- Operation of complex measurement setups
- Ability to analyse data in several stages
- Understanding of non-linear fit methods, creation of own fit functions, global fitting
- In-depth use of professional software for data analysis and data visualisation
- Confidence in writing laboratory reports in physical chemistry
- Creating and presenting scientific posters
- Securing and documenting scientific data

Languages of Instruction:

German, English

Course Materials:

Laboratory manuals and instructions for data analysis.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Peter Hamm
Jan Helbing

Requirements:

Prerequisites:

Successful completion of the physical chemistry practical course I (CHE 211)

Prior Knowledge:

Students are expected to be familiar with the material covered in the lectures Physical Chemistry I (CHE 205) and Physical Chemistry II (CHE 206).
If knowledge of these topics is insufficient, we reserve the right to exclude students from the course.
Parallel completion of Physical Chemistry III (CHE 305) is an advantage.

Assessment:

Presence in the laboratory, successful completion of all experiments and reports, and fulfilment of all requirements specified in the laboratory instructions.

All assessments have to be completed and handed in by the end of the exam period of the fall semester!

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Su 06.09.2026 24:00

Module CHE 328 Green Chemistry

07SMCHE328 / Lecture with Practical Exercises

Description:

General description:

This course will give an insight into the field of green and sustainable chemistry. The qualitative aspects of sustainability will be discussed in the framework of the Twelve Principles of green chemistry. The course will also emphasize a quantitative approach, through the use of Life Cycle Assessment (LCA). We will use Simapro LCA software (<https://simapro.com/>) in the classroom to investigate a chemical process (all students are expected to bring their own laptop with internet access for connecting to the Simapro servers).

ECTS: 4

Notes:

The midterm exam takes place on October 21st during the lecture.

The final exam takes place on December 18th during the lecture.

Learning Outcome:

Understanding and applying the content covered

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

David Tilley

Requirements:

Assessment:

The final grade consists of:
30 min. midterm quiz (20%)
+ life cycle assessment report / group presentation (20%)
+ final written exam in the last lecture hour (60%)
All parts of the assessment are in English

A potential repetition of the exam (usually in written form) may be arranged by the responsible lecturer.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Module CHE 434 Chemical Biology

07SMCHE434 / Lecture with Practical Exercises

Description:

General description:

The course bridges fundamental chemistry principles with the biological functions of nucleic acids, proteins, and other key biomolecules. Emphasis is placed on understanding how these biomolecules are synthesized and analyzed both in vitro and in vivo, and how chemical tools can be used to probe and manipulate their biological activity.

ECTS: 5

Learning Outcome:

The aim of this course is to prepare students to investigate biological questions using chemical approaches. By the end of the course, students will be able to:

1. Explain the chemical structures and properties of nucleic acids, proteins, and oligosaccharides, and how these relate to their biological functions.
2. Compare and select suitable chemical and biochemical methods for the synthesis and modification of biomolecules for in vitro and in vivo studies.
3. Evaluate and apply analytical techniques for detecting and quantifying nucleic acids and proteins in complex biological environments.
4. Describe the principles and applications of fluorescence-based imaging, including advanced techniques such as FRET, FRAP, and super-resolution microscopy.
5. Design chemical tools and strategies to monitor small molecules, ions, and physicochemical parameters in living cells, with proper controls and validation.
6. Develop chemical approaches to manipulate biomolecular functions employing stimuli-responsive tools (e.g. photocages) in live-cell experiments.
7. Formulate and present interdisciplinary project proposals, demonstrating the integration of chemical principles with biological questions.

Target Groups:

Advanced Bachelor, Masters and PhD students with background and interest in organic, analytical, and biological chemistry

Languages of Instruction:

english

Course Materials:

Reference textbook: D. Van Vranken, G. Weiss. Introduction to Bioorganic Chemistry and Chemical Biology, 2013, Garland Science, ISBN: 978-0-8153-4214-4.
Many more resources will be available each week through OLAT

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Peter Stacko

Requirements:

Prior Knowledge:

Basic organic and inorganic chemistry (e.g. CHE 201 + CHE 203), biochemistry (e.g. BCH 201), and optical spectroscopy (e.g. CHE 207)

Assessment:

Weekly homework (10%), final presentation on the last week of the semester (40%), oral exam after the lecture period (50%)

All parts of the assessment are in English

A potential repetition of the oral exam may be arranged by the responsible lecturer.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Module CHE 420 Master's Thesis

07SMCHE420 / Master Paper / MA-Arbeit MNF

Description:

General description:

The Master's thesis is a scientific research project and lasts 9 months.

The module includes the authoring of a written report and the defense of the project with discussion. A further component is the attendance of the respective Master seminar. Responsible for the conduct and evaluation is a faculty member, an adjunct professor or a Privatdozent.

ECTS: 45

Notes:

For further details, please refer to the "Guidelines Master's Thesis" (available at https://www.chem.uzh.ch/en/Studium_EN/formulare.html)

Languages of Instruction:

The Master's thesis has to be written in German or English. Upon agreement with the supervisor French and Italian are possible.

Merkmale:

Responsible instructor: Sandra Luber

Requirements:

Prerequisites: Bachelor degree

Assessment: Master's thesis + presentation
(in English or German)

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Semester)

Dates/Times/Deadlines: Students arrange a Master's project individually with one of the group leaders of the Department of Chemistry.

The start of the Master's thesis is then registered with the teaching coordination of the Department through the StudentAdmin System.
(Links and forms: <https://www.chem.uzh.ch/de/Studium/formulare.html> (<https://www.chem.uzh.ch/de/Studium/formulare.html>))

Module BIO 211 Primate Behavior and Cognition: Concepts, Methods and Tools

07SMBIO211 / Block Course

Description:

General description:

In this course, you will be introduced to current topics and debates in primate behavior and cognition, with particular emphasis on how studying nonhuman primates can help understand human evolution. You will learn how to empirically approach and implement such ideas via demonstrations and hands-on experience with state of the art methods (e.g. systematic behavioral observations, experimental approaches, data preparation and analysis) and tools (e.g. thermography as non-invasive measure of arousal, automated audio and video recordings, endocrinology). The course will be a mix of lectures, demonstrations and exercises and also includes several excursions to zoo's and the Institute's Primate Stat for the practical parts.

ECTS: 6

Notes:

DIE ANMELDUNG FÜR DIE BLOCKKURSE ERFOLGT UNTER <https://www.mybiportal.uzh.ch>

Learning Outcome:

By the end of the course you should be able to (i) identify timely questions in primate behavior and cognition, and (ii) operationalize such questions using state-of-the art observational and experimental methods and technologies.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Judith Maria Burkart

Requirements:

Prerequisites:

BIO216 is a pre-requisite for this course, or equivalent knowledge or the motivation to acquire it during the course. Please contact the module leader if you are not sure regarding the pre-requisites. BIO 216 can be taken in the same semester as BIO211.

Basic studies in Biology or Biomedicine should be completed.
Students who completed Bio 133 "Anthropologie" are given priority.

Assessment:

Contributions and outcome of exercises, project proposal presentation.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Module BIO 440 Evolutionary Medicine: Morphological changes and pathologies

07SMBIO440 / Block Course

Description:

General description:

Evolutionary medicine aims to explain modern diseases by past changes. The goal of the course is to familiarize the students with state-of-the-art methodologies in evolutionary medicine such as virtual morphology.

The course provides ample opportunity to perform a small research project in the fields of evolutionary morphology, palaeopathology and imaging technologies.

This course introduces students to cutting-edge digital methods for studying morphological variation and evolution. During the block course, students will learn a structured workflow commonly used in virtual anatomy, gaining hands-on experience with CT image segmentation, 3D reconstruction, and geometric morphometrics, and perform a small research project.

These digital techniques are widely applied in biology and biomedicine, from clinical anatomy to evolutionary perspectives such as studying the evolution human birth difficulty.

By the end of the course, students will be equipped with essential skills for working with 3D anatomical data in a research or clinical environment.

ECTS: 6

Notes:

Vom 17.11 bis 20.11.2026 findet die Veranstaltung im Computerraum Y10-E-25 statt.

REGISTRATION FOR BLOCKCOURSES HERE: <https://www.mybiportal.uzh.ch>

Learning Outcome:

By the end of the course, students should be able to

- explain the fundamental principles of evolutionary medicine
- identify key questions that are currently discussed within the field of evolutionary medicine

Key skills:

By the end of the course, students should be able to

- design their own small research project (including planning of experiments, data collection, processing and analysis)
- present their findings effectively and appropriately
- critically evaluate scientific papers

Module Swiss Moot Court

02SM90MC3W / Seminar

Description:

ECTS: 6

Notes:

Der Moot Court umfasst 6 ECTS und wird im Bachelor als Bachelorarbeit und im Master als Wahlmodul anerkannt.

Teilnehmende der UZH melden sich in Teams gemäss den Regeln der Organisation Swiss Moot Court für den Wettbewerb an (<http://www.swissmootcourt.ch>).

Für eine Anerkennung der Teilnahme an der Universität Zürich ist eine verbindliche Anmeldung jedes einzelnen Teilnehmenden via Kontaktformular (<https://www.ius.uzh.ch/de/studies/contact-form.html>) bis 1. Oktober erforderlich (die Buchung des Moduls wird von der Prüfungsplanung übernommen). Wählen Sie im Kontaktformular die Kategorie Modulbuchung -> Zuteilung zu Proseminar/Seminar/Fallbearbeitung/Moot Court. Im Anmeldeformular sind zwingend die Teamnummer, Matrikelnummer, Stufe (Bachelor oder Master), Anrechnungswunsch (Bachelorarbeit oder Master-Wahlmodul) und E-Mailadresse anzugeben.

Die Abgabe von Beschwerdeschrift und -antwort hat innert Frist gemäss Vorgabe der Organisation Swiss Moot Court zusätzlich zu erfolgen an: Ist.dedual@ius.uzh.ch

Module Teaching Internship II-E

06SM090BPP2 / Module

Description:

General description:

Die Organisation der Unterrichtspraktika erfolgt über die Administration der Abteilung Lehrerinnen- und Lehrerbildung (LLBM). Informationen über die Anmeldung finden Sie auf unserer Homepage unter "Wegleitung zum Praktikum II". Sie gelangen zum direkten Link indem Sie die Veranstaltung unten anklicken. Die Anmeldung zu den Praktika läuft auf zwei Ebenen: 1. Anmeldung via Formular bei der Administration LLBM. 2. Reguläre Modulbuchung im UZH-System.

ECTS: 6

Merkmale:

Responsible instructor: Yves Karlen

Requirements:

Prerequisites: Für die Zulassung zum Praktikum II-E, dem zweiten Praktikum im einzigen Unterrichtsfach, wird der erfolgreiche Abschluss des Praktikums I vorausgesetzt.

Assessment: Der Leistungsnachweis zum Unterrichtspraktikum II-E besteht in der bestätigten Hospitation von 15 Lektionen, in der Planung und Durchführung von 25 Lektionen sowie in den hierzu erfolgten Besprechungen. Anforderungen, welche beim Entscheid über das Bestehen berücksichtigt werden, sind in der Wegleitung zum Unterrichtspraktikum II-E dargelegt (siehe <https://www.lehrdiplom.uzh.ch>). ---

Module BIO 607 Current Research in Evolutionary Ecology and Genetics of Natural Populations

07SMBIO607 / Seminar

Description:

General description:

Participation in lab meeting of research group of Lukas Keller, presentation of own project or scientific problem during one of the meetings

ECTS: 0

Notes:

Please note that just PhD students can gain 1 ECTS point in this module for giving a presentation. Sign up for talks with Ursina Tobler (ursina.tobler@ieu.uzh.ch)

Room: Y13-J-51

Learning Outcome:

Gain scientific experience with regard to formulation of research hypothesis, experimental/study design, data analysis and data presentation

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Lukas Keller

Requirements:

Assessment:

Regular participation, presentation in English

Grading Scale:

Pass/Fail

Organisation:

Offer pattern:

1 Semester (Every Semester)

Booking Deadline/Period:

not bookable

Cancellation Deadline:

not cancelable

Organisation:

Inst. f. Evolutionsbiol. u. Umweltwiss.

Offered in:

Fall Semester 2027
Spring Semester 2027
Fall Semester 2026

Module BCH 201 Biochemistry I

07SMBCH201 / Lecture with Practical Exercises

Description:

General description:

Topics of the lecture: Buffers and non-covalent interactions, amino acids, protein structure, nucleic acid structure, lipids and membranes, fundamentals of thermodynamics, enzyme kinetics and ligand binding, protein purification, and protein regulation

ECTS: 5

Learning Outcome:

Subject-specific competencies:

At the end of this lecture module, students should be able to

- explain the structure and function of biological macromolecules and membranes
- explain the influence of non-covalent interactions on the structure and function of macromolecules and membranes
- explain the fundamentals of buffers, thermodynamics, and enzyme kinetics in a biochemical context
- describe the fundamental concepts of ligand binding and explain the regulatory mechanisms of oxygen transport
- conceptually describe different mechanisms regulating enzyme activity and protein function through compartmentalization, pH, post-translational modification, allostery and ligand binding
- design a simple protein purification project and justify the individual steps
- conceptually explain and interpret the effects of changes in biochemical parameters on the behavior of biological systems using graphical representations and models
- analyze biochemical literature based on guiding questions

Target Groups:

Students of Biochemistry, Chemistry as well as Chemistry and Business Studies

Languages of Instruction:

German

Course Materials:

Lecture slides and supplementary exercise materials:
<https://lms.uzh.ch/auth/RepositoryEntry/16579362865/CourseNode/99473177572497>

Selected chapters from the biochemistry textbooks Lehninger, Stryer, Voet, Mathews, and The Molecules of Life: Physical and Chemical Principles serve as accompanying literature.

Merkmale:

Responsible instructor:

Cristina Manatschal

Requirements:

Prior Knowledge:

Basic knowledge of chemistry is required.

Assessment:

The multiple-choice examination is a 2-hour written exam. Credits are awarded

upon successful completion of the examination (minimum passing grade: 4.0).
The current examination schedule of the MNF can be found here:

<https://www.mnf.uzh.ch/de/studium/pruefungen.html>

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: Registration to the module leads to compulsory registration to the module exam.
De-registration is possible within the regular cancellation period.

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Module Electives: Communication of Medical Benefits and Risks for Law Students

02SMW43_30 / Course

Description:

General description:

In diesem Modul werden die unterschiedlichen Bedeutungen von Wahrscheinlichkeiten und die verschiedenen Möglichkeiten der Darstellung und Kommunikation von Probabilitäten, Nutzen und Risiken der Medizin dargestellt. Diese Begriffe und Konzepte werden anhand von Beispielen erläutert und in den klinischen Kontext gestellt. Weitere Themen sind die unterschiedlichen Entscheidungsmodelle und Methoden in der Medizin sowie die möglichen rechtlichen Implikationen.

ECTS: 4

Notes:

Es stehen 10 Plätze für Doktorierende der Rechtswissenschaftlichen Fakultät zur Verfügung.

Die Einschreibung erfolgt über die Webseite (<https://www.bmel.uzh.ch/de/law/module/einschreibungen/>) des PhD BmEL. Für die Einschreibung gilt die Modulbuchungsfrist auf der Webseite des PhD BmEL.

Weitere Informationen und die verbindlichen Vorlesungstermine finden Sie unter <http://www.vam.uzh.ch>.

Learning Outcome:

Studierende

- verstehen den Begriff der Wahrscheinlichkeit und dessen unterschiedliche Bedeutungen
- kennen und verstehen die unterschiedlichen Arten der numerischen und graphischen Darstellung von Probabilitäten
- können Wahrscheinlichkeiten Patienten verständlich erklären
- kennen die Konzepte des "shared und informed decision making" und üben deren Anwendung
- kennen die Grenzen des "shared decision making" und berücksichtigen kulturelle, emotionale und psychopathologische Faktoren bei der Kommunikation mit Patienten."

Target Groups:

- Doktorierende des PhD BmEL und weitere interessierte Doktorierende
- Fast Track Teilnehmende

Module Teaching Internship II-W

06SM090BPPW2 / Module

Description:

General description:

Die Organisation der Unterrichtspraktika erfolgt über die Administration der Abteilung Lehrerinnen- und Lehrerbildung (LLBM). Informationen über die Anmeldung finden Sie auf unserer Homepage unter "Wegleitung zum Praktikum II". Sie gelangen zum direkten Link indem Sie die Veranstaltung unten anklicken. Die Anmeldung zu den Praktika läuft auf zwei Ebenen: 1. Anmeldung via Formular bei der Administration LLBM. 2. Reguläre Modulbuchung im UZH-System.

ECTS: 4

Merkmale:

Responsible instructor: Yves Karlen

Requirements:

Prerequisites: Für die Zulassung zum Praktikum II-W, dem zweiten Praktikum im Unterrichtsfach «Wirtschaft und Recht» an einer kaufmännischen Berufsmaturitätsschule, wird der erfolgreiche Abschluss des Praktikums I an einem Gymnasium vorausgesetzt.

Assessment: Der Leistungsnachweis zum Unterrichtspraktikum II-W besteht in der bestätigten Hospitation von 10 Lektionen, in der Planung und Durchführung von 20 Lektionen sowie in den hierzu erfolgten Besprechungen. Anforderungen, welche beim Entscheid über das Bestehen berücksichtigt werden, sind in der Wegleitung zum Unterrichtspraktikum II-W dargelegt (siehe <https://www.lehrdiplom.uzh.ch>). ---

Module Lessons Training Z-W

06SM090BPUW / Module

Description:

General description:

Das Modul Übungslektionen wird parallel zu den Fachdidaktik-Modulen absolviert und ermöglicht den Studierenden erste Praxiserfahrung im Unterrichtsfach «Wirtschaft und Recht». Die Übungslektionen werden im Rahmen der Fachdidaktikkurse - organisiert von den Fachdidaktik-Dozierenden - absolviert. Die Studierenden buchen dieses Modul im UZH-System idealerweise im Semester der FD II. Die ECTS-Punkte werden eingebucht, wenn die Fachdidaktik-Dozierenden über alle Unterlagen verfügen, frühestens aber am Ende des Semesters der FD II.

ECTS: 3

Merkmale:

Responsible instructor: Yves Karlen

Requirements:

Assessment: Absolvierte Übungslektionen: Das Modul ist bestanden, wenn die acht erteilten Lektionen zuverlässig durchgeführt und insgesamt als genügend beurteilt wurden.

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Module Master Thesis

07SMMEBMAAR / Master Paper / MA-Arbeit MNF

Description:

General description:

The Master's dissertation is a 52-week research project in which a major thesis shall be executed independently. The Master's dissertation shall be documented in a comprehensive paper (Master Thesis). The supervisor of the Master's dissertation can be a Professor, an Assistant Professor, or a Privatdozent affiliated to the Life Science Graduate School.

ECTS: 50

Languages of Instruction:

The Master Thesis will be written in German or English.

Merkmale:

Responsible instructor: Alexandra Trkola

Requirements:

Prerequisites: Acceptance into the Master of Science in Medical Biology program

Assessment: Master Thesis and seminar presentation

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Semester)

Dates/Times/Deadlines: The student arranges the subject and the start date of his or her Master dissertation in accordance with his or her supervisor. The Modulverantwortliche shall be notified in written form.

Module Master Exam

07SMMEBMAPR / Mündliche Prüfung

Description:

General description:

This module, designed as a self-study period of the Master degree course, allows students to demonstrate a comprehensive understanding of specialised areas of the Medical Biology curriculum, especially - but not only - in the area of their chosen Master. The examination consists of a seminar presentation on the Master's dissertation and an interview lasting 30 minutes conducted by the Master's thesis supervisor and a member of the IMPC.

ECTS: 5

Learning Outcome:

By the end of this module students should be able to demonstrate their understanding and command of relevant biological facts, methods and concepts - identify and explain interrelationships between the various facts, methods and concepts - summarise and critically review scientific literature efficiently and effectively

Merkmale:

Responsible instructor: Alexandra Trkola

Requirements:

Assessment: The examination consists of a seminar presentation on the Master's dissertation and an interview lasting 30 minutes conducted by the Master's thesis supervisor and a member of the IMPC.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Semester)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Organisation: Division IV Biology

Offered in:

Module BIO 131 Concepts in Plant Biology

07SMBIO131 / Lecture with Practical Exercises

Description:

General description:

This module focuses on the molecular biology, biochemistry, physiology, and anatomy of plants, as well as the fundamentals of plant domestication and crop improvement. It also describes the diverse interactions between plants and their environment. The functions and interactions of plants are presented at a multiscale level, from molecules to the environment.

ECTS: 4

Learning Outcome:

After passing the exam, students will have gained an understanding of the interconnection between plant anatomy, physiology, biochemistry, the environment and agriculture.

At the anatomical level, they will be able to

- describe the most important cell and tissue types and their differentiation and will have the ability to identify correlations between anatomical features and tissue function
- explain the most important plant metabolic processes and their relevance for plant development
- analyze organ morphogenesis

At the molecular level, you will be able to

- describe the dynamics of the evolutionary development of plant genomes
- identify the changes that transform wild plants into agronomically relevant crops
- describe how crop breeding is carried out using molecular breeding methods

At the biochemical level, you will be able to

- outline the mechanisms underlying the interactions of plants with microbes
- demonstrate the mechanisms that control developmental processes and stress responses.

Interdisciplinary competence

Through selected practical experiments, you will be able to evaluate scientific experiments and critically question their significance.

Languages of Instruction:

DE/EN for parts of Prof. C. Zipfel, Prof. T. Grube Andersen and Dr. K. Bender

Merkmale:

Responsible instructor: Cyril Zipfel

Requirements:

Assessment: Module exam in January, Repetition exam in September

Written exam, essay and some MC questions in German and English (with the possibility to answer in either German or English)

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: Die Vorlesung findet am Mittwoch und Freitag Vormittag statt.
Das gemeinsame Praktikum für BIO 131 und BIO 133 findet in zwei Gruppen entweder am Dienstag oder am Mittwoch Nachmittag statt.

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Module BIO 134 Programming in Biology

07SMBIO134 / Lecture with Practical Exercises

Description:

General description:

An introduction to programming in Python and application to biological problems. These include simple examples from image analysis, population dynamics, pattern formation, statistical analysis, and bioinformatics.

ECTS: 5

Learning Outcome:

By the end of this module the students should be able to:

- Write and execute short self-contained programs in Python
- Understand various data structures and control the flow of execution
- Translate real world biology-related tasks into suitable scripts

Module BIO 445 Quantitative Life Sciences: from Infectious Diseases to Ecosystems

07SMBIO445 / Block Course

Description:

General description:

Quantitative approaches are gaining steadily in importance in biology due to the increasing complexity and amount of data generated, which often require mathematical models for their interpretation. This course aims to present students with the diversity of research-questions in the Life Sciences that can be addressed with quantitative methods and to give them a hands-on experience (typically using R) with these methods.

The topics discussed range from interpreting genomic data, to the epidemiology of Infectious Diseases, Pharmacodynamics, Immune Dynamics, to Evolution and the Stability of Ecosystems. Researchers who actively work in the field of quantitative biology will present in an approx.

60min lecture about their recent research. Each lecture is followed by a discussion of the key concepts and a hands-on part for the respective topic, ideally in R. At the end of the course, the students will present (15 min) one paper from one of the lecturers.

Each course day

is dedicated to one of the following topics (minor changes possible) - Hands-on introduction to R - Big Data in R - From Epidemics to Viruses - Population Biological Models on Phylogenetic Trees - Analyzing the complexity in species-interaction networks - Quantitative Genetics - Modeling emerging epidemics/outbreaks - Cancer evolution - Resource Competition and Game Theory - Reconstruction of diverse populations using Next-Generation Sequencing Data - Bacterial Dynamics within Hosts - Pharmacokinetics, Pharmacodynamics, & Stoichiometry - Gene Regu Networks

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybiportal.uzh.ch>

Learning Outcome:

Being able to identify the questions in Biology where quantitative approaches are useful. Being able to identify which Methods to use for a specific biological question. Being able to critically assess the use and limitations of the different quantitative approaches Being able to conduct simple quantitative analyses (beyond basic statistics) of biological data in R

Module BIO 668 Cancer Biology - Module A

07SMBIO668 / Doktorandenseminar

Description:

General description:

This course is an advanced course for PhD Students and gives an overview about cancer biology. 5 different topics are highlighted during this course:

Modes of Cell Death, Colon Cancer: Natural History, Inflammation and the Microbiome, Functional Genomics, Cell Biology, Model Systems for Cancer Research

ECTS: 1

Notes:

Exact course dates and rooms will be announced on the website of the Cancer Biology Ph.D. program (<https://www.cb.uzh.ch/en/Education/Compulsory-courses.html>).

Learning Outcome:

Modes of Cell Death:

- Students are introduced to the concepts of accidental, regulated, and programmed cell death in the context of the therapeutic window.
- Students are introduced in the molecular machinery of autophagy, its use outside the canonical macroautophagy pathway, and pro- and anti-tumor functions of this machinery.
- Students are introduced to different forms of cell death and the molecular machinery associated with these forms of cell death. How cell death molecular machinery can be exploited by cancer cells or therapeutic gain will be discussed.

Colon Cancer: Natural History, Inflammation and the Microbiome: After the course, students will

- understand the natural history and the clinical consequences of colorectal cancer in humans.
- understand the role of the microbiome in colorectal cancer Pathogenesis and how it could contribute to cancer therapy in humans.

The Functional Genomics Day should enable the students to:

- describe the latest analytical technologies in Next Generation Sequencing and Mass Spectrometry and to explain their working principles.
- evaluate the potential and the limitations of Omics technologies for the investigation of fundamental and clinical research questions.

Cell Biology:

- Students will get familiar with general concepts in cell signaling and be taught about DNA damage signaling and the cell cycle in the context of cancer development and treatment.
- Students will be able to describe microRNA generation and function, will understand the concept of using microRNA as therapeutic target and will use their knowledge to critically discuss the function of microRNA in cancer formation

Model Systems for Cancer Research:

After this course day students will know main approaches towards ex vivo modeling for cancer research, understand advantages and limitations of ex vivo models. Understand experimental and regulatory aspects of preclinical work needed for drug approval.

Target Groups:

Members of the Cancer Biology PhD Program have preference

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

César Nombela Arrieta

Requirements:

Grading Scale: Pass/Fail
Repeatability: Can be repeated once

Module CHE 301 Bachelor's Thesis

07SMCHE301 / Bachelor Paper / BA-Arbeit MNF

Description:

General description:

The final component of the Bachelor's program is the Bachelor's thesis. It is a scientific research project and lasts not more than 3 months. The module includes the authoring of a written report and the defense of the project. Responsible for the conduct and evaluation is a faculty member, an adjunct professor or a Privatdozent.

ECTS: 10

Notes:

For further details, please refer to the "Guidelines Bachelor's Thesis" (available at https://www.chem.uzh.ch/en/Studium_EN/formulare.html)

Languages of Instruction:

german/english

Merkmale:

Responsible instructor: Sandra Luber

Requirements:

Prerequisites: Prerequisite to begin the Bachelor's thesis is the completion of at least one laboratory course of the third year of studies.

Assessment: Bachelor's thesis + defense
(in German oder English)

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Semester)

Dates/Times/Deadlines: Students arrange a project individually with one of the group leaders of the Department of Chemistry. The start of the Bachelor's thesis is then registered with the teaching coordination of the Department.
forms can be found under: <https://www.chem.uzh.ch/de/Studium/formulare.html>

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Module CHE 490 Research Training

07SMCHE490 / Externe Leistung

Description:

General description:

For students with a Bachelor degree from another university: Oral examination covering the extended basics in chemical laboratory work and subsequent research project in one of the research groups of the Department of Chemistry

ECTS: 8

Notes:

Before starting the module the students register with the teaching coordination of the Department to learn about the details of the module.

The forms for registration and final confirmation after finishing the module can be found here: <https://www.chem.uzh.ch/de/Studium/formulare.html> (<https://www.chem.uzh.ch/de/Studium/formulare.html>)

Target Groups:

Master students with a BSc degree from a foreign university for whom this module is defined as admission requirement.

Languages of Instruction:

english (or german)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Sandra Luber

Requirements:

Assessment:

oral examination covering the extended basics of experimental lab work (50%) + written project report (50%)

Both parts of the assessments must be passed with a sufficient grade each!

In case of insufficient knowledge in the oral exam additional experimental/practical lab work can be assigned before the start of the research project

Both parts are held in English (the exam can be in German by arrangement)

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

Module WCH 403 Industrial Internship

07SMWCH403 / Praktikum

Description:

General description:

Students search themselves for a company where they will work on an economic and/or chemical project for about at least 8 weeks and gain insight into the work in industry. Company and project have to be accepted by the responsible lecturer before starting the internship! Students summarize the work during their internship in a written report.

The internship can lead to a Master's thesis in the same company.

ECTS: 5

Notes:

Further information and guidelines for the internship and the report can be found here: www.wichem.uzh.ch/de/formulare.html (<https://www.wichem.uzh.ch/de/Studienaufbau/formulare.html>)

Learning Outcome:

Students gain insight into the working methods of the chemical industry and collect first professional experiences.

Languages of Instruction:

german and/or english

Merkmale:

Responsible instructor: Sandro Vicente Oliveira
Stefan Seeger

Requirements:

Prerequisites: Bachelor's degree in "Chemistry and Business Studies"

Assessment: written report (in English)

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Semester)

Dates/Times/Deadlines: Students register individually with the responsible lecturer. After completion of the internship and fulfilling all requested standards the filled and signed confirmation has to be handed in to the teaching coordinator of the Department in order to obtain the ECTS credits for the module. Form can be found here: www.wichem.uzh.ch/de/formulare.html (<https://www.wichem.uzh.ch/de/Studienaufbau/formulare.html>)

Module GEO 851 Glacier Mass Balance Measurements and Analysis – from local observations to global assessments 07SMGEO851 / Lecture with Practical Exercises

Description:

General description:

This lecture series provides a comprehensive training in glacier mass balance measurements and analysis based on best practices of the World Glacier Monitoring Service. Although focused on glaciers, this course provides concepts and tools that are generally applicable to the monitoring of environmental variables. We introduce both glaciological and geodetic methods for assessing glacier mass balance and guide the participants through the full process from designing an observation concept, to glaciological point measurements in the field and the calculation of glacier-wide balances. Furthermore, we discuss the assessment of uncertainties in the context of validation and calibration of entire mass balance series and its relevance for regional and global mass balance analysis.

This weekly training course combines lectures and practices and includes a two-day measurement campaign on a Swiss glacier at the beginning of the semester.

ECTS: 3

Notes:

Expected costs for the field training (tickets, hotel): CHF 300.00

GEO 851 can be combined with GEO 815 (HS), GEO 856 (FS) or GEO 857 (FS) for consolidation (Vertiefungsblock) in Physical Geography.

- Insurance is the responsibility of the participants.
- By booking this module you agree to the following authorisation clause: I agree that bookings or reservations within the price range of the excursion are made on my behalf.

The Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 6 & 13

Learning Outcome:

Participants of this course (i) get a general understanding of concepts and tools for observing an environmental variable, (ii) learn to measure and analyse glacier mass balance, and (iii) can put corresponding results in the context of global climate change monitoring.

Target Groups:

MSc students

Languages of Instruction:

English

Course Materials:

Digital handouts, scientific papers, WGMS website

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Michael Zemp

Requirements:

Prerequisites:

Attendance of GEO 341 "Gletscher und Permafrost" or equivalent.

Prior Knowledge: Basics in glaciology

Assessment: Active participation in all course components is required in the weekly lectures, practicles (GEO 851.1) and 3-day field trip at the beginning of the semester (GEO851.2).

Graded components (pass/fail):

- Group report documenting the results
- Group presentation of the report

Students who submit a failing report or presentation may revise and resubmit it within the course. If the module is not passed, the entire module must be repeated in the next available semester.

Language of assessments: English

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Module BME 410 Scientific writing and publishing

07SMBME410a / Lecture with Practical Exercises

Description:

General description:

Participants will learn and practice how to prepare and write a scientific manuscript.

ECTS: 4

Notes:

Registration until August 31, through admin.biomedizin@physiol.uzh.ch.

Student's matricule number and study program must be communicated in the application. The number of places is limited. Allocation is based on the start date of the Master's thesis.

Final registration is only valid upon receipt of confirmation from course organizer (after registration period).

Cancellation until August 31, otherwise the course counts as failed!

PLEASE NOTE: The course should be taken during the master thesis.

Learning Outcome:

The students attending this course will be able:

- to organize the sections of a manuscript logically and clearly
- to format a manuscript based on the requirements of a journal
- to choose and include appropriate references to a manuscript
- to write a cover letter to the submission of a manuscript
- to understand and apply the principles of peer-reviewing

Target Groups:

Compulsory module for Master students in Biomedicine.

Module BIO 438 Methods in Human Bioarchaeology

07SMBIO438 / Lecture with Practical Exercises

Description:

General description:

This course includes lectures and practical exercises covering basic knowledge and methods, which are necessary for an in-depth analysis of human osseous remains, both from an archaeological and biological perspective. This includes a.o. anatomical identifications, imaging techniques, pathological diagnoses as well as the value of bone for morphological, functional and molecular interpretations, e.g. information on individual life histories as well as practical exercises with archaeological skeletons.

ECTS: 3

Learning Outcome:

By the end of this module each student should be able

- To understand the anatomical and pathological basics of human osteology
- To be able to generate a simple biological profile of an "osteological case"
- To be able to describe the value of human osteological remains in an archaeological context

Module Electives: Ethics and Law in Medicine

02SMBME01 / Course

Description:

General description:

Das Modul "Ethik und Recht in der Medizin" verfolgt zwei Hauptanliegen: Zum einen vermittelt es Kenntnisse über bestehende normativ-rechtliche Rahmenbedingungen: Wie verbindlich ist eine Patientenverfügung? Unter welchen Voraussetzungen darf eine Obduktion durchgeführt werden? Muss ich Minderjährige um ihre Einwilligung zu einem Eingriff fragen? Zum anderen bietet das Modul Raum zur Reflexion über die klinische Medizin: Welche theoretischen und ethischen Prämissen sind mit der Praxis der Medizin verknüpft?

Die 9 × 3 Präsenzstunden, jeweils begleitet von Selbststudium, widmen sich u. a. folgenden Themenbereichen: Persönlichkeitskonzepte und Menschenbilder in der Medizin, Theorie der Medizin, urteilsunfähige und urteilsunmündige Patienten, Verfügung über den menschlichen Körper nach dem Tode, Ressourcenverteilung. Weitere Schwerpunkte sind die ethischen Aspekte zentraler Forschungsfelder (seltene Krankheiten, Tierversuche, Genomdaten/Biobanken) sowie Fragen im Umgang mit Pandemien.

Die Lehrangebote werden von Biomedizinischer Ethik, Rechtsmedizin, Psychosozialer Medizin und Rechtswissenschaften gemeinsam gestaltet.

Studierende der Medizin und der Rechtswissenschaften erarbeiten und diskutieren gemeinsam Kenntnisse zu ethischen und rechtlichen Aspekten ausgewählter Themenbereiche der Medizin und Biowissenschaften und üben dabei ihre Fähigkeiten in kritischer Reflexion und Argumentation. Die aktive Beteiligung an Diskussionen sowie die Erstellung und Präsentation von Falldiskussionen sind zentrale Bestandteile des Moduls.

ECTS: 4

Notes:

Es sind 10 Plätze für Doktorierende/Studierende der Rechtswissenschaftlichen Fakultät reserviert.

Die Einschreibung erfolgt über die Webseite (<https://www.bmel.uzh.ch/de/law/module/einschreibunghs/>) des PhD BmEL. Für die Einschreibung gilt die Modulbuchungsfrist auf der Webseite des PhD BmEL.

Weitere Informationen finden Sie unter <http://www.vam.uzh.ch>

Learning Outcome:

Die Studierenden...

- kennen die wichtigsten theoretischen Ansätze zum Gesundheits- und Krankheitsbegriff sowie die zentralen ethischen Aspekte des Themas
- sind vertraut mit den ethischen Aspekten der wichtigsten Forschungsfelder (seltene Krankheiten, Tierversuche, Genomdaten/Biobanken)
- erarbeiten die wichtigsten ethischen Grundsätze und rechtlichen Normen im Umgang
- mit urteilsunfähigen und urteilsunmündigen Menschen,
- mit der menschlichen Leiche,
- mit Ressourcenknappheit und Fragen der Ressourcenverteilung
- mit Pandemien.

Target Groups:

- Doktorierende des BmEL und weitere interessierte Doktorierende
- Fast Track Teilnehmende

Module BME 236 Biomedicine I

07SMBME236 / Course

Description:

General description:

Introduction into general concepts of Virology, stem cells and Tissue engineering, Tumor biology, Microbiology and Pathophysiology.

ECTS: 3

Notes:

The lecture will take place in the lecture hall, it will be recorded (PodCast). The exam in January will take place in the usual framework (on site, closed book).

Exam plan:

<https://www.mnf.uzh.ch/de/studium/pruefungen.html>

Learning Outcome:

Upon completing this lecture series, students gain a profound understanding of basic physiologic and pathophysiologic processes in embryology, immunology tumor biology and virology.

By the end of the module students should be able to:

- Understand the process of embryology
- Describe the role of immune system in health and disease
- Understand the basics of virus pathophysiology (influenza, hemorrhagic fever)
- name principles and characteristics of pathologic changes in tissues and organs
- know characteristics of tumor development and metabolism
- explain the function and regulation of stem cells in a physiologic and pathophysiologic setting

General competences:

Students will be able to address questions in a biomedical context (e.g. clinical studies, animal studies) and to critically discuss results and concepts

Target Groups:

- Suitable for English speakers.
- Required for admission to the Master programme Biomedicine.

Languages of Instruction:

English

Merkmale:

Responsible instructor: Lubor Borsig

Requirements:

Assessment:

- Graded (Numbers, in half steps)
- Module exams in January, exam resits in September
- The exam is only offered in English

Grading Scale:

1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Immersion Didactics (English)

06SM090Imm / Module

Description:

General description:

The course's aim is to provide a basis for future CLIL teachers in order to reflect upon and to implement the methodological and pedagogical dimensions of teaching a subject immersively in English. Participants will get an insight into the basics of CLIL, working on theoretical as well as practical materials, to be prepared for the challenge of having to teach a subject in a - presumably - foreign language. Apart from theoretical inputs and practical work, there will be guest speakers as well as opportunities to talk to immersion students. Course participants are expected to be active in class and in groupwork. During the course they will be required to produce their own hands-on materials, written assignments and will have to be willing to reflect critically upon them. In addition to this, participants are expected to do a set number of hospitation and trial lessons.

ECTS: 8

Notes:

Eine Voranmeldung beim Dozenten Michael Bühler, michael.buehler@ife.uzh.ch, ist unabdingbar. Als Nachweis der Sprachkompetenz wird ein Cambridge Proficiency Diploma (CPE) verlangt. InteressentInnen, deren CPE mehrere Jahre zurückliegt, müssen ein aktuell gültiges Sprachkompetenzniveau C2 nachweisen können. Bei Muttersprache Englisch oder gut dokumentiertem, nachweisbarem langen Studien- oder Arbeitsaufenthalt im englischsprachigen Ausland entscheidet die Kursleitung über eine "sur dossier" Zulassung. Der Sprachkompetenznachweis muss der Voranmeldung zwingend beigelegt werden. Zudem wird erwartet, dass die TeilnehmerInnen mindestens die fachdidaktische Ausbildung (FD1), idealerweise bereits FD2, in ihrem Fach absolviert haben und auch entsprechende erste Unterrichtserfahrungen in Form von Übungslektionen, u.U. Praktika, und/oder Stellvertretungen haben sammeln können. Unterrichtserfahrung im immersiven Fachunterricht wird jedoch nicht erwartet oder vorausgesetzt. - Der zweisemestrige Kurs beginnt jeweils im Herbstsemester. - Die Modulbuchung erfolgt über die Administration LLBM. Das zweite Semester kann nur bei erfolgreichem Bestehen des ersten Semesters besucht werden. - Studierende, die Englisch als einziges Unterrichtsfach absolvieren, werden nicht zugelassen.

Languages of Instruction:

Unterrichtssprache Englisch

Merkmale:

Responsible instructor: Michael Bühler

Requirements:

Assessment:

Portfolio: Schriftliche Arbeit, Referat, schriftliche Übungen. Zudem müssen im Rahmen von Übungslektionen 4 Lektionen unterrichtet und 4 hospitiert werden. Das Modul wird als bestanden bewertet, wenn alle Elemente des Portfolios und die Übungslektionen bestanden sind. Die aktive Teilnahme an den Lehrveranstaltungen wird erwartet.

Module CHE 436 Complex Molecule Assembly

07SMCHE436 / Lecture with Practical Exercises

Description:

General description:

The goal of this course is to develop a detailed understanding of the tactics and strategies used in complex molecule assembly. Specifically, the students will learn to develop and refine hypotheses for the preparation of a complex natural product. The students will learn to apply their chemical knowledge in the context of the requirements posed by complex organic molecules, and students will learn to address different constraints encountered in such endeavors. Additional learning outcomes will be critical method selection in the context of the full range of methodology in organic synthesis, and the use of modern tools for route selection, both database-oriented and by machine learning. As part of the examination procedure, students will learn to analyze a complex molecule, and will develop a proposal for its synthesis. A term paper will be written by the students documenting their analysis, and the solution to the challenges given in the context of a potential synthesis of the target molecule. Submission of the term paper to the instructor within the deadline is required. The term paper will be graded based on Scientific content of the route selection (feasibility, originality, creativity), Scientific quality of the methods selection (feasibility, originality, creativity), and technical quality of the paper (style, format, spelling). A detailed orientation of the goals, learning outcomes, and the term paper examination will be given in the introductory lecture.

ECTS: 5

Learning Outcome:

To understand classic and recent strategies and tactics in complex molecule synthesis and to apply this knowledge to the design of new routes towards target molecules.

Languages of Instruction:

english

Course Materials:

Classics in Total Synthesis: Targets, Strategies, Methods [Paperback]
K. C. Nicolaou (Author), E. J. Sorensen (Author) Paperback: 821 pages
Publisher: Wiley-VCH; 1 edition (December 17, 1996) Language: English
ISBN-10: 3527292314
ISBN-13: 978-3527292318

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Karl Gademann

Requirements:

Prior Knowledge:

Successful participation in OC I (CHE 203), OC II (CHE 204), OC III (CHE 304) and Advanced Synthesis (CHE 321)

Assessment:

Examination details: Students are requested to hand in a term paper via email describing a synthetic route in the forward direction towards a target natural product that will be assigned by the instructors (in English).
Deadline for the term paper is given under "Dates/Times/Deadlines".
Details will be discussed in class.

In case of a failed attempt, the entire module must be retaken.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module BME 520 Integrated knowledge in Biomedicine

07SMBME520 / Prüfung ohne Lehrveranstaltung

Description:

General description:

This module is designed as a self-study on a research topic defined at the beginning of the Master studies by the supervisor of the Master thesis and the Master coordinator. Through the survey of the current literature on the subject, the student demonstrates a comprehensive understanding of a specialised area of biomedicine. The topic of the module should not overlap with the specific topic of the Master thesis. At the end of the self-study, the examination of the learning outcomes takes the form of a 30-minute oral examination.

ECTS: 6

Learning Outcome:

By the end of this module students should be able to

- demonstrate their understanding and command of relevant biological facts, methods and concepts
- identify and explain interrelationships between the various facts, methods and concepts
- summarise and critically review scientific literature efficiently and effectively

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Thierry Hennet

Requirements:

Assessment:

- A 30 minutes oral examination
- The topic is set at the beginning of the Master studies and is listed in the Learning Agreement

Module BIO 684 Translational Medicine: Infection & Immunity

07SMBIO684 / Seminar

Description:

General description:

Topics in Translational Medicine: Infection & Immunity will be pr by members of the PhD Program in Microbiology and Immunology: Each will give a lecture on their favorite field with the focus on translation of findings in basic research into clinical practice and diagnostics.

ECTS: 2

Notes:

Weekly seminar, Wednesday 4:15 - 6:00 pm, total of 14 double lessons, examination in December (last of the double lessons); written exam, MC questions, in English

This is a joined seminar with the ETH, thus, it is mandatory to register via Email to Karin.Metzner@usz.ch

Number of participants limited to 25 with waiting list.

Learning Outcome:

1. Classify the fundamental principles of translational medicine, drug discovery, and biomarker research in basic science and clinical investigation 2. Explain the principles of technologies of biomarker discovery 3. Identify the molecular tools for classification and monitoring of diseases 4. Explain principles of immunological responses at body surfaces 5. Describe the requirements of Good Clinical Practice
2. Recognise statistical concepts in clinical trials 7. Report the route of drug discovery to drug approval via clinical trials 8. Assess the importance of trials and post-marketing surveillance to recognize unexpected outcomes 9. Describe the process of patenting

02SMWRM_30_K / Course

Description:

General description:

Übersicht über die Methoden der modernen Kriminaltechnik und Rechtsmedizin, Zusammenarbeit zwischen Juristen, Kriminaltechnik und Rechtsmedizin, Einführung in den Bayesian Approach, Fragestellungen und Gutachtenserstattungen

ECTS: 6

Notes:

Die Einschreibung erfolgt über die Webseite (<https://www.bmel.uzh.ch/de/law/module/einschreibunghs/>) des PhD BmEL. Für die Einschreibung gilt die Modulbuchungsfrist auf der Webseite des PhD BmEL.

Learning Outcome:

Die Studierenden lernen die Methoden der naturwissenschaftlichen Forensik und Rechtsmedizin kennen und befassen sich mit staatsanwaltschaftlichen Fragestellungen an die Experten.

Target Groups:

- Doktorierende des BmEL sowie weitere interessierte Doktorierende
- Fast Track Teilnehmende

Die Veranstaltung entspricht dem Mastermodul "Kriminaltechnik - Naturwissenschaftliche Forensik und Rechtsmedizin"

Languages of Instruction:

Deutsch

Module BME 346 Tissue Engineering of the Skin

07SMBME346 / Block Course

Description:

General description:

The course will provide an introduction into methods used in our laboratory for tissue engineering of human skin substitutes. In this coursework, students will learn cell culture techniques for primary cells, also prepare and characterize human dermo-epidermal skin substitutes.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybiportal.uzh.ch>

Learning Outcome:

By the end of this module, students should be able to:

- Understand the complexity of many issues related to human skin transplantation and of basic molecular biology interventions for the healing of gene-related diseases.
- Isolate and culture keratinocytes and fibroblasts and endothelial cells and reconstitute a skin substitute in vitro
- Evaluate the quality of a skin substitute by means of immuno- histochemical staining procedures
- Present and discuss their own experimental results
- Present and critically discuss a scientific article in the field

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Luca Pontiggia

Requirements:

Prior Knowledge:

Basic Studies completed

Assessment:

During the course the students will

- 1) analyze a scientific publication related to the practical course,
- 2) evaluate and report their achieved practical results,
- 3) take a multiple choice exam on OLAT.

The assessment is based on the regular attendance, commitment during the course, the quality of the presentations, and the final exam. All parts of the assessment are in German + English.

Grading Scale:

1-6, Half Grades Given

Module BIO 117 Molecular and Classical Genetics for Non-Biologists

07SMBIO117 / Course

Description:

General description:

In dieser Grundvorlesung werden die klassischen und molekularen Konzepte der Vererbungslehre erarbeitet: Rolle der Genetik in der Biologie, Chromosomen und Zellteilung, Grundprinzipien der Vererbung, Kopplung und Rekombination, Kartierung von Genen, Assoziationsanalysen und genomweite Assoziationsstudien (GWA), Chromosomale Variationen, Struktur der Gene, Replikation der DNA, Transkription, RNA Prozessierung, Translation, Regulation der Genexpression, Methoden der Gentechnologie, Mutationen und DNA Reparatur, Grundprinzipien der rekombinanten DNA-Technologie und Genomik und wie diese neuen Technologien die moderne Gesellschaft beeinflussen, Ausblick auf weitere Themen der Genetik wie Quantitative Genetik, Transgene Individuen und Krebs.

ECTS: 4

Learning Outcome:

Am Ende dieses Moduls sind die Studierenden in der Lage

- Fachbegriffe der klassischen und molekularen Genetik zu definieren und auf biologische Phänomene anzuwenden
- Vererbungsmuster zu erkennen, sie quantitativ und qualitativ vorausszusagen, sowie Rückschlüsse auf deren genetische Grundlagen zu ziehen
- Prozesse der Genexpression und deren molekulare Komponenten zu beschreiben
- die für die Genetik relevanten zellbiologischen Prozesse zu beschreiben und mit genetischen Abläufen zu verknüpfen
- genetische Grundlagen und Konzepte an ausgewählten Problemstellungen der Medizin und der Biologie anzuwenden
- Standardmethoden der Molekularbiologie zu beschreiben und deren Anwendungen zu erklären

Überfachliche Kompetenzen

Am Ende dieses Moduls sind die Studierenden in der Lage

- selbständig zu entscheiden, welches die wesentlichen Konzepte und Inhalte für die Molekularbiologie und die klassische Genetik sind und welche Beispiele und Ausführungen nur als Ausblick oder zur Veranschaulichung dienen
- Informationen und Zusammenhänge selbständig zu verstehen und auszuwerten
- mit statistischen Verfahren abzuschätzen, ob praktische Beobachtungs- und theoretische Erwartungswerte übereinstimmen

Target Groups:

Studierende mit Hauptfach Biochemie oder Minor Biologie, Biomedizin, Bioinformatik oder Astronomie und Astrobiologie.

Languages of Instruction:

Deutsch (Unterlagen z.T. in Englisch)

Course Materials:

Empfohlenes Lehrbuch: "An Introduction to Genetic Analysis" von Anthony J.F. Griffiths et a.l., 12th Edition.

Merkmale:

Responsible instructor:

Alex Hajnal

Requirements:

Assessment:

Im Modul BIO117 findet eine Modulprüfung im Januar 2027 statt.

Prüfungsformat:

- Online Prüfung vor Ort in verschiedenen Hörsälen (BYOD-SEB: 'Bring-your-own-device' mit 'Safe exam browser')
- Aufgabentypen:
 - Multiple Choice (verschiedene Fragetypen)
 - kurze Freitext-Aufgaben
- Prüfungssprache: Deutsch mit englischer Übersetzung

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Dates/Times/Deadlines:

Das Modul beinhaltet 4 Stunden Vorlesung pro Woche während des ganzen Semesters.

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline:

from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Organisation:

Division IV Biology

Offered in:

Fall Semester 2026
Fall Semester 2025

Module EPI 301 Introduction to Epidemiology

07SMEPI301 / Course

Description:

General description:

The overall goal of this 4-week block course is to introduce students to the major questions of clinical and epidemiologic research and to methods to address these questions. The course follows an overall framework describing the course of scientific discovery from the detection and burden of disease and its causes to diagnosis and prognosis of disease up to the development and evaluation of preventive and treatment interventions and their consequences for population health. We will discuss study designs in the context of existing knowledge and the type of evidence needed to advance knowledge and methods expertise to design, conduct and interpret substantive medical research. In the first part, this course follows a practice-based learning approach in which students work in groups to design, conduct, analyse and report an entire study during the course. Input lectures introduce to concepts, which are then conceptualized and applied to the studies. The second part (1.5 days) is organized as a mix of short input lectures and interactive, hands-on group work. The course will provide a basis for further studies and research in the fields of Medicine and Public Health (on Master or PhD level), both of which are very dynamic and diverse fields.

ECTS: 3

Notes:

For questions please contact: miloalan.puhan@uzh.ch

Target Groups:

PhD students from the Epidemiology and Biostatistics Program, the Clinical Science Program, and the Care & Rehabilitation Sciences Program, as well as Master students in Biostatistics

Course Materials:

Course material is available on Switchdrive. Communication and course instructions will be sent via E-mail.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Milo Alan Puhan

Requirements:

Prior Knowledge:

Basic knowledge in medical research methods and biostatistics as taught during medical school at UZH or other fields related to life sciences. A strong interest in medicine, epidemiology, public health and in quantitative research is expected.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Semester)

Dates/Times/Deadlines:

All regulations of UZH with regard to COVID-19 will be followed. The following plan is in line with UZH regulations.

Block course, 4 weeks from October 21 2024 to November 20 2024; Mondays 9-17, Tuesdays 8-17, and Wednesdays 8-12 with some exceptions.

Part I: Plan, conduct and analyze a study in small groups. Input lectures online and practice-based learning in small groups.

Part II: Mini-Seminars on key study designs and concepts. Parallel small groups.

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Module Elective Module: Introduction to Computational Psychiatry

04SM16MAS009 / Sonstiges

Description:

General description:

In Vorlesungen mit Seminarcharakter werden klinische Probleme in der Psychiatrie, Konzepte und Methoden komputationaler Neurowissenschaft und deren Anwendung bei ausgewählten psychischen Erkrankungen diskutiert. Studierende wiederholen in Kleingruppen die Inhalte durch Auseinandersetzung mit wissenschaftlicher Fachliteratur (englischsprachig) zum Thema Computational Psychiatry. Die Ergebnisse werden in der Gruppe vorgestellt. In Labor-Exkursionen können wichtige Untersuchungsmethoden praktisch erfahren werden (MRI, EEG/MEG) und Studierende können bei Interesse dabei angeleitet werden, Daten selbstständig auszuwerten. Der Unterricht erfolgt, je nach Kontext, auf Deutsch oder Englisch (z.B. Präsentationen der Fachliteratur auf Englisch möglich).

ECTS: 4

Learning Outcome:

Die Studierenden können:

- Prinzipien psychiatrischer Diagnostik und Behandlung beschreiben und deren klinisch-praktische Probleme identifizieren
- die Bayesian Brain Theory beschreiben und Zusammenhänge mit psychischen Erkrankungen erklären
- wichtige Methoden der Datenerhebung (Verhaltensmessungen, EEG/MEG, MRI) mit Vor- und Nachteilen erklären
- Prinzipien wichtiger methodischer Konzepte aus dem Bereich Computational Psychiatry wie komputationale Modellierung, Generative Embedding und Machine Learning beschreiben
- mögliche Anwendungen aus dem Bereich Computational Psychiatry für Fatigue, Depression, Schizophrenie und Autismus beschreiben
- wissenschaftliche Fachliteratur (englischsprachig) aus dem Bereich Computational Psychiatry verstehen

Target Groups:

Studierende mit Interesse an Psychiatrie & Psychotherapie, die offen sind für Neurowissenschaften. Vorwissen im Bereich Psychiatrie, Mathematik oder Programmierkenntnisse werden explizit nicht vorausgesetzt. Sämtliche Inhalte werden innerhalb des Kurses erarbeitet. Der Kurs eignet sich auch für Studierende in den ersten Studienjahren.

Course Materials:

Vorlesungsslides, weiterführende Literatur und sonstige Materialien werden zur Verfügung gestellt.
Fakultativ können Studierende Tutorials mit Daten zur eigenständigen Analyse verwenden.

Merkmale:

Responsible instructor:

Klaas Enno Stephan

Requirements:

Assessment:

Nach entsprechender Einführung erhalten die Studierenden Originalliteratur aus dem Bereich Computational Psychiatry. Diese wird in Kleingruppen durchgearbeitet. Die Ergebnisse werden in Kurzvorträgen von den einzelnen Studierenden nach Thema getrennt präsentiert.

Die Studierenden haben den Kurs bestanden (keine Benotung), wenn in der anschliessenden Fragerunde und Diskussion folgende Kriterien erfüllt werden:

- Die/der Studierende kann die Problemstellung der im Fachartikel beschriebenen

Studie erklären.

- Die/der Studierende kann die Methodik der Studie und deren Vor- und Nachteile beschreiben.
 - Die/der Studierende kann die wichtigsten Ergebnisse wiedergeben und diese, basierend auf den Inhalten des Kurses, kritisch diskutieren.
 - Die/der Studierende kann Stärken und Schwächen der Studie darstellen.
- Die Beobachtungen werden von den Dozierenden in einem Kurzprotokoll erfasst.
Bei Nichtbestehen oder Nichtantreten zum Referat erfolgt eine strukturierte mündliche Prüfung, bei welcher die Lernziele abgefragt werden.

Module WCH 712 Consulting in the chemical industry - Case study from practice

07SMWCH712 / Course

Description:

General description:

Students will complete a location analysis for the construction of a new production plant. The chemical and economic knowledge gained through their studies will need to be combined and applied.

ECTS: 1

Languages of Instruction:

german, english

Merkmale:

Responsible instructor: Sandro Vicente Oliveira
Stefan Seeger

Requirements:

Assessment: presentation during the course (in English)

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Su 01.11.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Module ESC 201 Introduction to Computer Simulations I

07SMESC201 / Lecture with Practical Exercises

Description:

General description:

Anhand von einfachen Beispielen wird gezeigt wie Probleme in den Naturwissenschaften mit dem Computer gelöst werden. In einer einführenden Vorlesung werden die theoretischen Grundlagen und die Lösungsmethoden erklärt. Im Praktikum werden dann unter Anleitung verschiedene Projekte in der Programmiersprache Python realisiert. Anfangs konzentrieren wir uns auf einfache numerische Methoden in Python. Danach behandeln wir Algorithmen der numerischen Integration; Lösung gewöhnlicher Differentialgleichungen mit Anwendungen aus Biologie, Chemie und Physik; Simulationen die Deterministisches Chaos aufweisen: Bevölkerungswachstum und Planetenbahnen im Sonnensystem; Elektrostatik und Wärmeleitung als Beispiele für die Lösungsmethoden für Partielle Differentialgleichungen. Die Simulationen werden durch einfache grafische Darstellungen zum Leben erweckt.

ECTS: 5

Learning Outcome:

Bearbeiten naturwissenschaftlicher Problemstellungen mittels selbstgeschriebener Software.

Target Groups:

Alle Naturwissenschaftler, die gerne selbst Algorithmen programmieren.

Languages of Instruction:

English

Course Materials:

Bringen des eigenen Laptop ist erforderlich.

Merkmale:

Responsible instructor:

Joachim Gerhard Stadel

Requirements:

Prior Knowledge:

Vorkenntnisse sind nicht zwingend nötig. Trotzdem ist Erfahrung mit irgend einer Programmiersprache (vor allem Python) von Vorteil.

Assessment:

20-minütige Modulprüfung

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Dates/Times/Deadlines:

Beginn am Montag in der ersten Vorlesungswoche.

Module BIO 555 Scientific Writing for Evolutionary Biologists

07SMBIO555 / Seminar

Description:

General description:

All scientists have to write. Some enjoy it, others dread it. This course provides tools and strategies to enhance your writing and to overcome difficulties in the writing process. We will address the following topics:

· Publishing in Evolutionary Biology: how to write and communicate in the reviewing process · Writing concise and attractive abstracts: how to structure and summarize complex topics · Addressing different types of audience · Find and keep motivation for writing projects; tools to improve focus

We will work on these topics by means of exercises, group work, input talks, discussions and individual feedback.

ECTS: 1

Notes:

To register, send email to evobio@aim.uzh.ch

The course will be held in Y42-K-88 on Friday and in Y42-K-80 on Monday.

Learning Outcome:

- The participants can reflect on the quality of a text
- They have gained insights into the publishing process in Evolutionary Biology
- They have tools at hand to address a variety of problems and challenges in the writing process
- They can tailor a text to target a specific audience.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Simon Aeschbacher

Requirements:

Prior Knowledge:

- This course is for PhD students
- Priority: PhD students of the Evolutionary Biology PhD Program
- Registration deadline is two weeks before the course starts
- Submission deadline for required preparatory work is one week before the course starts.

Please note that you need to plan in one to two days for the preparatory work in the week between registration deadline and submission deadline.

Assessment:

Written exam in English

Module BIO 783 Research Internship at Zoo Zurich

07SMBIO783 / Praktikum

Description:

General description:

During a three-month internship students gain a deep insight into the broad range of activities of a scientific zoo. The students will join the weekly tours into all animal sections. They will work on defined projects such as animal and/or species management, literature reviews or compiling fact-sheets for animal or plant species. They will also focus on a small research project, that will be defined on site.

ECTS: 10

Notes:

The area of activities is furthermore:

- Organisation of zoobiology and animal husbandry section (organigram, tours into all animal sections, personnel management)
- Animal management (ISIS, ARKS, register, SPARKS, description and working sheets, a.o.)
- Conceptions for exhibits and animal enrichment
- Animal transportation (organisation, paperwork, IATA, handling)
- international contacts (EAZA, EEP, ESB, studbooks, a.o.)

Learning Outcome:

By the end of this module the students should be able to

- acquire scientific principles and implement them in the fields of animal husbandry and management
- cope within a complex environment and meet the demands of their defined role

Key skill: By the end of this module the students should be able to independently plan and execute a research project in a practice-oriented environment.

Merkmale:

Module Cognitive Foundations of Economics (Neuroeconomic Foundations of Decision Making) (L+E)

03SMDOEC0726 / Lecture with Practical Exercises

Description:

General description:

Human perception, attention, and memory are imperfect, and these imperfections are very likely to affect how people behave. Yet, for a long time, economists have neglected these imperfections because of a lack of empirical knowledge and conceptual insight into how one can integrate them into economic models. In recent years, however, an accumulating body of theory and evidence has emerged that provides a way forward. This course presents and discusses the economic implications of imperfect perception, attention, and memory for economic choice behavior. In addition, the course emphasizes the micro-foundation of these imperfections in terms of the constraints that the brain imposes on human perception, attention, and memory. It will illustrate with specific examples how neurobiologically informed concepts can help us better understand robust and well-documented behavioral phenomena such as risk and loss aversion, probability weighing, biased judgements and beliefs or context, over-reaction, and context effects.

ECTS: 3

Notes:

Students should be interested in the active, critical discussion of recent scientific insights in the domain of decision making.

This module will not be podcasted or recorded.

Room: BLU-003

Learning Outcome:

Students will increase their understanding of the processes involved in decision making.

Target Groups:

Doctoral students interested in the foundations of economic and social decision making.

Languages of Instruction:

The course will be taught in English.

Course Materials:

Scientific articles on cognitive and neuroeconomics and exercise sheets

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Rava Azeredo da Silveira

Requirements:

Prerequisites:

Admission to an economic doctorate at UZH (economics or neuroeconomics)

Prior Knowledge:

Students should have a basic knowledge of economic choice models that are taught in advanced master and in doctoral courses. Prior knowledge of the brain's basic neural architecture is useful but it is also possible to follow the course by reading a few basic articles.

Assessment:

Regular attendance, active participation, and homework assignments.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: October 30;
November 6, 13, 20, 27;
December 4, 11, 18;
2:00PM-3:45PM and 16:15PM-6:00PM.

Module BCH 310 Biochemistry III

07SMBCH310 / Course

Description:

General description:

Following topics will be discussed in this lecture course:

- DNA replication, recombination and repair
- Chromatin regulation and epigenetics
- Transcriptional control
- Genetic manipulations, genome editing, CRISPR/CAS technology
- Regulation of enzyme activity and protein function through posttranslational modification, allostery, ligand binding, oligomerization and compartmentation
- Ultrasensitivity in signal transduction and regulatory circuits

Module KRI 211 X-ray Powder Diffraction

07SMKRI211 / Course

Description:

General description:

In the course the students learn to measure X-ray diffraction patterns of minerals and to evaluate these using different software for qualitative and quantitative mineral composition as well as crystallographic parameters.

- Fundamental principles of X-ray diffraction
- Setup and operation of X-ray diffractometers
- Interpretation of powder diffraction data
- Qualitative and quantitative phase analysis of crystalline powders (e.g. with Rietveld analysis)

ECTS: 3

Notes:

Number of participants limited to 18!

Special selection procedure.

BOOK EARLY; the module is quickly booked out! Booking deadline might be before the start of the semester! For details check the ETH catalog!

Module together with ETH (Lerneinheit 651-4063-00L); takes place at ETH.

This module can't be booked at the UZH. Students of the UZH, please, register at the ETH and book the module through the ETH-system: <https://ethz.ch/de/studium/non-degree-angebote/fachstudierende/fachstudierende-uzh.html>

After completion of the module your grade and ECTS will be transferred automatically to the UZH-system.

Learning Outcome:

Upon successful completion of this course students are able to:

- describe the principle of X-ray diffraction analysis
- carry out a qualitative and quantitative mineralogical analysis independently,
- critically assess the data,
- communicate the results in a scientific report.

The competencies of system understanding, concept development, and measurement methods are taught and examined.

Languages of Instruction:

english

Course Materials:

Selected handouts will be made available in the lecture

- BRINDLEY G.W. and BROWN G. (ed) "Crystal structures of clay minerals and their X-ray identification". London : Mineralogical Society monograph no. 5 (1984)
- DINNEBIER, R.E. et al.: "Powder Diffraction". Royal Society of Chemistry, Cambridge, 2008. (<http://pubs.rsc.org/en/Content/eBook/978-0-85404-231-9>)
- PECHARSKY, V.K. and ZAVALIJ, P.Y.: "Fundamentals of Powder Diffraction and Structural Characterization of Materials". Springer, 2009. (<https://link.springer.com/book/10.1007/978-0-387-09579-0?page=2#toc>)

Merkmale:

Responsible instructor: Bernhard Spingler
Michael Plötze

Requirements:

Prior Knowledge: Basics in crystallography
The course includes a high portion of practical exercises in sample preparation as well as measurement and evaluation of X-ray powder diffraction data. Own sample will be analysed qualitatively and quantitatively. Knowledge in mineralogy of this system is essential.
Software will be provided for future use on own Laptop.

Assessment: graded semester performance
(for more details refer to ETH lecture catalog)

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module PHY 529 Advanced Topics in General Relativity and Gravitational Waves

07SMPHY529 / Course

Description:

General description:

Possible content:

- General relativistic stellar structure equations (Neutron stars)
- Tetrad formalism
- Spinors in GR
- Klein-Gordon & Dirac eqs. In GR
- Thermodynamics of black holes and Hawking radiation
- Topics in gravitational waves: GW generation by PN sources, GW from elliptic, hyperbolic binaries
- Tests of the equivalence principle

This course is offered as a self-study course. Please contact Prof. Jetzer directly for more information.

Module GGP.S420 Basics in Geography I

07SMGEO900 / PHZH SEK I Module

Description:

ECTS: 3

Notes:

The Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 2; 11; 12; 13 & 14

Learning Outcome:

Die Studierenden lernen grundlegende Methoden, Konzepte und Fragestellungen aus aktuellen Forschungsfeldern der Geographie kennen und diese mit schulrelevanten Inhalten (Sekundarstufe I) zu verbinden.

Target Groups:

Students of PHZH with the subject GGP

Languages of Instruction:

German

Merkmale:

Responsible instructor:

Sara Landolt

Requirements:

Assessment:

Written examination, 90 minutes, no aids permitted, on-site, graded on a scale of 1 to 6 in half-point increments. A failed examination can be repeated once. The examination covers the content of both modules GGP.S420 (autumn semester) and GGP.S440 (spring semester) and is administered by PHZH as a separate event (DPS.FW.GG).

Language of examination: German

Grading Scale:

1-6, Half Grades Given

Module BIO 669 Cancer Treatments - Module D

07SMBIO669 / Doktorandenseminar

Description:

General description:

This course is an advanced course for PhD Students and gives an overview about cancer treatments. 5 different topics are highlighted during this course: Personalized chemotherapy, cancer surgery, cancer radiotherapy, tumor pathology, Precision Oncology: targeted and immuno-therapy in cancer patients.

The aim of the course is to get an overview of several treatments for cancer therapy. The students will visit an operating theatre and observe the surgery of cancer.

ECTS: 1

Notes:

Exact course dates and rooms will be announced on the website of the Cancer Biology Ph.D. program (<https://www.cb.uzh.ch/en/Education/Compulsory-courses.html>).

Learning Outcome:

By the end of this module students should be able to

- understand the principles of cancer molecular subgroups
- become acquainted with personalized cancer treatment
- understand basics of biomarker-guided cancer treatment
- plan the procedure of radiotherapy and explain the fundamentals of radiation oncology
- learn the functional basis for targeted and immunotherapies in clinical cancer care
- get to know the most common classes of actual targeted and - immunotherapy agents and their side-effects
- acquaint themselves with specific aspects of predicting and managing immune-checkpoint inhibitors in cancer patients
- understand the aims and methods of a few exemplary Precision Oncology Programs of the University of Zurich and the ETH Zurich

Module MAT 556 Category Theory

07SMMAT556 / Lecture with Practical Exercises

Description:

General description:

This course provides an introduction to category theory as a tool for organizing and unifying ideas across modern mathematics. We will develop the core language of categories, functors, and natural transformations, with an emphasis on universal properties and representability. We will study limits and colimits, adjoint functors, and Kan extensions, and learn how these concepts clarify constructions in algebra, topology, and related fields.

ECTS: 9

Notes:

Mathematical Fields: Algebra; Geometry/Topology

Learning Outcome:

By the end of the course, students will be able to work fluently with the basic language of categories, functors, and natural transformations; use universal properties and the Yoneda lemma to characterize and construct objects via representability; compute and apply limits and colimits in standard examples; recognize and use adjoint functors as a central organizing principle; and understand Kan extensions as a unifying framework for universal constructions and functorial approximation.

Target Groups:

Math and AMML BSc students from 3rd semester and MSc students.

PhD students are welcome, please book MAT556DP Category Theory with DP in the name. This here is the module for BSc and MSc students.

Course Materials:

Emily Riehl, Category Theory in Context, Dover, 2026

Additional Literature:

- Saunders Mac Lane, Categories for the Working Mathematicians, Springer
- Steve Awodey, Category Theory, Oxford Logic Guides

Merkmale:

Responsible instructor:

Alberto Cattaneo

Requirements:

Prior Knowledge:

Comfort reading and writing proofs, and working with abstract definitions, basic set theory, some exposure to algebra and topology

Assessment:

oral exam, in case of many students may also be written, repetition exam: oral

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Irregular)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Module BME 300 Research Internship in Biomedicine (6-12 weeks)

07SMBME300 / Praktikum

Description:

General description:

The students work on a defined research project under the supervision of an advanced researcher and write a report. They learn the scientific practice, the use of research methods and how to evaluate, interpret and describe scientific results (report).

Research internships are primarily supervised by research group leaders associated with the Faculty of Science (MNF) or lecture in the Biomedicine or Biology study programs. The research group must be approved at least 4 weeks before the start of the internship by the Studienkoordination Biomedizin biomedizin@physiol.uzh.ch (hand in confirmation form).

ECTS: 6

Target Groups:

Only for Bachelor Students

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Lubor Borsig

Requirements:

Assessment:

Successful completion of the internship and a passing grade on the research report. Within one month (4 weeks) after completion of the internship, a research report in English of 10 - 15 pages must be handed in to biomedizin@physiol.uzh.ch. The report is graded. If the grade is satisfactory (min. 4), 6 - 12 ECTS credits will be credited in the advanced studies (core elective area 2), depending on the duration of the internship.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can't be repeated

Module BIO 338 Introduction to Scientific Writing

07SMBIO338 / Sonstiges

Description:

General description:

Introduction to scientific writing. Discussion of structure and organization of research articles.

ECTS: 0

Notes:

Compulsory for MSc students of Biology. The module should best be taken before writing the MSc thesis.

Students must bring along an original research article from their own field and will use this article to evaluate the structure and organization of a scientific manuscript.

Learning Outcome:

Upon successful completion of the course, the students will know the essential parts of an original research article. They will be able to analyze and evaluate the structure and logic of research papers. They will be prepared to write manuscripts on their own projects.

Languages of Instruction:

English

Module BIO 357 Research Internship in Ecology

07SMBIO357 / Praktikum

Description:

General description:

The Research Internship in Ecology gives students the opportunity to carry out a small project in an active research group. Details of the project and method of assessment are negotiated with the project supervisor. Before beginning, the Internship must be checked by Prof.

Petchey.

Further information see link in the lecture section.

ECTS: 4

Learning Outcome:

Depending on the specifics of the project students will at the end of this module possess some of the following competences:

- analyse existing data with adequate statistical methods
- acquire deepened knowledge about literature, questions and methods within a specific ecological project
- conduct a small own sub-project within a larger existing project
- conduct experiments and/or field studies fairly independently
- write a report in the style of a scientific publication

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Owen Petchey

Requirements:

Prerequisites:

Only for Bachelor students. You can get 4 to 12 CP depending of the duration of your internship. Students of the BSc Biodiversity cannot take this module.

Assessment:

Written report in English

Grading Scale:

Module BIO 358 Research Internship in Animal Behaviour

07SMBIO358 / Praktikum

Description:

General description:

Research internships are offered by the Animal Behaviour research groups. Begin, duration, topics of the internship, as well as details of the written report are discussed on a case-by-case basis among the student, the supervisor of the internship and the module coordinator. The duration of the internship is from 4 to 12 weeks, with 1 ECTS per week.

Research internships are only offered to Bachelor students, not to students who already registered for the Master.

ECTS: 4

Learning Outcome:

Depending on the specifics of the project students will at the end of this module possess several of the following competences:

- analyze existing data with adequate statistical methods
- acquire deepened knowledge about literature, questions and methods within a research project in Animal Behaviour
- conduct a small own sub-project within a larger existing project
- conduct experiments and/or field studies fairly independently
- write a report in the style of a scientific publication (mandatory)

Module BIO 780 Museum Internship

07SMBIO780 / Praktikum

Description:

General description:

The museum practical takes place in one of the affiliated museums of UZH. The student must find a supervisor in one of the affiliated museums or institutions of UZH who will host the research practical (see list of teachers).

Minimum duration is 4 weeks (conferring 1 ECTS per week), maximum duration is 12 weeks. A detailed work plan and requirements is to be arranged with the project supervisor.

Before beginning, the internship must be approved by the module leader, Caroline Weckerle.

To seek approval for an external museum internship, students must contact Caroline Weckerle before getting in touch with a potential supervisor.

ECTS: 4

Notes:

4-12 ECTS for UZH museums and institutions. For external museums and institutions max. 6 ECTS are awarded, irrespective of the duration of the internship.

Learning Outcome:

Students will have practical experience with methodology relevant in natural history and other museums, particularly relating to exhibits, collections, public outreach, pedagogy, and management.

Languages of Instruction:

Preferably German, English is possible.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Caroline Sonja Weckerle

Requirements:

Prerequisites:

This module is open for students of the Mono or Major Bachelor in Biology or the consecutive Minor in Biology at Master level.

Assessment:

Final report or product, graded. In English or German.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can't be repeated

Organisation:

Offer pattern:

1 Semester (Every Semester)

Booking Deadline/Period:

not bookable

Cancellation Deadline:

not cancelable

Organisation:

Module Apprenticeship Training: Institutions and Markets (S)

03SMDOEC0758 / Doktorandenseminar

Description:

General description:

The course provides an introduction to institutional aspects of vocational education and training in general, and work-based training, including apprenticeship, in particular. Students will be familiarised with institutional attributes by country, sector and occupation. The course will consider the contributions of economics and other social sciences to an understanding of apprenticeship, as both as an economic and an institutional phenomenon.

ECTS: 3

Notes:

The number of participants is limited. Course registration before July 28, 2026, is mandatory. Please send your application (including a one-page CV) to Laura Brunner (laura.brunner@business.uzh.ch).

Target Groups:

Doctoral students interested in economics of education.

Languages of Instruction:

English

Course Materials:

Check our homepage:

<https://www.business.uzh.ch/de/professorships/emap/teaching.html>

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Uschi Backes-Gellner

Requirements:

Prerequisites:

Doctoral students enrolled at the University of Zurich & Leading House

Assessment:

Full course attendance is mandatory.

Grade is assessed by an essay (80%) and participation (20%).

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Irregular)

Module Behavioral Lab Meeting (S)

03SMDOEC0764 / Doktorandenseminar

Description:

General description:

Research projects go through many stages. They begin with evaluating the importance of a specific research question; they then need a suitable research design that answers the question. Data then needs to be collected, analyzed, and interpreted. Finally, a coherent story based on the findings must be developed that shows what was learned and where there are weaknesses. This seminar gives graduate students, post-docs, and professors the opportunity to present their research projects - regardless of the stage they are in - and to receive feedback from an interested audience of peers and experts.

Please note that no credit points can be earned for attending this course.

ECTS: 0

Notes:

Attendance in the course is limited. Please send a short email outlining your motivation for attending the course to tamara.herz@econ.uzh.ch.

The course instructors will inform you if you may attend.

Venue: BLU-003

Learning Outcome:

After attending the course, the student will have a clear understanding of the thought processes involved in all stages of a research project, and will be in a position to plan and conduct a research study on his/her own.

Target Groups:

Graduate students, post-doctoral researchers, and professors

Languages of Instruction:

English

Course Materials:

Any teaching materials will be made available to students.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Ernst Fehr

Requirements:

Prerequisites:

Completed MA in economics, enrollment in either the Zurich Graduate School of Economics or the Marlene Porsche Graduate School of Neuroeconomics.

Prior Knowledge:

The student should have advanced knowledge in his or her field of study.

Assessment:

For this seminar, there are no ECTS points.
Students must make their own presentation in class.

Grading Scale:

None

Repeatability:

Can be repeated once

Organisation:

Module BIO 228 Evolutionary Medicine

07SMBIO228 / Course

Description:

General description:

Evolution had many inputs into shaping current human health and will continue to do so. Evolutionary medicine uses concepts of evolutionary biology to better understand, prevent and treat disease.

The module addresses this latest transdisciplinary research with a specific focus on foundations in evolutionary biology and anthropology and different applications in medical fields such as cancer, metabolic and cardiovascular disease, infectious disease, reproductive health, or psychiatry.

ECTS: 2

Learning Outcome:

By the end of the module, you should be able to:

- understand key concepts in evolutionary biology such as adaptation by natural selection, phenotypic plasticity, or life history theory
- be familiar with human evolutionary history and the origins of human biological variation
- understand key concepts in evolutionary medicine such as mismatch, trade-offs, host-pathogen interactions, or the fact that selection may favour reproductive success at the expense of health
- appreciate the impact of the concept of evolutionary medicine on biomedical science and general society

Key skills:

By the end of the module, you should be able to

- apply basic evolutionary concepts to humans
- describe the main research aims and topics of evolutionary medicine
- engage in a meaningful, structured discussion of a specific research topic of evolutionary medicine

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Adrian V. Jaeggi

Requirements:

Assessment:

Two written exams, midterm and final.

Final grade composed of points scored in both exams (approx. 1/3 from midterm, 2/3 from final).

Language of assessments: English

Grading Scale:
