Module Seminar zum Accounting: Controlling in Fallstudien

03SM22MO0195 / Seminar

Description:

General description:

Schwerpunkt ist es, die betriebswirtschaftlichen Denk- und Analyseprozesse in praxisorientierten Fällen zu vertiefen:

- In welchen Kategorien denken Finanzleute?
- Welche Werkzeuge wendet das Controlling an?
- Wie werden die finanziellen Aspekte von Managemententscheidungen erfasst?
- Wie wird finanzwirtschaftlich argumentiert?

Das Seminar soll Ihnen die Welt und die Sprache des Controllings nahe bringen und Ihnen zeigen, in welchen Dimensionen das Controlling denkt.

ECTS: 3

Notes:

Die Teilnehmendenzahl ist auf 18 Personen beschränkt. Daher Zweitanmeldung direkt an Prof. Dr. Dieter Pfaff notwendig: dieter.pfaff@business.uzh.ch

Nach Zuteilung eines Seminarplatzes müssen Sie diesen innerhalb einer gegebenen Frist bestätigen. Durch die Bestätigung wird die Anmeldung verbindlich und Sie verpflichten sich zur Teilnahme am Seminar.

Anmeldung bis spätestens 3. August 2026

Learning Outcome:

- Controllinginstrumente und Finanzkennzahlen als Entscheidungsgrundlagen bewerten und anwenden können.
- In praxisrelevanten Fallstudien wird das Zusammenspiel von Controlling, Finanzen und Unternehmertum verständlich gemacht.

Target Groups:

Masterstudierende

Languages of Instruction:

Deutsch

Course Materials:

- Peters, Gerd/Pfaff, Dieter: Controlling: Wichtigste Methoden und Techniken, 4. Aufl., Zürich 2021, Versus Verlag
- Fallstudien zum Accounting (wird vom Dozenten bereitgestellt)

Merkmale:

Responsible instructor: Johannes Luger

Requirements:

<u>Prior Knowledge:</u>	Vorlesungen zu Financial und Managerial Accounting
<u>Assessment:</u>	Die Bewertung erfolgt im Rahmen einer Gruppenpräsentation je Arbeitsgruppe. Bewertet werden hierbei: - Ausarbeitung der Präsentation (50%) - Mündliche Präsentation (50%) Gewürdigt werden die Beiträge der einzelnen Gruppenteilnehmer*innen sowie Ausarbeitung der Gesamtpäsentation.
<u>Grading Scale:</u>	1-6 Quarter Grades Given

Module Real Analysis I (L)

03SM22MO0194 / Course

Description:

General description:

We will cover the standard topics in a one semester first course in real analysis appropriate for the intended audience, which in our case is students in our faculty, as opposed to the mathematics department (for which a higher level of presentation is used). The goal is to prepare the student for further study in courses that require this material, such as (post-introductory) probability theory, machine learning, microeconomics, mathematical finance, financial economics, and asset pricing. The list of topics is very standardized in nearly all textbooks at our intended level, and we will cover up to Riemann integration.

The exam date is not chosen by me, but rather the Dean's office, and cannot be changed. To account for this, I will stop presenting new material at least a week before the exam.

ECTS: 6

Learning Outcome:

The student is expected to obtain a solid understanding and working ability with the concepts and methods associated with beginning real analysis.

Target Groups:

Master Students

Languages of Instruction:

English

Course Materials:

We will use my set of notes, which are available for download from this link:

<https://u.pcloud.link/publink/show?code=XZ9CRJ0Zb8zoIpXjhLVQzYC1tEE9GJ2lxH7V>

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Marc Paoletta

Requirements:

Prior Knowledge:

at least one semester of undergraduate calculus

Assessment:

One midterm (50%) and one final exam (50%).
The examinations of the module will take place onsite.

Midterm written examination on: Thursday, October 29, 2026, 12:00-14:00

Final written examination on: Thursday, December 17, 2026, 12.00 - 14.00

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Leadership (L)

03SM22MO0193 / Course

Description:

General description:

Students will learn about leadership and develop their own potential as leaders. This course guides students through over a century of leadership research, highlighting various theoretical perspectives of leadership as well as trends within the leadership literature. Students will learn to think critically about the history of leadership research and its future.

ECTS: 3

Learning Outcome:

The principal aims of the course are to:

- Provide students with a thorough understanding of the theories of leadership and contemporary leadership research
- Engage in critical thinking regarding leadership research and the future of leadership
- Translate a body of scientific knowledge into a concrete, applicable leadership toolbox necessary for future leaders.

Languages of Instruction:

English

Course Materials:

Readings will be announced on the course webpage when the course starts.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Jochen Menges

Requirements:

Assessment:

100% Exam (on site).

The examination of the module will take place onsite. Written examination on: 14 January 2027, 16.15 to 18:00. The net processing time for the exam is 60 minutes.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Investment Process in Practice - Fundamentals and Applications (L)

03SM22MO0189 / Course

Description:

General description:

The course "Investment Process in Practice - Fundamentals and Applications" integrates various areas of finance to look at the institutional investment process. The teaching will cover fundamental principles, asset classes in a portfolio context, strategic and tactical asset allocation and implementation, but also investment process governance, aspects of risk management as well as life cycle management, performance measurement and reporting. The course will also discuss the role of digital assets and has a particular look at sustainability across investment processes. In addition, use cases of specific types of investors (e.g. foundations) will be presented. The teaching will encompass the application of academic concepts, enriched by practical examples and various guest speakers.

ECTS: 3

Notes:

This module takes place on-site with no recording.

Learning Outcome:

After completing this course students:

- Understand the (institutional) investment process along multi- and single asset classes
- Know the different elements of the investment process and how they interact: investment objectives, Strategic Asset Allocation, Tactical Asset Allocation, Selection/Rebalancing and Risk Management/Reporting/Performance Monitoring, also for various types of investors
- Describe academic concepts related to the various steps of the investment process
- Understand the key challenges in investment processes and bring in own thoughts

Target Groups:

MScQF Master and Master in Banking & Finance students

Languages of Instruction:

English

Course Materials:

will be provided

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Erich Walter Farkas

Requirements:

Prerequisites:

Bachelor

Prior Knowledge:

Asset Management: Advanced Investments (mandatory, can be taken in the same semester); FinTech & InsurTech - Digitalization of the Financial Services Industry, Behavioral Finance and Private Banking as well as Sustainable Investing (recommended)

Assessment:

The final assessment consists of an oral group presentation (to a specific topic) in person on the exam date:
Tuesday 19 January 2027, 12:00-18:00

Assessment Criteria:

1. demonstrate understanding of the topic (40%)
2. adds own reflections (20%)
3. academic integrity (20%)
4. quality of presentation (20%)

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Topics of Applied Risk Management (L)

03SM22MO0188 / Course

Description:

General description:

This course provides insights into financial risk management tools and techniques broadly used in the financial industry, providing theoretical foundations and discussing typical applications in practice. The lectures are complemented by case studies, allowing students to apply the techniques in real world set-ups.

ECTS: 3

Notes:

This course takes place onsite with no recording

Learning Outcome:

Students learn to apply financial risk management techniques in real world set-ups. They understand the benefits, drawbacks and pitfalls of applying different risk management concepts.

Target Groups:

Master students MSc QF and Master students B&F

Languages of Instruction:

English

Course Materials:

Handouts

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Erich Walter Farkas

Requirements:

Prerequisites:

Module BIO 299 Parasites - from genes to systems

07SMBIO299 / Block Course

Description:

General description:

The students will get a thorough introduction into parasitism and selected host-pathogen systems in the context of infection, public health, ecology and evolution. They will attend lectures, journal clubs, and workshops hosted by a large team of instructors with different research foci.

This is complemented by hands-on wet lab trainings focusing on hot topics and major research questions in the field. Examples are: In vitro cultivation systems and organoids as platforms for infection studies, behaviour of arthropod vectors, multi-omic approaches in human and animal infections, parasitological diagnostic procedures and interpretation and serological test development (e.g. RDTs) and evaluation.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Learning Outcome:

On completion of this module, the students should be able to:

- understand the biology, public health relevance and evolutionary context of major host parasite systems of medical and veterinary importance
- describe the ecology of arthropods (e.g. mosquitoes, ticks) of medical and veterinary importance and discuss their relevance
- know basic principles of serological test systems, and how to evaluate their characteristics

Module Get R_eady: Prognostic & Prediction Modeling in Research

10SMSTS-508 / Module

Description:

General description:

Prognostic models to predict future events have increasingly been used across different fields, e.g. in the medical sciences (clinical prediction models, personalized medicine, prognostic models), in legal data science (predictive analytics), political sciences (scientific prediction), or related.

The derivation and validation of such models poses specific challenges, that require knowledge of distinct methodological aspects in order to develop models that are internally valid and can be generalized out-of-sample. This course covers traditional statistical as well as machine learning approaches for model development, sample size calculation, variable selection, methodological outcomes for the assessment of model performance, as well as model validation. The course encourages critical thinking regarding published prognostic models' validity across different fields of research.

ECTS: 1

Notes:

The Get R_eady module enhances digital skills in the context of data analysis and graphics. It stimulates critical thinking and provides tools for reproducible research. In applications corresponding to the course participants' backgrounds, the concepts are explained. Hands-on sessions facilitate the understanding of the participants and enhance the discussion.

The course is building on problem based learning and held in an interactive and diverse format, with short lectures, demonstrations and hands on practical exercises to be solved in small groups.

Learning Outcome:

Aims of the course

- to equip participants with the essential tools to derive a prediction model,
- to enable participants to apply and interpret suitable model diagnostics for different types of prediction models,
- to empower participants to critically engage with and reflect on published prediction models

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Ulrike Held

Requirements:

Prerequisites:

Participants should have basic knowledge in the programming language R, equivalent to completion of the course "Get R_eady: Introduction to Data Analysis for Empirical Research". Additionally they should be familiar with statistical methods including statistical modeling methodology for binary outcomes.

Assessment:

The assessment is based on the following components:

- preparatory work before course start
- completion of group exercises
- short presentations in the second and third part of the course
- homework

The components of the assessment take place during the course, and homework needs to be submitted during the course and 2.5 weeks after the last course date.

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Organisation:

Offer pattern: 1 Semester (Every Semester)

Request period: from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Place allocation at the latest: Sa 29.08.2026 22:00

Waiting list progression period: from Sa 29.08.2026 22:00 to Do 10.09.2026 24:00

Cancellation period: from Sa 29.08.2026 22:00 to So 13.09.2026 24:00

Organisation: School for Transdisciplinary Studies

Offered in:

Module Hindi Revision Course

06SM330-014 / Module

Description:

General description:

Das Repetitorium gibt Hindi-Studierenden aller Stufen die Möglichkeit, ihre Übersetzungskompetenz zu verbessern und sich mit den Schritten des Übersetzungsprozesses weiter vertraut zu machen. Anhand ausgewählter Texte werden gängige Probleme des Übersetzens, aber auch individuelle Schwierigkeiten eingehend besprochen und komplexe Grammatikinhaltete repetiert.

ECTS: 3

Learning Outcome:

Die Studierenden haben vertiefte Kenntnisse in Grammatik, Syntax und Wortschatz des Hindis.

Languages of Instruction:

Deutsch

Merkmale:

Module BIO 208 Current Debates in Evolutionary Biology and Human Evolution

07SMBIO208 / Block Course

Description:

General description:

This module introduces students to the fundamental theories, methods and findings in evolutionary biology and evolutionary anthropology. It covers the main controversies and current debates in the field including: the role of natural selection vs. mutation in evolution; kin vs. group selection; contingency vs. convergence; selective vs. mechanistic theories of ageing and menopause; sex and sexual selection; animal vs. human culture; recent vs. ancient origins of language; among others.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Learning Outcome:

By the end of the module, students will be able to identify the main topics of debate and research in the fields of evolutionary biology and human evolution. The journal clubs and presentations will develop their ability to critically assess competing theories and produce synthetic evaluations. Two essay-based tutorials will provide individual-level feedback on the highly valuable skills of essay structuring, literature reviewing, and argument presentation in writing.

Merkmale:

Responsible instructor: Andrea Migliano

Requirements:

Prerequisites: Basic studies completed.

Assessment: Final grade is based on

(i) two 1000-word tutorial essays, in English, with feedback

(ii) participation in presentations

Format: group presentation in journal clubs

(iii) final essay in English

Format: one 1200 essay on a topic selected from list Submission date: first Monday after end of module

Grade structure: 20% tutorial essays, 10% participation, 70% final essay

Sprache des Leistungsnachweises: Englisch

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Organisation: Institut für Evolutionäre Anthropologie

Offered in: Fall Semester 2026

Module BIO 219 Evolution of the Human Brain, Cognition, and Language

07SMBIO219 / Course

Description:

General description:

The module offers a new perspective on human cognition in the light of advances in machine learning and artificial intelligence. It starts by contrasting brains in humans and other species. Next we compare ecological, social and cultural models of cognitive evolution in primates. Finally we address language evolution by examining the views of Skinner and Chomsky; fossil, comparative and genetic evidence; and the impact of Large Language Models. The module offers a fresh view of cognitive studies based on Turing's concept of machine intelligence, models of cultural intelligence, and the role of gene-culture coevolution in our species.

ECTS: 3

Learning Outcome:

The main objective of the module is to introduce students to current debates on the evolution of human brain and cognition. By the end of the module, students should be able to:

1. Understand the fundamental problems and concepts of cognitive science
2. Understand current evolutionary theories of language
3. Critically assess contrasting theories describing human unique cognitive features

Merkmale:

Responsible instructor: Lucio Vinicius Castilho

Requirements:

Module Medieval and Early Modern German Literature – Readings and Interpretations B

06SM360-118 / Module

Description:

General description:

Das Modul besteht aus einem Seminar, das mit einer schriftlichen Arbeit abgeschlossen wird, und einer Selbststudieneinheit mit einer mündlichen Prüfung. Im Seminar werden anhand eines historisch-systematischen Themas aus dem Bereich der deutschen Literatur von den Anfängen bis um 1700 und in Auseinandersetzung mit der Forschungsliteratur eigene Fragestellungen und Thesen entwickelt; durch die Lektüre selbstgewählter Texte aus einem umfangreichen Corpus (Leseliste) werden die literarhistorischen Kenntnisse vertieft, die schliesslich mündlich abgeprüft werden.

ECTS: 9

Learning Outcome:

Ausgehend von den Primärtexten und in Auseinandersetzung mit der vorliegenden Forschung können die Studierenden eigenständige Fragestellungen und Thesen entwickeln, die sie in methodisch reflektierten Argumentationen begründen. Sie verfügen über die hierfür notwendigen Recherchekenntnisse und wissen um die Konventionen des Fachs. Mit Erschliessungsinstrumenten und Hilfsmitteln (Bibliographien, Rezensionen, Forschungsberichte; Handbücher, Lexika) können sie umgehen. Sie können sich über die Seminarlektüre hinaus eigenständig Zugänge zu Texten der deutschen Literatur von den Anfängen bis um 1700 erarbeiten und sind über Form, Inhalt, Aufbau und Struktur einzelner Werke orientiert. Zudem verfügen sie über ein solides literarhistorisches Grundwissen, das die Kenntnis wichtiger Stoff- und Gattungstraditionen einschliesst.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Mireille Schnyder

Requirements:

Assessment: Portfolio: SA und mündliche PR (Gewichtung: 50% - 50%). ---

Der Leistungsnachweis ist zweiteilig: Die schriftliche Arbeit wird im Rahmen des besuchten Seminars geschrieben, die mündliche Prüfung auf Basis der abgegebenen Auswahl aus der Leseliste findet unabhängig davon statt. Abgabe der Auswahl aus der Leseliste: 09.05.2027; mündliche Prüfung im Zeitraum 13.-15.07.2027

Grading Scale: 1-6, Half Grades Given

Repeatability: repeatable once, book again

Module EEE 101 Introduction to Biodiversity

07SMEEE101 / Course

Description:

General description:

Die Vorlesung vermittelt allgemeine Grundkenntnisse zum Thema Biodiversität, welche in späteren Vorlesungen vertieft werden. Mittels Fallstudien und Beispielen werden die verschiedenen Themenbereiche der Biodiversität eingeführt und die Zusammenhänge dazwischen aufgezeigt, von der Entstehung von Biodiversität und deren Vermessung bis hin zu den Bedrohungen und möglichen Schutzmassnahmen.

ECTS: 3

Learning Outcome:

Am Ende dieses Moduls sind die Studierenden in der Lage:

- wichtige Fachbegriffe zu den verschiedenen Themenbereichen zu definieren und korrekt anzuwenden
- Zusammenhänge zwischen den verschiedenen Begriffen und Konzepten herzustellen
- faktenbasiert zu argumentieren

Module EEE 310 Current Conflicts in Biodiversity

07SMEEE310 / Block Course

Description:

General description:

This course takes a case study approach to address current debates on policies aimed at protecting biodiversity and policies considered a threat to biodiversity. In small group collaborations we will select a current political conflict, identify the most important stakeholders and their individual policy goals and strategies. We will get to know different actors of the policy process from an exchange with an environmental policy NGO and during a visit to a legislative session in the Federal Palace (Bundeshaus) of Switzerland. Biodiversity protection relies heavily on various policy instruments, such as regulation, financial incentives, and information. These will be studied in the literature, observed in the current policy-scape and discussed in an interview with an expert. Based on individual research, each group will hold a debate, formulate policy recommendations, and conduct a presentation.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybiportal.uzh.ch>

Learning Outcome:

After successfully completing the module, students should be able to:

- understand how an environmental issue becomes a political topic and through which channels it reaches the national political agenda.
- identify the relevant stakeholders (amongst others, interest groups, parliamentarians, public administration) and deduct their overarching and specific policy goals.
- have a good understanding of common policy instruments used in environmental policy, as well as their advantages, disadvantages and feasibility.

Languages of Instruction:

English (with some German components)

Merkmale:

Responsible instructor: Tamaki Ohmura

Requirements:

Prerequisites: Basic studies completed

Assessment: Policy Brief (50%) Debate (25%) Presentation (25%) in English

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Organisation: Inst. f. Evolutionsbiol. u. Umweltwiss.

Offered in: Fall Semester 2027

Module EEE 242 Animal Eco-Physiology

07SMEEE242 / Course

Description:

General description:

This lecture series familiarizes students with the physiological functioning of main processes in animal life: from development to own reproduction; from rest to locomotion and migrations; from sensory perception and processing to response to the environment; and from feeding to nutrient take-up and energy expenditure. It also explores how animals cope with tough conditions, how they anticipate rhythmicity of their environments, and how they are affected by human impact. These topics are addressed from an integrative perspective, accounting for the many levels of organization in the body, but with a focus on birds.

ECTS: 3

Notes:

Lectures will be paused on 30 November and 7 December. For students who give presentations, the course ends on 23 November. The remaining students need to attend the exam on 14 December, 2026.

Repetition exam: s. link <https://www.mnf.uzh.ch/de/studium/pruefungen.html> Please register with the module leader no later than 3 weeks before the exam.

Learning Outcome:

After successfully completing the module, students should have:

- a basic understanding of functional properties of animals, with a focus on birds
- an appreciation of selected aspects of animal physiology, from genes through tissues to interaction at the level of the whole organism
- an overview of physiological features that enable or constrain the life of animals, in particular birds

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Barbara Helm

Requirements:

Prerequisites:

For advanced BSc and MSc students

Assessment:

Written exam (essay questions, pen and paper) in English or, alternatively, Presentation in English.

After two introductory lectures, students can contribute by presenting short talks on case studies linked to the lecture topics. For those students, the presentation will be graded, replacing the regular examination.

Personal attendance required.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module EEE 266 Ethics and the Environment

07SMEEE266 / Course

Description:

General description:

Die drängenden Umweltherausforderungen der heutigen Zeit verlangen nach einer kritischen Reflexion. Ethik ist ein wichtiges Instrument dazu. Diese Vorlesung führt in die Grundlagen der westlichen analytischen Ethik ein und vermittelt vertiefte Kenntnisse der umweltethischen Debatten. Diese werden mit Bezug auf die heute drängenden Umweltherausforderungen vertieft und kritisch reflektiert.

Inhalt:

- Einführung in die allgemeine und angewandte Ethik.
- Übersicht und Diskussion westlicher ethischer Theorien, welche für den Umgang mit Umweltherausforderungen relevant sind.
- Kennenlernen der verschiedenen Grundpositionen der Umweltethik.
- Querschnittsthemen wie Nachhaltigkeit, intergenerationelle Gerechtigkeit, Artenschutz usw.
- Einüben des Gelernten in kleineren Übungen.

ECTS: 3

Notes:

ETH Nummer: 701-0703-00L. Das Modul muss an der UZH gebucht werden, mit der Modulbuchung ist man automatisch für den Leistungsnachweis angemeldet. Schriftliche Prüfung in der letzten Vorlesungswoche in Deutsch. Studierende der ETH registrieren sich dazu bis spätestens Freitag vor Semesterbeginn für ein hochschulübergreifendes Studium (Modulmobilität) an der UZH und buchen dann das Modul.

Schriftliche Prüfung in der letzten Vorlesungswoche. Repetitionsprüfung s. link <https://www.mnf.uzh.ch/de/studium/pruefungen.html> Bitte melden sie sich für die Wiederholungsprüfung nicht später als drei Wochen vor der Prüfung beim Modulverantwortlichen an.

Learning Outcome:

Nach dem Besuch der Vorlesung haben Sie die Fähigkeit erworben, ethische Herausforderungen generell und spezifisch im Bereich der Umwelt zu identifizieren, zu analysieren, kritisch zu reflektieren und einer Lösung zuzuführen. Sie kennen dafür grundlegende umweltethischer Grundbegriffe, Positionen und Argumentationlinien, die Sie in kleineren Übungen erprobt und hinterfragt haben.

Module AST 511 General Relativity

07SMAS511 / Lecture with Practical Exercises

Description:

General description:

In this course we study the theory of gravitation or general relativity.

We first review special relativity.

With the equivalence principle, we develop general relativity and study mathematical tools. Then, we discuss a few applications and tests of general relativity.

ECTS: 10

Languages of Instruction:

English

Course Materials:

S. Carroll: Spacetime and Geometry,
R. Wald: General Relativity,
S. Weinberg: Gravitation and Cosmology

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Harald Ita

Requirements:

Prerequisites:

Mechanics

Prior Knowledge:

Special Relativity

Assessment:

50% Übungen + 50% Schriftliche Prüfung

Exam date:

<https://www.physik.uzh.ch/en/study/General-Information/Exams.html>

Grading Scale:

1-6, Half Grades Given

Module ESS 841 Analyzing the plant-soil system

07SMESS841 / Lecture with Practical Exercises

Description:

General description:

In this module, students will learn about approaches used in biogeochemistry and in situ surveys e.g. in research surveys or extension work. Students will select suitable methods from a variety of presented field and laboratory techniques to address open research questions. In the fall semester, lecturers will present the different methods and their use, and teams will prepare and defend a short project concept. In the spring semester, teams will practice using techniques, and develop a project concept into a short research plan including all steps, from hypothesis statements through data collection to analysis, using an electronic notebook format and Python or R. They will then conduct 2-3 days of field work at the long-term observation site Lägeren (Baden) to perform measurements and collect plant and soil samples according to their project. In the following week, the obtained samples will be prepared and analyzed, followed by data evaluation and presentation of the results. Afterwards, students will submit a report.

Lectures and projects will target current research topics and may be guided by the interest of the students.

Examples of previous projects are: 'Nutrients in plants and soils as a function of tree age', 'variability of soil properties', or 'Mineralisation of organic matter fallen trees'.

ECTS: 3

Notes:

The Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 2; 11; 13 & 15

Learning Outcome:

At the end of the module, the students will know:

- how to develop a scientific research project from a question
- how to design a field experiment to test hypotheses
- how to collect soil and plant samples and data in the field
- how to prepare samples for analysis
- how to analyse samples with different lab techniques
- How to analyse and interpret data (including statistics)
- How to present results orally and on paper

Target Groups:

MSc students in Earth System Science and Geography

Languages of Instruction:

English

Course Materials:

Lectures, scientific literature, research equipment and facilities

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Meredith Christine Schuman

Guido Lars Bruno Wiesenberg

Requirements:

Prior Knowledge: EEE 353 (vorher UWW 210), ESS 242, or GEO 342

Assessment: The module is assessed through four components:

1. attendance and participation (20%),
2. completion of group assignments (20%),
3. a final presentation (30%),
4. and a narrative coding notebook (30%).

The weighted average of these components must be at least 4.0 to pass the module. One session may be missed without penalty, provided the missed content is caught up on. If needed, a make-up presentation can be arranged for students who have not passed.

Language of assessments: English.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module Study week: Sustainable development and transformation

10SMSTS-105 / Seminar

Description:

General description:

Die Studienwoche Nachhaltigkeit vermittelt grundlegende sowie neueste Erkenntnisse der Nachhaltigen Entwicklung (NE). Im Vordergrund steht der Erwerb von Wissen und Kompetenzen für die Gestaltung gesellschaftlicher Veränderungsprozesse für eine NE. Ausgangspunkt ist ein Überblick über die Entstehung und Interpretationen der NE, bevor in disziplinär ausgerichteten Modulen ausgewählte Problemlagen thematisiert werden, wie z.B. Mensch-Umwelt-Beziehungen, die ethische Dimension oder Zielkonflikte der Nachhaltigen Entwicklung. U.a. wird es eine wissenschaftliche Einführung in die Zieldimension der gesellschaftlichen Transformation gegeben. Neben dem klassischen Erwerb von Wissen ist das Ziel, praxisorientierte Fragestellungen in einer transdisziplinären Herangehensweise zu bearbeiten. Unterstützt wird die Praxisorientierung durch eine Exkursion. Hierdurch werden Gestaltungs- und Managementfähigkeiten erlernt, die für zukünftige Verantwortungsträger:innen zentral sind. Die persönliche Präsenz und aktive Mitarbeit in der Studienwoche ist zwingender Bestandteil des Leistungsnachweises.

ECTS: 3

Notes:

Die Studienwoche wird am Standort Zürich-Oerlikon (Andreasstrassasse AND) stattfinden. Der Hauptraum, in dem die Präsenzveranstaltungen stattfinden werden, ist AND 4-06. An einem Halbttag findet eine Exkursion zu externen Organisationen statt, die in Zürich/im Grossraum Zürich stattfinden wird. Die Studienwoche wird durch eine öffentliche Podiumsdiskussion in Kooperation mit der Paulus-Akademie Zürich abgeschlossen.

Kurz erklärt: <https://t.uzh.ch/1Pn>

Learning Outcome:

Die Studierenden kennen und reflektieren die Fundamente des Leitbildes Nachhaltiger Entwicklung (NE) als normatives und globales Leitbild, seine Entwicklungsgeschichte und die 17 Nachhaltigkeitsziele der Vereinten Nationen als derzeitigem dominantem Legitimationsrahmen. Sie verfügen über interdisziplinäre Analysekompetenz gesellschaftlicher Anwendungsfelder und Analysemethoden, die die Interdependenz gesellschaftlicher, wirtschaftlicher und ökologischer Entwicklungen aufzeigen. Sie kennen die zentralen Konflikte der NE in der Schweiz und im internationalen Kontext. Sie kennen wichtige Methoden der Sozialforschung sowie der inter- und transdisziplinären Forschung und verstehen deren Bedeutung und Anwendung im Kontext einer NE. Das Wissen über sozial-ökologische Transformationsprozesse und die erlernten Gestaltungskompetenzen werden die Studierenden dazu befähigen, konkrete Problemstellungen im Bereich NE ethisch und wissenschaftlich fundiert und kompetent lösen zu können.

Target Groups:

Bachelor, Master

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Jeannette Behringer

Requirements:

Prerequisites:

Grundlegende Kenntnisse über das Konzept oder zur Umsetzung Nachhaltiger Entwicklung sind wünschenswert, jedoch keine Voraussetzung. Erwartet wird ein grosses Interesse an Nachhaltiger Entwicklung und den unterschiedlichen, damit

zusammenhängenden interdisziplinären Themenfeldern und Perspektiven.
Sprachlich wird ein Deutschniveau von mindestens B2 vorausgesetzt. Die
Studienwoche findet in deutscher Sprache statt, Englischkenntnisse sind für das
Lektürestudium und einzelne Vorträge notwendig. Das Modul ist auch für
(fortgeschrittene) Bachelorstudierende offen, d. h. ab dem fünften Semester.

Assessment: Während des Blockseminars werden die Studierenden damit beginnen, im
Rahmen einer Gruppenarbeit eine praxisorientierte Fallanalyse zu erarbeiten.
Diese werden sie im Anschluss an das Blockseminar weiter bearbeiten und
finalisieren. Späteste Abgabe der Fallanalyse ist der 30. November 2026.
Eventuell ist eine mündliche Präsentation der Fallanalyse zusätzlich erforderlich.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can't be repeated

Module ESS 375 Urban Biogeography

07SMESS375 / Lecture with Practical Exercises

Description:

General description:

Urbanization reshapes our world at unprecedented rates and increasingly threatens ecosystem processes and services. This course develops an understanding of the current and future challenges related to the dynamics and processes of ecosystems and biogeography in changing human-dominated environments. Relying on state-of-the-art concepts, data and methodologies we aim at describing, quantifying and assessing the relationship between spatial structures and ecological function. First, drivers of (urban) land change and ways to quantify current and projected future trends will be introduced. Second, the multifunctional consequences of land change will be reflected for a range of ecosystem services with particular focus on urban areas (e.g., densification and sprawl, urban heat, biodiversity, hazards, recreation). Third, nature-based solutions and blue-green infrastructure (BGI) as potential pathways to mitigate fragmentation and loss of spatially distributed habitat area and quality will be discussed. As the design and implementation of BGI remains not only a data and methods challenge but also asks for collaborative interactions among various actors across sectors, we require combined efforts of natural and social scientists to develop integrative BGI. To this end, we will introduce social-ecological networks (SEN) as a fourth topic to mitigate ecosystem service across rural-urban gradients. The lectures will be complemented by homework and a term paper that is also presented in an in-class poster presentation. The term paper on a topic of the student's choice allows to develop and shape own research ideas and reflect on them in a supportive and constructive teaching environment.

ECTS: 3

Notes:

The Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 3; 11; 13 & 15

Learning Outcome:

- overview of concepts and theories related to urban ecology and biogeography
- nature-based solutions and blue-green infrastructure (BGI)
- tools, methods and metrics to quantify and describe urban patterns
- biogeographic assessments (habitat suitability maps (SDMs))
- connectivity modelling (Circuitscape, least cost paths, landscape resistances, ecological networks)

Target Groups:

Advanced Bachelor students interested in the interface between geography and ecology

Languages of Instruction:

English and German

Course Materials:

Scientific papers, presentations, books as mentioned during class

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Janine Bolliger

Requirements:

Prerequisites:

Basics in GIS, general understanding of ecology and ecological processes,
reading of scientific papers in English

Assessment: The module grade is composed of three components:
1. Term paper analysis and writing (group work of two to three students, 50h) and
2. leading a discussion in class (14h). Grades are given for the term paper and
the term-paper presentation
3. Plus 26h mandatory participation in class (presence check, but not graded)

The mean of these grades is the final grade for the entire course.

Language of assessments: English

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Request period: from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Place allocation at the latest: Sa 29.08.2026 22:00

Waiting list progression period: from Sa 29.08.2026 22:00 to Do 24.09.2026 24:00

Module Online course II: Introduction to Legal Data Science (for doctoral students)

02SMIUSW_4 / Colloquium

Description:

General description:

This online course aims to introduce students to legal data science and teach them competences in the statistical software R and basic statistics. The course is designed for law students who are interested in expanding their skillset to data science and intend to use these skills to conduct simple legal data science projects, for example as part of their master's thesis or dissertation.

The course is conducted solely online and will be self-paced.

Course structure:

- What is Legal Data Science?
- R Basics
- Analyzing Data and Data Visualization in R
- Descriptive Statistics in R
- Statistical Inference in R
- Linear regression in R
- Tidy Data
- Text as Data Basics

ECTS: 6

Learning Outcome:

The students

- know how legal data science shapes legal science, jurisprudence and lawmaking;
- know basic concepts and methods of statistics;
- have basic data science skills in R;
- have the competence to carry out simple statistical analyses with legal data in R.

Target Groups:

Doctoral students

Course Materials:

All materials will be available on
<https://elearn2.mnf.uzh.ch/courses/course-v1:RWF+02SM90WM82+HS26>

Merkmale:

Responsible instructor:

Tilman Altwicker

Requirements:

Prerequisites:

As the course is conducted online and using the statistical software R, students should have access to a notebook on which they can install the statistical software R and R Studio.

Prior Knowledge:

None

Assessment:

Completion of all materials (no exam)

Grading Scale: None

Repeatability: Can be repeated as necessary

Organisation:

Offer pattern: 1 Semester (Every Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 20.10.2026 24:00

Module EEE 340 From Values to Arguments: Ethics in Environmental and Animal Rights Discourse

07SMEEE340 / Block Course

Description:

General description:

Value arguments play a central role in environmental discourse. For instance, nature's instrumental value is often highlighted with reference to ecosystem services and biodiversity is recognised for its intrinsic value. Recently, the concept of relational value has emerged to emphasise the cultural and personal meaning that natural entities hold for people.

In this ethics block course, we will explore these different types of value and their role in environmental debates and controversies. Adopting an empirical ethics approach, we will combine empirical methods, such as interviews or surveys, with argumentative approaches. Students will critically examine some of the references to values in the literature and learn how to incorporate values into persuasive, nuanced arguments. The course will include lectures, expert talks, and discussions of texts. The students will apply these insights in group projects combining empirical and theoretical elements.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE <https://www.mybiportal.uzh.ch>

Learning Outcome:

After successfully completion of this module, students should

- Be aware of the role of values in the environmental and animal rights discourses.
- Be able to critically question certain uses of values in the discourse.
- Have basic insight and experience in designing and conducting an interview or survey study.
- Be able to analyse values in empirical data.
- Be able to relate empirical findings on values to ethical statements without making argumentative errors.
- Be able to identify value conflicts in controversies in the environmental or animal rights discourses.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Anna Deplazes Zemp

Requirements:

Assessment:

Empirical project work and report 50% Reading questions and theoretical report 50%.

Can be repeated once. If no repetition exam exists, student can retake the module next year.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Module BIO 695 CRISPR-Cas: A versatile and scalable gene perturbation system for Genetic Screens

07SMBIO695 / Lecture with Practical Exercises

Description:

General description:

The CRISPR-Cas system revolutionized the genome engineering field with its ease of use and versatility, and has thus been widely adopted for basic and applied research. Yet, the feature that distinguishes CRISPR-Cas from the previous genome engineering tools is its scalability.

Combined with the increasingly powerful and accessible Next-generation sequencing (NGS) technologies, thousands of genetic perturbations can now be performed and assessed simultaneously.

The Genome Engineering and Measurement Lab (GEML) is the knowledge and technology Hub of FGCZ, with the mission to stimulate, support, and lead research activities in the genome engineering space. As part of our training and technology transfer activities, we offer a three-day course with hands-on practicals on the cutting edge application of CRISPR Screens. The lectures cover theoretical background on genetic approaches for the functional interrogation of entire genomes, the pooled genetic screen concept, and considerations when designing CRISPR Screens including their compatibility with modern NGS technologies. The practicals consist of NGS library preparation, sequencing and evaluation of CRISPR libraries, and bioinformatic analysis of CRISPR Screen datasets.

ECTS: 1

Notes:

For further information please check our website:

<https://fgcz.ch/education/genomics-courses.html>

Room: at FGCZ Y59

Learning Outcome:

By the end of this course, participants should be able to:

- Distinguish between forward and reverse genetics approaches
- Describe a pooled genetic screen
- List main bottlenecks when designing a CRISPR screen
- Calculate representation during different stages of the CRISPR Screening workflow
- Prepare an NGS library for CRISPR library QC
- Analyse and evaluate CRISPR library QC NGS data
- Select and use software for basic CRISPR screen data analysis

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Module Repetitorium Radiologie

04SMRAD23001 / Kurs

Description:

ECTS: 0

Notes:

Kontakt-E-Mail:

tilo.niemann@ksb.ch

Learning Outcome:

Interaktives Teaching klassischer radiologischer Fälle aus der täglichen Routine.

Eigenständige Befundung durch die Studenten in Kleingruppen unter Anleitung des Dozenten. Anhand dessen Aufarbeitung von Grundlagen zu Röntgen- Einstelltechnik und systematischer Befundung von Röntgenbildern und CT-Schnittbildern.

Erarbeiten des diagnostischen Vorgehens. Diskussion von Differentialdiagnosen.

Die Unterrichtsform ist online geplant, mittels skype oder zoom Einladung können die Studenten den Rechner des Dozenten direkt steuern und vor der Kleingruppe einzeln Fälle unter Anleitung bearbeiten. Fragen können stets gestellt und diskutiert werden.

Eine Prüfung war bislang nicht vorgesehen.

Der interaktive Kurs richtet sich insbesondere an Studenten zur Prüfungsvorbereitung oder zum Erlangen von vertieften radiologischen Kenntnissen.

Module Economics of Education (L)

03SM22MO0199 / Lecture with Practical Exercises

Description:

General description:

This course provides a comprehensive overview of the literature on child and youth development, with a particular emphasis on the roles of peers, parents, and teachers. It explores the causal determinants that shape the capabilities and long-term success of young individuals. The course has a strong policy-orientation and evaluates how academic research informs and guides improvements in the design and structure of educational systems. The course primary focuses on developed economies.

Key research topics covered in this lecture include:

- Parents influence on children's lifelong achievements.
- Effects of early childhood intervention programs.
- Teachers' contributions to students' test scores, earnings and career trajectories.
- Peers influence on academic performance and personality development.
- Effective methods for assigning teachers and students to classes.

ECTS: 3

Learning Outcome:

The primary learning aim of this course is to equip students with the skills necessary to become critical readers of applied economics papers. This should enable students to effectively assess the quality of empirical evidence and its policy implications.

Target Groups:

MA students

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Ulf Zölitz

Requirements:

Prior Knowledge:

You should have solid knowledge of undergraduate-level microeconomics and statistics/econometrics.

Assessment:

The examination of the module is carried out on-site.
written exam: Thursday 14.1.2027, 10.30-11.30 am (60 min).

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Module Gallo-Romance Historical Linguistics

06SM390-505 / Module

Description:

General description:

Le module traite une thématique significative et ciblée de linguistique diachronique française ou galloromane. Il présente l'état de la recherche, les desiderata et les méthodologies pertinentes pour poursuivre de nouvelles interrogations porteuses. Il introduit les étudiantes et les étudiants au travail scientifique individuel et aux règles de l'argumentation scientifique.

ECTS: 6

Learning Outcome:

Les étudiantes et les étudiants seront en mesure de traiter de manière autonome une thématique ciblée en linguistique diachronique française ou galloromane. Ils sauront constituer une bibliographie, choisir des sources adéquates et les traiter dans une approche méthodologique rigoureuse.

Languages of Instruction:

Französisch

Merkmale:

Responsible instructor: Martin-Dietrich Glessgen

Requirements:

Prerequisites: Les étudiantes et les étudiants disposent d'une bonne connaissance des domaines du langage, de l'histoire du français et de la méthodologie en linguistique française et galloromane. Un niveau de langue C1 en français est recommandé.

Assessment: Portfolio: Plusieurs exercices à préparer à la maison et à présenter (60%), synthèse écrite (40%).

Date de la reddition de la synthèse écrite : 10 janvier 2027

Grading Scale: 1-6, Half Grades Given

Repeatability: repeatable once, book again

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Creative Writing

06SM427-023 / Module

Description:

General description:

En este módulo se potenciará y mejorará la capacidad de expresión escrita de los participantes, así como su competencia comunicativa en general, creando contextos en los que se promuevan la creatividad, la autonomía en el proceso de aprendizaje y las ganas tanto de escribir como de experimentar con esta destreza. Nos adaptaremos al nivel de los estudiantes, ya sea su punto de partida un B1, B2 o C1. ¡Atención! Se trata de un "Bewerbungsmodul" con acceso limitado y con plazo de inscripción especial. Véanse los detalles bajo "Voraussetzungen".

ECTS: 3

Notes:

Este será un módulo de trabajo autónomo con tan solo tres sesiones por Zoom: semana 1 (17/9/26), semana 8 (5/11/26) y semana 14 (17/12/26). La asistencia esos días es recomendable, pero no será obligatoria.

Learning Outcome:

El objetivo principal de este módulo consiste en potenciar y mejorar la capacidad de expresión escrita de los participantes, así como su competencia comunicativa en general. Para ello, crearemos un espacio donde... - se experimente con nuevos tipos de escritura; - se progrese en el desarrollo de la competencia comunicativa mediante el trabajo autónomo y personal; - se descubran diferentes tipologías textuales de forma creativa desde un enfoque comunicativo; - se desarrolle la imaginación; - se fomente el deseo de escribir empleando diversos estilos y registros; - se cree una actitud positiva hacia la escritura; - se entienda este proceso como medio de expresión, indagando en el propio estilo; - se potencien estrategias que contribuyan a aumentar la autonomía en el desarrollo de esta destreza; - se reflexione sobre la lengua como vehículo para plasmar nuestras experiencias, desarrollar ideas, promover la reflexión personal; - se incremente la capacidad para expresarse de forma eficaz.

Languages of Instruction:

Español

Merkmale:

Responsible instructor: Johannes Kabatek

Requirements:

Prerequisites:

Nivel B1 del Marco Común Europeo de Referencia para las Lenguas (MCER). Es indispensable demostrar que se cumplen los requisitos de acceso (nivel B1). Para ello, disponemos de tres posibilidades: 1. En caso de haberse obtenido el DELE B1 o superior, subir una copia del diploma. 2. Si ya se ha aprobado uno de los módulos Lengua Española (B2, C1 o C2), indicárselo a la docente (mcmunoz@rom.uzh.ch). 3. Si no se da ninguno de los casos anteriores, entrar en contacto con la lectora con la mayor celeridad posible (mcmunoz@rom.uzh.ch).

Assessment:

Portafolio: distintos trabajos a lo largo del semestre.

Grading Scale:

Pass/Fail

Repeatability:

Module Professional traineeship

06SM683-503 / Module

Description:

General description:

Das Praktikum vermittelt den Studierenden die berufsorientierte Arbeitsweise und die Standards für Akademiker im interdisziplinären, archäologischen Arbeitsfeld. Dabei erarbeiten sich die Studierenden einen breiten Einblick in potentielle zukünftige Arbeitsfelder wie Museen, Labore, Forschungsprojekte, Kulturmanagement und spezialisierte interdisziplinär arbeitende Firmen.

ECTS: 6

Notes:

Vorgängig zur Modulbuchung ist eine Vereinbarung mit der Studienfachberatung aufzusetzen. Melden Sie sich hierfür bei: studium.arch@iaka.uzh.ch

Learning Outcome:

Die Studierenden kennen das praxisnahe Arbeiten in Laboren, in Museen, im Kulturmanagement oder in spezialisierten Firmen. Sie wenden ihr Wissen praktisch an: Dazu gehören u. a. das systematische Arbeiten im Labor, die Entwicklung von Ausstellungskonzepten im Museum und die Mitarbeit in interdisziplinären archäologischen Projekten. Das Erlernen von Teamwork, Arbeitsorganisation nach Protokoll und das Einstudieren von Arbeitsprozessen gemäss Arbeitsrichtlinien ist den Studierenden durch die regelmässige praktische Arbeit vertraut.

Merkmale:

Responsible instructor: Philippe Della Casa

Requirements:

Prerequisites: eigenständige Organisation des Praktikums
Dieses Modul steht nur Master-Studierenden offen. Es darf nicht von Bachelor-Studierenden als vorgezogenes Mastermodul gebucht werden.

Assessment: dokumentierte praktische Arbeit

Bestätigung des Arbeitgebers sowie ein Bericht sind bis am 18.12.2026 bei der Studienberatung einzureichen (studium.arch@iaka.uzh.ch).

Module Why Should I Learn This? Causes and Effects of Motivation(s)

06SM222UWM / Module

Description:

General description:

Was Menschen dazu bewegt, sich für bestimmte Lernhandlungen zu entscheiden und diese Handlungen beharrlich weiterzuführen - solche Fragen stehen im Mittelpunkt der Motivationstheorie und -forschung. Verschiedene Ergebnisse zeigen, dass die Motivation(en) von Lehrpersonen und Schüler:innen das Lernergebnis wesentlich beeinflussen. In diesem Seminar greifen wir Ergebnisse der Motivationsforschung auf und behandeln folgende unterrichtsrelevante Themen: Welche Rolle spielen unterschiedliche motivationale Faktoren auf das Handeln der Lehrpersonen und was kann daraus für den Unterrichtsalltag abgeleitet werden? Wie können Lehrpersonen die Lernmotivation der Schüler:innen positiv beeinflussen? Wie können die Schüler:innen dazu befähigt werden, ihre Lernmotivation selbst zu steuern? In der Auseinandersetzung mit Motivationstheorien und empirischen Ergebnissen werden Handlungsmöglichkeiten für den Unterricht abgeleitet. Die Teilnehmenden erlangen dabei die Fähigkeit, sowohl ihre eigene Motivation positiv zu beeinflussen als auch diejenige ihrer Schüler:innen zu fördern.

Module EEE 201 Biogeochemical Cycles and Global Change

07SMEEE201 / Course

Description:

ECTS: 3

Notes:

Die Vorlesung vermittelt Grundkenntnisse zu wichtigen Stoffkreisläufen und globalen Umweltveränderungen. In der ersten Semesterhälfte wird die Funktion der Erde als biogeochemisches System behandelt. In der zweiten Semesterhälfte liegt der Fokus auf dem Geschehen innerhalb von ausgewählten Landökosystemen, mit einem Fokus auf Agroökologie.

Ziel ist der Erwerb eines Systemverständnisses, sowie das Kennenlernen wichtiger Stoffkreisläufe und wie diese durch den Menschen beeinflusst werden. Schwerpunkte der Vorlesung sind neben der Strahlungsbilanz der Erde die Kreisläufe von Kohlenstoff und wichtigen Nährstoffen wie Stickstoff, Phosphor und Schwefel, sowie Methoden, welche zu deren Analyse zur Verfügung stehen. Ausserdem werden landwirtschaftliche Aspekte und spezifische Schadstoffe inklusive Mikroplastik behandelt.

Learning Outcome:

Nach erfolgreicher Teilnahme können die Studierenden

- die Strahlungsbilanz der Erde und wichtige Klimaprozesse und deren Treiber erklären
- die behandelten Stoffkreisläufe inklusive deren wichtigsten Vorräte und Flüsse sowie deren relativen Grössenordnung beschreiben
- die Faktoren darlegen, welche diese Kreisläufe bestimmen
- erläutern, wie diese durch "Global Change" verändert wurden
- einfache "was würde/könnte geschehen, wenn..."-Fragen unter Zuhilfenahme der erlernten Zusammenhänge diskutieren
- Methoden und deren Unsicherheiten erklären, welche zur Analyse der behandelten Prozesse dienen
- die wichtigsten mikrobiellen Prozesse benennen und erklären, die bei der Umsetzung von Kohlenstoff und Nährstoffen von Bedeutung sind
- die Bedeutung der behandelten Schadstoffe erläutern

Module EEE 312 The Species Problem and the Animal Tree of Life

07SMEEE312 / Block Course

Description:

General description:

The course provides an introduction to global biodiversity, systematic biology, phylogenetics, species concepts, and species delimitation: What are species, how are they defined, and how can we recognize them? How are species related to each other, how can we infer this, and what can we learn from this about evolution? We study terrestrial and marine invertebrates. After an introduction to invertebrate diversity, phylogenomics, and taxonomic concepts (discovering species, describing species, naming species), participants will use morphological and genetic methods (DNA barcoding, computational species delimitation) and a variety of tools (identification keys, apps, web resources) for the identification of specimens, for phylogenetic tree reconstruction, give a seminar talk, and lead a discussion on current matters in systematics and taxonomy.

Suitable for students interested in careers in conservation management (e.g., Ökobüro, Behörde, Red List assessments), biodiversity assessments and management by NGOs worldwide, academia (e.g., natural history museums, but recommended for all fields working with non-model species).

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE <https://www.mybiportal.uzh.ch>

The course will be held in Y03-F-05, Y35-F-47 and Y21D68a.

Learning Outcome:

After successfully completing the module, students should be able to:

- Use tools for phylogenetic reconstruction
- Evaluate genetic and morphological data for species delimitation and identification
- Understand, assess, and conduct taxonomic acts

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Oliver Hawlitschek

Requirements:

Prerequisites:

Strongly recommended: contents of module EEE241 are required

Mandatory: Basic studies must be completed

Assessment:

Grades will be composed of: Course protocol (40%), seminar talk (30%), participation in debates (30%) in English

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

<u>Offer pattern:</u>	1 Semester (Every Fall Semester)
<u>Booking Deadline/Period:</u>	not bookable
<u>Cancellation Deadline:</u>	not cancelable
<u>Organisation:</u>	Inst. f. Evolutionsbiol. u. Umweltwiss.
<u>Offered in:</u>	Fall Semester 2027 Fall Semester 2026 Fall Semester 2025 Fall Semester 2024 Fall Semester 2023

Module BME 349 Immune disorders and assessment

07SMBME349 / Block Course

Description:

General description:

This course explores the fundamental principles of immune and inflammatory disorders, with particular emphasis on the experimental tools used to investigate these conditions. Students will work in three rotating groups, each focusing weekly on a different subtopic. The core themes include allergies, infections, inflammatory skin disorders, and autoimmunity.

The course begins with an introductory lecture providing an overview of the main immunological and inflammatory mechanisms underlying disease. Following this, students will gain hands-on experience with experimental design and laboratory methodologies used in both research and diagnostic settings. Practical training includes drawing human blood and subsequently processing, culturing, and analysing immune cells. In addition, students will perform organ isolation and cell culture techniques using experimental laboratory mice.

Throughout the course, weekly short presentations by clinicians will complement the laboratory work. These sessions will focus on the diagnosis and treatment of immune and inflammatory diseases, helping students connect experimental findings with clinical practice.

The course concludes with a three-part assessment (each 45 minutes) conducted in groups of five students:

- Group Presentation (Scientific Literature): Students present and critically evaluate a scientific publication related to laboratory research in immune or inflammatory disorders.
- Group Presentation (Experimental Problem-Solving): Students analyse and discuss a laboratory-related scientific problem, such as experimental design or methodological challenges.
- Individual Oral Examination: Students are examined individually on the theoretical and practical topics covered throughout the course. The examination takes place with the full group present, but each student is assessed separately.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Learning Outcome:

Upon successful completion of the course, students will be able to:

- Describe the fundamental principles of innate and adaptive immunity.
- Explain the immunological mechanisms underlying immune and inflammatory diseases, with especial focus on dermatological conditions.
- Identify and explain the basic principles of common laboratory methods used to investigate immune and inflammatory diseases.
- Explain key concepts underlying therapeutic approaches for treating immune and inflammatory diseases.
- Perform selected immune analysis methods to identify immune cells, inflammatory cells, inflammatory mediators, and pathogens in laboratory research and diagnostic settings, under supervision.
- Present, interpret, and critically discuss results from laboratory experiments.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor: Pal Johansen

Requirements:

Prerequisites:

- Completion of two years of biomedicine studies at UZH or an equivalent program.
- Basic knowledge of immunology is recommended.
- Prior experience with cell culture techniques and aseptic laboratory work is advantageous.

Assessment: Presentation and oral examination in English or German as preferable by the student.
-graded

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Module Self-regulated Learning and Learning Process Support when Writing a Matura Thesis

06SM222SLL / Module

Description:

General description:

Die Maturaarbeit ist eine grössere, eigenständige, schriftliche Arbeit, welche in Einzelarbeit oder Gruppenarbeit am Ende der gymnasialen Stufe verfasst wird. Diese interdisziplinären Projektarbeit stellt die Schüler*innen vor einigen Herausforderungen wie beispielsweise die Planung des Projekts. Um die Herausforderungen zu bewältigen, müssen die Schüler*innen ihr Lernen selbst regulieren, auf bisher erworbene Kompetenzen zurückgreifen sowie neue Lernstrategien erwerben. In ihrem Lernprozess werden die Schüler*innen durch eine Lehrperson begleitet. Dies stellt die Lehrperson wiederum vor die Frage: Wie begleite ich meine Schüler*innen erfolgreich? Dieser Frage gehen wir im Rahmen dieser Veranstaltung nach. Wir setzen uns vertieft mit der Thematik des selbstregulierten Lernens auseinander, welches Aufschluss über die notwendigen Kompetenzen beim Schreiben einer Maturaarbeit gibt. Anhand von Fallbeispielen und Praxisbezügen analysieren wir Betreuungskonzepte, sowie die einzelnen Arbeitsschritte einer Projektarbeit und erarbeiten konkrete Handlungsoptionen zur Lernprozessbegleitung. Ziel dieser Veranstaltung ist das Erstellen eines eigenen Betreuungskonzept für zukünftige Lernprozessbegleitungen.

Module Quantitative Methods in Sports (S)

03SM22BO0115 / Seminar

Description:

General description:

The application of mathematical/quantitative methods to the study and analysis of a wide variety of sports problems has become increasingly popular in recent years. This trend can be attributed to the increased availability of "big" data and the advancements in theoretical and computational analytics techniques, e.g., machine learning, operations research. It has been demonstrated by multiple examples that mathematical/quantitative methods may provide powerful insights and/or competitive advantages as well as help the sport organizations to improve their performance by making more informed and sophisticated decisions.

The seminar will review the mainstream literature on applications of quantitative methods in various sports related contexts. We will discuss multiple thought-provoking application examples ranging from classical scheduling problems in different sport leagues to modern "fantasy" sports. The seminar participants will become familiar with challenges and opportunities arising when applying quantitative methods to modern sports.

ECTS: 3

Notes:

The number of participants is limited. In the event of excess demand, we reserve the right to select the participants based on the application via the following link:

(<https://www.uzh.ch/zi/cl/surveys/index.php/254825>) Application Form for Quantitative Methods in SpORts (S) (03SE22BO0115) Fall 2026 (<https://www.uzh.ch/zi/cl/surveys/index.php/561187>) (<https://www.uzh.ch/zi/cl/surveys/index.php/254825>)

- Application deadline: August 24, 2026
- Notification of acceptance: August 28, 2026

Learning Outcome:

The seminar aims to stimulate students' learning with a combination of teaching methods: readings from academic journals and newspapers, class presentations, discussions, and group projects. By the end of the seminar, participants should have gained in-depth knowledge on the topic and the related interdisciplinary challenges reflected in the following specific learning objectives:

- understanding of basic methodological concepts used in various sport related applications,
- being able to explain and critically discuss (with data and/or theoretical concepts) various examples of quantitative methods applied to sports problems,
- being able to identify and critically discuss opportunities, the resulting challenges, and the desired outcomes for potential future applications of quantitative methods in sport related settings.

Target Groups:

The seminar is open to: (1) Bachelor students of the Business Administration program (BWL); (2) Bachelor students from other programs with a justified interest in quantitative methods in sport related applications

Languages of Instruction:

English

Course Materials:

There is no required textbook for the seminar. The lectures and notes of the seminar contain a number of research articles and book chapters for debate and discussion. The reading material will be readily available for students on OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Oleg Prokopyev

Requirements:

Assessment:

The final grade of the seminar consists of participation, a group presentation and a group project. The description and the weight of the assessment items are described below:

- PARTICIPATION (20%). Students will be assigned readings, which prepare participants for in-class discussions.
- PRESENTATION (40%). In a small group, students present concepts and managerial issues related to various applications of quantitative methods in sports.
- GROUP PROJECT (40%). From theory to practice. The final project is a formal research proposal, in which students review the related literature and critically discuss the previous models and methodologies applied to a particular sports problem. The project should also identify potential future opportunities for application of quantitative methods in the considered sport setting, and discuss potential implementation challenges and desired outcomes.

Attendance: Note: Punctuality, participation in group activities, and contribution to a fruitful and enjoyable class atmosphere are factors that will be considered. The instructors may use these items at their discretion to adjust final grades in borderline cases. Academic integrity and plagiarism.

Participants are expected to have a truthful and ethical behaviour and be familiar with the rules and procedures against plagiarism. Students will be held accountable for violations of these rule and procedures during the seminar. Further information on plagiarism and its treatment at UZH can be found in the information sheet "Fact sheet on plagiarism". This sheet is available on the university's website at the following link (listed under "Plagiarism" at the very bottom of the page):

<https://www.oec.uzh.ch/en/studies/theses.html>

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Irregular)

Dates/Times/Deadlines:

The number of participants is limited. In the event of excess demand, we reserve the right to select the participants based on the application via the following link:
<https://www.uzh.ch/zi/cl/surveys/index.php/254825>

- Application deadline: August 24, 2026

- Notification of acceptance: August 28, 2026

Module Communication in the Classroom: Developing Core Teaching Practices

06SM222KiK / Module

Description:

General description:

Vor einer Klasse zu stehen verlangt das sichere Beherrschen zentraler Unterrichtspraktiken. Dazu gehören der Einstieg in eine Lektion, das Präsentieren und Erklären, das Führen von Klassengesprächen und der Umgang mit Störungen. Im Seminar werden diese Grundpraktiken des Klassenunterrichts besprochen und in simulierten Situationen eingeübt. Angehende Lehrpersonen reflektieren dabei ihre Praxis und entwickeln diese durch Feedback weiter.

ECTS: 3

Notes:

Die Veranstaltung erfordert regelmässige Präsenz und hohes Engagement. Teilnehmende sollten bereit sein, an wissenschaftlichen Begleitstudien teilzunehmen.

Merkmale:

Responsible instructor: Dominik Petko

Requirements:

Prerequisites: Einschreibung im Studiengang "Lehrdiplom für Maturitätsschulen".

Assessment: Portfolio: praktische Übungen und schriftliche Reflexion.

Das Modul wird als bestanden bewertet, wenn alle Elemente des Portfolios bestanden sind.

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Module BIO 715 Interdisciplinary research in microbiology

07SMBIO715 / Seminar

Description:

General description:

The IMM seminar is the weekly seminar organized by the Institute of Medical Microbiology, UZH. It is a forum for master and PhD students as well as postdocs and senior researchers to present and discuss their most recent results. In addition, we invite around six external speakers from Switzerland and Europe to present their current research. The covered research topics are: i) cellular microbiology and infection biology of Legionella, ii) Drug resistance and virulence mechanisms of Mycobacterium abscessus, iii) biochemical analysis of ribosome assembly and maturation and RNA biology, iv) AI and multi-omics approaches to predict risk of pathogens and metagenomic investigations of microbiota, v) structure/function studies of bacterial membrane transporters and protein engineering.

Module FIM 202 Mathematical Finance II

07SMFIM202 / Lecture with Practical Exercises

Description:

General description:

The modern theory of mathematical finance has undergone significant development in the last decades, both in theory and practice. The aim of this lecture is to introduce the modern theory of arbitrage pricing in continuous time. A list of the topics that will be addressed is as follows:

1. Introduction to Brownian motion and stochastic differential equations
2. The Black-Scholes model
3. Option pricing and partial differential equations
4. Interest rate models
5. Asset models with jumps
6. Credit risk models and credit derivatives
7. Market imperfections, systemic risk and the regulation of the financial sector

ECTS: 9

Notes:

Mathematical Field: Probability theory, Stochastic processes

Elective Module for Mathematics (formerly known as MAT520) And Required Module for the Minor in Financial Mathematics

Target Groups:

Mathematics Students in their Master or Bachelor And Students in the Minor Study Program in Financial Mathematics

Course Materials:

-Introduction to Stochastic Calculus Applied to Finance, by Damien Lamberton and Bernard Lapeyre;
-Option Pricing and Portfolio Optimization, by Ralf Korn and Elke Korn.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Delia Coculescu

Requirements:

Prior Knowledge:

Students are required to have followed either MAT519 Mathematical Finance I/ FIM102 Mathematical Finance I or Probability I and II.

Assessment:

Written exam

Module Advanced Implementation Science in Health Care

04SM23CR_506 / Module

Description:

General description:

This module will help students to gain a deeper and applied knowledge of Implementation Science. Students will have the opportunity to tailor course content to their current projects and interests by selecting from a pre-defined list of implementation topics to be covered during the semester. Working in small groups, students will prepare their chosen topics and present them to the class. Every session will furthermore provide the opportunity to transfer learnings from the presented topic (s) to one's own project.

Topics to choose from (finalization in the first session):

- Human-centered design (co-design) and implementation science
- Tailoring implementation strategies
- Evaluating context
- Research logic models
- Theories, Models, and Frameworks
- De-implementation
- Quantitative & qualitative measures
- Health economic evaluation and implementation science

ECTS: 1

Learning Outcome:

- Students are familiar with different methods of (de) implementation science
- Students are able to moderate a group discussion and exercise
- Students have applied skills in incorporating implementation science considerations to their respective projects

Languages of Instruction:

German and English

Merkmale:

Responsible instructor: Lauren Clack

Requirements:

Prior Knowledge: Attendance of the PhD module Implementation Science in Health Care or equivalent knowledge.

Grading Scale: Pass/Fail

Module Human-Centered AI

03SM22MI0038 / Lecture with Practical Exercises

Description:

General description:

Artificial Intelligence (AI) is now a building block of computing systems. When developers of AI-powered systems change their algorithm or training data, the system could change its behavior wildly. This dynamic nature makes designing the user experiences of AI-powered systems more difficult than deterministic systems. Beyond the immediate users of such systems, the behavior of the AI-powered systems may impact the lives of other people and society at large. Hence, designing systems with AI is a broader perspective.

In this course, you will learn about the capability and limitations of various current AI systems. You will also learn about desirable qualities of AI systems, e.g., effectiveness, fairness, and ethics. You will also learn processes and techniques for designing AI-powered systems. Finally, you will learn about AI's current and potential impacts on the users and society and how to study them.

ECTS: 6

Notes:

Students who already took "Human Computer Interaction in AI" (03SM22MI0038) are not allowed to take this course.

Learning Outcome:

1. Students can explain the capabilities and limitations of current AI systems and their implications for interaction design
2. Students understand and can critically analyze AI systems in their ethics, fairness, accountability, and transparency aspects
3. Students can apply a human-centered design process to design the user experience of systems with AI components
4. Students can explain implications of AI applications that have impact beyond their immediate users
5. Students can identify research methods to study HCI in AI-powered systems

Target Groups:

MSc students

Languages of Instruction:

English

Course Materials:

Lecture slides and reading assignments will be provided on OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Elaine May Huang

Requirements:

Prior Knowledge:

Following prior knowledge can be helpful, but they not requirements:

- Basic HCI knowledge including some background about what a usability study is and knowing how to identify implicit user needs.

Basic programming skills or computational thinking (e.g., functions, iterations, recursions)

Assessment:

20% Design analysis assignment

50% Team project

30% Final written exam onsite on 13 January 2027, 16.15 - 18h

Verifiable citation requirement

Citations in your written work submitted during the semester must refer to a source that exists.

A source exists if it can be confirmed by any of the following methods:

- a publicly accessible academic database,
- a library catalog entry, a verifiable ISBN/DOI, or
- a stable URL accompanied by a timestamped archived copy (e.g., via the Wayback Machine or a similar archival service) submitted alongside the work, confirming accessibility at or before the time of submission.

If a source cannot be verified, this mistake will be taken into consideration for the grading of the written submission in question.

This requirement applies to the final graded submission (not to drafts).

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Doctoral Seminar Dynamic and Distributed Information Systems

03SMDINF1145 / Doktorandenseminar

Description:

General description:

The course has two parts: In one workshop lasting 1-2 days, each doctoral student presents a progress report on his/her PhD thesis. The second part consists of a series of one-hour lunch talks on every Tuesday during the teaching period. These lunch talks present current paper projects, conference reports, presentation rehearsals, research designs and guest lectures. If needed, written material will have to be prepared.

ECTS: 2

Notes:

Registration by E-Mail to: ddis-teaching@ifi.uzh.ch

Learning Outcome:

- The PhD students know how to design and present a scientific publication
- The students know how to manage their PhD project

Languages of Instruction:

English

Course Materials:

Slides and, possibly, additional material will be distributed after the presentations

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Abraham Bernstein

Requirements:

Assessment:

One Presentation of a paper project, conference presentation, or research design.

Active participation in both the workshop and talks.

If necessary, some written outcome may be required.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Module Seminar: Visual Analytics (BSc)

03SM22BIS022 / Seminar

Description:

General description:

Topic Focus: Visual Analytics (VA) is the science of analytical reasoning and data-driven decision-making, by leveraging the strengths of powerful machine learning methods and human abilities, through interactive visual interfaces. At its core, interactive visual interfaces empower people to actively explore and manipulate data, making it easier to spot underlying patterns, trends, and anomalies that might otherwise remain hidden. This is further supported by the tight integration of algorithmic models and visual representations, ensuring a deep and nuanced understanding of data. Also, the human-in-the-loop and feedback loop principles deeply rooted in VA enrich interactive machine learning processes with human insights, leading to more accurate and relevant outcomes.

Course Mechanics: In small groups, students will study a visual analytics paper of interest and, with respect to this paper, develop a review of related works.

Students will structure related works in a taxonomic way, prepare a compelling fact sheet about the paper topic, and present the topic in class. In parallel, students will receive mentoring from the supervisor, give constructive feedback on other students' work, and participate actively in the presentation round.

ECTS: 3

Notes:

The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>.

Application for this seminar is via the new module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>

Learning Outcome:

At the end of the course, students:

- have gained a deeper and broader understanding and knowledge of visual analytics, as an important principle that fosters human-AI collaboration
- will be able to identify and discuss research problems as well as identify and structure relevant related work
- will be able to write a fact sheet about a specific paper, present the topic to a student audience, and discuss ideas on the topic.
- will have learned to accept and give feedback on students' seminar contributions

Target Groups:

Bachelor students in Informatics

Languages of Instruction:

English

Course Materials:

Research papers. The teacher will give advice on how these resources can be retrieved (literature research) and be structured. These papers will depend on the seminar topic. The teacher may adapt individual seminar topics due to student curiosity.

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Jürgen Bernard

Requirements:

Prior Knowledge: Data Visualization Concepts (BI0008) is useful, but not necessary.
Interactive-Visual Data Analysis (L&E) (MI0028) is useful, but not necessary.

Assessment:

- Fact Sheet (15%)
- References List (10%)
- Presentation Slides (10%)
- Presentation of the Topic (15%)
- Presentation Defense in Q&A (10%)
- Discussion Participation in Q&A (10%)
- Peer Review Competence (10%)
- Reflection and Critical Thinking (10%)
- Process and Learning Trajectory (10%)

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: The kickoff meeting and topic presentation slots are fixed.
Hands-on supervision, based on individual appointments.

Request period: from Mi 12.08.2026 10:00 to So 30.08.2026 24:00

Place allocation at the latest: Di 08.09.2026 23:59

Module PHY 151 Foundations of experimental physics

07SMPHY151 / Course

Description:

General description:

Dieses Modul gibt eine Vertiefung der experimentellen Grundlagen aus den Vorlesungen Physik I-IV, mit speziellem Augenmerk auf der Vernetzung der verschiedenen Themen. Dies wird an verschiedenen im Alltag wichtigen Phänomenen, sowie einigen grundlegenden Experimenten der Physik- Geschichte diskutiert. Insbesondere gehören dazu Atmosphären- und Klimaphysik, sowie verschiedene Formen der Energie-Umwandlung in verschiedenartigen Kraftwerken.

Das Modul besteht aus einer Vorlesung (2 Lektionen pro Woche) und Selbststudium. Das Modul wird mit einer mündlichen Prüfung abgeschlossen und ergibt im Total 5 ECTS.

Lernziele: Am Ende der Veranstaltung sollten Studierende folgende Fähigkeiten erworben haben:

1. Die Ähnlichkeiten und Unterschiede von klassischer, relativistischer und Quantenmechanik beschreiben und bei der Lösung von Problemen anwenden können.
2. Den Einfluss verschiedener grundlegender Wechselwirkungen und der Thermodynamik auf Energie-Umwandlungs-Techniken beschreiben und quantifizieren.
3. Optische Himmelsphänomene verstehen und quantitativ beschreiben
4. Grundlegende Experimente der Physik-Geschichte beschreiben und die physikalischen Hintergründe sowohl auf experimenteller wie theoretischer Seite erklären.
5. Ähnlichkeiten und Unterschiede in der mathematischen Behandlung und dem physikalischen Inhalt von Strömungslehre und Elektromagnetismus beschreiben und quantifizieren

Module Digital Health in Practice

03SM22MI0039 / Sonstiges

Description:

General description:

Digital health tools include, for example, electronic surveys, wearable sensors, or machine learning tools to harness unstructured information from free text or speech. These digital technologies offer novel approaches to create evidence for prevention and management of non-communicable diseases (NCDs) and common mental disorders (CMDs).

But how can digital tools be integrated meaningfully, safely, and ethically into digital health studies (DHS) to inform and scale long-term management of chronic illnesses? Students will examine this question through input lectures, discussions, and by planning, executing and analyzing their own mock DHS. This module also aims at helping students to better understand the practical design requirements, implementation, and evaluation of DHS.

The following topics are covered:

- Defining DHS for prevention, management, and treatment of NCDs and CMDs
- Strategies for long-term compliance with DHS
- Conceptual design of a wearable- and smartphone-based DHS
- Technical implementation of a wearable- and smartphone-based DHS
- Evaluation of a wearable- and smartphone-based DHS.

The module consists of live input sessions with interactive group exercises and group discussions. Complementary learning material is provided in the form of tutorial video clips. Additional coaching sessions are offered to support the groups with the development of their DHS and with the preparation of their presentations. In addition to the Talk2UZH/Research Information Management System platform (<https://shorturl.at/Gj4mn>, an easy-to-use DHS platform), students will gain hands-on experience with wearable fitness trackers. Basic/intermediate R or Python skills are desirable for data analyses of the mock DHS.

The module is structured as follows:

1. Students are equipped with relevant foundational knowledge (2 sessions)
2. Students build groups and develop a wearable- and smartphone-based DHS (3 sessions)
3. Students participate in the wearable- and smartphone-based DHS of their peers (ca. 10 days)
4. Students in groups evaluate their wearable- and smartphone-based DHS (1 session)
5. Students in groups present and critically discuss their findings (1 session).

ECTS: 4

Notes:

Rooms and timing details to be found here: <https://tinyurl.com/49z2br5y>

The course is limited to 24 participants of all faculties (MNF, MeF & WWF).
The selection of students to this course will be done through the lecturer.

Learning Outcome:

- To understand the potential and limitations of digital health tools for creating evidence for the prevention, management, and treatment of NCDs and CMDs.
- To be aware of sound methodologies and frameworks for applying digital health tools in health research (e.g., for data collection with wearables, smartphone- and large language model-based analysis methods).
- To gain hands-on experience in the conceptual design, implementation and evaluation of a wearable- and smartphone-based digital health study.

Target Groups:

MA Students

Languages of Instruction:

Englisch

Module EEE 261 Sustainability and Society

07SMEEE261 / Course

Description:

General description:

Die Lehrveranstaltung diskutiert die gesellschaftlichen Herausforderungen der Nachhaltigen Entwicklung auf nationaler und globaler Ebene, wobei die Inhalte auf der Einsicht aufbauen, dass Wirtschaft und Gesellschaft nicht getrennt von einander betrachtet werden können. Es werden Begriffe wie SDGs (Nachhaltigkeitsziele der UNO), ESG (Umwelt, Soziales, Unternehmensführung), Kreislaufökonomie, Public-Private Partnership im Bereich Umwelt und Entwicklung, Migration und Menschenrechte sowie skalierbare Lösungen für einen nachhaltigen Wandel erörtert und besprochen, und wie diese in der Gesellschaft umgesetzt werden.

Folgende Themen werden diskutiert:

Gesellschaftliche Verantwortung und Regulierung; Nachhaltigkeit in Rhetorik und Praxis; Nachhaltige Landwirtschaft im gesellschaftlichen Kontext; Nachhaltigkeit und Entwicklungszusammenarbeit; Migration, Urbanisierung und Menschenrechte; Innovation und Unternehmertum für eine nachhaltige Entwicklung; die UNO Nachhaltigkeitsziele; Nachhaltige Unternehmensführung; Kreislaufökonomie; Biodiversität und Klima; Nachhaltigkeitsbewertung- und berichterstattung; Private Standards in globalen Wertschöpfungsketten;

ECTS: 3

Notes:

Prüfung findet in der letzten Vorlesungsveranstaltung statt. Repetitionsprüfung: s. link <https://www.mnf.uzh.ch/de/studium/pruefungen.html> Bitte melden sie sich für die Wiederholungsprüfung nicht später als drei Wochen vor der Prüfung beim Modulverantwortlichen an.

Learning Outcome:

Nach der Veranstaltung sind die Studierenden in der Lage ...

- die Herausforderungen im Bereich Nachhaltige Entwicklung und Corporate Social Responsibility in OECD und Entwicklungsländern zu erkennen und zu entsprechend zu differenzieren.
- Nachhaltigkeitsvorstellungen im Lichte von politischen Interessen, öffentlicher Wahrnehmung und gesellschaftlichen Ideologien zu verstehen
- einen Einblick in das Nachhaltigkeitsverständnis und die praktische Umsetzung von Nachhaltigkeitsstrategien in verschiedenen Branchen und Bereichen zu erhalten.
- die wirtschaftlichen und politischen Ziele einer Nachhaltigkeitsevaluation (NE), Corporate Social Responsibility (CSR) und Nachhaltigkeitsmanagement (NM) kennen zu lernen.
- die Dilemmas in der nachhaltigen Produktion wie auch beim nachhaltigen Konsum zu erkennen und zu verstehen.
- eigene Ideen und Lösungsansätze zu einer NE, CSR und NM zu entwickeln.

Module AST 511DP General Relativity

07SMAS511DP / Lecture with Practical Exercises

Description:

General description:

In this course we study the theory of gravitation or general relativity.

We first review special relativity.

With the equivalence principle, we develop general relativity and study mathematical tools. Then, we discuss a few applications and tests of general relativity.

ECTS: 3

Notes:

Das Modul dient der Anrechnung eines selbstorganisierten und bereits absolvierten Sprachaufenthalts ans Studium.

Learning Outcome:

Die Studierenden erweitern ihre sprachlichen und kulturellen Kompetenzen.

Languages of Instruction:

Objektsprache

Merkmale:

Responsible instructor: Gianna Maria Frölicher

Requirements:

Assessment: Nachweis von im Selbststudium erbrachten Studienleistungen.

Bitte den Nachweis (Diplom o.ä.) über den Besuch des Sprachkurses bei der Bewerbung für das Modul im Buchungsportal hochladen.

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Organisation:

Offer pattern: 1 Semester (Every Semester)

Request period: from Mo 10.08.2026 00:00 to Sa 10.10.2026 24:00

Place allocation at the latest: So 25.10.2026 24:00

Waiting list progression period: from Mo 12.10.2026 00:00 to Sa 17.10.2026 24:00

Cancellation period: from Mo 12.10.2026 00:00 to Di 20.10.2026 24:00

Module Interdisciplinary Spatial Analysis: GIS as a Digital Method

10SMSTS-510 / Module

Description:

General description:

Der Kurs bietet eine interdisziplinäre Einführung in die Arbeit mit Geographischen Informationssystemen (GIS) als vielfältig einsetzbarer Methode.

Räumliche Daten sind in fast jeder Disziplin wichtig. Sie eröffnen ein breites Spektrum an Einsatzmöglichkeiten, um räumliche Zusammenhänge zu erkennen. Welchen Nutzen hat die Arbeit mit GIS für verschiedene Fachbereiche? Welche Art von Erkenntnissen oder innovativen Fragestellungen sind mit GIS möglich? Welche Besonderheiten ergeben sich bei der Arbeit mit räumlichen Daten, und welche digitalen Werkzeuge stehen dafür zur Verfügung? Wie gelingt der Transfer von der wissenschaftlichen Fragestellung zur technischen Umsetzung, und welche grundlegenden Punkte gilt es dabei zu beachten?

Diese Aspekte werden theoretisch beleuchtet, anhand von Fallbeispielen erläutert und in selbstständigen Übungen während des Semesters vertieft. Dabei werden sowohl theoretische Konzepte als auch praktische Umsetzungskompetenzen vermittelt.

ECTS: 3

Notes:

Onlinekurs im betreuten Selbststudium. Die Dozierenden stehen während des Semesters für Rückfragen und Feedback zur Verfügung. Der OLAT-Kurs ist das ganze Jahr über für Studierende der UZH frei zugänglich. Ein Einstieg ist jederzeit möglich - wer bereits vor Beginn der Modulbuchungsfrist starten möchte, kann sich direkt bei daniel.ursprung@hist.uzh.ch melden.

Die Inhalte können selbstständig während des laufenden Semesters oder vorab in den Semesterferien erarbeitet werden. Um das Modul jedoch regulär zu absolvieren und im jeweiligen Curriculum anrechnen zu lassen, ist eine Modulbuchung während der offiziellen Buchungsfrist zwingend erforderlich. Die Anrechnung erfolgt am Ende jenes Semesters, in dem das Modul gebucht wurde und alle Leistungsnachweise fristgerecht und mit mindestens ausreichender Qualität eingereicht wurden.

Learning Outcome:

Die Teilnehmer:innen kennen verschiedene Einsatzszenarien von GIS und können eigene Beispiele aus ihrer Disziplin skizzieren. Sie sind in der Lage, räumliche Daten selbst zu erheben oder bestehende Daten kritisch zu bewerten und wissen, worauf dabei jeweils zu achten ist.

Sie können einfache GIS-Projekte konzipieren, verschiedene Visualisierungsmethoden anwenden und deren jeweilige Vor- und Nachteile benennen. Ausserdem verstehen sie, was ein Geoinformationssystem (GIS) ist und wie es fachspezifische Methoden sinnvoll ergänzen kann.

Target Groups:

Bachelor, Master

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Andreas Victor Walser

Requirements:

Prerequisites: Keine besonderen Voraussetzungen.

Assessment: Kurze Selbstlernübungen zu jeder Lektion vertiefen fortlaufend die Inhalte und dokumentieren die eigene Auseinandersetzung mit der Materie. Die Ergebnisse

bestehen aus schriftlichen Dokumentationen und eigenen kleinen GIS-Anwendungen. Abgabefrist ist ca. 2 Wochen nach Vorlesungsende.

Grading Scale: Pass/Fail
Repeatability: repeatable once, book again

Module BME 337 Introduction to Digital Health

07SMBME337 / Course

Description:

General description:

This Mantelstudium course - Introduction to Digital Health - will provide an overview of tools, methods and applications driving digital health innovations. In the course, students will gain first insights into the topic by UZH digital health experts presenting their latest research in clinical data science, imaging, mobile health, digital therapeutics, augmented reality and related domains.

This introductory course will provide the necessary understanding of the key concepts in digital health at the intersection of (bio- and behavioral) medicine, data science, bioinformatics, and information systems.

Topics that will be introduced in this course include:

- General overview on how data, digital tools and AI are used in healthcare;
- Clinical data science and translational informatics;
- Biomedical Image Analysis and Machine Learning;
- Digital Tools for Medical Knowledge and Decision Support;
- Mobile health data streams for real world evidence generation and public health;
- Digital therapeutics and health interventions for prevention, management, and treatment of diseases.

ECTS: 3

Notes:

This module is jointly offered for students of the Faculty of Science (advanced Bachelor and Masters students) and students of the Medical Faculty (Mantelstudium) to further communication and interdisciplinary collaboration of future medical experts and scientists in the field of Digital Health.

Course materials will be provided on OLAT. Note that the course appears in OLAT only at the start of the semester. For questions, please contact Ursina Wälchli (ursina.waelchli@uzh.ch).

The course takes place in room SOE E 8.

Learning Outcome:

On completion of the module the student should be able to:

1. Describe the scope of digital health in terms of research and applications in healthcare
2. Recognize how digital transformation will shape the healthcare field
3. List fundamental technologies, including data science, AI and digital tools, that drive innovation in digital health
4. Describe key methodologies for data collection, for data processing and for designing and delivering digital health interventions
5. Evaluate strengths, risks and limitations of digital transformation in healthcare
6. Be aware of key concepts and frameworks to assess and evaluate the validity or effectiveness of new digital tools for prevention or intervention

Module BME 333 From Bench to Bedside – Examples from Immunology and Beyond

07SMBME333 / Course

Description:

General description:

This course covers biological concepts and findings that have led to therapies used in the clinics today. Each lesson will revisit the biological concept, the path into clinical application and the context in which the therapy is used today. Many of the therapies discussed have their origins in immunological discoveries such as e.g. Immune Checkpoint Inhibitors, but the course also covers important concepts in gene editing, infectiology and endocrinology that have shaped modern medicine.

ECTS: 3

Learning Outcome:

Students who successfully complete this course should be able to:

- name biological ideas that have shaped modern treatment
- explain the biological concepts behind modern therapies
- understand the biological background of side effects of different therapies
- outline the path from the biological idea to successful implementation in the clinics
- identify promising future treatment approaches

By the end of the module, students should be able to:

- discuss the likelihood of new biological concepts becoming therapies
- name important considerations when planning clinical trials
- identify possible pitfalls in the process of developing novel treatments

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Nicole Joller

Module Digital Transformation - a Scientific Overview

10SMSTS-204 / Seminar

Description:

General description:

This module provides students with a scientific overview of the digital transformation of our society from a multidisciplinary perspective.

Students receive academic input followed by an interactive session with various DSI professors and learn to engage with and reflect on the challenges, opportunities and consequences of digital transformation.

Sessions are usually structured as follows (exceptions are possible):

15:00 to 15:45: Input lecture by expert

16:15 to 17:00: Group work related to the input lecture

ECTS: 3

Notes:

This course is offered at the Digital Society Initiative (DSI), which is supported by all faculties of the UZH. With interdisciplinary activities in research, education and outreach, the DSI is the University of Zurich's (UZH) centre of excellence on digital transformation. <https://www.dsi.uzh.ch/>

Please note that on Mon, 30. November 2026, from 12:00-17:00 the End-of-Semester Celebration will take place, including presentations together with students from the Module: "Teamwork on Digital Transformation Challenges I". This date is also the last session of the course.

Learning Outcome:

The students ...

- obtain a structured overview of research fields that deal with the digital transformation
- reflect on the digital transformation of our society both in group discussions and on the individual level
- critically consider the social implications of the Digital Society.

Assessment:

Grading of the course is based on the following components:

- Students complete weekly a pre-structured learning journal in which they record the key ethical, legal and social implications of the session topic and the outcome of the discussions. The learning journals will be handed in before the last session of the course (i.e. until 30.11.26). The learning journals account for 50% of the grading.

- Students prepare and present (in groups; group size will depend on the total number of students in the class) a poster inspired by one of the thematic sessions in the final session of the course (30.11.26). The evaluation of the poster accounts for 50% of the grading.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module Teamwork on Digital Transformation Challenges I

10SMSTS-202 / Seminar

Description:

General description:

In this module, students work on interdisciplinary projects that address challenges related to digital transformation. Under the guidance of a researcher from the Digital Society Initiative (DSI), students collaborate in interdisciplinary teams of 3-5 members. Each team member takes on defined responsibilities and contributes specific digital skills to the project.

After an initial innovation phase, each team engages in an exchange with experts from the DSI network. Depending on the project's focus, teams receive guidance on appropriate digital methods and approaches, as well as input on ethical, legal, social and other relevant considerations.

In a follow-up module (6 ECTS) in the spring semester, students have the opportunity to further develop and implement their project ideas in practice.

ECTS: 3

Notes:

The course is offered by the Digital Society Initiative (DSI), which is supported by all faculties of the UZH. The DSI is UZH's centre of excellence for digital transformation, bringing together interdisciplinary activities in research, education, and outreach. More information: <https://www.dsi.uzh.ch/>

Current challenges are described on the DSI website: <https://www.tiny.uzh.ch/1SK>

Personal attendance is expected of all students on the following dates:

- Challenge presentations by supervisors on Mon, 14. Sept. 2026
- Design Thinking Introduction and Kick-off in Project Teams on Mon, 21. Sept. 2026
- Expert Lunches on Mon, 19. and 26. Oct. 2026
- Design Thinking Workshop on Mon, 2. Nov. 2026
- Semester Celebration on Mon, 30. Nov. 2026 (11:15-17:00) together with students from the course 10SMSTS-204 "Digital Transformation - a Scientific Overview"

Learning Outcome:

The students ...

- work effectively in interdisciplinary teams on innovative digital transformation challenges.
- understand both traditional disciplinary research and new approaches enabled by digitalization.
- develop a cross-disciplinary understanding of diverse research questions, methods, and perspectives.
- learn to value and integrate different disciplinary approaches.
- evaluate project goals, processes, and results using ethical, legal and social criteria.
- consider additional project-specific aspects, such as reproducibility and data protection.
- apply relevant digital skills in a meaningful and practical way.
- prepare and present project results using digital media.
- present and discuss project concepts in a World-Café format.

Target Groups:

Master

Languages of Instruction:

Englisch

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Jan Dirk Wegner

Requirements:

Prerequisites: For students enrolled in the Minor / LAO "Digital Skills", passing this compulsory course is a prerequisite for enrolling in the compulsory course "Teamwork on Digital Transformation Challenges II" in the following semester.

Assessment: The overall assessment strategy combines formative and summative elements to evaluate both the learning process and the final project outcomes.

Formative assessment focuses on continuous development and engagement throughout the project.

Student teams update bi-weekly a project report to their supervisor, outlining progress, challenges, and next steps. Specific requirements and expectations are defined by the supervisor according to the project context.

Each student also maintains an individual learning journal, submitted regularly via an online form, reflecting on personal contributions, skills developed, challenges encountered, problem-solving strategies, risks and opportunities, project procedures, future vision, and potential impact.

In addition, peer evaluation of teamwork is conducted and discussed within the student team to support collaborative learning and accountability.

Summative assessment evaluates the final project outcomes.

Each team delivers a project presentation during the End-of-Semester Celebration on Monday 30 November 2026, demonstrating their process, results, and impact.

The course concludes with a final written project report, submitted by Friday, 8 January 2027 at 11:00 a.m., which documents the project's objectives, methodology, results, challenges, and conclusions.

To promote the projects and attract prospective students for FS27, each challenge team is also required to submit a 30-60 second video summarizing their project report.

Grading Scale: 1-6 Quarter Grades Given

Module Linguistic Theories

06SM360-541 / Module

Description:

General description:

Das Modul dient der Vertiefung und Erweiterung der Theoriekenntnisse in ausgewählten Forschungsfeldern der synchronen und/oder diachronen Sprachwissenschaft. Dabei werden die Studierenden an die selbständige wissenschaftliche Beschäftigung mit dem Deutschen, seinen Varietäten und Nachbarsprachen und/oder seiner historischen Entwicklung herangeführt. Im Vordergrund stehen die Lektüre und kritische Diskussion älterer wie neuerer sprachtheoretischer Beiträge, die Aneignung entsprechender Begriffsinventare sowie die intensive Beschäftigung mit exemplarischen Theoriefeldern zur Analyse des Zusammenhangs von Sprache und Gesellschaft.

ECTS: 9

Learning Outcome:

Die Studierenden können durch selbständige und intensive Beschäftigung mit linguistischen Theorien ihre Kenntnisse exemplarisch in einem ausgewählten Forschungsfeld der synchronen und / oder diachronen Sprachwissenschaft anwenden und in einer eigenständigen wissenschaftlichen Arbeit umsetzen. Sie sind in der Lage, aktuelle Forschungsarbeiten unter theoretischen Gesichtspunkten kritisch zu reflektieren.

Module Change and variation: functional aspects

06SM360-544 / Module

Description:

General description:

Das Modul vermittelt vertiefte Einblicke in strukturelle Aspekte von sprachgeschichtlichem Wandel und Sprachvariation in Phonologie, Morphologie, Syntax und/oder grammatischer Semantik. Das Modul führt die Studierenden an die selbständige wissenschaftliche Beschäftigung mit älteren oder jüngeren historischen Sprachstufen, aktuellen oder historischen Nichtstandardvarietäten und Dialekten, verwandten Sprachen oder Kontaktvarietäten heran. Es vermittelt Kenntnisse zum Zusammenhang von Variation und diachronem Wandel, die auf sprachwandel- und grammatiktheoretische sowie auf sprachtypologische Konzepte bezogen werden. In methodischer Hinsicht geht es hierbei sowohl um die Aneignung und kritische Auseinandersetzung mit theoretischen Konzepten der einschlägigen grundlegenden und aktuellen wissenschaftlichen Literatur als auch um die Anwendung dieser Konzepte bei der Analyse und Erklärung primärer Sprachdaten, z.B. unter Rückgriff auf umfassende Korpora und/oder von Sprecher*innen gewonnene Daten.

ECTS: 9

Learning Outcome:

Die Studierenden können durch selbständige und intensive Beschäftigung mit der Forschungsliteratur ihre Kenntnisse der sprachstrukturorientierten diachronen Linguistik und Variationsforschung vertiefen, exemplarisch in einem ausgewählten empirischen Forschungsfeld anwenden und in einer eigenständigen wissenschaftlichen Arbeit umsetzen. Sie sind in der Lage, Theorien und Forschungsarbeiten zu sprachstrukturellem Wandel und Variation kritisch zu reflektieren, Sprachdaten selbständig zu analysieren und das Erklärungspotenzial theoretischer Konzepte bei der Datenanalyse zu nutzen. Sie können sprachstrukturelle Veränderungs- und Variationsphänomene im Deutschen treffsicher diagnostizieren und Zusammenhänge herstellen mit Entwicklungen in verwandten Sprachen und Varietäten, grammatiktheoretischen Ansätzen und sprachtypologischen Befunden. Sie entwickeln ein Verständnis für die Wechselwirkungen zwischen sprachlicher Variabilität und Wandlungsfähigkeit und können Variationsphänomene vor dem Hintergrund sprachgeschichtlicher und sprachvergleichender Perspektiven kontextualisieren.

Module Present-day language: Functions

06SM360-546 / Module

Description:

General description:

Das Modul dient der Vertiefung und Erweiterung der Theorie- und Methodenkenntnisse in Forschungsfeldern, die sich mit unterschiedlichen Perspektiven der Funktionen der deutschen Gegenwartssprache und ihrer Varietäten auseinandersetzen (im Kontext z.B. von Interaktionslinguistik, Textlinguistik, Medienlinguistik, Variationslinguistik). Das Modul hat zum Ziel, die Studierenden an die selbständige wissenschaftliche Beschäftigung mit ausgewählten linguistischen Themenbereichen heranzuführen.

ECTS: 9

Learning Outcome:

Die Studierenden können durch selbständige und intensive Beschäftigung mit Theorien und Fragestellungen ihre Kenntnisse in der synchronen Sprachwissenschaft exemplarisch in einem ausgewählten Forschungsfeld anwenden und in einer eigenständigen wissenschaftlichen Arbeit umsetzen. Sie sind in der Lage, aktuelle Forschungsarbeiten kritisch zu reflektieren und fachlich fundiert zu aktuellen gesellschaftlichen Fragen von Sprachgebrauch und Sprachkritik im schulischen/beruflichen Kontext Stellung zu nehmen.

Module Artificial Intelligence for Language Accessibility

06SM523-532 / Module

Description:

General description:

Blind persons and persons with visual impairments, deaf persons and persons with hearing impairments, persons with cognitive impairments, motor impairments, and persons with speech and language disorders face many barriers in their everyday lives, often related to language. This course provides an overview of common barriers and introduces artificial intelligence approaches developed to reduce some of these barriers.

Specifically, the course deals with tasks such as sign language recognition, translation, and production; intralingual subtitling; audio description; diagnostics of speech and language disorders; automatic text simplification; and speech recognition and synthesis as part of Augmentative and Alternative Communication (AAC) and Ambient Assisted Living (AAL). A focus is on research approaches; transversal topics are those of multimodality and ethics. Students will gain hands-on practice applying some of the approaches as part of the exercises accompanying the course.

This course is preceded by a "Digital Accessibility" course on Bachelor's level.

ECTS: 6

Learning Outcome:

Students (1) are aware of different target groups in the context of accessibility; (2) are aware of language barriers that these target groups face; (2) know about research approaches from the area of artificial intelligence towards reducing some of these barriers; (3) know how to apply a selection of these approaches.

Module AST 233 The Sun and its surface activity (astronomy practicum)

07SMAS233 / Praktikum

Description:

General description:

In this practicum you will use a special purpose telescope to image the photosphere of the Sun. You will observe solar flares, rising and sinking convective cells, sunspots and patches of magnetic energy. This is a new practicum offered to take advantage of the maximum in solar activity that will take place in 2024-2025.

ECTS: 3

Learning Outcome:

Solar observations, doppler imaging in H-alpha, physics of stars, stellar activity and the impact of stars on nearby habitable worlds.

Target Groups:

Only for students of the minor programs "Astronomy & Astrophysics", "Astrobiology" and "Astrophysics".

Languages of Instruction:

English or German

Merkmale:

Responsible instructor: Ben Moore

Requirements:

Assessment: You will write a detailed report detailing your observations and the physical processes that you observe taking place on the Sun's surface. You will include high resolution images and timelapse videos of the surface of the Sun and solar flares.

Grading Scale: 1-6, Half Grades Given

Module Topics in Neuroeconomics and Social Neuroscience (S)

03SMDOEC1141 / Doktorandenseminar

Description:

General description:

This is an internal seminar for the course instructor's doctoral students.

ECTS: 3

Notes:

This course will take place in BLU-003 (Blümlisalpstrasse 10, 8006 Zurich).

If you wish to attend this course, please send an e-mail with your name and student ID number (Matrikelnummer) to cornelia.schnyder@econ.uzh.ch.

Learning Outcome:

In-depth study of the materials presented

Target Groups:

Course instructor's doctoral students. Suitable for English speakers.

Languages of Instruction:

English

Course Materials:

The seminar organizer will distribute the readings electronically on a regular basis.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Philippe Tobler

Requirements:

Prerequisites:

Successful completion of all compulsory modules in the Doctoral Program in Neuroeconomics.

Assessment:

- Regular prepared class attendance (read focus papers; 10%)
- Active class participation (discuss focus papers and others' presentations; 10%)
- Oral presentation (30%)
- Completed manuscript* of a review article or empirical report (50%)

*Note that the manuscript written for this course may not be used as one of the three papers in the PhD thesis. However, it may be included in the PhD thesis if there are at least three other papers included as well.

Grading Scale:

Pass/Fail

Module Current Topics in Public Economics (S)

03SM22MO0215 / Seminar

Description:

General description:

Public economics studies the role of government in the economy. Many current policy debates revolve around the topics of redistribution, social insurance, and the provision of public goods. How can we measure inequality, and how has it evolved over past decades? What are the social benefits and costs of wealth taxation? And how generous should unemployment insurance benefits be?

In this seminar, we study how economists think through such questions. Drawing on recent research papers in the field of public economics, we explore the motivations, methods, and effects of government interventions in the economy. The selected papers cover a range of topics and methodological approaches. The seminar is intended for Master-level students in economics.

ECTS: 3

Notes:

The allocation of students to this seminar will be done through the department via the module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in Economics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.econ.uzh.ch/en/study/undergraduate/ma/seminar.html>

Application for this seminar is via the module booking tool
<https://studentservices.uzh.ch/uzh/launchpad>

Please be aware that the periods for booking and un-booking seminars differs from the regular module booking period for lectures.

Deadline for application: 30.8.2026.

The seminar takes place at SOF-G-21.

Learning Outcome:

This seminar has two goals. The first is to familiarize students with concepts and methods used in public economics. The second is to practice the skills of extracting and communicating insights from original research papers in economics. To this end, students will present recent research papers and discuss their merits and limitations. In a short final paper, students will expand on the discussion in class and propose potential avenues for future research.

Target Groups:

MA students Economics

Course Materials:

List of research papers will be published on OLAT

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Florian Scheuer

Requirements:

Assessment:

The final grade will be a weighted average of the grades for the paper presentation (40%), the discussion of a paper (10%), active participation in classroom

discussions (10%), and the seminar essay (40%). Attendance at all meetings is compulsory.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Irregular)

Dates/Times/Deadlines:

Kick-off Tuesday, 15.09.2026: 6.00-6.30 pm Zoom

Introduction Wednesday, 23.09.2026: 1.30-4.30 pm SOF-G-21

Presentations 1-3 Friday, 02.10.2026 09:30-13:00 SOF-G-21

Presentations 4-6 Friday, 9.10.2026 09:30-13:00 SOF-G-21

Presentations 7-9 Friday, 16.10.2026 09:00-13:00 SOF-G-21

Final paper deadline Friday, 04.12.2026 23:59 by E-Mail

Request period: from Mi 12.08.2026 10:00 to So 30.08.2026 24:00

Place allocation at the latest: Di 08.09.2026 23:59

Waiting list progression period: from Mo 07.09.2026 00:00 to Fr 18.09.2026 24:00

Cancellation period: from Mo 07.09.2026 00:00 to Mo 21.09.2026 24:00

Organisation: Institut für Volkswirtschaftslehre

Module Old Church Slavonic

06SM480-039 / Module

Description:

General description:

Dieses Modul bietet eine Einführung in die Grammatik und Geschichte des Altkirchenslavischen. Neben linguistischen und philologischen Fragestellungen wird dabei ausserdem die kulturelle Bedeutung des Altkirchenslavischen behandelt.

ECTS: 3

Learning Outcome:

Die Studierenden erwerben Grundkenntnisse der Grammatik des Altkirchenslavischen und erhalten einen Einblick in die Arbeit mit älteren slavischen Texten.

Languages of Instruction:

Deutsch

Merkmale:

Target Group: Open to School Students

Responsible instructor:

Aleksej Tikhonov

Requirements:

Prerequisites:

Sprachwissenschaftliche Grundlagenkenntnisse; Kenntnisse einer slavischen Sprache sind wünschenswert.

Assessment:

Portfolio (schriftliche Teilprüfungen, schriftliche Übungen) Das Modul wird als <bestanden> bewertet, wenn beide Elemente des Portfolios <bestanden> sind.

Grading Scale:

Pass/Fail

Repeatability:

repeatable once, book again

Organisation:

Offer pattern:

1 Semester (Every Second Fall Semester)

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Organisation:

Module CHE 323 Advanced Catalysis

07SMCHE323 / Lecture with Practical Exercises

Description:

General description:

Catalysis is a cornerstone of modern chemistry, enabling the efficient and sustainable synthesis of essential chemicals, pharmaceuticals, and materials. This course explores the fundamental principles of catalysis, starting with an introduction to standard mechanisms that are commonly operational in modern catalytic reactions while highlighting their industrial and environmental significance. Next, the course will cover various topics in transition metal catalysis (hydrogenations, alkene and alkyne functionalization reactions, cross-coupling reactions, alkene and alkyne metathesis, C-H activation, photoredox catalysis, etc.) and organocatalysis (nucleophilic catalysis, aminocatalysis, Brønsted acid catalysis, phase-transfer catalysis, N-heterocyclic carbene catalysis, asymmetric counterion directed catalysis, etc.) from a synthetic and a mechanistic point of view. Through case studies and real-world applications, students will gain insight into how catalysis drives innovation.

ECTS: 4

Learning Outcome:

Understanding and critical evaluation of current research in catalysis. Design of mechanistic experiments to elucidate reaction mechanisms. Students will also learn about presenting a case study on a catalytic topic during a workshop.

Languages of Instruction:

English

Course Materials:

Scripts provided prior to the lectures. Original literature.

Support materials:

- Eric V. Anslyn, Dennis A. Dougherty, Modern Physical Organic Chemistry illustrated Edition, University Science Books
- J. F. Hartwig, Organotransition Metal Chemistry From Bonding to Catalysis. University Science Books.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Cristina Nevado Blazquez

Requirements:

Prior Knowledge:

CHE 202, 203, 204, 205

Assessment:

Written exam after the end of the semester (in English) and case study during a workshop

A potential repetition of the exam (usually in written form) may be arranged by the responsible lecturer.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module Educational Policy and Governance (S)

03SM22MO0218 / Seminar

Description:

General description:

In this seminar we study and summarize empirical evidence on a wide range of topics regarding diverse educational policies and educational governance issues. The topics relate to education at each level: from early childhood through primary and secondary schooling, but advance into tertiary education and lifelong learning.

Policy makers seek advice when implementing different educational or training policies, while empirical research can give evidence-based recommendations. The spectrum of educational policies is large, including but not limited to optimal class size, class diversity, school management, school autonomy, the role of technology in education, college scholarships, educational incentives... From an economic and governance perspective, the relevant outcomes are school quality, student performance and competencies, and labor market results, including employment rates, earnings, and skill matching. We also explore literature that addresses broader well-being outcomes, such as health and life satisfaction.

The seminar has a block form with a kickoff session at the beginning of the semester. In the kickoff session students obtain an overview of the research topics organized along various educational policies. Each seminar participant picks from available topics based on their interest.

The main component of the seminar involves each student writing a seminar paper on their chosen topic. This paper should (i) provide a comprehensive summary of the empirical findings related to the topic, and (ii) offer evidence-based policy recommendations for a hypothetical policymaker.

Midway through the semester, we will have a round of brief presentations, where each student gives a short overview of their topic. The seminar concludes with a workshop at the end of the semester. In this workshop, each student will present their final seminar paper and make a short discussion of another student's presentation including a critical assessment of his/her policy recommendations.

ECTS: 3

Notes:

The number of students that can participate in this seminar is limited to 20. Registration is mandatory:

Please send a brief email expressing your motivation in attending the seminar and include your CV and latest transcript of records to katarina.zigova@business.uzh.ch until 13th of September 2026 at latest.

Learning Outcome:

In this seminar, students will learn about the empirical evidence behind different educational policies, mainly from economic and management perspectives. They will gain a solid understanding of the variety of educational policies and what these policies may achieve. The seminar will also help students improve their presentation skills and their ability to make an evidence-based judgment. While writing their seminar papers, students will practice summarizing research findings clearly and providing research-based policy recommendations

Languages of Instruction:

English

Course Materials:

This is a paper-based course. The list of topics along with exemplary research papers will be presented and distributed to seminar participants during the kickoff.

The recent study by Tomás Rau (below) may serve as an example of topical research done in this area.

Rau, T. (2025). Mobile Devices and Children's Development: The Case for School Restrictions. Working Paper No IDB-WP-1758. Available at: <https://publications.iadb.org/en/mobile-devices-and-childrens-development-case-school-restrictions>

For an example of reporting upon education, you can listen to the recent episode of OECD Top Class podcast summarizing the state of education across the globe discussing the Education at a Glance (2005) report:
<https://soundcloud.com/oecdtopclasspodcast/the-state-of-global-education-with-oecd-andrea-schleicher> or scroll through the underlying report at:
https://www.oecd.org/en/publications/2025/09/education-at-a-glance-2025_c58fc9ae.html

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Katarina Zigova

Requirements:

Prerequisites: Well passed courses in Empirical Methods and Personnel Economics and genuine interest in economics of education or personnel economics fields.

Assessment: The seminar grade is based on quality performance in the following four items:

1. Seminar paper: 60%
2. Slides and presentation of the seminar paper: 25%
3. Discussion of the allocated co-student's presentation: 10%
4. Participation in the general discussions: 5%

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: This is a block seminar. Please reserve the following dates:

Kickoff: Friday 02.10. 14-16

Midterm presentations: Friday 06.11. 14-18

Individual meetings 1h/student: week 09.-13.11.
(Teams or in person upon individual agreement)

Student Workshop: Saturday 19.12. 9-18

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Efficient Algorithms for Frequently Asked Questions (L+E)

03SM22BMI010 / Lecture with Practical Exercises

Description:

General description:

This course gives a unifying overview of the latest research in efficient computation over relational data, with applications spanning databases, artificial intelligence and machine learning, theoretical computer science, and linear algebra. Besides their theoretical interest, algorithms overviewed in this course also represent the key differentiator for commercial database and relational AI engines. They represent essential knowledge for data system engineers.

Syllabus: Computation over commutative (semi)rings; Functional aggregate queries (FAQ); Applications: database queries, constraint satisfaction problems, (count)SAT, inference in probabilistic graphical models, einsum expressions, gradients and cost functions for machine learning over relational data; Decompositions: hypertree decompositions, acyclic hypergraphs, join trees; Width measures: treewidth, fractional edge cover number, fractional hyper tree width, FAQ width; Solving joins optimally: Yannakakis algorithm, LeapFrog TrieJoin algorithm, Suboptimality of state-of-the-art join algorithms, optimal join algorithms, preprocessing time versus enumeration delay; Worst-case optimal size bounds for joins: Shannon inequalities, Shearer's lemma, linear program for fractional edge cover number; Solving SAT: The DP and DPLL procedures, acyclic SAT; Solving FAQ: Functional aggregate queries over several semirings, the InsideOut algorithm.

ECTS: 3

Notes:

If you have already taken the course "Efficient Algorithms for Frequently Asked Questions (DINF1132)" in spring 2021, 2022 or 2023 you are not allowed to book this course.

Learning Outcome:

The students will learn how to formalise computational problems, analyse their computational complexity using a toolbox of techniques that exploit the algebraic and combinatorial structure of the problem, understand connections between different areas of computer science, familiarise themselves with simple yet powerful algorithms that exploit such structure, and implement and benchmark these algorithms.

Target Groups:

MSc in Data Science; MSc in Software Systems; BSc in Informatics

Languages of Instruction:

English

Course Materials:

Slides and research publications will be provided during the semester.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Dan Olteanu

Requirements:

Prerequisites:

Foundations of Computing I, Foundations of Computing II, Informatics II, Database Systems

Prior Knowledge:

Familiarity with a programming language is necessary for the practical task.

Assessment:

Written exam onsite: 16.00 - 18.00 on 15 June 2026.

The examination has three components: written examination onsite; exercise

sheets and practical task whose satisfactory completion can provide additional bonus points.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Spring Semester)

Module PHY 426 High-Energy Photonics

07SMPHY426 / Course

Description:

General description:

High-Energy Photonics is an advanced elective lecture covering the physics of pulsed laser–matter interaction from first principles. The course traces the complete chain of events that occurs when an intense laser pulse irradiates a material: electromagnetic energy delivery, ultrafast optical excitation, electronic and thermal redistribution, mechanical response, and ultimately material removal via desorption or ablation. Special emphasis is placed on a unified, dimensionless parameter framework that allows students to classify and predict the dominant interaction regime for any laser–material combination.

The course concludes with advanced topics including ablation-driven X-ray plasma lasers — a regime in which controlled ablation creates a transient gain medium for coherent soft X-ray generation — and the analytical applications of laser ablation in chemistry and materials science (LA-ICP-MS, LIBS, MALDI).

ECTS: 2

Notes:

- The course is taught in English. Lecture slides are provided digitally via OLAT.
- Python programming exercises are distributed as Jupyter notebooks and can be run in a web browser (JupyterLite) without local installation.
- Attendance is expected; the written examination draws directly on material presented in lectures and exercises.
- Students who wish to obtain a grade may register via the UZH course catalogue (KSL). Audit registration (Hospitant) is also available with prior agreement.

Learning Outcome:

Upon successful completion of this module, students will be able to:

- Calculate laser pulse parameters (intensity, fluence, beam profile) and identify the relevant interaction regime from the pulse duration, wavelength, and material properties.
- Describe the hierarchy of physical processes — optical, electronic, thermal, mechanical — that follow laser energy deposition, including their characteristic timescales.
- Apply the Beer–Lambert ablation depth law and the dual-regime LIDT scaling ($\tau^{1/2}$ and τ^0) to predict threshold fluences and ablation rates.
- Classify laser–material systems using the dimensionless framework parameters
- Distinguish photophysical from photochemical processes.
- Explain the operating principle of ablation-driven X-ray plasma lasers, including the role of the transient collisional excitation scheme, gain-length product, and refraction losses.
- Critically read and evaluate primary literature in laser–matter interaction.

Target Groups:

- MSc students in Physics
- MSc students in Chemistry with a concentration in Physical Chemistry or Analytical Chemistry
- MSc students in Materials Science
- Advanced BSc students in Physics (semester 5–6) with instructor approval

Languages of Instruction:

English

Course Materials:

Primary Resource

Supplementary References

- D. Bäuerle, Laser Processing and Chemistry, 4th ed., Springer (2011)
- E. G. Gamaly, Femtosecond Laser–Matter Interaction, Pan Stanford (2011)
- D. A. Cremers & L. J. Radziemski, Handbook of Laser-Induced

Breakdown

Spectroscopy, Wiley (2006)

- J. Rocca, Table-Top Soft X-Ray Lasers, Rev. Sci. Instrum. 70, 3799 (1999)
- L. V. Keldysh, Ionization in the Field of a Strong Electromagnetic Wave, Sov. Phys. JETP 20, 1307 (1965)

Merkmale:

Responsible instructor: Davide Bleiner

Requirements:

Prior Knowledge: Students are expected to have completed:

- BSc-level optics
- BSc-level quantum mechanics
- BSc-level thermodynamics and statistical mechanics
- Basic physical chemistry or materials science

No prior knowledge of laser physics is required.

Assessment: Written reports and examination test. The written report accounts for 50% of the grade. The exam will be held in English.

Duration test: 60 minutes, open book.

The examination consists of three parts:

1. Short questions (30 %): definitions, physical reasoning, and dimensional analysis.
2. Calculation problems (50 %): applying scaling laws, dimensionless parameters, TTM, and ablation depth formulas to given laser–material combinations.
3. Essay question (20 %): explain or compare interaction regimes for a stated experimental scenario.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Module Criminal Justice and Human Rights

02SM90WM96 / Course

Description:

General description:

This course examines the intersection between criminal law, criminal process, and human rights. The criminal law is the most severe measure at the state's disposal. The criminal law is a tool of coercion, which allows the state to punish its own citizens. Human rights are commonly viewed as exerting limits on the coercive reach of the criminal law and criminal justice authorities. At the same time, the criminal law has increasingly been seen as a means for protecting and enforcing human rights claims, particularly in the context of policing and prosecution and punishment of violent and sexual crimes. This course will allow for consideration both of rights as limits on the state's powers in the criminal justice context and of rights as grounding demands that the authorities act to investigate, prosecute, and punish crime.

ECTS: 6

Notes:

Details for the course are published on the professor's website.

Learning Outcome:

Students will gain a comprehensive understanding of the relationship between criminal law, criminal process, and human rights.

Target Groups:

Master students

Course Materials:

To be communicated on the professor's website by the beginning of the semester.

Module BME 683 Wagi Lunch Seminar

07SMBME683 / Seminar

Description:

General description:

Discover the latest in translational biomedical research through our interdisciplinary seminar series. Presented by PhD students or young researchers, these seminars showcase advancements in biomedicine and methodological updates from multiple areas such as cardiology, rheumatology, oncology, immunology, neurology, dermatology, etc. Engage in insightful questions & answers followed by discussions and an informal lunch, offering networking opportunities.

ECTS: 1

Notes:

The course is taking part also during the “non-lecture” time of the semesters.

Application by email to wagilunchseminar@cmc.uzh.ch

Learning Outcome:

A presentation in an interdisciplinary environment to broaden the chance to confront your data with other young researchers. Discussion around scientific presentations by other PhD students and early researchers.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Giovanni Camici

Requirements:

Prerequisites:

Open to all PhD students of the UZH, ETH and USZ.

Assessment:

- Active participation in minimum 10 weekly seminars on site (10 hours)
- 1 poster presentation (10 hours preparation + 8 hours of poster session) during the Day Schlieren Research held on site at the end of each FS semester (first Wednesday of July each year)

Seminar and poster presentation will be done in English language.

Module EEE 316 Tropical Plant Families: identification, ethnobotany, and chemistry

07SMEEE316 / Block Course

Description:

General description:

This highly practical and process-oriented course aims to equip students with the knowledge to i) identify 50 of the most common plant families in the tropics, ii) understand their importance for Indigenous and local people, and iii) investigate their chemistry, combining laboratory and computational approaches. The course will draw heavily from the exceptional plant collections in the tropical greenhouses of the UZH Botanical Garden and the Z+ZT Herbarium. After this course, students will be familiar with the morphology of tropical plants and with basic steps needed to develop a research project on their phytochemistry:

i.e., from collection to identification, and from laboratory sample preparation to computer-aided metabolite identification.

ECTS: 6

Notes:

Registration for Blockcourses here:

<https://www.mybiportal.uzh.ch>

Learning Outcome:

After successfully completing the module, students should be able to:

- Describe the morphology of angiosperms and their phylogenetic relationships.
- Identify 50 most common plant families in the tropics using a combination of vegetative and reproductive morphological traits.
- Collect and make herbarium specimens for professional research.
- Capture plant aromas and identify them using computer programs.
- Identify the main secondary metabolite classes in plants using metabolomic tools.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Rodrigo Camara Leret

Requirements:

Prerequisites:

Basic studies completed, including modules on biodiversity of plants

Assessment:

Graded, in English.

The final grade will be based on three deliverables: 1. Quiz (30%): A 30-minute identification test of tropical plant families, based on living and herbarium specimens. 2. Essay (35%): a 5-page essay about a plant family (e.g., describing its morphology, ethnobotany, history, chemistry). You will have 3-weeks to write the essay. 3. Final presentation in mini symposium (35%): a 10-minute presentation, summarizing your essay.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module Data Visualisation in Finance (L)

03SM22MO0225 / Course

Description:

General description:

We believe in applying mathematical knowledge with success in the world of finance and our purpose is to help students with a quantitative background to build an outstanding career.

Our dreams are achieved when we complement our knowledge with the trust of the people around us. During this class you will strengthen the soft skills needed to succeed as a quant in the world of finance. You will also get familiar with the technical tools needed to apply such skills in a working environment.

Organizations are growing larger and becoming more diverse. Inspirational storytelling is essential to assure the cooperation of people towards a common goal. For example, a successful quant needs to simultaneously convince a scientific audience of the model's soundness and a business audience of its practical benefits. In this class you will develop the storytelling skills needed to present complex information to diverse audiences in an inspiring way.

The management level is always looking for ways to take decisions faster and smarter. Arguments based on data are very persuasive and a well-chosen visualization transmits complex information in a fast and efficient way. You will learn how to build clear arguments based on data, how to design compelling visualizations and how to consolidate trust as a presenter.

The background of the module is rooted in real life examples from the banking industry regarding the implementation of regulatory models in the business decision process. In this working environment, you will use the most established tools for data visualization and understand their strengths and limitations.

In our opinion, the skills and practical know-how accumulated during this class will contribute to a successful career, independent of the organization you will choose to work for in the future.

Module Sports Data-Based Management and Economics: Current Research Topics (S)

03SM22MO0226 / Seminar

Description:

General description:

This seminar focuses on scientific publications that utilize sports data in management and economics research.

ECTS: 3

Notes:

This module takes place on-site. The seminar is organized as a "block seminar" with one kick-off session. The number of participants is limited and priority is given to students who have attended the lecture "Sports Data-Based Management and Economics".

Application for this seminar is via the module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>

Learning Outcome:

Students get familiar in the preparation and presentation of a selected scientific publication and in writing reviewer reports.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Raphael Flepp

Requirements:

Prerequisites:

Admission to Master's program

Prior Knowledge:

The seminar builds on the lecture "Sports Data-Based Management and Economics"

Assessment:

Presentation of a scientific publication (40%), two written reviewer reports (40%) and active participation (20%) during the seminar. On-site attendance is compulsory.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Request period:

from Mi 12.08.2026 10:00 to So 30.08.2026 24:00

Place allocation at the latest:

Di 08.09.2026 23:59

Waiting list progression period:

from Mo 07.09.2026 00:00 to Fr 18.09.2026 24:00

Cancellation period:

from Mo 07.09.2026 00:00 to Mo 21.09.2026 24:00

Module Financial and Managerial Accounting Bootcamp for Master's Students (L)

03SM22MO0230 / Course

Description:

General description:

Master's students enter the program with varying levels of background knowledge in accounting. This course offers an opportunity for those lacking a sufficient accounting foundation, or those who feel their accounting skills have become rusty, to catch up through intensive training.

ECTS: 6

Notes:

The course is divided into two parts. In the first part, we focus on financial reporting, starting with how the financial system is set up in a company and how financial statements are prepared and analyzed. In the second part, we concentrate on managerial accounting topics, such as cost analysis and management, budgeting, and performance evaluation. The course will take place on site with podcasts available.

Learning Outcome:

After successfully completing the course, you should be equipped with the fundamental accounting knowledge needed for managing a company.

Additionally, you will be ready to take more advanced classes that require accounting knowledge as a prerequisite.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Hui Chen

Requirements:

Assessment:

The examination of the module will take place on site. One final exam, written, 90 minutes (Friday, 09.10.2026, between 14:00-16:00).

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module EEE 326 Principles of Evolution

07SMEEE326 / Block Course

Description:

General description:

"Nothing in Biology Makes Sense Except in the Light of Evolution". Evolutionary biology and its methods are essential in all branches of modern biology. This course builds on first year courses in evolutionary biology and deepens the students' understanding of important evolutionary concepts, such as evolutionary change, adaptation, and speciation, underpinned by genetic change, in a combination of lectures and practicals. Most of these practicals will be computer-based.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Learning Outcome:

By the end of the course, the students will be able to:

- describe important evolutionary theory and its applications
- identify and discuss the core issues from ongoing debates in evolutionary biology
- critically assess the presentation of evolutionary research in the popular media

Key skills:

- approach biological questions from an evolutionary perspective
- apply theory and perform data analysis in evolutionary biology

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Rie Shimizu Inatsugi

Requirements:

Prerequisites:

Basic studies completed. Basic knowledge in evolution (BIO113: mandatory, EEE103 and other courses on evolutionary biology: highly recommended), basic knowledge of R is required.

Assessment:

Problem Sets Following Practicals (approx. 40%)
4 Hour Final Exam (approx. 60%) in English

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

not bookable

Cancellation Deadline:

not cancelable

Module EEE 328 Experimental Invertebrate Biology

07SMEEE328 / Block Course

Description:

General description:

This course offers a practical and theoretical introduction to experimental biology using invertebrates (primarily insects). Students develop and conduct 2-3 small experimental research projects under guidance, using different designs and a variety of techniques (e.g., molecular, physiological, behavioral, microscopic, genomic, or comparative).

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybiportal.uzh.ch>

Learning Outcome:

By the end of this course the students should be able to

- understand and overcome the challenges of designing a robust experiment
- be familiar with common practical techniques within the field of experimental biology
- conduct a small project from defining a meaningful research question and testable hypothesis to conducting experiments, analyzing data and interpreting the results
- develop logical and testable research questions and coherently present scientific data

Module EEE 364 Wildlife Ecology and Conservation

07SMEEE364 / Course

Description:

General description:

Introduction to biological concepts and methods relevant to wildlife ecology, conservation and management.

ECTS: 2

Notes:

This course will be held in German.

Learning Outcome:

By the end of the module, you should be able to:

- explain important concepts in wildlife ecology and wildlife management
- understand population processes, the role of demographic factors and selected other factors for the regulation of populations
- select commonly applied and important methods to estimate the demographic factors relevant for wildlife ecology studies
- appraise approaches in the management of harvested wildlife species
- know about potential conflicts between wildlife and humans and know about possible solutions
- summarize the state-of-knowledge on a particular topic on one A4 page and present it succinctly in a 15-min talk

Merkmale:

Responsible instructor: Gilberto Pasinelli

Requirements:

Prerequisites: First four semesters ("Grundstudium") finished (recommended)/ Basic studies completed.

Assessment: Assessment in German.
Attendance of lectures (12 out of 14 lectures need to be attended, otherwise no grade and no credit points will be issued)
15 min. talk (provides the main grade)
Participation activity during the lectures (used for adjusting grade from talk)

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Second Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Organisation: Inst. f. Evolutionsbiol. u. Umweltwiss.

Module EEE 320 Sociobiology in Animals

07SMEEE320 / Block Course

Description:

General description:

In this practical course, students (in pairs of two) choose on a small project in which they collect preliminary empirical data on communication/socio-biology in social organisms and develop a research proposal for a MSc project. Students work in pairs and bring in their own idea of a topic or follow our suggestions. They are expected to work independently and produce a final report in form of a MSc research proposal.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybiportal.uzh.ch>

Learning Outcome:

By the end of this module each student is able to:

- apply their knowledge from BIO 386 to a practical project on 'Sociobiology of animals'
- identify and formulate a research question and to support it with empirical evidence or literature based arguments
- write a scientific proposal (in the style of a MSc thesis proposal) based on preliminary data and / or literature review
- perform extensive literature search on a specific topic

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Marta Manser

Requirements:

Prerequisites:

From 3rd year on. The lecture Bio 386 is compulsory to attend this module.

Assessment:

Report, presentations, poster and active participation. In English

Grading Scale:

1-6, Half Grades Given

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

not bookable

Cancellation Deadline:

not cancelable

Module DSA 101 Introduction to Data Analytics and Python

07SMDSA101 / Lecture with Practical Exercises

Description:

General description:

Data analysis is an essential component of both physical and life sciences. In this course, we cover theory and practical applications in data analytics. Key topics include experimental design, selecting control studies, replication, data visualization, hypothesis testing, significance, power, data modeling, and data integrity. In the final lectures, these core concepts will be used to provide a brief introduction into advanced methods in data collection and analysis. The course will cover entry level Python programming using Jupyter notebook for data visualization, statistical analysis, and introductory large- scale data analysis.

ECTS: 4

Notes:

The final exam will take place on December 16th during lecture hours

Learning Outcome:

Through this course, attendees will learn to design experiments, process data fairly, visualize data using Python, perform comparative data analysis, model data, and recognize pitfalls in data collection and evaluation. Additionally, they will learn to use introductory tools for analyzing large datasets.

Target Groups:

BSc, MSc, and PhD students

Languages of Instruction:

English

Course Materials:

Materials and information will be shared using OLAT

Students must bring their own laptop to the course. The following free software will be used: anaconda & jupyter notebook. Information f installing this software is supplied in OLAT, and it is recommended that you do so before the first lecture.

Merkmale:

Responsible instructor:

Alexandria Liang

Requirements:

Prior Knowledge:

Basic math and chemical knowledge equivalent to CHE 170

Assessment:

written exam (in English)

A potential repetition of the exam (usually in written form) may be arranged by the responsible lecturer.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module Portuguese Language (B2)

06SM427-021 / Module

Description:

General description:

O nível B2 de língua portuguesa destina-se a estudantes que desejem aprofundar e desenvolver as suas competências comunicativas em português. Privilegiando abordagens interculturais, a/o estudante será capaz de compreender diferentes questões e argumentos complexos, e deverá demonstrar que consegue lidar com a maioria das situações encontradas em contextos de língua portuguesa. Além do acesso a diferentes tipos de textos e de materiais avulsos, o curso poderá ser complementado por um manual.

ECTS: 6

Learning Outcome:

Neste curso, as/ os estudantes irão adquirir bases discursivas e pragmáticas para aplicar, de forma eficiente e com alguma autonomia, em situações comuns do cotidiano. As/ os estudantes deverão ser capazes de compreender textos complexos e longos, reconhecendo o seu significado implícito, e de se exprimir facilmente, tanto em contextos formais como informais.

Languages of Instruction:

Portugiesisch

Merkmale:

Responsible instructor: Johannes Kabatek

Requirements:

Prerequisites: Nível de Língua Portuguesa A2-B1

Assessment: Portfolio: Apresentações orais: 15%, 4 Textos escritos: 35%, Exame final: 50%

Portfólio: - Apresentações orais: de 2.11.2025 a 25.11.2026. - Textos escritos: 11.10.2026; 1.11.2026; 20.11.2026; 06.12.2026 - Exame final: 16.12.2026, 8:00-9:45; On-site (Paper pencil)

Module EEE 318 Aquatic Ecology

07SMEEE318 / Block Course

Description:

General description:

This course combines Limnology with Ecological and Evolutionary concepts. It contains a lecture part, an experimental part, two extensive determination courses as well as mandatory excursions. One of these excursions is a 3-days excursion (with overnight stays) from 23th to 25th September 2026. The lecture part covers aquatic organisms in lakes, rivers, and streams. After this course you will know the most important aquatic invertebrates and algae in Switzerland and the most important identification traits.

ECTS: 12

Notes:

REGISTRATION FOR BLOCKCOURSES HERE <https://www.mybioportal.uzh.ch>

- Registration under normal UZH tools, as blockcourse EEE318 (former: BIO 309). Module leader at UZH is Prof. Dr. Florian Altermatt. This course also runs at ETH under the number 701-2437-01L. Responsible persons at ETH: Dr. Anita Narwani. The course takes place at Eawag in Dübendorf. There are mandatory excursions outside of the block times (evening of September 17th 2026, and three days with overnight stays from September 23th to 25th 2026), but get compensated.
- Additional teachers: Francesco Pomati and Alexandra Anh-Thu Weber

Learning Outcome:

During this course you will get an overview of the world's typical continental aquatic ecosystems. After this course you will be able

- to describe how aquatic organisms have adapted to their habitat, and how the interactions (e.g. food web) between organisms work.
- to explain the principles of doing research to observe interrelations in aquatic ecosystems.
- to measure and interpret biological and physical data (e.g. during experiments, field work) and present the collected knowledge. The course puts a strong focus on acquiring identification skills, and after this course you will be able to define the most important aquatic species groups (macroinvertebrates, microinvertebrates and algae) in Switzerland and know their most important identification traits.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Florian Altermatt

Requirements:

Prerequisites:

Basic studies completed

Assessment:

The assessment of the course consists of a written exam on the lecture part (Aquatic Ecology), two independent exams on the identification parts, and a marked research report. In English

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

<u>Booking Deadline/Period:</u>	not bookable
<u>Cancellation Deadline:</u>	not cancelable
<u>Organisation:</u>	Inst. f. Evolutionsbiol. u. Umweltwiss.
<u>Offered in:</u>	Fall Semester 2027 Fall Semester 2026 Fall Semester 2025 Fall Semester 2024

Module EEE 356 Microbial Ecology of Alpine Freshwater Ecosystems

07SMEEE356 / Block Course

Description:

General description:

The course teaches basic practical techniques to study the taxonomy, biodiversity, and ecology of diatom and fungal communities in alpine streams. Seminars will provide the background knowledge into taxonomy, ecology, molecular techniques and ecological applications. Diatoms are a very diverse group of algae which performs important ecosystem functions as primary producers. Freshwater fungi are a diverse community of microscopic fungi developing in dead organic matter and performing important ecosystem functions as decomposers.

ECTS: 3

Notes:

This is a field course, which will be held at the Alpine Biology Center in Piora from Sunday 2 August to Friday 7 August 2026.

Registration for the course by Email to Dr. Andreas Bruder (andreas.bruder@supsi.ch) until May 1st 2026. There will be a waiting list. Registrations after that date may only be partially considered.

Learning Outcome:

The students learn basic techniques to study the taxonomy and ecology of both organism groups through practical work and to the ecological background and applications through seminars: Fieldwork: techniques for sampling diatoms and fungi from various streams and lakes of Val Piora and for the physicochemical characterization of the sampling sites.

Labwork: sample preparation, microscopic identification, working with dichotomous keys for both organism groups. Standard DNA-sequencing techniques are not part of the course.

Data analysis: statistical description and interpretation of diversity and community composition with knowledge of the physicochemical conditions of the streams and lakes, and of the scientific literature.

Seminars: introduction to the diversity and ecology of diatoms and fungi in streams and lakes. Introduction to molecular techniques and their use in taxonomic studies and ecological applications.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Florian Altermatt

Requirements:

Prerequisites:

For students at the end of the Bachelor or beginning of Master studies (primarily EEE and BIO, but potentially also other programs when sufficient existing ecological knowledge can be documented)

Assessment:

Report, to be handed in by Friday September 12th 2026 in English

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

not bookable

Cancellation Deadline: not cancelable

Module Ethical Challenges in Schools and Teaching

06SM222EHSU / Module

Description:

General description:

In diesem Seminar geht es um ethische Herausforderungen, denen Schule und insbesondere Unterricht ausgesetzt sind, und mit denen Lehrpersonen wie auch andere Beteiligte einen Umgang finden müssen. Im Zentrum steht die Analyse der komplexen Struktur dieser Herausforderungen sowie deren Verständnis.

ECTS: 3

Notes:

Bitte stellen Sie sicher, dass Sie einen Zugang zu einer Schulpraxis haben, wenn Sie das Modul besuchen (sei das die eigene Schulpraxis oder die von jemand anderem). Siehe die Hinweise zu den Unterrichtsmaterialien.

Merkmale:

Responsible instructor: Franziska Felder

Requirements:

Prerequisites: Zugang zu Schulpraxis (sei es die eigene oder die von jemand anderem) ist Voraussetzung für den Besuch dieses Seminars, da teilnehmende Beobachtungen ein Teil des Leistungsnachweises sein werden.

Assessment: Analysetagebuch

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (Irregular)

Request period: from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Place allocation at the latest: Sa 29.08.2026 22:00

Waiting list progression period: from Sa 29.08.2026 22:00 to Do 10.09.2026 24:00

Module EEE 334 Biodiversity from Species to Landscape Scale - Concepts and Methods in Spatial Ecology and Remote Sensing
07SMEE334 / Block Course

Description:

General description:

Global change reshapes biodiversity and ecosystem functions, feeding back to the climate system and threatening nature's contributions to people. Monitoring and analysing these changes have become a critical component of biosphere science. This course provides you with the theoretical understanding and the skills to tackle biodiversity related research questions across spatial and temporal scales with the help of concepts, data and methods from remote sensing and spatial ecology.

Lectures introduce key concepts and you will answer real-world questions in outdoor and computer labs, providing you with foundations in optical remote sensing and ArcGIS. The course will not only prepare you for a MSc or PhD thesis, but also for professional settings. Assessment by individual assignments and a team project.

ECTS: 6

Notes:

BIODIVERSITY STUDENT REGISTRATION FOR BLOCKCOURSES HERE: www.mybioportal.uzh.ch (<http://www.mybioportal.uzh.ch/>)

ESS BSc & MSC STUDENTS REGISTRATION by email to admin.schaepman-strub@ieu.uzh.ch until 30 August 2026– please add a short motivation (<0.5 pages), note that ALL course hours have to be attended as assessments are being done during the course, and practicals build up on each other.

The course will be held in the afternoons 13.00-17.00 in Y01F50 and in the mornings 8.30-12.00 in Y34J02, and sometimes outside in Irchel Park!

Learning Outcome:

- Understand biodiversity as part of the biosphere, by acknowledging its functions, complexity and interactions within the Earth system.
- Apply systems thinking for biodiversity monitoring and analysis, with awareness of length scales of processes and data
- Understanding signal contribution of biodiversity in optical remote sensing data to inform robust monitoring and analysis of biodiversity (e.g. application of spectral variability hypothesis)
- Integrate a variety of data types (e.g. GPS, satellite-derived essential climate and biodiversity variables, plot data) into spatial analysis to answer real-world questions during labs (e.g. Arctic biodiversity and ecosystem functioning, movement ecology, urban biodiversity)
- Basic knowledge of geospatial analysis tool (ArcGIS) and remote sensing data sets and portals that support biodiversity research
- Assessed knowledge and skills using a combination of short assessments during labs and lectures and testing skills through team project.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Gabriela Schaepman

Requirements:

Prerequisites:

For advanced BSc and MSc students of Biodiversity, ESS, if space allows also for Biology and Geography, but only if not overlapping with schedule of other courses as presence is required for entire course!

Assessment:

0.25* (sum of grades of quizzes during course) + 0.25* (written assignment) + 0.5* (team project grade) in English

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Module Introduction to Forensic Speech Sciences

06SM523-534 / Module

Description:

General description:

Forensic Speech Science is a multidisciplinary field that applies various aspects of phonetics, linguistics, signal processing, and automatic speaker recognition for legal and investigative purposes. This module aims to introduce the goals, tasks (e.g. transcription, speaker comparison, disambiguation of disputed utterances) and practices of forensic speech and audio analysis. This module blends frontal teaching and hands-on sessions.

ECTS: 6

Learning Outcome:

By the end of this module, students will have achieved the following learning objectives: - A fundamental understanding of factors affecting the perception, analysis, and transcription of speech signals within investigative settings. - Develop familiarity with diverse methods for transcribing forensic audio materials, including using state-of-the-art automatic speech recognition systems. - Gain familiarity with multiple approaches to forensic voice comparison, including auditory assessment, acoustic-phonetic analysis, and automatic techniques. - Showcase their abilities through practical demonstrations in voice comparison and the transcription of forensic recordings

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Volker Dellwo

Requirements:

Prerequisites:

The participation to modules on Phonetics and Phonology is highly recommended.

Assessment:

Portfolio: 50% assignments, 50% final course exam

Date of the written exam on site (paper pencil): Montag, 14 Dec. 2026,
12:15-13.45 (90 minutes)

Grading Scale:

Pass/Fail

Repeatability:

repeatable once, book again

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module EEE 352 Contemporary Analysis for Ecology

07SMEEE352 / Lecture with Practical Exercises

Description:

General description:

This course gives an introduction to data analysis and the design of experiments. The main focus is on the analysis of data from designed experiments using linear model and analysis of variance. Although the statistical software "R" will be used, the emphasis is on principles of data analysis and the interpretation of results. No introduction to R will be provided.

ECTS: 4

Learning Outcome:

After the course, the participants will be able to design and analyze experiments with a complexity that is typical for the majority of ecological studies. Specifically, the participant will:

- understand the basic elements of common experimental designs
- understand linear models and ANOVA tables (e.g. degrees of freedom, sum of squares, mean squares, F-tests, main effects, interactions, contrast encoding schemes etc)
- recognize simple hierarchical data structures (e.g. nested units) and be able to implement these in simple linear models
- recognize pseudoreplication, understand its consequences, and be able to avoid it

Course Materials:

Computer with a running R installation

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Pascal Niklaus

Requirements:

Prior Knowledge:

Very basic mathematical and statistical knowledge is expected (e.g. participants should know what a variance and a t-test are). During the course, the statistical programming language "R" will be used. The R commands used will be explained briefly when they are used for the first time, but the course does not provide a systematic introduction to R. Some very basic knowledge of R and familiarity with the R installation on the participant's computer are therefore expected.

Assessment:

Written exam in English in the last lesson of term. In addition to the exam, it is compulsory that the participants hand in the solutions of three exercises.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Request period:

from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Module EEE 301 Professional Internship

07SMEEE301 / Praktikum extern / Berufspraktikum

Description:

General description:

Within the Biodiversity Bachelor's program at the University of Zurich, students engage in a practical internship as part of the Mono program. This internship serves as a bridge between theoretical university education and hands-on professional experience, offering students an initial glimpse into the working world. The minimum duration for the internship is three months, with a full-time commitment of 100%. Alternatively, students may opt for a part-time arrangement over an extended period, but not longer than one year.

The internship opportunities are available in institutions actively involved in biodiversity-related activities. Various sectors provide potential internship positions, including nature conservation organizations, zoos, museums, environmental consulting firms, public administrations like BAFU, Grün Stadt Zürich, cantonal departments, and research institutions such as WSL, EAWAG, Agroscope. Opportunities also exist in national and international private sector companies. A comprehensive list of potential institutions is accessible in the OLAT folder "EEE301 Internship" (<https://lms.uzh.ch/dmz/>). It's important to note that this list is not exhaustive, and students are encouraged to explore additional relevant institutions in the field of biodiversity.

Internship positions should align with UZH's values and objectives, focusing on institutions, companies, or NGOs in the field of biodiversity. Acceptance of a position is contingent upon approval from the module leader, who ensures compatibility with UZH's mission.

Students are accountable for both applying for the internship and establishing the framework conditions. Additionally, students and institutions share the responsibility for securing insurance coverage.

ECTS: 12

Notes:

The professional internship must be discussed with and approved by the module coordinator in advance. During the semester, students can attend a meeting on Mondays from 11:00 a.m. to 12:30 p.m. with the completed registration form without prior appointment in the study coordination office Y13-G-40. More information on the professional internship and the report can be found in the professional internship information sheet here: <https://www.biodiversitaet.uzh.ch/de/bachelor/berufspraktikum.html>.

Learning Outcome:

After successfully completing the module, students should be able to ...

- gain insight into the professional realm
- cultivate experience in independently managing a project
- develop communication, teamwork, and organizational skills as a complement to university instruction
- enhance their understanding and orientation toward future career choices
- identify prospects for targeted further training
- initiate initial connections with stakeholders in the field of biodiversity

- practice report-writing skills:
- adhere to the correct formal structure of a scientific paper
- situate the contribution within a broader context and classify it appropriately

Languages of Instruction:

German or English

Merkmale:

Responsible instructor: Claudia Hegglin Braun

Requirements:

Prerequisites: Basic studies must be completed

Assessment: Students are required to consolidate the activities conducted during the work placement into an 8 to 10 pages report. This comprehensive report must be digitally submitted within three months of completing the internship to the module coordinator, along with the signed registration form. Written feedback on the report will be provided to students within two months of submission. Upon approval of the report, 12 ECTS credits will be allocated to the EEE301 Professional Internship module (this module is not available for individual booking).

Grading Scale: Pass/Fail

Module EEE 500 Master Thesis in Biodiversity

07SMEEE500 / Master Paper / MA-Arbeit MNF

Description:

General description:

The master thesis project comprises 12 months (full time) of scientific research, in which a research question in the field of ecology, evolutionary biology, behavioral biology or environmental science is tackled under the guidance of the supervisor. Further information <https://www.biodiversitaet.uzh.ch/de/master.html>

ECTS: 60

Learning Outcome:

After successfully completing the module, students should be able to fully implement a research project (planning, data collection, analysis, writing a scientific paper, presentation of this paper), by

- independently identifying a current research topic in the field of ecology, evolutionary biology, behavioral biology or environmental science for a scientific project and formulating appropriate research questions,
- developing methodological approaches to answer these research questions,
- independently collecting, evaluating and interpreting data,
- putting the results in the context of current research and critically questioning the validity and reliability of the data and methods of their own and other studies.

Languages of Instruction:

The thesis is written in English (or German with prior permission)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Arpat Ozgul

Requirements:

Prerequisites:

To start with the MSc thesis project, module EEE 520 must have been successfully completed

Assessment:

At the end of the MSc thesis project work, the student writes a thesis and designs an accompanying research poster. The written thesis has to comply formally with the common standards applied to scientific publications. The research poster has to be added to the thesis pdf and include the names and affiliations of the collaborators.

Additionally, students must present their final work to their peers in group or departmental meetings or conferences. Their performance in these presentations, including handling of Q&A, will be a part of the final grading. This addition aims to assess the student's ability to communicate their research effectively to a broader audience.

In English.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Semester)

Dates/Times/Deadlines: Students arrange their research project with their chosen supervisor. The project and supervisor are entered onto a Learning Agreement, which also lists the taught courses (20 ECTS points) and plan for the Masters Exam (10 ECTS points). The needs to be checked and signed by the Masters Coordinator (Prof. Ozgul)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Module EEE 520 Integrated Knowledge of Biodiversity

07SMEEE520 / Mündliche Prüfung

Description:

General description:

This module comprises a total of 300 hours (corresponding to about 6-8 weeks) of self-study and has to be taken before thesis work. At the beginning of the module, the MSc Supervisor assigns study material (e.g., chapters from selected books, series of scientific articles) to the student. The MSc Supervisor suggests a scope and related reading material to the MSc Coordinator who will evaluate and approve the study material.

ECTS: 10

Learning Outcome:

After successfully completing the module, students should be able to demonstrate comprehensive understanding of the assigned learning material - including relevant facts, concepts, and methods - and to review scientific literature efficiently and critically.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Arpat Ozgul

Requirements:

Prerequisites:

Only for students of MSc Biodiversity

Assessment:

The certificate of achievement for the compulsory module EEE 520 consists of an oral examination of 30 minutes. The examination date will be arranged directly with the examiner. EEE 520 is considered passed if at least a grade of 4 is achieved. In English. If the examination is failed (grade below 4), the supervisor decides whether a repetition on the same topic/ with the same supervisor is feasible or not. A failed examination can be repeated once. The exam has to be scheduled before the main thesis period.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module Japanese Intellectual History

06SM290-122 / Module

Description:

General description:

Das Modul dient der vertieften Auseinandersetzung mit einem ausgewählten Thema der japanischen Geistesgeschichte, zum Beispiel mit einem Einzelwerk, einem Paradigma, einer Einzelproblematik oder einer spezifischen ideengeschichtlichen Konstellation, unter Einbezug von Originalquellen und japanischer Forschungsliteratur. Es wird ein Überblick der relevanten Quellen, wissenschaftlichen Probleme, der Forschungsansätze und der einschlägigen Einzelprobleme erarbeitet. Einzelne Aspekte werden in gemeinsamer Lektüre, Referaten und schriftlichen Arbeiten vertieft.

ECTS: 9

Learning Outcome:

Vertiefte Kenntnisse zu einem ausgewählten Themenbereich der Geistesgeschichte; einzelne geistesgeschichtliche Quellen aus einer gegebenen historischen Epoche finden, lesen und übersetzen; Theorien und ihre Anwendungsbereiche kennen und anwenden; Fachtexte (D/E/J) analysieren; Einzelthemen gemäss wissenschaftlichen Konventionen verständlich präsentieren sowie Argumente und Ergebnisse im Rahmen einer wissenschaftlichen Arbeit schriftlich darlegen.

Languages of Instruction:

Module Issues in Japanese Philology (Proseminar)

06SM290-023 / Module

Description:

General description:

Das Modul dient der Auseinandersetzung mit einem grundlegenden Themenbereich der japanischen Philologie, zum Beispiel mit einer literarischen Werkgruppe, einer religiösen Schule oder einer Gruppe von Texten zu bestimmten philosophischen oder geistesgeschichtlichen Fragestellungen. Es wird ein Überblick der relevanten Sachverhalte und wissenschaftlichen Fragestellungen erarbeitet. Einschlägige Einzelthemen werden in Referaten und darauf aufbauenden Hausarbeiten vertieft.

ECTS: 6

Learning Outcome:

Quellen und Forschungsliteratur finden; relevante Methoden anwenden; Fachtexte in europäischen Sprachen sowie übersetzte Quellen analysieren; Einzelthemen gemäss wissenschaftlichen Konventionen verständlich präsentieren; wissenschaftliche Arbeiten verfassen.

Module Gender and Diversity in Practice

10SMSTS-107 / Seminar

Description:

General description:

Im Studium erfolgt die Auseinandersetzung mit Gender und Diversität oft nur am Rande, obwohl das Wissen darum für das professionelle Handeln in beruflichen Kontexten relevant ist. Es sind Themen von höchster wissenschaftlicher und gesellschaftlicher Relevanz. Sie prägen Forschungsperspektiven und strukturieren die gesellschaftliche Ordnung. Im Modul werden Sie angeleitet, sich mit Ihrer eigenen Geschlechtsrollenidentität spielerisch auseinanderzusetzen und sich für die Bedeutung von Gender und Diversität in Gesellschaft und Wissenschaft zu sensibilisieren. Als Game-based Learning Ansatz wird dazu das Lehr-Lernspiel "Identitätenlotto" eingebunden. In "Transdisziplinären Tandems" werden Sie mit Lehrenden zusammen, auf verschiedene Theorien und Ansätze zum Thema blicken und hierbei Textpatenschaften übernehmen. Zum Abschluss werden die gewonnenen Erfahrungen und Erkenntnisse in einem World-Café vorgestellt, wobei Evaluations- und Reflexionsinstrumente Sie während des gesamten Moduls unterstützen, Ihren Blick für Vielfalt zu fördern.

ECTS: 3

Notes:

Von allen Teilnehmenden wird erwartet:

- Teilnahme und aktive Mitarbeit an den geblockten Sitzungen.
- Aktive Mitarbeit in einem Transdisziplinären Tandem, welches eine Textpatenschaft übernimmt.
- Abgabe eines zusammenfassenden Papers.

Transdisziplinäres Tandem und Textpatenschaft:

Ein Transdisziplinäres Tandem setzt sich aus einer/einem Lehrenden und mindestens zwei studentischen Teilnehmenden unterschiedlicher Disziplinen zusammen. Sie als Studierende übernehmen eine Textpatenschaft. Bei der Textpatenschaft erarbeiten Sie die zentralen Kernaussagen eines Hintergrundtextes, welche von Ihnen vor dem Hintergrund der eigenen Fachdisziplin eingeordnet und vorgestellt werden (im Anschluss an den Lehrendeninput).

World Café: In einem World Café werden Sie Gelegenheit haben sich über Ihre gesammelten Erfahrungen und Erkenntnisse auszutauschen.

Learning Outcome:

Die Studierenden

- kennen grundlegende Theorien, Ansätze der Gender-/Geschlechter- u. Diversitätsforschung
- lernen die Bedeutung der Kontextualisierung von Theorien und Erkenntnissen sowie das bereichernde Nebeneinander unterschiedlicher wissenschaftlicher Theorien kennen
- erschließen sich eigenständig theoretische Texte der Gender- und Diversity Studies und können einen Transfer herstellen, indem sie Theorien reflektieren und anwenden
- üben erarbeitete Kernfragen u. -aussagen sinnvoll/strukturiert zu präsentieren, in kontroverse Diskussionen einzuführen, neue Diskussionen anzuregen u. zu leiten
- arbeiten/organisieren sich selbständig, übernehmen die Verantwortung für das Arbeitsergebnis
- reflektieren interdisziplinäres Geschlechter- u. Diversitätswissen in seiner Bedeutung für die eigene Selbst- u. Weltsicht sowie für das eigene Fach.

Target Groups:

Bachelor, Master

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Bettina Dennerlein

Requirements:

Prerequisites: keine

Assessment: Portfolio
Der Leistungsnachweis besteht im Beantworten von verschiedenen Impulsfragen und Reflexions- und Evaluationsinstrumenten während der Blocktage sowie einer Abgabe eines zusammenfassenden Papers auf dessen Grundlage (schriftliche Arbeit). Der Umfang des Papers beträgt 10'000 bis max. 12'000 Zeichen (inkl. Leerzeichen) und soll in sprachlich korrekter Form verfasst werden, sorgfältig redigiert sein und als PDF-Dokument über den Abgabe-Ordner von OLAT eingereicht werden (Abgabedatum: 13.12.2026).
Von allen Teilnehmenden wird zudem die aktive Mitarbeit in einem Transdisziplinären Tandem erwartet, welches eine Textpatenschaft übernimmt und die zentralen Kernaussagen eines Hintergrundtextes vor dem Hintergrund der eigenen Fachdisziplin positioniert und darstellt (mündliche Arbeit).
Der Leistungsnachweis besteht somit zusammenfassend aus einem Portfolio, das sich aus einer mündlichen und einer schriftlichen Arbeit zusammensetzt, die beide bestanden werden müssen.

Module Strengthening Mental Health Together: Well-being in Studies and Work

10SMSTS-108 / Module

Description:

General description:

Studierende sind während ihres Studiums und beim Übergang ins Berufsleben vielfältig gefordert. In diesem interaktiven Modul lernen die Studierenden individuell und in der Gruppe Grundlagen der mentalen Gesundheit kennen sowie zentrale, positive Ressourcen zur Stärkung der eigenen mentalen Gesundheit. Die fachlichen Grundlagen werden inter- und transdisziplinär wissenschaftlich fundiert auf Basis von Erkenntnissen aus Psychologie, Medizin, Theologie und Sportwissenschaften vermittelt. Das Modul besteht aus zwei Präsenzvorlesungen jeweils am Anfang und Ende des Semesters, wöchentlichen Online-Vorlesungen, Selbststudium und zwei Präsenzworkshops (jeweils dienstagnachmittags). Die Studierenden lernen darin die theoretischen Grundlagen kennen und können diese praktisch durch Übungen, Eigenanwendung und Austausch in der Gruppe anwenden und praktische Kompetenzen für die Stärkung der mentalen Gesundheit im Studium und Beruf aufbauen.

ECTS: 3

Notes:

Das Modul befasst sich mit den Grundlagen der mentalen Gesundheit und zentralen Ressourcen zu deren Stärkung im herausfordernden Alltag von Studium und Beruf.

In den Online-Vorlesungen werden die theoretischen Inhalte aus unterschiedlichen Perspektiven vermittelt. In den Workshops werden Übungen zur Eigenanwendung durchgeführt und Erfahrungen in Kleingruppen reflektiert. Im Vordergrund stehen ein ressourcenorientierter Ansatz und die Förderung eines positiven Gesundheitserlebens. Es geht in diesem Modul nicht darum, psychische Erkrankungen im Detail zu beschreiben, zu diagnostizieren oder ihre Ursachen zu ergründen. Das Modul ist daher nicht als Anlaufstelle für akute Krisen oder als Ersatz für eine Psychotherapie zu verstehen. Bei persönlichen Krisen empfehlen wir die psychologische Beratungsstelle der UZH (siehe <https://www.pbs.uzh.ch/de>) aufzusuchen oder Fachpersonen in der Nähe (siehe <https://www.psychologie.ch/de/psyfinder>) zu kontaktieren.

Kurz erklärt: t.uzh.ch/1Pn

Learning Outcome:

Lernziel ist die Aneignung der theoretischen Grundlagen, die Selbsterfahrung und der Kompetenzaufbau zum Umgang mit Belastungen und Förderung der mentalen Gesundheit im Studium und Beruf. Die wichtigsten Aspekte und Bestandteile der mentalen Gesundheit aus verschiedenen Fachperspektiven werden kennengelernt und in Bezug auf die eigene Person reflektiert. Der Fokus liegt dabei auf Ressourcen für die Bewältigung der Herausforderungen im Studium. Evidenzbasierte Aktivitäten zur Stärkung dieser Ressourcen und zur Steigerung des eigenen Wohlbefindens während des Studiums werden kennengelernt, ausprobiert und kritisch reflektiert. Indem Studierende ein besseres Verständnis und konkrete Handlungsstrategien im Umgang mit den Belastungen und der Förderung der Ressourcen im Studium entwickeln, soll ein nachhaltiger Kompetenzerwerb für künftige berufliche Herausforderungen entwickelt werden.

Target Groups:

BA, MA

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Moritz Daum

Requirements:

Prerequisites:

Es gibt keine fachlichen Voraussetzungen. Das Modul ist für Bachelor- und Masterstudierende aller Fakultäten der UZH offen. Aktive Teilnahme an den zwei Präsenzvorlesungen sowie an zwei Präsenzworkshops wird vorausgesetzt. Studierende können eine der vier Workshopgruppen wählen:

- Gruppe 1 (29.09. & 27.10.2026),
- Gruppe 2 (06.10. & 03.11.2026),
- Gruppe 3 (13.10. & 10.11.2026) oder
- Gruppe 4 (20.10. & 17.11.2026).

Die Zuteilung zu der Workshopgruppe erfolgt nach den individuellen Präferenzen am ersten Präsenzvorlesungstermin.

Assessment:

Der Leistungsnachweis beinhaltet folgende Elemente:

- Aktive Teilnahme an der ersten und der letzten Präsenzvorlesung sowie an zwei Präsenzworkshops
- Selbstständige Erarbeitung der Online-Vorlesungen bzw. Screencasts
- Eigenständiges Ausprobieren der Übungen zur Selbstanwendung
- Führung eines individuellen Lerntagebuchs zu jedem inhaltlichen Thema. Das Lerntagebuch ist bis spätestens 05.01.2027 einzureichen.
- Abgabe von drei Gruppenprotokollen. Drei Protokolle werden zu den inhaltlichen Themenblöcken Einleitung, Ressourcen und Herausforderungen verfasst. Die Gruppenprotokolle sind bis spätestens am 05.01.2027 einzureichen.

Module Law and Sustainability

02SM90WM98 / Course

Description:

General description:

The course will explore different legal aspects related to sustainability. Delving into the intricate interplay between law and sustainability, it will discuss the role of law and regulation in enhancing sustainable business practices. The study of international standards will illustrate how global developments contribute to shaping sustainability laws. The course will start with a general introduction to the UN sustainable development goals and the OECD Due Diligence Guidance for Responsible Business Conduct. It will then go into details of the relevant private law aspects, with a specific focus on Swiss and European Union law, encompassing contract and tort law, insurance law, and private international law. It will also cover the topic of sustainability from the corporate, economic and financial law perspective, including aspects such as banking regulation, capital markets law and competition law. Students will develop a holistic understanding of the current legal framework while staying abreast of recent developments that pave the way for future reforms of the legal framework.

ECTS: 6

Learning Outcome:

Upon completion of this course, students will acquire the ability to evaluate the importance of international standards in the realm of sustainability. They will also be able to compare their relevant national legal provisions, with a specific focus on Swiss and European Union law. Recognizing the fact that sustainability encompasses a diverse array of legal topics, students will develop the skill to adopt a holistic approach, facilitating the establishment of connections between various legal disciplines. In so doing, they will gain proficiency in understanding the interrelated nature of legal aspects contributing to sustainability. Finally, the course will engage students in a critical analysis of deficiencies and gaps within the existing legal framework, equipping them with the capacity to identify areas for improvement and potential avenues for legal reform in the context of sustainability.

Module State Governance

02SM90WM99 / Course

Description:

General description:

Das Modul behandelt die Staatsleitung auf Kantons- und Bundesebene und Möglichkeiten von Reformen innerhalb des föderalistischen Staatsaufbaus. Der Themenplan sieht wie folgt aus:

- Einführung ins Thema
- Grundlagen der Staatsleitung in Kantonen und Bund
- Präsidium und Leitungsaufgabe in der Kollegialregierung
- Führungs- und Planungsprozesse
- Verwaltungsführung
- Interkantonale Zusammenarbeit
- Zusammenarbeit von Regierung und Parlament in der kooperativen Staatsleitung
- Führungsunterstützung durch Staats- und Bundeskanzlei
- Handlungsbedarf und -möglichkeiten für eine effektivere Staatsleitung im Bundesstaat

ECTS: 6

Notes:

Didaktisch ergänzen Referate und Beiträge aus der Praxis die klassische Vorlesung. Zudem ist wiederum eine Exkursion nach Bern ins Bundeshaus mit einem Gespräch mit einem Mitglied der Landesregierung geplant. Gegen Ende des Semesters findet eine Vorbesprechung der Prüfung hinsichtlich Stoffumfang und Ablauf statt.

Learning Outcome:

Lernziel sind die Prinzipien und Instrumente der Staatsleitung auf Kantons- und Bundesebene sowie Reformansätze. Die Studierenden sind für eine Mitwirkung in Parlament, Regierung, Verwaltung, Wirtschaft oder NPO's mit den Instrumenten der Interessensdurchsetzung im Rahmen der Staatsleitung vertraut. Prüfungsstoff ist das anhand der aufgeschalteten Grundlagendokumente in der Vorlesung Behandelte.

Target Groups:

Interessierte an den Themen Führung, Staatsrecht, Föderalismus und Gesellschaftsentwicklung.
Master-Studierende der RWF; alle Masterstudiengänge.
Master-Studierende anderer Fakultäten: im Rahmen der Studienordnung für Nebenfachstudierende.

Languages of Instruction:

Deutsch

Module Prosecution and Defence in Modern Criminal Proceedings

02SM90WM100 / Course

Description:

General description:

Was macht eine gute Staatsanwältin aus? Welche Strategie soll ein Strafverteidiger wählen, um seinen Mandanten möglichst effektiv zu verteidigen? Wie kommt die Privatklägerschaft zu einem angemessenen Schuldspruch und Schadenersatz? In diesem Mastermodul wird der moderne Strafprozess aus der Warte der Parteien betrachtet. Eine leitende Staatsanwältin, ein erfahrener Strafverteidiger und ein anerkannter Vertreter von Geschädigten führen Sie durch einen Strafprozess: Ermittlung, Eröffnung, Zwangsmassnahmen (Siegelung, Durchsuchung, Untersuchungshaft, geheime Überwachungsmaßnahmen), Beschwerden, Einstellungen, Strafbefehle, Anklagen oder «Deals» im abgekürzten Verfahren und schliesslich die Gerichtsverhandlung werden behandelt. Ziel ist es dabei, dass Sie einen Einblick in die Funktion und Aufgaben der sich gegenüberstehenden Parteien bekommen.

Das Besondere an diesem Modul ist, dass es von Expert:innen aus der Praxis geleitet wird. Sie werden ihre eigenen Erfahrungen einbringen, um den Unterricht lebendig und praxisnah zu gestalten. Studierende haben die Gelegenheit, von ihren praktischen Fähigkeiten und Ratschlägen zu profitieren, was die Vorbereitung auf eine berufliche Karriere im Strafrechtssystem unterstützt.

ECTS: 6

Notes:

Dies ist eine Präsenzveranstaltung. Der Besuch und die aktive Teilnahme an sämtlichen Vorlesungen sind Pflicht.

Learning Outcome:

Dieses Modul soll den Studierenden ein Verständnis für die Rolle und Aufgabe der Anklage und Strafverteidigung vermitteln.

Target Groups:

Studierende der Rechtswissenschaft. Die Praxisorientierung dieses Moduls kann dazu beitragen, die Lücke zwischen der akademischen Theorie und der tatsächlichen Praxis zu schliessen und den Studierenden wertvolle Einblicke und Fähigkeiten zu vermitteln, die in ihrem zukünftigen beruflichen Werdegang von Nutzen sein werden.

Languages of Instruction:

Deutsch

Course Materials:

Werden von den Dozierenden festgelegt/abgegeben

Merkmale:

Responsible instructor:

Sarah Summers
Marc Thommen

Requirements:

Prerequisites:

Interesse für das Strafverfahren

Prior Knowledge:

abgeschlossenes Bachelorstudium

Assessment:

Wir werden ein Delikt gegen Leib/Leben vom Moment der Verhaftung der beschuldigten Person bis zum Rechtsmittelverfahren mit Ihnen besprechen und diskutieren (4 Halbtage zum Vorverfahren, 2 Halbtage zum Hauptverfahren inkl. Hauptverhandlung in Form eines «Moot Courts», 1 Halbtage zum Rechtsmittelverfahren). Wir beleuchten die unterschiedlichen Rollen von

Staatsanwaltschaft, Strafverteidigung und Privatklägerschaft am Beispiel des konkreten Falls. Wir diskutieren, argumentieren und «streiten» uns, ganz so, wie das in der realen Welt auch der Fall ist. Wir machen uns Gedanken über das idealste Vorgehen seitens der Staatsanwaltschaft einerseits und wir diskutieren die beste Verteidigungsstrategie andererseits. Unser Ziel ist, dass Sie die StPO in den drei Dimensionen «Staatsanwaltschaft», «Verteidigung» und «Privatklägerschaft» erleben und begreifen können - mit allem, was dazu gehört. Das Schwergewicht liegt auf strafprozessualen und taktischen Fragen. Sie werden keine Power-Point-Präsentationen hören/erhalten, Sie werden kein Skript erhalten, Sie werden keinen klassischen Frontalunterricht erleben und es wird keinen Podcast geben. Vielmehr tauchen Sie gemeinsam mit uns in die spannende und anspruchsvolle Welt des Strafverfahrens ein. Eine spezifische Vorbereitung ist - ausser dem Studieren der Fallakten - nicht notwendig. Sie müssen bereit sein, aktiv mitzudiskutieren, sich einzubringen und Sie müssen kritisch und kreativ sein. Von uns dürfen Sie viel Praxiserfahrung, eine grosse Leidenschaft für unseren jeweiligen Beruf und ein aufrichtiges Interesse an Ihren Ideen erwarten.

Leistungsnachweis: mündliches Mitwirken an den Veranstaltungen sowie Abfassen eines Plädoyers, wahlweise aus Sicht der Staatsanwaltschaft, der Strafverteidigung oder der Vertretung der Privatklägerschaft im Hinblick auf die im Rahmen des Kurses durchzuführende Hauptverhandlung («Moot Court»).

Grading Scale: Pass/Fail

Repeatability: Can be repeated as necessary

Module Open Source Intelligence (OSINT)

10SMSTS-602 / Seminar

Description:

General description:

OSINT, short for Open-Source Intelligence, enables you to gather crucial information from a variety of publicly available sources, including social media, news articles, government websites, and much more. The capacity to gather, examine, and validate open-source information has never been more crucial - particularly as powerful LLMs both amplify the speed of data processing and raise new challenges around disinformation that must be rigorously detected and mitigated. Throughout this course, students will learn how to (a) use OSINT tools and techniques to gather information, (b) apply Operational Security measures to minimize their own digital footprint, (c) adopt best practices to document, assess, and effectively report findings, and (d) recognize and navigate legal and ethical considerations to ensure proper conduct within the permitted scope.

ECTS: 3

Learning Outcome:

1. Understanding the concept and scope of OSINT;
2. Developing awareness of ethical and legal considerations when using OSINT methods;
3. Understanding the limitations and challenges of OSINT;
4. Using OSINT techniques on a practical project.

Target Groups:

Bachelor, Master, Doktorat

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Markus Christen

Requirements:

Assessment:

Participation in the 4 half-day workshop days and 1 half-day group presentations of the project; passing three quizzes with at least 80% correct answers each; doing all written tasks, incl. an individual essay (submit by 10. December 2026).

Grading Scale:

Pass/Fail

Repeatability:

repeatable once, book again

Module PHY 466 Introduction to Applied Deep Learning

07SMPHY466 / Lecture with Practical Exercises

Description:

General description:

The course will provide an introduction to Deep Learning, with special emphasis to its application to research in fundamental science. After an introduction of basic Machine Learning concepts, it will introduce several kinds of deep neural networks (fully connected, convolutional, etc.) and different learning strategies (supervised, unsupervised). The course will consist of lectures and hands-on sessions, as well as tutorials from invited speakers.

ECTS: 3

Learning Outcome:

Designing and training a neural network to solve various kinds of tasks (classification, regression, clustering, anomaly detection) on various kinds of data (images, sequences, point clouds).

Target Groups:

Students in experimental and theoretical physics, and mathematics.

Languages of Instruction:

English

Course Materials:

Students will be provided with jupyter notebooks for hands-on sessions. A laptop/tablet and a google account will be required.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Florenca Canelli

Requirements:

Prior Knowledge:

Basic knowledge of python coding, jupyter notebooks, and linear algebra.

Assessment:

Oral examination which is carried out in english.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

Module PHY 542 Geometry and Topology in Condensed Matter Physics

07SMPHY542 / Lecture with Practical Exercises

Description:

General description:

This course equips the student with an adequate understanding of geometric and topological methods employed in the theoretical analysis of classical and quantum matter. Instead of concentrating on a particular class of physical systems, the course will in a semi-formal approach systematically introduce the various mathematical techniques. The significance of each mathematical tool will be illustrated through applications to diverse condensed matter systems.

ECTS: 6

Learning Outcome:

At the end of the course the student will be acquainted with selected mathematical tools from differential geometry and algebraic topology, and with their applications in condensed matter physics.

The covered mathematical topics include: homotopy groups, singular homology, Morse theory, Riemannian geometry, vector bundles, parallel transport, characteristic classes, cohomology theory, and Clifford algebras.

The applications to condensed matter physics include: defects of order parameters, Van Hove singularities, flat energy bands, topological band theory, gauge fields, tenfold way classification, and topologically ordered phases.

Languages of Instruction:

English

Course Materials:

Lecture notes will be provided at the beginning of the semester. Suggested complementary literature will be provided in the class

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Tomas Bzdusek

Requirements:

Prior Knowledge:

The course requires a basic knowledge of quantum mechanics and solid state physics, and an elementary familiarity with group theory.

Assessment:

The Assessment is an oral exam of 20 minutes and will be carried out in english.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module BME 342 Deep Learning in Biomedicine

07SMBME342 / Block Course

Description:

General description:

This Flipped-Classroom course explores the powerful intersection of massive medical data and machine learning (ML), a discipline dedicated to creating algorithms that learn from data. With a focus on Deep Learning, which employs artificial neural networks, this module covers essential models for medical applications. Additionally, ethical considerations and responsibilities concerning Artificial Intelligence in Biomedicine will be discussed, alongside students' hands-on project works and its presentations.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Learning Outcome:

Upon successful completion of the module students should be able to:

- explain the difference between different deep learning models and its applications.
- select the appropriate AI algorithm to solve biomedical problems.
- apply deep learning technology for diagnostics and experimental research.
- discuss ethical and regulatory issues surrounding Artificial Intelligence in Biomedicine.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Bernd Bodenmiller

Requirements:

Prerequisites:

Basic studies completed, Foundational knowledge in biomedical sciences or a related discipline, Basic knowledge in Python Programming (including experience with data manipulation and analysis), Basic knowledge of Calculus (differentiation, chain rule, partial derivatives etc.), Basic knowledge of Machine Learning. Recommended preparation: STA120 and MAT141. Students who have not booked the ETHZ course (551-0500-00 P) are preferred due to its similarity.

Assessment:

The course assessment comprises four components: four notebook assignments, each contributing 2.5% to the final grade (10% in total); a test accounting for 20%; a project presentation contributing 20%; and a final report that makes up 50% of the overall grade.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Module Introduction to East Asian Art History

06SM642-001 / Module

Description:

General description:

Die Einführung in die Kunstgeschichte Ostasiens ist eines von zwei obligatorischen Modulen der Studieneingangsphase. Das Modul richtet sich an Studierende, die noch keine Vorkenntnisse in der Kunstgeschichte Ostasiens haben. Es dient als Einführung in das wissenschaftliche Studium der Kunst und visuellen Kultur Ostasiens, insbesondere Chinas, Japans und Koreas

ECTS: 9

Learning Outcome:

Hauptziel des Moduls ist es, den Studierenden grundlegende Kenntnisse über die kulturelle und künstlerische Produktion in Ostasien sowie deren zeitgenössische Interpretationen aus der Perspektive der Kunstgeschichte Ostasiens als wissenschaftliche Disziplin zu vermitteln. Um der Vielfalt der Objekte und kulturellen Kontexte in Ostasien gerecht zu werden, wählt das Modul einen thematischen Ansatz, der sich auf die materiellen Aspekte der Kunst in der Region konzentriert. Anhand von ausgewählten Objekten wie Gemälden, Holzschnitten, Kalligrafien, Skulpturen, Keramiken, Lackarbeiten und Architektur und deren zeitgenössischen Interpretationen wird die Rolle kulturspezifischer materieller Bedingungen für die Entstehung und Rezeption von Kunst erarbeitet. Durch die Auseinandersetzung mit den Objekten und ihren Interpretationen entwickeln die Studierenden ein grundlegendes Verständnis für die Paradigmen der Kunstgeschichte Ostasiens und legen damit den Grundstein für weiterführende Studien in diesem Bereich.

Languages of Instruction:

Deutsch und Englisch. Die Fähigkeit, wissenschaftliche Texte auf Englisch zu lesen, wird vorausgesetzt.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Ewa Machotka

Requirements:

Assessment:

Portfolio: schriftliche Übungen (1/2) und schriftliche Prüfung (1/2)

Alle Elemente des Portfolios müssen erfüllt werden. Die schriftliche Prüfung findet während der regulären Kurszeit am Mi, 16.12.26 statt.

Grading Scale:

1-6, Half Grades Given

Repeatability:

repeatable once, book again

Organisation:

Module Propedeutics in East Asian Art History

06SM642-002 / Module

Description:

General description:

Das Propädeutikum Kunstgeschichte Ostasiens ist ein Pflichtmodul für Studierende ohne Vorkenntnisse in der Kunstgeschichte Ostasiens. Hauptziel ist es, die Studierenden mit den grundlegenden Praktiken der Kunstgeschichte vertraut zu machen, wobei der Schwerpunkt auf dem Studium der Kunst und visuellen Kultur Ostasiens, einschliesslich China, Japan und Korea, liegt. Zur Vertiefung der Lehrinhalte wird verbindlich ein Tutorat angeboten.

ECTS: 6

Learning Outcome:

Das Modul vermittelt den Studierenden die wichtigsten Forschungsansätze, die bei der Analyse visueller Objekte aus der Perspektive der akademischen Disziplin Kunstgeschichte Ostasiens verwendet werden. Die Studierenden werden mit den wichtigsten Forschungspraktiken wie dem Zusammentragen von Quellen und der Objektanalyse sowie mit verschiedenen wissenschaftlichen Ausdrucksformen wie Forschungsarbeiten und mündlichen Präsentationen vertraut gemacht. Der Kurs zielt auch darauf ab, die analytischen Fähigkeiten wie kritisches Denken und wissenschaftliches Schreiben der Studierenden zu stärken, da diese für das Studium der Kunst und die Kommunikation von Forschungsergebnissen unerlässlich sind.

Languages of Instruction:

Deutsch und Englisch. Die Fähigkeit, wissenschaftliche Texte auf Englisch zu lesen, wird vorausgesetzt.

Merkmale:

Responsible instructor: Ewa Machotka

Requirements:

Assessment: Portfolio: Schriftliche Übungen (1/2) und mündliche Übungen (1/2)

Die Assessments werden benotet (1-6), wobei die abschliessende Benotung kumulativ ist. Der Leistungsnachweis besteht aus einem Portfolio. Die schriftlichen Übungen bestehen aus (50%): - Kurze Formale Objektanalyse [5%] - Bibliografische Rechercheübung [5%] - Textzusammenfassung zur Pflichtlektüre [10%] - Illustriertes Präsentationshandout [10%] - Kommentierten Bibliografie [20%] Die mündlichen Übungen bestehen aus (50%): - Produzieren einer Video-Präsentation [30%] - Einreichen von Peer-Feedback [20%]

Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul als nicht bestanden. Teilnahme und Beteiligung an den Gruppendiskussionen werden erwartet. Voraussetzung ist die Beherrschung des Lesens englischer akademischer Texte. Leistungsnachweise können auf Deutsch oder Englisch eingereicht werden.

Module Theories and Concepts in East Asian Art History

06SM642-021 / Module

Description:

General description:

Das Modul bietet eine Einführung in die wichtigsten theoretischen Ansätze und Schlüsselkonzepte, die für das Studium der Kunst und visuellen Kultur Ostasiens relevant sind. Das Modul thematisiert einerseits disziplinspezifische Perspektiven und Konzepte der Kunstgeschichte wie Repräsentation und Visualität. Andererseits beschäftigt es sich eingehend mit kritischen Theorien, insbesondere den Themen Postkolonialismus und Transkulturalismus, die speziell für die Untersuchung der Kunst und materiellen Kultur Ostasiens von grosser Bedeutung sind. Das Modul ergänzt die im Modul «Methoden und Methodologien in der Kunstgeschichte Ostasiens» behandelten Inhalte.

ECTS: 6

Learning Outcome:

Die Studierenden erwerben grundlegende Kenntnisse der verschiedenen theoretischen Perspektiven und Schlüsselkonzepte, die für das Studium der Kunst und visuellen Kultur Ostasiens relevant sind. Sie verstehen, wie sich diese Theorien entwickelt haben, und welche Anwendung sie in der Disziplin der Kunstgeschichte Ostasiens finden. Die Studierenden sind in der Lage, ihre Erkenntnisse in mündlicher und schriftlicher Form auszudrücken.

Languages of Instruction:

Englisch oder Deutsch - siehe Kursbeschreibung. Die Lektüre englischsprachiger Literatur wird vorausgesetzt.

Module History and Historiography of East Asian Art

06SM642-521 / Module

Description:

General description:

This course explores the histories of art history in a global context with a focus on East Asia, and complements the spatial, material, and thematical perspectives employed in art history. Examining both theoretical frameworks and practical challenges, it scrutinizes the historicization of objects categorized as art, inviting the critical assessment of historical contextualization. Special attention is dedicated to probing issues of the canonization and periodization of art. By evaluating the development of narrative structures and epistemological frames, this module sheds light on how diverse material objects and events are integrated into the timelines of art history. Through its focus on temporal aspects of art production and reception this module complements the contents explored in «Space, Place and Mobility in East Asian Art», which emphasizes the spatial dimensions of art.

ECTS: 9

Learning Outcome:

Upon successful completion of the course, the students will be able to orientate themselves in the histories of art history with a particular focus on East Asia. They will also acquire understanding of the historical transformation of interpretation of artworks. They will be able to critically engage - both verbally and in writing - with issues of historization, contextualization, canonization, and the periodization of art.

Languages of Instruction:

English or German - see course. The reading of relevant literature in English and one East Asian language is required.

Merkmale:

Responsible instructor: Ewa Machotka

Requirements:

Prerequisites: This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module.

Assessment: Portfolio (oral presentation 1/3 and research paper 2/3)

The course will be assessed through an oral presentation and a research paper. The deadline for submitting the research paper is on Wednesday, January 6th, 2027.

The final grade is made up of a term paper (2/3) and a presentation (1/3). All elements of the portfolio must be completed. If one element is not completed, the entire portfolio is deemed not to have been completed and the module is deemed to have been failed.

Grading Scale: 1-6, Half Grades Given

Repeatability: repeatable once, book again

Module Seminar: Vision-Based Drone Flight (MSc)

03SM22MIS105 / Seminar

Description:

General description:

Autonomous drones are ubiquitous across different industries, from inspection and mapping to search and rescue applications. In those scenarios, vision-based autonomy is vital as a drone must be able to perceive and react to its environment. This task is very challenging because the real world is inherently unpredictable and difficult to capture in mathematical models.

Combined with the strict real-time requirements when controlling a drone, these requirements make deep-learning solutions the ideal choice for perception and control. In this course, the students will get hands-on experience in autonomous vision-based flight. We consider a Hollywood-inspired setting where a camera drone needs to track an "actor drone." The students will design a perception module to detect and track other drones and train a reinforcement learning (RL) controller to track the actor drone. The developed pipeline will be deployed in the real world on physical hardware.

For the control task, the students will be provided with an RL environment in which they can integrate their controllers. Similarly, the students will have a software framework to integrate their work into the perception module. For the final deployment, drones will be provided so that students can focus primarily on their algorithms.

ECTS: 3

Notes:

The practical project will be done in groups of up to 5 students. The project consists of two parts, and a group can choose to work on either part. One part revolves around getting a reliable drone detection pipeline from monocular images and the other part is concerned with developing a tracking controller via reinforcement learning.

Most parts of the course will be taking place at the drone test facility of the Robotics and Perception Group in Winterthur.

The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>.

Application for this seminar is via the new module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>

Due to the challenging nature of this seminar, interested students should send their transcripts via e-mail to Leonard Bauersfeld and Daniel Zhai (bauersfeld@ifi.uzh.ch and dzhai@ifi.uzh.ch) such that we can ensure that all prerequisites are met and the students have sufficient background knowledge to pass the course. We will reply on a rolling basis until August 27 with a decision if the prerequisites are met in case of an allocation to this seminar. In general, we expect a strong background in machine learning and computer vision.

Students must have attended the lecture on UZH - Vision Algorithms for Mobile Robotics (or similar courses, e.g. ETH - Computer Vision or ETH - Image Analysis and Computer Vision). Furthermore, for the background in machine learning should have at least attended UZH Advanced Topics in Artificial Intelligence (or similar). Finally, students must be comfortable programming in C++ or Python and working in a Linux-based software environment and should be familiar with a Linux shell.

Learning Outcome:

The students get hands-on experience working on drones and learn

- apply machine-learning techniques to physical robots
- plan, conduct and analyze real-world experiments to verify the performance of the developed system
- collaboratively work on a larger soft-ware project

Target Groups:

Master students

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Davide Scaramuzza

Requirements:

Prerequisites:

Due to the challenging nature of this seminar, interested students should send their transcripts via e-mail to Leonard Bauersfeld and Daniel Zhai (bauersfeld@ifi.uzh.ch, dzhai@ifi.uzh.ch) such that we can ensure that all prerequisites are met and the students have sufficient background knowledge to pass the course. We will reply on a rolling basis until August 26 with a decision if the prerequisites are met in case of an allocation to this seminar. In general, we expect a strong background in machine learning and computer vision. Students must have attended the lecture on UZH - Vision Algorithms for Mobile Robotics (or similar courses, e.g. ETH - Computer Vision or ETH - Image Analysis and Computer Vision). Furthermore, for the background in machine learning should have at least attended UZH Advanced Topics in Artificial Intelligence (or similar). Finally, students must be comfortable programming in C++ or Python and working in a Linux-based software environment and should be familiar with a Linux shell.

Prior Knowledge:

Python or C++ programming skills are re-quired (depending on which task a group chooses).

Assessment:

The students are graded on the project which they develop during the block course. The students must hand-in a report summarizing the developed system within a week after the course ends. Deadline: 18 September 2026

Criteria:

- 50% performance of the developed system
- 50% report

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Recent Developments in Empirical Economics of Crime (S)

03SM22MO0231 / Seminar

Description:

General description:

In this seminar, we study recent developments in the empirical economics of crime literature, recognizing its significance within society and its implications for policy-making. While the existing empirical literature largely relies on correlational patterns, recent studies have increasingly focused on establishing causal relationships through innovative methodologies such as natural experiments and randomized controlled trials. Through discussions of recent empirical papers, our course examines pertinent issues, including the effectiveness of criminal justice policies, such as incarceration and rehabilitation programs, and strategies for preventing criminal behavior. By applying economic methods to understand crime and its associated policies, this seminar aims to advance our understanding of this complex societal phenomenon.

ECTS: 3

Notes:

The seminar takes place at SOF-E-09.

This seminar is limited to 18 participants and requires an application. Application and allocation is handled via the module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>.

Personal attendance at all sessions of a seminar is mandatory. If demand exceeds capacity, priority is given to Economics majors.

IMPORTANT: Seminar booking periods differ from regular lecture module booking periods.

Please be aware that the deadline for application ends before the start of the semester and that this seminar has a shortened module booking period (see under Organization). After the request period has passed it is no longer possible to apply for a place in the seminar or on the waiting list.

More information on the process can be found on our website:

<https://www.econ.uzh.ch/en/study/undergraduate/ma/seminar.html>

Learning Outcome:

Students will gain insights into the economic approaches and methods employed to study questions related to the crime and criminal justice policies.

Furthermore, this seminar provides a platform for students to present economic papers, engage in critical discussions, and identify the limitations of existing studies and potential avenues for further research.

Target Groups:

Advanced MA students with a background in econometrics and causal analysis and interested in topics related to crime

Languages of Instruction:

English

Course Materials:

Selection of recent publications or working papers will be uploaded to OLAT

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Michel Maréchal

Requirements:

Prior Knowledge: Sound knowledge of empirical and experimental methods. Students should have visited courses covering methods of causal analysis and econometrics

Assessment: Presentation: 30%
Discussion & Participation: 20% Final paper: 50 %

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Module Wissenschaftstheorie und Wissenschaftsethik (V) (Philosophy and Ethics of Science)

03SM22MO0232 / Course

Description:

General description:

Die Vorlesung führt Studierende in die zentralen philosophischen Debatten der Managementwissenschaften ein. Welche Realität untersuchen wir und gibt es nur eine davon? Was ist ein Unternehmen eigentlich und wie erforscht man es? Müssen Wirtschaftswissenschaftler und Wirtschaftswissenschaftlerinnen politisch neutral sein oder ist Forschung immer politisch? Wann wird die Nähe zur Privatwirtschaft problematisch? Um diese und weitere Fragen anzugehen, lernen Teilnehmende unterschiedliche wissenschaftstheoretische und wissenschaftsethische Positionen kennen. Für weitere Hinweise siehe: <http://www.business.uzh.ch/professorships/as.html>

ECTS: 6

Learning Outcome:

Siehe: <http://www.business.uzh.ch/professorships/as.html>

Languages of Instruction:

Deutsch

Course Materials:

Siehe: <http://www.business.uzh.ch/professorships/as.html>

Merkmale:

Responsible instructor:

Andreas Scherer

Requirements:

Assessment:

Die Leistungsnachweise zum Modul bestehen aus einer schriftlichen Prüfung (Klausur) (60% der Gesamtnote) und zwei kurzen philosophischen Aufsätzen, welche als Vorbereitung auf die Prüfung dienen (je 20% der Gesamtnote). Die Themen der Aufsätze werden zu Anfang des Semesters vergeben und sind im Semesterverlauf zu bearbeiten und schriftlich einzureichen. Die schriftliche Prüfung (Klausur) findet am 4.01.2027, 14:00-16:00 Uhr (Prüfungsdauer 90 min) vor Ort statt.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Introduction to programming for Marketing Analytics (R or Python) (S)

03SM22MO0233 / Seminar

Description:

General description:

This course is designed for beginners seeking to learn R or Python programming with a focus on marketing applications. The course follows a self-paced learning model, allowing students to explore essential programming concepts-such as loading, visualizing and manipulating data, writing loops and functions-through dedicated podcasts and guided exercises. The self-paced model is accompanied by complex analytics projects inspired by our own research.

This course integrates an AI assistant as a learning companion. The custom AI chatbot, trained on course materials and embedded within the OLAT platform, provides on-demand guidance to help students understand the core programming concepts and apply them to marketing research problems. Students are encouraged to use the chatbot both for understanding the essential programming concepts and for applying them to develop the analytics projects. Using generative AI enables students to understand fundamental concepts and basic commands faster, expanding the learning focus toward developing end-to-end analytics projects.

ECTS: 3

Notes:

The number of participants is limited to 65 students. To apply, please use the official module booking tool and submit a short statement of intent (maximum half a page) and your transcript of records.

Application for this seminar is the module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>

Students who have taken Introduction to R for Marketing Analytics (MO0207) are not permitted to book the current module.

Learning Outcome:

The course has two main learning outcomes. The first is understanding fundamental programming concepts that are essential for most real-world analytics applications. These include loading and visualizing data, manipulating data (merging, aggregating, and selecting observations), simplifying complex and repetitive tasks (writing loops and conditional statements) and automating code (writing functions). The second is using the newly acquired skills to develop an end-to-end analytics project.

Target Groups:

Master level students with no previous experience with coding.

Languages of Instruction:

English

Course Materials:

All materials will be made available on OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

René Algesheimer

Requirements:

Prior Knowledge:

No prior knowledge of programming is required.

Assessment:

The following components comprise the final grade:

1. Analytics project I (40%): on-site, computer-based, BYOD format, bring a charger.
2. Analytics project II (40%): on-site, computer-based, BYOD format, bring a charger.
3. Analytics project III (20%): online

All assessments (either on-site or online) are computer-based. Please make sure you have all necessary equipment. To participate in an assessment, students must first complete the self-learning component (online and asynchronous) that precedes the assessment.

Absence Policy for Analytics project I and II: On-site presence in Analytics project I and II is mandatory. If a project is missed, this will be graded as "1".

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines:

16.09.2026, 14:00-16:00h: Kick-Off (on-site)

17.09.2026 - 20.10.2026: Learn the fundamentals of programming for marketing analytics I (online, asynchronous)

21.10.2026, 14:00-18:30h: Analytics Project I (on-site)

22.10.2026 - 01.12.2026: Learn the fundamentals of programming for marketing analytics II (online, asynchronous)

02.12.2026, 14:00-18:30h: Analytics Project II (on-site)

03.12.2026 - 18.12.2026: Analytics Project III (online)

Module Recent Developments in Environmental Economics (S)

03SM22MO0234 / Seminar

Description:

General description:

The seminar deals with recent research papers in environmental economics.

ECTS: 3

Notes:

Please be aware that the deadline for application ends before the start of the semester and that this seminar has a shortened module booking period (see under Organization). After the request period has passed it is no longer possible to apply for a place in the seminar or on the waiting list.

Application for this seminar is the module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>

Personal attendance at all sessions is compulsory.

This seminar is limited to 24 participants and requires an application. Allocation is handled via the module booking tool. If demand exceeds capacity, priority is given to Economics majors.

More information on the process can be found on our website: <https://www.econ.uzh.ch/en/study/undergraduate/ma/seminar.html>

Important: When applying, please upload a recent transcript of records and/or proof of successful completion of an Environmental Economics course on BA level. If there are more applicants than places, students who have successfully completed a BA course in Environmental Economics will be assigned preferentially.
No podcast available.

Learning Outcome:

The participants should be able to develop the skills to understand, present and critically discuss research work in environmental economics.

Target Groups:

MA students in economics and related fields

Languages of Instruction:

English

Course Materials:

Papers will be provided closer to the beginning of the course.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Armin Schmutzler

Requirements:

Prerequisites:

Solid knowledge in microeconomics and statistics at the master level. Basic knowledge in environmental economics (at the Bachelor level)

Prior Knowledge:

Previous exposure to environmental economics is helpful but not essential. Good knowledge of basic empirical methods is important.

<u>Assessment:</u>	Own seminar presentation (60%) Group presentation (20%) Participation in discussion (20%)
	Personal attendance at all sessions is compulsory.

Module Mathematical Finance (S)

03SMDOEC1169 / Doktorandenseminar

Description:

General description:

This course is an introduction to continuous time models. We will focus on markets with a finite time horizon and a finite number of traded securities. Uncertainty will be driven by Brownian motion. Next to the classical arbitrage pricing topics (Fundamental Theorems of Asset Pricing, completeness, etc), we intend to cover other selected topics such as dynamic programming with applications to finance.

ECTS: 9

Learning Outcome:

The student will gain a working knowledge of the principles of Stochastic Finance. This should put the student in a position to understand finance literature using continuous-time models.

Target Groups:

PhD candidates in Finance and related disciplines

Languages of Instruction:

Englisch

Course Materials:

Slides will be provided. A literature list will be provided in due time

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Pablo Koch Medina

Requirements:

Prior Knowledge:

Though not strictly necessary, familiarity with discrete-time models as well as with some measure theoretic probability theory will be useful.

Assessment:

Assessment will rely on a graded presentation on a specific topic on dates to be individually agreed with the students.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

Module EEE 300 BSc Thesis in Biodiversity 07SMEEE300 / Bachelor Paper / BA-Arbeit MNF

Description:

General description:

For the bachelor thesis project, including writing the thesis, you should work approximately 360 hours (equivalent to 12 ECTS credits). The thesis must be written in English. The length of the main text should be between 5000 and 10000 words (not including references and appendices).
Scope, format and formatting must be agreed upon with the supervisor.
Students are required to attend introductory seminars.

ECTS: 12

Notes:

The module EEE 300 is not bookable. You have to book the module EEE 299 in the spring term.

Learning Outcome:

After successfully completing the module, students should be able to:

- develop a scientific question, plan a project, and implement it.
- collect data and analyse them.
- write a scientific report.
- take relevant scientific literature into account, cite systematically and correctly.
- argue logically and present the results clearly and correctly, including tables and graphs.
- interpret your results in a scientific context.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Kentaro Shimizu

Requirements:

Prerequisites:

You have to be registered in module EEE 299 'Application BSc Thesis in Biodiversity'.

Assessment:

BSc thesis (written thesis 40%, performance 40% and presentation 20%) in English

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

Module Strukturierte Lehrmodule PANN-Shading

04SMPED24001 / Kurs

Description:

General description:

PANN-Shading

Die Unterassistenten/Masterstudierenden erhalten das strukturierte Angebot des Shadings in den Sprechstunden der pädiatrischen Spezialfächern Pneumologie, Allergologie, Neurologie und Nephrologie (PANN)

- Jeweils ½ d im Ambulatorium der Kinderklinik
- Während ihres 2-monatigen Aufenthaltes im Wahlstudienfach Pädiatrie auf der Kinderklinik am KSB dürfen sich die Masterstudierenden 2-3 der obengenannten Spezialfächer auswählen (mindestens 2 Fächer sind obligatorisch), um anhand des Shadings einen vertieften Einblick in diese pädiatrischen Fächer zu erhalten.
- Lernziele allgemein:
 - Aneignung vertiefter fachlicher Kenntnisse, sowie Fähigkeiten und Fertigkeiten zum selbstständigen praktischen Arbeiten der Studierenden.
 - Umsetzung des Leitgedanken: 'Vernetztes Denken und interprofessionelles Arbeiten sind Kernkompetenzen, um den raschen Wissenszuwachs und die fortschreitende Spezialisierung in der Medizin zu meistern' mittels Vertiefung der longitudinalen Schwerpunkte vernetztes Denken und Grundversorgung/Spezialisierung.
 - Die Studierenden verstehen die Bedeutung von "patient empowerment" und des mündigen, informierten Patienten, sowie deren Eltern für die Behandlung und können diese adäquat berücksichtigen, beispielsweise im Rahmen von "Shared Decision Making".
 - Die Studierenden erhalten einen vertieften Einblick in die Zusammenarbeit zwischen einer Spezialistin / einem Spezialisten und einer Grundversorgerin / einem Grundversorger, die die jeweils Setting- spezifische unterschiedliche Herangehensweise und die Synergie der Akteure deutlich machen.
- Allergologie:

Lerninhalte/Lernziele: allergologische Anamneseerhebung, Diagnostik (Pricktestung, nasale Provokation, Schleimhautprovokation, orale Provokation (Nahrungsmittel, Medikamente), serologische Diagnostik), Therapie allergischer Erkrankungen (Akut- und Langzeitmanagement) in Theorie und Praxis (Anwendung Adrenalinpen mittels Uebungspen, Abgabe und Instruktion Notfallbehandlungsplan). Einsicht in die interprofessionelle Zusammenarbeit mit der Pflege, der Ernährungsberatung, der Pharmazie und der Küche/Gastronomie und in die interdisziplinäre Zusammenarbeit, speziell mit der Pneumologie und Dermatologie.
- Neuropädiatrie:

Lerninhalte/Lernziele: neuropädiatrische Anamneseerhebung, neuropädiatrischer Status mit Untersuchung der Hirnnerven, Koordination, Kraft, Sensibilität, Reflexe und der kindlichen Entwicklung inklusive Kennenlernen von Entwicklungs-Assessments. Einblick in die neurologische Diagnostik, wie z.B. MRI, EEG mit Erarbeitung der Fragestellungen, EEG- Interpretation und Einblick in die Durchführung. Therapien verschiedener neuropädiatrischer Erkrankungen. Einsicht in die intensive interprofessionelle und interdisziplinäre Zusammenarbeit mit der Entwicklungspädiatrie und der Neuropsychologie mit Abdeckung aller Aspekte der kindlichen Entwicklung.
- Pädiatrische Nephrologie:

Lerninhalte/Lernziele: pädiatrisch nephrologische Anamneseerhebung, Kindernephrologische Untersuchung, im speziellen Blutdruck, Ödeme, Rachitiszeichen, Zeichen der chronischen Niereninsuffizienz etc. Nephrologische Diagnostik und deren Interpretation (Urinanalysen, Retentionsparameter, Ultraschall). Kennenlernen der häufigsten diagnostischen Krankheitsbilder (Fehlbildungen, erworbene Krankheiten und genetisch bedingte Nierenerkrankungen). Therapieoptionen verschiedener nephrologischer Krankheiten. Einsicht in die interprofessionelle und interdisziplinäre Zusammenarbeit mit der Pflege, der Urodynamik und den Sprechstunden Kinderurologie, Kinderkardiologie, Kinderneurologie, sowie der Adipositasprechstunde.
- Kinderpneumologie:

Lerninhalte/Lernziele: pneumologische Anamneseerhebung (Rauchexposition, Luftqualität, bisherige Infekte wie RSV), die Rolle von Impfungen in der Prävention pneumologischer Erkrankungen, pneumologischer Status mit Inspektion des Thoraxes, der Wirbelsäule, Untersuchung der Lunge und ORL. Pneumologische Diagnostik mit

Spirometrie, Bodyplethysmographie, FeNO und Nasale NO Messung (Durchführung und Interpretation), Beurteilung Thorax Röntgen. Theorie von direkter (Methacholinprovokation) und indirekter (Belastungslungenfunktion) Provokation mit Erlernen der Fragestellungen. Einsicht in die interprofessionelle Zusammenarbeit mit der Pflege und die interdisziplinäre Zusammenarbeit, speziell mit der Allergologie und Kinderkardiologie.

Module BIO 398 The Ethics of Rare Disease

07SMBIO398 / Course

Description:

General description:

BIO398 is a literature seminar, in which we discuss a different text each week, examining diverse positions and arguments on a specific topic related to 'ethics in biological research'. In HS 2026 the topic is: The Ethics of Rare Disease. Rare diseases are medical conditions that affect less than 1 in 2000 people. This situation raises various ethical questions about duties and responsibilities of policy makers, researchers, other stakeholders, and society as a whole. Precisely because these diseases are so rare, diagnosis is often difficult and the availability of effective treatments is limited. Moreover, the small number of patients is a challenge for clinical studies and provides little incentive for pharmaceutical companies to invest in developing treatments.

We will read different papers about the challenges faced by patients as well as society associated with rare diseases and discuss different ethical positions which build on ethical concepts such as justice, solidarity and autonomy.

ECTS: 3

Notes:

Der Kurs findet im Raum Y55-L-06/08 statt.

Learning Outcome:

By the end of the seminar, students should be able to:

- Understand the different ethical issues raised by rare diseases.
- Be able to discuss the challenges of rare disease from different perspectives (as a society, patient, researcher, relative, care taker etc.).
- Recognise recurring argumentation lines both for and against responsibilities in the context of rare diseases.
- Critically assess arguments and construct well-reasoned counter-arguments.

Identify and analyse the ethical theories underlying various arguments in the discourse.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Anna Deplazes Zemp

Requirements:

Assessment:

Students are expected to attend the seminar regularly, to complete the assigned readings and to submit written responses to the weekly study questions.

They should also contribute to one group presentation and help prepare a handout.

Assessment will be based on two of the written responses to the study questions, as well as the group presentation, and the accompanying handout.

There will be no exam or test.

Grading Scale:

1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Module Biochemistry of reactive oxygen species

04SMCHE24001 / Course

Description:

General description:

Reactive oxygen species (ROS) are a collective of chemical entities of various degrees of reactivity that are derived from oxygen, and serve as intra- and intercellular messengers.

ROS buildup and inactivation is determining the cellular redox status that, together with ROS signaling role, is a prerequisite for all basic cellular processes such as: cell cycle progression, proliferation, migration, angiogenesis, self-renewal, autophagy and cell death. Cellular metabolism, gene expression and activation of cell signaling cascades are also modulated through ROS signaling. In developing embryo, ROS are also important for orchestrating and fine-tuning the processes of a proper development.

In disease, the most visible role of ROS is pathogen elimination through different types phagocytic cells such as leukocytes as a first line of defense. However, their implication in the onset and progression as well as the outcome of therapy is all-present having been documented for every disease and pathology.

This course is addressing a fast growing enormous but overlooked knowledge on the role of ROS, specifically:

- The role of oxygen in the maintenance of aerobic life on Earth with the emphasis on its role in metabolic reactions and its signaling products - ROS
- Biochemistry of ROS in detail with its implications for biological processes and disease pathology.
- Sources of ROS production, in particular NADPH oxidases
- Oxygen sensing and hypoxia. The role of the family of hypoxia- inducible factors
- Therapeutic potential of ROS inhibition

Module PHY 466DP Introduction to Applied Deep Learning

07SMPHY466DP / Lecture with Practical Exercises

Description:

General description:

The course will provide an introduction to Deep Learning, with special emphasis to its application to research in fundamental science. After an introduction of basic Machine Learning concepts, it will introduce several kinds of deep neural networks (fully connected, convolutional, etc.) and different learning strategies (supervised, unsupervised). The course will consist of lectures and hands-on sessions, as well as tutorials from invited speakers.

ECTS: 1

Learning Outcome:

Designing and training a neural network to solve various kinds of tasks (classification, regression, clustering, anomaly detection) on various kinds of data (images, sequences, point clouds).

Target Groups:

Students in experimental and theoretical physics, and mathematics.

Languages of Instruction:

English

Course Materials:

Students will be provided with jupyter notebooks for hands-on sessions. A laptop/tablet and a google account will be required.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Florenca Canelli

Requirements:

Prior Knowledge:

Basic knowledge of python coding, jupyter notebooks, and linear algebra.

Assessment:

Oral examination

Grading Scale:

Module MAT 105 Elementary Number Theory

07SMMAT105 / Course

Description:

General description:

Elementary number theory studies the natural numbers, their indivisible atoms the primes, and their fractions, the rational numbers. We will revisit (with proofs !) basic properties of numbers you encountered in school (e.g., a number is a multiple of 3 if the sum of its digits is a multiple of 3, square root of 2 is not a fraction, ...), and explore new fields of expression (modular arithmetic, continued fractions, quadratic forms) through the tools and tricks developed by the early modern number theorists Fermat, Euler, Lagrange, Legendre, and Gauss. Gauss said "Mathematics is the queen of the sciences, and number theory is the queen of mathematics." In A Mathematician's Apology (1940), G.H. Hardy insisted on the "purity" of number theory, the intrinsic beauty of its fascinating questions being bared from purposeful applications. (For context: Hardy was an anti-war activist.) Contrarily to his belief, the advent of computers and advances in cryptology turned out to be a very fertile ground for number theory. We will also give a glimpse into applications of number theory in this context.

ECTS: 3

Notes:

Mathematical Field: Algebra, Analysis

Learning Outcome:

This is a first-semester course in elementary number theory.

Its aim is three-fold:

- (1) Introduce students to rigorous mathematical reasoning;
- (2) Introduce notions of algebra and analysis in context;
- (3) Present classical pearls of number theory and current open problems in the field.

Target Groups:

Elective for Math BSc Major students of the 1st semester/
BSc Minor students 30 or 60 at the beginning of their Math studies.

If you have already successfully passed all the four core modules of the first year (MAT111 Lineare Algebra I, MAT121 Analysis I, MAT112 Lineare Algebra II and MAT122 Analysis II), then this module is NOT for you.

Course Materials:

- Lecture notes will be distributed
- H. Davenport The Higher Arithmetic, Cambridge University Press, 8th Ed.
- J. Watkins Number Theory: A Historical Approach, Princeton University Press

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Claire Burrin

Requirements:

Prior Knowledge:

No prior knowledge needed - this course is designed for first semester students

Assessment:

Written Exam (repetition exam may also be oral)
To be able to write the exam you will need to pass the Testat (mandatory)

exercises)

Language of Assessment: English

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Module FIM 101 Computational Probability and Simulation

07SMFIM101 / Lecture with Practical Exercises

Description:

General description:

This lecture aims at providing students with a solid foundation in the principles of probability theory and the application of computational methods to analyze and simulate probabilistic events.

Key Topics Covered:

1. Probability fundamentals, based on measure theory: sample spaces, events, conditional probability, independence, random variables, and probability distributions.
2. Discrete and Continuous Distributions: Studying common discrete distributions (e.g., binomial, Poisson, hypergeometric) and continuous distributions (e.g., normal, exponential, uniform) and their applications.
3. Monte Carlo Simulation: Introduction to Monte Carlo methods and their significance in solving complex mathematical and probabilistic problems.
4. Random Number Generation: Techniques for generating random numbers and their crucial role in Monte Carlo simulations.
5. Statistical Inference: Understanding the principles of statistical inference, including hypothesis testing and confidence intervals, and applying these concepts in simulations.
6. Basic real-world applications of computational probability and simulation in fields such as finance, engineering, operations research, and data science

ECTS: 9

Notes:

Mathematical Field: Stochastics

IMPORTANT: According to the FIM study regulation: Students with MAT 901 as a compulsory module in the major study program replace FIM 101 of the minor study program with additional elective modules of at least 9 ECTS.

Therefore Math Major students cannot book FIM101, Math Minor students may if they are not taking MAT901 Stochastics.

Learning Outcome:

Understanding the basic concepts of the theory of probability and numerical simulation and gaining a first understanding of complex real- world problems that involve randomness and uncertainty

Target Groups:

- Advanced BSc and MSc students with FIM Minor (who are not taking FIM101 or MAT901 Stochastics in their Major)
- AMML BSc Major and Minor students in their 3rd semester
- APS Minor students who are interested in the topic and taking it as an elective

Course Materials:

Lecture notes and bibliography provided during the lecture.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Delia Coculescu

Requirements:

Prior Knowledge:

First year Linear Algebra and Analysis (eg MAT141 Linear Algebra for Natural

Sciences or MAT182 Analysis for Natural Sciences)
Mathematics students who are taking MAT901 Stochastics are replacing FIM101
with electives

Assessment: Written exam and possibly small projects

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module Emotional, Motivational and Social Effects in Learning with Digital Media

06SM222EMSE / Module

Description:

General description:

Lernen mit digitalen Medien setzt zwar voraus, dass das entsprechende Lernmedium kognitiv verarbeitet werden kann, jedoch spielen beim Lernen mit digitalen Medien auch emotionale, motivationale und soziale Prozesse eine wichtige Rolle. Im Seminar sollen Erweiterungen kognitiver Theorien zum Lernen mit digitalen Medien vorgestellt und besprochen werden. Aus diesen Theorien lassen sich eine Vielzahl von Gestaltungsempfehlungen für digitalen Lehr-/Lernmedien ableiten, die die Verarbeitung von Informationen moderieren. Das Seminar dient damit dazu, neben kognitiven Effekten auch soziale, emotionale und motivationale Prozesse beim Lernen mit digitalen Medien zu erkennen und bei der Gestaltung und/oder Auswahl von Medien nutzbar zu machen.

ECTS: 3

Learning Outcome:

Kennenlernen, Reflexion und kritisches Hinterfragen von Theorien und Forschungsstand zu emotionalen, motivationalen und sozialen Prozessen des Lernens; Erlernen von Fähigkeiten zur Ableitung von Designprinzipien für Lehr-Lern-Umgebungen aus Theorie und Forschungsstand; Anwenden von Theorie und Forschungsstand auf verschiedene Unterrichtskontexte.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Sascha Schneider

Requirements:

Prerequisites:

Diese Lehrveranstaltung ist eine Wahlpflichtveranstaltung für Studierende des Studiengangs "Lehrdiplom für Maturitätsschulen". Sie ist für Studierende im MA Studiengang geöffnet. Sie müssen die Veranstaltung via Buchungstool buchen. Die Buchung gilt als verbindliche Anmeldung zur Veranstaltung.

Assessment:

Portfolio: Blitzlichtreferat & Poster. Das Modul wird als bestanden bewertet, wenn beide Elemente des Portfolios bestanden sind.

Grading Scale:

Pass/Fail

Repeatability:

repeatable once, book again

Module BME 364 Mechanisms of allergic disease

07SMBME364 / Block Course

Description:

General description:

This course explores the immunological and molecular mechanisms underlying allergic diseases. Students will study the pathophysiology, diagnosis, and treatment of conditions such as asthma, food allergies, and atopic dermatitis. The course combines lectures, practical laboratory sessions, and case studies to provide a comprehensive understanding of both theoretical and clinical aspects of allergy. By examining current research, diagnostic methods, and emerging therapies, students will gain the skills needed to contribute to advancements in allergy treatment and management.

The practical part of this course (10-13 Nov) will be organized at the SIAF in Davos, and students will need to cover travel expenses and a part of the accommodation costs by themselves.

ECTS: 6

Notes:

This course will take place partially in Zurich and partially at the Swiss Institute of Allergy and Asthma Research in Davos.

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Learning Outcome:

1. Students will be able to assess the methodologies used in diagnosing allergic diseases (e.g. skin tests, serological tests, and challenge tests) and the current therapeutic strategies (e.g. pharmacotherapy, immunotherapy, and novel biologic treatments). They will understand their mechanisms, applications, and limitations.
2. Students will acquire the skills to design, conduct, and analyze experiments related to allergic disease research. This includes the ability to formulate research questions, choose appropriate experimental models, apply relevant immunological and molecular biology techniques, and interpret findings in the context of current scientific literature.
3. Students will be able to synthesize and communicate scientific information effectively, both in writing and orally. This includes writing clear and concise research proposals, critically reviewing scientific literature, and presenting research findings or theoretical arguments.

Module Real Estate Economics (S)

03SM22MO0238 / Seminar

Description:

General description:

The course aims to provide students with a theoretical and empirical understanding of the functioning of real estate markets with a particular focus on the price determination in land and real property markets. Topics covered include: Housing demand and supply; the role of the government in real estate markets; the economic impact of land and housing market regulations (land use planning) on housing market outcomes; estimating supply and demand price elasticities, real estate cycles; the role of credit conditions; price vs. rent dynamics; commercial vs. residential real estate cycles, determinants of homeownership; externalities of homeownership; policy evaluation of mortgage subsidies.

ECTS: 3

Notes:

Maximum number of participants: 30 students

For details on the application process, visit: www.df.uzh.ch/en/studies/bachelor-master/master/ma-seminars.html#Master:_Real_Estate_Economics (https://www.df.uzh.ch/en/studies/bachelor-master/master/ma-seminars.html%23Master:_Real_Estate_Economics)

The seminar will take place from August 31 to September 4, 2026.

Learning Outcome:

1. Students have a good understanding of how various levels of government affect real estate markets and in particular prices and rents.
2. Students can explain how demand and supply interact in land and real property markets to determine prices and how, why, and when property price cycles (and 'bubbles') emerge.
3. Students demonstrate a good understanding of the determinants of homeownership and the welfare implications associated with homeownership (financing) subsidies.
4. Students can apply theoretical concepts and build on empirical evidence to discuss how specific policy interventions including land use regulations may affect land and real property markets.

Target Groups:

Master students interested in Real Estate Economics.

Languages of Instruction:

English

Course Materials:

A topic-specific reading list of journal articles will be provided.
Students are additionally expected to conduct online investigations and data collections to inform their group presentations.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Christian Hilber

Requirements:

Prerequisites:

Bachelor's degree in economics, business administration or in banking and finance

Prior Knowledge:

This seminar is for Master students.

Assessment: The grade will be determined by group presentations (100%).
The grade consists of preparations + slides (50%) and presentation + Q&A (50%).

The presentations will take place on Friday, 4 September 2026.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module BIO 517 Master Thesis in Cancer Biology “BCi”, at the crossroad of basic and clinical research
07SMBIO517 / Master Paper / MA-Arbeit MNF

Description:

General description:

This module represents the Master Thesis in Cancer Biology for the students enrolled in the “BCi” subprogram (Basic + Clinical Research; complemented with an internship in industry, i.e. BIO527 as Optional Core Module). It comprises 52 weeks of practical activity on a research project co-supervised by a PI in basic cancer research and a PI in clinical cancer research. Such co-supervised projects are specifically available for the “BCi” subprogram, after having been identified and approved by the MSc coordinator. A written thesis documents the research and is the basis of assessment.

ECTS: 60

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Massimo Lopes

Requirements:

Prerequisites: Bachelor degree in Biology, Biomedicine, or Biochemistry completed.

Assessment: Master thesis

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Semester)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Module BIO 527 Internship in Industry on Experimental Cancer Research (6-months)

07SMBIO527 / Praktikum extern / Berufspraktikum

Description:

General description:

The internship comprises 26 weeks of experimental cancer research within a biotech company in Switzerland, which has expressed interest in hosting students and has sufficient personnel and infrastructure to offer direct supervision. The internship takes place after completion of the MSc thesis within the BCI subprogram of the MSc in Cancer Biology (BIO517 + BIO520 exams). A written, confidential report (ca. 5 pages) documents the research during the internship and is the basis for assessment by the MSc coordinator.

ECTS: 6

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Massimo Lopes

Requirements:

Prerequisites: Only for students of the sub-program Basic/Clinical – internship of the MSc Biology concentration Cancer Biology.

Assessment: Written report

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Module KRI 208 Thin Films Technology: From Fundamentals to Oxide Electronics

07SMKRI208 / Lecture with Practical Exercises

Description:

General description:

Oxide films with a thickness of just a few atoms can now be grown with a precision matching that of semiconductors. This opens up a whole world of functional device concepts and fascinating phenomena that would not occur in the expanded bulk crystal.

We will give an introduction to thin films deposition techniques and applications with a focus on the growth of multifunctional oxide thin films.

A lab visit will be organized and students will participate to the design of thin films with atomic precision.

General description of the leading deposition routes including physical and chemical vapor deposition techniques (PVD and CVD) as well as so called "wet techniques" (e.g. spin coating and spray pyrolysis).

Growth modes and processes.

Part of the course discusses vacuum technologies.

Fundamental characterization techniques for application-relevant thin films as well as state of the art approaches for in situ and ex-situ determination of the structural, chemical and ferroic (ferromagnetic and ferroelectric) properties of films: (XRD for thin films, RHEED, EDX, scanning probe microscopy techniques, laser-optical characterization and many more)

Epitaxy for the advanced design and characterization of high quality thin films for energy efficient oxide electronics.

Types of ferroic order, multiferroics, multifunctional oxide materials, epitaxial strain related effects, oxide thin film based devices and examples.

Regular discussions on preselected scientific literature and mini-seminars will be organized.

ECTS: 5

Notes:

Module together with ETH (Lerneinheit 327-2210-00L), takes place at ETH.

This module can't be booked at the UZH. Students of the UZH, please, register at the ETH and book the module through the ETH-system: ethz.ch/de/studium/non-degree-angebote/fachstudierende/fachstudierende-uzh.html
After completion of the module your grade and ECTS will be transferred automatically to the UZH-system.

Learning Outcome:

In this course students will obtain an overarching view on thin film deposition techniques with a focus on epitaxial deposition processes. The main learning objectives are:

- Identification of most relevant deposition technique for a given application.
- Understanding of growth mechanism and growth modes.
- Understanding strategies for engineering the functionalities of the films using the deposition process.
- Selection of the most appropriate characterization technique.
- Understanding device concepts and fundamental limits in the technology relevant ultra-thin limit.
- Assessing the relevance of scientific literature dealing with complex oxide thin films.

Languages of Instruction:

english

Merkmale:

Responsible instructor: Bernhard Spingler

Requirements:

Assessment: written 90 minutes

Regular presentations and discussion sessions will be organized to identify critical aspects of the scientific literature dealing with oxide thin films. Students will present in class the main results of pre-selected scientific publications within the context of the ongoing lectures. Students who complete all assignment (uploading their presentation slides) will benefit from a 0.25 Bonus on the final grade.

(for more details refer to ETH lecture catalog)

Module Digital Business Innovation (L)

03SM22MI0042 / Course

Description:

General description:

This module shows how companies use information technology to drive digitalization and innovation. Students master essential frameworks for business modeling and innovation methods and apply these directly to real-life scenarios. The module concludes with a joint project in which students tackle an industry-relevant challenge and develop an original business concept from the idea to a presentable prototype.

ECTS: 3

Learning Outcome:

- Students are able to outline and describe the basics of innovative IT-supported business models, the key techniques for their creation and creativity techniques.
- Students are able to describe methods for evaluating business innovations and apply at least one evaluation method.
- Students are able to critically analyze real-world scenarios.
- Students are able to develop and communicate their own problem-solving concepts for business innovations.
- Students are able to create simple prototypes.
- Students are able to exchange ideas on their own and others' solution concepts.

Target Groups:

MA-Students

Description:

General description:

This class offers a comprehensive introduction to the field of Reinforcement Learning (RL). Students will explore the core challenges and various approaches within RL. By the end of the course, students will be well-versed in the key concepts and techniques essential for mastering Reinforcement Learning.

ECTS: 6

Learning Outcome:

By the end of the course, students will understand the key concepts of Reinforcement Learning (RL). Specifically, students will be able to:

- Define the key features of RL that distinguishes it from the other fields in Machine Learning
- Implement common RL algorithms in code.
- Describe various criteria for analyzing RL algorithms and evaluate them based on metrics such as regret, sample complexity, computational complexity, empirical performance, and convergence, as assessed through assignments.
- Formulate and solve sequential decision-making problems using relevant RL tools.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Giorgia Ramponi

Requirements:

Prerequisites:

- Proficiency in Python
- Calculus, Linear Algebra: you should be comfortable taking derivatives and understanding matrix vector operations and notation.
- Basic Probability and Statistics: You should know basics of probabilities, Gaussian distributions, mean, standard deviation, etc.
- Foundations of Machine Learning

Prior Knowledge:

The lecture includes a mixture of calculus, analysis and statistics, so a good understanding of math is required. The exercise will use the Python programming language, which is content of AINF1166: Informatics I.

Assessment:

- Project (40%)
- Final written exam (60%) onsite on 12 January 2027, 16:00-18:00

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Module Reinforcement Learning for Doctoral students (L+E)

03SMDINF1152 / Lecture with Practical Exercises

Description:

General description:

This class offers a comprehensive introduction to the field of Reinforcement Learning (RL). Students will explore the core challenges and various approaches within RL. By the end of the course, students will be well-versed in the key concepts and techniques essential for mastering Reinforcement Learning.

ECTS: 3

Notes:

The module takes place in the same room as the module MI0043

Learning Outcome:

By the end of the course, students will understand the key concepts of Reinforcement Learning (RL). Specifically, students will be able to:

- Define the key features of RL that distinguishes it from the other fields in Machine Learning
- Implement common RL algorithms in code.
- Describe various criteria for analyzing RL algorithms and evaluate them based on metrics such as regret, sample complexity, computational complexity, empirical performance, and convergence, as assessed through assignments.
- Formulate and solve sequential decision-making problems using relevant RL tools.

Module PHY473 Astroparticle Physics and Cosmology

07SMPHY473 / Lecture with Practical Exercises

Description:

General description:

This class introduces astroparticle physics with a focus on experimental methods and contemporary research. We will study the conceptual basics needed from particle physics and cosmology, the origin of the Universe, Nucleosynthesis and supernovae, detection & measurement techniques, cosmic rays-, neutrino-, dark matter, dark energy and gravitational-wave physics, and end with multi messenger astronomy and the connection to other fields.

ECTS: 8

Learning Outcome:

- Particle physics basics including interactions
- Interaction and detection of particles, observational techniques and methods
- Analysis basics, concepts of backgrounds and foregrounds
- Origin and development of the modern Universe
- Today's cosmological methods and its motivation
- Cosmic rays, history and present status
- Dark matter motivation, candidates and measurements
- Dark energy motivation, candidates and measurements
- Neutrino physics and neutrino astronomy
- Discovery of gravitational waves
- Open questions in astroparticle physics
- Multimessenger physics
- Interdisciplinary connections

Target Groups:

Advanced Master Students

Languages of Instruction:

English

Course Materials:

Books tba, lecture notes will be provided

Merkmale:

Module Seminar Immobilien

03SM22BO0133 / Seminar

Description:

General description:

Das Seminar soll den Studierenden eine Übersicht über die Anlageklasse Immobilien in der Schweiz bieten. Folgende Punkte werden während dem Seminar behandelt:

- Übersicht über den Immobilienmarkt in der Schweiz
- Immobilien als Anlagevehikel
- Aktuelle Trends in der Immobilienbranche (CH und EU)
- Deals und Transactions in der Immobilienbranche
- Buchhalterische und regulatorische Grundlagen bei der Prüfung von Immobilienanlagevehikeln
- Grundlagen der Immobilienbewertung
- Steuerliche Aspekte in der Immobilienbranche
- ESG in der Immobilienbranche
- AI in Real Estate

Nach Abschluss des theoretischen Teils sollen die Studierenden eine Gruppenarbeit schreiben und diese in einer kurzen Präsentation vorstellen.

ECTS: 3

Notes:

Die Veranstaltung findet vor Ort bei PwC in Oerlikon statt.

Die Teilnehmendenzahl ist beschränkt.

Es ist eine Bewerbung über OLAT bis am 20. September 2026 erforderlich.

Weitere Hinweise unter:

www.df.uzh.ch/de/studies/bachelor-master/bachelor/ba-seminare.html#Bachelor:_Seminar_Immobilien (<https://www.df.uzh.ch/de/studies/bachelor-master/bachelor/ba-seminare.html>)

Learning Outcome:

Während des Seminars sollen den Studierenden die folgenden Lernziele vermittelt werden.

- Erarbeitung einer Übersicht über den Immobilienmarkt in der Schweiz, über die Immobilien als Anlagevehikel und über die Megatrends in der Immobilienbranche (CH und EU)
- Erlernen der Grundtechniken mittels einer geführten Case Study in den Bereichen Deals und Transactions, Immobilienbewertung, buchhalterische und regulatorische Vorgaben bei der Prüfung und steuerlichen Aspekten in der Immobilienbranche

Die Studierenden wählen anschliessend ein vorgegebenes Thema im Zusammenhang mit den obigen Themen für die Seminararbeit aus. Nach Abschluss der Seminararbeit soll diese kurz präsentiert werden.

Target Groups:

Bachelor-Studierende im 5. Semester

Languages of Instruction:

Deutsch

Course Materials:

Unterrichtsmaterialien werden durch den Veranstalter zur Verfügung gestellt.

Merkmale:

Responsible instructor: Michel Habib

Requirements:

Module STA 402 Likelihood and Regression I

07SMSTA402a / Lecture with Practical Exercises

Description:

General description:

Basics of statistical inference, including an introduction to the concept of likelihood and the discussion of likelihood functions of a large variety of statistical models, properties of maximum likelihood estimates, standard errors, score functions and Fisher information. Tests and confidence intervals based on the Wald, Score, and Likelihood Ratio statistics. Likelihood concepts are applied to simple regression problems, starting with the two-sample problem where different concepts of comparing distributions and corresponding parameterisations are discussed. Models for simple and multiple regression for binary, ordered, count, or continuous outcomes are introduced, including generalised regression and transformation models. Model residuals and model generalisations, such as distribution regression, are introduced mainly as devices for model criticism.

(Note: This is the new Module that consists of the old half semester Modules STA402 Likelihood Inference and STA406 Generalized Regression. Likelihood and Regression II follows in spring)

ECTS: 7

Notes:

If you already took the old Module STA402 Likelihood Inference, but not the old STA406 Generalized Regression or vice versa and you would like to book the module/complete your mandatory modules, please send an email to studium at math.uzh.ch or masterbiostat at math.uzh.ch

Target Groups:

Students of the Master program Biostatistics,

Students of the Minor Program in Applied Probability and Statistics

Interested students of the Bachelor (3rd semester up) and Master program Mathematics

There is no PhD Module anymore

Course Materials:

- Fahrmeir, L., Kneib, T. and Lang, S. (2013) Regression: Models, Methods and Applications
- Tutz, G. (2012). Regression for Categorical Data
- Fahrmeir, L., Kneib, T. and Lang, S. (2013) Regression: Models, Methods and Applications
- Tutz, G. (2012). Regression for Categorical Data

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Torsten Hothorn

Requirements:

Prior Knowledge:

Basic knowledge of the programming language R, sufficient knowledge in calculus, linear algebra, probability, statistics

Assessment:

- Active participation in the lecture and the exercises: checked through activity in discussions, presenting solutions and/or turning in exercises.
- Successful participation in the exercises is a prerequisite for admittance to the exam.
- Written exam, repetition exams may be oral.
- Further details are announced in the lecture.

Module Elective Module: Introduction to Machine Learning in Biomedicine

04SM25MAS002 / Sonstiges

Description:

General description:

- Overview of ML, Data Preprocessing and Data Exploration
- Supervised Learning: Regression & Supervised Learning: Classification & Advanced Classification Techniques
- Unsupervised Learning: Clustering and Dimensionality Reduction
- Neural Networks and Deep Learning & Advanced Neural Networks and Deep Learning
- Model Evaluation and Validation & Ethical Considerations and Interpretability in ML
- Using Python and Python libraries, such as Skikit-Learn and Pytorch, for applying ML algorithms

ECTS: 4

Learning Outcome:

Upon completion of this course, participants will (1) understand advanced unsupervised and supervised machine learning (ML) algorithms, together with their properties; (2) be trained in applying them to different ML and data processing tasks using Python libraries and exemplary biomedical datasets; (3) will know how to evaluate ML systems in a systematic fashion, e.g., for medical decision making, and how to use them to analyze complex datasets.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Bjoern Menze

Requirements:

Assessment:

To pass, MeF students are required to:

1. Pass two written on site exams (mid-term, final) with Q&A and a programming quiz. The Q&A will deal with concepts of different ML algorithms, their application domains, parameterization, and quantitative evaluation. A coding exercise will require the generation of pseudo code for fulfilling a predefined task, and require transforming given pseudocode into functional Python functions (e.g., using a Python notebook in Colab).
2. As an option (opt in), students can participate in a seminar style paper presentation that will require them to choose a recent (i.e., advanced) ML algorithm, and illustrate the use of its freely available code in a small demonstrator project. Choosing this option will require students to attend two additional practical programming courses for preparing the presentation, and to attend the final presentation itself. If chosen, the paper presentation will account for 50% of the final grade.

Grading Scale:

Pass/Fail

Repeatability:

Can't be repeated

Module EEE 262 Environmental Policy of Switzerland

07SMEEE262 / Course

Description:

General description:

Diese Vorlesung bildet eine solide Grundlage für weitere Lehrveranstaltungen zu Umweltpolitik im Studienprogramm Biodiversität. Hier lernen wir am Beispiel des politischen Systems der Schweiz die wichtigsten politischen Institutionen, Akteure, Prozesse und Handlungsprogramme kennen, welche Umweltthemen auf die politische Agenda bringen, daraus Politikinhalte formulieren und diese letztlich umsetzen. Wir betrachten Umweltpolitik in ihren Anfängen, studieren ihre Entwicklung und evaluieren die aktuellen Politiken. Daraus leiten wir die Hürden, Herausforderungen und Chancen für die Umweltpolitik im Allgemeinen und die Biodiversitätspolitik im Speziellen ab. Ausgewählte Gastvorträge bieten die Chance Umweltpolitik aus unterschiedlichen Perspektiven (Verwaltung, Parlament, NGO und Aktivismus) kennenzulernen.

ECTS: 3

Notes:

Prüfung findet in der letzten Vorlesungsveranstaltung statt. Repetitionsprüfung s. link <https://www.mnf.uzh.ch/de/studium/pruefungen.html> Bitte melden sie sich für die Wiederholungsprüfung nicht später als drei Wochen vor der Prüfung beim Modulverantwortlichen an.

Learning Outcome:

Nach erfolgreichem Abschluss der Lehrveranstaltung sollten Sie die Fähigkeit erworben haben,

- grundlegende Fragenstellungen der Umweltpolitik zu verstehen und widerzugeben.
- die wichtigsten Institutionen und Akteure im politischen Prozess zu identifizieren.
- die unterschiedlichen Phasen des Policy-Zyklus zu erklären.
- die relevanten politischen Instrumente zur Adressierung passender umweltpolitischer Probleme zu nennen.
- die Besonderheiten und Herausforderungen der Regulierung von öffentlichen Gütern (wie reine Luft, sauberes Wasser, intakte Biodiversität, etc.) zu erklären.

Module STA 404 Clinical Biostatistics

07SMSTA404 / Lecture with Practical Exercises

Description:

General description:

Uncertainty is the rule in medicine and the science of managing medical uncertainty is biostatistics. The aim of the lecture "Clinical Biostatistics" is to give students an introduction to the most important statistical methods used in different areas of clinical research. First, quantifying clinical measurement error is central to the analysis of diagnostic studies and the assessment of agreement.

Second, the randomized controlled trial (RCT) is the key concept to assess therapy, and advanced statistical methods are used in the design, implementation and analysis of RCTs. Finally, techniques for meta-analysis will be discussed.

The following topics will be addressed: Confidence intervals for proportions, analysis of diagnostic studies, ROC curves, analysis of agreement, randomized controlled trials, hypothesis tests and sample size calculation, randomization and blinding, analysis of continuous and binary outcomes, multiplicity, subgroup analysis, protocol deviations, some special designs (crossover, equivalence, and cluster-randomized trials), principles of survival analysis, meta-analysis.

ECTS: 7

Notes:

Please note that the time between noon and the lab session should be reserved for the preparation of the lab session in groups.

PhD students in Clinical Science, Care and Rehabilitation Sciences, and Epidemiology and Biostatistics must book the module STA 404DP Clinical Biostatistics.

Target Groups:

- Students of the Master program in Biostatistics

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Leonhard Held

Requirements:

Assessment:

- Active participation in the exercises and the lab: checked through activity in discussions and presentations.
- The preparation for the lab is group work, groups will be meeting between lecture and lab (12-15).
- Successful participation in the exercises and the lab is a prerequisite for admittance to the exam.
- Written exam in January, repetition exams in June may be oral.
- Further details are announced in the lecture.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module Seminar: Prompt Engineering: Innovation Through Generative AI (BSc)

03SM22BIS026 / Seminar

Description:

General description:

Generative AI is changing how people develop ideas, create content, solve problems, and design digital products and services. Effective use of these systems requires more than finding the right wording for a single prompt. It involves understanding model capabilities and limitations, systematically designing and testing interactions, providing appropriate context, evaluating outputs, and making responsible decisions about when and how generative AI should be used.

This seminar bridges the gap between traditional machine learning and the advanced techniques of generative AI, particularly in natural language processing and large language models (LLMs). Through targeted use of prompt engineering, specific AI outputs tailored to the needs and challenges of users, customers, and modern organizations can be generated.

The course provides an in-depth introduction to the mechanisms and applications of prompt engineering, supported by practical examples and projects that students can directly apply to their ideas. Initially, the course covers the basics of natural language processing and the construction and deployment of LLMs. Participants will learn how to effectively utilize these technologies through prompt techniques to create user-centric innovations.

Course Content and Methodology:

1. Foundations and Principles of NLP and LLMs:

- Understanding the technical foundations and evolutionary development of NLP and LLMs.
- Detailed examination of the architectures and functionalities of leading language models like GPT and BERT.

2. Introduction to Prompt Engineering:

- Learning the principles and techniques of steering AI model performance through specific inputs (prompts).
- Analysis of use cases where prompt engineering is effectively employed for business innovation.

3. Scientific Application and Prototyping:

- Developing prototypes demonstrating the application of prompt engineering in real scenarios.
- Conducting scientific projects in teams to promote collaborative and practical experience.

4. Legal, Ethical, and Social Aspects of AI Use:

- Discussion on data privacy, responsibility in AI deployment, and avoiding biases.

Participants will not only acquire theoretical knowledge but also develop practical skills enabling them to consciously and effectively utilize generative AI technologies. The goal is to empower students to fully exploit the opportunities and challenges of AI technologies for innovative business solutions through a combination of theoretical understanding and practical application.

ECTS: 6

Notes:

The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>.

Application for this seminar is via the new module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>

Learning Outcome:

Upon completing the course, students will be able to:

- Explain developments, basic principles, and technical mechanisms of NLP and Large Language Models.
- Practically implement the use of prompt engineering to control generative AI models in various application areas.
- Design creative and effective prompts to craft innovative solutions for specific tasks or problems.
- Critically analyze ethical, legal, and social challenges of AI technologies and promote responsible AI applications.
- Document the entire development process of an AI-supported project clearly and structured in a scientific paper according to ACM format.
- Effectively integrate prompt engineering into existing structures to enhance operational efficiency and innovation capacity.
- Apply research methods and techniques for critical analysis and evaluation of generative AI models and their applicability and impacts.

Target Groups:

BA students, especially those interested in Information Systems and Computer Science.

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Gerhard Schwabe

Requirements:

Prior Knowledge: Programming skills in Python and an understanding of machine learning are helpful but not mandatory.

Assessment:

-

Group Innovation project (70%):

- Creation and evaluation of a prototype (20%): Students will in small teams develop and evaluate a prompt-engineering-based prototype that addresses a user-centered innovation. Both the technical and conceptual aspects of the prototype will be assessed.
- Composition of a scientific paper (30%): Each team will write an 8–12-page scientific paper in ACM format documenting the development process, technical implementation, evaluation, and user-centered design of the prototype.
- Mid-term pitch and final presentation and discussion of the paper and prototype (20%): Each team will present the main contribution, implementation, and evaluation of the project and respond to questions.

Individual Assessment (30%):

- Individual handbook chapter: Each student will independently author a research-based handbook chapter of approximately 2,500–3,500 words on a topic related to the seminar. The topics will be given and distributed at the beginning of the seminar. The chapter should synthesize relevant scientific literature, include concrete examples or an evaluation, and critically discuss limitations and responsible-use considerations. The chapter will be assessed individually and should be organized according to the given template.

Module Seminar: Prompt Engineering: Innovation Through Generative AI (MSc)

03SM22MIS026 / Seminar

Description:

General description:

Generative AI is changing how people develop ideas, create content, solve problems, and design digital products and services. Effective use of these systems requires more than finding the right wording for a single prompt. It involves understanding model capabilities and limitations, systematically designing and testing interactions, providing appropriate context, evaluating outputs, and making responsible decisions about when and how generative AI should be used.

This seminar bridges the gap between traditional machine learning and the advanced techniques of generative AI, particularly in natural language processing and large language models (LLMs). Through targeted use of prompt engineering, specific AI outputs tailored to the needs and challenges of users, customers, and modern organizations can be generated.

The course provides an in-depth introduction to the mechanisms and applications of prompt engineering, supported by practical examples and projects that students can directly apply to their ideas. Initially, the course covers the basics of natural language processing and the construction and deployment of LLMs. Participants will learn how to effectively utilize these technologies through prompt techniques to create user-centric innovations.

Course Content and Methodology:

1. Foundations and Principles of NLP and LLMs:

- Understanding the technical foundations and evolutionary development of NLP and LLMs.
- Detailed examination of the architectures and functionalities of leading language models like GPT and BERT.

2. Introduction to Prompt Engineering:

- Learning the principles and techniques of steering AI model performance through specific inputs (prompts).
- Analysis of use cases where prompt engineering is effectively employed for business innovation.

3. Scientific Application and Prototyping:

- Developing prototypes demonstrating the application of prompt engineering in real scenarios.
- Conducting scientific projects in teams to promote collaborative and practical experience.

4. Legal, Ethical, and Social Aspects of AI Use:

- Discussion on data privacy, responsibility in AI deployment, and avoiding biases.

Participants will not only acquire theoretical knowledge but also develop practical skills enabling them to consciously and effectively utilize generative AI technologies. The goal is to empower students to fully exploit the opportunities and challenges of AI technologies for innovative business solutions through a combination of theoretical understanding and practical application.

ECTS: 6

Notes:

The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>.

Application for this seminar is via the new module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>

The seminar takes place in the same rooms as the bachelor seminar BIS026.

Learning Outcome:

Upon completing the course, students will be able to:

- Explain developments, basic principles, and technical mechanisms of NLP and Large Language Models.
- Practically implement the use of prompt engineering to control generative AI models in various application areas.
- Design creative and effective prompts to craft innovative solutions for specific tasks or problems.
- Critically analyze ethical, legal, and social challenges of AI technologies and promote responsible AI applications.
- Document the entire development process of an AI-supported project clearly and structured in a scientific paper according to ACM format.
- Effectively integrate prompt engineering into existing structures to enhance operational efficiency and innovation capacity.
- Apply research methods and techniques for critical analysis and evaluation of generative AI models and their applicability and impacts.

Target Groups:

MA students, especially those interested in Information Systems and Computer Science.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor: Gerhard Schwabe

Requirements:

Prior Knowledge: Programming skills in Python and an understanding of machine learning are helpful but not mandatory.

Assessment: Group Innovation project (70%):

- Creation and evaluation of a prototype (20%): Students will in small teams develop and evaluate a prompt-engineering-based prototype that addresses a user-centered innovation. Both the technical and conceptual aspects of the prototype will be assessed.
- Composition of a scientific paper (30%): Each team will write an 8–12-page scientific paper in ACM format documenting the development process, technical implementation, evaluation, and user-centered design of the prototype.
- Mid-term pitch and final presentation and discussion of the paper and prototype (20%): Each team will present the main contribution, implementation, and evaluation of the project and respond to questions.

Individual Assessment (30%):

- Individual handbook chapter: Each student will independently author a research-based handbook chapter of approximately 2,500–3,500 words on a topic related to the seminar. The topics will be given and distributed at the beginning of the seminar. The chapter should synthesize relevant scientific literature, include concrete examples or an evaluation, and critically discuss limitations and responsible-use considerations. The chapter will be assessed individually and should be organized according to the given template.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module Doctoral Seminar for Empirical Software Engineering

03SMDINF1153 / Doktorandenseminar

Description:

General description:

The primary purpose of the seminar is to facilitate a thorough review and discussion of current research progress, paper projects, and research designs initiated by students within the department. The seminar incorporates various components, including presentation rehearsals, where students practice delivering their research findings to improve their public speaking skills. Furthermore, the seminar includes conference reports that highlight recent developments in the field and upcoming opportunities, helping students stay abreast with the latest in academia. Through its multidimensional approach, the seminar aims to foster an environment that encourages intellectual growth and academic collaboration.

ECTS: 2

Notes:

Registration via Email to: bacchelli@ifi.uzh.ch

Learning Outcome:

Throughout this seminar, students should be able to:

1. Critically assess recent research developments, understanding methodologies, findings, and implications to contribute effectively to the field.
2. Improve presentation abilities through rehearsals, communicating research findings clearly and engagingly to diverse audiences.
3. Stay updated on field advancements, incorporating new knowledge into personal research projects.
4. Participate constructively in academic discussions, providing and receiving feedback.

Target Groups:

PhD students in Computer Science

Languages of Instruction:

Module KRI 402 MOOC-course II: «EPFLx: Synchrotrons and X-Ray Free Electron Lasers (part 2)» 07SMKRI402 / Kurs

Description:

General description:

The first MOOC to provide an extensive introduction to synchrotron and XFEL facilities and associated techniques and applications.

Week 1: Diffraction and scattering basics and theory

Introduction, including examples; basic concepts in crystallography, elastic scattering, and diffraction including the phase problem and how this can be resolved. New approaches in macromolecular crystallography, including artificial intelligence/machine learning.

Week 2: Diffraction techniques

Single-crystal diffraction (Laue method and rotation method), powder diffraction, surface diffraction, small-angle x-ray scattering. x-ray reflectometry.

Week 3: Aspects of x-ray spectroscopy theory and absorption spectroscopy

Energy levels, bonding, energy bands, selection rules for dipole transitions, Fermi's Golden rule. Absorption techniques, including XANES, STXM, PEEM, and EXAFS.

Week 4: X-ray emission spectroscopies and electron spectroscopies

X-ray fluorescence, resonant inelastic x-ray scattering, x-ray photoelectron spectroscopy ambient-pressure XPS, x-ray photoelectron diffraction, angle-resolved photoelectron spectroscopy, hard x-ray variants of photoelectron spectroscopies.

Week 5: Tomography and other full-field x-ray microscopies

X-ray tomography basics, including back projections, Radon transforms, and the Fourier slice theorem. Practical considerations. Phase-contrast tomography. Fast tomography. Dark-field and Zernike microscopies.

Week 6: Lensless imaging and x-ray photon correlation spectroscopy

Speckle. coherent x-ray diffractive imaging, ptychographic tomography and laminography. Higher-dimensional imaging. X-ray photon correlation spectroscopy.

Instructor: Philip Willmott

Module MAT 922DP Probability II

07SMMAT922DP / Lecture with Practical Exercises

Description:

General description:

The purpose of the course is to introduce to the main concepts and results on discrete time martingales and Markov chains with values in a discrete space. An introduction to Brownian motion will be made.

ECTS: 2

Notes:

Mathematical Field: Stochastics

This is the Module for PhD students,

BSc and MSc students please book the module without DP in the name.

Learning Outcome:

Introduction into Martingales, Markov Chains and Brownian motion.

Target Groups:

Students of Mathematics from 5th semester onwards

PhD students welcome

Languages of Instruction:

English

Course Materials:

Module Onboarding Incomings

06SM200-999 / Module

Description:

General description:

Exchange students acquire basic skills and knowledge necessary for a successful exchange semester at the University of Zurich. This includes both organizational information and subject-specific information about the university's research history and the institute's current research focuses.

ECTS: 1

Notes:

online module

Elvira Huber is responsible for the OLAT course

Learning Outcome:

- Introduction to the exchange semester at the University of Zurich
- Knowledge of the current and historical research spectrum of the University of Zurich
- Acquisition of basic skills for successful psychology studies at the institute
- Establishing a social network

Languages of Instruction:

Englisch

Merkmale:

Responsible instructor: Klaus Oberauer

Requirements:

Assessment:

- Completion of the OLAT learning path and correct answering of the test questions for each chapter
- Creating a poster about the home university

The module is only completed if both individual components are passed.

Grading Scale:

Module Interdisciplinary Introduction to Machine Learning - Theory

10SMSTS-201 / Module

Description:

General description:

This course on machine learning is designed to provide a comprehensive understanding from a multi-disciplinary perspective. Throughout the course, we will delve into the algorithms and techniques that constitute machine learning, while also considering its applications and limitations across various fields - Medicine, Law, Linguistics, Physical Sciences, and Robotics, to name a few. The aim is to equip students with the knowledge to critically assess the suitability of machine learning solutions for different types of challenges. By the end of this course, students should have a nuanced understanding of machine learning's capabilities and restrictions, informed by examples across multiple sectors.

ECTS: 3

Notes:

This interdisciplinary module is designed for students from all faculties with an interest in machine learning.

Please note: This module provides students without in-depth mathematical or statistical knowledge with a theoretical approach to machine learning. The module can be supplemented by the module "Interdisciplinary Introduction to Machine Learning - Exercises" (spring semester). Practical applications will be discussed in the module "ChatGPT and Beyond" (spring semester). For students with in-depth prior knowledge of math and statistics, we recommend the course "Foundations of Data Science" (fall semester) by Dan Olteanu.

Learning Outcome:

After passing the module, the students are able to:

- name fundamentals about functionality and limitations of both supervised and unsupervised machine learning algorithms
- list different data types and problem types, such as classification and regression, and match them to the appropriate algorithms
- discuss about the vulnerability of and adversarial attacks on machine learning algorithms
- give an overview about the wide variety of applications of ML across many disciplines as well as discipline-specific challenges
- reflect on machine learning, the promise of artificial intelligence, and big data from a legal, ethical, as well as philosophical perspective

Target Groups:

Master

Languages of Instruction:

English

Module Core Readings MAMES: Regions

06SM278-510 / Module

Description:

General description:

This core elective is completed as a self-study module and covers three condensed introductory reading lists that span the three regions, which are part of the MAMES program (East Asia, South Asia, Middle East). Students can choose one of these lists to enhance their knowledge about area studies by focused readings on the larger region/ country.

ECTS: 6

Notes:

This module has to be booked via the booking agreement available on the website of the IAOS: <https://www.aoi.uzh.ch/de/studies/studyorganization/courseofstudies/booking.html>.

Please consult with your prospective supervisor during the booking-period in order to sign the agreement in due time. A copy of the agreement has to be sent to Kathrin Ensinger (studentadmin@aoi.uzh.ch).

All questions may be directed to Kathrin Ensinger (studentadmin@aoi.uzh.ch)

Learning Outcome:

Students obtain a solid understanding of contemporary processes relevant to MAMES regions and are able to discuss these issues with regard to regional particularities and different economic, political, cultural and social contexts.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Nicolas Martin
David Chiavacci

Requirements:

Prerequisites:

This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module.

Assessment:

Portfolio (Oral Exam 50%; Written Paper 50%)

In order to pass the module all elements of the portfolio must be successfully completed.

Grading Scale:

1-6, Half Grades Given

Repeatability:

repeatable once, book again

Module Core Readings MAMES: Transregional Topics

06SM278-511 / Module

Description:

General description:

This core elective is completed as a self-study module and covers four thematic reading lists introducing processes and issues relevant to all the three regions, which are part of the MAMES program (East Asia, South Asia, Middle East). Students can choose one of these lists to enhance their knowledge about transregional perspectives by focused readings on overarching topics and conceptual approaches.

ECTS: 6

Notes:

This module has to be booked via the booking agreement available on the website of the IAOS: <https://www.aoi.uzh.ch/de/studies/studyorganization/courseofstudies/booking.html>.

Please consult with your prospective supervisor during the booking-period in order to sign the agreement in due time. A copy of the agreement has to be sent to Kathrin Ensinger (studentadmin@aoi.uzh.ch).

All questions may be directed to Kathrin Ensinger (studentadmin@aoi.uzh.ch)

Learning Outcome:

Students obtain a solid understanding of contemporary processes and issues relevant across the MAMES regions and are able to discuss them in view of commonalities and differences between specific economic, political, cultural and social contexts.

Module Discourse and practice of qualitative research

06SM226-532 / Module

Description:

General description:

In den Veranstaltungen dieses Moduls erhalten die Studierenden wechselnde und unterschiedlich akzentuierte Einblicke in Diskurse und Praxen qualitativer Sozialforschung. Im Zentrum können entsprechend u.a. Themen stehen wie: ausgewählte qualitative Erhebungs- und/oder Auswertungsmethoden, spezifische Forschungsfelder sowie Forschungsansätze und ihre Methoden, einzelne Arbeitsschritte des qualitativen Forschungsprozesses sowie aktuelle und/oder historische Methodendiskurse im Feld der qualitativen Sozialforschung. Die praktische Anwendung der Methoden bzw. die Übertragung der Seminarinhalte auf die Praxis qualitativer Forschung bildet dabei einen Grundstein des Moduls. Das Modul wird alle drei Semester angeboten (HS 2026, FS 2028, HS 2029).

ECTS: 3

Learning Outcome:

Vertiefte Kenntnisse zu qualitativer Sozialforschung, ihren Methoden, Methodendiskursen, Methodologien und Arbeitsweisen; Orientierung für eine qualitativ-empirische Masterarbeit.

Module Business & Data Storytelling (1-day workshop)

07SMCMS109 / Kurs

Description:

General description:

When Steve Jobs or Walt Disney spoke, everyone listened in amazement. Why? Because they spoke in stories. Learn how to do it, too. Whether you want to attract attention of your audience, present complicated charts, motivate your team or shorten meetings, storytelling is the way to go. A good story can evoke emotions. A great story will move people to action. Become a convincing storyteller and impress your colleagues, professors and future employer.

- Techniques to capture and maintain attention of various audiences
- Engagement and motivation of different stakeholders
- Storytelling in research and science – getting to the “why it matters”
- Turning complex data into clear visual narratives

WORKSHOP CONTENTS:

PART 1: ATTRACTING ATTENTION

- What makes people want to listen?
- Your first words - increasing motivation and attention span
- Ingredients of powerful stories
- Working with emotions, tension and conflict to achieve your objectives

PART 2: EVERYDAY BUSINESS STORYTELLING

- Communicating projects, changes and unpopular news
- Different stories for different stakeholders
- Strategy, tactics, motivation and persuasion
- Dealing with objections and difficult situations

PART 3: DATA STORYTELLING AND CONTENT VISUALIZATION

- Stories are data with soul – weaving data into powerful messages
- Choosing the right visuals for the right audiences
- Where are your eyes drawn – working with focus, decluttering
- Case studies, model situations, debriefing and feedback

Module PhD Seminar in Marketing, Digital Transformation, and Entrepreneurship

03SMDOEC1195 / Doktorandenseminar

Description:

General description:

It is open to PhD students attached to the UZH Chairs of:

- Prof. Dr. René Algesheimer
- Prof. Dr. Luis Aguiar
- Prof. Dr. Andrea Giuffredi-Kähr
- Prof. Dr. Ulrich Kaiser
- Prof. Dr. Martin Natter

To be prepared for the seminar, students need to read up on central topics in the related literature. They are invited to present "work in progress". The work to be presented could either be early work in progress, or, in a state that allows for submission to an international peer-reviewed journal in the not-too-distant future.

Module Joint Journal Club (University of Zurich, Karolinska Institutet)

04SM24CR_507 / Module

Description:

General description:

For Doctoral students, it is fundamental to improve their reading skills and gain practice in critiquing and appraising research. One common method to enhance skills in interpreting research results and evaluating research designs is participating in journal clubs. Virtual journal clubs can be a safe space where Doctoral students can also improve their presentation and communication skills and expand their professional network. The club may serve to connect researchers and students, which is particularly beneficial for those practitioners who have few local peers. Connecting with peers globally via online journal clubs is a natural in today's world of medical and health care education, which will accelerate knowledge transfer and become an increasingly important tool in continuing medical education and research.

Methodology:

A group of Doctoral students will meet virtually via Zoom to discuss articles from the health and rehabilitation science literature, their study designs and choice of methods (quantitative / qualitative / mixed-methods), and their interpretation of results under the guidance of senior researchers (activity leaders). The virtual format provides a safe learning environment and allows Doctoral students to engage with each other locally as well as abroad. One predefined article will be discussed per meeting, which all participants are required to read and study in detail beforehand.

To inspire the exchange, one of the participating Doctoral students (or a group depending on the number of participants) will be assigned to present their view of the article at the beginning of each meeting using prepared slides (approx. 12 minutes). A maximum of two slides may be dedicated to summarizing the article (background, methods, results, conclusions made by the authors), while the main focus (minimum of three slides) must lie on the students' own thought process on the "discussion points" listed below pertaining to the article's method, validity, interpretation and limitations. Factual criticism is encouraged. The activity leaders will then add further methodological discussion points, followed by in-depth breakout group discussions during which every participant is required to share their thought process. Each meeting concludes with a plenary discussion in which members of each breakout group convey the most important insights from their breakout group discussion.

ECTS: 0

Notes:

The course extends over two semesters, with three sessions in the fall semester and three sessions in the spring semester.

Learning Outcome:

To promote the development of critical appraisal skills among Doctoral students and the ability to articulate these accurately, covering

- Geographically different research practices and topics.
- Quantitative / qualitative / mixed-methods empirical study designs.
- Useful insights for own research activities and competencies as a scholar.

Target Groups:

Doctoral students Care & Rehabilitation Sciences

Languages of Instruction:

English

Merkmale:

Responsible instructor: Rahel Naef

Requirements:

Assessment: Successful participation in the Journal Club is graded pass/fail based on the individual presentation and active contribution to the discussion in each session. Virtual participation is mandatory, although one justified absence is permitted.

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Semester)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Module M3L 130 Good Computational Practice

07SMM3L130 / Course

Description:

General description:

The module introduces students to the specific concepts of research integrity that are related to the practice of mathematical modeling and machine learning. This includes ethical principles of statistical practice, reproducibility, good computational practice and computational efficiency. Besides theoretical insights into the foundations of computational practice students acquire practical skills using modern computational tools (e.g. dynamic reporting, version control, containerization) and they start to learn about general programming techniques (e.g. unit tests, debugging, job scripting, parallelization).

The module provides insights and practical tools that are useful throughout the curriculum of bachelor and master programs focused on quantitative research.

The course is taught in a flipped classroom setting: students are required to learn about concepts using provided material and complete assignments before an in-person session. Assignments and the in-person session contain peer and staff feedback and assessment.

Participants who successfully passed the module:

- understand the link between good computational practice, scientific integrity and reproducibility
- have the necessary technical skills for reproducible research work, e.g. dynamic reporting, version control, containerization
- master the most relevant techniques of practical computing in mathematical modeling and machine learning, e.g. scripting approaches, simulations, good coding practice
- know the basics of programming techniques such as debugging, unit testing, distributed and parallel computing

ECTS: 3

Notes:

-

Target Groups:

Students of the Bachelor Programm in AMML

Course Materials:

Online material on the Open Edx platform <https://elearn2.mnf.uzh.ch>

Merkmale:

Responsible instructor:

Reinhard Furrer

Requirements:

Prior Knowledge:

- Informatics 1

Assessment:

- Active participation in quizzes, tasks and questions in the Open Edx course
- Submitting and assessing assignment responses on Open Edx and GitLab.
- written exam

Details are announced in class and in the Open Edx course.

Module KRI 101 Chemical crystallography I

07SMKRI101 / Lecture with Practical Exercises

Description:

General description:

An introduction to the principles and theory of X-ray diffraction and crystal structure determination as it relates to Chemistry. Fundamental crystallographic concepts: what is crystallography and what can it tell us, unit cells, Bravais lattices, Laue symmetry, crystal classes, point groups, space groups, crystal growth, instrumentation. Diffraction of X- rays by crystals: physical and geometric basics, powder and single crystal methods. A brief demonstration of structure solution and modelling. Interpretation of crystal structure data; internal coordinates for structure description: atom spacing, co-ordination polyhedra, bond angles, torsion angles; intermolecular interactions, absolute configuration determination. Crystallographic databases. Overview of the principles of macromolecular crystallography.

ECTS: 3

Learning Outcome:

The course should equip participants with the knowledge that will enable them to understand how a crystal structure determination is performed and to analyse critically any crystal structure reported in the literature or retrieved from a crystallographic database.

Target Groups:

MSc, PhD students, postdocs

Languages of Instruction:

english

Course Materials:

Will be handed out during the course

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Bernhard Spingler

Requirements:

Prior Knowledge:

Undergraduate chemistry, physics or equivalent, basic university level mathematics (trigonometry, matrices)

Assessment:

oral exam, 30 minutes (in the semester break); the exam is held in English (possible in German by arrangement)

Grading Scale:

Module MAT 664 Seminar Counterexamples in Analysis

07SMMAT664 / Seminar

Description:

General description:

Studying counterexamples helps deepen the understanding of important theorems by revealing their limitations and clarifying the precise conditions under which they hold. This seminar will focus on revisiting a selection of foundational results in analysis by means of suitably constructed counterexamples. Specifically, we will discuss topics ranging from real numbers, sequences, series, functions, limits, convergence, differentiability, and integrability to metric, topological, and function spaces, measures, measurable sets, and measurable functions.

ECTS: 3

Notes:

Mathematical Field: Analysis

Learning Outcome:

Consolidating the understanding of foundational results in analysis through counterexamples, which demonstrate the relevance of the various assumptions and definitions.

Understanding where counterexamples fit within the corresponding theory, how they are constructed, and what features they rely on in each specific case.

Target Groups:

BSc students from 4th semester onwards and MSc students

Course Materials:

The seminar is based on the following books:

- "Counterexamples in Analysis", B. R. Gelbaum & J. M. H. Olmsted, Dover publications, 2003.
- "Counterexamples in Measure and Integration", R. L. Schilling & F. Kühn, Cambridge University Press, 2021.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Klaus Martin Widmayer

Requirements:

Prior Knowledge:

Analysis I-III, including basics of the theory of measure and integration

Assessment:

- Prepare a talk and present it in class.
- Hand in a typed (LaTeX) version of the talk
- Be present throughout the semester and participate actively in discussions

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Module Abschlussleistung

01SM27LB020 / Hausarbeit

Description:

General description:

Diese Abschlussprüfung richtet sich nur an Studierenden des MA Studienprogramms "Gesundheit im Kontext von Ethik, Spiritualität und Religionen".

In einer schriftlichen Arbeit wird ein Thema mit einer (medizin)ethischen Fragestellung vertieft, welches abschliessend in einem mündlichen Kolloquium vorgestellt wird.

Hier sind einige Beispiele für mögliche Themen:

- Ethische Fragestellungen in der Gesundheitsversorgung
- Religiöse Überzeugungen und Gesundheitspraktiken
- Spiritualität in der Gesundheitsversorgung
- Interkulturelle Kompetenz im Gesundheitswesen
- Gesundheitspolitik und ethische Rahmenbedingungen
- Fallstudien und praktische Anwendungen

ECTS: 3

Learning Outcome:

Die Studierenden können...

- die komplexen Wechselwirkungen zwischen Ethik, Religion und Spiritualität bezüglich einer ethischen Fragestellung kritisch reflektieren.
- eine eigenständige, gut begründete Position dazu beziehen.

Module Global Futures: Development, Sustainability, Social Justice (Key Debates)

06SM722-501 / Module

Description:

General description:

This course introduces MA students to the key concepts and theoretical debates of the Specialized Master «Global Futures: Development, Sustainability, Social Justice». Building on insights from social and cultural anthropology, geography and area studies, we will explore the principal theoretical frameworks, key research themes, and ongoing debates related to the global entanglements, everyday experiences and future(s) of development, sustainability and social justice. During the course students will discuss debates about these key concepts with lecturers from anthropology, geography, and area studies. Along the way, they will learn various genres of academic writing and argumentation (writing, ethnography, theory / debate). Students will practice their reading, writing, presentation and debating skills while engaging with a range of relevant materials such as academic and non-academic texts, films and podcasts. The course will equip students with a foundational theoretical vocabulary and an understanding of knowledge controversies, concepts and theoretical approaches in relevant fields of the program, helping them to frame and prepare their research and data analysis in subsequent modules.

ECTS: 6

Learning Outcome:

Students learn to: - read and engage conceptual and theoretical texts critically - defend a particular position in a theoretical debate - present the core arguments of a theoretical debate and position themselves critically in that debate - write an essay that engages theoretical debates and knowledge controversies in a selected field and defend it in an oral exam - produce collaboratively alternative forms of academic communication, such as podcasts or blogposts - refine their analytical skills (analyzing media, reading/writing)

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Annuska Derks

Requirements:

Prerequisites:

This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module.

Assessment:

Portfolio: presentation (25%); documented group assignment (25%); take-home essay with final oral exam (50%). All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed.

Grading Scale:

1-6, Half Grades Given

Repeatability:

repeatable once, book again

Module SDS 110 Grundlagen zur Arbeit mit digitalen räumlichen Daten I

07SMSDS110 / Lecture with Practical Exercises

Description:

General description:

In an era where data increasingly drives decision-making, Spatial Data Science offers a powerful way to explore, analyse, and understand the world around us. From monitoring environmental change and managing urban growth to assessing natural hazards, spatial data provides critical insights into many of today's pressing challenges. This course offers an introduction to Spatial Data Science and is specifically designed for students with no prior experience in SDS, GIS, or programming.

You will be guided step by step through the core ideas, concepts, and workflows that underpin spatial data-driven analysis. Throughout the course, you will explore real-world geospatial applications and learn how spatial data is collected, structured, analysed, visualised, and communicated.

You will gain a solid foundation in key principles such as spatial thinking, data lifecycles, data quality, reproducibility, and responsible data use. By the end of the course, you will understand how spatial data science supports scientific inquiry and evidence-based decision-making. This course's content is further consolidated and expanded in the following spring (SDS 210) and fall semesters (SDS 320).

ECTS: 5

Notes:

Bring your own laptop to lectures and practical exercises (labs). Book this module before the semester starts to ensure access to the computer lab infrastructure.

The Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 4; 11; & 13

Learning Outcome:

This course ensures that students acquire both theoretical knowledge and practical skills in Spatial Data Science. On completion of this course, you will be able to:

- Interpret and differentiate spatial data types and their applications.
- Acquire, manage, and process spatial data effectively using GIS tools.
- Analyze and visualize spatial data to uncover hidden patterns.
- Assess the quality and reproducibility of spatial data projects.
- Apply ethical and legal considerations when handling spatial data.

Target Groups:

All students minoring in Spatial Data Science.

Bachelor students majoring and minoring in Geography and related subjects.

Languages of Instruction:

English

Course Materials:

Lecture slides and practical information will be provided through MS Teams and OLAT.

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Hendrik Wulf

Requirements:

Prerequisites: None

Prior Knowledge: Basic computer literacy

Assessment: This module consists of two parts: the lectures (SDS 110.1) and the labs (SDS 110.2).

To pass this module, you must pass both the lab assignments and the final written exam on the lecture & lab content. Successful completion of the labs is a prerequisite for taking the final exam. The final mark will be determined by both parts (weighted average), the labs (50%) and the written exam (50%).

In the final exam you can achieve a maximum number of 100 points (pts). In the labs you achieve 60 pts. To pass the course, you must achieve at least 60% in both. If the minimum number of points (36 pts) is not achieved in the labs, the entire module must be repeated the following year. If the final exam (in January) is not passed (<60 pts), it can be retaken (in August/September, same year) without having to repeat the labs.

Lab reports and the written module exam can be submitted in German or English. The written module exam will be available in English.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module SDS 320 Spatial Data Analytics (Anwendungskompetenzen digitaler Datenanalysen)

07SMSDS320 / Lecture with Practical Exercises

Description:

General description:

This course builds upon the foundations of spatial data and Python programming to explore the application of machine learning and deep learning tools for geospatial analysis. As the final module in the SDS series, it transitions students from data manipulation to more advanced analytical modelling. You will learn how these tools can be used with geospatial data. The course covers key tasks such as image classification, semantic segmentation and change detection using open- source frameworks.

A central feature of this module is its project-oriented approach. Alongside applied lessons, you will work through the entire lifecycle of an SDS project, from developing and discussing initial ideas, to technically realising them, and presenting and sharing your findings. By the end of SDS 320, you will have the practical expertise needed to design and implement sophisticated spatial analytics workflows to solve complex real-world problems.

ECTS: 5

Notes:

Bring your own laptop to the course.

The session on 15 September will take place in room Y27-H-25.

Learning Outcome:

This course provides students with applied analytical competencies in the field of Spatial Data Science. On completion of this course, you will be able to:

- Conceptualize, develop, and manage an independent spatial data science project.
- Critically evaluate and present your project idea and results to an audience.
- Understand and apply fundamental machine learning concepts to geospatial datasets.
- Utilize open-source libraries and foundation models to extract insights from geospatial data.

Target Groups:

All students minoring in Spatial Data Science.

BSc & MSc students majoring and minoring in Earth System Science, Geography and related subjects.

Languages of Instruction:

English

Course Materials:

Lecture slides and practical information will be provided through MS Teams and OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Hendrik Wulf

Requirements:

Prerequisites:

The course will require access to a computer with Python3 installed to apply course contents and complete individual projects.

Prior Knowledge:

SDS210 or equivalent programming skills. Familiarity with GIS and remote sensing concepts. Basic knowledge of Python to process and query data.

Assessment:

The course assessment is based on an individual spatial data science project and active course participation. The project integrates the conceptual, technical and communication skills developed throughout the course. It provides an opportunity to demonstrate your ability to design, implement, evaluate and communicate a reproducible spatial analytics workflow using Python and relevant open-source tools.

The final mark is based on a scale from 1 to 6, in quarter grades, and is determined by a weighted average of the following components:

- Project report & Code Repository: 40%
- Project presentation and discussion: 30%
- Course participation and project development: 30%

To pass the course, you must achieve a total weighted score of at least 60% across all assessment components. Because the final grade is cumulative, you do not need to pass every individual component separately. A lower score in one area can be compensated by stronger performance in another, provided your overall total meets the 60% threshold.

Module Approaches to the Study of Religion, Introduction

01SM65LB010 / Course

Description:

General description:

The course teaches academic positions that are central to the study of religion. The focus is on the introduction to fundamental theories and approaches that are relevant to the current academic debate.

ECTS: 3

Learning Outcome:

Students are familiar with central texts in the study of religion and know important authors. They know what distinguishes approaches to the study of religion from other disciplinary approaches to religion.

Module Biblical Traditions, Introduction

01SM65LB030 / Course

Description:

General description:

Students get knowledge about the various forms of the Biblical canons (HB, LXX, NT - different church traditions), the main parts of the Hebrew Bible (Torah, Prophets, Writings) and selected traditions and themes (Creation and Primordial Story, Fathers, Exodus, Sinai; David and Solomon, Isaiah and Deutero-Isaiah, Psalms, Wisdom literature, Daniel), and also of the New Testament (Gospels and Acts, Pauline Corpus, Catholic Epistles, Revelation) and main themes (Historical Jesus, Jesus's death and its interpretation, Pauline mission and the Gentile 'church', apocalypticism and eschatology).

ECTS: 3

Learning Outcome:

Students should get a basic knowledge about the historical process of the making of the Biblical writings and the canon, realize that these are texts of a long time span and written into different situations and cultural contexts that are distant from our world. They should know about the relevance of those writings for various (Jewish and Christian) communities.

Module EEE 338 Evolutionary and Ecological Functional Genomics

07SMEEE338 / Block Course

Description:

General description:

Next-generation sequencers (NGS) are revolutionizing evolutionary and ecological studies as well as human medical research. Large projects including Human 1000 genomes projects and Arabidopsis 1001 genomes projects have enabled genome-wide association studies (GWAS) to identify genes responsible for common disease and functional changes. Evolutionary biology using NGS is the focus of a University Research Priority Program since 2013. The course provide a broad overview of introductory bioinformatic analysis, theory of evolutionary and ecological genomics, including population genetics, population structure, and GWAS, experimental planning and sample preparation. Instruction for basic programming is provided. The script language R is used for processing sequence data, calculating data statistically, and plotting data.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybiportal.uzh.ch>

Additional teachers: Ryohei Fujita, Kazuki Fukushima

Learning Outcome:

By the end of the module you should be able to

- design a research experiment involving biologically relevant issues affecting populations of plants or animals
- explain concepts of NGS technologies
- perform basic analysis of genome wide polymorphism data using bioinformatics and RNA-seq
- translate genetic polymorphism data into meaningful ecological or evolutionary relevant results
- identify both the capabilities and limitations of NGS

Key skills

- identify key areas of contemporary research using NGS
- use basic bioinformatics of large datasets for genetic analyses

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Kentaro Shimizu

Requirements:

Prerequisites:

Basic studies completed

Assessment:

Final written exam (80%) and performance during experimental project including oral presentation (20%) in English

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module Languages of the World

06SM273-501 / Module

Description:

General description:

The module provides in-depth knowledge of the diversity of languages in a global perspective. The aim is to gain a broader understanding of how languages can differ in their basic phonological, grammatical and lexical structures.

ECTS: 6

Learning Outcome:

The module enables students to understand differences in linguistic structure and what is constant and what is variable in human language. This will provide a foundation for further study of the sociocultural, biological, historical and phylogenetic drivers of the diversification of languages, to generate hypotheses derived from them and to test them in practice using adequate methods.

Module EEE 600 Evolutionary Genomics Journal Club

07SMEEE600 / Seminar

Description:

General description:

The Journal Club is dedicated to cutting-edge journal articles in evolutionary genomics, including the subfields of population genetics, speciation and domestication genetics, phylogenetics, quantitative genetics, and the extension of these fields to the genomics era. We encourage a mix of theoretical, methodological, and empirical papers across all taxonomic groups. At the start of a session, one participant presents a summary of the paper and suggests points for discussion. Then all participants discuss the paper. Students are given priority as presenters and during the discussion. PhD students may earn 1 ECTS per semester by presenting one paper and by active participation.

ECTS: 1

Notes:

The seminar will be held in Y13-J-51 and via zoom

Learning Outcome:

Participants will

1) Keep up with cutting-edge literature in evolutionary genomics as a source of innovation and inspiration for our own research

2) Learn and practice how to summarise scientific content effectively:

- Understand and report a narrative
- Identify and reflect the objectives of a study
- Sketch the idea underlying an approach or method
- Identify and reflect the main results and conclusions of a study

3) Learn and practice how to assess the science done by peers:

- Put a piece of scientific work into context
- Identify key innovations contributed to the field
- Critically assess the quality and quantity of data, methods, and scientific writing
- Identify the significance and implications of a piece of scientific work

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Narjes Yousefi
Kentaro Shimizu
Rie Shimizu Inatsugi

Requirements:

Prerequisites:

MSc studies, PhD studies or according to individual agreement

Assessment:

PhD students may earn 1 ECTS per semester (max. 2 ECTS in two semesters) by

- presenting one paper and
- active participation

in English

Module EEE 220 Practical Population Ecology: Studying Snow Voles in the Alps

07SMEEE220 / Field Trip

Description:

General description:

This is a hands-on field experience with an Alpine snow vole population study through an overnight field trip to Churwalden. Students will learn capture-mark-recapture techniques, write reports on field methodology, and have the option to analyze long-term data for personal projects. Transportation and accommodation will be arranged and costs covered by the course. Field trips will take place in June-July and in October-November.

ECTS: 1

Notes:

4 days in June or 4 days in October. Registration by email to arpat.ozgul@uzh.ch. There is no deadline for registration.

4 places.

Learning Outcome:

Master Fieldwork Techniques: Learn and apply the capture-mark-recapture method for population studies in the field, enhancing practical skills in ecological research.

Interpret Real-World Data: Develop abilities to gather, interpret, and analyze real-world ecological data, focusing on snow vole populations in the Alpine region.

Apply Theoretical Knowledge: Apply theories learned in the classroom to understand and solve real-world ecological challenges in fieldwork situations.

Conduct Independent Research: Have the possibility to carry out independent research projects as a research intern, utilizing long-term data sets for in-depth analysis

Adaptability in Field Conditions: Learn to effectively adapt to varying field conditions between early and late summer, thereby enhancing overall fieldwork skills.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Arpat Ozgul

Requirements:

Prerequisites:

at least EEE 104 must be successfully completed

Assessment:

Students will be required to write a report detailing the field methodology used during the field trips. This will involve a description of the capture-mark-recapture design, the reasons for its selection, and how it was executed in the field. Part of the report should reflect upon the potential issues faced during the execution of the methodology and suggest improvements for future fieldwork. This will develop students' problem-solving skills and their ability to enhance fieldwork techniques. Students will also identify and discuss interesting research questions that could be addressed using the data collected. They should also propose the methodology that could be used to explore these questions. This will encourage students to think analytically and design potential future research studies. In English.

Module Management Accounting with Microsoft Power BI (S)

03SM22BO0138 / Seminar

Description:

General description:

Dieses Seminar behandelt den Einsatz der Business-Software Microsoft Power BI zur Lösung betrieblicher Entscheidungsprobleme. Anhand praxisnaher Fallstudien erlernen Studierende die Einsatzmöglichkeiten von Power BI, um Kennzahlen in aussagekräftigen Management Dashboards zu visualisieren und hierdurch Informationssysteme zur Entscheidungsunterstützung und Verhaltenssteuerung zu gestalten.

Nach einer Einführungsveranstaltung, in der die Studierenden mit den Grundlagen von Kennzahlen und Kennzahlensystemen als Instrument des Management Accountings vertraut gemacht werden, machen sie sich im Selbststudium mit den Möglichkeiten von Microsoft Power BI vertraut. Das so erworbene Wissen nutzen die Studierenden, um anschliessend Fallstudien in Kleingruppen zu bearbeiten. Die Ergebnisse werden in einer schriftlichen Seminararbeit zusammengefasst und anschliessend im Seminar präsentiert.

ECTS: 3

Notes:

Die Teilnahme ist auf insgesamt

24 Studierende begrenzt. Interessierte Studierende können sich bis Sonntag, den 16. August

2026, über das Bewerbungsformular auf der Webseite des Lehrstuhls (<https://www.business.uzh.ch/macc>) für die Teilnahme bewerben. Die Vergabe der Seminarplätze wird bis zum

28. August

2026 abgeschlossen sein. Bewerbungen per E-Mail werden nicht akzeptiert.

Bitte beachten Sie, dass das Modul erst nach der Zuteilung eines Seminarplatzes gebucht werden kann.

Zugelassene Bewerberinnen und Bewerber müssen das Modul unmittelbar nach Bestätigung ihres Seminarplatzes buchen.

Learning Outcome:

Am Ende dieses Seminars werden die Teilnehmenden in der Lage sein:

- wesentliche betriebswirtschaftliche Kennzahlen zu beschreiben und kritisch zu beurteilen
- die grundlegenden Funktionen von Microsoft Power BI für die Datenanalyse zu verstehen
- Management Dashboards zur Lösung betrieblicher Entscheidungsprobleme zu gestalten.

Target Groups:

Bachelorstudierende

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor:

Robert Göx

Requirements:

Prior Knowledge:

Die Studierenden sollten mit den grundlegenden Konzepten des Management Accounting vertraut sein. Der Besuch der Vorlesung Advanced Managerial

Accounting ist hilfreich, stellt jedoch keine Voraussetzung für die Teilnahme an diesem Seminar dar.

Assessment:

- Seminararbeit (4-5 Studierende, 40%)
- Gruppenpräsentation (4-5 Studierende, 40%)
- individuelle Aufgabe (20%)

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines:

Module Prototyping Data Science Products (S)

03SM22MO0250 / Seminar

Description:

General description:

The main objective is to teach students how to transform their ideas and data science knowledge into a product prototype. During the seminar, the students will improve their programming skills in R or Python (at their choice), learn to apply machine learning techniques to a concrete problem, create a product prototype and run it on the cloud. All participants will receive free credits on the Google Cloud Platform (courtesy of a Google Educational Grant) that they can use to get familiar with the services and cover the cost of running their product prototype.

ECTS: 6

Notes:

The number of participants is limited to 8. To apply, please use the official module booking tool and submit a short motivation letter and your transcript of records by using the module booking tool.

Application deadline: please see module booking tool

Please note that students who have taken a previous variant of this course are not eligible to take the seminar again.

Learning Outcome:

The seminar gives an overview of the fundamental steps needed to create a product prototype for a data science web application. Topics include getting familiar with the Google cloud computing platform, training machine learning algorithms, structuring a project, and running it on the cloud. Most services we discuss provide a high-level, user friendly (often graphical) interface.

Therefore, no previous knowledge of cloud infrastructure is required.

Target Groups:

MA students with good programming and basic machine learning knowledge, who are interested in research and in turning their ideas into a software product.

Languages of Instruction:

English

Course Materials:

Slides, videos, and learning resources will be provided during the seminar.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

René Algesheimer

Requirements:

Prerequisites:

Students can choose to program in either R or Python.

Prior Knowledge:

Good programming knowledge in R or Python.
Basic knowledge of machine learning.

Assessment:

Online exercises: 10%

Minimal product: 25%. of which:

- Individual grade: 50%

- Group outcome: 50%

Advanced product: 25%, of which:

- Individual grade: 50%

- Group outcome: 50%

Peer evaluation: 10%

Group project: 30%, final presentation on 10.12.2026

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: Thursdays:

17.09.2026, 14:00-18:00: Kick-Off meeting: Fundamentals of product prototyping.

24.09.2026, 14:00-18:00: Running a product prototype on the cloud: Group project assignment.

15.10.2026, 14:00-18:00: Status update.

29.10.2026, 14:00-18:00 Minimum product: Individual meetings with the groups (the exact time will be set in agreement with the group members).

26.11.2026, 14:00-18:00: Advanced product: Individual meetings with the groups (the exact time will be set in agreement with the group members).

10.12.2026, 14:00-18:00: Final presentations of the group project.

Request period: from Mi 12.08.2026 10:00 to So 30.08.2026 24:00

Place allocation at the latest: Di 08.09.2026 23:59

Waiting list progression period: from Mo 07.09.2026 00:00 to Fr 18.09.2026 24:00

Cancellation period: from Mo 07.09.2026 00:00 to Mo 21.09.2026 24:00

Module MAT 001DP Cryptography

07SMMAT001DP / Lecture with Practical Exercises

Description:

General description:

The lecture gives an introduction to cryptography. In the course we will work on the mathematical foundations from number theory, complexity theory and algebraic geometry. Based on this, we will study the practical protocols such as AES, RSA and ElGamal.

Die Vorlesung gibt eine Einführung in die Kryptographie. Im Kurs werden wir die mathematischen Grundlagen aus der Zahlentheorie, der Komplexitätstheorie und der algebraischen Geometrie erarbeiten. Basierend darauf werden wir die praktischen Protokolle wie AES, RSA und ElGamal studieren.

ECTS: 3

Notes:

Mathematical field Algebra

This module (MAT001DP) is for PhD students,
MSc and BSc students please book Module MAT001 (without DP in the name)

Target Groups:

Math students from 5th semester onwards

Course Materials:

- I. Blake, G. Seroussi, and N. Smart. Elliptic Curves in Cryptography. Lecture Note Series 265. London Mathematical Society, 1999.
- N. Koblitz. Algebraic Aspects of Cryptography. Springer-Verlag, Berlin, 1998. With an appendix by A. J. Menezes, Y.-H. Wy and R. J. Zuccherato.
- A. J. Menezes, P.C. van Oorschot, and S. A. Vanstone. Handbook of Applied Cryptography. CRC Press Series on Discrete Mathematics and its Applications. CRC Press, Boca Raton, FL, 1997. With a foreword by Ronald L. Rivest.
- R. A. Mollin. An Introduction to Cryptography. CRC Press Series on Discrete Mathematics and its Applications. CRC Press, Boca Raton, FL, 2000.
- D. Stinson. Cryptography, Theory and Practice, Second Edition. CRC Press, Boca Raton, FL, 2002.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Joachim Rosenthal

Requirements:

Prior Knowledge:

Algebra I

Assessment:

For BSc and MSc students: successfully completed 60% of the exercises and actively participated in the exercises. This is a prerequisite for participation in the module examination. The grade is based on the performance in the module examination.

<u>Grading Scale:</u>	Pass/Fail

Module Master's Thesis

06SM273-MA / Master Paper / MA-Arbeit

Description:

General description:

Students write the Master's thesis as a self-study assignment. Supervision is provided by teachers with at least a PhD degree in their consultation hours. The student workload for the Master's Thesis therefore includes independent study as well as attending supervisory meetings.

ECTS: 30

Learning Outcome:

The Master's Thesis is proof of the ability to independently work on a level-specific scientific task within the given time limit and to present it adequately.

Languages of Instruction:

Englisch

Merkmale:

Responsible instructor: Paul Widmer

Requirements:

Prerequisites: This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module.

Assessment: written paper

Grading Scale: 1-6, Half Grades Given

Repeatability: repeatable once, book again

Organisation:

Offer pattern: 2 Semester (Every Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module DSI Interdisciplinary Reading Seminar / Part 1

10_1DSID0031 / Seminar

Description:

General description:

Participants will read and discuss papers from different disciplines. The course focuses on meaningful communication between different disciplines, fostering interdisciplinary thinking and exchange. During the second meet-up, participants will give a short presentation of three papers from their own discipline which they deem suitable for an interdisciplinary exchange. Based on these presentations, students and professors will jointly identify the paper to be presented during the semester. In the following sessions, each student will present their selected paper and will comment on a paper presented by a student from another discipline. The presentation and the comments will launch the interdisciplinary discussion integrating the view of all students participating in the course.

ECTS: 1

Notes:

(Limited to) PhD candidates participating in the DSI Excellence Program. No auditors.

The course will take place in room SOC-E-010 on the following dates:

01.09.2026: 15:00 – 16:00

15.09.2026: 14:30 - 15:30

10.11.2026: 14:15 - 15:50

17.11.2026: 14:15 - 15:50

01.12.2026: 14:15 - 15:50

08.12.2025: 14:15 - 15:50

Learning Outcome:

Participants can effectively explain key research ideas, themes, and methods of their own discipline to people with varied disciplinary backgrounds. The paper discussions shall foster deeper understanding of state-of-the-art research themes, approaches, and methods, from a varied set of disciplines, and provide interdisciplinary views on the discussed topics. Participants will be able to more easily switch perspectives between disciplines to foster greater understanding of the discussed issues.

Course Materials:

The participants will identify and provide selected papers, that are understandable for other disciplines, to course participants.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Nina Cornelius-Malecha

Requirements:

Assessment:

Presentation of a selected paper from the student's own discipline, commenting a paper presented by another student from a different discipline and active participation in the discussions. All students must read all selected papers throughout the semester to be prepared to participate in the discussion in a meaningful way.

Grading Scale:

Pass/Fail

Organisation:

Offer pattern:

1 Semester (Irregular)

Module GEO 710 Selbstgeführte Wasser-Exkursionen in Baden und am Bielersee

07SMGEO710 / Field Trip

Description:

General description:

Smartphone-geführte, selbständige Exkursionen zum Thema Wasser. Selbständiger Besuch von zwei verschiedenen Exkursionen (halber Tag zu Fuss in Baden und ganzer Tag mit dem Velo oder per ÖV entlang der Juragewässerkorrektion, Raum Biel), geführt von der App Actionbound, an beliebigem Datum. Anschliessend zusätzliche Abgabe eines schriftlichen Leistungsnachweises. Alle Informationen werden in Form eines Syllabus und der Aufzeichnung einer Einführungsvorlesung zur Verfügung gestellt (keine Präsenzveranstaltung).

ECTS: 1

Notes:

Die Agenda 2030 der Vereinten Nationen (UNO) umfasst 17 Ziele für nachhaltige Entwicklung Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)), die von allen UN-Mitgliedstaaten verabschiedet wurden. Sie bilden einen gemeinsamen Rahmen zur Förderung von sozialer Gerechtigkeit, Umweltschutz und wirtschaftlicher Entwicklung weltweit.

Behandelt werden in diesem Modul insbesondere: 4; 6; 7 & 14

Kosten (Zugtickets nach Biel und Baden, evtl. Velomiete) sind von den Studierenden selber zu tragen.

Versicherung ist Sache der Teilnehmenden.

Learning Outcome:

Kenntnisse zum Wasser in der Bäderstadt Baden; Kenntnisse zur Juragewässerkorrektion und geschärfte Wahrnehmung von vom Menschen geformten (Wasser-)Landschaften.

Target Groups:

Alle Interessierten (BSc / MSc), ab dem zweiten Semester.

Languages of Instruction:

German

Course Materials:

App «Actionbound» plus zusätzliche Informationen (Syllabus, aufgezeichnete Einführungsveranstaltung via OLAT).

Merkmale:

Responsible instructor:

Jan Seibert

Requirements:

Prerequisites:

Für die Exkursion: Smartphone, Powerbank vorteilhaft. Velo (Alternative zu Fuss). Informationen in Syllabus und aufgezeichneter Einführungsveranstaltung.
Für die Buchung des Moduls: Modul GEO 111 erfolgreich bestanden/ abgeschlossen.

Prior Knowledge:

Modul GEO 111

Assessment:

Excursion attendance (verified via app), submission of performance assessment.

Language of assessments: German

Module Introduction to Near and Middle Eastern Studies

06SM307-001 / Module

Description:

General description:

Das Modul vermittelt Grundwissen über Geschichte und Politik sowie Kulturen und Religionen der muslimisch geprägten Welt. Es vermittelt zudem Kenntnisse über wissenschaftliches Arbeiten in den Nah- und Mitteloststudien sowie der Islamwissenschaft einschliesslich der Kenntnis wissenschaftlicher Hilfsmittel und der Erschliessung von Fachliteratur. Die Fachgeschichte der Orientalistik wird kritisch reflektiert.

ECTS: 6

Learning Outcome:

Absolvierende verfügen über inhaltliche und methodische Grundkenntnisse des Fachgebiets. Sie sind vertraut mit den wichtigsten Hilfsmitteln der Nah- und Mitteloststudien sowie der Islamwissenschaft und können relevante Sekundärliteratur zu verschiedenen Themen recherchieren und kritisch auswerten.

Languages of Instruction:

Module Turkish 1

06SM307-015 / Module

Description:

General description:

Der zweiteilige Sprachkurs führt in die türkische Sprache ein. Er vermittelt die grundlegenden Kenntnisse, die für eine aktive und passive Sprachkompetenz in konkreten Alltagssituationen und verschiedenen Forschungskontexten benötigt werden.

ECTS: 6

Learning Outcome:

Die Studierenden haben grundlegende Kenntnisse in Grammatik und Wortschatz des Türkischen und können einfache originalsprachliche Sätze unter Anleitung analysieren und übersetzen.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Bettina Dennerlein
Rebecca Sauer

Requirements:

Assessment: schriftliche Prüfung

17. Dezember 2026, 10:15 - 11:00 Uhr (45 Minuten)

On-site (paper-pencil)

Grading Scale: 1-6, Half Grades Given

Repeatability: repeatable once, book again

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Organisation: Institute of Asian and Oriental Studies

Offered in: Fall Semester 2026

Module Critical Literature Review

06SM307-601 / Module

Description:

General description:

Studierende definieren in Absprache mit der Betreuungsperson ein klar abgestecktes Forschungsfeld und recherchieren dazu relevante Forschungsliteratur. In der schriftlichen Ausarbeitung soll das Forschungsfeld umrissen und auf der Grundlage der kritischen Auswertung der ausgewählten Literatur vertieft diskutiert werden.

ECTS: 6

Learning Outcome:

Die Studierenden lernen, sich eigenständig einen Überblick über den Forschungsstand zu einem Thema zu erarbeiten und die ausgewählte Forschungsliteratur in schriftlicher Form zu diskutieren.

Languages of Instruction:

Deutsch oder Englisch - gemäss individueller Absprache mit der Betreuungsperson

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Bettina Dennerlein
Rebecca Sauer

Requirements:

Prerequisites:

Dieses Modul steht nur Master-Studierenden offen. Es darf nicht von Bachelor-Studierenden als vorgezogenes Mastermodul gebucht werden.

Assessment:

schriftliche Arbeit

Seminararbeit 5'000 - 7'000 Wörter

Module Bachelor's Thesis

06SM307-BA / Bachelor Paper / BA-Arbeit

Description:

General description:

Die Bachelorarbeit ist der Ausweis über die Fähigkeit, eine wissenschaftliche Aufgabenstellung innerhalb der vorgegebenen Frist selbständig zu bearbeiten und adäquat darzustellen.

ECTS: 15

Learning Outcome:

Studierende können eine wissenschaftliche Fragestellung innerhalb der Nah- und Mitteloststudien formulieren, ausarbeiten und unter Beachtung der Standards guten wissenschaftlichen Arbeitens in der vorgegebenen Frist schriftlich bearbeiten. Sie sind imstande, wissenschaftliche Literatur selbständig zu recherchieren, zu gewichten sowie entlang der eigenen Argumentation kritisch zu diskutieren. Sie können eine arabischsprachige Quelle bearbeiten und mit Hilfe der Forschungsliteratur analysieren und kontextualisieren.

Module Master's Thesis

06SM307-MA / Master Paper / MA-Arbeit

Description:

General description:

Die Masterarbeit ist der Ausweis über die Fähigkeit, eine stufenspezifische wissenschaftliche Aufgabenstellung innerhalb der vorgegebenen Frist selbständig zu bearbeiten und adäquat darzustellen.

ECTS: 30

Learning Outcome:

Studierende können eine stufenspezifische nahost- und islamwissenschaftliche Fragestellung formulieren, ausarbeiten und unter Beachtung der Standards guten wissenschaftlichen Arbeitens in der vorgegebenen Frist schriftlich bearbeiten. Sie sind imstande, wissenschaftliche Literatur selbständig zu recherchieren, auszuwerten, entlang der eigenen Argumentation kritisch aufzuarbeiten und dabei den selbst gewählten Untersuchungsansatz zu konturieren. Sie können einen arabischsprachigen Grundlagentext mit Hilfe der Forschungsliteratur theoretisch informiert analysieren und kontextualisieren.

Module BIO 696 Introduction to Spatial Transcriptomics Data Analysis

07SMBIO696 / Lecture with Practical Exercises

Description:

General description:

Discover the exciting field of spatial transcriptomics and learn how to analyze spatially resolved gene expression data in our new introductory course. This class provides a foundational overview of the methods and technologies underlying spatial transcriptomics, a cutting-edge approach that combines gene expression profiling with spatial context.

Designed as an introduction, the course focuses on basic data analysis techniques to help participants build a strong understanding of sequencing-based and imaging-based spatial transcriptomics technologies. Hands-on exercises will offer practical experience, making the concepts accessible and easy to grasp.

As a special feature, the final day of the course is optional and dedicated to personalized learning. Participants are invited to bring their own datasets and receive expert guidance in applying the fundamental analysis methods covered during the course.

Whether you are new to the field or looking to build a foundational understanding, this course will equip you with the basic knowledge and skills needed to begin working with spatial transcriptomics data.

ECTS: 1

Notes:

for further information please check our website https://fgcz.ch/education/bioinformaticsTraining/spatial_course.html

Room at FGCZ

Learning Outcome:

By the end of this course, participants should be able to

- Summarize the principles of current spatial transcriptomics methods and data analysis concepts
- Critically evaluate spatial transcriptomics data and analysis results
- apply fundamental visualization and interpretation techniques to spatially resolved transcriptomics data
- discuss how spatial transcriptomics can be integrated into a research experiment

Module DSA 103 Advanced Chemical Data Science

07SMDSA103 / Lecture with Practical Exercises

Description:

General description:

Data science is an integral part of modern life sciences. This course will cover core topics of multivariate data analytics in the life sciences both in theory and practice. Key topics include:

- Core concepts in data science
- Molecular descriptions
- Data types
- Sources of data sets
- Data processing and transformation
- Exploring data: Multivariate data analysis
- Data reporting

ECTS: 4

Notes:

The final exam will take place on December 18th during lecture hours

Learning Outcome:

Understanding and applying the content covered

Target Groups:

BSc, MSc, PhD

Languages of Instruction:

English

Course Materials:

OLAT will be used for basic information and course communication, all course materials will be shared via the course repository linked in OLAT. Students must bring their own PC to the course. Some free software will be used, which we recommend to install before the first lecture. Details and information you can find on OLAT.

Merkmale:

Responsible instructor:

Johannes Schörgenhumer
Meredith Christine Schuman

Requirements:

Prior Knowledge:

Knowledge in basic statistics, data analytics and Python required. DSA101 recommended.

Assessment:

The grade will be based on weekly assignments, a computer-based project and a written exam for theory at the end of the semester (usually on the last day of the course) (in English).

A potential repetition of the exam (usually in written form) may be arranged by the responsible lecturer.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module DSA 105 Automation and Chemical Data Science in Practice

07SMDSA105 / Praktikum

Description:

General description:

Lab automation and data science are powerful tools in the modern-day life sciences. This course will serve as capstone for the minor program "Lab Automation and Chemical Data Science". In a two-semester student project all the content of the program lectures and exercises will be utilized: Selected data sets will be processed and analysed, ML models will be applied and experiments will be performed using lab automation tools to complement the data collection or validate predictions and classifications.

While the preparation of the data sets will be performed as home assignment, the practical work will be done in small groups upon arrangement. The research infrastructure of the Department of Chemistry, such as the HTEL, will be made available for the experimental part of the project.

The module is supposed to be done in parallel with or after the courses DSA 103 and DSA 104 and can be started in either the fall or spring semester.

Registration until 2 weeks after the start of the lecture period via email to Johannes Schörgenhumer (johannes.schoergenhummer@chem.uzh.ch)

ECTS: 4

Learning Outcome:

Practical application of the contents of the minor program "Lab Automation and Chemical Data Science"

Target Groups:

Participants of the Minor program "Lab Automation and Chemical Data Science"

Languages of Instruction:

English

Course Materials:

Materials and information will be shared using OLAT.

Module BIO 697 Spatial proteomics using mass spectrometry

07SMBIO697 / Lecture with Practical Exercises

Description:

General description:

Spatial proteomics methods are used for studying the organization and the function of proteins in their local micro-environment. Most imaging approaches can determine the spatial distribution of proteins at single- cell resolution, typically focusing on a small number of proteins but lacking the throughput necessary to achieve comprehensive proteome quantification.

The objective of this course is to introduce mass spectrometry (MS)-based spatial proteomics, employing liquid-chromatography (LC) or matrix-assisted laser desorption/ionization (MALDI) imaging MS methods.

The participants will learn how the field evolved from the analysis of entire tissues to the combination of laser-assisted microdissection and LC-MS proteomics for the simultaneous quantification of hundreds to thousands of proteins in specific regions of interest. Moreover, they will become aware of the potential of using MALDI-MS imaging approaches to integrate the spatial analysis of target proteins and other classes of biomolecules (i.e. glycans, small molecules).

The course is designed to bring theory and practice together and introduce the participants to basics MS-based spatial proteomics workflows, including sample preparation, state-of-the-art mass spectrometry, and software for data analysis.

ECTS: 2

Notes:

For further information please check our website <https://fgcz.ch/education/proteomics-courses/spatialmsproteomics-course.html>

Room: at FGCZ Y59

Learning Outcome:

By the end of this course, participants should be able to

- Summarize the principles of current mass spectrometry-based spatial proteomics technologies and applications
- Understand basic spatial proteomics sample preparation methods for the characterization of protein expression in tissue slides, by using laser microdissection LC-MS workflows and MALDI-MS imaging.
- Perform basic data analysis and evaluate the MS results
- know what to expect - understand the opportunities and limits of a spatial proteomics experiment

Module BIO 698 Mass Spectrometry-based Proteomics Training Course at FGCZ

07SMBIO698 / Lecture with Practical Exercises

Description:

General description:

Proteomics aims to investigate the entire content of proteins present in cells, tissues, body fluids, whole organisms, or in any type of biological sample. Mass spectrometry-based proteomics is currently the most comprehensive approach for quantitative profiling of proteins, their interactions and spatial localizations, and for the identification of protein modifications.

The objective of this course is to introduce the field of proteomics, focusing on fundamental concepts in sample preparation, peptide and protein identification, and quantification. These concepts are reinforced through the practical training using state-of-the-art mass spectrometers and open-source software for data analysis.

The course is designed to provide the participants with the knowledge necessary to access the resources and infrastructure of the proteomics unit at the Functional Genomics Center Zurich.

ECTS: 2

Notes:

for further information please check our website <https://fgcz.ch/education/proteomics-courses/msproteomics-course.html>

Room at FGCZ Y59

Learning Outcome:

By the end of this course, participants will be able to

- Summarize the principles of current high-resolution mass spectrometry (MS) technologies
- Understand basics proteomics sample preparation workflows
- Conduct basics hands-on operations on the LC-MS systems and run quality control procedures
- Perform basic data analysis for the evaluation of the MS results (with a focus on identification and quantification)
- know what to expect - understand the opportunities and limits of a proteomics experiment
- formulate a well designed proteomics experiment for a meaningful research question
- know about the FGCZ proteomics infrastructure and how to use it

Target Groups:

Doctoral students and post-doctoral scientists in Biology and Biomedicine. It is not essential to have any previous knowledge of the subject area. A minimal previous knowledge and understanding of analytical chemistry is highly recommended.

Module History of Muslim Cultures and Societies (Synergies between Cultural Formations in Text and Image) 06SM307-003 / Module

Description:

General description:

Die Vorlesung vermittelt einen Überblick über die Geschichte muslimisch geprägter Gesellschaften und Kulturen. Sie thematisiert die Quellen, auf denen die Kenntnisse beruhen, und die Methoden, mittels derer sie untersucht und interpretiert werden. Darüber hinaus wird die Sekundärliteratur zum Thema kritisch besprochen, wobei ein Fokus auf Grundfragen und aktuellen Debatten der Forschung liegt.

Die Vorlesung ist auch Teil der AOI-Modulreihe «Synergien kultureller Formationen in Text und Bild», die Indologie, Islamwissenschaft, Japanologie und Sinologie in Kooperation mit dem Museum Rietberg und anderen Museen jährlich anbieten. Die Modulreihe thematisiert auf der Grundlage textlicher und materieller Quellen synergetische Formationen in der Kultur von der Antike bis zur Gegenwart und nimmt dabei insbesondere die Themen «kulturelles Gedächtnis», «Religion» und «moderne Ideologien» in den Fokus. Mit diesem Ansatz fördert sie - über die fachlichen Grenzen hinaus - die kritische Auseinandersetzung mit selektiven Narrativen und deren Auswirkungen auf globale Herausforderungen wie Gesellschaft und Polarisierung.

ECTS: 3

Learning Outcome:

Absolvierende verfügen über grundlegendes Wissen zur Geschichte muslimisch geprägter Gesellschaften und Kulturen. Sie sind mit Forschungsdebatten vertraut und entwickeln ein kritisches Bewusstsein für die Fragen und Probleme der historischen Forschung.

Module Arabic in Research

06SM307-502 / Module

Description:

General description:

In diesem Modul werden Auszüge aus arabischer Forschungsliteratur und aus zentralen Referenztexten gelesen und übersetzt. Es knüpft inhaltlich an das im selben Semester parallel angebotene Seminar (307-500 Konstruktionen normativer Ordnung ODER 307-501 Kulturelle Praktiken und historische Strukturen) an. Bitte buchen Sie beide Module gemeinsam.

ECTS: 6

Learning Outcome:

Die Studierenden lernen in diesem Modul, mit dem Arabischen als Wissenschafts- und Quellsprache zu arbeiten.

Languages of Instruction:

Deutsch oder Englisch - siehe Lehrveranstaltung(en)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Bettina Dennerlein
Rebecca Sauer

Requirements:

Prerequisites:

Dieses Modul steht nur Master-Studierenden offen. Es darf nicht von Bachelor-Studierenden als vorgezogenes Mastermodul gebucht werden.

Assessment:

Portfolio (Referat, schriftliche Beiträge)

Alle Elemente des Portfolios müssen absolviert und bestanden werden. Wird ein Element nicht absolviert bzw. nicht bestanden, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden.

Grading Scale:

Pass/Fail

Repeatability:

repeatable once, book again

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline:

Module BME 314 Inflammation and Immune Response

07SMBME314 / Block Course

Description:

General description:

The central theme of this course is the molecular pathogenesis of Inflammation and Immune Response. Different molecular mechanisms of rheumatic diseases, chronic inflammatory diseases, and inflammatory bowel diseases will be discussed. Teaching will take place in the participating research laboratories in small groups and will include molecular biology and biochemistry experiments, as well as discussing relevant literature.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybiportal.uzh.ch>

Learning Outcome:

By the end of this module, you should be able to:

- Explain the molecular mechanisms contributing to and/or resulting from one of the following conditions:
 - Rheumatic diseases
 - Chronic inflammatory diseases (e.g., allergies, asthma)
 - Endometriosis
- Recognize the pathogenetic significance of disrupted signaling involving: Cell surface/nuclear receptors and epigenetic modifications
- Illustrate the role of at least one cell type in the pathogenesis of common diseases, such as:
 - peripheral white blood cells (PWBCs)
 - T-cells and ILCs
 - Macrophages
 - Fibroblasts
 - Specialized epithelial lineages
- Describe the principles and applications of at least two of the following laboratory techniques:
 - Quantitative RT-PCR
 - RNA sequencing (RNA-seq)
 - Western Blotting
 - ELISA
 - Immunofluorescence
 - Microscopy
 - Flow cytometry
 - Reporter gene assays
 - Organoid culture

Key Skills

By the end of the module, and with appropriate guidance, you should be able to:

- Conduct experimental procedures and use laboratory equipment competently, confidently, and safely.
- Collect and record scientific data, analyze results, and interpret them within the context of existing theories and literature.
- Present findings effectively in both oral presentations and written reports.

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Gabriela Kania

Requirements:

Prerequisites: Basic studies completed

Assessment: A written report is submitted on the first half of the practical (50%), the second half will be documented by a lecture at the minisymposium (50%).

Module EEE 268 Biodiversity: from spatial planning to implementation

07SMEEE268 / Course

Description:

General description:

Biodiversität berührt die Felder der Bauplanung und des Baurechts auf vielfältige Weise, insbesondere im urbanen Raum. Dort kann es zu vielfältigen Konflikten kommen, doch finden sich auch vielgestaltige Lösungen und Chancen. Belange des Biodiversitätsschutzes können in die Gestaltung urbaner Räume einbezogen werden, und Biodiversität kann zu einer Steigerung der Lebensqualität beitragen.

Der Park und Campus Irchel ist ein lokaler Hotspot der Biodiversität, unterliegt aber auch einem erheblichen menschlichen Nutzungsdruck. Im vorliegenden Kurs werden insbesondere am Beispiel des Campus Irchel Aspekte der Verschränkung von Biodiversität und menschlicher Bautätigkeit beleuchtet:

- Bau- und Planungsrecht
- Ökologische Bilanzierung (Punktesystem mit Ausgleichs- und Ersatzmassnahmen)
- Vorgehen bei Eingriffen in naturschutzfachlich relevante Lebensräume
- Gärtnerische Pflegemassnahmen zur Förderung der Biodiversität
- Architektur und Biodiversität
- Digitalisierung von Pflegemassnahmen
- Kosten von Pflege-, Ersatz- und Baumassnahmen
- Verschränkung von Biodiversität und (hoch-)schulischer Lehre
- Erholungsnutzung und Umweltbildung

Geeignet für Studierende, die sich für Biodiversität im Bereich Planung und Management interessieren, sowie Studierende der Biodiversität im Nebenfach (z.B. Hauptfächer Architektur, Recht, Geographie, ...)

ECTS: 2

Notes:

Weitere Dozenten: Jennifer Vonlanthen, Judith Rohrer, Flurina Gradin, Ilaria Brunetti

Repetitionsprüfung s. link <https://www.mnf.uzh.ch/de/studium/pruefungen.html> Bitte melden sie sich für die Wiederholungsprüfung nicht später als drei Wochen vor der Prüfung beim Modulverantwortlichen an.

Learning Outcome:

Nach erfolgreichem Abschluss des Moduls sollten die Studierenden:

- die Grundlagen des Zusammenspiels von Baurecht, Bauplanung und Biodiversität kennen.
- ein grundlegendes Verständnis der Vorgehensweise bei Konflikten in diesen Feldern haben.
- einige planungsrelevante Elemente der Biodiversität (Arten, Lebensräume) im Raum Zürich kennengelernt haben.

Module BME 313 Cardiac and Vascular Pathophysiology

07SMBME313 / Block Course

Description:

General description:

The central theme of this course is vascular health and pathogenesis of cardiovascular diseases. Various biological mechanisms involved in these processes will be explored.

Teaching will take place in the participating research laboratories, with students working in groups of two or four. The course will include molecular biology and biochemistry techniques, with experiments and results discussed in the context of relevant scientific literature.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybiportal.uzh.ch>

Learning Outcome:

By the end of this module, you should be able to:

- Explain the molecular mechanisms contributing to and/or resulting from vascular and cardiac pathologies.
- Recognize the pathogenetic significance of disrupted signaling involving:
 - o Oxidative stress
 - o Cell surface receptors
 - o Nuclear receptors
 - o Epigenetic modifications
- Illustrate the role of different cell types in the pathogenesis of vascular and cardiometabolic diseases, such as:
 - o Adipocytes
 - o Macrophages
 - o Endothelial cells
 - o Fibroblasts
 - o Pericytes
 - o cardiomyocytes
- Describe the principles and applications of at least two of the following laboratory techniques:
 - o Quantitative RT-PCR
 - o Western Blotting
 - o ELISA
 - o Immunofluorescence Microscopy
 - o Chromatography
 - o Fluorescence activated signaling

Key Skills:

By the end of the module, with appropriate guidance, you should be able to:

- o Conduct experimental procedures using appropriate laboratory equipment competently, confidently, and safely.
- o Collect, record, and analyze scientific data, interpreting results within the context of existing theories and literature.
- o Effectively present findings in both oral and written formats, such as presentations and scientific reports

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Omolara Olushola Ogunshola

Requirements:

Prerequisites: Basic studies completed

Assessment: The first half of the practical will be graded (50%) via a written report submitted to individual lab heads. The second lab placement will be graded after the students give a presentation at the mini-symposium (50%). Both will be marked out of 6.

Each student will also receive marks out of 6 for i) quality and interest in practical work and ii) engagement and knowledge in theoretical background. This grading is assigned by the individual labs.
Final grade will be the average of the 6 scores.

Module EEE 336 Measuring and Monitoring Genetic Diversity for Conservation

07SMEEE336 / Block Course

Description:

General description:

This course introduces the essential role of genetic diversity (GD) in conservation biology. You will learn key concepts in population and molecular genetics to understand the factors that shape GD, as well as the metrics that can be derived from genotype data to measure it. Through practical exercises, you will gain hands-on experience calculating GD metrics using R. The course also presents the policy frameworks that govern the use of genetic resources—most notably the Convention on Biological Diversity and the Nagoya Protocol—and explores how GD metrics contribute to genetic diversity monitoring at national and global scales. Group projects will allow you to apply theoretical concepts to real data, evaluate conservation scenarios, and identify future research priorities.

Course Structure

Weeks 1–3: Lectures, readings, discussions, and project work

End of Week 3: Written exam

Week 4: Project work and presentations

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

www.mybioportal.uzh.ch (<https://www.mybioportal.uzh.ch/>)

Learning Outcome:

After successfully completing the module, students should be able to:

- Explain what genetic diversity is from an evolutionary perspective, including its determinants and its role in adaptation and population persistence.
- Calculate and interpret a range of genetic diversity indices from different types of genetic data, and understand what each metric reveals about evolutionary processes.
- Be able to propose a simple design a study to measure and monitor genetic diversity in a target species.
- Demonstrate awareness of the Convention on Biological Diversity and the Nagoya Protocol, and understand its recommendations related to genetic diversity monitoring.

Course Materials:

Chapters of Conservation and the Genomics of Populations by Fred W. Allendorf, W. Chris Funk, Sally N. Aitken, Margaret Byrne, and Gordon Luikart (OUP Third Edition) will be made available as a PDF.

Merkmale:

Target Group: Suitable for English Speakers

Module BME 315 Diseases of Autonomous Systems -Metabolism and Cellular Adaptation

07SMBME315 / Block Course

Description:

General description:

The central theme of this course is the molecular pathogenesis of metabolic diseases and mechanisms of cellular adaptation. Different molecular mechanisms will be discussed. Teaching will take place in the participating research laboratories in small groups and will include molecular biology and biochemistry experiments, as well as discussing relevant literature.

At the end, students will present their knowledge in a written report (1st module) as an oral presentation in a minisymposium (2nd module).

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE

<https://www.mybioportal.uzh.ch>

Learning Outcome:

By the end of this module, you should be able to:

- Explain the molecular mechanisms contributing to and/or resulting from one of the following conditions:
 - o Neurological disorders (Noain)
 - o Hemolytic diseases (Schär)
 - o Neuropathies related to Sphingolipidoses (Hornemann)
 - o Diseases related to immune metabolism (Müller-Durovic)
 - o Metabolic change in T2DM (Cavelti-Weder)
 - o Cholesterol and Lipoprotein metabolism (Robert)
- Recognize the pathogenetic significance of disrupted metabolic pathways involving:
 - o Lipid and Sphingolipid metabolism
 - o Nuclear receptors
 - o Epigenetic modifications
- Illustrate the role of at least one cell type in the pathogenesis of common diseases, such as:
 - o blood cells
 - o Neurons
 - o Hepaticocytes
 - o Macrophages
 - o Fibroblasts
- Describe the principles and applications of at least two of the following laboratory techniques:
 - o Quantitative RT-PCR
 - o RNA sequencing (RNA-seq)
 - o Western Blotting
 - o ELISA
 - o Immunofluorescence
 - o Microscopy
 - o Flow cytometry

- o Reporter gene assays
- o High Resolution Mass spectrometry
- o Stable isotope tracing
- o (multi)-omics data analysis

Key Skills

By the end of the module, and with appropriate guidance, you should be able to:

- o Conduct experimental procedures and use laboratory equipment competently, confidently, and safely.
- o Collect and record scientific data, analyze results, and interpret them within the context of existing theories and literature.
- o Present findings effectively in both oral presentations and written reports.

Merkmale: Target Group: Suitable for English Speakers

Module Addressing the Challenges of Digital Transformation

06SM222HD / Module

Description:

General description:

Die fortschreitende Digitalisierung stellt Schüler:innen und Lehrpersonen im Schulalltag vor vielfältige Herausforderungen. Diese Veranstaltung vermittelt angehenden Lehrpersonen die notwendigen Kompetenzen, um digitale Medien verantwortungsvoll und nachhaltig im Unterricht einzusetzen. Themen wie Ablenkung, Cybermobbing, digitale Ungleichheiten und informationelle Selbstbestimmung stehen ebenso im Fokus wie gesundheitliche Aspekte und digitale Nachhaltigkeit. Ein besonderer Schwerpunkt liegt auf der Analyse von Fallbeispielen, in denen die Integration digitaler Medien im Schulalltag und Unterricht zu Spannungsfeldern, Ambivalenzen oder unerwünschten Folgen geführt hat. Die Kursteilnehmenden reflektieren eigene und fremde Erfahrungen und entwickeln daraus praxisnahe Strategien für einen sinnvollen Einsatz digitaler Medien und die Förderung von Medienkompetenz.

ECTS: 3

Learning Outcome:

Am Ende der Veranstaltung können die Kursteilnehmenden:

- a) die Digitalisierung im Bildungsbereich aus unterschiedlichen Perspektiven analysieren und kritisch reflektieren;
- b) zentrale Herausforderungen der Digitalisierung sowie mögliche Handlungs- und Lösungsansätze benennen, erläutern und beurteilen;
- c) konkrete Herausforderungen aus der schulischen Praxis aus verschiedenen Perspektiven analysieren und reflektieren;
- d) praxisnahe Strategien für einen sinnvollen Einsatz digitaler Medien sowie für den Umgang mit digitalen Herausforderungen entwickeln;
- e) die eigenen Handlungsmöglichkeiten und Grenzen im Umgang mit den Herausforderungen der Digitalisierung reflektieren.

Merkmale:

Responsible instructor: Dominik Petko

Requirements:

Assessment: Portfolio (Einzel- und Gruppenarbeiten, Präsentationen, sowie schriftliche Reflexionen). Für das Bestehen des Moduls müssen alle Bestandteile des Portfolios vollständig und in angemessener Qualität bearbeitet werden.

Grading Scale: Pass/Fail

Repeatability: repeatable once, book again

Module Basics Ukrainian 1

06SM480-028 / Module

Description:

General description:

Der Kurs "Grundlagen Ukrainisch 1" richtet sich an Anfänger:innen ohne Vorkenntnisse, die die phonetischen, orthographischen und grammatischen Grundlagen des Ukrainischen erlernen möchten. Die Studierenden erarbeiten einen ersten Grundwortschatz und erwerben somit erste kommunikative Kompetenzen. Der Kompetenzerwerb erfolgt lernzielorientiert durch den Einsatz abwechslungsreicher Lehr- und Lernmethoden sowie Medien. Das Modul umfasst 2 Lektionen Präsenzunterricht pro Woche sowie 4 Lektionen fakultatives Tutorat pro Semester für den Erwerb der kyrillischen Schreib- und Druckschrift.

ECTS: 3

Notes:

Teilnehmende mit Vorkenntnissen sowie Herkunftssprecher:innen können nach Rücksprache mit der Dozentin und der Vereinbarung individueller Lernziele zum Kurs zugelassen werden.

Learning Outcome:

Erwerb phonetischer Kompetenzen, Grundgrammatik und Basisvokabulars, Text- und Hörverständnis einfacher Mitteilungen, Formulierung einfacher Aussagen in schriftliche und mündlich. Das Modul führt zum Niveau A1.1 gemäß Europäischem Referenzrahmen.

Languages of Instruction:

Deutsch, Ukrainisch

Merkmale:

Target Group: Open to School Students

Responsible instructor:

Margaryta Schneider

Requirements:

Prerequisites:

keine

Assessment:

Portfolio (Prüfung, On-site 70%, mündliche und schriftliche Übungen 30%)

Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden.

Grading Scale:

Module Arabic 3

06SM307-009 / Module

Description:

General description:

Der Sprachkurs führt in die arabische Schriftsprache ein. Ziel des Kurses ist der Aufbau eines breiten Fundaments in der arabischen Grammatik, das zur selbständigen Erschliessung moderner arabischer Texte befähigen soll.

ECTS: 9

Learning Outcome:

Die Studierenden haben erweiterte Kenntnisse in Grammatik und Wortschatz des Arabischen und können einfache originalsprachliche Texte eigenständig in die Zielsprache übersetzen.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Bettina Dennerlein

Rebecca Sauer

Requirements:

Prerequisites:

Für das Modul werden Sprachkenntnisse in Arabisch vorausgesetzt, die dem Modul Arabisch 2 entsprechen.

Assessment:

Portfolio (schriftliche Aufgaben 30%, schriftliche Prüfung 70%)

Schriftliche Prüfung: 15. Januar 2027 12:00 - 15:00 Uhr

On-site (paper-pencil)

Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden.

Grading Scale:

1-6, Half Grades Given

Repeatability:

repeatable once, book again

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Advanced Survey of Muslim Cultures and Societies (Master's Exam)

06SM307-801 / Module

Description:

General description:

Die Prüfung besteht aus einem schriftlichen und mündlichen Anteil. Es werden unterschiedliche Themen aus dem Gesamtbereich der Nah- und Mitteloststudien geprüft, um ein breites Wissen der Absolvierenden sicherzustellen. Im Zentrum steht die selbständige Auseinandersetzung mit nah- und mittelostwissenschaftlicher Forschungsliteratur und ihren Implikationen.

ECTS: 9

Notes:

Zur Buchung des Moduls beachten Sie bitte die Hinweise auf unserer Homepage: <https://www.aoi.uzh.ch/de/studies/studyorganization/courseofstudies/booking.html>

Learning Outcome:

Absolvierende können selbständig Sekundärliteratur zu verschiedenen Themen recherchieren und bewerten. Sie können sich schriftlich sowie mündlich adäquat zu komplexen Fragestellungen nah- und mittelostwissenschaftlicher Forschung äussern und Forschungsmeinungen in einen breiteren Zusammenhang setzen.

Languages of Instruction:

Deutsch oder Englisch - gemäss individueller Absprache mit der Betreuungsperson

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Module BIO 444 Quantitative Biosciences

07SMBIO444 / Lecture with Practical Exercises

Description:

General description:

The aim of this lecture is to provide an introduction into the use of mathematical and quantitative approaches in biology. We will introduce mathematical approaches and concepts such as dynamical systems, stochasticity, and networks. We will show how mathematical models building on these concepts can be used to understand biological systems from diverse domains. We will explore how complex biological systems are mapped on simple models, discuss the insights that can be gained by such approaches but also their inherent limitations.

ECTS: 3

Notes:

Number of participants: maximum 40

Learning Outcome:

Students will

- be able to explain and apply mathematical approaches such as dynamical systems, stochasticity, and networks to biological systems.
- learn how to construct and utilize mathematical models to represent and analyze complex biological systems from various domains.
- be able to critically assess the insights gained from mathematical models and understand their limitations in accurately representing biological complexity

Merkmale:

Responsible instructor: Roger Kouyos

Requirements:

Prerequisites: Basics in analysis and stochastics (e.g. MAT182, MAT183)

Assessment: Form, duration and timing of the assessment(s): (if several, define how the final grade is composed)

Depending on the number of participants written or oral exam

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Spring Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Module BME 338 Introduction to Machine Learning (ML) in Biomedicine

07SMBME338 / Course

Description:

General description:

Overview of ML, Data Preprocessing and Data Exploration

Supervised Learning: Regression & Supervised Learning: Classification & Advanced Classification Techniques

Unsupervised Learning: Clustering and Dimensionality Reduction

Neural Networks and Deep Learning & Advanced Neural Networks and Deep Learning (CNN, Transformer, Generative approaches)

Model Evaluation and Validation & Ethical Considerations and Interpretability in ML

Using Python and Python libraries, such as Scikit-Learn and Pytorch, for applying ML algorithms to exemplary biomedical datasets

ECTS: 3

Notes:

This module is jointly offered for students of the Faculty of Science (advanced Bachelor and Masters students) and students of the Medical Faculty (Mantelstudium) to further communication and interdisciplinary collaboration of future medical experts and scientists in the field of Digital Health.

Course materials will be provided on OLAT. Note that the course appears in OLAT only at the start of the semester. For questions, please contact the DQBM Managing Director (head.department@dqbm.uzh.ch).

The course takes place in room SOF-E-07.

Learning Outcome:

Upon completion of this course, participants will:

1. understand advanced unsupervised and supervised machine learning (ML) algorithms, together with their properties;
2. be trained in applying them to different ML and data processing tasks using Python libraries and exemplary biomedical datasets;
3. will know how to evaluate ML systems in a systematic fashion, e.g., for medical decision making, and how to use them to analyze complex datasets.

Languages of Instruction:

Requirements:

Prior Knowledge:

Programming skills as documented by the successful competition of BIO134 Programming in Biology, or a similar introductory course on scientific programming, such as STA433 Advanced R Programming, are mandatory

As the application domain of this introductory course is in biomedicine and medicine, interest in these fields is expected. Additional prior exposure to computational statistics is beneficial

Assessment:

1. Participants are required to pass two written onsite exams (mid-term, final; 1h each) with Q&A and a programming quiz. The Q&A will deal with concepts of different ML algorithms, their application domains, parameterization, and quantitative evaluation. A coding exercise may require the generation of pseudo code for fulfilling a predefined task, or transforming given pseudocode into functional Python functions.

2. In addition, students will participate in a seminar style paper presentation that will require them to choose and present a recent (i.e., advanced) ML algorithm and illustrate its use in a small demonstrator project.

The two exams and the final paper presentation will account for 33% of the final grade each.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module Interdisciplinary Primer on Language Evolution Research

06SM274-501 / Module

Description:

General description:

This module includes lectures by experts in the disciplines participating in the study of language evolution, including linguistics and psycho/neuro-linguistics, biology/anthropology, philosophy, psychology, neuroscience, neuroinformatics, computer science/computational linguistics, and mathematics. In addition to the lectures, practical sessions reinforce students' knowledge and deepen their understanding through an interdisciplinary approach.

ECTS: 6

Learning Outcome:

Students will acquire grounding knowledge in all relevant disciplines in the study of language evolution, with particular foci on theories, concepts and terminology used in evolutionary language science and the conceptual foundations of empirical research in the relevant disciplines. Students will familiarize themselves with key literature in the field.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Balthasar Bickel

Requirements:

Prerequisites:

This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module.

Assessment:

written exam

date of written exam: 22 January 2027

Grading Scale:

Module Introduction to Evolutionary Language Science

06SM274-502 / Module

Description:

General description:

The lecture introduces to the key questions in interdisciplinary research on language evolution, focusing on the empirical study of the origins of language and its ongoing dynamic.

ECTS: 3

Learning Outcome:

Familiarity with central questions and findings in interdisciplinary research on the evolution of language.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Balthasar Bickel

Requirements:

Prerequisites:

Familiarity with basic terms and concepts in at least one of the following disciplines: biology, linguistics, neuroscience, psychology, computer science/ mathematics, acquired during BA studies or in tutorials and pre-courses preliminarily provided within the Master's program.
This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module.

Assessment:

written exam

date of written exam: 21 January 2027

Module Research Related Competences

06SM274-600 / Module

Description:

General description:

The Research Related Competences module provides students with knowledge and practical experience across key phases of designing and carrying out empirical research projects, ensuring adherence to the highest standards of research practice. This module is closely integrated with the Master's thesis module, where students will further advance and apply their competences in executing and finalizing their research project. Each performance element within this module can be supervised by at least one thesis supervisor. Supervision takes place in consultation hours and/or colloquia.

ECTS: 30

Notes:

The module will be booked through the study program coordinator upon completion of the whole portfolio.

Learning Outcome:

Students will develop competencies in the following areas:

1. Literature review
2. Study preregistration
3. Data management planning
4. Ethics approval
5. Pilot study - design and execution
6. Data collection and processing
7. Interdisciplinary project progress reporting
8. Interdisciplinary discussions on language evolution

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Paul Widmer

Requirements:

Prerequisites:

Students must submit a work plan to the supervisors which includes a timetable for the submission of evidence for each performance element.
This plan must be signed by all supervisors.
This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module.

Assessment:

Portfolio:

1. Literature review (part I): written work;
2. Study preregistration: documented practical work;
3. Data management plan: documented practical work;
4. Ethical approval: documented practical work;
5. Pilot study - design and execution: documented practical work;
6. Data collection and processing (part I): documented practical work;
7. Interdisciplinary project progress reports: oral presentation;

8. Interdisciplinary discussions on language evolution: oral presentation.
In order to pass the module, 7 out of the 8 performance elements of the portfolio must be successfully completed.

Except for the "Interdisciplinary project progress reports" and "Interdisciplinary discussions on language evolution", the performance elements should be achieved in the order in which they are listed.

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (Every Semester)

Module Social Orders and Dynamics of Social Change

06SM307-005 / Module

Description:

General description:

Das Wahlpflichtmodul vertieft die Kenntnisse zu normativen Grundlagen muslimisch geprägter Gesellschaften und lotet das dynamische Verhältnis von Recht und Gesellschaft aus.

ECTS: 6

Learning Outcome:

Die Studierenden lernen anhand historischer und gegenwärtiger Beispiele Dynamiken zwischen religiösen wie säkularen normativen Ordnungen, Recht und sozialen Entwicklungen in muslimisch geprägten Gesellschaften kennen und diese eigenständig zu bearbeiten.

Languages of Instruction:

Deutsch oder Englisch - siehe Lehrveranstaltung(en)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Bettina Dennerlein
Rebecca Sauer

Requirements:

Prerequisites:

Erfolgreicher Abschluss des Pflichtmoduls «Religion, Geschichte, Gesellschaft in muslimisch geprägten Regionen» oder eines äquivalenten Moduls aus dem Modulangebot des früheren BA-Programms "Islamwissenschaft"

Assessment:

Portfolio (Referat 25%, schriftliche Arbeit 75%)

Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden.

Module Construction of Normative Orders

06SM307-500 / Module

Description:

General description:

Das Modul widmet sich der Frage, wie innerhalb der diskursiven Traditionen des Islam in Geschichte und Gegenwart unter Bezug auf inner- wie ausserreligiöse Referenzen normative Ordnungen konstruiert werden. Wie haben sich islamisches Recht, Theologie, Sufismus aber auch Wissenschaften oder politische Ideen entwickelt und welche Wirkmächtigkeit entfalten sie?

Ergänzend zum Modul wird die Übung «Arabisch in der Forschung» angeboten, in der relevante akademische arabische Texte und Quellen gelesen und übersetzt werden. Bitte buchen Sie dieses Pflichtmodul parallel zu dem hier angebotenen Seminar im selben Semester.

ECTS: 9

Learning Outcome:

Ziel des Moduls ist die Vertiefung der fachlichen Kenntnisse anhand konkreter Forschungsthemen aus dem Bereich Konstruktionen normativer Ordnung. Die Studierenden können eigenständig komplexe islamwissenschaftliche Fragestellungen entwickeln und diese in Auseinandersetzung mit Quellen und Forschungsliteratur strukturiert selbständig erarbeiten sowie schriftlich und mündlich erörtern.

Module Academic Writing Colloquium

02SM120WM23 / Exercise Group

Description:

General description:

Das Schreibkolloquium richtet sich an ambitionierte Studierende, welche sich in Anwendung des Öffentlichen Rechts vertieft mit der juristischen Arbeitstechnik befassen wollen.

Die Informationen zum Schreibkolloquium finden sich auf der Webseite des Lehrstuhls Moeckli (<https://www.scil.uzh.ch/de/institutsmitglieder/moeckli/HS-2026/Schreibkolloquium.html>).

ECTS: 3

Learning Outcome:

Vertiefen der bereits vorhandenen Kenntnisse der juristischen Arbeitstechnik

Target Groups:

Studierende der Aufbaustufe

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor:

Alain Griffel

Requirements:

Prerequisites:

Abgeschlossene Assessmentstufe. Es wird vorausgesetzt, dass die Teilnehmenden bereits mindestens eine Fallbearbeitung verfasst haben. Zudem wird die Bereitschaft vorausgesetzt, die im Assessment erworbenen Kenntnisse im Öffentlichen Recht im Rahmen einer schriftlichen Arbeit zu vertiefen.

Prior Knowledge:

Gute Kenntnisse der juristischen Arbeitstechnik und des Öffentlichen Rechts (Assessmentstufe) werden vorausgesetzt.

Assessment:

Schriftliche Arbeit und aktive Beteiligung an den Blockveranstaltungen

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated twice

Organisation:

Module Law and Statistics: Introduction to Quantitative Methods for Lawyers

02SM120WM21 / Course

Description:

General description:

In einer Zeit, in der immer mehr rechtliche Entscheidungen und politische Massnahmen auf empirischen Daten basieren, ist ein Verständnis der Statistik für Juristen unverzichtbar. Statistische Analysen bieten - oft noch nicht hinreichend beachtete, manchmal auch falsch angewendete - Werkzeuge, um etwa Diskriminierung in der Rechtspraxis aufzudecken, die Effektivität von Gesetzen zu bewerten oder Prognosen über Gerichtsentscheidungen und Risiken in rechtlichen Verfahren zu erstellen. Die Vorlesung behandelt sowohl grundlegende Konzepte der Statistik wie deskriptive Analysen und Wahrscheinlichkeitsrechnung als auch Methoden wie Regressionsanalysen und Hypothesentests. Wo immer möglich, sollen Rechtsfälle aus der Praxis verwendet werden, um statistische Konzepte einzuführen. Während die (neu als Mastervorlesung anzubietenden) Vorlesung «Introduction to Empirical Legal Studies» darauf abzielt, Studierende zu befähigen, eigene Datenanalysen (im Statistikprogramm R) durchzuführen, richtet sich die Vorlesung «Recht und Statistik» primär auf die Entwicklung eines konzeptuell-theoretischen Verständnisses für die Verbindung von Recht und Statistik. Einfache Berechnungen werden mit dem Taschenrechner durchgeführt. Eine Einführung in R wird nicht gegeben.

Die Vorlesung soll insbes. als Einstiegsvorlesung in quantitative Methoden den Grundstein legen für spätere Vertiefungen und Erweiterungen (z.B. in der Legal Tech-Vorlesung, der Vorlesung «Introduction to Empirical Legal Studies», «Introduction to Programming and Computational Thinking for Lawyers»).

1. Statistikbasierte Argumentation im Recht
2. Grundlagen der deskriptiven Statistik
3. Wahrscheinlichkeitsrechnung und ihre Bedeutung im Recht
4. Hypothesentests und statistische Inferenz
5. Korrelation und Kausalität
6. Regressionsanalyse in der Rechtswissenschaft
7. Diskriminierungsanalysen mit statistischen Methoden
8. Statistische Fehler und ihre Bedeutung für rechtliche Entscheidungen
9. Prognosemodelle und Recht
10. Ethik und statistische Unsicherheit im Recht

ECTS: 3

Notes:

Nicht-programmierfähiger Taschenrechner ist mitzubringen.

Learning Outcome:

Die Vorlesung «Recht und Statistik» verfolgt das Ziel, Studierenden der Rechtswissenschaften grundlegende statistische Methoden und deren Anwendungen in diversen Rechtskontexten zu vermitteln. Ziel ist es, dass die Studierenden verstehen, in welchen Fällen, zu welchen Zwecken und mit welchen Limitationen man juristische Fragestellungen quantitativ analysieren kann. Ein Fokus wird auf die statistikbasierte Argumentation vor Gerichten gelegt.

Module Online Course I: Introduction to Computational Law

02SM90WM105 / Course

Description:

General description:

The online course teaches the basics of computer and web based legal research.

It aims to provide advanced students with the skills they need in order to design and conduct their own empirical projects based on text data (typically as part of a dissertation or master's thesis). This includes basics in programming, Natural Language Processing (NLP) for law, web scraping and the use of large language models (LLMs).

The course is conducted solely online and will be self-paced.

Course structure:

- First Steps in Python
- Text Preprocessing
- Analyze Texts
- Web Scraping
- Large Language Models

ECTS: 6

Notes:

For this module, the general UZH booking and cancellation deadlines apply, with booking via the module booking tool.

Learning Outcome:

The aim is to enable law students to independently carry out a small project using computational text analysis. The course offers a practical introduction to a future-oriented skill for students who work primarily with texts and their analysis.

Target Groups:

Master and doctoral students. The online course is primarily aimed at law students. It is also open to students from non-technical degrees, i.e. study courses in which the basics of Natural Language Processing or computer science have not yet been regularly taught.

Languages of Instruction:

English

Course Materials:

Module Corporate Law: Cases, Theories, Practice

02SM90WM102 / Course

Description:

General description:

DESCRIPTION

Why Corporations are so important, debated and sometimes controversial? At once drivers of innovation and lightning rods for criticism, corporations sit at the center of law, politics, and society.

This course examines the most topical and influential theories, cases, and developments in corporate law, focusing on the legal principles and judicial reasoning that shape corporate governance, mergers and acquisitions, shareholder rights, and fiduciary duties.

Through landmark cases, major corporate scandals, and significant reforms, the course explores how corporate law has evolved within the world's most influential legal frameworks. Particular attention will be given to Delaware's courts—especially the Court of Chancery—whose jurisprudence has shaped U.S. corporate practice and influenced governance standards worldwide. Students will also engage with pivotal decisions from the United Kingdom, Canada, Australia, Singapore, and leading continental European jurisdictions such as Germany, France, and Switzerland, evaluating their impact on global corporate regulation.

Combining a case-based approach with theoretical analysis, the course provides a robust understanding of corporate structures and governance. Comparative discussions will equip students to critically assess how corporate law responds to economic, political, technological, and environmental change—preparing them to navigate complex legal issues in an era of rapid global transformation.

COURSE STRUCTURE

The course will consist of lecture sessions that utilized the case law method and interactive discussion of key lecture topics derived from the readings and elaborated upon in class. The required readings and relevant documentation will be available to be downloaded from the course readings page on the course website (website link). Students should read the mandatory readings for each week's lecture and come to class ready to participate. The final lecture will include an examination review session that will cover relevant course themes and topics. The examination will be written and open book. Students will be encouraged to discuss course themes and materials in preparation for the examination.

ECTS: 6

Notes:

PODCAST

The lectures will be recorded and offered online as podcasts. Please note that due to technical difficulties not all classes may be recorded or there may be technical difficulties with the recordings. Students are encouraged to attend all lectures. If they miss lectures, they take the risk that technical problems or disturbances in the online recordings may make it difficult or impossible for them to access the lectures. The loss of access to the recordings is not sufficient cause for an appeal against the examination. Scripts or other materials declared as examination relevant take priority over the podcasts. In case of ambiguity contact the lecturer immediately. The recordings are for private use only. Redistribution in whatever form, in whole or in part, is not permitted without consent of the lecturer and may be punished by disciplinary measures or otherwise.

Learning Outcome:

An ability to identify the key issues in the context of complex litigation

Languages of Instruction:

English

Course Materials: Cases discussed in American courts, Spamann Corporations in 100 pages, Spamann & Frankenreiter Corporation Case book (<https://opencasebook.org/casebooks/261-corporations/>)

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Marco Dell'Erba

Requirements:

Module Corruption and Organized Crime

02SM90WM107 / Course

Description:

General description:

Corruption and organized crime pose a significant threat to global development, governance, and economic stability. This course addresses the urgent need for well-informed professionals equipped with the knowledge and skills to combat corruption and organized crime effectively. By understanding international and European anti-corruption and anti-organized crime standards and practices, students will be better prepared to contribute to ethical governance, transparency and security in various sectors.

The course will familiarize students with the key international and European documents, intergovernmental organizations, and best practices from individual countries and organizations in the fields of preventing and combating corruption and organized crime. Students will explore the legal frameworks, policies, and practical measures implemented worldwide to address corruption and organized crime. The course will provide an in-depth understanding of the global anti-corruption and anti-organized crime landscape, emphasizing the importance of transparency, accountability, ethical governance, and public security.

ECTS: 6

Learning Outcome:

- Understand the fundamental concepts and definitions related to corruption and organized crime, including their causes, consequences, and key characteristics.
- Analyze key international and European anti-corruption and anti-organized crime documents and conventions, including the United Nations Convention Against Corruption (UNCAC), OECD Anti-Bribery Convention, and the United Nations Convention against Transnational Organized Crime (UNTOC).
- Identify the roles and functions of major intergovernmental organizations in the fight against corruption and organized crime, such as the IMF, World Bank, GRECO, and other international bodies.
- Examine best practices and successful strategies employed by various countries and organizations to tackle corruption and organized crime, including sector-specific anti-corruption practices and law enforcement strategies for combating organized crime.
- Develop critical thinking skills to assess the effectiveness of anti-corruption and anti-organized crime measures and propose improvements, considering the intersection between these two issues in global governance.

Module Labor and Employment Law (MLaw)

02SM90WM109 / Course

Description:

General description:

Ein ausführliches Programm findet sich auf der Webseite des Lehrstuhls Rudolph.
(Siehe Link unter Lehrveranstaltung)

ECTS: 6

Learning Outcome:

Aneignung vertiefter Kenntnisse im Arbeitsrecht.

Target Groups:

Studierende der Masterstufe, Mitarbeiter Human Resources

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Roger Rudolph

Requirements:

Prerequisites: Der vorgängige Besuch der Bachelorvorlesung im Arbeitsrecht ist empfohlen, aber nicht zwingende Voraussetzung.

Assessment: Es findet eine Prüfung statt. Die Prüfungsart wird nach Ablauf der Stornierungsfrist festgelegt. Sie besteht entweder in einer mündlichen oder schriftlichen Prüfung. Die definitive Prüfungsart wird innert einer Woche nach Ablauf der Stornierungsfrist im WebVVZ publiziert.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated as necessary

Organisation:

Offer pattern: 1 Semester (Irregular)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 20.10.2026 24:00

Organisation: Faculty of Law

Offered in: Fall Semester 2026
Fall Semester 2025

Component of:

Module Life worth living – What Does it Mean to Live a Flourishing Life?

10SMSTS-116 / Module

Description:

General description:

Was macht das Leben gut? Diese Frage steht im Zentrum unseres interdisziplinären Seminars. Gemeinsam mit fünf Dozierenden aus Psychologie, Rechtswissenschaft, Theologie, Ethik und Religionswissenschaft erforschen wir zentrale Themen wie Glück, Sinn und Leid, nicht nur theoretisch, sondern mit direktem Bezug zum eigenen Leben. Ausgangspunkt ist die Lektüre des Buchs Life Worth Living (auf DE oder EN) und ergänzender Literatur. Doch das Seminar geht weit über die Textanalyse hinaus: Rollenspiele, Kleingruppenarbeit und ein persönliches Reflexionstagebuch ermöglichen einen persönlichen Bezug. Ein Highlight ist der 24h-Block im Foyer der TRF (02.-03.10.26, Übernachtung zuhause), der Raum für vertiefte Auseinandersetzung bietet. Eine Onlinesitzung ermöglicht den Austausch mit Studierenden aus Yale, die ein ähnliches Seminar besuchen. Die Veranstaltung ist für alle, die sich nicht nur akademisch, sondern auch persönlich mit den grossen Fragen des Lebens befassen wollen.

ECTS: 3

Notes:

Bitte beachten Sie, dass zum Kurs eine Blockveranstaltung gehört. Diese dauert von Freitagmittag, 02.10.26 bis Samstagmittag 03.10.26 und findet an der Theologischen und Religionswissenschaftlichen Fakultät der UZH statt. Übernachtung zu Hause. Die Teilnahme an der Blockveranstaltung ist verpflichtend.

Learning Outcome:

Die Studierenden:

- Analysieren verschiedene Denk- und Glaubenstraditionen in Bezug auf zentrale Fragen zu Glück, Erfüllung, Sinn, Scheitern und Leid.
- Reflektieren kritisch unterschiedliche Perspektiven und deren Relevanz für persönliche und gesellschaftliche Herausforderungen.
- Entwickeln eine fundierte eigene Meinung und Urteilsfähigkeit durch den interdisziplinären Austausch mit Dozierenden und Mitstudierenden.
- Erproben die Anwendung philosophischer, theologischer, ethischer, psychologischer und rechtlicher Konzepte in ihrem eigenen Alltag.

Target Groups:

Bachelor, Master

Languages of Instruction:

Deutsch und Englisch

Merkmale:

Responsible instructor: Ralph Kunz

Requirements:

Prerequisites: Keine

Assessment: Führen eines Lerntagebuchs: Vor den jeweiligen Sitzungen müssen die Leitfragen, die in der Sitzung besprochen werden im Lerntagebuch ausführlich (ca.2 Seiten pro Eintrag) festgehalten werden (es geht nicht um eine wissenschaftliche sondern um eine persönliche Reflexion). In den Sitzungen wird mit diesem Tagebuch

gearbeitet. Am Ende des Semesters (Abgabedatum: 21.12.26) ist das Lernstagebuch den Dozierenden abzugeben. Es werden 6 von 9 Einträge bewertet.

Grading Scale: Pass/Fail
Repeatability: repeatable once, book again

Module Start! AI Competences (for Teaching & Learning)

10SMSTS-504 / Seminar

Description:

General description:

Interessierst du dich für die Potenziale, Herausforderungen und ethischen Aspekte von KI im Bildungsbereich? Denkst du gerne mit, wie eine Lehrveranstaltung innovativ mit KI gestaltet werden kann? Dann ist dieses Modul genau das Richtige für dich. Es richtet sich an alle BA- und MA-Studierenden, die neugierig auf KI in der Hochschullehre sind. Nach erfolgreichem Abschluss besteht die Möglichkeit, als AI-Coach angestellt zu werden.

English Version

Are you interested in the potential, challenges, and ethical aspects of AI in education? Do you enjoy thinking creatively about how a course can be innovatively designed with AI? Then this module is exactly right for you. It is aimed at all BA and MA students who are curious about AI in higher education teaching. Upon successful completion, there is the opportunity to be employed as an AI coach.

ECTS: 1

Notes:

Asynchroner Selbstlernkurs mit zwei begleitenden Präsenzterminen (Kick-off und Vor-Ort-Workshop).

English Version

Asynchronous self-study course with two accompanying in-person sessions (kick-off and on-site workshop).

Learning Outcome:

Die Studierenden werden in der Lage sein:

1. Die KI-Grundlagen und ihre Anwendungen zu verstehen und Potenziale und Risiken für den Hochschullehrkontext abzuschätzen.
2. Ihr KI-Wissen kritisch anzuwenden, um effektive und innovative Lehr-Lernszenarien weiter zu entwickeln und praxisorientierte Lösungen zu gestalten.
3. Die ethischen Implikationen von KI-Technologien in der Bildung zu analysieren, insbesondere in Bezug auf ihre Auswirkungen auf die akademische Integrität und die Lehre.

English Version

Students will be able to:

1. understand AI fundamentals and their applications and assess potentials and risks for the university teaching context.
2. critically apply their AI knowledge to further develop effective and innovative teaching-learning scenarios and design practice-oriented solutions.
3. analyze the ethical implications of AI technologies in education, particularly in relation to their impact on academic integrity and teaching.

Target Groups:

Bachelor, Master

Languages of Instruction:

Deutsch und Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Lukas Löffel Vögelin

Requirements:

Prerequisites: Offenheit für neue Technologien und Freude, mit KI-Tools zu experimentieren. Erste Erfahrungen mit KI-Tools (z. B. Chatbots, Text- oder Bildgeneratoren) sind hilfreich, aber nicht zwingend erforderlich.

English Version

Openness to new technologies and enjoy experimenting with AI tools. Initial experience with AI tools (e.g. chatbots, text or image generators) is helpful, but not essential.

Assessment: Um das Modul zu bestehen, müssen alle Online-Aufgaben erledigt, der Präsenz-Kick-off und der Workshop besucht worden sein (Termine und Zeiten siehe oben) sowie das Abschlussprojekt bis spätestens 11. Januar 2027 eingereicht werden. Für das Abschlussprojekt identifizieren die Studierenden eine didaktische Herausforderung oder eine Möglichkeit, einen Kurs mithilfe von KI zu verbessern. Sie entwickeln eine konkrete Idee und einen Prototyp, um das Lehren innovativer zu gestalten.

English Version

To pass the module, students must complete all tasks, attend the in-person kick-off and workshop (see dates and times above) and submit the final project by January 11th, 2027. For the final project, students identify a teaching challenge or an opportunity to enhance a course using AI. They develop a concrete idea and a prototype to make teaching more innovative.

Module Legal History (BLaw), Part 1 (no exam registration)

02SM60PM4T1 / Module without Credits

Description:

General description:

Das Modul umfasst die Vorlesung "Rechtsgeschichte" im Herbstsemester sowie die "Übungen zur Rechtsgeschichte" im Frühjahr. Das Modul Rechtsgeschichte vermittelt grundlegende Kenntnisse über die historischen Grundlagen der mitteleuropäischen Rechtsordnung. Es dient zugleich dazu, die Fähigkeit zur selbständigen Textinterpretation vor dem Hintergrund der Wandlungen in Gesellschaft, Wirtschaft und politischer Herrschaft sowie der kulturellen Grundlagen zu entwickeln. Der zeitliche Rahmen des Moduls reicht von der Spätantike bis ins 20. Jahrhundert.

ECTS: 0

Notes:

Rechtsgeschichte (BLaw), 1. Teil (keine Prüfungsanmeldung) ist der erste Teil des zweisemestrigen Pflichtmoduls Rechtsgeschichte (BLaw). Die Buchung von Rechtsgeschichte (BLaw), 1. Teil (keine Prüfungsanmeldung) dient der Anmeldung zur Vorlesung, sie gilt nicht als Anmeldung zur Prüfung. Die Prüfungsanmeldung für das Pflichtmodul Rechtsgeschichte (BLaw) soll frühestens im 2. Semester (FS) vorgenommen werden. Die Prüfung wird jedes Semester angeboten (FS oder HS).

Learning Outcome:

1. Wissens- und Verständniskompetenzen: Rechtsgeschichtliche Kenntnisse sowie Verständnis für Zusammenhänge in der Entwicklung der Rechtsordnung.
2. Analytische und hermeneutische Kompetenzen
 - Fähigkeit zur Betrachtung der modernen Rechtsordnung aus der historisch vermittelten Distanz
 - Fähigkeit zur verstehenden Auseinandersetzung mit unbekannten Texten
- Reflexionskompetenz: Einsicht in die Verflechtung von Recht, Gesellschaft, Wirtschaft, Herrschaft und Kultur.

Target Groups:

Das Modul wendet sich in erster Linie an Studienanfängerinnen und Studienanfänger der Rechtswissenschaften, ist aber auch für Minor-Studierende der philosophischen Fakultät geeignet.

Languages of Instruction:

Deutsch

Course Materials:

Allgemeine Informationen sowie Informationen zur Verfügbarkeit der Materialien finden sich auf der Website der veranstaltenden Lehrstühle.

Merkmale:

Target Group: Open to School Students

Responsible instructor:

Andreas Thier
Johannes Liebrecht

Requirements:

Prerequisites:

Interesse an rechtlicher Normativität, Rechtswissen und der Frage nach ihren Voraussetzungen, Inhalten und Wandlungen.

<u>Prior Knowledge:</u>	Historische Vorkenntnisse wären von Vorteil, sind aber nicht erforderlich.
<u>Assessment:</u>	siehe Modul Rechtsgeschichte (BLaw) (02SM60PM4) -> schriftliche Prüfung Ende Frühjahrssemester oder im darauffolgenden Herbstsemester https://studentservices.uzh.ch/uzh/anonym/vvz/#!/details/SM/51044364
<u>Grading Scale:</u>	Not Graded
<u>Repeatability:</u>	Can be repeated as necessary

Module CHE 725 Hacking for Chemists - Prototyping and Hardware Programming

07SMCHE725 / Lecture with Practical Exercises

Description:

General description:

Our modern research environment often employs very specialized equipment and digital interfaces, which older devices often can't provide. Sometimes special means are required even just for a single experiment. Hence, a quick prototype or hack can come a long way - and this course will provide a stepping stone for that. Contents to be covered in theory and practice involve: Basics in electronics, overview of electronic components, building circuits, microcontroller programming, digital and analogue input/output processing, feedback control and low-level automation, 3D design, 3D printing.

ECTS: 2

Learning Outcome:

Understanding and applying the content covered

Target Groups:

MSc, PhD

Languages of Instruction:

English (or German in the case of German-speaking participants only)

Course Materials:

Materials and information will be shared using OLAT. For hardware programming, students must use their own computer, information on the software will be available on OLAT. Materials and components for the practical exercises will be provided

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Johannes Schörgenhumer

Requirements:

Prior Knowledge:

Basic programming knowledge recommended

Assessment:

Project report (English, per request also in German)

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Module Behavioral Health Economics (S)

03SM22MO0254 / Seminar

Description:

General description:

This seminar explores the intersection of behavioral economics and health economics, focusing on how psychological and social factors influence health-related decision-making. Key concepts such as limited self-control, cognitive biases, and social influences will be examined in the context of behaviors like diet choices, exercise habits, medication adherence, and preventive care. In addition, the seminar will discuss the implications for healthcare policy, such as the role of nudges, incentives, and choice architecture in promoting healthier lifestyles and improving healthcare efficiency.

ECTS: 3

Notes:

This seminar is limited to 20 participants and requires an application. Application and allocation is handled via the module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>.

Personal attendance at all sessions of a seminar is mandatory. If demand exceeds capacity, priority is given to Economics majors.

IMPORTANT: Seminar booking periods differ from regular lecture module booking periods. Please be aware that the deadline for application ends before the start of the semester and that this seminar has a shortened module booking period (see under Organization). After the request period has passed it is no longer possible to apply for a place in the seminar or on the waiting list.

More information on the process can be found on our website:
<https://www.econ.uzh.ch/en/study/undergraduate/ma/seminar.html>

Learning Outcome:

The seminar equips students with the ability to understand and apply behavioral economic principles to health-related behaviors and evaluate the effectiveness of policy interventions.

Target Groups:

MA-students

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Björn Bartling

Requirements:

Assessment:

Presentation of a topic in behavioral health economics during the seminar and written exam. The presentation (including the slides) accounts for 40 percent of the final grade; the exam, covering all topics, accounts for 60 percent of the final grade.

Written exam October 26, 2026 (60 minutes) 16:30-17:30h.

Grading Scale:

1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: September 14, 2026: Online kick-off meeting: 12:15h to 12:45h
October 19 and 20, 2026: Student presentations from 8:30h to 15:30h
October 26, 2026: Written exam (60 minutes) 16:30-17:30h.

Request period: from Mi 12.08.2026 10:00 to So 30.08.2026 24:00

Place allocation at the latest: Di 08.09.2026 23:59

Module The Future of Work: Personnel and Organizational Economics

03SM22MO0255 / Course

Description:

General description:

This course will cover core topics in Personnel and Organizational Economics, such as incentives and motivation, with an application to important topics in modern work, like remote work, online platforms and AI. Organizational economics involves the use of economic logic and methods to understand the existence, nature, design, and performance of organizations. Personnel economics is the study of labor economics issues inside firms and organizations.

ECTS: 3

Notes:

The lecture will not be recorded/no podcast.

Learning Outcome:

Understand how incentives and policies affect performance in organizations. Be able to discuss how to choose personnel policies in organizations based on economic research. Be able to propose sound ways to evaluate policies in organizations.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Amanda Dahlstrand

Requirements:

Prior Knowledge:

Microeconomics 1 & 2 (BA level)

Assessment:

Module Normative Economics (L&E)

03SM22MO0256 / Course

Description:

General description:

The overarching question of normative economics is, what is the objective that policymakers should pursue? People usually treat this as a matter of opinion or personal preference. Normative economics aims to obtain rigorous answers to this question using principled mathematical deduction, starting from first principles. The approach is axiomatic: we begin by formalizing certain axioms, that characterize basic moral and logical principles. Then, we use the tools of mathematics to study the implications of combining different axioms.

ECTS: 6

Notes:

The module will not be recorded/no podcast.

Learning Outcome:

Students will explore the core principles of normative economic analysis. The goal is to clarify the debates about the appropriate social objective to use for evaluating economic policies. The students will also learn how to follow mathematical proofs and prove simple propositions related to the subject matter.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Maya Eden

Requirements:

Prior Knowledge:

Background in mathematical proofs.

Assessment:

Final written exam, closed book (80%), on site, 17.12.2026 12.15 pm-1.45 pm (90 min).

Four problem sets, pass/fail (20%).

Grading Scale:

Module Health Economics - Empirical Insights and Policy Implications (Seminar)

03SM22MO0258 / Seminar

Description:

General description:

Health economics is an applied field that utilizes economic principles to analyze health-related issues, healthcare systems, and policy interventions.

This seminar will introduce students to key empirical research in health economics, with an emphasis on econometric methodologies and advanced empirical methods. Topics will cover health insurance, healthcare systems, health behaviors, and public health policy. Special attention will be placed on econometric tools such as instrumental variables, difference-in-differences, regression discontinuity designs, and randomized controlled trials (RCTs), which are commonly used to analyze causal relationships in health economics.

ECTS: 3

Notes:

This lecture is held by an external lecturer, Dr. Dalila Lindov, from University of Konstanz and University Bocconi.
E-mail: dalila.lindov@uzh.ch

This seminar is limited to 20 participants and requires an application. Application and allocation is handled via the module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>.

Personal attendance at all sessions of a seminar is mandatory. If demand exceeds capacity, priority is given to Economics majors.

IMPORTANT: Seminar booking periods differ from regular lecture module booking periods. Please be aware that the deadline for application ends before the start of the semester and that this seminar has a shortened module booking period (see under Organization). After the request period has passed it is no longer possible to apply for a place in the seminar or on the waiting list.

More information on the process can be found on our website:
<https://www.econ.uzh.ch/en/study/undergraduate/ma/seminar.html>

Learning Outcome:

Upon successful completion of the seminar, students will be able to:

1. Understand the key econometric methods and advanced empirical methods used in health economics, including causal inference techniques (e.g., instrumental variables, difference-in-differences, regression discontinuity).
2. Critically analyze empirical health economics research, assessing both its methodology and policy implications.
3. Present complex health economics research clearly and concisely, emphasizing empirical methods and findings.
4. Develop skills in asking insightful and constructive questions during academic discussions.
5. Apply econometric techniques to analyze real-world health economics problems.
6. Develop general academic research skills that are essential for the master's thesis and future academic endeavors.

Languages of Instruction:

English

Course Materials:

The list of research papers that will be analyzed in this seminar will be provided during the introductory meeting.

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Rainer Winkelmann

Requirements:

Prerequisites: Basic knowledge of economics is required. While advanced empirical methods will be introduced and thoroughly explained, students should have a foundational understanding of microeconomics, econometrics, and statistics.

Assessment: Paper presentation (40%)/Written research proposal (40%)/Active participation in discussions (20%) during all sessions.

Attendance is mandatory.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (One-Time)

Dates/Times/Deadlines: introductory meeting 17.09. 12:15 - 1.45 pm
2 block sessions: 18.11. 10:15 am - 6 pm and 19.11. 10:15 am- 6 pm

Request period: from Mi 12.08.2026 10:00 to So 30.08.2026 24:00

Place allocation at the latest: Di 08.09.2026 23:59

Waiting list progression period: from Mo 07.09.2026 00:00 to Fr 18.09.2026 24:00

Cancellation period: from Mo 07.09.2026 00:00 to Mo 21.09.2026 24:00

Module PhD Course: Personnel and Organizational Economics

03SMDOEC1222 / Course

Description:

General description:

Organizational economics involves the use of economic logic and methods to understand the existence, nature, design, and performance of organizations. Personnel economics is the study of labor economics issues inside firms and organizations. This course will cover topics like incentives, motivation, hierarchies in organizations, and the role of managers and CEOs. Many applications will be to important topics in modern work, like AI, remote work, online platforms and gig work, and gender in the workplace.

ECTS: 2

Notes:

Venue: SOF-E-09

Learning Outcome:

Understanding of core topics in organizational and personnel economics.
Ability to formulate research ideas and plans which complement the literature well.

Target Groups:

PhD students (Zurich GSE)

Languages of Instruction:

English

Course Materials:

Research articles.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Module PhD Course: Normative Economics

03SMDOEC1223 / Course

Description:

General description:

The overarching question of normative economics is, what is the objective that policymakers should pursue? People usually treat this as a matter of opinion or personal preference. Normative economics aims to obtain rigorous answers to this question using principled mathematical deduction, starting from first principles. The approach is axiomatic: we begin by formalizing certain axioms, that characterize basic moral and logical principles. Then, we use the tools of mathematics to study the implications of combining different axioms.

ECTS: 2

Notes:

From 05.11.2026-17.12.2026 venue: SOF-G-21

Learning Outcome:

Students will explore the core principles of normative economic analysis. The goal is to clarify the debates about the appropriate social objective to use for evaluating economic policies. The students will also learn how to follow mathematical proofs and prove simple propositions related to the subject matter.

Target Groups:

PhD students

Languages of Instruction:

English

Module PhD Course: Advanced Topics in Macroeconomics of the Labor Market

03SMDOEC1226 / Course

Description:

General description:

This course analyzes the determinants of wages and unemployment both from a theoretical and empirical perspective. The main purpose of the course is to familiarize students with leading search-theoretic models of the labor market as well as models of incomplete markets and their empirical applications.

Topics include the determinants of unemployment and vacancies over the business cycle, the implications of search frictions for wage inequality, wage bargaining and wage rigidity, the dynamics of search behavior over the unemployment spell, optimal unemployment insurance policy, and the macroeconomic implications of unemployment insurance policy.

ECTS: 2

Notes:

Auditors who wish to take this course need to apply to andreas.mueller@econ.uzh.ch first.

Venue: SOF-E-09

Learning Outcome:

The overarching goal of the course is to familiarize students with theoretical models of the aggregate labor market and empirical research methods at the frontier of empirical macroeconomics.

Target Groups:

PhD students (2nd year and above)

General description:

Wollen Sie einen Beitrag zur Bildungsgerechtigkeit in der Schweiz leisten? Unterstützen Sie als Mentor:in ein Primarschulkind dabei, besser mit den Herausforderungen in Schule und Alltag umzugehen. Dieses Modul bietet Ihnen die Möglichkeit, sich im Rahmen Ihres Studiums sozial zu engagieren und sich dabei persönlich weiterzuentwickeln.

Das Modul umfasst einen praktischen und einen theoretischen Teil:

Theoretischer Teil

Zu Beginn des Semesters findet eine Blockveranstaltung statt, gefolgt von vier weiteren Lehrveranstaltungen, die sich über zwei Semester erstrecken. Abhängig vom Programm finden bis zu sechs Coaching-Treffen statt. Während des Moduls werden Sie durch die Praxispartner begleitet und gecoacht.

Praktischer Teil

Sie treffen sich mindestens 30 Mal (jeweils 1-2 Stunden) wöchentlich mit dem Ihnen zugeteilten Primarschulkind. Diese Treffen dokumentieren Sie in einem Online-Tagebuch.

ECTS: 6

Notes:

Zu Beginn des Semesters wählen die Modulteilnehmenden zwischen der Teilnahme an einem der beiden etablierten Mentoring-Programme von zwei hochkarätigen Praxispartnern: Future Kids (AOZ) und Dream Team (Educa Swiss).

Bei der Online-Infoveranstaltung (max. 1h) erfahren interessierte Studierende mehr über das interdisziplinäre Modul sowie über die beiden Mentoring-Programme. Die Infoveranstaltung wird aufgezeichnet und ist auf OLAT abrufbar.

11.08.2026, 12.15 Uhr

(Zoom Link: <https://t1p.de/hxw4e>)

Der Link zur Infoveranstaltung ist auch im Feld "Links" aufgeführt.

Details werden mit den Modulteilnehmenden nach Kurseinschreibung sowie in der Blockveranstaltung zu Beginn des Semesters geklärt.

Kurz erklärt: <https://t.uzh.ch/1Pn>

Learning Outcome:

Dieses Modul ist im Bereich des Service Learning anzusiedeln. Das bedeutet, dass gesellschaftliches Engagement mit fachlichem Lernen verbunden wird und ein Lernen durch Engagement stattfindet. Die vermittelten Kompetenzen werden durch das erbrachte soziale Engagement angewendet und vertieft. Das Modul und die Lernziele sind entsprechend praxisnah und handlungsorientiert:

- Förderung der sozialen Kompetenzen: Verständnis und Empathie, Kommunikations- und Beratungskompetenz, interkulturelle Sensibilität, Problemlösestrategien, konstruktives Konfliktverhalten, Beziehungsgestaltung
- Steigerung des Bewusstseins für soziale Benachteiligung und Verständnis für soziale Mobilität
- Kenntnisse kindlicher Entwicklungsprozesse sowie Möglichkeiten, diese zu fördern
- Verständnis für die Wirkung und die Herausforderungen zivilgesellschaftlichen Engagements, sowohl auf

gesellschaftlicher, persönlicher als auch ökonomischer Ebene

Target Groups:
Bachelor, Master

Languages of Instruction:
Deutsch

Merkmale:

Responsible instructor: Ulf Zölitz

Requirements:

Prerequisites: Gute Deutschkenntnisse

Assessment: Der Leistungsnachweis ergibt sich aus zwei Teilen:
 1. Mind. 30 Treffen mit dem Primarschulkind sowie entsprechende Online-Tagebucheinträge (spätestens 48 h nach dem jeweiligen Treffen). Der letzte Eintrag muss spätestens am 31. Juli 2027 bzw. spätestens 48 h nach dem letzten Treffen getätigt werden.
 Inhalt: Kurzer Bericht über das Treffen (Aktivitäten, Erfahrungen, Herausforderungen/Erfolge). Die Berichte dienen als Grundlage für die begleitenden Coachings sowie als Anhaltspunkt für Interventionen.
 2. Kurzer Reflektionsbericht über das Mentoring-Jahr mit dem zugeteilten Primarschulkind mit Einbindung der interdisziplinären Inhalte aus dem theoretischen Teil. Thema: "Erwerb überfachlicher Kompetenzen durch soziales Engagement". Abgabe: 9. Mai 2027.

Module Mentoring für den Start ins Studium (S) Mentoring for the new generation of students

03SM22BO0142 / Seminar

Description:

General description:

Ziel ist es, den Studierenden über Fachkompetenzen hinausgehende, weitere praxisrelevante Kompetenzen wie Organisations-, Sozial- und Teamkompetenzen, als auch Auftritts- und Improvisationsfähigkeiten zu vermitteln.

Zu diesem Zweck werden den Teilnehmenden die folgenden Aufgaben gestellt:

1. Mentoring und Organisation einer Gruppe Die erste Aufgabe der Teilnehmenden des Seminars besteht darin, das Mentoring einer Gruppe von ca. 10-20 Erstsemestrigen der wirtschaftswissenschaftlichen Fakultät ab dem Erstsemestrigentag (EST) zu übernehmen, den Teambildungsprozess erfolgreich anzustossen und die Studierendenkommunikation umzusetzen.
2. Erlernen und Anwenden von Rhetorik- und Improvisationsfähigkeiten und Auftrittskompetenzen Die zweite Aufgabe der Teilnehmenden des Seminars besteht darin, sich im Rahmen des Seminars mit verschiedenen Auftritts/Rhetorik- und Improvisationstechniken auseinanderzusetzen und diese im Kontext des Erstsemestrigentages, den Seminarsitzungen und den Events anzuwenden.
3. Erstellen eines Konzepts für die längerfristige Begleitung der Erstsemestrigengruppe Die dritte Aufgabe der Teilnehmenden besteht darin, gemeinsam mit Seminar-Kollegen in 5er Gruppen ein Konzept für das Mentoring ihrer jeweiligen Erstsemestergruppe während des ersten Semesters zu erstellen und dieses unter anderem im Rahmen eines akademischen und von sozialen Events studienbegleitend in die Praxis umzusetzen.
4. Reflexion und Rückkoppelung mit Praxiserfahrungen Die vierte Aufgabe der Teilnehmenden besteht aus dem Austausch der Praxiserfahrungen mit den Seminarkollegen und dem Erstellen eines 6-minütigen Reflexionsvideos. Ziel dabei ist es Gelerntes, Erfahrungen, Planungs- und Mentoringaktivitäten zu reflektieren.

ECTS: 3

Notes:

Die Bewerbung sollte folgendes beinhalten:

- ein einseitiges aussagekräftiges Motivationsschreiben, das zeigt, warum Sie sich für das Seminar bewerben, was Sie erwarten und warum Sie ein geeigneter Mentor/ eine geeignete Mentorin wären.
- Lebenslauf inklusive Name, Vorname, Adresse, Email, Handynummer,
- Matrikelnummer, Anzahl Semester und Studienrichtung
- Leistungsausweis

Bitte senden Sie diese Dokumente bis 19. April 2026 per E-Mail an folgende Adresse: teaching@econ.uzh.ch

Zu spät eingereichte und unvollständige Bewerbungen werden nicht berücksichtigt.

Wir suchen ca 50 Bachelorstudierende der Wirtschaftswissenschaftlichen Fakultät der Universität Zürich. Das Auswahl Assessment findet am 04. Mai.2026 statt.

Studierende, die in der Vergangenheit das Modul BO0033 (Führung u.Organisation im Team, praktisches Projektmanagement (Team Leadership

and Organisation, Applied PM) bereits erfolgreich absolviert haben, dürfen an diesem Modul nicht teilnehmen.

Learning Outcome:

1. Mentoring und Organisation einer Gruppe
2. Erlernen und Anwenden von Rhetorik- und Improvisationsfähigkeiten und Auftrittskompetenzen
3. Erstellen eines Konzepts für die längerfristige Begleitung der Erstsemestrigengruppe
4. Reflexion und Rückkoppelung mit Praxiserfahrungen

Target Groups:

Bachelor-Studierende mit folgenden persönlichen Teilnahmevoraussetzungen:

- Freude an der Führung von Gruppen und an sozialer Interaktion mit Studierenden;
- Interesse an der Entwicklung eines Konzepts und dessen Umsetzung;
- Freude an der Vermittlung von Inhalten und am Führen;
- Selbstverantwortliches und kreatives Arbeiten;
- Bereitschaft zu Selbstreflexion und Teamwork

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Dina Pomeranz

Requirements:

Prerequisites:

- Freude am Begleiten von Gruppen, Organisieren von Gruppenaktivitäten und an sozialer Interaktion mit Studierenden
- Interesse an Konzeptentwicklung und Umsetzung
- Freude an der Vermittlung von Inhalten und am Präsentieren
- Selbstverantwortliches und kreatives Arbeiten sowie Teamwork
- Bereitschaft zur Selbstreflexion

Assessment:

25% stichwortartiges Ausfüllen eines vorgegebenes Rasters zum Betreuungskonzept der Erstsemestrigengruppe (Gruppenbewertung)
20% kurze Gruppenpräsentation (Einzelbewertung)
35% ca. 6-minütiges Video (Einzelbewertung)
10% aktive Mitarbeit an allen Präsenzterminen respektive Einsätzen; Versand der Studierendenkommunikation (Einzelbewertung)
10% Evaluationsergebnisse der Studierenden der eigenen Erstsemestrigengruppe (Einzelbewertung)

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Dates/Times/Deadlines:

4. Mai 2026: Assessmenttag (ganztags) - KOL-N-1
 4. September 2026: Seminar (ganztags) - KO2-F-152
 7. September 2026: Seminar (ganztags) - KO2-F-152
 10. September 2026: Ersti Bag Packtag - KO2-D-54
 11. September 2026: EST (ganztags)
 19. Oktober 2026: Erfahrungsaustausch (18:15-20:00) SOF-G-21
 20. November 2026: Abschlusssitzung (18:15-20:00) anschliessend Aperero SOF-G-21

Ist die Teilnahme an der zweitägigen Ausbildung und/oder am Erstsemestrigentag, als Hauptbestandteile des Seminars, aufgrund Krankheit oder anderen zwingenden Gründen verhindert, kann das Seminar auch mit dem Vorweisen von Arztzeugnissen oder Ähnlichem, nicht weiter besucht werden.

Module EEE 368 Methods Seminar: Social Science Research Design and Methods for Environmental Topics
07SMEEE368 / Seminar

Description:

General description:

This seminar is aimed at students who are interested in social science applications of a research question or methodology (e.g., surveys) for environmental topics.

Students will learn about:

- different types of research designs (e.g., experimental, quasi-experimental, field/survey research)
- different methods (qualitative, quantitative, mixed), their advantages and disadvantages are weighed, and their respective
- data collection methods (interviews, surveys, desk research) are discussed.

The seminar is a mix of discussing classical and current literature and developing an own research design and strategy for data collection.

ECTS: 3

Learning Outcome:

After successfully completing the module, students should be able to:

- explain the basic principles of social science research.
- understand and scrutinise scientific studies as well as media reports on the results of social science research.
- weigh up the advantages and disadvantages of different research designs and methods
- conduct small interviews and questionnaire surveys.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Tamaki Ohmura

Requirements:

Assessment:

Written assignment in English.

- Actively participate during sessions: 15% of grade
- Hand in a short outline of your research question (max 1 page): 15 % of grade
- Complete two small data collection assignments (interview and survey questionnaire): 20% of grade
- Hand in a short research proposal (3 pages): 50% of grade

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Request period: from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Place allocation at the latest: Sa 29.08.2026 22:00

Waiting list progression period: from Sa 29.08.2026 22:00 to Do 10.09.2026 24:00

Cancellation period: from Sa 29.08.2026 22:00 to So 13.09.2026 24:00

Module BIO 204 Human Evolutionary EcoPhysiology

07SMBIO204 / Block Course

Description:

General description:

Throughout the evolution of our species, natural environments have provided the context within which natural selection has acted to shape our biology. During the last 200-300 years, however, urban centres have rapidly become our primary habitat. This change may have created an evolutionary mismatch; a situation in which health and evolutionary fitness may be negatively influenced by an incompatibility between the environment Homo sapiens are primarily adapted to and the habitat we currently occupy. In this course, students will consider how humans have impacted the global environment throughout our evolutionary journey and how these changes impact human health, function and evolutionary fitness in the 21st Century. Drawing on evolutionary theory, physiology, immunology, ecology, microbiology and psychology, students will interact with these ideas through pertinent research articles, group discussions and a capstone research project.

ECTS: 6

Learning Outcome:

Upon completion of this course, students will have gained experience in how to:

1. Critically evaluate, present and discuss academic research within the field of human evolutionary ecophysiology.
2. Design, execute and present an original research project that considers the effect of exposure to natural and industrialised environments on human biological health and function.
3. Apply knowledge obtained during the course to enhance human health and function while regenerating the health of the natural world.

Module GEO 715 Application of GIS in Protected Areas

07SMGEO715 / Field Trip

Description:

General description:

The module focuses on the application of GIS and remote sensing for biodiversity monitoring in the Swiss National Park (SNP). It consists of a two-day field trip: on one day, a guided tour of the SNP is conducted, and on the second day, students work in groups on GIS and remote sensing projects. They then conduct further analyses in groups over a period of two months and subsequently write a scientific report summarizing their analyses and results. At the end of the module, the groups present their results in front of the class.

Excursion topics: Types of environmental monitoring; long-term monitoring in the SNP; landscape changes; the importance of spatial data for monitoring and nature conservation; remote sensing in monitoring and nature conservation (drone, aircraft, and satellite data); field mapping applications to support on-site data collection; wildlife ecology and wildlife monitoring (GPS collars, acoustic loggers, camera traps); management and presentation of monitoring data. Possible topics for group work include: satellite data for phenological monitoring; creation of biodiversity products using remote sensing data; habitat analysis using image spectroscopy or high-resolution aerial photographs; spatial analysis of drone-based anthill mapping; spatial analysis of current monitoring and research activities in the SNP.

ECTS: 3

Notes:

The course is booked after an announcement via OLAT. Afterwards, please contact the person responsible for the module. The maximum number of participants is limited to 24

The excursion will take place on 1 and 2 of October 2026;

The seminar will take place on 22.10 and 12.11.2026 in Room Y25-K-22.

- By booking this module you agree to the following authorisation clause: I agree that on my behalf bookings or reservations within the price range for the excursion are made on my behalf.
- Insurance is the responsibility of the participants.
- Link website: <https://www.geo.uzh.ch/de/studying/during-your-studies/excursions.html>

The Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

This SDG is covered in this module: 15

Learning Outcome:

Application of GIS and remote sensing methods in protected area management, monitoring and research, analysis of spatial data and their visualization, preparation of scientific reports based on data evaluations

Target Groups:

Students from Geography, ESS and Biodiversity

Languages of Instruction:

Language of instruction: German and English

Course Materials:

Data from SNP, readings assigned by instructors.

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Christian Rossi
Maria J. Santos

Requirements:

Prerequisites: No formal requirements.

Physical fitness for hikes of several hours.

Prior Knowledge: Basic knowledge of GIS, remote sensing and R recommended

Assessment: The project consists on a presentation and a report, both gradeed between 1-6. Grade is distributed as presentation 30%; Written report 70%. Feedback forms are given for each assignment with comments on the presentation and report, and the final grade is communicated.

If the grade for the written report is insufficient, it may be retaken once.

Language of assessments: English

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: Excursion: 1 and 2 of October 2026
In class discussion: 22 of October 2026
In class presentation: 12 of November 2026

Request period: not bookable

Module International Tax Law I

02SM90WM50EN / Course

Description:

General description:

The course International Tax Law provides an in-depth overview of the law and policy of tax treaties as applied by jurisdictions around the world, with a focus on the OECD and UN Model Conventions. Selected court decisions from several jurisdictions worldwide will be examined. Special attention will be given to current developments, including the OECD's Pillar One and Pillar Two initiatives and the evolving role of the United Nations in international tax cooperation.

ECTS: 6

Learning Outcome:

This course is designed to equip you with the skills and knowledge necessary to actively analyze and discuss tax treaty issues, whether in the role of a government official, tax advisor, or taxpayer. We will critically examine the interpretation and application of tax treaties, incorporating case law from a variety of jurisdictions to provide a comprehensive perspective. The teaching methodology will center on active class discussions, encouraging engagement and collaborative learning.

After successful completion of this course, students will have developed a comprehensive understanding of the principles, structures, and practical applications of international tax treaties. They will be able to analyze and interpret key provisions of the OECD and UN Model Conventions, critically engage with case law from diverse jurisdictions, and assess contemporary challenges in international tax policy, including the OECD's Pillar One and Pillar Two initiatives. Students will be equipped to discuss and evaluate the complexities of tax treaty law and its evolving role in the global tax system.

Languages of Instruction:

English

Course Materials:

Further information will be available on the website of Prof. Dr. René Matteotti and on the platform OLAT (requires registering for the course on OLAT).

Module M3L 520DP Blockseminar: GIT4Academia

07SMM3L520DP / Block Course

Description:

General description:

This two-day block course is aimed at doctoral students looking to enhance their version control and collaboration skills. Spanning multiple parts, the course covers the essential elements and tools of Git, offers insights into fundamental collaboration principles, and presents practical workflows that leverage Git components to support adherence to these principles.

Students will become familiar with development cycles and branching strategies and how they integrate with project management tools provided by remote services such as GitLab or GitHub. In the second part, the course introduces automation techniques (CI/CD) commonly used in professional software development. It explores how automation, in combination with version control and virtualization techniques like Docker containers, can enhance reproducibility and code quality in computational projects.

All sections are accompanied by hands-on examples and exercises, providing practical experience and ensuring that students can effectively apply their new skills in real-world scenarios.

A maximum of 25 PhD students can participate

ECTS: 1

Learning Outcome:

At the end of this 2-day seminar, participants will be equipped with the skills to utilize Git and remote services for effective collaboration and project management, fostering professional practices applicable beyond the scientific realm.

They will understand how these tools can enhance their ability to produce high-quality, reproducible scientific work.

Merkmale:

Responsible instructor: Jan Dirk Wegner

Requirements:

Prior Knowledge: basic knowledge of git (commit, pull, push)

Assessment: Students have to attend both days and do homework in between

Module M3L 521 AI4Good

07SMM3L521 / Lecture with Practical Exercises

Description:

General description:

This is an interdisciplinary course where students with a strong background in machine learning and AI apply their skills to practical projects across a wide field of applications to address global challenges.

Given a specific problem in the environmental sciences, global development or similar, students will learn to self-responsibly design, implement and experimentally evaluate a suitable solution. Students will also learn to critically evaluate their ideas and solutions together with all course members in a broader context that go beyond mere technical solutions, but touch on ethics, local culture etc., too.

The organizers of the course will make sure that only those problems are selected that are suitable for a machine learning approach and where sufficient amounts of data (and labels) are available. Students will organize themselves into small groups of 3-5 students, where each group works on solving a specific problem. Students will spend the semester on designing, implementing, and testing suitable solutions using machine learning. Every two weeks, each group will present ideas and progress during a short presentation followed by a discussion with all course members. At the end of the course, students will present their final results and submit source code. In addition, they will describe the developed method in form of a scientific paper of 8 pages. Grading will depend on the source code, the paper, and active participation in class.

ECTS: 6

Learning Outcome:

Given a specific problem in the environmental sciences, global development or similar, students shall learn to self-responsibly design, implement and experimentally evaluate a suitable solution. Students will also learn to critically evaluate their ideas and solutions together with all course members in a broader context that go beyond mere technical solutions, but touch on ethics, local culture etc., too.

Target Groups:

Open for:

All master students and PhD students at UZH (and ETH Zürich)

How to apply for this module: Please upload 2-3 sentences (not more!) about your motivation for this module until the deadline specified under "organization"

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Jan Dirk Wegner

Requirements:

Prior Knowledge:

excellent skills in python programming and in machine learning, master student or PhD student

Assessment:

- 8-page report of project (using CVPR tex-template),
- well documented source code,
- slides of your final presentation,
- slides of your rolling presentation,
- active participation during class

Language of Assessment: English

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Module Mathematical Foundations of Language

06SM274-701p / Module

Description:

General description:

This course equips students with the foundational mathematical knowledge necessary for advanced research in evolutionary language science. It introduces core concepts from various mathematical disciplines relevant to the study of language, such as network and graph theory, combinatorics, probability theory, game theory, information theory, and complexity theory. Students will learn how these frameworks support language research, including modeling linguistic phenomena, understanding language evolution, analysing communication systems, and addressing computational challenges in language processing.

ECTS: 6

Learning Outcome:

By the end of the course, students will have the tools to critically apply mathematical principles to diverse problems in language research. They will:

- Acquire a foundational understanding of key mathematical concepts relevant to advanced research, enabling deeper exploration as needed.
- Develop proficiency in areas such as network and graph theory, combinatorics, probability theory, game theory, information theory, formal language theory, recursion and complexity theory.
- Explore additional topics including order theory, statistical learning, set theory, and measure theory, depending on the scope and research focus.

Languages of Instruction:

Englisch

Merkmale:

Responsible instructor: Sebastian Krapp

Requirements:

Prerequisites: Mathematics on high school level (Swiss Maturitätsniveau)

Assessment: Portfolio: four written exercises throughout term (20%), final written exam (80%)
All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is considered not completed and the module is therefore failed.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can't be repeated

Module EEE 240 The Physics of Life

07SMEEE240 / Course

Description:

General description:

This interdisciplinary course will approach the complexity of biological systems from the perspective of physics. It will combine basic notions on thermodynamics of far-from-equilibrium systems, non-linear dynamics, self-organization, phase transitions, fractals, and complex networks to shed light on problems such as pattern formation in development, metabolic optimization, how RNA viruses operate at the edge of their maximum mutation rates, and the resilience of physiological systems and natural communities. Some familiarity with analytical approaches and programming is desirable.

ECTS: 3

Notes:

Repetition exam: s. link <https://www.mnf.uzh.ch/de/studium/pruefungen.html> Please register with the module leader no later than 3 weeks before the exam.

Learning Outcome:

After successfully completing the module, students should be able to:

- Understand some of the leading principles of self-organization.
- Use basic principles in physics to characterize biological systems.
- Be acquainted with concepts of complex systems such as deterministic chaos, fractals, and power laws.
- Be able to analyze the solution and stability of simple dynamical models.
- Be familiar with some computational approaches such as cellular automata.

Module Self-management for PhD candidates

04SM25CL_507 / Module

Description:

General description:

Efficient time planning and structuring, coping with unmotivated and difficult phases, managing stress, improving cognitive flexibility, decision-making, goal setting and self-reflection, personal growth

ECTS: 1

Target Groups:

PhD Studierende

Languages of Instruction:

Englisch

Course Materials:

Notizmaterial

Merkmale:

Requirements:

Grading Scale:

Participation

Repeatability:

Can't be repeated

Organisation:

Offer pattern:

1 Semester (Every Semester)

Organisation:

Geschäftsstelle UMZH / MeF

Offered in:

Fall Semester 2026

Fall Semester 2025

Component of:

Faculty of Medicine

Clinical Science

Doctoral Program

Doctorate Medical Sciences (PromVO 22) Optional Modules

Module Elective Module: Emergency and rescue medicine

04SM25MAS005 / Sonstiges

Description:

General description:

Vermittlung von Basiskompetenzen in der Notfall- und Rettungsmedizin bei Kindern und Erwachsenen:

- Assessment (ABCDE)
- Basic Life Support (BLS)
- Bergungstechniken, Wundverbände
- Kommunikation / Deeskalationsstrategien
- Praktische Skills (Injektionen und Infusionen)
- Patienten-Monitoring

ECTS: 4

Learning Outcome:

- Erkennen und Interpretieren einer Notfallsituation, Durchführung von Erstassessment (ABCDE) und Basismaßnahmen (BLS) bei Kindern und Erwachsenen (EPA 6)
- Kommunikation mit Team und Patient*in/Angehörigen in Notfallsituationen anhand strukturierter Kommunikationstechniken (EPA 6.7, GO 2, 3)
- Kommunikation und Umgang mit Kindern in der Notfall- und Rettungsmedizin (GO 2.4)
- Erlernen von praktischen Skills der Notfallmedizin: Injektionen, Blutentnahme, peripher-venöser Zugang legen (EPA 5)
- Anwenden eines adäquaten Monitorings der Patient*innen und Interpretation von Vitalparameter (EPA 6.1)

Target Groups:

Studierende im Luzerner Track (2. Studienjahr)

Course Materials:

Alle Lernunterlagen werden den Studierenden auf OLAT zur Verfügung gestellt.

Merkmale:

Requirements:

Assessment:

Der Leistungsnachweis bzw. das Assessment umfassen primär eine aktive Teilnahme (Präsenzpflcht) sowie gezielte, formative Assessments (Feedback / Rückmeldung zu den praktischen Übungen).

Grading Scale:

Pass/Fail

Repeatability:

Can't be repeated

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Dates/Times/Deadlines:

Wechsel zwischen Wissensvermittlung und praktischen Übungen/
Fertigkeitentraining. Die Wissensvermittlungen erfolgen praxisorientiert (z.B. mit
Fallbeispielen). Der Unterricht erfolgt passend zum jeweiligen Thema mehrheitlich
in Kleingruppen (insb. für praktische Übungen), einzelne Themen können in der
Gesamtkohorte behandelt werden. Vorbereitungsaufträge können i.S. eines
flipped classroom-Konzepts den Studierenden in Auftrag gegeben werden.

Module Seminar: AI, Politics, Society: A Critical Approach (MSc)

03SM22MIS028 / Seminar

Description:

General description:

In recent years, AI has become increasingly pervasive, integrated into a wide array of applications and devices, from social media platforms and smartphones to unexpected places like pillows and toothbrushes. This course explores the underlying mechanisms and reasons behind this widespread adoption of AI, examining its potential benefits and risks within the socio-political landscape. Drawing from research across multiple disciplines—computer science, communication science, sociology, and psychology—students will gain a comprehensive understanding of AI's societal impacts. Beyond academic literature, the course engages with diverse materials, including media articles, regulatory documents, and tech company policies. The interactive format emphasizes active participation through in-class discussions, with assignments consisting of short essays, self-reflective exercises, debates, and a final project.

ECTS: 3

Notes:

The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>.

Application for this seminar is via the new module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>

Learning Outcome:

- Students will be able to critically assess the socio-political implications of AI proliferation, including both benefits and risks
- Students will be familiar with cutting-edge interdisciplinary findings on the societal impact of AI
- Students will be familiar with the regulatory frameworks governing the implementation of AI, with a primary focus on Switzerland, the EU and the US
- Students will be able to engage in reasoned debate, considering multiple viewpoints on the ethical and social dimensions of AI
- Through their final projects, students will be able to conduct their own independent critical analysis related to the socio-political impacts of AI in varied domains relying on academic literature and non-academic sources

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Aniko Hannak

Requirements:

Prior Knowledge:

- Familiarity with reading academic literature
- Interest in the societal effects of information technology
- Technical knowledge regarding AI-relevant technologies (e.g., knowledge/skills in Machine Learning, Deep Learning, NLP) would be helpful but is not required

Assessment:

Final project and assignments during the course (cumulative assessment) broken down as follows:

- 30% - individual written assignments throughout the semester (i.e., essays, case studies)
- 30% - 2 group presentations (15% each) during the semester (semester week 4, semester week 7)
- 40% - final project (to be submitted after the in-class sessions end, during the exam period)

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (One-Time)

Request period: from Mi 12.08.2026 10:00 to So 30.08.2026 24:00

Place allocation at the latest: Di 08.09.2026 23:59

Module KI im Unternehmen (AI for Business)

03SM22BI0022 / Lecture with Practical Exercises

Description:

General description:

Wir werden zügig die Grundlagen der KI erarbeiten; insbesondere Maschinelles Lernen, Textgenerierung und Fragen der Qualität und Ethik von KI.

Unter dem Leitbild «KI erhöht die 'Betriebstemperatur' in den Spannungsfeldern des Wirtschaftens» werden wir 8 Einsatzgebiete von KI im Unternehmen analysieren: KI im Marketing, KI im Kundendienst, KI in der Produktion, KI in der Beschaffung, KI im Finanzwesen, KI im Personalwesen, KI im Data-Driven-Decision-Making und KI in der (eigenen) Büro-Arbeit.

ECTS: 3

Notes:

Prof. Schwabe wirkt im Hintergrund mit; die Präsenzveranstaltungen werden von Herrn Lange gehalten.

Learning Outcome:

Die Studierenden werden den Einsatz von KI in den verschiedensten Bereichen von Unternehmen verstehen, erklären, beurteilen und auf ein Beispiel anwenden können.

Target Groups:

BA-Studierende, ab 5. Semester

Languages of Instruction:

Deutsch

Course Materials:

empfohlene Literatur «Künstliche Intelligenz verstehen : Grundlagen - Use-Cases - unternehmenseigene KI-Journey», Ralf T. Kreutzer, Wiesbaden, Germany : Springer Gabler, 2023, ISBN 978-3-658-42597-5

Merkmale:

Responsible instructor:

Gerhard Schwabe

Requirements:

Prerequisites:

Bestandenes Assessment

Prior Knowledge:

Grundkenntnisse in BWL und Informatik

Assessment:

- Schriftliche Klausur (70%), Freitag, 15. Januar 2027, 16-18 Uhr

- Gruppen-Hausaufgabe mit 15 Min. Präsentation (30%)

Die Klausur muss auch separat bestanden werden. Die Gesamtleistung ergibt sich aus der Summe Hausaufgabe und Klausur.

Es ist eine verpflichtende Gruppen-Hausaufgaben-Leistung (inkl. 15 Minuten Präsentation in den Blocks im Oktober + November) zu erbringen, die im 2. Block am 19.09.2026 verteilt werden.

Grading Scale:

1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module Digital Transformation, Science, and Law: Cross-Disciplinary Perspectives

10_1DSID0035 / Block Course

Description:

General description:

This course explores the complex and evolving relationship between digital technologies, scientific innovation, and legal systems. As societies increasingly rely on data-driven technologies—such as artificial intelligence – legal frameworks must adapt to new ethical, social, and regulatory challenges while legal science may find new research methods. The course provides students with a foundational understanding of how digital technologies transform scientific practice and legal governance, and how law, in turn, shapes technological development and scientific inquiry.

A central feature of the course is its cross-disciplinary approach, drawing on insights from law and other disciplines. Students will engage in cross-disciplinary research debates, where they collaboratively analyze pressing issues—such as algorithmic accountability, data privacy, and digital rights—through multiple academic lenses. These debates encourage critical thinking, argumentation skills, and a deeper understanding of how disciplines interact when addressing real-world problems.

Through lectures, readings, case studies, and structured debates, students will develop the analytical tools to critically assess the legal implications of the digital transformation and scientific innovation in diverse contexts.

Schedule/ structure:

Prof. Yoan Hermstrüwer – Legal Data Science

Prof. Nadine Zurkinden: technological innovation and criminal liability risks

PD Julian Mausbach (law) – Data Protection Law

Prof. Anja Schulze (economy) – Innovation studies, management of technology, or the intersection of science/ technology and society

Dr. Stefan Lakämper (medicine) – simulation as a legal research tool (e.g., safely exploring risky or ethically sensitive scenarios)

Dr. Zhivko Taushanov – Empirical Analysis of Case Filtering Mechanisms

Planned Class activities:

Cross-Disciplinary Research Debates

Learning objectives

By the end of the course, doctoral students will be able to:

Engage in cross-disciplinary research debates, synthesizing perspectives from law and other disciplines to address complex real-world issues.

Apply legal and ethical reasoning to evaluate the societal impact of data-driven technologies and regulatory responses.

Collaborate across disciplinary boundaries, demonstrating flexibility in language, methods, and research culture.

ECTS: 1

Notes:

The course will take place in room SOC-E-010

Languages of Instruction:

English

Course Materials:

Self-study preparation as provided via mail one week prior to the course

Merkmale:

Responsible instructor: Nina Cornelius-Malecha

Requirements:

Assessment: Students are required to select one of the presented topics and submit a two-page research proposal outlining the research question, methodology, relevance, and feasibility.

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Irregular)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Designing Interventions for Social Impact (L+E)

03SM22MO0261 / Lecture with Practical Exercises

Description:

General description:

This is the repeat examination for the final exam of the course Designing Interventions for Social Impact.

The final grade composition remains as defined in the course:

Final exam: 50%

Assignments: 40%

Participation: 10%

Grades for assignments and participation are carried over from the original course.

ECTS: 3

Notes:

The re-examination is only open to students who did not pass the examination in the spring term 2026 (due to failing or illness on day of exam). Students who do not fulfill this requirement may not take the examination.

Students who fulfill this requirement can book the re-examination via my modules.

Learning Outcome:

Students will gain both theoretical and practical skills in designing and evaluating social change interventions.

Theoretical competencies:

- Understanding the key concepts and mechanisms underlying social change interventions
- Identifying key factors for the design of social change interventions
- Navigating ethical challenges in social change interventions

Practical skills:

- Programming in R or Python
- Designing and conducting surveys (e.g., conjoint analysis)
- Analyzing data from surveys and field experiments
- Building and running simulations of behavioral change.

Target Groups:

This course is designed for master's students from a wide range of disciplines who are interested in behavioral change, social networks, and diffusion processes.

Languages of Instruction:

English

Course Materials:

All materials will be made available on OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

René Algesheimer

Requirements:

Prior Knowledge:

No advanced technical background is required beyond basic familiarity with

statistics and with programming in R or Python (such as writing loops, using "if-else" statements and writing own functions).

Assessment: The exam is conducted orally and lasts 15 minutes per student (Thursday, November 12th 2026 between 12:15–15:45). It covers the same content as the original course exam.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module Data Analysis with Python (S)

03SM22BO0143 / Seminar

Description:

General description:

This course introduces advanced BA students (Econ) to fundamental programming skills related to data analysis, from importing and cleaning the data to visualizing and presenting results. Through supervised individual projects, students gain hands-on experience with Python libraries such as Pandas, NumPy, SciPy, Matplotlib, and Streamlit. Students will also learn to apply best practices in data project management and AI-assisted coding. The skills acquired in this course are directly applicable to independent empirical work, including the final thesis.

ECTS: 3

Notes:

To apply for a place in the seminar, please send an e-mail to Justinas Grigaitis (justinas.grigaitis@econ.uzh.ch) before September 10, 2026 with the following documents: a motivation letter (2-3 sentences describing programming experience and course expectations), your current transcript of records, screen shot of grades from spring 26, and proof of successful completion of "Intermediate Econometrics" or a similar course.

The seminar is limited to 25 participants.

Target Groups:

Advanced BA students (Econ)

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Ulrich Woitek

Requirements:

Prior Knowledge:

No prior programming experience is required.

Assessment:

mid-semester progress assessment (30%), quiz (20%), and final project (code and presentation; 50%)

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Module MAT 635 Seminar Intro to ODE and their qualitative Behaviour

07SMMAT635 / Seminar

Description:

General description:

In a lot of branches in science from physics, engineering to ecology, economics, sociology Ordinary Differential Equations (ODEs) are used to describe and understand particular problems. Knowing the existence of solutions to such equations is the first step in the analysis. However, often explicit solutions are not available so that the study of the qualitative behaviour is key to an understanding of the problem.

In this seminar we are giving an introduction into ODEs and the study of their qualitative behaviour. We begin with fundamental existence and uniqueness theorems. As a basis for the qualitative study we discuss linear autonomous and non-autonomous systems of ODEs as well as perturbations of these equations. Furthermore, we will consider stability problems of equilibrium points of ODEs. Throughout the seminar we will discuss particular examples from e.g. physics, ecology, etc.

ECTS: 3

Notes:

Mathematical Field: Analysis

Learning Outcome:

Understanding of basic concepts in the analysis of ordinary differential equations. Making statements about the qualitative behaviour of solutions to ODEs.

Target Groups:

BSc students from 3rd semester onwards and MSc students

Course Materials:

The Seminar will follow:

- Gerald Teschl, "Ordinary Differential Equations and Dynamical Systems", Graduate Studies in Mathematics 140, American Mathematical Society 2012
- Steven Strogatz, "Nonlinear dynamics and chaos: with applications to physics, biology, chemistry, and engineering", CRC Press 2015

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Benjamin Schlein

Requirements:

Prior Knowledge:

First year linear Algebra and Analysis

Assessment:

- Prepare a talk and present it in class.
- Hand in a typed (LaTeX) version of the talk
- Be present throughout the semester and participate actively in discussions

Language of Assessment: English

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Module Foundations of Cybersecurity (L+E)

03SM22BI0023 / Lecture with Practical Exercises

Description:

General description:

This course provides an introduction to fundamental concepts and techniques in cybersecurity. Topics include classical and modern cryptography, symmetric and public key encryption, cryptographic hashing, digital signatures, and authentication protocols, key management, access control, and public key infrastructures. The course also covers system security concepts, including inter-process isolation, privilege separation, and software security.

ECTS: 6

Learning Outcome:

Students will gain foundational understanding of cybersecurity principles essential for developing secure software systems. The course also provides baseline knowledge needed to pursue specialized areas within cybersecurity.

Target Groups:

BA-students.

Languages of Instruction:

English

Course Materials:

Readings as well as lecture slides will be available at the SPINS group teaching page at <https://www.ifi.uzh.ch/en/spins/teaching.html>.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Ivan De Oliveira Nunes

Requirements:

Prior Knowledge:

Programming skills (e.g., C language or similar). Knowledge of bachelor level topics of Computer Networks, Computer Organization/Architecture, and Operating Systems.

Assessment:

There will be a mandatory on-site final exam on 8.1.27 from 8 - 10h and mandatory take-home practicals.

To pass the module, the students must pass the final exam and complete the practicals.

The final grade will be determined based on a combination of final exam (50%) and practicals (50%).

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Every Fall Semester)

Booking Deadline/Period:

Module Economics of International Trade (L)

03SM22BO0146 / Course

Description:

General description:

By giving an introduction to the economics of international trade, this course demystifies some of the complex issues that surround discussions of globalization. What makes an industry competitive in world markets? Who gains and who loses from international trade? Is trade liberalization responsible for rising inequality? What are the labor market effects of trade? Should governments support certain strategic industries? Do multinational firms exploit their workers in low-wage countries? Is it desirable to run an aggregate trade surplus? What is the WTO and how does it relate to recent trade agreements such as CETA, TTIP, and TPP?

ECTS: 3

Learning Outcome:

This class should enable students to make informed contributions to discussions on globalization and prepare them for more advanced trade classes in a Master or PhD program.

Target Groups:

This class is aimed at advanced Bachelor students.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Ralph Ossa

Requirements:

Prerequisites:

Microeconomics II and Introductory Econometrics are highly recommended.

Prior Knowledge:

Prior knowledge of microeconomics and econometrics is essential

Assessment:

The examination of the module will take place onsite. Written examination on Montag 04.01.2027, 2:30 - 3:30 (60 min).

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Module Elective Module: Hand Surgery

04SM26MAS001 / Sonstiges

Description:

General description:

Die Handchirurgie wird im Humanmedizinstudium sehr kurz gehalten. In diesem Modul geht es darum das Fach Handchirurgie vorzustellen mit den verschiedenen Krankheitsbilder und ihrer Behandlungsmöglichkeiten aber auch Einblick in die neurologischen Untersuchungsmethoden, die unterschiedliche Behandlung bei Kindern und die Möglichkeiten und Grenzen der Handtherapie aufzuzeigen.

ECTS: 4

Learning Outcome:

Genaue Kenntnis der Anatomie der Hand und ihre Untersuchungstechnik
Kenntnis über traumatische und degenerative Handverletzungen und ihre Behandlungsmöglichkeiten
Kenntnis über die neurologischen und rheumatologischen Erkrankungen der Hand und ihre Behandlungsmöglichkeiten

Target Groups:

2.-4. Studienjahr Humanmedizin

Course Materials:

Folien werden auf VAM zeitgerecht publiziert.

Merkmale:

Responsible instructor:

Pietro Giovanoli

Module Basics in clinical/professional life

05SM.502_gr / Block Course

Description:

General description:

Das Modul Grundlagen im Klinik-/Berufsalltag bereitet die Studierenden auf die organisatorischen, administrativen und praktischen Anforderungen der praktischen Semester 9-11 sowie auf den späteren Berufseinstieg vor. Zu Beginn erhalten die Studierenden eine Einführung in den Ablauf der klinischen Rotationen, Informationen zu Vorbereitung und Leistungskontrollen sowie Zugang zu einem Einführungsvideo für das Kliniksystem. Zusätzlich wird das individuelle e-Portfolio (EPASS) vorgestellt, das als digitales Lerntagebuch während des klinischen Jahres dient.

Ein:e Kliniker:in aus einer außeruniversitären Praxis führt in das Praxismanagement ein und vermittelt praxisnahe Einblicke in Abläufe und Anforderungen des tierärztlichen Berufsalltags. Weitere Themen des Moduls sind administrative Grundlagen zur ersten Arbeitsstelle, wie Bewilligungen, Versicherungen und arbeitsrechtliche Aspekte.

Ein wichtiger Teil des Moduls widmet sich der Kommunikation und Zusammenarbeit, unter anderem durch Einheiten zur Feedbackkultur. In diesen Lektionen werden die Studierenden auf den Umgang mit Kolleg*innen, klinikinternen Abläufen und den Erwartungen im Praxisalltag vorbereitet.

Zudem werden die Studierenden auf den klinischen Alltag im Rotationsbetrieb vorbereitet – insbesondere auf die Themen Hygiene, Biosecurity & Biosafety. Neben theoretischen Grundlagen absolvieren sie praktische Einheiten vor Ort, in denen sie lernen, Hygienemassnahmen korrekt anzuwenden und in Fallbeispielen gezielt mit Biosecurity- und Biosafety-Anforderungen umzugehen. Dabei stehen sowohl der Schutz von Mensch und Tier als auch die Prävention der Erregerverschleppung im Zentrum.

ECTS: 1

Learning Outcome:

Am Ende der Woche kennen die Studierenden den organisatorischen Ablauf der klinischen Rotationen sowie die Anforderungen an Vorbereitung, Leistungskontrolle und Hygiene. Sie sind in der Lage, das Kliniksystem (Vetera) und das digitale e-Portfolio (EPASS) selbstständig anzuwenden. Sie verfügen über grundlegende Kenntnisse in Praxismanagement und Berufsrecht (z.B. Versicherungen, Bewilligungen) und verstehen zentrale betriebswirtschaftliche Konzepte einer tierärztlichen Praxis. Zudem sind sie befähigt, sich im klinischen Alltag sicher zu bewegen, Hygienestandards umzusetzen und Biosicherheits- sowie Arbeitssicherheitsmaßnahmen korrekt anzuwenden. Durch praktische Übungen und die Auseinandersetzung mit Feedbackkultur stärken sie ihre Kommunikations- und Reflexionsfähigkeit im professionellen Umfeld.

Module Diagnostisches Labor

05SM.503_dl / Block Course

Description:

General description:

Im Modul Diagnostisches Labor vertiefen die Studierenden vor dem Beginn ihrer klinischen Rotationen zentrale Inhalte der Labordiagnostik. Dabei werden sowohl theoretische Grundlagen als auch praktische Fertigkeiten in verschiedenen tiermedizinisch relevanten Labormethoden vermittelt. Das Modul umfasst unter anderem die Arbeit mit Verfahren aus dem tierärztlichen Praxislabor, den Umgang mit Geräten im Point-of-Care-Labor (POC) des Tierspitals sowie das gezielte Üben ausgewählter Techniken im Skills-Lab der Fakultät. Ein besonderer Fokus liegt zudem auf der korrekten Anwendung von Biosicherheit und Biosafety im diagnostischen Labor, welche in Theorie und Praxis vertieft werden. Ziel ist es, die diagnostische Kompetenz zu stärken und den sicheren Umgang mit Laboruntersuchungen im klinischen Alltag vorzubereiten.

ECTS: 1

Learning Outcome:

Im Modul Diagnostisches Labor erwerben die Studierenden praxisnahe Kenntnisse in zentralen labordiagnostischen Verfahren der Veterinärmedizin. Sie vertiefen ihr Verständnis für die Vorbereitung, Durchführung und Interpretation von Laboruntersuchungen und lernen, Befunde mithilfe interaktiver Tools kritisch zu beurteilen. Neben der Qualitätssicherung im Praxislabor stehen insbesondere die präzise Probenentnahme sowie die korrekte Handhabung biologischer Proben im Vordergrund. Ein besonderer Fokus liegt auf der sicheren Umsetzung von Biosicherheits- und Biosafety-Massnahmen im Laboralltag. Darüber hinaus werden grundlegende diagnostische Konzepte, inklusive immunologischer Verfahren und hämatologischer Befundinterpretation, vermittelt, um die Studierenden optimal auf klinische Anwendungen vorzubereiten.

Languages of Instruction:

Deutsch und Englisch

Course Materials:

-Lerninhalte aus den Vorlesungen der Jahreskurse 2-4
-Vorlesungsskript in klinischer Labordiagnostik für die Studierenden der Vetsuisse-Fakultät (34. Ausgabe)"

Für die Beurteilung und Interpretation von Laborresultaten sind Lehrbücher (angegeben in der Literaturliste des Vorlesungsskripts) hinzuzuziehen. Bezüglich Inhalte und Prüfungsstoff siehe auch "Hinweise für die Studierenden der Veterinärmedizin - Fach Labordiagnostik" Auf alle Skripten und Vorlesungsunterlagen kann unter <https://www.vetlabor.uzh.ch> à Lehre sowie im OLAT zugegriffen werden.

Module Rotation Pathologie Einführung

05SM.515_pa1 / Block Course

Description:

General description:

Die Studierenden absolvieren zu Beginn der praktischen Semester gemeinsam eine Einführungswoche zur Pathologie. In dieser Woche werden die Sektionstechnik, die Grundlagen der makroskopischen und histologischen Beurteilung sowie Labormethoden wiederholt. Zusätzlich wird ein Zytologiekurs durchgeführt.

ECTS: 1

Learning Outcome:

Theoretische Kenntnisse, welche für möglichst effiziente Tätigkeit in den Rotationswochen in der Pathologie notwendig sind.

Basiskonntnisse für zielgerichtetes diagnostisches Vorgehen in der Pathologie.

Languages of Instruction:

Deutsch, teilweise Englisch

Merkmale:

Responsible instructor: Frauke Seehusen

Requirements:

Assessment: aktive Teilnahme

Grading Scale: Pass/Fail

Repeatability: Can be repeated twice

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: Die Rotation Pathologie Einführung dauert 1 Woche.

Termine werden bekannt gegeben

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Rotation Pathologie Sektionslokal Schlachthof

05SM.516_pa2 / Praktikum

Description:

General description:

Nach der Einführungswoche finden jeweils in Kleingruppen dreiwöchige Praktika im Sektionslokal sowie Seminare und Kurse statt. Obduktionen dienen vor allem der Vermittlung des formalen Ablaufes der Zerlegung eines Tieres, der Befundung von Organsystemen und der Anfertigung eines schriftlichen Obduktionsberichtes. Die Anfertigung des Berichtes soll vor allem die Gliederung in objektive Befundbeschreibung, Erstellung von Diagnosen und die subjektive Begutachtung vermitteln und damit die Grundlage für forensische Obduktionen liefern. Zudem wird die Schlacht tier und Fleischuntersuchung an einem Schlachthof erlernt

ECTS: 4

Notes:

Max. 7 Personen pro Praktikum/Gruppe

Learning Outcome:

Regeln für zweckmässige Einsendungen kennen.

Möglichkeiten und Grenzen der Diagnostik am Gewebe kennen.

Grundlagen der Zytologie erarbeiten.

Beherrschen der Sektionstechnik bei den verschiedenen Haustieren.

Korrekte Beschreibung und Interpretation der wichtigsten makroskopischen Organveränderungen.

Basiskonntnisse in Histopathologie am Beispiel ausgewählter Präparate.

Vertiefen der Basiskonntnisse für zielgerichtetes diagnostisches Vorgehen in der Pathologie.

Einblicke in wissenschaftliches Arbeiten im Fach Pathologie gewinnen.

Languages of Instruction:

Deutsch, teilweise Englisch

Merkmale:

Responsible instructor: Frauke Seehusen

Requirements:

Prerequisites: Module Rotation Pathologie Einführung

Assessment:

Während des praktischen Teils sind verschiedene arbeitsplatzbasierte Assessments abzulegen, welche einerseits rein formativ (ohne Note) bewertet werden und andererseits erhalten die Studierenden am Ende des Praktikums eine Note. Die Assessments müssen im e-Portfolio zeitnah dokumentiert und validiert werden.

Zur Vertiefung der klinischen Handlungskompetenz werden regelmässige Besprechungen, Diskussionen und Reflexion zu klinischen Fällen und der zugrundeliegenden Entscheidungen abgehalten. Feedback stellt ein zentrales

Element dar.

Module Global Software Management (L)

03SM22MI0049 / Course

Description:

General description:

The course introduces key concepts and current practices in managing software development across globally distributed teams. It covers global delivery models, communication and coordination challenges, and practical approaches to working across time zones, cultures, and locations. The course introduces common global software management strategies such as task distribution, the use of collaboration tools, and agile methods in global settings. The course covers governance and compliance in international projects, including standards like ISO/IEC and regulations such as GDPR.

In the second part of the course, students examine the use of AI tools such as large language models and AI agents in global software management, focusing on their impact on workflows, roles, and distributed team collaboration. They also explore future scenarios in AI-led delivery models, emerging governance needs, and new accountability frameworks. The course is complemented by insights from industry professionals working across global software organizations

The course ends with a project in which students design a scenario for global software development in the near future.

ECTS: 3

Notes:

Most of the sessions will take place from 14:00 – 15:45, except for a few sessions, which will last longer (14:00 – 18:00). The exact dates of the longer sessions will be announced in the first weeks of the course.

Learning Outcome:

By the end of the course, students will be able to:

- Identify and explain key concepts, models, and challenges in global software development, including distributed team coordination, communication across time zones and cultures, and governance in cross-site environments.
- Apply knowledge of software governance, compliance standards (e.g., ISO/IEC, GDPR), and risk management to the context of globally distributed software teams.
- Analyze the impact of AI-based tools and workflows (e.g., LLMs, AI agents) on global software engineering processes, including implications for collaboration, quality assurance, and organizational roles.
- Design and evaluate future-oriented global software delivery models that integrate human and AI contributions, with attention to accountability, ethics, and operational feasibility.

Target Groups:

MSc-Students

Languages of Instruction:

English

Course Materials:

Slides, and source code provided by the instructor.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Alberto Bacchelli

Requirements:

Prerequisites:

Programming knowledge

Prior Knowledge:

Basic knowledge in Business Administration and Information Systems. For business students: Minor in Information Systems (=Wirtschaftsinformatik)

Assessment:

The assessment consists of two components, each contributing 50% to the final grade:

- Midterm written on-site exam (50%): The closed-book exam will assess the theoretical foundations covered in the first half of the course. (Date/time: Oct 23, 2026 14:00-15:00).

- Group project with presentation to the plenum (50%): In the second half of the course, students will work in groups on a project focused on applied AI in global software development. Each group will submit a written deliverable and present their results in class. During the presentation, each student will be asked individual

questions by the lecturer to assess their understanding and individual contribution. (The presentation schedule will be decided during the course, depending on number of participants).

To pass the course, students must achieve a grade of at least 4.00 in both components independently. Participation in both the midterm exam and the final project presentation is mandatory.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Language Course Romontsch Sursilvan (for beginners)

06SM431-012 / Module

Description:

General description:

Einführung in das Idiom des Bündner Oberlands (Sursilvan) für Personen ohne Vorkenntnisse. Ab HS 2026 wird das Modul alle zwei Jahre angeboten, also im HS 2026, 2028, 2030 usw.

ECTS: 6

Notes:

Zweisemestriges Modul, das im FS 2027 fortgesetzt wird.

Learning Outcome:

Kennenlernen des Idioms des Bündner Oberlands, Entwickeln von Sprachkompetenzen; Zielniveau: A2/B1

Languages of Instruction:

Rätoromanisch und Deutsch

Merkmale:

Responsible instructor: Rico Franc Valär

Requirements:

Prerequisites: Sprachkurs für Personen ohne Vorkenntnisse.

Assessment: Portfolio: Mündliche Übungen in 80% der Lektionen (Gewichtung: 1/3 der Gesamtnote), je eine schriftliche Prüfung am Ende des HS und des FS (Gewichtung: je 1/3 der Gesamtnote).

Termin der schriftlichen Prüfung im HS: 07.12.2026 während der Veranstaltung, vor Ort ohne Hilfsmittel und ohne elektronische Geräte ("on site, Paper-Pencil").

Grading Scale: 1-6, Half Grades Given

Repeatability: Can't be repeated

Organisation:

Offer pattern: 2 Semesters (Begins every 2. Fall Semester)

Module CHE 728 Optical and Vibrational Spectroscopy

07SMCHE728 / Lecture with Practical Exercises

Description:

General description:

This course introduces the fundamental principles and applications of vibrational and optical spectroscopies. Building from the basics of light-matter interaction, students will learn both theoretical foundations and experimental methods, covering Raman, infrared, photoluminescence (PL), time-resolved PL, transient absorption, terahertz (THz) spectroscopy, and cathodoluminescence (CL) spectroscopy. The course combines lectures with demonstration sessions and practical examples, showing how these techniques are applied to solve challenges in materials science, health and life sciences, energy, and the environment.

ECTS: 2

Learning Outcome:

- Explain the theoretical foundations of Raman, IR, PL, time-resolved PL, transient absorption, THz spectroscopy, and CL.
- Understand instrumentation and measurement principles of vibrational and optical spectroscopies.
- Interpret experimental spectra and connect features with structural, electronic, and dynamical properties of materials.
- Select appropriate spectroscopic methods for different research questions in materials, health, energy, and environmental science.
- Critically analyze published data and discuss the advantages and limitations of different techniques.

Module Capstone: Corporate Democratic Responsibility - Die Rolle von Unternehmen in der Schweizer Demokratie
06SM615o539 / Module

Description:

General description:

Das Modul fördert vertieftes Fachwissen in einem ausgewählten Forschungsfeld. Es vermittelt die Kompetenz, zu einem ausgewählten Thema Fragestellungen aus Sicht der Politikwissenschaft zu entwickeln und zu analysieren. Im Zentrum des Seminars stehen die politikwissenschaftliche und normative Analyse, das trennscharfe Analysieren der Begriffe in ihrer Anwendung auf empirische Studien und das Begründen politischer Sachverhalte. Die unterschiedlichen Themen werden theoretisch und empirisch vertieft.

ECTS: 12

Learning Outcome:

Fachkompetenzen: o Demokratietheorie und link zu praktischen Konzepten

Methodenkompetenzen: o Stakeholder Analyse o Interview-Techniken o Survey design

Selbstkompetenzen: o Redaktion verschiedener Textsorten (wissenschaftlich, angewandt) o Interaktion mit Auftraggeber, professionelle Präsentation der Befunde o Selbstorganisation und Projektmanagement o Gruppenleitung

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Responsible instructor: Silja Häusermann

Requirements:

Prerequisites: Sehr gute Studienleistungen; sehr gute Deutschkenntnisse;

Assessment:

Fachkompetenzen:

o Demokratietheorie und link zu praktischen Konzepten

Methodenkompetenzen:

o Stakeholder Analyse

o Interview-Techniken

o Survey design

Selbstkompetenzen

o Redaktion verschiedener Textsorten (wissenschaftlich, angewandt)

Module The Politics of China (Written Paper)

06SM280-208 / Module

Description:

General description:

Thematische Vertiefung im Anschluss an das Modul "Politik Chinas (Vertiefung)". Selbständige Auseinandersetzung mit ausgewählten chinesischen Quellentexten und Forschungsliteratur in einschlägigen europäischen Wissenschaftssprachen, dokumentiert in Form der Darstellung der Arbeitsergebnisse als Hausarbeit gemäss wissenschaftlichen und fachlichen Kriterien.

ECTS: 3

Notes:

Zur Buchung des Moduls beachten Sie bitte die Hinweise auf unserer Homepage: <https://www.aoi.uzh.ch/de/studies/studyorganization/courseofstudies/booking.html>

Learning Outcome:

Selbständige Erschliessung von Quellen- und Forschungstexten in einschlägigen europäischen Wissenschaftssprachen; Dokumentation von Arbeitsergebnissen in Form einer schriftlichen Hausarbeit nach Massgabe wissenschaftlicher und fachlicher Standards.

Languages of Instruction:

Deutsch oder Englisch - gemäss individueller Absprache mit der Betreuungsperson

Module ESC 401DP High Performance Computing

07SMESC401DP / Course

Description:

General description:

This survey course covers the basics of High Performance Computing, starting with an introduction to the architecture of supercomputers, the Unix/Linux operating system and how to use a terminal emulator to connect remotely. We then review the basics of code editing, version control and compiling. We will present in detail how to make job submission scripts for SLURM, a widely used batch control system. After learning how to compile a code with the Message Passing Interface (MPI) library and OpenMP we will cover more advanced aspects of compilation and optimisation, and learn how to launch a parallel program on the different university clusters and supercomputers.

Next we will present in detail how to program a parallel code using both MPI and OpenMP and describe both the hardware and software specifics of parallel computing. We will also present the MapReduce parallel computing paradigm, and apply it to the ScienceCloud computing infrastructure at the University. We will learn about different parallel computing strategies and their tradeoffs. Finally we will introduce the concept of GPU programming using both the CUDA programming language and the OpenACC library.

ECTS: 3

Learning Outcome:

At the end of this course students will have a basic understanding of High Performance Computing (HPC) tools and techniques. They will have been exposed to the important types of hardware including multicore and GPU nodes, massively parallel clusters, and cloud computing infrastructure. They will also have a basic understanding of the software tools available for HPC, including BASH scripting, the MPI, OpenMP and OpenACC libraries, and the CUDA programming language.

Throughout the course the students will have used each of the techniques presented as part of the exercises.

Module Politics (Seminar Paper)

06SM280-594 / Module

Description:

General description:

Das Modul zielt auf die Vertiefung des Gegenstands eines erfolgreich abgeschlossenen Seminars in der Form einer thematisch fokussierten, den aktuellen Forschungsstand und, je nach inhaltlicher Ausrichtung, auch Primärquellen in geeignetem Umfang einbeziehenden schriftlichen Arbeit.

ECTS: 3

Notes:

Zur Buchung des Moduls beachten Sie bitte die Hinweise auf unserer Homepage: <https://www.aoi.uzh.ch/de/studies/studyorganization/courseofstudies/booking.html>

Learning Outcome:

Einübung der Fähigkeit zur Erarbeitung einer eigenen wissenschaftlichen Fragestellung und deren Verfolgung im Anschluss an ein Seminar. Einübung der Kompetenz zu selbständiger Recherche, Selektion, Erschliessung und Beurteilung einschlägiger Primärquellen und sinologischer Forschungsliteratur. Einübung der Kompetenz schriftlicher Präsentation wissenschaftlicher Arbeit nach Massgabe fachlicher Standards.

Module Hands-on History of English

06SM440o511 / Module

Description:

General description:

This

2-term project seminar allows students to get hands-on experience with historical data analysis and to thereby actively contribute to a research project currently carried out under the lead of the instructor ('Who did what to whom: Strategies of argument disambiguation in Early English'; WWW-SArDEEn).

Specifically, in the first semester (FS26), students will receive an in-depth introduction to the background and main aims of the project, which are to use state-of-the-art computational methods (in particular NLP-tools/ LLMs) to unravel the way in which English changed from a predominantly synthetic language (with e.g. extensive case marking and flexible word order) to a more analytic language (with little or indeed no case marking, and strict subject-verb-object order) between Old and Middle English. Students will then choose a specific aspect of this broad topic (such as e.g. word order in main vs subordinate clauses, atypical subject or object marking, loss of verb inflections, case marking patterns with specific verbs, etc.) to focus on. Towards the end of the first semester, students will present synopses of previous work on these issues - highlighting open questions especially connected to methodology - both orally and in written form.

The second semester (HS26) will resolve around practical data work, with students carrying out small projects on their chosen topics. That is, students will apply their questions hands-on to datasets from the instructor, in particular annotating the data with regard to variables identified as relevant in the first semester. As an example, this could mean filtering datasets for verbs of robbing/removing and developing classification schemes for case marking patterns with this verb class. One outcome of this second term will be carefully annotated and deliberated datasets which will in turn be used to train LLMs in the context of WWW-SArDEEn, i.e. the results will directly feed into and aid the larger project.

On the other hand, students will again present their final results on the phenomena investigated in a student-conference set-up at the end of HS26, and will reflect on the research process - in particular methodological challenges and pitfalls - as well as the final results in written form. Students will be acknowledged for their contributions in the project in due form, with the possibility of being included in the devising of actual research articles on selected issues.

ECTS: 15

Notes:

Sessions for this module will take place weekly in the first semester and every second week in the second semester. In the second semester, a student-conference will take place on December 12, 2026.

Learning Outcome:

Students gain hands-on experience with an actual research project, including data collection, data analysis, and project management skills. They learn to collaborate on a joint project in the context of the larger research project, to develop their own research design on the basis of relevant theoretical and methodological literature, present this in class and develop their ideas and analyses in written format. Most importantly, students will get in-depth practice at critically reflecting on methodological choices and challenges when working on concrete questions and with concrete historical data.

Languages of Instruction:

Englisch

Merkmale:

Responsible instructor: Eva Zehentner

Requirements:

Prerequisites: Students are required to have taken the modules History of the English Language
1: Focus on Old English and History of the English Language
2: Focus on Middle English or equivalent courses elsewhere.

Students need to have experience with data analysis for linguistic research projects and they are required to have written term papers in English linguistics at Bachelor level. Students are required to have good (written) academic English language skills (Level C1).

Students are expected to have taken the Methods and Theories in English Linguistics Module or equivalent Master-level courses elsewhere, and ideally one seminar paper in linguistics at Master level.

This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module

Assessment: Portfolio: two oral presentations (30%) during the module, and two written assignments (70%) with deadlines
31 August
2026 and
19 December
2026, respectively.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can't be repeated

Module GEO 417 Environmental archives and age determination I

07SMGEO417 / Lecture with Practical Exercises

Description:

General description:

Principles and techniques of numerical (Dendrochronology, radiocarbon, other cosmogenic nuclides, ...) and relative dating (weathering indices) of environmental archives are taught. Specific applications in geosciences such as geology, glaciology, hydrology and natural risks are discussed.

The module has the following activities:

- GEO 417.1 Laboratory course in geochronology
- GEO 417.2 Tree rings - a high-resolution environmental archive: applications

Students who enroll in the module GEO 417 are required to take the module GEO 418 in the following Spring Semester. ECTS credits are awarded only upon successful completion of both modules (GEO 417 and GEO 418), otherwise 0 ECTS credits.

A total of 6 ECTS credits are awarded for GEO 417 and GEO 418.

ECTS: 3

Notes:

The module GEO 417 is a year-long module, divided into GEO 417 and GEO 418: GEO 417 takes place in the Fall Semester, and GEO 418 in the following Spring Semester. GEO 418 consists of a five-day field course in South Tyrol, usually during the first week of July. For the year 2027, this means: June 29 – July 2.

- Module GEO 417 begins in fall semester; but official start is in January with a block course consisting of GEO 417.1 and 417.2
- The lab course will take place in 1 class until further notice.
- Insurance is the responsibility of the participants.

The Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 13 & 15

GEO 417.1 takes place in Room Y25-K-22.

Learning Outcome:

To become acquainted with environmental archives of the Quaternary, their dating and interpretation.

Target Groups:

MSc Students

Languages of Instruction:

Module GEO 186 Einführung in die Informationskompetenz

07SMGEO186 / Block Course

Description:

General description:

Der Kurs vermittelt grundlegende und angewandte Kompetenzen der wissenschaftlichen Literaturrecherche in Datenbanken, Fachportalen, Bibliothekskatalogen, Zeitungen und im Internet. Zudem lernen die Studierenden den effizienten Einsatz von Zotero zur Literaturverwaltung und zur Organisation ihrer Quellen. Ein weiterer Schwerpunkt liegt auf dem reflektierten und verantwortungsvollen Einsatz von KI-Werkzeugen im Rechercheprozess.

ECTS: 1

Notes:

Die Agenda 2030 der Vereinten Nationen (UNO) umfasst 17 Ziele für nachhaltige Entwicklung Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>), die von allen UN-Mitgliedstaaten verabschiedet wurden. Sie bilden einen gemeinsamen Rahmen zur Förderung von sozialer Gerechtigkeit, Umweltschutz und wirtschaftlicher Entwicklung weltweit.

Behandelt werden in diesem Modul insbesondere: 4

Learning Outcome:

Die Teilnehmenden können geeignete Informationsquellen erkennen und relevante Fachbegriffe für ihre Recherchen ermitteln und verwenden. Sie können die verschiedenen Informationsquellen vergleichen und beurteilen. Sie wissen, wie sie in Bibliothekskatalogen, Datenbanken, elektronischen Zeitschriften und im Internet Informationen finden. Sie bewerten den Einsatz von KI-Werkzeugen kritisch und reflektieren deren Chancen, Grenzen und Risiken für wissenschaftliches Arbeiten.

Target Groups:

Für Studierende der Geographie im 1. Semester

Languages of Instruction:

Deutsch

Course Materials:

Foliensatz und Handout

Merkmale:

Responsible instructor:

Merula Stout

Requirements:

Prior Knowledge:

Pflichtmodule des 1. Semesters aus den Bereichen Physische, Methodische und Humangeographie.

Assessment:

Der Leistungsnachweis beinhaltet zwei Teile:

1. Eine Zotero Bibliothek (Abgabe als geteilter Ordner in Zotero) inklusive der zugehörigen Referenzliste und Konzeptdiagramm (Abgabe als PDF in OLAT).
2. Drei kurze Tests (am jeweiligen Kurstag). Rechercheportfolio und Zwischentests für jeden Kurstag.

Für die Zotero Bibliothek gibt es bestanden/nicht bestanden wobei gilt, dass für "bestanden" 24 der 30 Referenzen richtig zitiert (nach APA Zitierstil) und relevant sein müssen (entspricht 80% der Referenzen richtig). Wenn weniger als 24

Referenzen korrekt sind, kann innerhalb einer Woche eine verbesserte Version eingereicht werden.

Für die Tests gilt: 2 von 3 Tests müssen bestanden werden wobei für jeden Test 70% der Fragen richtig beantwortet werden müssen. Wenn mehr als 1 Test nicht bestanden wird, kann er innerhalb des nächsten Monats wiederholt werden.

Es besteht Anwesenheitspflicht.

Sprache der Leistungsnachweise: Deutsch

Grading Scale: Pass/Fail
Repeatability: Can be repeated once

Module GEO PhD Scientific Writing Course

07SMGEOPHD06 / Doktorandenseminar

Description:

General description:

Geo PhD Scientific writing course, given by Anne Zimmermann and organized by the Zurich Graduate School in Geography and Earth System Science.

In the afternoons of the 4 days (between 13:00 and 15:00), individual coachings will be offered.

The course is limited to 12 participants; it is mandatory to attend all 4 days!

ECTS: 1

Notes:

In the morning, the course takes place in room Y25-K-22.

The individual coaching sessions will be held in room Y25-K-36.

Module BIO 215 Evolution of Human Life History

07SMBIO215 / Course

Description:

General description:

This course examines the evolution of human development and reproduction through the lens of life history theory. We will begin by outlining the key components of mammalian and primate life histories and identifying the distinctive features of the human pattern, including prolonged childhood, delayed reproduction and extended lifespan. A central focus of the course will be on hominin fossil evidence: for each major hominin species, we will explore what is currently known about its life history profile and integrate this with archaeological and morphological evidence related to diet, behavior, and ecology. Special attention will be given to the role of cooperative breeding in shaping the human life history strategy and its deep connections to the evolution of our uniquely social cognition and complex cooperative behavior.

ECTS: 3

Learning Outcome:

By the end of the course, students will be able to:

- Describe the key elements of life history theory and compare life history traits across mammals, great apes, and humans
- Critically evaluate the evidence used to reconstruct life history profiles in extinct hominines, including dental development, skeletal growth, and other fossil indicators
- Integrate fossil, archaeological, and comparative data to infer patterns of diet, behavior, and morphology in extinct hominin species
- Explain how cooperative breeding and extended juvenile dependency are linked to the evolution of human sociality and cognition
- Assess major hypotheses about the evolution of the human life history strategy and evaluate them in light of empirical evidence
- Apply life history theory and comparative data to broader questions about human evolution and adaptive niche

Module LSZ 102 Self-organization during a PhD

07SMLSZ102 / Doktorandenseminar

Description:

General description:

In this workshop you will get to know multiple different methods for timemanagement. You'll learn how self-organization can also be a question of setting boundaries and how to positively influence your dependencies on other people. Be prepared for being engaged in the discussion and to share your personal experiences with the other participants as the aim is to develop the content together in a guided manner. Struggles with time-management and self-organization are often not talked about, but overall, often very similar for other people.

In order to obtain a more targeted self-organization, we will discuss goal setting principles related to different timescales as well as the prioritization of tasks and how to keep the overview in times of a high workload. Furthermore, we will work out individual reasons for procrastination and how to get started on things.

The course includes both theoretical knowledge of various methods and techniques and you will be practically challenged to apply the different approaches to your own goals and to-do lists. This way, you will learn to match the methods with your personal challenges without becoming overwhelmed by your workload and thus increase your productivity. In the sessions we will have open discussions about everything concerned with the topic and develop strategies based on the participants personal experiences.

As many tasks during the PhD are requirements from the PhD-program or expectations from the boss/supervisor, self-organization with respect to the plans of other people plays an important role. This contains delegation of tasks, the setting of boundaries, expectation management and successful management of the legwork of other people. Additionally, we will discuss with the group the importance of decision-making abilities, appropriate ways of self-criticism and what role self-confidence plays in our personal time-management.

ECTS: 1

Learning Outcome:

What you learn in the workshop

- Goal setting
- Prioritization and keeping the overview
- Self-motivational techniques
- Managing tasks involving other people
- Self-review of productivity and efficiency/effectivity
- Digital tools for self-organisation
- Dealing with time thieves
- Role of self-confidence in time-management/self-organization

Module Collaborative Research on Integration in the Zurich Oberland

06SM721o447 / Module

Description:

General description:

Studierende werden in dieser Lehrforschung Teil eines co-kreativen und partizipativen Forschungsprojektes in direkter Nähe zu Zürich. Das Projekt «Wir sind Wetzikon. Zusammen.» erforscht lokal bestehende Angebote zu Integration und gemeinsamem Stadtleben sowie darüberhinausgehende Bedürfnisse verschiedener Bevölkerungs- und Akteursgruppen.

Wir wollen in einem partizipativen Prozess Lücken aufzeigen und Vorschläge für ein noch integrativeres / inklusiveres Stadtleben erarbeiten. Die Studierenden und Stadtbewohner:innen werden zu Mit-Forschenden und erkunden einzelne Themen vor Ort gemeinsam mit einzelnen communities / zivilgesellschaftlichen Akteursgruppen. Diese Themen werden in der vorbereitenden Methodvertiefung während des FS26 partizipativ erarbeitet werden.

ECTS: 6

Notes:

Bewerbung: Interessierte Studierende bewerben sich bitte mit einem Motivationsschreiben, CV und Studienfortschritt bis

27. Januar 2026 direkt bei juliane.neuhaus@uzh.ch.

Dauer der Lehrforschung: 08. Juni bis 05. Juli 2026.

Dieses Modul ist zweisemestrig. Der Unterricht findet in beiden Semestern statt. Sie können das Modul nur abschliessen, wenn Sie im zweiten Semester ebenfalls immatrikuliert sind. Der Lehrforschung findet im Sommer statt, und die kollaborative Datenauswertung findet in Absprache mit den Teilnehmenden an einigen Blockterminen im HS26 statt.

Learning Outcome:

Studierende lernen in diesem Modul, eine kollaborative Forschungsidee zu entwickeln, umzusetzen und auszuwerten. Dies geschieht im Rahmen einer geleiteten Exkursion. Dies dient zugleich der Einarbeitung in ethnologische Methoden in der Praxis. Die Daten können Grundlage einer späteren Abschlussarbeit sein. Ziel dieses Moduls ist es Studierende dabei zu begleiten, im Rahmen durch Dozierende geleitete Exkursionen eigene Forschungsideen zu entwickeln, umzusetzen und auszuwerten.

Verbunden damit ist ein mindestens vierwöchiger Aufenthalt im Feld.

Languages of Instruction:

Module LSZ103 Effective Visual Communication of Science

07SMLSZ103 / Doktorandenseminar

Description:

General description:

Effective Visual Communication of Science (flyer)

Learn to visualize your complex research ideas and findings so your messages stand out and are more easily understood by scientists or non-scientists.

The SEYENS METHODM is a strategic design process for visualizing scientific information. Straightforward, intuitive and easy to apply. You can immediately apply it to improve your publications and presentations, make them resonate with your audiences and help your research make an impact.

You will learn to visually communicate your complex research ideas and results so your messages are effortlessly understood by any specific audience (scientists or non-scientists). We will not focus on aesthetics but on how knowledge on human visual perception can help you create effective scientific images, slides, and posters. You will design a graphical abstract of your research, discuss it with peer scientists in a group exercise, and get actionable advice and feedback on your own images and slides. It is an immersive workshop, comprehensive, structured, memorable, easy to follow, useful and fun.

ECTS: 1

Learning Outcome:

Fundamentals of visual communication that underlie all scientific communication. Includes knowledge of visual perception, layout, eye flow, colours, and typography.

Approaches to different science communication types including slide presentations and posters.

Draw a graphical abstract that visually presents your research. Use visual communication terminology to give and receive feedback from other scientists.

Give and receive feedback on posters, slides, and figures

Module CHE 305 Physical Chemistry III: From Quantum Mechanics to Quantum Chemistry

07SMCHE305 / Lecture with Practical Exercises

Description:

General description:

This lecture presents the core concepts of many-body quantum mechanics and explores theoretical approaches for describing atoms and molecules. Beginning with the fundamentals of quantum mechanics, it introduces the harmonic approximation for nuclear motion and mean-field methods for electronic structure. The Hartree–Fock method is examined in depth, followed by an overview of post-Hartree–Fock techniques such as Møller–Plesset perturbation theory, configuration interaction, and coupled cluster methods. The lecture concludes with an introduction to density functional theory, a widely used approach for studying electronic structure.

ECTS: 4

Languages of Instruction:

English

Merkmale:

Responsible instructor: Sandra Luber

Requirements:

Assessment:

Written module examination after the lecture period
Repetition of the exam in fall prior to the beginning of the new year of studies
The current exam schedule can be found under: <https://www.chem.uzh.ch/de/Studium/exams/hs.html>
and for the repetition exams under: <https://www.chem.uzh.ch/de/Studium/exams/rep.html> (<https://www.chem.uzh.ch/de/Studium/exams/rep.html>)
The exam is held in English!! (With consent of all participants, the exam could be held in German)

Module BIO 648 Introductory Course in Neuroscience I

07SMBIO648 / Course

Description:

General description:

The course gives an introduction to the development and anatomical structure of nervous systems. Furthermore, it discusses the basics of cellular neurophysiology and neuropharmacology. Finally, the nervous system is described on a system level.

ECTS: 2

Notes:

Lectures are usually held on Mondays from 16:00 to 18:00. Exceptions may occur. Please always verify the exact dates and times on the ZNZ webpage (<https://www.neuroscience.uzh.ch/en/education/courses/introductory-Course-in-Neuroscience.html>).

Target Groups:

PhD students

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Wolfgang Knecht

Requirements:

Prerequisites:

For PhD students in the ZNZ Neuroscience program.

Assessment:

Exam Introductory Course in Neuroscience

- The exam is a three-hour written test.
- It contains six questions covering six topics of the corresponding semester. A question should be answered roughly in about 30 minutes.
- The answer to a question is evaluated with a scale ranging from one to six points.
- The questions will be given in English. The answers are to be given in English.
- No auxiliary means except a dictionary are allowed.

No prior registration needed.

Module Digital Technologies for Teachers and Teaching

06SM222DTT / Module

Description:

General description:

Discussions about digital technologies in education often focus on them as curricular content-knowledge and competences students need to develop-or as tools for enhancing learning in the classroom (Starkey, 2020; UNESCO, 2022). Yet digital tools also hold great potential to support teachers beyond the classroom, supporting them in designing, evaluating, and collaborating on instructional ideas and materials. This seminar focuses on digital technologies for empowering teachers across professional tasks. Students will engage with selected tools and critically discuss their affordances and limitations for their professional practice.

Module Master's Thesis

06SM450-MA / Master Paper / MA-Arbeit

Description:

General description:

Students are to agree on their topic with their supervisor in a timely manner. Further details pertaining to requirements specific to the respective field in which the student has chosen to write the thesis should be discussed with them. Students are able to: (a) devise, plan, and conduct an independent research project using appropriate theoretical and methodological approaches; (b) solicit appropriate feedback; (c) present their own research in C2-level academic prose, which applies the conventions of academic writing in English.

ECTS: 30

Notes:

Students are only allowed to book this module with a particular supervisor once the instructor in question has agreed to supervise their Master Thesis.

Learning Outcome:

The Master thesis shows evidence of the ability to work independently on an academic project of a suitable level within the stipulated time limit, and to present this appropriately.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Michael Clemens Frank

Module Master's Thesis

06SM451-MA / Master Paper / MA-Arbeit

Description:

General description:

Students are to agree on their topic with their supervisor in a timely manner. Further details pertaining to requirements specific to the respective field in which the student has chosen to write the thesis should be discussed with them. Students are able to: (a) devise, plan, and conduct an independent research project using appropriate theoretical and methodological approaches; (b) solicit appropriate feedback; (c) present their own research in C2-level academic prose, which applies the conventions of academic writing in English.

ECTS: 30

Notes:

Students are only allowed to book this module with a particular supervisor once the instructor in question has agreed to supervise their Master Thesis.

Learning Outcome:

The Master thesis shows evidence of the ability to work independently on an academic project of a suitable level within the stipulated time limit, and to present this appropriately.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Michael Clemens Frank

Requirements:

Prerequisites:

Students should have successfully written a Master seminar paper in the field (i.e. literature or linguistics) in which they are planning to conduct the Master Thesis project.

Assessment:

schriftliche Arbeit

Grading Scale:

1-6, Half Grades Given

Repeatability:

Module Reading, but How? Literary Methods and Theories

06SM390p001 / Module

Description:

General description:

Ce type de cours propose une réflexion approfondie sur un aspect choisi de l'étude de la littérature française ou francophone modernes ou contemporaines: un thème, une époque, un genre, un mouvement, un ou plusieurs auteurs.

ECTS: 3

Learning Outcome:

Les étudiantes et les étudiants s'initieront à une problématique circonscrite des études littéraires françaises ainsi qu'avec les outils théoriques qui permettent d'y réfléchir.

Module Soap, Coffee Maker, Tie and Hat: How Literature Thinks Things

06SM390p002 / Module

Description:

General description:

«J'ai le sentiment d'instances muettes de la part des choses, qui solliciteraient de nous qu'enfin l'on s'occupe d'elles [...]», explique Francis Ponge en 1953 dans «Réponse à une enquête radiophonique sur la diction poétique».

Ce cours propose d'explorer la place des choses dans la littérature française, du XIXe siècle à l'époque contemporaine. À partir d'écrivain·e·s de la mouvance réaliste ou romantique comme Balzac, Flaubert ou Gautier, dont la nouvelle La Cafetière témoigne bien de la relation privilégiée que le fantastique entretient avec le motif de l'objet, et plus proche de nous Georges Perec, François Bon, Maylis de Kerangal ou encore Fabienne Radi, nous analyserons comment les textes donnent voix aux choses, les transforment, et par là révèlent les contextes sociaux, historiques et culturels dans lesquels s'inscrivent les œuvres...

L'atelier fonctionnera de manière collaborative : une partie du corpus sera définie avec les étudiant·e·s, selon leurs intérêts et leurs propositions. L'objectif est de développer une lecture attentive des textes, ainsi que des compétences d'analyse et de rédaction.

Lors de cet atelier collaboratif, l'encadrant·e et les étudiant·e·s procéderont de manière commune au choix de textes sur le sujet. Des périodes allant du XIXe siècle à l'époque contemporaine pourront être abordées, ainsi qu'une large diversité de genres littéraires, selon les intérêts des participant·e·s. Nous procéderons à l'exploration de ces textes et des enjeux qui leur sont communs. L'accent sera mis sur le développement des capacités d'analyse et de collaboration face aux textes littéraires, ainsi que sur la canalisation de la réflexion. L'encadrant·e suivra de près les étudiant·e·s, dans l'acquisition de la méthodologie aussi bien que dans la rédaction d'un travail écrit.

ECTS: 3

Learning Outcome:

Les étudiantes et les étudiants s'initieront aux enjeux et aux questions théoriques et méthodologiques d'un sujet de recherche relevant des études littéraires. Ils et elles approfondiront et appliqueront leurs compétences d'analyse littéraire et amélioreront leur expression scientifique à l'oral et à l'écrit, tout en acquérant des connaissances précises concernant un aspect de l'histoire littéraire, un auteur, un courant littéraire ou un thème en particulier.

Module BW: Block course in St. Andrews

01SM15LS000 / Block Course

Description:

General description:

In zwei Blockkursen (NT/AT) befassen wir uns mit der vielschichtigen Thematik der frühjüdischen und frühchristlichen Apokalyptik. Zunächst behandeln wir frühjüdische und frühchristliche Literatur der ersten beiden Jahrhunderte n. Chr. (Teil NT), anschließend die Anfänge apokalyptischen Denkens in der Hebräischen Bibel und den wirkmächtigen Schriften der zwischentestamentlichen Zeit (Teil AT).

Für den NT-Teil reisen Zürcher Studierende und Doktorierende vom 18.–20. Juni 2026 nach St Andrews, für den AT-Teil empfangen wir im Januar 2027 Studierende und Doktorierende aus St Andrews in Zürich. Die Blockkurse sind nur kombiniert buchbar und ergeben zusammen 3 ECTS. Die Seminareinheiten finden auf Englisch statt und werden von Dozierenden aus Zürich und St Andrews durchgeführt.

ECTS: 3

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Florence Gantenbein

Requirements:

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 2 Semesters (One-Time)

Module Lorenzo de' Medici and the Invention of the Renaissance

06SM410p004 / Module

Description:

General description:

Questo tipo di corso monografico offre un approfondimento specifico su un tema, una questione critica e/o teorica, un ambito di ricerca attuale, un periodo storico, un movimento letterario, uno o più autori o autrici della letteratura italiana dalle Origini al Cinquecento.

ECTS: 3

Learning Outcome:

Nel corso sono approfonditi casi di studio relativi alla letteratura dalle Origini al Cinquecento, di cui si offre un inquadramento storico, critico e letterario, ponendo particolare attenzione al fenomeno della formazione di una tradizione letteraria in Italia e alle sue modalità, in un'ottica intertestuale. Gli studenti e le studentesse imparano così ad analizzare in modo approfondito e dettagliato le opere nel contesto culturale e intellettuale di riferimento attraverso una pluralità di approcci e metodologie critiche. Studentesse e studenti potranno così familiarizzare con le particolarità linguistiche, stilistiche e retoriche dei testi; acquisire una specifica competenza di lettura; riconoscere i tratti specifici della comunicazione letteraria medievale e rinascimentale.

Module Italian Poetry of the 20th Century. An Introduction

06SM410p006 / Module

Description:

General description:

Il corso monografico in letteratura moderna e contemporanea si occupa di trattare in modo approfondito o un singolo argomento (tema, periodo storico, teoria, metodo, ecc.), o una singola opera letteraria, o ancora l'opera di un singolo autore o di una singola autrice. L'oggetto di studio si colloca di volta in volta in un ambito cronologico che va dal Rinascimento alla contemporaneità.

ECTS: 3

Learning Outcome:

Gli studenti e le studentesse apprendono a collocare i testi letterari nel loro contesto culturale, a leggerli attraverso le metodologie critiche più adatte e ad approfondire e ampliare le loro conoscenze nel campo della letteratura italiana moderna e contemporanea.

Module Agreement from Latin to the Romance Languages

06SM410p001 / Module

Description:

General description:

Il corso tratta di un ambito tematico definito in termini storici (un'epoca della storia della lingua italiana o delle varietà italo-romanze), geografici (un'area dell'Italoromània) o strutturali (i fenomeni di un determinato livello di analisi: fonetica/fonologia, morfologia, sintassi, lessico, semantica, pragmatica, sempre con applicazione alla diacronia). Nel corso studenti e studentesse vengono esposti/-e a nozioni di base della disciplina linguistica ed alla loro applicazione in particolare alla diacronia. Tali nozioni sono presentate nelle letture in programma e nella trattazione in classe. Per la loro applicazione, inoltre, l'unità didattica comprende uno studio in autonomia per il/la discente che dovrà affrontare un approfondimento bibliografico relativo al corso offerto.

ECTS: 6

Notes:

I corsi del Prof. Loporcaro del semestre autunnale 26 inizieranno nella seconda settimana del semestre.

Learning Outcome:

Gli studenti e le studentesse acquisiscono le nozioni di base dell'ambito tematico oggetto del corso monografico e sono esposti, attraverso le lezioni e le letture manualistiche in programma, all'applicazione a tale ambito degli strumenti analitici della disciplina.

Module The Dialects of Northern Italy

06SM410p003 / Module

Description:

General description:

Il seminario affronta un ambito di fenomeni definito in termini storici o strutturali sulla base di una bibliografia che raccorda letture manualistiche e letture avanzate di linguistica dell'italiano. Le sedute introduttive, condotte dal docente, presentano gli strumenti analitici e forniscono esempi della loro applicazione, propedeutici all'applicazione autonoma da parte dei/delle discenti che si concretizza nel contributo previsto dal portfolio. Il secondo semestre è dedicato alla stesura di un lavoro scritto.

ECTS: 6

Notes:

I corsi del Prof. Loporcaro del semestre autunnale 26 inizieranno nella seconda settimana del semestre.

Learning Outcome:

Gli studenti e le studentesse sono capaci di analizzare autonomamente fenomeni linguistici - in sé considerati o in quanto riflessi entro testi - applicando le nozioni apprese in precedenza. Sono capaci di comunicare contenuti scientifici complessi entro un discorso coerente in base agli strumenti di riferimento e ad un vaglio critico delle fonti.

Languages of Instruction:

Italienisch

Merkmale:

Responsible instructor: Michele Loporcaro

Requirements:

Prerequisites: Conoscenze linguistiche avanzate quali vengono insegnate ad esempio nel modulo "Strumenti e metodi avanzati in linguistica"

Assessment: Portfolio: presentazione orale durante le ultime sedute (33%), lavoro scritto (67%).

La consegna del lavoro scritto deve avvenire entro il 28 febbraio 2027.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can't be repeated

Module Ariosto's Library

06SM410p005 / Module

Description:

General description:

Questo tipo di corso monografico offre un approfondimento specifico su un tema, una questione critica e/o teorica, un ambito di ricerca attuale, un periodo storico, un movimento letterario, uno o più autori o autrici della letteratura italiana dalle Origini al Cinquecento.

ECTS: 3

Learning Outcome:

Nel corso sono approfonditi casi di studio relativi alla letteratura dalle Origini al Cinquecento, di cui si offre un inquadramento storico, critico e letterario, ponendo particolare attenzione al fenomeno della formazione di una tradizione letteraria in Italia e alle sue modalità, in un'ottica intertestuale. Gli studenti e le studentesse imparano così ad analizzare in modo approfondito e dettagliato le opere nel contesto culturale e intellettuale di riferimento attraverso una pluralità di approcci e metodologie critiche. Studentesse e studenti potranno così familiarizzare con le particolarità linguistiche, stilistiche e retoriche dei testi; acquisire una specifica competenza di lettura; riconoscere i tratti specifici della comunicazione letteraria medievale e rinascimentale.

Module LibLab: Literary Research and Digital Tools

06SM410p007 / Module

Description:

General description:

Questo LibLab è parte di una serie di esercitazioni con cui si esplorano i rapporti tra mondo della letteratura e mondo digitale. In questo corso ci si occuperà di capire cosa sia e come venga costruita l'edizione digitale di testi letterari, manoscritti e a stampa. Le/i partecipanti potranno entrare dietro le quinte di un progetto di ricerca finanziato dal Fondo Nazionale Svizzero attualmente in corso: l'edizione digitale delle opere della scrittrice Alice Ceresa. Nel corso di questa esercitazione i/le partecipanti potranno approfondire la loro conoscenza di questa autrice, capire come è costituito un archivio letterario e osservare dall'interno la struttura di un'edizione digitale, cimentandosi con l'elaborazione dei principali passaggi tecnici necessari a trasferire il testo, nelle sue varie fasi di stesura, dalla carta allo schermo.

ECTS: 3

Languages of Instruction:

Italiano

Merkmale:

Responsible instructor: Tatiana Crivelli Speciale

Requirements:

Prerequisites:

--

Assessment:

Il gruppo lavorerà su un testimone manoscritto o dattiloscritto dal Fondo Ceresa dell'Archivio Svizzero di Letteratura, che andrà preparato per un'edizione digitale. Per il superamento del corso si richiede che ogni partecipante allestisca una pagina di edizione digitale ed elabori un diario di lavoro (ca. 10 pp.), che accompagni il lavoro svolto descrivendo i modelli di riferimento valutati, le tappe e le tempistiche dello svolgimento del compito, le difficoltà tecniche e concettuali incontrate e le soluzioni adottate.

La pagina di edizione e il diario di lavoro che l'accompagna andranno consegnate entro l'11 gennaio 2027.

Module NT Research Seminar

01SM15SF014 / Forschungsseminar

Description:

ECTS: 3

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Jörg Frey
Stefan Krauter

Requirements:

Grading Scale: Pass/Fail

Repeatability: Can be repeated twice

Organisation:

Offer pattern: 1 Semester (Irregular)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Organisation: Faculty of Theology and the Study of Religion

Offered in: Fall Semester 2026

Component of:
