Module Politics of Lifelong Learning

06SM234-509 / Module

Description:

General description:

Lebenslanges Lernen ist die zentrale bildungspolitische Programmatik der letzten Jahre. Mit Beginn der 1970er Jahre wurde sie von internationalen Akteuren und diversen Stakeholdern vorangetrieben. Lebenslanges Lernen wurde in nationale Bildungspolitiken transferiert und übersetzt, was zu grundlegenden Verschiebungen in verschiedenen Bereichen der nationalen Bildungspolitiken führte, beispielsweise der Erwachsenenbildung, dem Hochschulbereich oder der Frühpädagogik. Längst umfasst Lebenslanges Lernen nicht nur berufliche Qualifikationen, sondern auch Bereiche wie Wellbeing. Im Seminar werden wir uns mit der Entwicklung der Politik des Lebenslangen Lernens auf verschiedenen Ebenen befassen und die politische Bedeutung dieser Programmatik und der damit verbundenen Ziele herausarbeiten.

Das Modul wird jeweils in den geraden Jahren im Herbstsemester angeboten.

ECTS: 6

Learning Outcome:

- Die Studierenden können relevante Akteure der Politik des lebenslangen Lernens, die auf verschiedenen bildungspolitischen Ebenen involviert sind, identifizieren und kritisch reflektieren
- Sie können die Interessen der verschiedenen Akteure der Politik des lebenslangen Lernens und Transferprozesse analysieren, die politischen Agenden hinter verschiedenen Politiken des Lebenslangen Lernens beurteilen und die Bedeutung der Politik des Lebenslangen Lernens für verschiedene Bereiche im Bildungssystem analysieren
- Sie können ein von ihnen erarbeitetes Thema zum Lebenslangen Lernen für die anderen Studierenden in mündlicher Form präsentieren

Module The Odyssey in America (Seminar Greek/English Literature)

06SM321p021 / Module

Description:

General description:

This seminar centers on The Odyssey and approaches Homer's epic, its reception, and its modern adaptations and iterations from an interdisciplinary perspective, i.e. American Studies and Classics/Greek philology. We will focus on Homer's text (in its English translation) as a complex narratological experiment of the Archaic period of Greece before discussing its reception and creative appropriations over time with a special focus on North American literature and culture of the late 20th and early 21st centuries. Finally, we will also zoom in on some of the central characters from The Odyssey (esp. Penelope) and analyze and compare their specific figurations within the epic tradition and contemporary North American culture.

Please acquire your own copy of Homer's The Odyssey, translated by Emily Wilson (2017) and Margaret Atwood's The Penelopiad (2005). All other readings and course materials will be available on OLAT.

ECTS: 3

Notes:

Students from one of the English studies programs should book this module for 3 ECTS credits in the fall semester of 2026 and a module with a term paper for 6 ECTS credits in the spring semester of 2027, allowing them to receive 9 ECTS credits equivalent to an "English Literature Research Seminar."

Module Word Order in Italo-Romance

06SM410p501 / Module

Description:

General description:

Il seminario affronta un ambito di fenomeni definito in termini storici o strutturali sulla base di una bibliografia che raccorda letture manualistiche e letture avanzate di linguistica dell'italiano. Le sedute introduttive, condotte dal docente, presentano gli strumenti analitici e forniscono esempi della loro applicazione, propedeutici all'applicazione autonoma da parte dei/delle discenti che si concretizza nel contributo previsto dal portfolio. Il secondo semestre è dedicato alla stesura di un lavoro scritto.

ECTS: 9

Learning Outcome:

Gli studenti e le studentesse sono capaci di analizzare autonomamente fenomeni linguistici - in sé considerati o in quanto riflessi entro testi - applicando le nozioni apprese in precedenza. Sono capaci di comunicare contenuti scientifici complessi entro un discorso coerente in base agli strumenti di riferimento e ad un vaglio critico delle fonti.

Module The Two Venuses: Renaissance Ideas about Love

06SM410p504 / Module

Description:

General description:

Attraverso la lettura di due capolavori influenti della letteratura rinascimentale, gli Asolani di Pietro Bembo e i Dialoghi d'amore di Leone Ebreo, si esplorano i concetti e le rappresentazioni relativi all'amore intorno al 1500. Cercheremo di ricostruire la dimensione filosofica della questione, ma anche quella sociale, con particolare riguardo al ruolo della donna. Riferimenti alle arti visive e alla poesia coeva permetteranno di arricchire le nostre analisi.

Module Between tradition and innovation - operations of theatres in practice

06SM760p001 / Module

Description:

General description:

Wie ist ein Theaterbetrieb aufgebaut? Was macht die Programmplanung für eine Musiktheater- und Konzertsaison aus? Welche Stücke kommen warum auf die Bühne? Wie sprechen wir neues Publikum an? Welche Berufe gibt es am Theater - und was bedeutet es dort zu arbeiten? Diesen und vielen anderen Fragen wird in dem Blockseminar mit Exkursion an das Aalto-Theater Essen inklusive Vorstellungsbesuchen von Korngolds "Das Wunder der Heliane" sowie Verdis "Rigoletto" nachgegangen. Die Dozentin Dr. Merle Fahrholz ist seit der Spielzeit 2022/23 Intendantin für das Aalto Musiktheater und die Essener Philharmoniker, zuvor war sie u.a. stellvertretende Intendantin und Chefdramaturgin an der Oper Dortmund. In diesem Seminar soll über die aktuelle Praxis am Theaterbetrieb gesprochen, Fragen zum Berufseinstieg erörtert und allgemeine Überlegungen zur Zukunft der klassischen Kulturszene diskutiert werden.

Module Excursion Central Asia

06SM721o448 / Module

Description:

General description:

In Summer

2026, Chair Peter Finke will offer an excursion to Central Asia—a region that remains a blind spot for many people and for anthropology in comparison to other parts of the world. While the exact destination has not yet been finalized, it will take place in one of the following countries: Uzbekistan, Qazaqstan, or Mongolia.

The excursion, which includes an integrated language course and summer school, will introduce students to the region and enable them to conduct research on a range of topics. The final dates and destination will be announced after consultations with participants and local partners. If conditions allow, students may extend their stay in the field independently.

ECTS: 6

Notes:

The excursion is open to BA and MA students. Upon successful completion of both the excursion and the language course, students will receive 6 ECTS credits for each.

Please send your letter of motivation to Meltem Sancak (meltem.sancak@uzh.ch) by February 15, 2026: <https://t.uzh.ch/1W1%3Cbr%3E%3Cbr%3E>>t.uzh.ch/1W1

 This module is a two-semester course. You can only complete the module if you are also enrolled in the second semester.

Learning Outcome:

Students will become familiar with a new region through an introduction to its language, culture, and society.

Students will develop methodological skills and carry out a small research project based on their own interests.

Students will gain first-hand experience in the field and practice ethnographic research, including the professional and personal skills this entails.

06SM504p002 / Module

Description:

General description:

Lektüre, Analyse und Diskussion von Texten aus dem Bereich Literatur und Übersetzung/Mehrsprachigkeit

ECTS: 3

Learning Outcome:

Am Ende des Seminars werden die Studierenden ein tieferes Verständnis dafür haben, wie Literatur zur Entkolonialisierung beiträgt, wie narrative Macht funktioniert und wie marginalisierte Stimmen das kulturelle Gedächtnis neu gestalten. Vorkenntnisse in postkolonialen Studien sind nicht erforderlich - nur Neugier, Offenheit und die Bereitschaft, Literatur über Kulturen und Sprachen hinweg zu erforschen.

Module Literature and Music

06SM504p501 / Module

Description:

General description:

Musik und Literatur haben einen gemeinsamen Ursprung, was sich u.a. am Epos und an der Poesie erkennen lässt, die in ihren Anfängen gesungen wurden. In der Moderne kommt es zur Ausdifferenzierung der Künste; dennoch gibt es auch hier Berührungspunkte, z.B. in Gestalt der Oper, der Comédie-Ballet oder des Kunstlieds. Im 19. Jahrhundert entwickelt Wagner die Idee des Gesamtkunstwerks, auf die Dichter wie Baudelaire oder Mallarmé reagieren. In diesem Seminar wollen wir einerseits über die semiotische Verfasstheit von Musik und Literatur nachdenken (für einen ersten Zugang s. Steven Paul Scher (Hg.), Literatur und Musik. Ein Handbuch zur Theorie und Praxis eines kompositorischen Grenzgebietes, Berlin 1984), andererseits bestimmte Beispiele und Texte betrachten bzw. studieren. Mögliche Texte und Werke: Jean-Jacques Rousseau, «Lettre sur la musique française», «Essai sur l'origine des langues», Wolfgang Amadeus Mozart, «Le nozze di Figaro» (Beaumarchais, Lorenzo da Ponte), Franz Schubert, «Winterreise» (Wilhelm Müller), Robert Schumann, «Dichterliebe» (Heinrich Heine), Claude Debussy, «Ariettes oubliées» (Paul Verlaine), Auszüge aus Marcel Prousts «À la recherche du temps perdu» und Thomas Manns «Doktor Faustus». (Die genaue Auswahl erfolgt in der ersten Sitzung des Seminars in Absprache mit den Teilnehmerinnen und Teilnehmern.)

ECTS: 6

Learning Outcome:

Erwerb exemplarischer Kenntnisse im Bereich der Modulthematik, die mündlich präsentiert und in einer schriftlichen Fassung des Referats ausformuliert werden.

Description:

General description:

Diese Ringvorlesung wird von Expert:innen des Fachs gehalten und vermittelt angehenden Gymnasiallehrpersonen die grundlegenden Bildungsziele und ihren erweiterten Berufsauftrag. Im Fokus stehen transversale Kompetenzen - etwa digitale, wissenschaftspropädeutische, politische und nachhaltigkeitsbezogene Aspekte - sowie die Reflexion der eigenen Handlungskompetenzen. Außerdem behandelt die Vorlesung Elternarbeit, den Umgang mit schwierigen Lehr-Lernsituationen und Schulentwicklung. Insgesamt erhalten die Studierenden einen kompakten Überblick über das pädagogische, institutionelle und gesellschaftliche Umfeld, der sie zu einer vorausschauenden, reflektierten Berufspraxis befähigt.

ECTS: 2

Learning Outcome:

Verständnis der gymnasialen Bildungsziele

- Die Studierenden können die duale Zielsetzung von Allgemeiner Studierfähigkeit und vertiefter Gesellschaftsreife erläutern und reflektieren.

Transversale Kompetenzen im Fachunterricht

- Die Studierenden können die Bedeutung überfachlicher und transversaler Kompetenzen für das Erreichen der Bildungsziele reflektieren.

- Sie können gängige Kompetenzmodelle der fächerübergreifenden Wissenschaftspropädeutik, der Bildung für Nachhaltige Entwicklung (BNE), der Politische Bildung, der Interdisziplinarität beschreiben und hinsichtlich ihres eigenen Fachs reflektieren.

- Die Studierenden können Kernelemente des Modells der basalen fachlichen Kompetenzen für die allgemeine Studierfähigkeit nennen und hinsichtlich ihres eigenen Fachs reflektieren.

- Die Studierenden können das Zürcher Modell zur Implementierung der transversalen Unterrichtsbereiche beschreiben und hinsichtlich der Anwendung in ihrem eigenen Unterrichtsfach reflektieren.

Module Bad News? Causes and Effects of Negative News

06SM249p501 / Module

Description:

General description:

Negative Nachrichten wohin man schaut und alles wird immer nur noch schlimmer? Gibt es mehr Kriege, Krisen, Katastrophen oder übertreibt der Journalismus? Oder ist alles gar nur ein menschlicher Wahrnehmungsfehler? In welchen Medien finden wir besonders viel Negativität und ist das gut oder schlecht? Welche individuellen, gesellschaftlichen und medialen Effekte gehen damit einher? Braucht die Demokratie "bad news" oder können wir uns vorstellen, dass Nachrichtenberichterstattung und/oder Nutzung auch anders aussehen könnte? Das Seminar nimmt "Bad News" als Ausgangspunkt, um grundlegende Dynamiken der Nachrichtenproduktion und -rezeption zu untersuchen. Im Zentrum stehen theoretische und empirische Perspektiven auf Nachrichtenwerte, mediale Selektionsprozesse sowie psychologische und soziale Wirkungen negativer Berichterstattung.

Module Scientific Consulting Project (S)

03SM22MO0018 / Seminar

Description:

General description:

Over the course of two semesters, students work in project teams on real consulting engagements provided by external partner organizations. Acting in the role of consultants, they receive instructions on the scientific principles of formulating and testing hypotheses, as well as training in project management and effective presentation techniques (additional input may be provided by the external partners). Following the initial kick-off, student teams are expected to work independently, participate in peer-review sessions, and submit periodic progress reports leading up to the final presentation to the external partners in the spring semester.

The in-person sessions-including classes, workshops, peer-review meetings, and the final presentations-take place on several full-day dates distributed across the two semesters.

ECTS: 6

Notes:

This is a compulsory course for students in the MA Major Betriebswirtschaftslehre. Since this course runs for 2 consecutive semesters, students are expected to schedule stays abroad/internships/other with this class in mind.

I.e. If students want to go on exchange in their 3rd semester and finish the MA in the expected four semester duration, they should take this course in their 1st year of studies.

Only MA Major BWL students will be admitted to this course.

Application for this seminar is the module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>

Learning Outcome:

Students are expected to act as consultants, work collaboratively in teams, and apply scientific rigor in formulating and testing hypotheses as they address the challenges presented by external partners. Depending on the input provided by the partner organization, students will develop their own hypotheses and employ appropriate methodologies to evaluate, refine, and iteratively improve them throughout the course. They will also learn to defend their assumptions, justify their analytical choices, and adapt their hypotheses in response to new evidence and feedback.

Across multiple project stages-including peer feedback rounds, interim reviews, and the final presentation to external partners-students will practice communicating, defending, refining, and critically reflecting on their approaches and results. This process culminates in both a final presentation and a written reflection report.

Module Negotiations Under Pressure - Managing Deadlocks, Emotions, and Irrationality: Theory and Role Playing (S) 03SM22MO0276 / Seminar

Description:

General description:

This course is designed for Master students who wish to develop both a theoretical and practical understanding of negotiations, with a particular focus on complex and irrational situations. The course combines theoretical insights from Bazerman and Neale's "Negotiating Rationally" with a practice-oriented negotiations strategy for negotiations under pressure, the "Schranner Concept": It structures the negotiation process into four phases: preparation, opening, leadership, and deadlock.

The course pursues two interconnected goals. First, students will explore the theory of rational negotiations including common decision-making biases, and the practical challenges of high-pressure negotiations. Second, they will apply this knowledge in practical roleplays and simulations by analyzing negotiation processes and outcomes, reflecting on strategies for managing emotions, overcoming deadlocks, and maintaining leadership under pressure.

ECTS: 3

Notes:

The number of participants is limited. Please send your application including a current transcript, a motivation letter, and a short CV until 06.05.2026 to vhs@business.uzh.ch.

Learning Outcome:

1. Develop a theoretical understanding of rational negotiation including common cognitive biases, and negotiation strategies under pressure.
2. Participate in negotiation role playing based on real-world negotiation scenarios by applying the four phases of the Schranner Concept: preparation, opening, leadership, and deadlock.
3. Analyze and reflect the complex negotiation processes and outcomes.
4. Practice managing emotions, irrational behavior, and high-pressure dynamics in negotiations.
5. Strengthen leadership skills for guiding negotiation processes and resolving deadlocks.

Module Cultural Differences in Finance (S)

03SM22MO0278 / Seminar

Description:

General description:

The world is a diverse place, even considering today's globalized economy. Cultural differences are still considerable. This also affects financial decision making which is influenced by economic as well as cultural differences. Differences in financial decision making, however, lead to differences between financial markets. In this class, we are discussing recent research on these cultural differences, and also how they can sometimes be used to test theories in behavioral finance. The basis for the class are research papers. The class will also include some small research project that participants will conduct in groups.

ECTS: 3

Notes:

Max. 20 Students

Students need to apply to participate in the seminar. Application (CV) is possible until Friday, 14th August, 2026, at the latest to banking@uni-trier.de. Should there be places left after the deadline, later applications will be considered.

This module takes place on site.

Learning Outcome:

The students acquire knowledge on recent results in cultural finance and learn how to conduct own research in this field.

Module Seminar in Climate and Nature Finance

03SM22MO0282 / Seminar

Description:

General description:

This seminar studies the causes and effects of climate and nature risks and opportunities for companies and investors. It covers the financial materiality of these risks, risk pricing, risk management, and risk reporting, with a focus on practical and application-oriented discussions. It also identifies areas of opportunities for companies and investors.

Participants will first read and examine an academic paper on a climate- or nature finance topic. The papers are assigned to participants at the beginning of the seminar. The participants will have to develop a detailed summary of the key findings of the paper and a critical assessment (one paper is assigned to each participant). The papers and the assessment will need to be presented in the seminar. The other participants will then discuss each paper jointly.

Afterwards, students will examine in groups selected case studies on climate- and nature finance topics. The case studies cover nature and climate finance topics of companies. The case studies are assigned to groups at the beginning of the seminar. The groups will present their analysis of the case studies during the seminar. The case studies examine how different companies manage climate and natural risks within their strategic and financial corporate management.

The seminar starts with an introductory session in the first week of the semester, followed by three one-day block sessions: one in the middle and two towards the end of the semester.

Attendance is mandatory.

ECTS: 3

Notes:

The number of participants is limited. Maximum of 30 participants.

Applications for participation in the seminar are accepted upon submission of a CV, a current transcript of records, and a brief letter of motivation (cover letter). Please email your application by August 18, 2026, at the latest, to zacharias.sautner@df.uzh.ch.

Accepted participants will be notified by email a few days later.

After receiving the admission confirmation, registration in the course booking tool by accepted participants is required (please observe the relevant deadlines and your study program).

On September 18, 2026, there will be a first orientation meeting in which participants will be briefed about the detailed seminar schedule and the seminar schedule. They can also ask questions and will be assigned academic articles for the individual work as well as the case studies for the group work.

Module Revenue Management: Models and Managerial Insights (V)

03SM22MO0283 / Course

Description:

General description:

This master-level course provides a comprehensive introduction to modern revenue management, combining fundamental theory with hands-on analytical practice.

We begin with classical two-class and newsvendor models before progressing to multiclass static formulations and industry-standard heuristics such as EMSR-a and EMSR-b. Building on this foundation, the course explores dynamic control models, customer choice behavior, forecasting, and overbooking, as well as network revenue management concepts, including bid price controls. Students will also study flexible and opaque products and learn the essentials of dynamic pricing for a single product.

Throughout the course, practice sessions, case studies, and guest talks from industry may be incorporated to apply concepts to realistic problems and illustrate their practical relevance, culminating in a strong understanding of both the analytical and managerial aspects of revenue management.

ECTS: 3

Learning Outcome:

By the end of the course, students will be able to:

- Demonstrate an understanding of the fundamental models of revenue management, including static, dynamic, and network approaches.

- Develop and evaluate revenue optimization strategies, in particular with respect to choices in the area of demand modeling, forecasting, and mathematical optimization.

Module Contemporary Readings on Behavior in Organizations (S) HS26

03SMDOEC1267 / Doktorandenseminar

Description:

General description:

Participants will read, review, and discuss working papers to improve their ability to critically and constructively engage in the scientific writing process. The working papers can range from a first rough draft to papers at an advanced stage in the revise+resubmit process. The working papers will come from the participants, auditors and guests of the seminar themselves, and so students are encouraged to contribute a working paper of their own to our reading list. The seminar relies exclusively on the written word for input - there are no presentations. Thus, participants will read and review papers, and are expected to base their discussions solely on what they have read. The author of the paper is in the role of the listener and has the chance to benefit from the feedback. The purpose of this seminar is not to find all the problems in a working paper, but instead to develop ideas on how the problems could be fixed and the paper be improved as a whole to heighten its chances in the publication process.

ECTS: 3

Notes:

Participation in this seminar is limited to 20 students. Please apply for this seminar via the new module booking tool: <https://studentservices.uzh.ch/uzh/launchpad/> including one PDF with the following parts: (a) a one paragraph statement of your research interests (b) your CV, and (c) an indication of whether you wish to contribute a working paper of your own to our reading list (if so, please submit a draft of the paper if it is available). Please contact Dr. Ryan Miller at ryan.miller@business.uzh.ch if you have any questions regarding your application for this course.

Learning Outcome:

Participants learn how to

1. Critically evaluate on-going research
2. Provide constructive feedback to peers and scholars, and suggest solutions for identified problems
3. Review academic work and help improve it
4. Expand knowledge on behavioral research in organizations

Module PhD Course: Market Design HS26

03SMDOEC1269 / Course

Description:

General description:

Market Design is an elective PhD course and is also open to motivated Master students. We will discuss topics in market design including auctions, matching, and boundedly-rational mechanism design. The course will give you a sense of this rich area, but it will not be a complete survey. We will focus on some background papers and selected parts of the current research frontier. My aim is to make the class research oriented: we will talk in class about research ideas. In particular, I intend to go through papers in a selective fashion trying to understand what is in a paper, where it comes from, and where it might lead. While there will be lecture elements, we will also spend time jointly looking at questions.

Module Participation in the 2026 SIKJM Annual Conference: “Pippi, Percy, and Prompts – Literature and Reading in the C
06SM506p508 / Module

Description:

General description:

Einmal im Jahr lädt das Schweizerische Institut für Kinder- und Jugendmedien (SIKJM) Bibliothekar:innen, Lehrpersonen, Studierende und weitere Interessierte zu einer praxisorientierten Jahrestagung ein. Die SIKJM Jahrestagung 2026 beschäftigt sich mit Literatur und Lesen im Kontext von KI. Die schnelle Entwicklung künstlicher Intelligenzen, insbesondere ihrer Möglichkeiten der Text- und Bildgenerierung, stellt bisherige Voraussetzungen und Strukturen des Literaturschaffens in Frage und verändert den Umgang mit Büchern und dem Lesen. Die Tagung bietet Einblicke in gesellschaftliche Zusammenhänge und ganz konkrete Anwendungen. Workshops bieten die Gelegenheit sich mit einer Perspektive - Illustration, Autorschaft, Verlagswelt, Bildung - konkret auseinanderzusetzen.

ECTS: 3

Notes:

Der Tagungsbesuch erfolgt selbständig und auf eigene Kosten.

Wissenschaftliche Veranstaltungen wie Forschungskongresse, Tagungen oder Exkursionen sind bedeutende Pfeiler wissenschaftlicher Arbeit und dienen neben der Präsentation und Diskussion neuester Forschungsergebnisse der Ausbildung eines wissenschaftlichen Netzwerkes. Das Selbstlernmodul bietet Studierenden die Möglichkeit, bereits früh in ihrer Laufbahn aktiv am wissenschaftlichen Austausch teilzunehmen.

Description:

General description:

Dieses Modul wird in der Regel mit einem Seminar-Modul kombiniert, kann aber nach Rücksprache mit der Lehrperson auch zu einer anderen Veranstaltung oder unabhängig von einer anderen Veranstaltung absolviert werden. In Absprache mit der Lehrperson wird ein Thema ausgewählt, zu dem selbständig und fristgerecht eine Arbeit zu verfassen ist. Seminararbeiten festigen die Fähigkeiten, sich an formale Kriterien zu halten, Fragestellungen korrekt und nachvollziehbar zu behandeln, Erkenntnisse angemessen zu ordnen und Methoden nachprüfbar anzuwenden.

ECTS: 6

Learning Outcome:

In der schriftlichen Arbeit zeigen Studierende, dass sie in der Lage sind, auf der Grundlage eines Primärtextes, in Auseinandersetzung mit der Sekundärliteratur, systematisch und wissenschaftlich seriös sowie unter Wahrung der äusserlichen Form und der zeitlichen Vorgaben einen eigenen Standpunkt zu entwickeln. Der Fokus liegt darauf, wissenschaftliche Sachverhalte selbständig zu analysieren und Forschungsmeinungen kritisch zu hinterfragen.

Module Advanced Greek Prose Composition

06SM321p005 / Module

Description:

General description:

Dieses Modul schliesst an die griechischen Sprachübungen an und setzt diese auf höherem Niveau fort. Ausgewählte Themen der Grammatik werden repetiert und vertieft; neu hinzu kommen die Idiomatik und die Phraseologie. Einerseits werden Originaltexte klassisch-attischer Prosautoren hinsichtlich ihrer sprachlichen und stilistischen Ausgestaltung untersucht. Andererseits werden zusammenhängende deutsche Texte in ein möglichst authentisches klassisches Attisch übersetzt. Die Übersetzungen werden gemeinsam in der Stunde oder als Hausaufgabe angefertigt und korrigiert. Ein bis zwei Übersetzungen pro Semester können unter denselben Bedingungen wie die Sprachkompetenzprüfung für das Lehrdiplom gelöst werden und dienen insofern als Vorbereitung für dieses Examen. Ein mehrmaliges Absolvieren des Moduls wird empfohlen.

ECTS: 3

Learning Outcome:

Vertiefte Kenntnis ausgewählter Themen der Grammatik; Vertrautheit mit altgriechischen Idioms, Phrasen und rhetorischer Stilistik; Verständnis für die unterschiedlichen Stile griechischer Prosautoren.

Module What is Happiness? Searching for Clues in Masterpieces of Greek Literature and Philosophy(Lecture on Greek L

06SM321p004 / Module

Description:

General description:

Thema der Vorlesung ist die Frage nach dem Glück, der eudaimonia, auf die verschiedene Werke der antiken griechischen Literatur spezifische Antworten bieten. Seit der Archaik thematisieren Texte, wie und ob Menschen irdisches Glück erreichen können, etwa die homerische Epik und die frühgriechische Lyrik. Auch die Geschichtsschreibung Herodots fragt nach dem höchsten menschlichen Glück. Höhepunkt des Nachdenkens über das Glück bietet jedoch die Philosophie: Gerade die antike Ethik Platons, Aristoteles' sowie hellenistischer Strömungen kreist um Fragen der Lebenskunst und sucht Eudaimonie und Moral zu verbinden. Insgesamt spüren wir Glückstheorien in literarischen und philosophischen Werken von der Archaik bis die Spätantike auf, mit einem Seitenblick auf Christentum und Mittelalter (Gastvortrag). Die behandelten Texte geben uns allesamt bedenkenswerte Antworten, wie menschliches Glück zu erreichen sei, an die Hand.

Empfohlene Begleitlektüre: Chr. Horn, Antike Lebenskunst. Glück und Moral von Sokrates bis zu den Neuplatonikern, München 1998; M. Hossenfelder, Antike Glückslehren. Quellen zur hellenistischen Ethik in deutscher Übersetzung, 2. Aufl. Stuttgart 2013; R. Holte, Artikel Glück/Glückseligkeit, RAC II, 1981, Sp. 246-270; O. Höffe, Lebenskunst und Moral. Oder macht Tugend glücklich? München 2007.

ECTS: 3

Learning Outcome:

Erfahrung im Lesen und Analysieren von Primärtexten; bessere Kenntnis der wichtigsten Sekundärliteratur, Gattungen und Epochen; Einblicke ins Anwenden traditioneller und moderner literatur- und kulturwissenschaftlicher Interpretationsansätze; Bewusstsein für kulturelle und gesellschaftliche Differenzen; Erkennen anthropologischer Konstanten durch Vergleich Antike-Moderne.

Module Epicurus' Recipe for the Good Life: The Letter to Menoeceus and Other Sources (Greek Reading Class) 06SM321p022 / Module

Description:

General description:

Unter Anleitung der Lehrperson übersetzen die Studierenden einen längeren griechischen Text zügig ins Deutsche und erwerben dabei Routine im Lesen von Primärtexten. Im Zentrum jeder Sitzung steht die Lektüre einer selbständig vorbereiteten Passage, bei der grammatikalische, lexikalische, stilistische und übersetzungstechnische Fragen besprochen werden. Der Kurs eignet sich besonders für Studierende, die sich auf die Akzess-Prüfung im Bachelor vorbereiten.

Jeder Mensch strebt nach Glück - doch was bedeutet es wirklich, glücklich zu leben? Der antike Philosoph Epikur (ca. 342 v. Chr. auf Samos geboren) bietet in seinem berühmten Brief an Menoikeus eine klare und für uns heute ebenso anregende Antwort auf diese Frage. Darin legt der Gründer der "Schule des Gartens" seine Philosophie der glücklichen Lebensführung dar und reflektiert zentrale menschliche Themen wie den Tod, das Göttliche, das Verhältnis zum eigenen Körper sowie Schmerz und Lust. Im dieser kursorischen Lektüre setzen wir uns intensiv mit Epikurs "Eudaimonie-Rezept" auseinander: Neben dem Brief an Menoikeus werden wir weitere zentrale Zeugnisse des Epikureismus, darunter die Kyriai doxai sowie ausgewählte Passagen aus den Briefen an Herodot und Pitokles entdecken.

Der Kurs eignet sich als inhaltliche Vertiefung und Ergänzung zu der Vorlesung von Prof. Markus Hafner "Was ist das Glück? Eudaimonologische Spurensuche".

ECTS: 3

Learning Outcome:

Verbesserung der Lese- und Übersetzungskompetenzen sowie der passiven Sprachkenntnisse, besonders in den Bereichen Grammatik und Wortschatz; Grundkenntnisse zu verschiedenen Arten und Problemen des Übersetzens.

Module Ecocriticism: Nature and the Environment in Roman Literature (Lecture Latin Literature)

06SM323p001 / Module

Description:

General description:

Ecocriticism ist ein Ansatz der Literaturwissenschaft, der nach wie vor Anhänger gewinnt und sich zum Ziel setzt, literarische Texte unter ökologischen Gesichtspunkten zu untersuchen. In dieser Vorlesung werden wir uns die verschiedenen Zugänge zu Ecocriticism ansehen und diskutieren, ob und wie sie unser Verständnis der antiken Texte verändern können. Ecocriticism stellt uns auch vor die Frage, wie aktuell die antiken Texte sind und was sie uns in der Klimakrise unserer Gegenwart zu sagen haben: So kann etwa Ovids Phaethon-Episode als eine beinahe allzu gut passende Illustration der gegenwärtigen Erderwärmung gelesen werden. Anhand verschiedener antiker Texte wollen wir untersuchen, welches neue Licht ökokritische Zugänge auf antike Texte, aber auch auf unsere eigene Welt werfen und wie wir die Natur in der römischen Literatur neu lesen können.

ECTS: 3

Learning Outcome:

Erwerb von Überblickswissen über Gattungsgeschichte, einzelne Epochen oder übergeordnete Fragestellungen; Fähigkeit zur Lektüre von kleineren, exemplarischen Primärtext-Passagen im grösseren kultur- und literaturgeschichtlichen Kontext.

06SM226p514 / Module

Description:

General description:

Die mündliche Prüfung dauert 30 Minuten und wird bei einem/r am Schwerpunkt Bildung, Kultur und Politik mit einem Modul beteiligten Professor/in oder Privatdozierenden nach Wahl abgelegt. Die Studierenden nehmen frühzeitig - am besten im Vorsemester und vor allem vor der Buchung des Moduls - mit dem/r Prüfenden Kontakt auf, um Thema, Literaturliste und Datum der Prüfung abzusprechen. Idealerweise findet die Prüfung zu Beginn der Vorlesungszeit statt. Die Literaturliste umfasst in der Regel drei wissenschaftliche Monografien und vier Zeitschriftenartikel zum gewählten Prüfungsthema im Bereich Bildung, Kultur und Politik. Es gelten die üblichen Buchungsfristen und regulären Notenabgabetermine der Fakultät.

The oral examination lasts 30 minutes and is taken with a professor or private lecturer of your choice who is involved with a module in the focus on Education, Culture, and Politics. Students contact the examiner early on - preferably in the pre-semester and especially before booking the module - to arrange the topics, the literature list, and the date of the examination. The literature list usually includes three scientific monographs/editorial works and four journal articles/contributions from edited volumes distributed over one or two examination topics. The examination will be taken within the specified assessment deadlines and on a date agreed individually with the supervisor. Ideally, the exam will take place at the beginning of the lecture period.

Module Gender and the Internet

06SM254p057 / Module

Description:

General description:

The goal of this class is to gain an understanding of gender-related issues in the digital era. We will be focusing on online media and platforms in terms of the producers and users as well as the content itself. Our most important questions are: Who produces online media content and do different genders produce different kinds of content and in different contexts? What do users do or not do with media content, and how can it potentially influence their self-perceptions and their own agencies? What type of content is spread through online channels and what kind of reality does this portray or create? What, if anything, about the internet makes these phenomena different from offline phenomena? All of these questions, while having multiple dimensions, will be observed from a gender-perspective.

ECTS: 3

Learning Outcome:

Die Studierenden erwerben spezifische Analyse- und Reflexionskompetenzen, die es ihnen ermöglichen, Theorien, Studien und Aussagen im jeweiligen Fachgebiet kritisch zu vergleichen und zu bewerten. Den Studierenden wissen, auf welchen Grundlagen spezifischere Inhalte aufbauen. Durch das Herstellen von Bezügen zum Methodenwissen (wo immer möglich) können Studierende die vermittelten Inhalte in einem grösseren Zusammenhang betrachten.

The oral examination lasts 30 minutes and is taken with a professor or private lecturer of your choice who is involved with a module in the focus on Social Pedagogy and Socialization. The content and details of the oral examination are to be agreed upon with the examiner prior to booking. Students contact the examiner early - preferably in the pre-semester and especially before booking the module - to agree on the list of topics and literature and to set an examination date. The guideline for the scope of the literature list comprises three scientific monographs/editorial works plus four journal articles/contributions from edited volumes distributed over one or two examination topics. The examination will be taken within the given assessment deadlines and on a date individually agreed with the supervisor. Ideally, the exam will take place at the beginning of the lecture period.

Module Computer-based formative assessments

06SM226p551 / Module

Description:

General description:

Um die Ziele des Moduls zu erreichen, wird die mögliche Diskrepanz zwischen theoretischen Konzepten des Lehrens und Lernens mit digitalen Medien und deren praktischer Anwendung untersucht. Dabei stehen sowohl die Möglichkeiten als auch die Grenzen digitaler Lernumgebungen im Fokus. Dieser Ansatz stellt sicher, dass die Studierenden ein umfassendes wissenschaftliches Verständnis dafür entwickeln, wie digitale Werkzeuge Bildungsprozesse fördern, aber auch welche zusätzlichen Herausforderungen sie bergen können. Durch die Analyse praxisnaher Beispiele können Reflexionskompetenzen erweitert werden. Zudem wird die Fähigkeit geschult, kritisch über die Eignung digitaler Tools in unterschiedlichen pädagogischen Kontexten auf der Basis wissenschaftlicher Konzepte nachzudenken und fundierte Entscheidungen über deren Einsatz zu treffen. Ergänzt wird dies durch die Entwicklung eigener Ansätze, um digitale Medien gezielt und lernförderlich zu gestalten und in die Praxis umzusetzen.

The possible discrepancy between theoretical teaching and learning concepts with digital media and their practical application is examined to achieve the module's objectives. The focus is on both the possibilities and limitations of digital learning environments. This approach ensures that students develop a comprehensive scientific understanding of how digital tools promote educational processes and what additional challenges they can pose. Reflection skills can be expanded by analyzing practical examples. In addition, the ability to think critically about the suitability of digital tools in different educational contexts based on scientific concepts and to make well-founded decisions about their use is trained. This is complemented by developing individual approaches to designing digital media in a targeted and learning-promoting way and putting them into practice.

ECTS: 3

Learning Outcome:

Ziel dieses Moduls ist es, theoretisches und evidenzbasiertes Wissen aufzubauen, um Lehr-Lern-Szenarien mit digitalen Medien oder in digitalen Lernumgebungen in der Praxis prüfen zu können. Die Studierenden lernen im Seminar Theorien und den Forschungsstand zu kognitiven, emotional-motivationalen und metakognitiven Prozessen des Lehrens und Lernens mit digitalen Medien kennen und versuchen diese empirisch zu belegen.

This module aims to build up theoretical and evidence-based knowledge so that students can test teaching and learning scenarios with digital media or in digital learning environments in practice. In the seminar, students learn about theories and current research on cognitive, emotional-motivational, and metacognitive processes of teaching and learning with digital media and attempt to substantiate these empirically.

Module Global governance of education - metrics, technologies and power positions

06SM226p557 / Module

Description:

General description:

Der Kurs untersucht vergangene und gegenwärtige Entwicklungen von Bildungsinstitutionen und legt dabei besonderen Wert auf das Verhältnis zwischen nationalen Bildungssystemen und internationalen bzw. regionalen Institutionen. Er beleuchtet die parallele Entwicklung ausgewählter nationaler, regionaler und internationaler Institutionen und konzentriert sich darauf, wie Bildungspolitik(en) (education policies) im Verlauf der Zeit geformt werden. Indem das Modul den wachsenden Einfluss internationaler und regionaler Akteure sowie ihrer Auswirkungen auf nationale Systeme in den Blick nimmt, vermittelt es den Studierenden ein fruchtbares Rahmenkonzept für die Durchführung fundierter Bildungspolitikanalysen (policy analyses). Durch die Verbindung theoretischer und methodologischer Perspektiven fördert es zudem das Verständnis der komplexen Dynamiken an der Schnittstelle zwischen nationalen Prioritäten und internationaler Bildungssteuerung (education governance) und bereitet die Studierenden darauf vor, Bildungspolitik (education policy) im globalisierten Kontext kritisch zu bewerten.

This course examines the historical and contemporary evolution of education institutions, emphasizing the nexus between national education systems and international or regional institutions. It explores the concomitant evolution of selected national, regional, and international institutions, focusing on how education policies are shaped over time. By analyzing the growing influence of international and regional actors and their implications for national systems, the course provides students with a framework for conducting rigorous policy analyses. Combining theoretical and methodological perspectives, it fosters an understanding of the complex dynamics at the intersection of national priorities and international governance, preparing students to critically evaluate education policy in a globalized context.

ECTS: 3

Learning Outcome:

Nach Abschluss des Moduls werden die Studierenden in der Lage sein, miteinander verflochtene Entwicklungen nationaler, regionaler und internationaler Bildungsinstitutionen zu beschreiben und, darüber hinaus, zu analysieren, wie diese über die Zeit hinweg die nationalen Rahmenbedingungen für Bildungspolitik (education policy frameworks) prägen. Sie werden theoretische und methodologische Ansätze zur Analyse von bildungspolitischen Agenden, Ideen und Dokumenten (education policy) kennen und anwenden lernen, die es erlauben, das komplexe Zusammenspiel zwischen nationalen Prioritäten sowie regionalen und internationalen Dynamiken zu berücksichtigen.

Das Modul führt zudem in Forschungsmethoden ein, einschliesslich vergleichender Ansätze, die es den Studierenden ermöglichen sollen, nationale Entwicklungen in breitere transnationale Zusammenhänge einzuordnen. Darüber hinaus werden die Studierenden die historischen Ursprünge ausgewählter internationaler Bildungsinstitutionen kennenlernen und sich kritisch mit deren wachsendem Einfluss auseinandersetzen, wodurch sie eine fundierte Grundlage für Analysen der sich wandelnden Steuerungskomplexe von Bildung in einem globalisierten Kontext gewinnen.

By the end of the course, students will be able to describe the interrelated evolution of national, regional, and international education institutions and analyze how these shape national education policy frameworks over time. They will be able to apply theoretical and methodological approaches to develop education policy analyses that account for the interplay between national priorities, regional, and international dynamics. The course also introduces research methodologies, including comparative approaches, that enable students to situate national experiences within broader transnational trends. In addition, students will understand the origins of selected international education institutions and critically engage with their growing influence, gaining a solid foundation for analyzing the evolving governance of education in a globalized context.

Module Valerius Flaccus, Argonautica (Latin Reading Class)

06SM323p003 / Module

Description:

General description:

Unter Anleitung der Lehrperson übersetzen die Studierenden einen längeren lateinischen Text zügig ins Deutsche und erwerben dabei Routine im Lesen von Primärtexten. Im Zentrum jeder Sitzung steht die Lektüre einer selbständig vorbereiteten Passage, bei der grammatikalische, lexikalische, stilistische und übersetzungstechnische Fragen besprochen werden. Der Kurs eignet sich besonders für Studierende, die sich auf die Akzess-Prüfung im Bachelor vorbereiten.

Die «Argonautica» des Valerius Flaccus behandelt die Fahrt der Argonauten nach Kolchis und die Schwierigkeiten, die sie und vor allem ihr Anführer Jason überwinden müssen, um schlussendlich dank der Hilfe von Medea das Goldene Vlies nach Griechenland überführen zu können. In diesem Werk flavischer Zeit werden nicht wenige Stränge der langen epischen Tradition (v.a. Vergil und Apollonios Rhodios) zu einem eigenständigen Neuentwurfs des Argonautenstoffs verwoben. Der Fokus des Kurses liegt dabei auf der Geschichte von Jason und Medea in der zweiten Werkhälfte, die in der Erzählung des Valerius bereits früh unter düsteren Vorzeichen steht.

ECTS: 3

Learning Outcome:

Verbesserung der Lese- und Übersetzungskompetenzen sowie der passiven Sprachkenntnisse, besonders in den Bereichen Grammatik und Wortschatz; Grundkenntnisse zu verschiedenen Arten und Problemen des Übersetzens.

Module The Underworld in Roman Literature (Seminar Latin Literature)

06SM323p002 / Module

Description:

General description:

Die Seminare setzen die Proseminare auf höherem Niveau fort und erfordern inhaltlich die Kenntnisse des BA-Moduls Akzess. Jede Woche wird eine vorbereitete Passage übersetzt, analysiert und in der Gruppe diskutiert. Eine aktive Mitgestaltung des Unterrichtsgeschehens ist dabei unabdingbar. Gelegentliche Zusatzaufgaben (Kurzreferat / Sitzungsleitung etc.) unterstützen dies. Allgemein festigen die Studierenden in den Seminaren ihre fachwissenschaftlichen Fähigkeiten.

In diesem Seminar werden wir eine Reise in die römische Unterwelt unternehmen und verschiedene Unterweltsbeschreibungen im römischen Epos, im pseudovergilischen Culex, aber auch bei Seneca und Juvenal lesen und u.a. untersuchen, wie die Topographie der Unterwelt bei verschiedenen Autoren gestaltet ist, welche besonderen Zeitkonstellationen in der Unterwelt möglich sind, inwiefern die Unterwelt ein Gegenbild zur Oberwelt darstellt oder diese widerspiegelt und welche Räume zur literarischen Reflexion sie eröffnet.

ECTS: 3

Learning Outcome:

Konsolidierung der latinistischen Kompetenzen und Kenntnisse; Sicherheit in der Übersetzung auch schwierigerer Texte; souveräner Umgang mit latinistischen Hilfsmitteln; Kenntnis der einschlägigen Sekundärliteratur; kompetente Analysen wissenschaftlicher Sachverhalte; selbständige Präsentation und Hinterfragung fremder Forschungsergebnisse; Fähigkeit zur Teilnahme an wissenschaftlichen Diskussionen; sicheres Anwenden traditioneller und moderner, für den jeweiligen Text geeigneter Interpretationsansätze.

Module Catullus (Proseminar Latin Literature)

06SM323p021 / Module

Description:

General description:

Das Proseminar vermittelt die ersten Einblicke in das wissenschaftliche Arbeiten. Im Zentrum des Moduls steht jeweils ein bestimmter Text oder eine Textsammlung. Jede Woche wird eine vorbereitete Passage übersetzt, analysiert und in der Gruppe diskutiert. Eine aktive Mitgestaltung des Unterrichtsgeschehens ist dabei unabdingbar. Gelegentliche Zusatzaufgaben (Kurzreferat/Sitzungsleitung etc.) unterstützen dies. Die Studierenden üben sich darin, die grundlegenden fachwissenschaftlichen Fähigkeiten der Latinistik anzuwenden, die sie im Rahmen des dazugehörigen Proseminararbeit-Moduls vertiefen können.

In diesem Semester lesen wir eine repräsentative Auswahl aus Catulls vielseitigem Büchlein. Catull gilt zu Recht als einer der grössten Dichter der Antike. Zu den geplanten Themenschwerpunkten gehören Gattungsfragen, Poetologie, Gender Studies, Humor, Obszönität, Sexualität, Parodie und natürlich die Überlieferungsgeschichte. Denn Catulls Gedichte sind nur dank einer einzigen Handschrift überhaupt erhalten geblieben!

ECTS: 3

Learning Outcome:

Erwerb der grundlegenden latinistischen Fertigkeiten und Kenntnisse im Bereich der Literatur; dazu gehören u. a.: Erfahrung im wissenschaftlichen Übersetzen von Primärliteratur, erste Anwendung der massgeblichen Hilfsmittel (z. B. Wörterbücher, Kommentare und Bibliographien), erste Einblicke in das fachspezifische Publikationswesen, erste Übung darin, wissenschaftliche Sachverhalte zu analysieren, fremde Forschungsergebnisse publikumsgerecht zu präsentieren und kritisch zu hinterfragen sowie traditionelle und moderne, für den jeweiligen Text geeignete Interpretationsansätze anzuwenden; Fähigkeit, eine eigene Meinung fundiert zu vertreten.

Module Advanced Latin Prose Composition

06SM323p005 / Module

Description:

General description:

Dieses Modul schliesst an die lateinischen Sprachübungen an und setzt diese auf höherem Niveau fort. Durch die Einübung von Übersetzungstechniken in Hausarbeiten, Übungen und Klausuren wird die Möglichkeit geboten, die aktiven Lateinkenntnisse zu verbessern und sich gezielt auf die deutsch-lateinische Übersetzungsprüfung für das Lehrdiplom vorzubereiten. Ein mehrmaliges Absolvieren des auf vier Semester angelegten Moduls wird empfohlen. In Stilübungen I liegt das Schwergewicht einerseits auf der Wiederholung zentraler Themen der Syntax (u.a. Dativfunktionen, nd-Formen, Zahlwörter und Kalender, Zweckangaben, Relativsätze), andererseits auf dem Einstieg in die Erarbeitung grundlegender sprachlich-stilistischer Unterschiede zwischen den beiden Sprachen (Wortstellung und Satzbau; Synonymik und Phraseologie). Ausserdem werden den Studierenden die wichtigsten Arbeits- und Hilfsmittel vorgestellt.

ECTS: 3

Notes:

Ein Einstiegstest in der ersten Stunde dient der Standortbestimmung in der Kenntnis von Formenlehre und Syntax.

Learning Outcome:

Vertiefte Kenntnis ausgewählter Themen der Grammatik; Vertrautheit mit der lateinischen Phraseologie und Stilistik; aktive Beherrschung der lateinischen Sprache und Stilistik.

Module Itinerarium Egeriae (Seminar Latin Linguistics)

06SM323p015 / Module

Description:

General description:

Das sog. Itinerarium Egeriae (auch Peregrinatio Aetheriae) vom Ende des 4. Jahrhunderts nach Christus ist der Bericht über die Reise einer Pilgerin aus dem lateinischen Westen des Reiches ins Heilige Land. Dieser Text ist nicht nur von großem kulturgeographischen und religionshistorischen Interesse, sondern auch unter linguistischen Gesichtspunkten ein wichtiges Dokument der lateinischen Sprache in der Spätantike.

Im Seminar wird der Text im Hinblick auf seine besonderen sprachlichen Merkmale fortlaufend gelesen. Einzelne Phänomene werden darüber hinaus in Referaten ausführlicher behandelt.

Die Veranstaltung eignet sich ideal, um sich in Auseinandersetzung mit einer einzelnen Primärquelle mit dem Vulgär- bzw. Spätlatein vertraut zu machen oder vorhandene Kenntnisse zu vertiefen.

Zur vorbereitenden Beschäftigung mit dem Text wird die Anschaffung einer Textausgabe ausdrücklich empfohlen, z.B.: Pierre Maraval, *Égérie. Journal de voyage (Itinéraire) et Lettre sur la Bienheureuse Égérie*, Paris 1982 (2000), erschienen als Band 296 der *Sources Chrétiennes*.

ECTS: 3

Learning Outcome:

Konsolidierung der sprachwissenschaftlichen Kompetenzen; kompetente Analysen wissenschaftlicher Sachverhalte; selbständige Präsentation und Beurteilung fremder Forschungsergebnisse; Fähigkeit zur Teilnahme am wissenschaftlichen Diskurs.

Module Latin Literature in the High Middle Ages (Lecture Medieval Latin)

06SM324p002 / Module

Description:

General description:

Gegenstand der Vorlesung ist die lateinische Literatur in der Zeit von der Mitte des 11. bis zum beginnenden 13. Jahrhundert. Die lateinische Literatur ist in dieser Zeit immer weniger auf die Klöster beschränkt. An den Kathedralschulen und in ihrer Umgebung entstehen Fachschriften, Kommentare klassischer Autoren und vor allem eine anspruchsvolle Literatur, die zum Teil antiken Vorbildern folgt, zum Teil neue Formen erprobt. Aber auch an den Höfen werden lateinische Texte geschrieben und gelesen, besonders dort kommt die lateinische Literatur in Kontakt mit den aufstrebenden volkssprachlichen Literaturen. In der Vorlesung werden an konkreten Beispielen allgemeine Tendenzen aufgezeigt.

Learning Outcome:

Die Studierenden erwerben vertiefte Kenntnisse über Bereiche der lateinischen Schriftlichkeit im Mittelalter.

Module The Becket Case: A Literary Dossier (Seminar Medieval Latin)

06SM324p001 / Module

Description:

General description:

Das Seminar widmet sich der literarischen Verarbeitung des Konflikts zwischen Thomas Becket, Erzbischof von Canterbury, und König Heinrich II. von England, und der Legendenbildung nach Becket's Ermordung. Im Zentrum des Seminars stehen Texte, die sich mit Becket's Wirken, seinem Tod und seiner Heiligsprechung befassen. Dazu gehören kritische Stimmen, Wunderberichte und hagiographische Darstellungen. Ziel ist es, die literarischen Strategien und politischen Dimensionen der Becket-Rezeption zu analysieren.

ECTS: 3

Learning Outcome:

Im Seminar sollen die Studierenden die unterschiedlichen methodischen Zugänge zu einem konkreten Text kennen lernen und anwenden. Sie lernen, mit der Forschungsliteratur umzugehen sowie die eigenen Hypothesen und Forschungsfragen angemessen darzustellen.

Module Manuscript Study Trip: Preparing an Exhibition in St. Gall

06SM324p003 / Module

Description:

General description:

Die Studierenden erwerben in einigen Vorbereitungssitzungen Kenntnisse über das mittelalterliche Buchwesen. Während der Exkursion können sie vertieft mit einer Handschrift arbeiten und lernen dabei, wie Schriftträger wissenschaftlich korrekt beschrieben und wie die Ergebnisse ihrer Arbeit in einem mündlichen Vortrag angemessen vorgestellt werden können. Die Handschriften sollen ebenfalls historisch kontextualisiert werden, so dass Praktiken der Lektüre und der Wissensvermittlung sichtbar gemacht werden.

ECTS: 3

Learning Outcome:

Die Studierenden lernen, die wichtigsten Merkmale eines Schriftträgers zu beobachten, angemessen zu interpretieren und einzuordnen. Ausserdem sind sie an der Vorbereitung einer Ausstellung beteiligt und gewinnen so Einblick in die Vermittlung wissenschaftlicher Inhalte an ein breiteres Publikum.

Module The Creation of the World according to the Bible (Hexaemeron Commentaries) (Medieval Latin Reading Class)
06SM324p004 / Module

Description:

General description:

Einführend wird die Bibel historisch und philologisch kurz vorgestellt. Die Entstehung der lateinischen Übersetzungen, besonders der Vulgata des Hieronymus, werden dann besprochen und der für das Thema grundlegende Text Genesis 1-2 gelesen. Der Hauptteil der Veranstaltung folgt den Auslegungen dieses Schöpfungsberichtes durch lateinisch-schreibende Autoren. Als erster hat Ambrosius (c. 339-397) sich geäußert, der wichtige naturphilosophische Gedanken von seinem griechischen Vorgänger Basilius übernahm. Viele der bedeutendsten Denker der folgenden Zeit haben den Schöpfungsbericht auch interpretiert: Augustin, Beda, Abaelard, Hildebert von Lavardin, Bonaventura. Im 12. Jahrhundert kommen neue Ansätze auf: Thierry von Chartres und Robert Grosseteste verknüpfen die zeitgenössische Naturwissenschaft mit dem biblischen Text, der erste mit Bezug auf Platons Timaeus, der zweite auf Avicenna und die Optik. Diese Texte sind sehr gut geeignet, um ein Panorama der Beziehungen zwischen Naturwissenschaft und Theologie im Mittelalter zu präsentieren.

In der Übung werden Auszüge des Textes gelesen und vor dem Hintergrund des Gesamtwerks kommentiert. Der Fokus liegt auf der zielsprachenorientierten Übersetzung ins Deutsche. Als Hausaufgabe sollen jeweils Texte übersetzt werden, die wir im Plenum gemeinsam lesen und interpretieren.

ECTS: 3

Learning Outcome:

Angemessenes Übersetzen für verschiedene Zielgruppen, Verfestigen der Sprachkenntnisse und der Kenntnisse über Literatur.

Module SWRW BA-Seminar: Right-Wing Politics and Religion - Extreme and Populist Movements
01SM55SS027 / Seminar

Description:

General description:

Die Studierenden setzen sich interaktiv mit einem grundlegenden Thema der sozialwissenschaftlichen Religionswissenschaft auseinander, das anhand von aktuellen Beispielen bearbeitet und diskutiert wird. Sie lernen, konkrete Fallbeispiele mit sozialwissenschaftlichen Fragen zu bearbeiten und entsprechende theoretische Ansätze zu reflektieren.

Religion wird im Kontext sozialer Zusammenhänge diskutiert, gesellschaftlich relevante Fragen werden bearbeitet.

ECTS: 3

Learning Outcome:

Die Studierenden können im Hinblick auf eine bestimmte Thematik konstruktiv und mit sachlichen Argumenten diskutieren. Sie können einen theoretischen Ansatz auf ein empirisches Fallbeispiel anwenden und sich selbst von dem betreffenden Gegenstand distanzieren. Sie können Quellen- und Sekundärliteratur in ihrer Argumentation verstehen und kritisch diskutieren. Sie können eine gesellschaftlich relevante religionsbezogene Thematik sachlich und differenziert behandeln. Die Studierenden können religiöse Gemeinschaften, Praktiken, Vorstellungen etc. als sozial und kulturell bedingte Größen einordnen. Sie können religiöse Positionen von religionswissenschaftlichen unterscheiden.

Students who have passed all compulsory modules may complete an external internship. Students must independently find an internship placement. Before the internship begins, they must contact the module coordinator by email and provide information about the organization, their role, and the planned tasks in order to clarify whether the internship can in principle be accepted for credit.

After completing the internship, students must send an email to the module coordinator containing the following information:

- (1) full name
- (2) matriculation number
- (3) degree program
- (4) module number 06SM523-132

Two PDF documents must be attached:

- (A) an official confirmation from the organization stating the student's name, the internship period, and the total number of working hours completed (minimum 90 hours for 3 ECTS credits, 180 hours for 6 ECTS credits)
- (B) a report written by the student (500-1000 words; approx. 1-2 pages) describing the tasks carried out, the results, and the main learning outcomes

The module is then booked by the module coordinator for the semester in which the main part of the work was carried out and recorded as passed. Self-enrollment via the booking tool is not possible. The internship may begin before the official start of the semester.

Learning Outcome:

Students can:

1. gain experience in language technology companies.
2. connect theoretical knowledge with practical work.
3. understand organizational structures and processes.
4. apply what they have learned in real settings.
5. broaden their understanding of practical issues.

Self-enrollment via the booking tool is not possible. A maximum of two "Student Teaching Assistant" modules may be booked per study program level, and they must relate to different courses.

Learning Outcome:

Students can:

1. understand subject-specific content from a teaching perspective.
2. prepare lecture content for specific target groups.
3. design exercise materials.
4. correct student work and provide constructive feedback.

Module Understanding museums: Fundamentals of change in a cultural institution

06SM506p001 / Module

Description:

General description:

Kaum eine Kulturinstitution hat in den letzten Jahren und Jahrzehnten einen so tiefgreifenden Wandel durchlaufen wie das Museum. Er hat ihm neue Aktualität und Sichtbarkeit beschert, aber auch weitreichende Infragestellungen und andere Risiken. Kein Wunder also, dass die Situation «des Museums» (das es in solcher Homogenität nicht gibt) sehr unterschiedlich wahrgenommen wird: Die Vorhersage seiner grossen Zukunft und der Abgesang auf seine zweihundertjährige Tradition liegen aktuell oft eng beieinander.

Das Seminar nähert sich den Hintergründen dieser Entwicklungen und versucht, sie kultur- und museumstheoretisch zu verstehen. Es macht mit Grundlagenliteratur aus den Museum Studies -ihren wichtigsten Konzepten und Methoden - vertraut und fokussiert auf Kernfragen gegenwärtiger Museumsforschung und -praxis: Dazu zählen die generelle Frage nach dem Schritthalten mit den Entwicklungen in zunehmend von Diversität geprägten Gesellschaften, Fragen von Teilhabe und Inklusion, der Dekolonisierung und Demokratisierung, aber auch der Digitalisierung und ihres Einflusses auf die in der Objekthaftigkeit und Räumlichkeit liegende Spezifik musealer Wahrnehmung.

ECTS: 6

Notes:

In den thematischen Seminaren dieser Modulgruppe beschäftigen sich Studierende und Dozierende gemeinsam mit spezifischen Themen im Bereich der Alltagskulturen. Im ersten Semester finden wöchentliche Sitzungen mit Referaten, Inputs und Diskussionen statt. Im zweiten Semester verfassen die Studierenden selbständig eine schriftliche Arbeit. In Ausnahmefällen (z.B. Mobilität, Abschluss des Studiums) kann das Modul nach Rücksprache mit den Dozierenden bereits nach einem Semester abgeschlossen werden.

Achtung Kursbeginn: 1. Sitzung: Mi., 23.09.2026
(Die Sitzung am 16.09.2026 findet nicht statt.)

Learning Outcome:

Die Studierenden haben einen Überblick über ein spezifisches Themenfeld der Alltagskulturen, entwickeln eine eigene Fragestellung auf Basis von Fachliteratur und können diese diskutieren und präsentieren. Sie können eine wissenschaftliche Arbeit zu ihrem Thema verfassen.

Module Preparedness and Prepping: Discourses and practices in contemporary society and popular culture 06SM506p002 / Module

Description:

General description:

In Krisenzeiten verspricht Preparedness Sicherheit. Wenn die Umstände unberechenbar erscheinen, sollen Vorbereitungsmaßnahmen die eigene Handlungsmacht unter allen Umständen absichern und Kontinuität stiften. Im Seminar befassen wir uns mit der Entstehung und Entwicklung von Preparedness-Diskursen und -Praktiken in der neueren Geschichte. Zudem wirft das Seminar ein Schlaglicht auf aktuelle Prepping- und Preparedness-Praktiken in unterschiedlichsten Kontexten, seien es Katastrophenschutzübungen der Zivilschutzbehörden, Demonstrationstrainings der Polizei oder Kriegstaktiken des Militärs. Die Aneignung von Preparedness-Logiken von aktivistischen Kreisen, etwa im Kontext des solidarischen Preppens, oder breiten Bevölkerungsschichten in Form eines Notvorrats oder Preppens steht ebenfalls im Fokus. Stets geht es dabei auch um die Frage, wie Preparedness spezifische Zukunftsbezüge etabliert, spezifische Machtverhältnisse konserviert, Gefahren privatisiert und bestimmte Personengruppen responsabilisiert.

Module Oil. Fossil energy and cultural conflicts

06SM506p003 / Module

Description:

General description:

Öl als "schwarzes Gold" ist weit mehr als ein Rohstoff: In Literatur, Film und TV-Serien steht es für Gier, Kapitalismus, patriarchale Macht und Umweltzerstörung, aber auch für Aufstiegsträume und Modernitätsversprechen. Von Upton Sinclairs Roman Oil! (1927) über There Will Be Blood (2007) und Klassiker wie Giganten (1956) bis zu aktuellen Produktionen wie der ARD-Serie Schwarzes Gold oder der Streaming-Serie Landman (2024) erzählen populäre Medien, wie fossile Brennstoffe Gesellschaften formen und zerstören. Im Vertiefungsmodul untersuchen wir, wie kulturelle Konflikte rund um Öl und andere fossile Energien in populären Erzählungen und medialen Diskursen verhandelt werden. Öl erscheint dabei als kultureller Stoff: als Motor von Fortschrittserzählungen, als Auslöser von Gewalt und Ungleichheit sowie als Projektionsfläche für Angst, Begehren und Zukunftsimaginationen. Auf der Basis von ökokritischer und feministischer Theorie zu Petrokulturen und anhand unterschiedlicher Formate und Genres analysieren wir, wie Narrative des Fossilen Fragen von Macht, Gender und Ökologie verhandeln.

Description:

General description:

Das Seminar führt in die Visual Culture Studies und Analysetechniken der kulturwissenschaftlichen Bildanalyse ein. Der erste Teil erarbeitet theoretische Grundlagen und Schlüsselkonzepte (wie z.B. "visuelle Kultur", "Blickregime", "Sehgewohnheiten" und "Iconic Turn"). Der zweite Teil widmet sich der empirischen Analyse: von historischen Bildquellen über digital cultures bis zu gegenwärtigen Repräsentationspolitiken (AI, Deep Fakes, etc.). Ziel ist der kritische Umgang mit der Macht von Bildern.

ECTS: 6

Notes:

In den thematischen Seminaren dieser Modulgruppe beschäftigen sich Studierende und Dozierende gemeinsam mit spezifischen Themen im Bereich der Populären Literaturen und Medien. Im ersten Semester finden wöchentliche Sitzungen mit Referaten, Inputs und Diskussionen statt. Im zweiten Semester verfassen die Studierenden selbständig eine schriftliche Arbeit. In Ausnahmefällen (z.B. Mobilität, Abschluss des Studiums) kann das Modul nach Rücksprache mit den Dozierenden bereits nach einem Semester abgeschlossen werden.

Learning Outcome:

Die Studierenden haben einen Überblick über ein spezifisches Themenfeld der Populären Literaturen und Medien, entwickeln eine eigene Fragestellung auf Basis von Fachliteratur und können diese diskutieren und präsentieren. Sie können eine wissenschaftliche Arbeit zu ihrem Thema verfassen.

Module Black literature in Switzerland. Cultural studies perspectives on the literary field

06SM506p005 / Module

Description:

General description:

Literatur ist ein Aushandlungsort zeitspezifischer gesellschaftlicher Fragen und Verhältnisse und gestaltet Gesellschaft mit. Besonders sichtbar wird dies etwa in (dem Umgang mit) Literatur von Schwarzen Künstler*innen. Während Schwarzes Schreiben in der Schweiz Mitte des 20. Jahrhunderts vor allem von Stimmen aus dem US-amerikanischen Raum geprägt war (James Baldwin, Vincent O. Carter), hat es sich mittlerweile breit ausdifferenziert. Heute umfasst es neben Romanen (Max Lobe, Nora Osagiobare, Melara Mvogdobo) und autobiografischen Texten (Anja Nunyola Glover, Angélique Beldner) u. a. auch Spoken Word (Fatima Moumouni, Burni Aman, Anna Chiedza Spörri), Theater (Mbene Mwambene, Zainab J Lascandri), Gedichte (Meloe Gennai, Mohamed Wa Baile) und Kurzgeschichten (Amina Abdulkadir).

Im Seminar beschäftigen wir uns mit ausgewählten Akteur*innen, Performance- und Publikationspraktiken sowie Rezeptionsweisen. Diese betrachten wir nicht nur vor dem Hintergrund historischer sowie aktueller Formen Schwarzer Selbstorganisation und Archivierung in der Schweiz, der Schwarzen (Frauen*)Bewegung in Deutschland und transnationaler Perspektivierungen afrodiasporischer Literaturen, sondern diskutieren sie auch im Kontext (post-)kolonialer Verflechtungen der Schweiz sowie hegemonialer Machtverhältnisse im literarischen Feld.

Module Children's and youth media and politics

06SM506p401 / Module

Description:

General description:

Literatur und Medien für Kinder und Jugendliche waren historisch immer eng mit politischen und gesellschaftlichen Auseinandersetzungen um Demokratie, Bildung und Teilhabe verknüpft. Seit dem 18. Jahrhundert gilt die Kinder- und Jugendliteratur als Experimentierfeld, in dem sich Vorstellungen von Erziehung, Moral und sozialer Ordnung widerspiegeln - ebenso wie Hoffnungen auf Emanzipation und Selbstbestimmung. Die Vorlesung zeigt, wie Ideologien nicht nur Narrative und Kindheitsbilder prägen, sondern auch ästhetische Praktiken und Produktionsbedingungen von Kinder- und Jugendmedien beeinflussen: von normierenden Lesediskursen und schulischen Vermittlungsformen bis hin zu Zensur und Bücherverboten. Anhand zentraler historischer Stationen - von der Aufklärung über die Reformpädagogik und die "Geistige Landesverteidigung" bis zu den aktuellen "Book Bans" in den USA - wird nachgezeichnet, wie eng politische, pädagogische und ästhetische Fragen miteinander verflochten sind. Im Zentrum steht die historische Spannung zwischen Emanzipation und Kontrolle. Die Vorlesung gibt damit einen Einblick in die Verflechtung literarischer, pädagogischer und politischer Diskurse und in die Bedeutung von Kinder- und Jugendmedien als Aushandlungsräume für gesellschaftlicher Werte und Konflikte.

Module The Relation between Critique and Ethnography: Theory, Practice, and Writing

06SM506p402 / Module

Description:

General description:

Der Workshop zielt darauf ab, den kulturwissenschaftlichen Kritik in ihren theoretischen Grundlagen zu rekonstruieren und sie im Spannungsfeld ethnografischer Feldarbeit zu reflektieren. Ausgangspunkt ist die Frage, wie Kritik in der Empirischen Kulturwissenschaft einerseits aus der empirischen Beobachtung sozialer Phänomene hervorgeht und andererseits aus theoretisch wie meta-empirisch fundierten Formen der Gesellschaftskritik abgeleitet wird.

Der Workshop ist entsprechend in drei aufeinander bezogene Blöcke gegliedert:

1. einen begriffstheoretischen Block mit der Lektüre zentraler Texte aus der (Wissens-)Soziologie, der Sozialphilosophie und den Kulturwissenschaften;
 2. einen ethnografischen Arbeitsblock, der die Entwicklung der Fragestellung sowie die Durchführung teilnehmender Beobachtung umfasst; sowie
 3. einen Schreib- und Analyseblock,
- der der Entwicklung und Artikulation von Kritik in Form der Textproduktion dient.

ECTS: 3

Notes:

Workshops sind zeitlich kompakte, intensive Veranstaltungen, in denen anwendungsorientiert Fragen der Forschungspraxis diskutiert und erprobt werden.

Learning Outcome:

Studierende verfügen über vertiefte und projektorientiert angeeignete Kenntnisse der Forschungspraxis.

Module Cultural Studies Lecture Series: „Studying the Popular“—An Update on Basic Concepts in Popular Culture Research
06SM506p403 / Module

Description:

General description:

"Die Populärkultur ist einer der Orte, an denen der Kampf für und gegen eine Kultur der Mächtigen ausgetragen wird" (Stuart Hall)

In dieser Vortragsreihe setzen sich Vortragende aus dem ISEK und externe Gäste aus dem In- und Ausland mit Grundbegriffen und Denkfiguren der "Popular Culture Studies" auseinander - zum Beispiel mit dem aktiven Publikum und der Prodisage, mit der Unterscheidung von Popular-, Populär- und Popkultur, mit Visualität und Multimodalität, mit dem Genre-Begriff und der Idee des Generischen, mit Medienpraktiken und cultural industries. Sie fragen, wie diese in der EKW und darüber hinaus verändert und ergänzt werden sollten, um zu aktuellen Debatten über die medientechnischen, ökonomischen, ästhetischen und politischen Umbrüche der Gegenwart beitragen zu können.

ECTS: 3

Notes:

Die Kulturwissenschaftliche Vortragsreihe wird gemeinsam von der Fachgesellschaft «Empirische Kulturwissenschaft Schweiz» (EKWS), Sektion Zürich, und dem ISEK - Populäre Kulturen veranstaltet. Ungefähr sieben Veranstaltungen finden über das Semester verteilt üblicherweise am Mittwochabend statt und sind öffentlich.

Learning Outcome:

Die Studierenden haben Einblick in anwendungsorientierte Forschungsfelder der Empirischen Kulturwissenschaft. Sie kennen fachspezifische Debatten und Institutionen und können aktiv an den Diskussionen teilnehmen. Sie sind in der Lage, aus vorbereitender Lektüre und eigenen Notizen einen synthetisierenden Bericht zu verfassen.

Module Conference: Tremate, tremate le streghe son tornate! Witches in popular culture – figures and narratives in media

06SM506p405 / Module

Description:

General description:

Im Herbst 1996 startete die TV-Serie Sabrina, the Teenage Witch auf ABC. Dieses kleine Jubiläum wollen wir nutzen, um uns in einer interdisziplinär ausgerichteten Tagung mit den vielfältigen, stetig changierenden Hexenbildern in der Populärkultur zu befassen.

Sabrina bietet sich als Ausgangspunkt an, weil sie einerseits Teil des von Rachel Moseley 2002 als «glamorous witchcraft» (vgl. Moseley 2003) bezeichneten Phänomens ist, das anhand der Figur der jungen Hexe Magie, Feminismus und Weiblichkeit zusammenzuführen versucht. Diese Art der Hexendarstellung ist für die späten 1990er Jahre prägend und wird in der TV-Serie Charmed (1998) oder in den Filmen The Craft (1996) und Practical Magic (1998) verbreitet. Andererseits, weil die Hexe Sabrina schon ab den 1960er Jahren in den Archie-Comics und einer Animationsserie auftritt und ab 2018 auch mit The Chilling Adventures of Sabrina ein Remake erfährt (vgl. Mathis, Graves und Tyndall 2023). Der letzte Titel verweist auf eine Tendenz, die sich ab den 2010er Jahren wieder deutlicher manifestiert, indem die dunkle, gefährliche Seite der Hexe, die lange prägend war, wieder in den Vordergrund rückt. Ein Trend, der sich auch in den TV-Serien Salem (2014), American Horror Story mit der Staffel Coven (2013) oder im Film The VVitch. A New England Folktale (2015) niederschlägt (vgl. Corcoran 2022; Ho 2021; Johnston und Aloï 2007; Heller-Nicholas 2024; Greene 2018).

Diese Beispiele zeigen, dass die Hexenbilder untereinander im Austausch stehen, auf kulturelle Deutungsmuster rekurren, auf soziale, religiöse und wirtschaftliche Veränderungen der Gesellschaft reagieren (vgl. Blécourt 2017; Stephens 2020). Das nehmen wir als Gelegenheit, die vielfältigen Metamorphosen der Gestalt der Hexe in den letzten 250 Jahren seit dem Ende der gerichtlich sanktionierten Hexenverfolgungen zu betrachten. Dabei sind wir uns bewusst, dass viele der heute verbreiteten Elemente des Hexenimaginationen eine zeitlich wesentlich weiter zurückreichende Geschichte aufweisen als die eingangs erwähnte Sabrina. Erinnert sei an die sexualisierten Hexendarstellungen bei Hans Baldung Grien oder Albrecht Dürer, oder an Quellen aus der Zeit der Hexenverfolgung wie der Wickiana oder dämonologische Schriften aus dem 15. und 16. Jahrhundert (vgl. Hinz und Brinkmann 2007; Hufts 2005). In den Märchen – nicht nur bei den Brüdern Grimm – nehmen Hexen eine wichtige Rolle als hässliche, dämonische Antagonistinnen ein. Vorgezeichnet im 19. Jahrhundert (Michelet 1862), findet die Vorstellung der Hexe als Anhänger:in eines heidnischen (Frucht-barkeits-)Kultes im 20. Jahrhundert durch die Entstehung von Wicca und verwandten neureligiösen Gruppen Aufschwung (vgl. z.B. Hutton 1999; Magliocco 2004; Hegner 2019). Diese unterschiedlichen Elemente formieren in sich stetig ändernder Zusammensetzung das Bild der Hexe. Daraus lässt sich schliessen, dass DIE Hexe nicht existiert – vielmehr werden je nach Zeit- oder Sprachraum, literarischem Genre und Alter der intendierten Adressat:innen unterschiedliche Hexendarstellungen favorisiert. Ob als dämonisierte Aussenseiterin, naturverbundene Heilerin oder Symbol weiblicher (menschlicher) Selbstermächtigung, fungiert die Hexe stets als Projektionsfläche.

Die geplante, interdisziplinär ausgerichtete Tagung nimmt Hexenbilder und Hexennarrative in ihrer historischen, sozialen und kulturellen Gewachsenheit in den Blick und fragt nach deren medialer, ästhetischer und/oder ideologischer Konstruktion.

English version:

Tremate, tremate le streghe son tornate! Witches in popular culture - figures and narratives in media and the arts

Sabrina, the Teenage Witch premiered in autumn 1996. This small anniversary serves as an opportunity to explore the diverse and constantly changing images of witches in popular culture.

Sabrina is a good starting point for a journey through different images of witches because, she is part of the phenomenon described by Rachel Moseley as 'glamorous witchcraft' (cf. Moseley 2003), combining magic, feminism and in the image of the young witch. This representation of the witch was characteristic for the late 1990s and was popularised in the TV series like Charmed (1998) and films The Craft (1996) and Practical Magic (1998). But the witch Sabrina is older and younger, she has been appearing in Archie comics and an animated series since the 1960s, and in 2018 she has seen a remake with The Chilling Adventures of Sabrina (cf. Mathis, Graves and Tyndall 2023). The latter title refers to a trend manifest since the 2010s emphasising the dark, dangerous and

sinister side of witches. This trend is also reflected in the TV series Salem (2014), American Horror Story with the season Coven (2013) and the film The VVitch. A New England Folktale (2015) (cf. Corcoran 2022; Ho 2021; Johnston and Aloï 2007; Heller-Nicholas 2024; Greene 2018).

These examples show that images of witches do not simply exist in isolation, but interact with each other, draw on cultural patterns, and respond to social, religious, and economic changes in society (cf. Blécourt 2017; Stephens 2020). We take this as an opportunity to consider the diverse metamorphoses of the figure of the witch over the last 250 years since the end of the witch hunts. We are well aware that many of the widespread elements defining the images of the witch have a much longer history than Sabrina. Quite influential are the sexualised sketches of witches by Hans Baldung Grien or Albrecht Dürer, or sources stemming from the time of witch hunts such as the Wickiana or demonological writings from the 15th and 16th centuries (cf. Hinz and Brinkmann 2007; Hults 2005). In fairy tales - not only those of the Brothers Grimm - witches play an important role as ugly, demonic antagonists. First outlined in the 19th century (Michelet 1862), the idea of the witch as a follower of a pagan (fertility) cult gained momentum in the 20th century with the emergence of Wicca and related new religious groups (cf. e.g. Hutton 1999; Magliocco 2004; Hegner 2019).

These different elements come together in ever-changing combinations to form the image of the witch leading to the conclusion that THE witch does not exist; depending on the time period or language area, literary genre and age of the intended audience, different representations of witches are favoured. Whether as a demonised outsider, a nature-loving healer or a symbol of female or human empowerment, the witch always functions as a mirror. The planned interdisciplinary conference will examine images and narratives of witches in their historical, social and cultural context and explore their media representation, aesthetic and/or ideological construction.

06SM506p502 / Module

Description:

General description:

New Game Plus 2 widmet sich dem Thema des Schreibens und Dokumentierens von Games in seinen kulturellen und materiellen Kontexten. So fokussiert sich die Tagung auf künstlerische, dokumentarische und ethnografische Praxen, mit denen bspw. Forscher*innen und Devs versuchen, Games in ihren kulturellen und materiellen Dimensionen einzufangen. Uns begleitet zudem die Frage, wie qualitative Feldforschung mit der Analyse des kulturellen Mediums "Video Games" verbunden werden kann und wie die Entwickler*innen selbst ihr künstlerisches Schaffen festhalten.

Dieser thematische Zuschnitt wird aus der Dringlichkeit heraus stark gemacht, die kritische Auseinandersetzung mit dem umsatzstärksten kulturellen Medium aus einer geistes- und sozialwissenschaftlichen Perspektive weiter voranzutreiben.

Module NatureCulture Ontologies and the Rights of Nature Movement

06SM506p505 / Module

Description:

General description:

In diesem Seminar lesen und diskutieren wir in einer ersten Phase verschiedene Texte rund um den ontological turn und befassen uns mit verschiedenen theoretischen Konzeptualisierungen von NaturKultur-Verhältnissen. In einer zweiten Phase beschäftigen wir uns anhand empirischer Fallbeispiele mit der Rights of Nature-Bewegung und fragen danach, was für NaturKultur-Ontologien in diesem Feld zu beobachten sind, was für verschiedene Wissensbestände darin in Anschlag gebracht werden, woher diese stammen und was für Wissenstransfers wie geschehen. Zuletzt setzen wir uns auch damit auseinander, was für ethische und politische Schlüsse und Forderungen sich aus einer konsequent ontologischen Lesart dieser Umweltschutzbewegung ziehen lassen.

ECTS: 6

Notes:

Die Seminare auf Masterstufe dienen der Spezialisierung und der theoretischen Vertiefung des Fachwissens im Bereich Kulturwissenschaft des Alltags. Die Studierenden werden zu theoretisch und methodisch reflektierten Analysen und Interpretationen angeleitet. Im ersten Semester finden wöchentliche Sitzungen mit Referaten, Inputs und Diskussionen statt. Im zweiten Semester verfassen die Studierenden selbständig eine schriftliche Arbeit. In Ausnahmefällen (z. B. Mobilität, Abschluss des Studiums) kann das Modul nach Rücksprache mit den Dozierenden bereits nach einem Semester abgeschlossen werden.

Learning Outcome:

Studierende können alltägliche Phänomene empirisch-ethnographisch analysieren sowie historisch und theoretisch kontextualisieren; sie verfügen über vertiefte Kenntnisse ethnografischer Kulturanalyse und deren Verschriftlichung.

Module Knowledge through movement. Performative and scenographic impulses for empirical cultural studies research
06SM506p503 / Module

Description:

General description:

Empirisch-kulturwissenschaftliches Forschen vollzieht sich im Flux der Praktiken und in situativ sich verändernden, materiell-körperlich vielgestaltigen Arrangements. In diesen situativen, kollaborativen Wissensproduktionen wird «Wissen» performativ hervorgebracht, machtvoll ausgehandelt und auf spezifische Weise inszeniert. Dabei sind sowohl historisch gewachsene Dispositive als auch deren gegenwärtige eigenlogische Aneignungen wirkmächtig. Wenn die empirische Kulturwissenschaft machtvolle Wissensanordnungen zu dekonstruieren versucht und dabei Selbstverständlichkeiten hinterfragt, gilt es auch, die flüchtigen Situationen, in denen Forschende ihre Felder erkennen und analysieren oder mit Theorien arbeiten, diese entwickeln oder präsentieren, selbstreflexiv und hinsichtlich ihrer praxeologischen Mikropolitiken zu erforschen.

Eine solche Perspektive legt formative Seiten von Forschungs- und Wissenschaftspraktiken frei: Wissenschaftliche Praxis ist stets aktiv gestaltend. Sowohl Felder als auch Inhalte werden durch die Forschung als bewegte, performative und szenografische Praxis mit-hervorgebracht. Nach welchen Kriterien oder mit welchen Mitteln dies geschieht oder geschehen könnte bzw. müsste, wird im Kurs offen diskutiert.

Im Modul werden deshalb das performativ-szenografische Gestalten als Element empirischen Forschens sowie mögliche spezifische kulturwissenschaftlich-empirische Modalitäten dieser Praxis befragt. Der Kurs kann als praktisches Training verstanden werden, in dem erlernt wird, Praxiskonventionen zu hinterfragen und multiple Möglichkeiten performativ-szenografischen Gestaltens zu erkennen.

ECTS: 6

Notes:

Die «Sitzungen» dieses Kurses können zum Teil bewegt sein. Eine gewisse Bereitschaft zur praktischen Mitarbeit (u.a. Theaterübungen) ist daher in diesen Kurs mitzubringen. Gleichwohl wird versucht, allen Interessierten die Möglichkeit zu bieten, so teilnehmen zu können, wie es individuell passt.

Zum Modul im Allgemeinen: Das im Bachelorstudium angeeignete methodische Wissen wird im Modul «Qualitative Methoden für Fortgeschrittene» vertieft und erweitert. Potenziale und Problemfelder qualitativer Methoden werden über eine theoretische oder praktische Auseinandersetzung reflektiert.

Learning Outcome:

Studierende verfügen über differenzierte Kenntnisse aktueller qualitativer Methoden. Sie können diese anwenden, kritisch reflektieren und gegenstandsadäquat weiterentwickeln.

Module Ethnographies of spatial culture: methods between systematics and experimentation under discussion
06SM506p504 / Module

Description:

General description:

Mit dem sogenannten spatial turn in den Sozial- und Kulturwissenschaften hat nicht nur die Aufmerksamkeit für die räumliche Dimension der sozialen Welt an Bedeutung gewonnen, sondern ist auch die Suche nach geeigneten generellen Zugangsweisen und - im engeren Sinne - Methoden der Erforschung räumlicher Kultur intensiviert worden. Diese Suche hält ungeachtet gleichzeitiger anderer Konjunkturen der Neuorientierung von Forschung in den Humanities bis heute an.

Der Lektürekurs bietet fortgeschrittenen Studierenden der Empirischen Kulturwissenschaft einen vertieften Einblick in wichtige methodologische Debatten und exemplarische Anwendungen. Er macht insbesondere mit den für die - in einem weiten Sinne - ethnografische Erforschung von Räumlichkeit wesentlichen Konzepten und methodischen Umsetzungen vertraut. Neben verschiedenen «klassischen» Zugangsweisen sollen dabei auch Versuche der z.B. kognitionswissenschaftlichen Objektivierung sowie experimentelle Zugänge und solche der transdisziplinären bzw. künstlerischen Forschung kennengelernt und diskutiert werden.

ECTS: 6

Notes:

Der «Lektürekurs Kulturtheorien» greift wissenschaftliche Debatten auf, zu denen einschlägige Texte gelesen, diskutiert und reflektiert werden.

Learning Outcome:

Studierende können sich fundiert in kulturtheoretische Diskussionen einbringen.

Module Introduction to Experimental Research

06SM523-101 / Module

Description:

General description:

This module introduces the process of designing and administering experimental research studies in linguistics and language technology. It covers the formulation of research questions and hypotheses, experimental design, the development of tasks and stimulus materials, and key considerations for participant recruitment. The module also introduces a range of methodologies used to collect linguistic data in different modalities, with a special focus on the linguistic lab infrastructure available at UZH. Finally, the module addresses the administration of studies as well as the postprocessing and interpretation of empirical data. It provides an early foundation for the research cycle and supports later coursework on the modeling of experimental data, scientific writing and ethical conduct.

ECTS: 3

Module Lecture: Religious authorities in Islam. Negotiation processes in religious educational spaces

01SM54SV016 / Course

Description:

General description:

Räume islamischer Bildung und Erziehung befinden sich in tiefgreifenden Transformationsprozessen, die eng mit Generationenverschiebungen, damit einhergehenden Normen und Wertkollisionen sowie breiteren gesellschaftlichen Entwicklungen verbunden sind. Diese Veränderungen wirken sich nicht nur auf pädagogische Praktiken aus, sondern verschieben zugleich die Erwartungen an religiöse Autoritäten und deren Rollenverständnisse. In diesem Zusammenhang werden Fragen religiöser Autorität, Professionalität und Legitimität in islamischen Bildungsräumen neu ausgehandelt. Die Vorlesung untersucht diese Dynamiken anhand verschiedener Kontexte (insbesondere Moscheen, schulische Bildungssettings und digitale Räume) und rekonstruiert zentrale Entwicklungen und Aushandlungsprozesse im Spannungsfeld von Tradition, Institutionalisierung und gesellschaftlichem Wandel.

Module Seminar: Gender and Space in the Context of Islamic Religious Education

01SM54SS048 / Seminar

Description:

General description:

Geschlechterstereotype und Ungleichheitsverhältnisse wirken nicht nur in Lernräume hinein, sondern werden oft auch durch die Räume selbst hervorgebracht. Das Seminar untersucht, wie in formalen, informellen und non-formalen Räumen islamisch-religiöser Bildung (etwa in digitalen Lernumgebungen, im islamischen Religionsunterricht, in Schulbüchern oder in Moscheen) Geschlechterbilder konstruiert, verhandelt und reproduziert werden.

Hierfür werden geschlechtertheoretische und religionspädagogische Perspektiven miteinander verknüpft. Auf der methodisch-methodologischen Ebene nutzt das Seminar einen rekonstruktiven Ansatz, der es ermöglicht, empirische Materialien systematisch zu analysieren und deren Zusammenhänge kritisch zu reflektieren. Die empirischen Analysen werden anschließend mit den theoretischen Zugängen zusammengeführt. Daran anknüpfend wird die Frage bearbeitet, wie sich religionspädagogische Räume gendersensibel gestalten lassen und wie eine gendersensible islamische Religionspädagogik gedacht werden kann.

Module Applied Developmental Psychology

06SM200p202a / Module

Description:

General description:

In this seminar, we focus on the application of developmental psychology methods and findings, with a focus on infancy and childhood. Applied developmental psychology aims to answer everyday questions and to transfer fundamental developmental psychology knowledge into the everyday life. This involves both the description and explanation of existing behaviour (partly as part of developmental diagnostics) and the question of whether and, if so, what kind of change is needed (as an intervention). The students learn how to make a connection to fundamental research, and the dynamic interaction of fundamental and applied research in psychology is emphasised.

ECTS: 4

Notes:

Dieses Modul ist Teil der Buchungsgruppe "Entwicklungspsychologie, Neurowissenschaft, Kognitionspsychologie". Studierende können pro Semester in einer Buchungsgruppe maximal einen Platz bekommen.

Learning Outcome:

Students will be able to describe the goals, focal points, and types of tasks in applied developmental psychology during infancy and childhood. Students will be able to connect fundamental research with applied research. Students will be able to discuss and evaluate science communication and research articles. Students will be able to create a presentation describing an assessment tool, research article, or an intervention in a group. Students will be able to write a short evidence-based text.

Module Development of dyadic interaction

06SM200p202c / Module

Description:

General description:

Menschen sind soziale Wesen. Über die Lebensspanne hinweg hängen Gesundheit und Wohlbefinden stark von der sozialen Wirklichkeit des Individuums ab. In diesem Seminar wird ein Einblick gegeben in grundlegende Perspektiven auf die Entwicklung von dyadischen Prozessen und ihre Wichtigkeit für die alltägliche Bewältigung und Regulation von emotionalen Erfahrungen. Ein Schwerpunkt wird dabei auf Paarbeziehungen und das höhere Lebensalter gelegt. In diesem Seminar erörtern wir wichtige Theorien, Methoden und Befunde in diesem Forschungsfeld, auf deren Grundlage eigene Studienideen entwickelt und diskutiert werden sollen.

Module Age, Language and Brain

06SM200p202d / Module

Description:

General description:

Das Altern geht mit Veränderungen in verschiedenen Lebensbereichen einher, die sich unter Berücksichtigung interindividueller Unterschiede sowohl positiv als auch negativ auf Erleben und Verhalten auswirken. Dieses Seminar beleuchtet die Zusammenhänge zwischen Alterungsprozessen und Sprachverarbeitung aus verschiedenen Perspektiven, mit besonderem Fokus auf das Gehirn. Die Inhalte sind in verschiedene Module gegliedert, die möglichst vielfältige und differenzierte Perspektiven bieten. Nach einer allgemeinen Einführung in das Altern und die neuronalen Grundlagen der Sprachverarbeitung umfassen die Hauptthemen Gehirnentwicklung, sprachliche Besonderheiten, Hörverlust und soziale Interaktionen, Fremdspracherwerb im Alter, klinisch-neuropsychologische Überlegungen sowie neuroprotektives Freizeitverhalten und Interventionen. Auch Wechselwirkungen mit gesellschaftlichen, sozialen und räumlichen Bedingungen werden diskutiert und kritisch beleuchtet.

Module Flashbulb memories: a special form of autobiographical memory?

06SM200p202e / Module

Description:

General description:

Dieses Seminar befasst sich mit sogenannten Flashbulb Memories: Erinnerungen an den Moment, in dem man zum ersten Mal von einem überraschenden, einschneidenden Ereignis gehört hat. Ein häufiges Beispiel sind Erinnerungen an die Terroranschläge vom 11.09.2001 in New York. Inhaltlich wird bearbeitet, ob und wie sich Flashbulb Memories hinsichtlich Lebhaftigkeit und Verzerrung von anderen autobiographischen Erinnerungen unterscheiden, wie sich diese Erinnerungen über die Zeit hinweg entwickeln, und welche Rolle der soziale Austausch dieser kollektiv erlebten Ereignisse spielt. Das Thema wird anhand klassischer und aktueller Studien sowie aktueller Beispiele wie der Brandkatastrophe in Crans-Montana beleuchtet. Ziel ist es, ein umfassendes Verständnis über Flashbulb Memories und das autobiographische Gedächtnis im Allgemeinen über die gesamte Lebensspanne zu vermitteln.

ECTS: 4

Notes:

Dieses Modul ist Teil der Buchungsgruppe "Entwicklungspsychologie, Neurowissenschaft, Kognitionspsychologie". Studierende können pro Semester in einer Buchungsgruppe maximal einen Platz bekommen.

Learning Outcome:

Die Studierenden: 1. verfügen über den aktuellen Wissensstand zum Thema Flashbulb Memories; 2. verstehen in welcher Beziehung Flashbulb Memories und autobiographisches Gedächtnis stehen und sind mit allgemeinen Konzepten des autobiographischen Gedächtnisses vertraut (Semantisches vs. Episodisches Gedächtnis, Freiwilliger vs. Unfreiwilliger Abruf); 3. können beschreiben, wie sich Flashbulb Memories und autobiographische Erinnerungen über die Zeit hinweg entwickeln.

Module Risk and Resilience in the Early Lifespan

06SM200p202f / Module

Description:

General description:

Many youth across the world encounter risk factors that threaten their optimal socio-emotional, cognitive/academic, and physical/health development. In this seminar, we examine factors that increase risk for suboptimal development and, in turn, factors that promote resilience in the face of such risks. We also examine preventions and interventions as ways to promote resilience and as scientific paradigms in the study of risk and resilience.

ECTS: 4

Notes:

Dieses Modul ist Teil der Buchungsgruppe "Entwicklungspsychologie, Neurowissenschaft, Kognitionspsychologie". Studierende können pro Semester in einer Buchungsgruppe maximal einen Platz bekommen.

Learning Outcome:

In this course, your primary mission is to become an expert on risk and resilience from a developmental perspective. By the end of the course, you should be able to:

1. Understand key constructs in the scientific study of risk and resilience.
2. Demonstrate knowledge of theoretical frameworks and methodological approaches in this field.
3. Demonstrate a thorough understanding of the risk and protective factors covered in class, including the "active ingredients" of these factors (or mechanisms) that contribute to increasing risk or to promoting resilience.
4. Clearly express/articulate your ideas and knowledge about risk and resilience verbally in class, in group discussions, in presentations, and in your writing assignments.

Module Living Well With Dementia: Perspectives from Gerontopsychology and Healthy Aging

06SM200p202x / Module

Description:

General description:

Dementia is often primarily thought of in terms of cognitive deficits. However, the way in which a person with dementia experiences (quality of) life is connected to more than just having the condition. Their experience is shaped by multiple, dynamic, and interacting factors, including their individual needs, goals, and abilities; their interpersonal relationships and support; as well as their broader social environment. This seminar will provide insight into this heterogeneity and the psychosocial considerations of dementia, by applying a contextualized person-centred focus. Drawing on theory, models, and research from gerontopsychological and healthy aging perspectives (e.g., quality of life in dementia, person-centred care, living well with dementia), the following topics will be addressed: Assessment and diagnosis, aetiology and epidemiological aspects, risk and resilience factors, symptom management, psychosocial and digital interventions for people with dementia (and their carers). The seminar will involve a mix of lectures and group-work.

ECTS: 4

Notes:

Dieses Modul ist Teil der Buchungsgruppe "Entwicklungspsychologie, Neurowissenschaft, Kognitionspsychologie". Studierende können pro Semester in einer Buchungsgruppe maximal einen Platz bekommen.

Learning Outcome:

Students will be able to:

1. Understand key theory, models, and research on dementia from a gerontopsychological and healthy aging perspective.
2. Describe the assessment, diagnosis, and aetiology of dementia and factors linked to heterogeneity in these processes.
3. Apply a contextualized person-centred focus to the tailoring of psychosocial and digital interventions for people with dementia (and their carers).
4. Reflect on and critically discuss relevant research articles on dementia and healthy aging.

Module SWRW MA-Seminar: The Social Life of Sacred Scripture

01SM55SS028 / Seminar

Description:

General description:

In diesem interdisziplinären Seminar untersuchen wir vergleichend, welche soziale Rolle «Heilige Schriften» im Christentum und Islam spielen. Im Mittelpunkt steht nicht primär der Inhalt von Bibel und Koran, sondern ihr «soziales Leben» - also wie religiöse Autoritätsfiguren, Gemeinschaften und Individuen mit diesen Texten umgehen, sie autorisieren, vermitteln und in unterschiedlichen Kontexten nutzen. Wir beleuchten gemeinsame Fragen beider Traditionen: Was macht eine Schrift autoritativ? Wie gewinnen Prediger:innen und Gelehrte die Autorität, die Bibel oder den Koran auszulegen? Auf welche Weise werden religiöse Texte in Predigten, Lehrkreisen oder öffentlichen Debatten wirksam? Darüber hinaus betrachten wir die vielseitigen Sinnebenen jenseits des reinen Lesens, etwa meditative Lesepraktiken und den Einsatz religiöser Schriften in Ritualen der Heilung und des Exorzismus.

Ein weiterer Schwerpunkt liegt auf der Medialisierung und Materialität: Wir verfolgen die Entwicklung von der mündlichen Überlieferung über handgeschriebene Manuskripte und den Buchdruck bis hin zur digitalen Präsenz religiöser Schriften in Apps und sozialen Medien. Im letzten Teil ziehen wir eine Synthese: Wie unterscheiden sich die Perspektiven einer theologischen Herangehensweise von der religionswissenschaftlichen und wie ergänzen sie sich in der Analyse des Umgangs mit Bibel und Koran? Das Seminar erfordert keine speziellen Vorkenntnisse und richtet sich an Studierende der Religionswissenschaft, Theologie, Islamwissenschaft und angrenzender Disziplinen.

01SM55SS029 / Seminar

Description:

General description:

Das Seminar führt in audiovisuelle, sensorische und multimodale Methoden der Religionsforschung ein und erprobt diese in urbanen Kontexten. Nach einer thematischen Einführung zum Thema "Religion in urbanen Kontexten" erlernen die Studierenden in praktischen Workshops die Grundlagen der Fotografie und des Filmens. Anschliessend entwickeln die Teilnehmenden ein eigenes kleines Feldforschungsprojekt und setzen dieses eigenständig um. Dabei lernen sie nicht nur den Umgang mit der Kamera als Instrument der Forschung, sondern auch als Mittel der Wissensvermittlung kennen und reflektieren dadurch auch ethische und darstellungspolitische Fragen audiovisueller und multimodaler Forschung.

Module Topical questions in environmental psychology

06SM200p303b / Module

Description:

General description:

Ob Klimastreik oder Zero-Waste, das Thema Umwelt hat die Massen erreicht und ist längst nicht mehr nur ein Thema von Naturwissenschaften und Ingenieurwesen, sondern auch der Sozialwissenschaften und Psychologie. Obschon die auf die Architekturpsychologie zurückgehende Umweltpsychologie gar nicht so jung ist, gewann sie in den letzten 25 Jahren stark an Interesse. Heute deckt diese Disziplin ein weites Gebiet von Themen ab, von der Wirkung gebauter und natürlicher Umwelt auf den Menschen bis zu psychologischen Aspekten des Umweltschutzes. In diesem Seminar werden aktuelle Strömungen der Umweltpsychologie aufgegriffen und kritisch diskutiert. Ziel ist es, einen Einblick in die umweltpsychologische Forschung zu vermitteln und die kritische Reflexion über Ziele und Zwecke der Forschung zu üben. Das Seminar führt zunächst überblicksmässig in die Themengebiete der Umweltpsychologie ein. Dann befassen sich die Studierenden - je nach Anzahl Teilnehmender, einzeln oder in Gruppen - mit spezifischen, aktuell diskutierten Themen der Umweltpsychologie. Dazu suchen und verarbeiten sie aktuelle Paper, stellen wesentliche Inhalte zusammen und diskutieren diese kritisch. Dies erfolgt einerseits in schriftlicher Form und andererseits als Präsentation und Diskussion im Plenum. Zudem diskutieren alle Teilnehmenden die präsentierten Themen. Je nach Interessen der Teilnehmenden, können Ausschnitte folgender Themenfelder behandelt werden: Umweltstressoren & Ablenkung; Gestaltung von Räumen, Gebäuden und Städten; Wahrnehmung von natürlicher und gebauter Umwelt; Gesundheits- und Erholungswirkung der Umwelt; Ortsbindung & -identifizierung; Wissen, Vorstellungen und Meinungen über die Umwelt und Veränderung dieser; Normen, Werte, affektive, symbolische und moralische Aspekte von umweltrelevantem Verhalten; Determinanten und Veränderung von umweltrelevantem Verhalten.

Module Culture as Evolutionary Process

06SM200p303e / Module

Description:

General description:

Culture is not static but evolves over time through processes analogous to biological evolution. This seminar examines how cultural traits, practices, and beliefs emerge, spread, and change across generations using principles from evolutionary theory. We will explore the mechanisms of cultural transmission, selection, and adaptation, as well as gene-culture coevolution. The course addresses fundamental questions about why certain cultural practices persist while others disappear, how innovations spread through populations, and how cultural and biological evolution interact. Topics include cultural learning mechanisms, cumulative culture, social learning strategies, and mathematical models of cultural evolution. The acquired knowledge will be applied through analysis of real-world examples ranging from language change to technological innovation to social norms.

ECTS: 4

Notes:

Dieses Modul ist Teil der Buchungsgruppe "Sozial-, Wirtschafts-, Organisations-, Differentielle Psychologie". Studierende können pro Semester in einer Buchungsgruppe maximal einen Platz bekommen.

Learning Outcome:

After completing the seminar, students will:

1. Understand the theoretical principles of cultural evolution and gene-culture coevolution,
2. Become familiar with mechanisms of cultural transmission and selection,
3. Learn the methodological approaches used to study cultural evolutionary processes,
4. Critically evaluate empirical research on cultural evolution, and
5. Apply evolutionary frameworks to analyze contemporary cultural phenomena.

Module Procrastination

06SM200p303y / Module

Description:

General description:

Procrastination, also das Aufschieben von notwendigen und/oder persönlich bedeutsamen Tätigkeiten trotz Erwartung möglicher negativer Konsequenzen, ist weit verbreitet. In diesem Blockkurs werden Sie sich intensiv mit diesem Phänomen auseinandersetzen. Im ersten Themenblock geht es darum, mit dem Konzept vertraut zu werden und mögliche Ursachen für sowie Konsequenzen von Procrastination kennenzulernen. Im zweiten Themenblock werden Sie mögliche Strategien zur Reduktion von Procrastination kennenlernen und ein Schema ausarbeiten, mit Hilfe dessen Sie Ihr Erleben und Verhalten in der anschliessenden Beobachtungsphase reflektieren und in einem "Tagebuch" festhalten werden. Dabei werden Sie sich für eine Strategie entscheiden und diese über mehrere Wochen in Ihrem Alltag anwenden. Ziel ist das Erkennen von Vor- und Nachteilen bzw. eine Beurteilung dessen, inwiefern die gewählte Strategie die Zielverfolgung/-erreichung erleichtert und welche Schwierigkeiten bei deren Anwendung auftreten (könnten). Im dritten Themenblock nehmen Sie allenfalls Anpassungen an Ihrer Strategie vor und wenden diese in einer erneuten Beobachtungsphase an. Nach Abschluss dieser Phase werden Sie im letzten Themenblock Ihre wichtigsten Erkenntnisse mit kritischen Überlegungen in einem Merkblatt für sich und die anderen Teilnehmenden festhalten.

Der Blockkurs setzt das Interesse am Thema voraus sowie die Bereitschaft, sich selbst zu beobachten, zu reflektieren und zu gewissem Grad auch eigene Erfahrungen in vertraulichem Rahmen mit anderen Studierenden zu teilen. Der Leistungsnachweis setzt sich zusammen aus einem Gruppenreferat, dem "Tagebuch" und einem Merkblatt. Die vorbereitete inhaltliche Beteiligung an Diskussionen, Gruppenaufträgen und das Selbststudium der Literatur werden ebenfalls erwartet.

ECTS: 4

Notes:

Dieses Modul ist Teil der Buchungsgruppe "Sozial-, Wirtschafts-, Organisations-, Differentielle Psychologie". Studierende können pro Semester in einer Buchungsgruppe maximal einen Platz bekommen.

Learning Outcome:

1. Grundlagenwissen der theoretischen Konzepte und Modelle.

3. Kritische Reflexion der methodischen Vorgehensweisen und Interpretation.
4. Integration in die Praxis: Intervention und Interventionsevaluation.
5. Einübung (meta)kognitiver Strategien.

Climate change poses an existential threat to humans and other species. Environmental psychology aims to understand how people manage this threat, with the hope of mitigating the effects of climate change. This includes understanding what kind of people are more or less likely to contribute to climate change, the psychological processes involved in proenvironmental behavior, and the mental health effects of climate change threats. This seminar will survey current themes in environmental psychology literature.

Module Language and society

06SM440p003 / Module

Description:

General description:

The lecture explores the dynamic relationship between how we speak and the social worlds we live in and shape. It introduces students to key questions in sociolinguistics: How does language shape identity? In what ways do power, culture, and inequality influence communication? And how do social factors such as class, gender, ethnicity, age, and geography affect the way language is used and perceived?

Through real-world examples - from everyday conversations and media discourse to multilingualism, dialects, and digital communication - the lecture examines language as a social practice rather than a rigid structural system. Students will engage with concepts such as language variation and change, code-switching, language attitudes, and linguistic discrimination, gaining insight into how "standard" and "non-standard" varieties are socially constructed, with a focus on language and social inequality.

The lecture also encourages critical reflection on contemporary issues, including language and education, migration, globalization, and the politics of language. By connecting theory with every-day sociolinguistic experience, students will develop tools to analyze how language both reflects and reinforces social structures, while also serving as a resource for creativity, identity-formation, and social change.

01SM56LB017 / Course

Description:

General description:

Zarathustra: Prophet, Kunstfigur und Religionsgründer, Inspiration für Nietzsche und Mozart - auf ihn führt sich eine der grossen und bis heute einflussreichen religiösen Traditionen zurück.

Der Kosmische Dualismus und Kampf von Gut und Böse, eine endzeitlichen Erlöserfigur, die Motive Feuer und Licht und die ethische Verantwortung des Individuums - damit beeinflusste der Zoroastrismus religiöse Traditionen (Judentum, Christentum, Islam ...), Opern und Filme (Dune, Matrix, Star Wars ...).

Der Herrscher Kyros der Grosse, der Sänger Freddy Mercury, der Dirigent Zubin Mehta, der Industrielle Ratan Tata und die Menschenrechts- und Umweltaktivistin Zerbanoo Gifford, sie alle waren und sind Teil dieser Tradition.

Die Vorlesung bietet eine Einführung in den Zoroastrismus. Behandelt werden die historischen Ursprünge im altiranischen Raum ebenso wie die Entwicklungen bis heute auch in der weltweiten Diaspora, insbesondere auch in Indien. Module Speech and language disorders

06SM440p510 / Module

Description:

General description:

In this course, students examine theories, causes and characteristics of speech and language disorders throughout the entire lifespan of human development from early childhood through older adulthood and critically examine evidence related to linguistic theories advanced to account for such disorders. Issues addressed include cultural variation in perceptions of neurotypical vs. neurodivergent development, prevalence and risk factors, rationales and methods of early identification, and principles of clinical assessment and evidence-based intervention, emphasizing the importance of understanding such disorders as a part of the fuller picture of human behavior (and also in relation to the foreign language classroom).

Topics include, but are not limited to:

- Normal and disordered language acquisition: Study of cognition and language (modularity) in terms of Downs Syndrome, Williams Syndrome, autism and savants; social deprivation in early childhood development; Developmental Language Disorder (DLD).
- Fluency disorders: Introduction to the linguistic management of adults and children who stutter, including the measurement of stuttering, the design of stuttering treatments, and the application of empirical and theoretical literature.
- Dyslexia: Extending the proficiency of students in developmental language disorders. The course also introduces students to factors uniquely relevant to the Swiss educational context, including cultural considerations in assessment and intervention, bilingual educational settings and relevant legislation and government initiatives.
- Aphasia: Overview of the neuroanatomy related to speech and language, methods of evaluation and diagnosis of acquired disorders in adults.
- Attention-deficit/hyperactivity disorder (ADHD) as a learning difficulty and its impact on language processing and learning.
- Deafness: Analyzing the language of people who are born and grow up without the faculty of hearing as members of a minority, who are not bound together by a medical condition but by a shared language and culture.

ECTS: 9

Learning Outcome:

Students will explore research evidence to assess and differentially diagnose the presence, extent, and nature of a variety of speech and language disorders. Specifically, they will learn to apply evidence-based practice to differentially diagnosing the presence, extent, and nature of aphasia, dyslexia and fluency disorders.

Module Early English medical language

06SM440p512 / Module

Description:

General description:

This research seminar focuses on medical language across the history of English. We will study a range of medical texts from Old English to the present, for example, treatises dealing with anatomy, surgery, bloodletting, humoral theory, urinoscopy, midwifery, the plague, as well as medical recipes and charms. We will investigate medical vocabulary, such as, terms for diseases, body parts, medical procedures and tools at different time periods and analyse how medical English has evolved from the Middle Ages to today. In terms of methodological approaches, we will apply register analysis as well as lexicological and lexicographic methods. For quantitative analyses, we draw on the Corpus of Early English Medical Writing (1375-1800). For background, we will read up on relevant aspects of the history of medicine and visit the "Medizinische Sammlung" of the University of Zurich.

ECTS: 9

Learning Outcome:

Students are able to develop their own research design on the basis of relevant theoretical and methodological literature, present this in class and develop their ideas and analyses into a research paper. They are able to critically reflect on their choice of method and theory and apply this in their data analysis.

Module Urban Ecologies: London Literature, 1660-1800

06SM440p505 / Module

Description:

General description:

This MA-research seminar will engage with London as an space and as a literary subject during one of the most fascinating chapters of its existence, the long eighteenth century. Beginning with the near-destruction by fire and plague in 1665/1666, we will chart the fascinating cultural and literary history of London's growth into a modern metropolis. Instead of treating the city as a mere setting, we will approach it as an urban ecology - an interactive network composed of human and non-human beings, material buildings and infrastructures, pleasure gardens and wastelands - and we will ask how literary texts functioned as guides to navigate this bewildering environment.

Drawing on a variety of archival sources, including historical maps and online databases, we will study a wide range of genres that captured the experience of city life in the long eighteenth century, including diaries, journals, essays, poetry, satire, and journalism. Core texts include Samuel Pepys' "Diary", which offers an intimate, day-to-day account of Restoration London, and Daniel Defoe's "A Journal of the Plague Year", a hybrid work that blends history, fiction and reportage. We will read Wycherley's "The Country Wife", a Restoration comedy that pitches the seemingly idyllic, innocent life in the country against the corrupting pleasures of the city. We will also explore periodical writing in Richard Steele and Joseph Addison's magazines "Tatler" and "Spectator", which helped shape a new urban reading public that assembled in the fashionable coffee houses. Attention will be given to poetic and visual satire, such as John Gay's "Trivia, or The Art of Walking the Streets of London" and his famous "Beggar's Opera", as well as William Hogarth's engravings, which vividly depict social types, moral disorder, and everyday street life. Finally, we will see how the city becomes the playground of the novel, with texts like Defoe's "Moll Flanders" and Fanny Burney's "Evelina" raising questions about gender, class and (social) mobility.

Module Writing as Liberation: Un/Freedom in American Literature

06SM440p507 / Module

Description:

General description:

In this seminar, we will examine how US-American literatures have engaged with questions of freedom, oppression, and resistance from the 19th century until today. Our analyses of selected texts will cover different ways in which writing has been viewed and practiced as a form of liberation. What roles do literacy and literature play in liberation movements? How have writers who had previously been excluded from the publishing market claimed authority and authorship? How do authors (attempt to) free themselves from the constraints of literary forms and genres to find new forms of expression? And, to what extent can literary texts be understood as social activism? We will approach these questions through exemplary case studies with a particular focus on African American literature, women's writing, prison literature, and experimental literary texts.

ECTS: 9

Notes:

Students are expected to attend (parts of) the biennial conference of the Swiss Association for North American Studies, which will take place at UZH on Nov. 5-6 on the topic of "American Un/Freedoms" and include keynotes by Prof. Elisabeth Anker (George Washington U), Prof. Heike Paul (FAU Erlangen-Nürnberg), and Prof. Rinaldo Walcott (SUNY Buffalo).

Learning Outcome:

Students are able to: (a) draw on an in-depth knowledge of a specific research topic or area in the field of literary and/or cultural studies; (b) show familiarity with both the current state of research and contemporary debates and issues in the respective area; (c) articulate complex viewpoints concerning the respective seminar topic in an appropriate academic register.

Module Reading Romance: Two Centuries

06SM440p508 / Module

Description:

General description:

Fiction about romantic love has formed one of the most popular literary genres since the rise of the novel and the invention of modern notions of love. The past two decades or so have seen an even more intense fascination with romance as part of a new reading culture. What is the appeal of the romance genre and how can we account for its enduring popularity and current boom? How is modern love defined? What is the social character of our most intimate feelings and erotic yearnings? How does love intersect with economic interests? What is the sexual politics at stake in this genre, which is primarily written by women for women and includes both straight and gay romance? What do readers do with these texts? How can they be used as sources of empowerment in a patriarchal and/or homophobic society?

In this seminar we will examine these and related questions by reading classic nineteenth-century texts by writers such as Jane Austen and the Brontë sisters alongside contemporary romance novels by bestselling authors such as Colleen Hoover, Emily Henry, Ali Hazelwood, and Rachel Reid. Our material will also include the TV series "Heated Rivalry", based on two Reid novels, and the new "Wuthering Heights" adaptation directed by Emerald Fennell and starring Margot Robbie, music and lyrics by Charli xcx and Taylor Swift as well as theoretical texts by thinkers ranging from Roland Barthes to Eva Illouz.

In our analyses and discussions, we will trace the recurring romance tropes that are used to narrate romantic love across periods. After all, one of the appeals of the genre lies in its patterns and genre conventions that allow authors and readers to tell and read the same (love) stories again. What are these patterns and tropes, and how do they make us fall in love with love?

Module The World and the Stage: Drama in the 20th Century

06SM440p509 / Module

Description:

General description:

This course traces the history of English-language theatre in the twentieth century by focusing on transformative moments - plays that challenged and reshaped the theatrical conventions of their time. These works did so through experimentation with new dramatic styles and techniques, as well as by bringing previously marginalized themes and social groups to the centre of the stage. Throughout the course, theatre is considered a unique medium of societal and cultural self-reflection, and we examine how innovations in dramatic form and expression correspond with historical developments beyond the theatre. In particular, the course highlights key moments of feminist, queer, and non-white representation. For example, Caryl Churchill's "Top Girls" (1982) uses an innovative, non-linear structure to bring together women from different historical periods, exploring the tensions between the ideal of women's liberation and the realities of free-market policies under Margaret Thatcher. Similarly, Tony Kushner's two-part epic "Angels in America" (1991-1992), written at the height of the AIDS crisis in Reagan-era America, blends realism with fantasy to offer pointed political critique in the form of "A Gay Fantasia on National Themes."

The course also examines how Anglophone playwrights from former British colonies - such as New Zealand Māori writer Briar Grace-Smith - combined European dramatic traditions with Indigenous performance practices to address questions of history, ethnic identity, and the postcolonial condition. Taken together, the plays examined in class reveal the dynamic relationship between performance and the social realities beyond it - hence, "The World and the Stage."

Module Thesis Colloquium

06SM440p502 / Module

Description:

General description:

The Thesis Colloquium is addressed to both MA students and PhD candidates, whether you are just beginning your thesis or already working on it. Its aim is to support you in the writing process. Participants will have the opportunity to share an excerpt from their work in progress, which will then be discussed in class, with moderation provided by fellow participants. These discussions provide a space to exchange ideas, reflect on common challenges, and develop strategies for navigating the complexities of academic writing. If you prefer not to present an excerpt, you may still earn credits by chairing a session or by writing minutes to support the presenter. The colloquium meets bi-weekly, or as needed.

Module Memory, Identity and Belonging in Contemporary Postcolonial Poetry

06SM440p503 / Module

Description:

General description:

This course explores the dynamic intersections of postcolonial experiences through the powerful voices of several contemporary groundbreaking poets: Warsan Shire (Somalia/UK), Natalie Diaz (Mojave/USA), Koleka Putuma (South Africa), Alok Vaid Menon (India/USA), Ocean Vuong (Vietnam/USA), and Arielle Twist (Nehiyawe (Cree)/Canada).

These poets navigate the legacies of empire, migration, and cultural erasure, challenging dominant narratives and reclaiming marginalized perspectives. Students will examine how they use language and form to articulate experiences of diaspora, indigenous sovereignty, gender fluidity, and the ongoing impacts of settler colonialism.

The colloquium invites students to reflect on the power of poetry as a site of healing, activism, and cultural affirmation in a world still marked by colonial legacies.

Module Reputation Constitution in the Digital Age

06SM250p601 / Module

Description:

General description:

Reputation ist eine zentrale soziale Ressource aktueller Gesellschaften. Aufbauend auf öffentlichkeitssoziologischen und kommunikationswissenschaftlichen Studien untersucht dieses Seminar, wie Reputation als Ergebnis öffentlicher Kommunikation entsteht, stabilisiert und transformiert wird. Ebenfalls wird behandelt, welche Funktionen mit Reputation verbunden sind, d.h. weshalb die Grösse wichtig ist. Ein Fokus liegt auf den Veränderungen durch digitale Plattformen, algorithmische Öffentlichkeiten und Künstliche Intelligenz. Wie verschieben sich Mechanismen der Reputationszuschreibung, wenn Sichtbarkeit, Bewertung und Diskurs zunehmend datengetrieben, automatisiert und plattformlogisch organisiert sind?

ECTS: 6

Learning Outcome:

Folgende Lernziele stehen im Vordergrund:

- Sie kennen verschiedene Ansätze/Theorien der Reputationsformation
- Sie kennen verschiedene Funktionen, die Reputation für ihre Träger erbringt
- Sie kennen die Bedeutung der öffentlichen Kommunikation für die Reputationsbildung
- Sie können beurteilen, wie sich die Reputationsbildung in der digitalen Ära und getrieben über Künstliche Intelligenz verändert
- Sie kennen verschiedene aktuelle, interessante Reputationsfälle auf personeller, organisationaler oder institutioneller Ebene

Module Public Affairs, Lobbyism and Corporate Positioning in Times of Crises

06SM250p602 / Module

Description:

General description:

In an increasingly complex and volatile world, companies face the challenge of strategically positioning themselves in crisis situations. Geopolitical tensions, environmental disasters, social polarization, and economic uncertainties require thoughtful communication strategies to protect a company's reputation, stakeholder trust, and long-term corporate goals.

This MA seminar examines how companies communicate and engage politically in times of crisis, how issue management can protect them from reputational and legitimacy losses, and what role corporate diplomacy and lobbying play in this context. We explore how organizations represent their interests to policymakers, the public, and other stakeholders - and what opportunities and risks are associated with this.

In doing so, we will examine theoretical models, current empirical research, and best practices from the field. In addition, students will select and systematically analyze their own case study in their seminar paper.

Module Shakespeare Week

06SM440p514 / Module

Description:

General description:

25 years ago, the English Department started the beloved tradition of the Shakespeare Week. Taking students to London and Stratford, this excursion offers an exciting encounter with new productions of Shakespeare's plays and explores his legacy through the material sites connected with his life and work. At London's Globe Theatre we will find out more about the historical theatre practices, while at Stratford we will explore the places where Shakespeare was born and lived with his family. Most importantly, we will see some Shakespeare plays in performance - in the summer of 2026, some of his most famous comedies including A Midsummer Night's Dream and Much Ado About Nothing. Post-production conversations among participant - wherever possible including actors, directors and other theatre practitioners -- will help students appreciate the performances watched, and will feed into the theatre reviews students will learn to write.

ECTS: 3

Notes:

Students must have participated in the excursion in summer 2026 to book this module.

Learning Outcome:

Students are able to: (a) relate the questions and concerns raised in their course of studies to the world beyond the university proper; (b) demonstrate how the excursion in question contributes to and complements their previous studies.

Languages of Instruction:

Englisch

Merkmale:

Responsible instructor: Isabel Karremann

Prerequisites:

You need not be a Shakespeare expert to attend, but you should certainly have an interest in Shakespeares play or in theatre more generally. Students are expected to read the plays we'll see beforehand; they also have to attend the excursion programme in full.

Module Decoding the Feed: Qualitative Multimodal Approaches to Visual Social Media

06SM248p601 / Module

Description:

General description:

In this seminar, students will explore key qualitative approaches for analyzing multimodal content in visual social media. We'll examine the interactive and memetic nature of platforms such as TikTok and Instagram and their broader impact on society-including digital and popular cultures, identity, sociality, commerciality, and politics. Through identifying creator communities within these platforms, we'll explore how they adapt to the distinctive vernaculars that characterize each space.

Throughout the seminar, we will engage with critical themes including algorithmic (in)visibility, platform vernaculars, reality construction, and content moderation. Students will learn about multimodal content analysis, memetic and interactive analyses and walkthroughs, scroll-back and close reading. Students will carry out hands-on analyses of social media communities and will learn about the ethical and methodological aspects of examining social media platforms and content.

ECTS: 6

Learning Outcome:

Students will be able to:

- *Understand qualitative, multimodal approaches to visual social media, considering its platform vernaculars, its interactive and memetic nature, and its algorithmic context.
- *Analyze multimodal data with hands-on activities and a final project.
- *Work in a group to locate a topic/community of interest and carry out a literature review related to this community, which you will present as part of a group project.
- *Write a short qualitative report.
- *Examine their own positionality, reflexivity, integrity, and ethical principles when working with online content.

Module Cognitive-behavioral therapy with children and adolescents: Theoretical background

06SM200p404a / Module

Description:

General description:

Die Veranstaltung führt in verschiedene lerntheoretische Ansätze (Klassische Konditionierung, Operante Konditionierung, Soziale Lerntheorien, Kognitive Lerntheorien, Modelllernen) im Hinblick auf verhaltenstherapeutische Interventionen bei Kindern und Jugendlichen im Kontext von Schulpsychologie und Psychotherapie ein und vertieft die für die Praxis wesentlichen Konzepte. Im Vordergrund steht dabei nicht die Interventionsmethode selber, sondern deren theoretische Fundierung in den Lerntheorien. Es wird herausgearbeitet, inwiefern lerntheoretische Annahmen für die verschiedenen therapeutischen Methoden grundlegend sind und inwieweit sie deren Wirkungsweise erklären können. Von besonderem Interesse ist zudem ein fundiertes Störungsverständnis auf der Basis der funktionalen Bedingungsanalyse (SORCK).

ECTS: 4

Notes:

Dieses Modul ist Teil der Buchungsgruppe "Klinische Psychologie und Gesundheitspsychologie". Studierende können pro Semester in einer Buchungsgruppe maximal einen Platz bekommen.

Learning Outcome:

Die Studierenden sollen die, dem Erziehungskontext und den verhaltenstherapeutischen Interventionen bei Kindern und Jugendlichen zugrunde liegenden, klassischen Lerntheorien kennen und in der therapeutischen Arbeit Patienten und Patientinnen plausibel erklären können.

Module Stress, Trauma, and Trauma-Related Disorders: Current Models and Clinical Foundations

06SM200p404e / Module

Description:

General description:

Das Seminar vermittelt einen wissenschaftlich fundierten Überblick über die biopsychosozialen Grundlagen von Stress und Trauma sowie zentrale Traumafolgestörungen. In einem ersten Teil des Seminars werden die Grundlagen von Stress sowie adaptive und maladaptive Reaktionen (z.B. physiologische Stressreaktion, Coping) anhand aktueller Theorien und empirischer Befunde besprochen. Ausgehend davon geht es in einem zweiten Teil des Seminars um Trauma in einem engeren Sinn und damit verbundene Psychopathologien. Dabei werden sowohl ätiologische Modelle der Traumaverarbeitung (z.B. kognitive Mechanismen) als auch psychopathologische Traumafolgestörungen (z.B. PTBS, anhaltende Trauerstörung) behandelt. Die Relevanz dieser Inhalte für klinische Implikationen wird vor dem Hintergrund aktueller empirischer Befunde diskutiert. Die Veranstaltung ist interaktiv gestaltet und beinhaltet Diskussionen von Originalarbeiten, Gruppenarbeiten und theoretische Inputs. Ziel ist es, ein fundiertes Verständnis der Grundlagen von Stress und Trauma zu vermitteln, deren Bedeutung für die Entwicklung von Traumafolgestörungen zu beleuchten und aktuelle Forschung kritisch zu beleuchten.

ECTS: 4

Notes:

Dieses Modul ist Teil der Buchungsgruppe "Klinische Psychologie und Gesundheitspsychologie". Studierende können pro Semester in einer Buchungsgruppe maximal einen Platz bekommen.

Learning Outcome:

1. Studierende können zentrale Stress- und Traumaprozesse (z.B. HPA-Achse, kognitive Prozesse, Coping) beschreiben und ihre Bedeutung für Stress- und Traumareaktionen erklären.
2. Studierende können Mechanismen der Gedächtniskonsolidierung und -dysregulation im Kontext traumatischer Erinnerungen erläutern und deren Relevanz für die Entstehung von PTBS diskutieren.
3. Studierende können zentrale Traumafolgestörungen (z.B. PTBS, komplexe PTBS, anhaltende Trauerstörung, Anpassungsstörung) definieren und voneinander abgrenzen.
4. Studierende können die Bedeutung interpersoneller und sozialer Einflussfaktoren für Stressbewältigung und Traumafolgen beschreiben.
5. Studierende können empirische Forschungsbefunde aus der aktuellen Literatur zusammenfassen und kritisch bewerten.
6. Studierende können Forschungsbefunde und Modelle in Hinblick auf Implikationen für klinische Praxis und Intervention kritisch diskutieren und sie auf exemplarische Problemstellungen anwenden.

Module Social Connection and Mental Health

06SM200p404x / Module

Description:

General description:

This course introduces students to the science of human social connection and its relationship to mental health. Students will explore the theoretical underpinnings of social connection, including evolutionary perspectives on why social relationships influence human psychophysiology. They will then examine psychological research on the different components of social connection and on the factors known to enhance or hinder these connections. The course will also cover the psychophysiological pathways through which social connections affect mental health. Students will think critically about contemporary issues related to social connection and mental health, including the so-called loneliness epidemic, the impact of digital communication, social media, and artificial intelligence, and the consequences of ongoing economic and societal changes for human connection and wellbeing. Throughout, the course takes a global perspective on social connection and mental health, considering how these variables and their associations vary according to diverse cultural and socioeconomic contexts. No prior background in psychology or mental health is required.

ECTS: 4

Notes:

Dieses Modul ist Teil der Buchungsgruppe "Klinische Psychologie und Gesundheitspsychologie". Studierende können pro Semester in einer Buchungsgruppe maximal einen Platz bekommen.

Learning Outcome:

1. Students can describe the theoretical foundations of research linking social connection to mental health, including evolutionary and psychophysiological perspectives on why social relationships matter for mental wellbeing.
2. Students can distinguish between key components of social connection (e.g. loneliness, social support, belonging) and explain the factors known to enhance or hinder them.
3. Students understand the different methods available to researchers interested in measuring social connection and mental health.
4. Students understand the psychophysiological pathways through which social connection affects mental health.
5. Students can critically evaluate empirical research on social connection and mental health, including an awareness of how different methodological choices might affect conclusions and implications.
6. Students can reflect on how cultural and societal context shapes the nature and mental health consequences of social connection, drawing on evidence from diverse global settings.
7. Students can apply theoretical and empirical knowledge to case studies of social connection and mental health and reflect on the broader societal implications.

Target Group: Suitable for English Speakers

Requirements:

Assessment:

Portfolio:

An active participation in class discussions and practical activities is expected from students. The teaching methodology combines direct instruction with structured

group activities. As such, classes will include two broad elements: 1. a lecture covering key theory and findings from the relevant scientific literature and 2. group activities where students will critically engage with the covered scientific research. Group activities will include summarizing and critiquing extant literature, working with case studies, comparing different methods for measuring social connection and mental health, thematic discussions on broader societal implications, and group practice "quizzes" to test understanding of key theory, methods, and findings. These activities will initially be conducted in small groups (e.g. 4 - 5 students); groups will then share their respective impressions and findings with the entire class. Evaluation methods will include short weekly reflections (200 words, written in class) responding to a key reading or discussion question (30%), participation in class discussion (20%), and a final individual essay or case analysis (50%). Components 1-2 must be successfully completed as mandatory components in order to pass the module.

Module From Loss to Disorder: Theoretical models and clinical implications

06SM200p404f / Module

Description:

General description:

Loss is an inevitable part of human life, yet individual and cultural responses to it vary widely. This seminar explores how bereavement and other significant life losses can lead to adaptive or maladaptive adjustment outcomes. We will examine Adjustment Disorder (AjD) and Prolonged Grief Disorder (PGD) as formalized mental health conditions, tracing their etiology, assessment, theoretical models, and intervention approaches. Students will learn to situate grief and adjustment within broader frameworks of stress, coping, and resilience, and to critically analyze how culture, context, and meaning shape the expression and treatment of loss.

Learning Outcome:

Understanding of the phenomenology, diagnosis, aetiology of PGD and adjustment disorder as well as the main theoretical models. Ability to reflect on research and clinical application.

Module Psychology in the era of AI: Transformative Implications for Research and Practice?

06SM200p550 / Module

Description:

General description:

This course delves into the transformative potential of AI and particularly Large Language Models (LLMs), which have sparked immense interest both in the general public and the scientific community. Students will develop a basic understanding of the principles and functioning of AI models, and then dive into the opportunities but also perils of various groundbreaking applications of AI and LLMs. For instance, we will discuss questions such as: How do LLMs affect the professional training of future academics in the context of university curricula? What are the implications of AI methods for basic (psychological) research? And more broadly, what are the implications of AI for human cognition and, consequently, society as a whole? To accommodate the very dynamic development of this field and the associated, constantly emerging issues, this course will adopt a highly flexible format with plenty of time for discussion and active student inputs.

Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:

1. To understand the basic principles and functioning of state-of-the-art AI models, with a particular focus on LLMs.
2. To be able to critically reflect the opportunities and perils of AI in the context of higher education, psychological science, and human cognition / societal implications more broadly.

Module Self-Control and Self-Regulation

06SM200p551 / Module

Description:

General description:

Die Themenbereiche Selbstkontrolle und Selbstregulation befassen sich mit dem zielgerichteten Handeln von Personen. Dies beinhaltet nicht nur das Setzen von Zielen und warum man sich auch manchmal von (wichtigen) Zielen ablöst, sondern auch, wie im alltäglichen Leben diese Ziele durch das eigene Verhalten, Denken und Fühlen erreicht bzw. vorangetrieben werden, oder warum dies leider auch scheitern kann (und man den Cookie eben doch isst, auch wenn man eigentlich abnehmen möchte). Ziel dieses Seminars ist es, wichtige Modelle und Theorien zu Selbstkontrolle und Selbstregulation zu verstehen und sich im Lesen, Verstehen und Präsentieren von wissenschaftlichen Artikeln zu üben.

Module Neuroscientific Advances in Mental Disorders

06SM200p553 / Module

Description:

General description:

Neuroscience is the study of the neural processes and mechanisms underlying human function and behavior. It is an interdisciplinary field that combines the ideas explored in the field of psychology with the science that governs the brain and body. In order to understand the etiology of psychiatric disorders it is crucial to understand how changes in anatomical and functional brain patterns contribute to disease progression. However, the translation of advances in neuroscience into concrete improvements for patients suffering from mental illness has been slow. Thus, psychiatric institutions often argue that neuroscience has little clinical relevance. Part of the problem is the complexity of disease classification and outcome measurement in psychiatry. A broader reason, however, is the complexity of the problem: mental health depends not only on the function of the brain, the most complex of organs, but also on how that function relates to, influences, and is influenced by the individual's environmental and experiential challenges. Understanding mental health, and its disruption, therefore relies on linking multiple interacting levels, from molecules to cells, circuits, cognition, behavior, and the physical and social environment. The current age of big data, with the ability to acquire and manipulate extremely high-dimensional, multimodal data sets, holds great promise to uncover these complex relations. Another promising line of research consists computational models (computational psychiatry) applies computational modeling and theoretical approaches to psychiatric questions, focusing on building mathematical models of neural or cognitive phenomena relevant to psychiatric diseases. The majority of today's treatments are based on serendipitous discoveries made many decades ago. People suffering from severe mental disorders need and deserve more effective and personalized treatments, and this goal might be achieved by neuroscientific advances.

Portfolio:

Grades will be based on two criteria:

1. Participation (66%). Engagement is critical for any successful seminar. It is also good practice to discuss papers and academic topics. Students should be engaged in group discussion, as demonstrated by active listening and direct contributions (i.e., talking).
2. Paper (33%). Students should submit a paper that is about 2-3 pages long by email to the Professor. The paper should be submitted by the beginning of the final class period. This paper could cover one paper or topic, the entire class, or a topic that is related to the class but did not receive significant attention. It should be grounded in a scientific/psychological perspective (i.e., it should not just be personal opinion, although it could be an informed argument that reflects an opinion). The framing, topic, and goal of the paper is open, but it could answer

some combination of the following questions: 1. what did I learn?, 2. how can I apply something I learned in my life and/or career?, 3. what are limitations of or future directions for research and practice in interpersonal psychology? It must cite at least three peer-reviewed papers in the literature and refer to them explicitly.

Module Irish Thresholds: Spaces, Boundaries, Identities

06SM440p504 / Module

Description:

General description:

In a 2023 poem, Margaret Kanjee explores how Britain's departure from the European Union might affect the inter-Irish border. Giving a voice to the border sign marking the threshold between north and south, the poem asks whether the border will be "soft" or "hard," ultimately concluding that "Dialogue must take precedence [...] / And break down borders in our hearts and minds." Like other literary texts, Kanjee's poem thus reflects how debates about Ireland's division have led to reconsiderations of the political, legal, social, and cultural boundaries shaping Irish society on both sides of the border.

Taking an interdisciplinary approach, this lecture series explores the connections between space and identity in Ireland past and present. It considers both literal and metaphorical boundaries, including those related to language, religion, migration, rural and urban identities, class divisions, and regional economic disparities. Speakers will pay particular attention to thresholds as spaces of both anxiety and transformation, discussing key historical moments that have led to transitions in Ireland, representations of the Irish border, experimentation with genre, and the boundaries that individuals cross, be they in terms of gender, class, or sexuality.

This course is the sixth instalment of the Lecture Series in Irish Studies organized by the Swiss Centre of Irish Studies (SCIS), featuring invited international scholars and creative writers as well as SCIS members based at the English Department and the Zurich James Joyce Foundation.

Module Reading Jane Austen

06SM440p002 / Module

Description:

General description:

This colloquium will offer an overview of Jane Austen's works, from the juvenilia to her unfinished novel, Sanditon. We will think about Austen in context, discussing how her works engage with social, cultural, and political issues of her time, such as women and society, rank and social mobility, and popular culture, among others. We will also concentrate on Austen's style, especially her use of irony and free indirect speech. This colloquium will give us the opportunity to think about the canon and textual afterlives.

Module Comics & Classics: Adapting Canonical Texts

06SM440p001 / Module

Description:

General description:

Art Spiegelman's graphic novel Maus winning the Pulitzer Prize for Fiction in 1992 marked a watershed moment in cultural perception of comics. For decades, comics had been both demonized by moral crusaders and derided by mainstream critics. Now, comics - or certain types of comics, at least - were suddenly granted critical recognition.

In this course, we will focus on a type of comic that has long been central to debates about comics and cultural legitimacy: literary adaptations. After examining the key concepts needed to analyze comics, we will turn to theories of adaptation, with particular attention to literary adaptations in comics. We will then apply this theoretical framework to our reading of comics based on canonical works (by William Shakespeare, Oscar Wilde, and James Joyce, among others). In this way, participants will have the opportunity to work with a medium that is less frequently taught while also acquiring new perspectives on literary works with which they may already be familiar.

Module Short Internship: Library Exhibition (University Library English Literature and Linguistics) 06SM440p516 / Module

Description:

General description:

This internship offers master's students the opportunity to actively contribute to the curation of a library exhibition. A possible topic for the exhibition could be centered around (feminist) retellings of classical myths, but other topic ideas are welcome. Working closely with the UB Anglistik's library team, the participant will engage in extensive research and create additional materials for the exhibition. Tasks include choosing a suitable topic, researching relevant titles, getting an insight into various library workflows, drafting texts, gathering supplemental information to enrich the exhibition's context and creating an accompanying website.

At the end of the internship, students will submit a short documentation of their practical work to the module coordinator at UZH, together with a timesheet signed by the contact person at the partner institution.

If both the partner institution and the student agree, there can be max. one follow-up internship in a future semester. It is not possible to receive ECTS credits for more than two internships at the same partner institution.

Module Personality and Social Relationships

06SM200p561 / Module

Description:

General description:

This seminar focuses on links between personality and social relationships. Humans have a universal need for social contact, and we thrive when we engage in meaningful relationships. Still, individual differences (e.g., Big Five personality traits, affiliation motivation, narcissism) exert an important influence on how we form and maintain the relationships in our social network, be it relationships with a romantic partner, a colleague, or a friend. In this seminar, we will discuss theories on social relationships and their dynamic expression in daily life that describe how personality and social relationships influence each other. We will also talk about empirical papers that investigate how social relationships develop over the lifespan, how they are related to individual differences in personality and well-being, and how social interaction processes are regulated in daily life. In addition, we will touch on health and well-being consequences of our social lives by discussing the role of social relationships for well-being and loneliness (vs. voluntary preference for solitude). Considering ongoing scientific discussions, we will highlight and evaluate arguments on the relevance of technology-mediated contact like social media usage for well-being. The literature selected from personality psychology and related fields features a broad variety of state-of-the-art assessment and analytical methods such as representative longitudinal panel studies, daily diary methods, and Big Data smartphone sensing methods.

ECTS: 4

Notes:

Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) und des Master of Arts (RVO19) in Fachwissenschaft Pädagogik und Psychologie offen. This module is only open to students of Master of Science in Psychology (RVO19) and of Master of Arts (RVO19) in Educational Science and Psychology.

Learning Outcome:

The main goal is that students engage in discussion on both the theoretical basis of social relationship research and contributions of recent empirical papers that investigate links between personality and social relationships. Thereby, students learn to critically evaluate contributions to this research field in terms of their methods, scope, and limitations. At the end of the semester, students should be aware of theoretical frameworks on social interactions and relationships as well as relevant papers from applied subfields such as personality, well-being, and lifespan development research. The seminar will familiarize students with both observational (mostly longitudinal) and experimental methods of investigating social relationships. By engaging in short presentations and moderating discussion during class, students will be able to improve their presentation skills. They then extend their inquiry into a topic of their choice by writing up a short research proposal. Thus, they will also be able to practice their scientific writing skills.

Module Introduction to Management Diagnostics

06SM200p562 / Module

Description:

General description:

Die Lehrveranstaltung beschäftigt sich mit der Frage, wie Führungsverhalten gemessen werden kann. In diesem Rahmen werden grundlegende Methoden der Managementdiagnostik und Ansätze der psychologischen Führungsforschung vermittelt. Der wissenschaftliche Hintergrund und die Grenzen managementdiagnostischer Instrumente werden diskutiert. Ein Schwerpunkt der Lehrveranstaltung liegt auf der praktischen Anwendung des erworbenen Wissens. Die Studierenden entwickeln selbstständig verhaltensbasierte Instrumente zur Beurteilung des Führungsverhaltens. Darüber hinaus lernen die Studierenden, wie man managementdiagnostische Instrumente evaluiert. Die Lehrveranstaltung richtet sich insbesondere an Studierende, die sich für die Themen Führungskräfteauswahl und Führungskräfteentwicklung interessieren und gleichermassen von theoretischem Wissen und praktischen Erfahrungen profitieren möchten.

Module The Impact of Discrimination on Members of Social Minorities

06SM200p564 / Module

Description:

General description:

In diesem Seminar befassen wir uns umfassend mit den unterschiedlichen Arten von Diskriminierungen, denen Angehörige verschiedener sozialer Minderheiten ausgesetzt sind. Im Fokus stehen Personen mit Migrations- oder Fluchthintergrund, religiöse Minderheiten, LGBTIQ+ Personen und Menschen mit Behinderungen. Wir nehmen eine intersektionale Perspektive ein und berücksichtigen das Zusammenspiel zwischen individuellen Eigenschaften, intergruppalen Beziehungen und gesellschaftlichen Strukturen. Wir besprechen, wie sich Diskriminierungen und strukturelle Ungleichheiten in verschiedenen Lebensbereichen manifestieren und welche tiefgreifenden Auswirkungen sie auf die Gesundheit, das Wohlbefinden und die soziale Integration der betroffenen Personen haben. Ein zentraler Bestandteil des Seminars ist ausserdem die Diskussion über stärkenbasierte Ansätze. Hier thematisieren wir, wie individuelle Ressourcen und Netzwerke innerhalb und ausserhalb der Eigengruppe aktiv zur Förderung positiver Ergebnisse für Angehörige diskriminierter Gruppen beitragen können.

Module The Science of Cognitive Enhancement: Separating Evidence from Hype

06SM200p565 / Module

Description:

General description:

Can we reliably enhance human cognitive capacity through targeted interventions? This seminar critically examines the rapidly expanding field of cognitive enhancement, with particular emphasis on memory improvements. We will systematically evaluate the empirical evidence behind popular non-pharmacological interventions, including computerized cognitive training and non-invasive brain stimulation. As cognitive psychologists, we will move beyond marketing claims and media sensationalism to conduct rigorous scientific analysis. Through intensive discussion of landmark studies, meta-analyses and replication, you will refine your ability to critically evaluate experimental designs, assess statistical power and effect sizes, and identify methodological confounds in enhancement research. Core Topics:

1. Defining and measuring cognitive enhancement: What constitutes meaningful improvement?
2. Critical evaluation of commercial brain training programs and their transfer claims.
3. Non-invasive brain stimulation (tDCS, TMS, tACS): mechanisms and efficacy.
4. Methodological challenges: placebo effects, expectancy bias, and far-transfer measurement.
5. Publication bias and replication issues in enhancement research.

Module Personality and Climate Change

06SM200p567 / Module

Description:

General description:

Der Klimawandel ist eine der grössten Herausforderungen, vor denen wir derzeit stehen. In diesem Seminar werden wir untersuchen, wie uns die Persönlichkeitspsychologie dabei helfen kann, den Klimawandel besser zu verstehen, mit ihm umzugehen und ihn zu bekämpfen. Wir werden besprechen wie individuelle Unterschiede in Traits, Werten und Motivationen klimabezogene Einstellungen und Verhaltensweisen vorhersagen (z. B. leugnen des Klimawandels, nachhaltiger Konsum, politisches Engagement) und wie der Klimawandel und damit verbundene Stressoren die Persönlichkeit und das Wohlbefinden prägen beziehungsweise mit ihnen interagieren. Zudem schauen wir an ob und wie Erkenntnisse aus der Persönlichkeitspsychologie genutzt werden können, um effektivere Klimakommunikation und Interventionen zu entwickeln.

Module Everyday activities, cognition, and health in older age

06SM200p571 / Module

Description:

General description:

Gesundheit und Wohlbefinden über das Erwachsenenalter und Alter werden durch unseren Lebensstil beeinflusst. Dieser Lebensstil wird durch eine Vielzahl an Alltagsaktivitäten charakterisiert, z. B. körperliche Aktivität, kognitive Aktivität oder soziale Aktivität. Unterschiedliche Kennwerte von Alltagsaktivität (z. B. Häufigkeit vs. Vielfalt) zeigen individuelle Zusammenhänge mit verschiedenen Gesundheitsmassen (mentale Gesundheit, Kognition, körperliche Gesundheit). Ein Grossteil bisheriger Forschung zum Zusammenhang von Aktivität, Lebensstil und Gesundheit basiert auf querschnittlichen und vor allem auf Selbstberichten basierenden Studien. Einige Langzeit Längsschnittstudien sowie neuere sogenannte Experience Sampling und Ambulatory Assessment Studien weisen darauf hin, dass Aktivitäten unsere Gesundheit sowohl über lange Zeiträume, als auch direkt im Alltag selbst über Stunden und Tage beeinflusst. Die konkreten zugrundeliegenden Prozesse und Unterschiede zwischen Aktivitäten wie auch Personen sind jedoch bislang nur ansatzweise verstanden. Im Rahmen dieses Seminars werden sich die Studierenden mit verschiedenen Aktivitätsarten und Lebensstil-Indikatoren beschäftigen und Zusammenhänge mit Emotionen, Kognition und anderen Gesundheitsparametern betrachten. Ausserdem wird diskutiert, welche Mechanismen die beobachteten Zusammenhänge zwischen Aktivitäten und Gesundheit erklären können. Auf konzeptioneller Ebene wird auf Herausforderungen in der Taxonomie unterschiedlicher Aktivitäten eingegangen sowie die Frage nach dem optimalen zeitlichen Rahmen für eine Untersuchung von Aktivitäts-Gesundheits-Relationen, die nützliche Informationen für die Entwicklung von Interventionen für ein gesundes, langes Leben liefern. Zusätzlich zu den inhaltlichen Fragestellungen werden methodische Ansätze thematisiert. Neben diesen inhaltlichen Schwerpunkten werden auch Vor- und Nachteile methodischer Aspekte thematisiert, die charakteristisch für das besprochene Forschungsgebiet sind.

Learning Outcome:

Die Studierenden:

- Kennen wichtige theoretische Modelle zum Zusammenhang von Aktivitäten/Lebensstil und Gesundheit im Erwachsenenalter und Alter.
- Kennen den aktuellen Wissensstand zum Zusammenhang von Alltagsaktivitäten und verschiedenen Gesundheits-Outcomes über das Erwachsenenalter und Alter.
- Entwickeln ein Verständnis der methodischen Komplexität bei der Untersuchung von Aktivitäts-Gesundheits-Relationen.

Module Visual Perception

06SM200p704a / Module

Description:

General description:

The human perceptual experience is strongly visual. While easy to take for granted, the formation of these visual experiences is highly complex. This complexity has given way to centuries of research and theory on the visual perception. This course will act as an introduction to the phenomenon of human visual perception. Throughout the course we will cover an introduction to visual physiology, key visual perceptual phenomena, and theories of how these phenomena arise. The goal of this course is to provide students with a deeper understanding of visual perceptual theory.

ECTS: 4

Notes:

Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Dieses Modul ist Teil der Buchungsgruppe "Vertiefung 4". Studierende können pro Semester in einer Buchungsgruppe maximal einen Platz bekommen.

Learning Outcome:

Critically evaluate theories of visual perception. Understand the relation between visual physiology and visual perception. Learn about relevant theories of visual perception, both historical and contemporary. Get acquainted with experimental methods of investigating visual phenomena.

Assessment:

Portfolio:

1. Class Participation: The participation grade will be derived from class attendance, completion of any required readings, and participation in class discussions (10%).
2. Discussion Questions: Students will be asked to submit a set of two questions on lecture material before each class meeting. These questions will be used to generate discussion within the lecture (20%).
3. Oral Presentation: At the end of the semester, students will be asked to give an oral presentation of their work on the written research report (30%).
4. Written Assignments: Students will be asked to submit two drafts of a final research proposal report, one first draft half-way through the semester (10% of the grade) and a second revised draft at the end of the course (20% of the grade).

Students will provide feedback to peers on the first draft (10% of the grade) to aid in the refinement of the final product and practice the critical evaluation of research. The research proposal should integrate course information, and any gathered research outside the course, to produce a concept and design plan for an experiment (or set of experiments) that would address a predefined visual perception topic question. Topics for this report will be discussed within the course (40%).

General description:

Wie urteilen Menschen darüber was richtig und falsch ist? Warum verhalten sich manche Menschen moralischer als andere, und wie kommt es, dass ein und dieselbe Person je nach Situation völlig unterschiedliche moralische Urteile fällt? Fragen wie diese beschäftigen Wissenschaftler und Laien seit Jahrtausenden. Die wissenschaftliche Erforschung dieser und ähnlichen Fragen steht im Mittelpunkt dieses Seminars. Im Einzelnen werden wir grundlegende und weiterführende Theorien moralischen Urteilens, sowie motivationale, situative, und interindividuelle Prädiktoren dieser Urteile behandeln. Dabei wird hauptsächlich aktuelle psychologische Primärliteratur diskutiert, deren Erkenntnisse stellenweise mit Befunden verwandter Disziplinen, wie z.B. der Philosophie, angereichert werden.

The aim is to derive a deeper understanding on the cultural dimensions that shape different aspects of motivation, and how motivation in turn affects culture.

Module Reproducibility of Social Psychological Results

06SM200p704g / Module

Description:

General description:

In der Psychologie setzt sich immer mehr die Erkenntnis durch, dass empirische Befunde auch dem Postulat der Reproduzierbarkeit genügen müssen. In diesem Seminar beschäftigen wir uns mit der Reproduzierbarkeit als Grundpfeiler von Open Science. Wir diskutieren klassische und neue Studien aus der Sozialpsychologie vor dem Hintergrund der analytischen Reproduzierbarkeit (können die Ergebnisse anhand der zur Verfügung gestellten Daten reproduziert werden?) und der Reproduzierbarkeit der Ergebnisse unter Variation von Stichprobe, Methoden, Zeitpunkt, etc. Der Besuch des Seminars eignet sich zur Vorbereitung auf die eigene Masterarbeit, um den Blick auf die richtige Verwendung von Open Science Praktiken zu schärfen. Weitere Informationen zu den Publikationen, die im Seminar thematisiert werden, werden im OLAT-Kurs publiziert, wo auch bereits vor der ersten Sitzung die Themenwahl stattfindet. Bei der Analyse der Reproduzierbarkeit werden Kenntnisse in der Programmiersprache R vorausgesetzt, die im Regelcurriculum der B.Sc. und M.Sc. Studiengänge Psychologie am Psychologischen Institut der Universität Zürich vermittelt werden.

06SM200p704f / Module

Description:

General description:

Cross-Cultural Psychology examines psychological phenomena across different cultural contexts through systematic comparison and analysis. This seminar introduces theoretical and methodological approaches to cultural comparative research, exploring how and why psychological processes vary across cultures. The course addresses fundamental questions about universality and cultural specificity in human cognition, emotion, motivation, and behavior. Topics include research designs for cross-cultural studies, measurement equivalence, culture-specific versus culture-general phenomena, and the ethical challenges inherent in comparing cultures. The acquired knowledge will be applied and deepened through exercises and analysis of comparative studies across diverse domains including development, social behavior, well-being, and psychopathology.

Wir werden über die soziale und emotionale Entwicklung, die Entwicklung von kommunikativen Fähigkeiten und die Bindung zwischen Bezugspersonen und Kind sprechen sowie auf Kinderfreundschaften, Geschwisterrivalitäten und Familienkonstellationen eingehen. Dabei werden auch Themen wie die Unterschiede in der Erziehung von Müttern und Vätern betrachtet oder auf den Einfluss von Adoption und imaginären Freunden eingegangen. Die Studierenden werden Grundlagenliteratur und neuere empirische Untersuchungen kritisch diskutieren, reflektieren und weiterentwickeln. Ziel ist es, wissenschaftliche Erkenntnisse laiengerecht zu kommunizieren. Die Studierenden werden unterschiedliche Möglichkeiten der Science Communication üben (Tweet, kurzer Film). Der thematische Schwerpunkt wird dabei von den Studierenden selbst gewählt. Im Rahmen des Seminars erstellen die Studierenden kurze Filme zu einer selbstgewählten Frage im Themenbereich.

Module Judgment and Decision Making Across the Lifespan: Individual and Developmental Differences 06SM200p705b / Module

Description:

General description:

Thema des Seminars sind Situationen, in denen Menschen unterschiedlichen Alters Urteile fällen und Entscheidungen treffen. Wir werden dabei vertieft auf folgende Fragen eingehen: Wie verändern sich Präferenzen und Entscheidungen vom Kindesalter bis ins höhere Erwachsenenalter? Welche Rolle spielen dabei individuelle Unterschiede in kognitiven Fähigkeiten, in Motivation, und Persönlichkeit? Verwenden ältere Menschen einfache heuristische Strategien häufiger als jüngere Erwachsene? Welche Altersunterschiede lassen sich bei Konsumententscheidungen beobachten? Welche Modelle beschreiben Entscheidungen gut? Warum gibt es Abweichungen von scheinbar optimalen Entscheidungen (so wie sie z.B. klassische ökonomische Theorien definieren)? In diesem Seminar werden diese Fragen aus verschiedenen Perspektiven beleuchtet und auch grundlegende Aspekte der Perspektive der «ökologischen Rationalität» diskutiert.

Module For the greater good: The role of altruism and pro-sociality in human decision making

06SM200p705f / Module

Description:

General description:

People make numerous decisions in their lives - up to an estimated 20,000 individual decisions every day. Many of these decisions are automated and subconscious, and not all these decisions have an impact on other people, but some can have an impact. From a social perspective, the question of how people make these decisions is exciting as a functioning society depends on pro-social behavior. For example, during the pandemic, selfish behavior could lead to further contagion and slow down the containment of the pandemic. In this seminar, we will look at the extent to which people take social considerations into account when making decisions. What are the benefits of pro-social behavior? What are the possible personal costs of pro-social behavior? We learn about different motivations for altruistic actions and learn about moral dilemmas that emerge with pro-social behavior. To explore the topic, we use current literature as well as influential studies in the history of the study of this topic.

Dieses Modul ist Teil der Buchungsgruppe "Vertiefung 5". Studierende können pro Semester in einer Buchungsgruppe maximal einen Platz bekommen.

Learning Outcome:

The aim of this course is to gain an understanding of the subject matter. Students should acquire an overview of research in this area and be familiar with the current state of the literature. For this purpose, students will independently work through a scientific paper and subsequently present it in class. The focus of students' presentations should lie on a brief explanation of the study design and a critical reflection on the research findings. Following this, some (recent) follow-up literature and the current state of research should be discussed. At the end of the course, students will write a short research proposal to learn how to critically examine and reflect on scientific findings and how to develop research questions for future studies.

Assessment:

Portfolio

The portfolio consists of two elements:

1. Students will work through a scientific paper and present it in the course (accounting for 50% of the final grade). Papers/topics can be selected from a predefined list; students are also welcome to propose their own topics. Active

participation in class discussions and engagement with the assigned readings are expected, as they support the development of the necessary background knowledge and enable students to situate their presentation within the broader context of the seminar.

2. At the end of the course, students will submit a short research proposal (accounting for the remaining 50% of the final grade). The proposal may build on the paper/topic presented or relate to another topic discussed in the seminar. Ideally, the presentation and the proposal are conceptually linked. All components must be successfully completed.

Module Architecture of Emotion: Regulation, Disorders, and Therapeutic Approaches

06SM200p705n / Module

Description:

General description:

Emotionen beschreiben vorübergehende Zustände, die allerdings massgeblichen Einfluss auf unser Verhalten nehmen können. Sie prägen unsere Wahrnehmung, Gedächtnis- und Entscheidungsprozesse und spielen eine zentrale Rolle in der Steuerung adaptiver Verhaltensweisen. Eine effektive Regulation von Emotionen ist somit essenziell. Da Emotionen selbst vom Kontext beeinflusst werden, sind wiederholte Momentaufnahmen im Alltag, z.B. via Smartphone-App eine nützliche Methode, um die Dynamik emotionaler Zustände präzise und ökologisch valide zu erfassen. Videoaufnahmen und moderne Software erlauben die automatisierte Analyse des emotionalen Ausdrucks. Die Bedeutung von Emotionen wird besonders im Bereich der Psychopathologie deutlich: Veränderungen im emotionalen Erleben und Ausdruck sowie Defizite in der Emotionsregulation sind zentrale Merkmale vieler psychischer Erkrankungen. Dies bildet die Grundlage für transdiagnostische therapeutische Ansätze, die auf solche gemeinsamen Mechanismen abzielen und demnach bei der Behandlung verschiedener emotionaler Störungen wirksam eingesetzt werden können. Dieser Kurs ist in drei aufeinander aufbauende Teile gegliedert:

1. a. Kurze Einleitung in die Rolle von Emotionen, Erleben und Ausdruck, Dynamiken und Kontextfaktoren, Emotionsregulation. b. Erfassung von Emotionen und Emotionsregulation mittels ecological momentary assessment (EMA) und Video, verschiedene Auswertungsmöglichkeiten (Ausprägung, Fluktuation, Netzwerke).
2. Emotionsregulation und emotionale Störungen, transdiagnostische Perspektive.
3. Therapeutische Ansätze: transdiagnostische Psychotherapien, mobile Apps. Der Kurs wird interaktiv gestaltet und setzt eine aktive Mitarbeit voraus. Neben Diskussion aktueller Forschung soll es auch eine praktische Einheit zur Auswertung von EMA-Daten geben.

ECTS: 4

Notes:

Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Dieses Modul ist Teil der Buchungsgruppe "Vertiefung 5". Studierende können pro Semester in einer Buchungsgruppe maximal einen Platz bekommen.

Learning Outcome:

Ziel dieses Kurses ist ein tieferes Verständnis der Rolle von Emotionen und Emotionsregulation bei psychischen Störungen unter Berücksichtigung verschiedener Erfassungsmethoden dieser Konstrukte im Alltag. Basierend darauf wird der Ansatz der transdiagnostischen Psychotherapie vorgestellt. Am Ende des Kurses werden die Studierenden in der Lage sein:

1. Emotionsregulation im Allgemeinen und im Kontext psychischer Störungen zu verstehen und zu beschreiben.
2. Vor- und Nachteile verschiedener Erhebungsmethoden zu diskutieren.
3. Grundlagen und Mechanismen transdiagnostischer Therapie zu verstehen und Vergleiche mit störungsspezifischen Ansätzen zu ziehen.

Die Erforschung der Wirkung und Wirkweise psychotherapeutischer Interventionen ist Gegenstand der Psychotherapieforschung. Im Rahmen des Seminars werden wir uns kritisch mit den Konzepten, Methoden und zentralen empirischen Befunden der Psychotherapieforschung auseinandersetzen. Es werden historisch wichtige und aktuell forschungsleitende Konzepte der Psychotherapieforschung vorgestellt und der Einfluss forschungs- und gesundheitspolitischer Weichenstellungen und Kontroversen auf Methodik und Inhalte von Forschung und Praxis diskutiert. Am Beispiel ausgewählter empirischer Studien werden die gängigen Forschungsdesigns und Methoden der Prozess- und Ergebnisforschung, der Practice-based Research sowie der Versorgungsforschung anschaulich erarbeitet, wobei wir Stärken, Limitierungen und Relevanz der Forschung für die klinisch-therapeutische Praxis kritisch reflektieren.

Module Adaptive Mind – Plastic Brain

06SM200p706a / Module

Description:

General description:

Some of the most striking and exciting findings in cognitive neuroscience recently have indicated that our brain is plastic and our mind is adaptive. In this seminar, 1. students will learn the fundamental mechanisms of brain plasticity and which methods can be employed to assess them. Furthermore, 2. they will acquire an insight into how developmental and environmental factors, e.g., age, exercise, meditation, and video gaming, may affect the brain. On top of that, 3. students will be introduced to both the potential and constraints of plasticity in this context, especially when it comes to clinical applications. The course will partly entail round table discussions where students present and discuss the research outcomes of study materials provided by the lectures. Additionally, students will be given the opportunity to develop and discuss creative research ideas by creating graphical abstracts related to said study materials. The lecturers will introduce each study module and assist the students in their endeavors.

Module Aging and Brain Health

06SM200p706b / Module

Description:

General description:

Unser Gehirn unterliegt mit zunehmendem Alter physiologischen Veränderungen in Struktur und Funktion, die sich unter anderem auf die kognitive Leistungsfähigkeit auswirken. Insbesondere in späteren Lebensdekaden zeigt sich eine hohe interindividuelle Variabilität dieser altersabhängigen Veränderungen. Eine zentrale Frage der kognitiven Neurowissenschaften des gesunden Alterns ist daher, warum einige Menschen einen stärkeren Abbau der Gehirnstruktur und Funktion sowie der kognitiven Fähigkeiten erfahren, während andere ihre Gehirngesundheit und kognitiven Fähigkeiten erhalten können. Die Forschung liefert zunehmend Evidenz für die Bedeutung einer gesunden Lebensweise für die Gehirngesundheit. Faktoren wie körperliche Aktivität, Ernährung oder soziale Teilhabe spielen hierbei eine grosse Rolle.

Im Rahmen dieses Seminars werden sich die Studierenden mit der Entwicklung von Gehirnstruktur und -funktion im Erwachsenenalter und mit den Prädiktoren dieser Entwicklungstrajektorien auseinandersetzen. Weiter wird besprochen, wie sich diese neurophysiologischen Veränderungen auf das Verhalten auswirken. Auf konzeptioneller Ebene wird auf aktuelle Definitionen Gesunden Alterns und Gesunder Langlebigkeit eingegangen und es werden umfassende theoretische Modelle diskutiert, die den Zusammenhang zwischen Gehirn und Verhalten beleuchten. Neben diesen inhaltlichen Schwerpunkten werden auch methodische Aspekte thematisiert, die bei der Untersuchung von Entwicklungsverläufen in Gehirn und Verhalten eine wichtige Rolle spielen.

ECTS: 4

Notes:

Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:

1. kennen aktuelle Definitionen von "Gesundem Altern" bzw. von «Gesunder Langlebigkeit»,
2. kennen den aktuellen Wissensstand zu altersbedingten Veränderungen in Hirnstruktur/-funktion und Verhalten,
3. entwickeln ein Verständnis der grossen Heterogenität des Entwicklungs-/Alterungsprozesses,
4. kennen wichtige theoretische Überlegungen / Modelle und Befunde zu Gehirn-Verhalten-Zusammenhängen über die Lebensspanne,
5. wissen, dass der Lebensstil einen grossen Einfluss auf die Gehirngesundheit hat,
6. verstehen methodische Herangehensweisen und Herausforderungen bei der Untersuchung von Entwicklungsverläufen der Hirnstruktur/-funktion und des Verhaltens

Module Research workshop: Motivational psychology perspective on romantic relationships

06SM200p706e / Module

Description:

General description:

Die Motivationspsychologie eröffnet uns eine faszinierende Perspektive auf romantische Beziehungen. In diesem Seminar werden wir drei zentrale Themen erkunden:

1. Nähe und Intimitätsbedürfnisse: Romantische Partner bringen unterschiedliche Bedürfnisse in die Beziehung ein (z.B. Bedürfnis nach Nähe vs. Unabhängigkeit). Wir schauen uns an, wie diese Bedürfnisse in der Beziehung verhaltenswirksam werden.

2. Konflikt, Vermeidung und Distanzbedürfnisse: Romantische Beziehungen sind durch das Streben nach positiven Erfahrungen und die Vermeidung negativer Erfahrungen geprägt. Im Seminar betrachten wir, wie diese Ausrichtungen Konfliktverhalten beeinflussen.

3. Dyadische Zielverfolgung: Auch in romantischen Beziehungen verfolgen Personen individuelle Ziele. Partner*innen können diese Zielverfolgung unterstützen oder erschweren und dadurch sowohl die Zielerreichung als auch die Beziehung beeinflussen.

Das Seminar ist in zwei Teile gegliedert:

Erster Teil: In diesem Teil erarbeiten wir zentrale Konzepte und Befunde zu romantischen Beziehungen aus motivationspsychologischer Sicht. Kurze Pflichtlektüren dienen der Vorbereitung auf die einzelnen Sitzungen. Die Inhalte des theoretischen Blocks werden am Ende in einer Multiple-Choice-Prüfung überprüft.

Zweiter Teil: Aufbauend auf den theoretischen Inhalten entwickeln die Studierenden in Kleingruppen eine eigene Forschungsfrage und leiten daraus Hypothesen ab. Anschliessend entwerfen sie ein passendes Studiendesign. Dabei werden zentrale methodische Grundlagen der Beziehungsforschung vermittelt und auf die eigene Studienidee angewendet. Die Studiendesigns werden am Ende dieses Blocks der gesamten Seminargruppe präsentiert.

ECTS: 4

Notes:

Dieses Modul ist Teil der Buchungsgruppe "Vertiefung 6". Studierende können pro Semester in einer Buchungsgruppe maximal einen Platz bekommen.

Learning Outcome:

Am Ende des Seminars können die Studierenden...

1. drei zentrale motivationspsychologische Ansätze (Motivdispositionen, Annäherungs- und Vermeidungsmotivation sowie dyadische Zielverfolgung) erläutern und auf romantische Beziehungen anwenden;
2. aus theoretischen Ansätzen und bestehenden Befunden begründete Hypothesen ableiten und passende Forschungsdesigns entwickeln;
3. eigene Forschungsideen strukturiert präsentieren, kritisch diskutieren und auf Rückmeldungen eingehen.

Module The practice of psychological reporting

06SM200p706h / Module

Description:

General description:

Psychologische Gutachten spielen in unterschiedlichsten Berufsfeldern eine zentrale Rolle, z.B. in der Laufbahnberatung, Schulpsychologie und Forensik. Von Berufsanwärt*innen wird erwartet, dass diese in der Lage sind, eigenständig Gutachten zu erstellen. In diesem Seminar lernen Sie Schritt für Schritt die Praxis entscheidungsorientierter Diagnostik kennen. Anhand von Fallbeispielen erfahren Sie, welche Fragestellungen mithilfe von psychologischer Begutachtung wie beantwortet werden können. Parallel dazu wählen Sie eine Person aus Ihrem entfernten Bekanntenkreis aus, zu der Sie ein eigenes Gutachten erstellen. Die Suche nach einer geeigneten Person sollte idealerweise bereits vor Beginn des Moduls erfolgen, damit Sie unmittelbar mit der Erhebung und Strukturierung der relevanten Informationen starten können. Die in diesem Seminar erworbenen Kenntnisse sind prinzipiell auf alle Berufsfelder anwendbar. Der Fokus liegt jedoch auf Laufbahnberatung und Schulpsychologie. Berufsfelder wie Forensik, klinische Psychologie und Verkehrspsychologie werden nur am Rande behandelt. Die von Ihnen erstellten Gutachten werden daher auch in die Felder Laufbahnberatung oder Schulpsychologie fallen.

Description:

General description:

Auch wenn Psychotherapie insgesamt als wirksame Interventionsform bei verschiedenen Störungen und Problembereichen angesehen werden kann, ist die Frage, was Psychotherapie eigentlich ist und wie diese zu den beobachtbaren, bzw. messbaren und subjektiv erlebten Veränderungen führt. Im Seminar soll versucht werden, die Black Box "Psychotherapie" zu öffnen. Dazu werden in der Praxis tätige TherapeutInnen verschiedener Therapierichtungen (z.B. KVT, Körperzentrierte Psychotherapie, Systemische Therapie, Psychoanalyse) eingeladen, ihre Erklärungs- und Wirkmodelle, vor allem aber ihre konkrete Arbeitsweise vorzustellen und mit den Teilnehmenden zu diskutieren. Module Case-based Teaching in Psychopathology

06SM200p706n / Module

Description:

General description:

Ab wann ist eine Abweichung von psychischer Gesundheit pathologisch und wie wird das festgestellt? Ziel der Lehrveranstaltung ist die Einübung strukturierter klinischer Diagnostik nach ICD und DSM anhand von klinischen Erhebungsinstrumenten wie z.B. AMDP, SKID-5-CV. Die Erhebung der psychischen Befundlage wird an einem breiten Spektrum psychischer Störungen (z.B. Depression, Angst, PTSD, Persönlichkeitsstörungen) vorgenommen. Anhand von Übungen werden grundlegende Kenntnisse und Fertigkeiten im Umgang mit den genannten Verfahren erarbeitet. Die praktische Durchführung der halbstrukturierten Interviewtechnik wird in Paaren oder Kleingruppen und anhand von Videos trainiert. Interesse und die Bereitschaft, sich mit eigenen Beiträgen zu beteiligen, wird vorausgesetzt.

Module Transdiagnostic Interventions in Psychotherapy

06SM200p706o / Module

Description:

General description:

In der Psychotherapie gibt es Methoden, die bei verschiedenen psychischen Störungen zur Anwendung kommen. Neuere psychotherapeutische Ansätze überwinden das «Schulendenken», indem sie verschiedene Behandlungsansätze in ihre Fallkonzeptionen integrieren. Mit Erscheinen der ICD-11 wurden Störungskonzepte umformuliert, präzisiert, vereinfacht.

Die Psychotherapie ist im ständigen Fortschritt und sowohl theoretische als auch praktische Erfahrung zeigt, dass ein Denken in engen Kategorien überwunden werden sollte, um auf die individuellen Bedürfnisse der Patienten besser eingehen zu können. Aus diesem Grund gibt es Bemühungen, Interventionen transdiagnostisch zu verstehen, zu entwickeln und anzuwenden. Der Fokus geht weg von der Standard-Behandlung der depressiven Episode zur Behandlung von Aufmerksamkeitsdefiziten, gestörten Gedächtnisprozessen, Fehlannahmen sowie beeinträchtigenden Emotionen, Gedanken und Verhalten.

Das Ziel dieses Seminars ist es, ausgewählte zentrale Interventionen und Methoden in Hinblick auf ihre theoretische Verankerung, ihre empirische Überprüfung und ihre praktische Anwendung kennen zu lernen. Im Fokus der Betrachtung steht dabei vor allem die Diskussion des transdiagnostischen Ansatzes sowie der zugrundeliegenden Annahmen über psychotherapeutische Wirkmechanismen, die Anwendbarkeit auf verschiedene Störungsbilder, die Befundlage zur kurz- und langfristigen Effektivität der Verfahren und das Kennenlernen der Verfahren anhand von praktischen Übungen.

Die Studierenden gestalten das Seminar aktiv mit und geben sich gegenseitig Feedback.

Module From Treatment to Long-Term Well-Being: Follow-Up Care and Rehabilitation in Mental Health 06SM200p706p / Module

Description:

General description:

Psychotherapy patients in clinical practice often present with complex health conditions, such as chronic illnesses or an increased risk of chronicity. They frequently exhibit significant disease-related consequences, that impact deeply beyond symptoms by deteriorating social interactions, relationships, community participation, and employment, i.e. by diminishing health-related quality of life (HRQL). For sustainable therapeutic success and the prevention of relapses and chronicity, the focus is not only on symptom reduction during treatment but also on recovery and HRQL. This seminar addresses how follow-up care and rehabilitation function as critical bridges between clinical intervention and sustainable recovery in mental health. The course presents a paradigm shift from an illness-centered model toward a functional disability approach of follow-up care, grounded in the most recent evidence. It integrates strategies related to the development of individual skills to cope with stressful environments and modifying environmental resources to reduce stressors. Additionally, the course explores the personal and contextual factors that shape recovery and social participation, emphasizing the role of social determinants of health. Participants will also examine protective factors and strategies to strengthen them, aiming to prevent chronicity in mental health and improve sustainability of treatment outcomes.

Learning Outcome:

This seminar will focus on follow-up care after psychotherapy and other interventions and strategies aimed at preventing relapse, as well as enhancing well-being and HRQL from a rehabilitation perspective. Participants will explore evidence-based interventions to promote long-term clinical, personal, social, and functional recovery. These interventions are either delivered after the termination of psychotherapy (as follow-up care) or during psychotherapy, serving as a part - and augmentation - of it. The content will cover theoretical foundations to practical applications, including functional assessment methodologies and ethical considerations. Upon completion, participants will be equipped to implement recovery-oriented models that go beyond symptom management, achieving comprehensive and sustainable improvements in well-being and quality of life.

Module Colloquial Spanish II

06SM427p005 / Module

Description:

General description:

Este módulo permite explorar la lengua cotidiana española a través de materiales auténticos y recursos audiovisuales cuidadosamente seleccionados. El curso tiene como objetivo ampliar el conocimiento de las expresiones y locuciones propias del registro coloquial, así como desarrollar estrategias que favorezcan la autonomía en la comprensión y el aprendizaje de este tipo de lenguaje.

Se abordarán campos semánticos diferentes a los estudiados en Español Coloquial I: comparaciones idiomáticas ("ser más bruto que un arado", "estar más sordo que una tapia"), expresiones propias del ámbito del trabajo y de los estudios ("romperse los cuernos", "hincar los codos"), además de otras locuciones procedentes de cómics, vídeos, antiguos exámenes DELE y diversos materiales reales.

La mayor parte del trabajo se realizará en línea, de manera autónoma y colaborativa, mediante el material disponible en OLAT y el indicado en el VVZ, aunque la tutora estará siempre presente virtualmente para resolver dudas y guiar el proceso de aprendizaje. Asimismo, se han programado algunas reuniones presenciales (solo una de ellas es obligatoria: la destinada a la realización del examen escrito).

MUY IMPORTANTE: Para poder participar, se deberá demostrar que se cumplen los requisitos establecidos. Por ello, es esencial entrar en contacto con la lectora con la mayor celeridad posible.

ECTS: 3

Notes:

Español Coloquial II puede entenderse como una profundización de Español Coloquial I, pero haber participado en el primer curso no es un requisito de acceso. Se trata, por lo tanto, de un módulo independiente en el que se abordarán otros campos semánticos diferentes.

Learning Outcome:

En este módulo pretendemos...

1. que los estudiantes profundicen el lenguaje coloquial de España, de modo que puedan comprender conversaciones cotidianas sobre distintos temas, especialmente con jóvenes de este país. Este curso les brindará la posibilidad de adaptar sus producciones a la situación comunicativa;
2. que los participantes desarrollen estrategias para aumentar su autonomía en el aprendizaje de esta variedad diafásica.

Para conseguir estos objetivos, serán necesarias grandes dosis de disciplina, ya que la mayor parte del trabajo se llevará a cabo de forma autónoma e independiente empleando para ello el material disponible en OLAT y el indicado en el VVZ. Además, se recomienda una buena predisposición a interactuar con los demás miembros del grupo.

Si ya se ha aprobado uno de los módulos Lengua Española (B2, C1 o C2), indicárselo a la docente (mcmunoz@rom.uzh.ch).

Si no se da ninguno de los casos anteriores, entrar en contacto con la lectora con la mayor celeridad posible (mcmunoz@rom.uzh.ch).

Module Euskara eta Kultura I / Basque Language and Culture I

06SM427p004 / Module

Description:

General description:

In this course, we will learn the basics of the Basque language while also gaining an overview of the Basque Country, its society, and its rich culture. Throughout the semester, students will learn how to introduce themselves in Basque, ask simple questions, follow short conversations, and produce brief descriptions of people and places. We will also explore some linguistic features of the Basque language in order to understand the structures and strategies of this millenary non-Indo-European language. The aim of the course is for students to acquire a foundational knowledge of Basque: to understand its essential linguistic features and to communicate with local speakers in simple everyday situations.

Moreover, Basque cultural topics will also be covered, giving students a broad overview of the Basque Country, its society, and its fascinating culture. Among other themes, we will examine the geography of the Basque Country (its regions, capital cities, and most well-known destinations), Basque classical and modern music, traditional Basque dances (Euskal Dantzak), Basque rural sports (Herri Kirolak), Basque gastronomy and a variety of local customs and traditions.

Module Linear Structural Equation Models – from simple models to models for multitrait–multimethod analysis and longitudinal data
06SM200p800f / Module

Description:

General description:

In diesem Seminar werden ausgehend von der Regressionsanalyse und der Faktorenanalyse lineare Strukturgleichungsmodelle eingeführt. Zunächst werden einfache Modelle zur Analyse von Merkmalszusammenhängen auf latenter Ebene (Korrelationen, Regressionen und Mediationsanalysen) ausführlich besprochen. Im zweiten Teil werden basale Modelle der multimethodalen (MTMM-Modelle) und der längsschnittlichen (latent state, latent differences und growth curves) Modellierung eingeführt. Theoretische Kenntnisse über lineare Regressionen und Faktorenanalysen werden vorausgesetzt. Erste Erfahrungen im Umgang mit R und R-Studio sind von Vorteil.

Studierende bringen bitte ein Laptop mit einer aktuellen Installation von R und RStudio mit.

ECTS: 4

Notes:

Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Dieses Modul ist Teil der Buchungsgruppe "Fortgeschrittene Methoden". Studierende können pro Semester in einer Buchungsgruppe maximal einen Platz bekommen.

Learning Outcome:

Studierende lernen die Verfahren theoretisch kennen, erlernen die Schätzung und Interpretation der Modelle mit dem R-package lavaan und sind somit in der Lage eigenständige Analysen einfacher Modelle in Qualifikations- und Forschungsarbeiten durchzuführen. Sie werden weiterhin befähigt, sich fortgeschrittene Modelle eigenständig anzueignen.

Module Dynamic Systems Thinking for Psychologists

06SM200p800j / Module

Description:

General description:

Understanding how people change is a fundamental goal of psychological science. A clinician is interested in how a mental disorder comes to be. A cognitive psychologist ponders if change in our cognitive abilities can change our language skills. While a neuroscientist studies how change in neural activity affects our behavior. In this course, we will learn how to go from a broad curiosity about change to a quantifiable, empirically testable, theory. By working in-class to discover a mechanism of change, we will consider a variety of ways to think about and quantify change - from hand drawn ideas, through linear regression and SEM, to state-space representations in discrete and continuous-time. Emphasis will always be on the intuition and relation to psychological constructs, rather than technical details, even when dealing with advanced methods. Substantial time will be devoted in class to small-group discussions and work with R.

ECTS: 4

Notes:

Dieses Modul steht nur Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Dieses Modul ist Teil der Buchungsgruppe "Fortgeschrittene Methoden". Studierende können pro Semester in einer Buchungsgruppe maximal einen Platz bekommen.

Learning Outcome:

Students can consider theoretical questions and ideas about psychological constructs, how they change over time, and how these look in some different modelling frameworks. Simple data simulations, capturing at least some of the theoretical ideas, can be created by the students in R. Students can interpret some results from longitudinal models in multilevel regression, SEM, and ctsem software, in terms of how they relate to specific hypotheses or ideas about change.

Description:

General description:

Dieses Modul führt Masterstudierende in die Analyse von Längsschnittdaten mit der Programmiersprache R ein. Im Zentrum stehen Methoden, mithilfe derer sich untersuchen lässt, wie sich Personen über die Zeit verändern und wie diese Veränderungen mit anderen Konstrukten oder Prozessen zusammenhängen. Die Studierenden setzen sich mit den besonderen Herausforderungen und Möglichkeiten der Längsschnittanalyse auseinander, von der Modellierung von Zeit und komplexen Datenstrukturen bis hin zur zeitlichen Trennung von Prädiktoren und Zielvariablen sowie autoregressiven Effekten. Das Modul verbindet konzeptionelles Verständnis mit praktischer Umsetzung in R und behandelt sowohl klassische Panel- als auch intensive Längsschnittdesigns. Eine grundlegende Vertrautheit mit der RStudio-Umgebung wird empfohlen.

Module Statistics for Clinical Research

06SM200p800y / Module

Description:

General description:

In der klinischen Forschung treten häufig Situationen auf, in denen Stichproben sehr klein sind oder die Annahme der Normalverteilung der abhängigen Variablen nicht erfüllt ist. Ebenso werden oft Konstrukte untersucht, die lediglich auf nominalem oder ordinalem Skalenniveau gemessen werden können. In solchen Fällen bieten nichtparametrische Verfahren eine sinnvolle und methodisch fundierte Alternative zu klassischen parametrischen Tests. Im Seminar werden zentrale nichtparametrische Verfahren vorgestellt, deren Anwendungsbereiche und Voraussetzungen erläutert und anhand praxisnaher Beispiele vertieft. Ein weiterer Schwerpunkt liegt auf dem Umgang mit fehlenden Werten - einem häufigen Problem in der empirischen Forschung, insbesondere im klinischen Kontext.

ECTS: 4

Ziel des Seminars ist es, Sicherheit im Einsatz nichtparametrischer Verfahren zu gewinnen und einen reflektierten Umgang mit typischen Herausforderungen der klinischen Forschung zu entwickeln. Der Kurs richtet sich an alle Masterstudierenden der Psychologie und setzt kein vertieftes Vorwissen in der klinischen Forschung voraus.

Module Introduction to computational modeling of behavior

06SM200p800h / Module

Description:

General description:

Computational modeling aims to improve our understanding of human behavior by building mathematical models or computer simulations of the processes involved. This allows researchers to formalize their theories, specify them with more precision, understand better how they work, derive more reliable predictions and test them more robustly. This course will introduce you to the why and how of modeling - the goals, philosophy and implementation of basic modeling techniques. You will learn why we do modeling and what makes a good model. You will learn how to use R to build computational models, fit them to data, evaluate their performance and compare them against competing models. You will also learn how to use reproducible workflows for modeling. Prior basic experience with R is required (basic R skills are enough - you will learn all advanced programming techniques in the class). A good grasp of statistics and probability is helpful, but the course will include an overview/revision of relevant topics. Please bring a laptop with R and Rstudio installed. The course will involve a mixture of lecture segments, hands-on programming, homework exercises and a final modeling project.

Learning Outcome:

1. Understand what computational models are and why we need them.
2. Explain what makes a good model.
3. Understand the difference between statistical, measurement and process models.
4. Know how to translate a psychological theory into a computational model and how to implement the model in R.
5. Know how to use R to fit models to data, evaluate their performance and compare compete models.
6. Create reproducible version controlled workflows for modeling and data analysis.

Description:

General description:

Marken sind pure Psychologie. Sie malen gezielt Bilder in unsere Köpfe, erzeugen Emotionen, manipulieren und verführen. Welche Rolle spielen Marken im Konsumprozess? Warum bleiben wir Marken häufig ein ganzes Leben lang treu? Die Vorlesung erklärt den Wirkungsmechanismus erfolgreicher Marken und zeigt auf, wie sich die Spielregeln persuasiver Markenkommunikation in Zeiten von digitaler Transformation, Social Media und künstlicher Intelligenz verändern.

Die Kombination aus theoretischen Modellen und aktuellen Praxisbeispielen verdeutlicht, warum wir als Konsumenten berechenbar sind. Neben theoretischem Basiswissen werden praktische Insights moderner Markenkommunikation vermittelt. Das erworbene Wissen wird mit erfahrenen Gastreferenten aus der Kommunikationsbranche vertieft.

Module Digital Traces: Studying Online Phenomena with Computational Methods

06SM254p123 / Module

Description:

General description:

Every post, reply, follow, and upvote on the internet leaves a trace. These traces are one of the richest records of human communication ever produced, and they are largely public. This seminar teaches how to study online phenomena using computational methods that fit them.

This is a project-based seminar. With guidance from the instructor, every group of students designs and carries out a small original study of an online community or phenomenon of their choice (a subreddit, a YouTube comment section...). Working incrementally, they learn to ethically collect digital trace data, describe a corpus, analyze text through sentiment and topic modeling, and map communities as networks. Each method is introduced in a lecture, applied at home to the student's own project, and presented to the class for feedback before the next method begins.

By the end, students will have produced a multi-method study of one online phenomenon, learned to read computational communication research critically, and developed the habit of treating any computational result with appropriate critical eye.

Module Media socialisation of adolescents

06SM254p601 / Module

Description:

General description:

Kinder und Jugendliche wachsen heute in hybriden Lebenswelten auf. Sie werden von analogen und digitalen Erfahrungen zugleich geprägt. Oft werden im öffentlichen Diskurs vor allem die Risiken des Medienumgangs für Heranwachsende betont, ohne dass die differenzierten Befunde aus der Forschung zu Risiken und Chancen beachtet werden. Im Seminar werden verschiedene Themenfelder bearbeitet, wie die Rolle von Influencer:innen, die Nutzung von Sozialen Medien, von Games und audiovisuellen Angeboten. Neben Forschungsbefunden werden auch Praxisprojekte diskutiert, welche die Medienkompetenz der Heranwachsenden fördern sollen. Die Rolle verschiedener Akteure, wie Eltern, Schule, Behörden und Medienanbietern für den Jugendmedienschutz werden kritisch reflektiert. Problematische Nutzungsformen, wie Onlinesucht werden ebenso beleuchtet wie entwicklungsförderliche Integration von Medien in den Alltag, welche zu Digital-Life-Balance beitragen.

Module Social and Human Capital in the Internet Age

06SM254p602 / Module

Description:

General description:

This seminar examines foundational theories of social capital (the access and resources derived from personal networks, relationships, and trust) and human capital (learned skills and knowledge), and applies them to contemporary research on Internet use and its social consequences (and benefits). Core questions will be guided by media studies and digital sociology. These include: Does internet use create, reproduce, or displace existing social capital? Under what conditions does digital connectivity translate into meaningful benefits (or consequences)? How do inequalities frame access to social networks in the Internet age?

Students will engage with the evolving theoretical and empirical literature throughout the course, lead one discussion session, and develop an original research paper on a topic within the seminar's scope.

Module Digital Tools and Artificial Intelligence for Ancient World Research

06SM322p002 / Module

Description:

General description:

Students will gain familiarity with digital tools and methods that are useful for the study of the Ancient World as broadly defined. Students will also gain experience that will allow them to evaluate new tools as they continue to become available during the course of their careers. Topics and tools include: text encoding (HTML, XML/TEI/ EpiDoc), computational text processing in Python, data modeling and relational databases, visualization, Spatial data (GIS) and digital gazetteers, and responsible uses of generative AI. Students will build reproducible workflows (VS Code, git/GitHub) and share their work in a coherent project format. A final project integrates several course techniques and includes a short research narrative and (short) bibliography.

ECTS: 3

Learning Outcome:

Set up a basic DH workflow (VS Code + git/GitHub) and manage work reproducibly; encode and interpret ancient textual sources using HTML and XML/TEI (with awareness of EpiDoc); use Python to parse and transform textual/ markup, tabular, and spatial data; design and implement a small relational database grounded in a research question; create clear, critically informed visualizations and publish results in a project format; execute GIS tasks and build a small gazetteer-style spatial dataset; apply selected generative AI tools transparently.

Module Foundations of Innovation

10SMSTS-113 / Module

Description:

General description:

Foundations of Innovation examines innovation from an interdisciplinary perspective, integrating concepts from economics, management, law, sociology and ethics. The course provides a structured overview of how innovation processes unfold within markets, organizations, and institutional frameworks, and how legal and ethical considerations influence innovation dynamics and outcomes. Core topics include the economics of innovation, intellectual property frameworks, organizational and cultural dimensions of innovation, ethical challenges, and social impact. The course combines conceptual discussion with empirical studies and selected real-world cases to illustrate contemporary innovation practices and debates.

ECTS: 6

Notes:

The module is part of the Minor / LAO Innovation & Entrepreneurship. Students enrolled in this Minor / LAO should start with "Foundations of Innovation", followed by "XP Lab Innovation" in the same semester. The two courses are closely aligned: "Foundations of Innovation" provides the conceptual basis for the project-based work in "XP Lab Innovation" and for the Entrepreneurship modules in the spring semester.

Learning Outcome:

Students will develop a solid understanding of core theoretical concepts from economics, management, law, and ethics that underpin innovation. They will learn to apply these frameworks to analyze real-world innovation challenges and to evaluate how markets, organizations, legal rules, and ethical considerations shape innovation outcomes. Students will also learn to critically assess empirical research and practical cases, integrating evidence and industry insights with theoretical perspectives. By the end of the course, they will be able to formulate well-reasoned arguments about contemporary innovation issues grounded in both theory and empirical evidence.

Module XP Lab Innovation

10SMSTS-611 / Module

Description:

General description:

XP Lab Innovation introduces students to innovation as a systems-oriented, value-driven, and ethically grounded practice. Across seven experiential sessions, students explore how innovation emerges in conditions of uncertainty and complexity. Through foresight, design thinking, systems mapping, ethical reasoning, and creative experimentation, students learn to identify opportunities, develop concepts, prototype solutions, and communicate persuasively. The module emphasizes reflective practice, teamwork, and learning from failure, drawing on interdisciplinary perspectives from design, decision sciences, sustainability, ethics, and emerging technologies.

Students work in teams on an innovation challenge while maintaining an individual reflection journal. The course culminates in an integrated pitch presentation. Learning activities include workshops, role play, improvisation, debates, scenario development, and project-based work.

ECTS: 3

Notes:

The module is part of the Minor / LAO Innovation & Entrepreneurship. Students enrolled in this Minor / LAO should start with "Foundations of Innovation", followed by "XP Lab Innovation" in the same semester. The two courses are closely aligned: "Foundations of Innovation" provides the conceptual basis for the project-based work in "XP Lab Innovation" and for the Entrepreneurship modules in the spring semester.

Learning Outcome:

Students will be able to:

- analyse opportunities in uncertain environments by applying foresight, scenario thinking, and systems thinking, and justify underlying assumptions using qualitative and quantitative evidence.
- design and prototype innovative solutions using design thinking, creative inquiry, and rapid experimentation, and evaluate their feasibility.
- evaluate ethical, societal and organizational implications of innovation and emerging technologies and recommend responsible actions.
- contribute to team collaboration through transdisciplinary practices by integrating diverse perspectives, giving constructive feedback and co-creating actionable outputs.
- communicate innovation concepts clearly and convincingly through storytelling, visualization, structured pitches and evidence-based arguments tailored to different audiences.
- reflect on learning processes, experimentation cycles and failures to strengthen resilience, adaptability and professional growth.

Module ECO 399 Foundations in Ecology 2 07SMECO399 / Lecture with Practical Exercises

Description:

General description:

This course focuses on the foundations of modern ecology by exploring the major intellectual and conceptual roots in ecology.

We focus on classic ecological papers that for generations of scientists have identified the key concepts in ecology and which have defined the core questions.

Through discussions about the concepts and themes introduced in readings of classic papers in a workshop structure, participants will gain understanding on how historical developments in ecology have influenced the field of ecology and how such tools, data, and insights have influenced the field of ecology.

By covering some of the historical papers and linkages in ecology, participants will gain a broad perspective of ecology and how the way research is conducted today developed over time.

Each course focuses on one or two foundational topics. Foundations of Ecology 2 will focus on how species compete and coexist including sharing resources and how productivity factors in this.

Module AI 121CHB Artificial Intelligence and Critical Thinking Seminar

07SMAI121CHB / Seminar

Description:

General description:

The course is aimed at students in chemical disciplines at an early stage in their studies.

This course explores the productive and responsible use of LLM tools in a participative way. In-class exercises and discussions as used to build upon the concepts encountered in AI 111.

ECTS: 1

Notes:

You will attend only one of the seminar groups, depending on your own class schedule and the capacity of the individual groups.

Learning Outcome:

Students in this seminar should learn to:

- Experience the non-deterministic nature of LLMs — understand how large language models generate output through probabilistic mechanisms rather than deterministic rules, and grasp the implications this has for reliability and reproducibility.
- Understand the challenges of LLM use in academic work — specifically the difficulties surrounding citation accuracy and hallucinated references, cognitive offloading (the risk of outsourcing critical thinking and learning to AI tools), and copyright infringement.
- Create structured design documents for learning natural science concepts and coding — using LLMs to scaffold and support the acquisition of technical and scientific knowledge and agentic workflows.
- Gain confidence in using LLMs in academic contexts — developing sound judgment about when their use is appropriate and beneficial, and when it is not.

Languages of Instruction:

Discussions and slides will be in English, communication in German is possible.

Course Materials:

Students are required to bring their own personal laptop or tablet.

Merkmale:

Responsible instructor:

Kathrin Fenner
Amedeo Caflisch

Requirements:

Assessment:

There will be three assignments, one following each session. Two of these will be discussed and evaluated in class through peer review and open discussion. The third and final assignment is submitted directly to the teaching assistants for evaluation.

Attendance and active participation at the three sessions are required.

All parts of the assessment are in English

Module Methodology and practice of linguistic research: Introduction to data collection, processing, and interpretation
06SM360p122 / Module

Description:

General description:

Linguistische Daten bilden in der akademischen Forschung und im Studium den zentralen Ausgangspunkt für wissenschaftliche Arbeiten. Entsprechend ist Wissen zur Erhebung und Verarbeitung von gesprochenen und/oder schriftlichen Sprachdaten essenziell für Studierende der Linguistik. Dieses Modul bietet eine Einführung in die unterschiedlichen Methoden, die mit der Erhebung, der Aufbereitung, der Anreicherung sowie der Auswertung von linguistisch relevanten Sprachdaten verbunden sind. Die theoretischen Diskussionen zu den unterschiedlichen Methoden werden durch praxisorientierte Übungen und Anwendungen ergänzt, so dass die Studierenden einen Einblick in den potenziellen Ablauf eines linguistischen Forschungsprojekts erhalten. Das Modul bietet entsprechend die Möglichkeit Kompetenzen zu erwerben, die sowohl im Studium als auch darüber hinaus eingesetzt werden können.

ECTS: 3

Learning Outcome:

Die Studierenden verfügen über das essenzielle Grundlagenwissen und die praktische Anwendungskennntnisse im Umgang mit linguistischen Daten. Sie sind in der Lage, diese Kompetenzen im Rahmen des Studiums (Seminar- und Qualifikationsarbeiten) sowie in der weiteren Karriere für die Planung und Durchführung eigener Projekte einzusetzen.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Guido Seiler

Requirements:

Prerequisites: Kenntnisse grundlegender linguistischer Konzepte.

Assessment: schriftliche Übungen

Die Studierenden lesen als Vorbereitung für die jeweiligen Sitzungen zur Methodik einen einführenden Text, der als Grundlage für die zu besprechenden Themen dient. Basierend auf dieser Grundlage sowie dem theoretischen Input und den praktischen Übungen in den Sitzungen simulieren die Studierenden ein Projekt mit Datenerhebung, -aufbereitung, -anreicherung und -auswertung. Insgesamt werden die Studierenden acht Beiträge erarbeiten, die Ende Semester gesammelt als Wiki-Eintrag auf OLAT eingereicht werden müssen. Zusätzlich müssen die Studierenden eine ca. 2-seitige Reflexion über die einzelnen Entscheidungen in ihrem fiktiven Projekt verfassen. Die finalen Projektskizzen stehen entsprechend allen Studierenden zur Verfügung. Bewertet wird der Wiki-Eintrag auf OLAT, der bis am 08.01.2027 eingereicht werden muss.

Module Appropriateness and correctness - norm(s) in language use

06SM360p132 / Module

Description:

General description:

Die Linguistik untersucht Sprache und sprachliches Handeln tendenziell deskriptiv. Gleichzeitig sind Sprachen regelhaft und haben eine normative Seite. Zudem ist Sprache unter der Perspektive des kommunikativen Handelns normativen Setzungen unterworfen. Im Seminar beschäftigen wir uns mit dem Status sprachlicher Normen und mit sprachlicher Variation auf lexikalischer, grammatischer und pragmatischer Ebene. Zwei relevante Umgebungen betrachten wir genauer: einerseits die Schule als Institution, die sprachliches Wissen und Können vermittelt und in der Normen eine besondere Rolle spielen, andererseits die durch digitale Medien geschaffene Kommunikationsumgebung, in der Sprache sehr heterogen verwendet wird. Ziel des Seminars ist es, Normen der wissenschaftlich distanzierten Reflexion zugänglich zu machen. Zudem soll das Seminar dazu anregen, sich von der Vorstellung eines vermeintlich einzig Richtigen zu lösen und Einsichten in die Variabilität von Sprache ermöglichen.

ECTS: 3

Learning Outcome:

Die Studierenden können grundlegende Konzepte der germanistischen Sprachwissenschaft selbständig darstellen und theoretische und methodische Aspekte der sprachwissenschaftlichen Beschäftigung mit dem Deutschen und seinen Varietäten in ihrer synchronen und/oder diachronen Dimension exemplarisch anwenden. Sie sind in der Lage, ihre Kenntnisse im Rahmen einer schriftlichen Arbeit in Bezug auf ausgewählte Fragestellungen umzusetzen.

Module Sharp Tongues, Opened Bodies. The «Lust-» and «Trauerspiele» by Andreas Gryphius

06SM360p124 / Module

Description:

General description:

Die Dramatik von Andreas Gryphius ist von Gewalt geprägt: von drastischer körperlicher Gewalt, aber auch von Sprach- und Bildgewalt; von scharfen Worten, überwältigenden Bildern, von komischer, bisweilen auch aggressiver Absurdität.

Im Kolloquium nähern wir uns den Lust- und Trauerspielen u.a. mit der Frage nach der Funktion von Gewalt und Aggressivität an. Wir setzen uns mit entsprechenden Forschungsansätzen auseinander und entwickeln in intensiver Lektüre unsere eigenen Interpretationen. Eine zentrale Rolle spielt dabei nicht nur das, was sprachlich vermittelt wird, sondern auch die Bühnen-Inszenierung, mit der sich Gryphius' Sprachbildlichkeit erst adäquat einordnen lässt.

ECTS: 3

Learning Outcome:

Die Studierenden verfügen über vertiefte Kenntnisse in einem spezifischen Teilgebiet der Älteren deutschen Literaturwissenschaft. Basierend auf dem aktuellen Stand der Forschung können sie eigene literaturgeschichtliche und -wissenschaftliche Fragestellungen bearbeiten und/oder in einem praxisbezogenen Zusammenhang darstellen.

Module Linguistics goes Citizen Science

06SM360p556 / Module

Description:

General description:

Unter den Bezeichnungen "Citizen Science" und "Partizipative Forschung" werden Forschungsformate gefasst, die auch Menschen ausserhalb der Universität als Mit-Forschende in die akademische Forschung einbeziehen. Auch in der Linguistik werden vermehrt Citizen Science-Projekte durchgeführt: Dialekt Sprecher:innen beteiligen sich an Dialektforschung, Schüler:innen und Lehrer:innen machen mit bei Forschungen zu Mehrsprachigkeit, zum Schreiben in der Schule oder zu spezifischen Unterrichtsformaten und Patient:innen werden in die Forschung zur Kommunikation in medizinischen Kontexten einbezogen.

Im Seminar werden wir uns mit zentralen Konzepten von Citizen Science und partizipativer Forschung befassen, über Chancen und Herausforderungen entsprechender Forschung diskutieren und Einblicke in aktuelle linguistische Citizen-Science-Projekte erhalten. Geplant sind dazu auch einzelne Gastvorträge aus laufenden linguistischen Forschungsprojekten.

Als Leistungsnachweis soll ein eigenes Citizen-Science-Projekt zu einer selbst gewählten linguistischen Fragestellung entworfen werden, in der Form einer schriftlichen Arbeit (SA).

ECTS: 6

Learning Outcome:

Die Studierenden verfügen über vertiefte Kenntnisse in einem spezifischen Teilgebiet der synchronen und/oder diachronen Sprachwissenschaft, die sie in einem praxisbezogenen Zusammenhang anwenden können.

Module Linguistic and Cultural Research II

06SM427-528 / Module

Description:

General description:

Este curso tiene dos fases que se reparten en dos semestres, una primera, de trabajo conjunto y de enseñanza presencial en el grupo, y una segunda, de trabajo individual de elaboración de un tema científico. En la primera parte, el tema se prepara mediante lecturas y ejercicios y se discuten aspectos presentados por los participantes en el pleno. No se trata solo de comprender un tema o un debate actual sino también de saber evaluar los alcances y límites de las aportaciones halladas en la bibliografía actual. El enfoque será de lingüística y cultura en un sentido amplio y el tema concreto varía de semestre en semestre. La redacción del trabajo de investigación particular servirá como paso previo a la preparación de la Tesis de Maestría.

ECTS: 9

Notes:

El seminario se ofrece cada dos semestres de otoño a partir del HS 2026.

Learning Outcome:

El objetivo de este curso es adquirir la capacidad de elaboración autónoma de un trabajo científico y conocer los requisitos metodológicos, formales y lingüísticos correspondientes. Para ello se adquirirán competencias de lectura crítica y de argumentación de conceptos teóricos sobre la base de conocimientos empíricos.

Module Reorienting Middle East Studies: Gulf Studies as Area Studies

06SM615p505 / Module

Description:

General description:

This master seminar reorients Middle East Studies by conceptualizing Gulf Studies as Area Studies within Political Science and International Relations. It responds to ongoing debates about the limits of universalist IR theory, the role of context-sensitive research, and the place of Area Studies in contemporary political analysis.

Rather than approaching the Gulf as a marginal subregion or as a set of empirical anomalies, the seminar treats it as a theoretically productive site for examining core IR concerns: state formation, legitimacy, foreign policy behavior, regional order, and international positioning. The Gulf is thus not studied as an exception to theory, but as a region whose political dynamics challenge, refine, and inform IR concepts.

At the same time, the seminar explicitly addresses the conditions under which knowledge about the Gulf is produced. Moving beyond a narrow focus on Eurocentrism, it introduces students to the contemporary political economy of Gulf Studies, including the role of funding structures, institutional affiliations, access, and policy relevance. This dimension is treated analytically and reflexively, as a foundational issue shaping theory, method, and scholarly practice, rather than as an empirical object of rivalry or foreign policy analysis.

The seminar is anchored in Middle East and Gulf Studies and guided by the framework of contextual realism, which foregrounds the interaction between state formation, domestic legitimacy, regional dynamics, and international structures. This approach enables students to link internal political logics to external behavior while remaining attentive to context, history, and power.

ECTS: 6

Notes:

Thematic Structure

Block I: Gulf Studies, IR, and Knowledge Production (Foundational)

- Area Studies and International Relations: tensions and complementarities
- Theory export, abstraction, and context in IR
- From Eurocentrism to contemporary structures of academic power
- Funding, access, and agenda-setting in Gulf-focused research
- What constitutes rigor and autonomy in Gulf Studies?

Purpose:

To establish a shared analytical framework and reflexive awareness that informs the rest of the seminar.

Block II: State Formation, Legitimacy, and Political Authority in the Gulf

- Historical trajectories of state formation
- Regime legitimacy and governance strategies
- Domestic political logics and elite structures
- Contextual realism as a framework for political analysis

Purpose:

To provide conceptual tools for explaining Gulf politics without exceptionalism or determinism.

Block III: Regional Order and Influence in Conceptual Perspective

- The Gulf as a regional system
- Concepts of influence, hierarchy, and alignment
- Mediation, cooperation, interference, and competition as ideal types

- GCC dynamics as a problem of regional order

Purpose:

To analyze regional politics at a conceptual level, without overlapping with detailed rivalry case studies.

Block IV: The Gulf in International and Transregional Contexts

- The Gulf in a multipolar international system
- Regional actors and global positioning
- Transregional engagement as a function of state capacity and legitimacy
- Linking domestic politics, regional order, and international roles

Purpose:

To connect Gulf Studies to core IR debates while maintaining an Area Studies perspective.

4. Methodological Focus

The seminar highlight qualitative methods central to Political Science and IR, adapted to Area Studies:

- Qualitative foreign policy analysis
- Process tracing at the conceptual level
- Comparative analysis of political systems
- Discourse analysis of elite narratives and policy texts
- Reflexive engagement with sources, access, and positionality

Students are encouraged to reflect on how methodological choices shape theory building, explanation, and causal claims in IR.

Learning Outcome:

Intended Learning Outcomes

By the end of the seminar, students will be able to:

Theoretical Competence

- Explain and critically assess major IR approaches in relation to Gulf politics
- Evaluate the contribution of Area Studies to theory development in IR

Analytical Skills

- Analyze Gulf political dynamics through concepts of state formation, legitimacy, and regional order
- Apply contextual realism to regionally grounded political analysis

Research Competence

- Design a qualitative research project situated at the intersection of IR and Gulf Studies
- Produce an analytically rigorous paper that reflects theoretical awareness and methodological reflexivity

Module Revolutions and Uprisings in the Past, Present, and Future: A Contextual Reappraisal

06SM615p507 / Module

Description:

General description:

Revolutions have shaped modern history—from the storming of the Bastille to the Arab Uprisings and the ongoing struggles in Tehran, Caracas, and beyond. This seminar, co-taught by Prof. Dr. Elham Manea and PD Dr. Stephan Kux, offers a critical, multi-theoretical, and comparative examination of revolutionary movements, their causes, outcomes, and long-term consequences.

Combining classical theory with new empirical insights, we explore revolutions through the lens of Contextual Realism, a framework that bridges materialist and ideational analyses. Special attention is paid to how global, regional, and local dynamics intersect in revolutionary crises, particularly in the Middle East.

The Master course will be enriched through guest lectures, and an optional research field trip to Tunisia or Syria in winter 2026, subject to security conditions.

ECTS: 6

Learning Outcome:

Learning Objectives

- Distinguish and critically assess classical and contemporary theories of revolution.
- Analyze uprisings through theoretical frameworks including Contextual Realism.
- Compare revolutionary outcomes in historical and contemporary contexts.
- Apply hypothetically theories and models of revolution to possible future cases.
- Integrate academic and field-based insights into independent research projects.
- Collaborate with peers and scholars across disciplines and institutions.

Module Diaspora, Nation, and Belonging in South Asia

06SM330p269 / Module

Description:

General description:

There are approximately 20,000,000 people of South Asian origin living outside of India, Pakistan and Bangladesh. The majority have settled in Africa, the Caribbean, and Oceania, but there are also substantial South Asian communities - including Punjabi, Gujarati, Tamil, and Bengali ones - across Europe and North America. In these various settings, South Asians have created diasporic communities that often retain strong cultural and religious connections with their regions of origin. This course examines both historical and contemporary processes of South Asian migration and diaspora formation. It is relevant not only for students interested in South Asia but also for those interested in contemporary political and scholarly debates on migration and multi-culturalism.

Description:

General description:

The aim of this course is to discuss and advance the PhD projects the students are working on. A short session is devoted to the presentation of each thesis project. In the remaining sessions, some of the individual projects are presented and discussed at length.

Presenting students submit their paper one week in advance so that the plenary has enough time to read and comment on them. In their oral presentations students highlight particular issues they would like to discuss.

Students are supposed to present their work at the beginning of their project (before field research) and at an advanced stage (after their field research).

At least two of the four professors will be present, depending on the topics to be presented.

Module Democracy Goes to School: Deliberation and Citizenship Education

06SMG94p101 / Module

Description:

General description:

The Doctoral Programme Democracy Studies organizes this workshop in collaboration with the ZDA and the School of Education of the University of Applied Sciences Northwestern Switzerland PH/FHNW. Pupils of today are active citizens of tomorrow. Yet political education in schools has received little attention in the Swiss educational system. The Center for Democracy Aarau (ZDA) has been committed to promoting civic education through extracurricular programs and teacher training. This workshop wants to give insight into democracy learning and teaching political values to younger generations.

Day 1 (Friday, 13 November)

The first day of the workshop will be held at the Institute of Political Science UZH with a seminar by Monika Waldis (ZDA and PH/FHNW) on the current state and challenges of civic education in the Swiss school system.

Day 2 (Tuesday, 24 November)

On the second day of the workshop, participants will have the chance to engage directly and will get involved in the «SpielPolitik!» Schulenach Bern // Die Politiksimulation im Bundeshaus simulation game.

"SpielPolitik!" aims to promote students' political education and offer them insights into the functioning of national politics and the active discussion of their concerns. In their classes, pupils in 8th or 9th grade prepare initiatives to be proposed. Then the debate on these initiatives takes place in Berne for two days. Pupils take on the role of national politicians debating in commission meetings and party meetings. The final debate is held in the Swiss parliament in the federal building.

Module Publication Seminar

06SMG94p102 / Module

Description:

General description:

The publication seminar exposes PhD students to the research from more established researchers and shows them how the research and publication processes function in political science.

To earn ECTS, the idea is that you attend the seminar throughout the term exactly as everyone else but in addition fulfill two specific conditions in order to receive credits:

1. Regular attendance, i.e., at least attendance in 2/3 of the sessions throughout the term.
2. Written feedback for three papers of your choice. The idea is here to write an at least 1-2 page review of each paper that also explicitly discusses a potential publication strategy. This review has to be sent to both Silja Häusermann and Karsten Donnay prior to the respective seminar session.

ECTS: 1

Notes:

Open for PhDs, Postdocs and Faculty.

Learning Outcome:

To learn how research projects are organized and translated into publications. To learn how the publication process works and how to deal with reviews and rejections.

Module Theories in Political Science PhD

06SMG94p105 / Module

Description:

General description:

To conduct research successfully, and to ultimately become productive academics, PhD students must engage with a wide range of literatures cutting across various subfields within political science. Ideas often come from unexpected places and students who focus too narrowly too early are less able to engage in the big questions that drive the discipline, and social science more generally. A broad understanding of the foundational works in political science across different subfields is necessary. This module exposes students to a wide variety of topics and literatures to assist them in developing research questions and theoretical approaches as they engage with their own research.

Scientific articles and books in field of political science will be used.

ECTS: 1

Notes:

Room: AFL-H-376

Registration via e-mail to doreen.spoerer-wagner@phil.uzh.ch not later than August 31, 2026.

Learning Outcome:

Develop understanding of various subfields within political science. Build knowledge necessary to engage in theory building and engage in independent research. Develop the ability to quickly read, process and critique scientific literature. Develop the ability to find links across different literatures and identify gaps in research.

Module Introduction to Programming and Computational Thinking

10SMSTS-606 / Module

Description:

General description:

This course provides students of all disciplines with a practical introduction to computational thinking using Scratch and Python. Students learn how to analyze real-world problems and workflows using computational thinking, breaking them down into manageable steps. Students begin in Scratch to learn foundational ideas such as variables, loops, and conditionals without focusing on syntax. They then transfer these concepts to Python to systematically break down problems, design step-by-step solutions, and implement them in code.

The lecture content is deepened through hands-on examples and interactive exercises. Regular assignments and group projects support practice in designing, testing, and maintaining programs, including basic version control with Git, while strengthening collaboration and communication skills.

ECTS: 4

Notes:

This is a beginner-level course; no prior programming experience is expected.

Students must bring a laptop suitable for programming (Windows/macOS) to class. Tablets are not sufficient, even with an on-screen keyboard.

Sessions will not be recorded; regular on-site attendance is expected.

The final grade will be determined based on a written exam. Students may earn a bonus of +0.25 on their passed exam grade (minimum exam grade 4.0) by successfully completing at least 4 out of 5 assignments during the semester. Participation in the assignments is voluntary. Of the five assignments, three are completed individually and two are completed in groups, depending on the task.

The bonus is applied only if the exam is passed and cannot be used to compensate for a failed exam.

Learning Outcome:

- Understand programming concepts such as variables, data types, functions, loops, and conditionals, starting in Scratch and then transferring these ideas to Python
- Be able to write code that uses Python's syntax, control flow constructs, data structures, and file input/output mechanisms, including reading from and writing to text and CSV files.
- Understand the basics of algorithms and computational thinking, and how these principles are applied to solve problems in computer science and to identify tasks that are suitable for automation.
- Break down complex problems into smaller, manageable components and use algorithmic approaches to design solutions.
- Apply object-oriented programming concepts such as classes, objects, and simple inheritance to structure programs effectively.
- Learn fundamental practices for code maintenance and using Git for version control.
- Collaborate in group projects to develop programs while improving communication and teamwork skills.

Target Groups:

Bachelor, Master

Merkmale:

Target Group: Suitable for English Speakers

Requirements:

Prerequisites: Basic mathematical knowledge from the general qualification for university entrance (Matura) and a firm grasp of using a computer running a common operating system (MacOS or Windows) are required.
No pre-existing programming skills are expected.

Assessment: The exam takes place on 11.01.2027 15:00-17:00, on-site. It will be held either as a Bring Your Own Device (BYOD) online exam or as a paper-and-pencil exam; the format will be communicated later.

If the exam is held as a BYOD online exam, you must bring your own laptop. The exam cannot be taken on tablets. You may be required to install the Safe Exam Browser (SEB). Online exam supervision (proctoring) may be used; by booking the module, you agree to this possibility.

There is no repeat exam within the same semester. Students who do not pass must book the course again in a subsequent semester.
