Module GEO 704 Glaciological Excursion to Rhonegletscher

07SMGEO704 / Field Trip

Description:

General description:

This module gives a hands-on introduction into current topics of glacier and high mountain research. It is split in three parts: a preparatory session, a field excursion to Rhonegletscher, and project work. The field excursion provides the opportunity to take a closer look at processes on, within, under and in vicinity of the glacier. These processes include micro-structure of ice, ice deformation, glacier hydrology, glacier mass balance, long-term glacier changes and periglacial processes such as moraine formation/erosion, and proglacial lake and fluvial systems.

ECTS: 1

Notes:

- Preparatory Seminar at Irchel Campus: 15.09.2026, 9:00-12:00 h.
 - Glaciological Excursion to Rhonegletscher: 16.09.2026, 7:00-20:00 h. Field Excursion Report (4 pages) due at end of September.

Module Scientific Visualisation in R

07SMBIOGPPS / Seminar

Description:

General description:

Visualisations can decide about the success of scientific lectures, poster presentations or journal articles. In this course you will get a very brief introduction into general design principles and guidelines for data visualisations. Based on this theoretical framework we will spend most of the course time to learn how to use R as a powerful graphical software to create a wide range of customised graphics that include - but are not limited to - traditional scatter plots, bar plots, mosaic plots, box plots, density plots, violin plots, and interactive graphics as well as grid-based geographic maps and state-of-the-art multipanel conditioning plots (and many more). You will learn about the two pillars of the R graphics systems, i.e. Traditional and Grid graphics. The course focuses on the latter system and more recent developments such as ggplot2 and other advanced libraries based on the "The grammar of graphics"-concept. Depending on the course progress, there will be scope for students to work on small projects and / or their own data sets.

Module BIO 691 Teaching advanced microscopy for Life Science

07SMBIO691 / Block Course

Description:

General description:

Microscopy is becoming an essential key method for qualitative and quantitative analysis of biological samples. 3 dimensional microscopy data more and more contributes to accurate models in Life Science. But research involving microscopy requires an exhaustive training of the scientist. Basic knowledge as well as the proper handling of advance instruments are needed to achieve relevant and artefact-free results.

Training scientist at the microscopes is a crucial part of this process.

We propose to qualify PhD students with an already good understanding of microscopy to teach scientist at advanced microscopes of the Center for Microscopy and Image Analysis and to assist teaching in microscopy courses.

ECTS: 1

Notes:

PhD students taking this course will attend an introductory course (1 day) and then contribute to teaching microscopy in courses and to new users at the microscopy core facility, which counts towards their teaching hours required by the Faculty of Science.

Train/teach new users at the microscopy core facility to use the microscopes involves:

Explain the basics parts of the microscope.

Explain how to acquire images taking into account the sample, the question to be answered and the limitations and possible artefacts. Test the performance of the scientists and evaluate whether they have learned it.

Participation/teaching in courses involves: Assist teachers in the lectures and teach short topics.

Teach basic concepts and explain the basics parts of the microscopes.

Teach image acquisition and image analysis.

After completion of these teaching activities, the students will write a reflection on their teaching experiences, which will then be credited as an assessment of this module.

Learning Outcome:

1. Teach basic and advanced microscopy concepts
2. Teach to operate light and / or electron microscopes for the acquisition of scientifically relevant data
3. Identify the optimal microscopic method for a given project
4. Provide expert advice to researches regarding the optimal microscopy method
5. To be able to identify artefacts occurring during preparation and imaging of samples

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

José Maria Mateos Melero

Requirements:

Prerequisites:

1. Candidates must use microscopy as one of the key techniques during the PhD project.
2. Candidates should attend one of the following courses: Bio

416-Microscopy; Bio 407-Applied microscopy; Winterschool Microscopy course or present a certificate of attendance of similar course / lecture. Contact module responsible for discussing these pre-requisites.

Module ESC 401 High Performance Computing

07SMESC401 / Course

Description:

General description:

This survey course covers the basics of High Performance Computing, starting with an introduction to the architecture of supercomputers, the Unix/Linux operating system and how to use a terminal emulator to connect remotely. We then review the basics of code editing, version control and compiling. We will present in detail how to make job submission scripts for SLURM, a widely used batch control system. After learning how to compile a code with the Message Passing Interface (MPI) library and OpenMP we will cover more advanced aspects of compilation and optimisation, and learn how to launch a parallel program on the different university clusters and supercomputers.

Next we will present in detail how to program a parallel code using both MPI and OpenMP and describe both the hardware and software specifics of parallel computing. We will also present the MapReduce parallel computing paradigm, and apply it to the ScienceCloud computing infrastructure at the University. We will learn about different parallel computing strategies and their tradeoffs. Finally we will introduce the concept of GPU programming using both the CUDA programming language and the OpenACC library.

ECTS: 6

Learning Outcome:

At the end of this course students will have a basic understanding of High Performance Computing (HPC) tools and techniques. They will have been exposed to the important types of hardware including multicore and GPU nodes, massively parallel clusters, and cloud computing infrastructure. They will also have a basic understanding of the software tools available for HPC, including BASH scripting, the MPI, OpenMP and OpenACC libraries, and the CUDA programming language.

Throughout the course the students will have used each of the techniques presented as part of the exercises.

Module GEO 837 Geographies of Environmental Governance

07SMGEO837 / Lecture with Practical Exercises

Description:

General description:

The course provides an overview of dominant and emerging trends in the theory and practice of environmental governance. The course addresses environmental issues as policy problems and explores how the environment is regulated, controlled, and contested by a range of actors and institutions. The course focuses on the spatial dimension of environmental change and uses key concepts from geography (scale, region, network) to advance environmental governance thinking.

ECTS: 3

Notes:

The Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 11; 13; 15; 16 & 17

Learning Outcome:

Course participants will develop a theoretically as well as practically informed understanding of recent issues and debates in contemporary geographies of environmental governance.

Target Groups:

Master Geographie

Languages of Instruction:

Course Materials:

Copies of mandatory readings and lecture slides will be provided via OLAT.

Merkmale:

Responsible instructor:

Marco Pütz

Requirements:

Prerequisites:

Students are expected to attend lectures regularly and to actively participate in discussions and group work.

Assessment:

The module assessment consists of a written home assignment completed individually. The written paper must not exceed nine pages or 3,000 words (word count to be indicated at the end of the paper) and should include a title page, author name, headings, main text, as well as any figures, tables, and references.

The home assignment is graded on a scale of 1 to 6 in quarter-point increments. There is no opportunity to retake the assessment; if the home assignment is graded as insufficient, the module may be repeated the following year.

During the course, students work in small groups of 3–4 persons on case studies in environmental governance and prepare a short input presentation for the plenary.

Module Herz-Pathologie-Präparate Demonstration

04SMMED18001 / Course

Description:

ECTS: 0

Learning Outcome:

Im Rahmen dieser Lehrveranstaltung werden verschiedene Herz-Pathologie- Präparate demonstriert sowie der klinische Kontext erläutert.

Das Ziel dieser Lehrveranstaltung ist es dem Studenten einen vertieften Einblick in die Anatomie und Pathophysiologie verschiedenster Krankheitsformen im wichtigen Bereich der Kardiologie zu geben. Dabei werden die Krankheitsbilder besprochen und mit Hilfe moderner nicht- invasiver Bilder (u.a. Herz-Ultraschall, Herz-MRI und Herz-CT) veranschaulicht. Ergänzend werden die entsprechenden Pathologie- Präparate im Detail gezeigt und die krankheitsspezifischen Veränderungen erklärt.

Es werden aktuelle explantierte Herzen und Autopsie-Herzen aus der Klinik sowie verschiedene Herz-Präparate aus einer grossen Pathologie- Sammlung des UniversitätsSpitals Zürich (welche unter anderem auch anlässlich der Medizinstudium-Prüfungen verwendet wird) gezeigt und besprochen.

Der Unterrichtsform ist als Vorlesung (Kurs) mit der Möglichkeit für eine intensive Interaktion gedacht, so dass die Studenten möglichst viel vom Wissen der Kliniker profitieren können.

Learning Outcome:

Veranstaltungsbeschreibung: (Lerninhalte / Lernziele / Unterrichtsformate / Prüfungsform)

Die kardiale Auskultation ist ein wichtiger Baustein der körperlichen Untersuchung und kann nicht genug geübt werden. Nach dem Auskultationskurs am Phantom im 3. Jahr und der zwischenzeitlich erfolgten Erfahrung an Patient:innen soll in diesem Kurs Anhand von 4 Patient:innen mit typischen Auskultationsbefunden die Auskultationssystematik und -technik repetiert und vertieft werden.

Basierend auf den Auskultationsbefunden wird anschliessend mit dem:r Tutor:in eine Differentialdiagnose hergeleitet. Diese wird mittels Echokardiographie (Demonstration von wenigen aber typischen Befunden) anatomisch unterlegt. Damit soll 'Gehörtes' mit 'Gesehenem' gebracht werden. Die Diskussion über therapeutischen Konsequenzen wird kurz gehalten, da explizit nicht Schwerpunkt dieses praktischen Kurses.

Module BIO 258 Cancer, Immunotherapy, and Inflammation Research

07SMBIO258 / Block Course

Description:

General description:

Despite major therapeutic developments, cancer remains one of the leading causes of death worldwide. The recent advent of immunotherapies has brought hope for cure and survival for patients suffering from various cancers. These therapies are aimed at boosting patients' immune system in order to enhance recognition and elimination of cancer cells. However, a significant proportion of the patients do not respond to the treatment and there is currently no way to predict for whom it will work or not. Furthermore, since these drugs are designed to modulate the immune system, they can induce autoimmune and immune effector cell-associated adverse effects, which, if not managed correctly, could lead to treatment discontinuation. Those autoimmune events result in inflammation mainly in the intestinal tract, particularly the colon. During this course, the students will gain insight into translational research; focusing on the analysis of patients' biopsies, cancer cell lines, genetically engineered T cells, and mouse samples through molecular and cellular biology techniques, in order to answer crucial clinical questions.

ECTS: 6

Notes:

DIE ANMELDUNG FÜR DIE BLOCKKURSE ERFOLGT UNTER <https://www.mybiportal.uzh.ch>

Learning Outcome:

On completion of the module the student should be able to:

- Explain the basic principle of immunotherapies (mainly anti-CTLA4, anti-PD1 and adoptive CAR T-cell therapy) and the related adverse events (AEs)
- Explain the principles of clinical trial design
- Describe the factors involved in the design of an experiment involving patient-derived material (inclusion criteria, availability of the samples, controls, data collection, various biases)
- Describe the different methods used to analyse patients' biopsies, cell lines, and mouse tissue samples.
- Conduct experiments to identify different types of markers in patient and mouse samples.
- Culture and perform experiments on cancer cell lines
- Perform cell-mediated cytotoxicity assays
- Perform basic techniques in molecular and cellular biology
- Obtain insight into mouse models of intestinal inflammation and colitis-associated colorectal cancer

Key skills

On completion of the module the student should be able to:

- Critically assess experimental plan involving patient-derived material. Address the potential caveats.
- Draw conclusions from experimental results and propose validation studies
- Discuss pros and cons of different techniques used during the course
- Judge the relevance and necessity of mouse experiments
- Culture and perform experiments on cancer cell lines
- Perform cell-mediated cytotoxicity assays

Die Art der Durchführung im HS 2021 wird vor Semesterbeginn bekanntgegeben.

Learning Outcome:

Nach erfolgreicher Teilnahme am Modul sollen die Studierenden in der Lage sein

- die Moleküle des Lebens aufzulisten und aufzuzeichnen, wie diese produziert werden
 - zu erklären, welche Informationen im Genom vorhanden sind und wie diese abgelesen, übersetzt und verwendet, sowie auch wie sie vererbt werden
 - zu verstehen warum das Genom im Prozess der Evolution verändert wird, sowie zu begründen warum Gene verschiedener Arten konserviert sind
 - zu erklären wie eine Zelle aufgebaut ist und wie die wichtigsten Prozesse des Zellhaushalts funktionieren (Photosynthese und Atmung, Wasser- und Nährstoffhaushalt, Stickstoffkreislauf, Signale und deren Auswirkungen sowie Seneszenz und Apoptose)
 - aufzulisten wie unsere wichtigsten Organe funktionieren und wie Reize mit unseren Sinnen wahrgenommen werden
 - darzulegen wie das Verhalten die Überlebenschancen einer Art mitbestimmt
 - aufzuzeigen wie Arten und Ökosysteme in einem sich ändernden Planeten entstehen
- Überfachliche Kompetenzen Nach erfolgreicher Teilnahme am Modul sollen die Studierenden in der Lage sein

Module Forschungskolloquium Aufmerksamkeitsdefizit / Hyperaktivitätsstörung (ADHS)

04SMPSY18017 / Seminar

Description:

ECTS: 1

Notes:

Kontakt-E-Mail:

Anna.Buadze@puk.zh.ch

Learning Outcome:

Aufbauend auf die im Mantelstudium vermittelten einführenden Inhalte zum Thema Aufmerksamkeitsdefizit/Hyperaktivitätsstörung (ADHS) soll dieses monatlich angebotene Seminar, Studenten auf Masterstufe an Forschungsfragen in diesem spezifischen Themenbereich heranführen.

Vermittelt werden sollen somit forschungsmethodische (quantitative, qualitative, mixed-method Ansätze) und forschungspraktische Inhalte (Literaturrecherche, ethische Überlegungen, Organisation und Arbeitsweise von Ethikkommission, HFG). Interessierten Studenten steht dabei sowohl die Mitarbeit an (schon bestehenden) interdisziplinären Forschungsprojekten offen oder die Entwicklung eines eigenen Ansatzes, der dann in Form einer Masterarbeit unter Betreuung der Dozierenden begonnen und abgeschlossen werden kann. Grundsätzlich sollen die Studierenden nach Teilnahme am Seminar über vertiefte Kenntnisse im spezifischen Störungsbereich verfügen, aber auch in der Lage sein, erworbenes forschungsmethodisches und forschungspraktisches Wissen in anderen neurowissenschaftlichen Fächern zur Anwendung zu bringen.

Profitieren können die Teilnehmer dabei von einem interdisziplinären (Neurobiologie, Allgemeinpsychiatrie und Forensische Psychiatrie) und interfakultärem (Uni Zürich, Uni Bern, ETH Zürich) Dozententeam. Am Ende des Seminars wird eine ca. 20 minütige mündliche Prüfung abgenommen.

05SMFWB134 / Seminar

Description:

General description:

Im Rahmen dieses dreitägigen Seminars haben die Studierenden die Gelegenheit, sich anhand von veterinärmedizinischen Fallbeispielen mit ethischen Dilemmata zu beschäftigen. Neben dem Erkennen und Beschreiben des ethischen Dilemmas und der zugrundeliegenden ethischen Frage, geht es auch um die Differenzierung zwischen ethischen und rechtlichen Fragen. Dabei gewinnen die Studierenden einen Einblick in ethische Theorien und wenden verschiedene ethische tools an. Sie können ein Poster zur ethischen Dimension eines tiermedizinischen Dilemmas erstellen und präsentieren. Anhand verschiedener vorgestellter Haltungen Tieren gegenüber, haben sie die Gelegenheit, ihr eigenes Verhältnis zu Tieren zu reflektieren.

Module BIO 556 Scientific Writing for Organismal Biologists

07SMBIO556 / Lecture with Practical Exercises

Description:

General description:

Scientific writing is essential to communicating research and to making your research accessible to other scientists. Yet, successful scientific writing requires not only mastering the English language, but also rules and conventions that determine the structure of a scientific publication.

In this course, we will guide the students through the different sections of a scientific paper, and illustrate what a writer needs to know to effectively communicate and structure a text (within sentences, paragraphs and sections of a scientific publication). Exercises during the lectures will help students to familiarise themselves with scientific writing guidelines. Students will further be asked to write up sections of their own thesis during the course; they will receive feedback from their peers and from the lecturers, and will be asked to give feedback on the writing of other students taking the course. Thereby, students will enhance their scientific writing skills and gain experience and confidence in communicating their science.

ECTS: 3

Notes:

Registration until September 1st by email: ursina.tobler@ieu.uzh.ch. The course will be held in Y13-J-51.

Learning Outcome:

By the end of this course, students are able to

- follow guidelines and conventions of scientific writing
- write a scientific text for publication in a scientific journal
- write reviews of other peoples' work

Module From Idea to Product: Developing a Media-Based Learning Experience for (Foreign) Language Education
06SM090MgL / Module

Description:

General description:

Dieses Seminar richtet sich an angehende (Fremd-)Sprachenlehrpersonen, aber auch Studierende weiterer Fächer, die einen interdisziplinären Ansatz mit einem Sprachfach verfolgen möchten. Auf der Grundlage von Modellen des Instructional Design und Methoden des Projektmanagements planen und entwickeln Sie eine längere Unterrichtssequenz, die nicht nur fachliche, sondern auch überfachliche und transversale Lernziele erreicht - ganz im Sinne des neuen Rahmenlehrplans. Bei dieser anspruchsvollen Aufgabe werden Sie von einer erfahrenen Lehrmittelautorin begleitet. Die Teilnahme an diesem Seminar erfordert Kreativität, Freude an der praktischen Arbeit und Durchhaltevermögen - belohnt werden Sie mit Unterrichtsmaterialien, die Sie selbst einsetzen und weitergeben können. Dabei entwickeln Sie das Mindset, das für Schulentwicklungsprojekte (z.B. Innovationsfonds des Digital Learning Hub) erforderlich ist und erhalten Einblick in aktuelle Fragen der Lehrmittelentwicklung.

Module Voice Analysis

06SM523-527 / Module

Description:

General description:

The human voice is a highly complex instrument that produces intricate communicative signals (vocalising).

Vocalising involves approximately

200 muscles working together within the vocal apparatus. Understanding how these signals are produced requires knowledge of both the anatomy and physiology of the vocal tract and larynx, as well as the role of articulatory muscles. In this course, you will explore various methods used to study voice production, including laryngography and laryngoscopy (examining vocal fold movement), electromagnetic articulography and ultrasound (tracking articulator movements), pharyngometry (analyzing vocal tract dimensions), myography (measuring muscle activity during vocalization), and respiratory tracing (monitoring breathing patterns while speaking). You will also examine how voice production relates to the acoustic signal and the communicative information it conveys and we will look at some use cases such as voice recognition. All these methods are available through the Linguistic Research Infrastructure (LiRI), with which we will collaborate closely.

ECTS: 6

Learning Outcome:

Main objectives of this cross-disciplinary seminar are to understand (1) methods for measuring voice production (2) how different communicative information is encoded in voice (3) how the knowledge about information in voice can be applied in voice technology or forensic voice analysis, for example.

Module Practical Training In-House

06SM523-131 / Module

Description:

General description:

This module provides students with practical experience in scientific project work. Activities include reading research literature, preparing and annotating data, applying statistical and machine learning methods, and contributing to workshop and conference papers. Students work on a defined subproblem within a scientific project.

This module can be booked with 6 or 9 ECTS points, determined in consultation with the module coordinator.

ECTS: 6

Notes:

Students must independently find a supervisor at the Department of Computational Linguistics. Students will usually contact lecturers whose courses they have previously completed in order to inquire about possible involvement in a related project. There is no entitlement to an internal internship.

If the internship is carried out outside the Department of Computational Linguistics, students must contact the module coordinator by email before the internship begins and provide details of the organization as well as their planned role, in order to clarify whether the internship can be credited to the study program. If the project is supervised by a person who works at the Department of Computational Linguistics or teaches in the study program, no prior clarification by the module coordinator is required.

After completion of the internship, the supervisor sends an email to the module coordinator containing the following information:

- (1) full name
- (2) matriculation number
- (3) degree program
- (4) module number 06SM523-131
- (5) student's area of work
- (6) number of ECTS credits awarded (6 or 9)

A workload of 180 hours is required for 6 ECTS credits, and a workload of 270 hours is required for 9 ECTS credits.

The module is then booked by the module coordinator for the semester in which the main part of the work was carried out and recorded as passed. Self-enrollment via the booking tool is not possible. The internship may begin before the official start of the semester.

Learning Outcome:

Students can:

1. gain practical experience in research.
2. read scientific literature.
3. contribute to evaluation processes.
4. complete assigned project tasks.
5. contribute to preparing scientific publications.
6. deepen topic-specific skills.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor: Simon Clematide

Requirements:

Prerequisites: This module cannot be booked by the students themselves, the booking has to be authorized by the module coordinator. There is no entitlement to this module, the module will only be offered if a suitable position is available in a project. The requirements will be defined according to the topic.

Module Advanced Techniques of Machine Translation

06SM523-501 / Module

Description:

General description:

In this course we present and experience the latest research in Machine Translation. Topics include building and evaluating Machine Translation systems, and integrating the systems into various application scenarios. We take a broad perspective and look at Machine Translation for different language situations (written, spoken, and signed language). And we take a deep perspective by studying the underlying linguistic knowledge sources and statistical techniques in detail.

ECTS: 6

Learning Outcome:

The students (1) will be acquainted with the latest research and developments in Machine Translation (2) will learn how to build Machine Translation systems with state-of-the-art performance (3) will learn how to perform Machine Translation experiments and publish the results

Module Practical Training In-House

06SM523-510 / Module

Description:

General description:

In this module, the students get in touch with scientific project work, that is, they learn how to do basic research. In order to accomplish these kind of skills, they read scientific literature, prepare and annotate data, apply statistical and machine learning methods to solve particular problems. They are also involved in the preparation of articles for workshops and conferences. The students work on a particular (partial) problem in a scientific context or even running project. This module can be booked to credit work done in a scientific project at the UZH. This module can be booked with 6 or 9 ECTS points. The amount of points will be decided in consultation with the module coordinator.

ECTS: 6

Notes:

Students must independently find a supervisor at the Department of Computational Linguistics. Students will usually contact lecturers whose courses they have previously completed in order to inquire about possible involvement in a related project. There is no entitlement to an internal internship.

If the internship is carried out outside the Department of Computational Linguistics, students must contact the module coordinator by email before the internship begins and provide details of the organization as well as their planned role, in order to clarify whether the internship can be credited to the study program. If the project is supervised by a person who works at the Department of Computational Linguistics or teaches in the study program, no prior clarification by the module coordinator is required.

After completion of the internship, the supervisor sends an email to the module coordinator containing the following information:

- (1) full name
- (2) matriculation number
- (3) degree program
- (4) module number 06SM523-510
- (5) student's area of work
- (6) number of ECTS credits awarded (6 or 9)

A workload of 180 hours is required for 6 ECTS credits, and a workload of 270 hours is required for 9 ECTS credits.

The module is then booked by the module coordinator for the semester in which the main part of the work was carried out and recorded as passed. Self-enrollment via the booking tool is not possible. The internship may begin before the official start of the semester.

Learning Outcome:

The students (1) get in touch with research (2) read scientific literature (3) are involved in evaluation processes (4) take over particular tasks in the context of a project (5) are involved in the preparation of articles (6) get insights into practical work (7) deepen their knowledge and skills with respect to a particular topic

Requirements:

Prerequisites: This module cannot be booked by the students themselves, the booking has to be authorized by the module coordinator. There is no entitlement to this module, the module will only be offered if a suitable position is available in a project. The requirements will be defined according to the topic.

Module Practical Training Off-Site

06SM523-511 / Module

Description:

General description:

The students gain experience in the application of computational linguistics. They get in touch with the structures and procedures of companies and are involved into the realisation of software in order to solve particular problems of these companies. The students apply what they have learned and adapt it to the needs of a specific commercial sector. Practical Trainings Off-Site are usually stays at companies or public organizations that are involved with Natural Language Processing. The training has to have a relation to Natural Language Processing and they have to be organized autonomously. This module can be booked with 3 or 6 ECTS points. The amount of points will be decided in consultation with the module coordinator.

ECTS: 6

Notes:

Students who have successfully completed the first semester and fulfilled all additional requirements may complete an external internship. Students must independently find an internship placement. Before the internship begins, they must contact the module coordinator by email and provide information about the organization, their role, and the planned tasks in order to clarify whether the internship can be accepted for credit.

After completing the internship, students must send an email to the module coordinator containing the following information:

- (1) full name
- (2) matriculation number
- (3) degree program
- (4) module number 06SM523-511

Two PDF documents must be attached:

- (A) an official confirmation from the organization stating the student's name, the internship period, and the total number of working hours completed (minimum 90 hours for 3 ECTS credits, 180 hours for 6 ECTS credits)
- (B) a report written by the student (500-1000 words; approx. 1-2 pages) describing the tasks carried out, the results, and the main learning outcomes

The module is then booked by the module coordinator for the semester in which the main part of the work was carried out and recorded as passed. Self-enrollment via the booking tool is not possible. The internship may begin before the official start of the semester.

Learning Outcome:

The students (1) get in touch with language technology companies (2) learn to connect theory and practical work (3) get to know the structures and processes of companies (4) apply what they have learned (5) broaden their knowledge of practical issues

Module Programming Project

06SM523-512 / Module

Description:

General description:

Programming projects aim at the consolidation of programming and the acquisition of software engineering skills. Starting with a particular research question and relevant literature, they work on a solution, define milestones, acquire and/or annotate data, implement a program and evaluate it using appropriate data. This module can be booked to credit work done in a programming project. This module can be booked with 3, 6 or 9 ECTS points. The amount of points will be decided in consultation with the module coordinator.

ECTS: 6

Notes:

Students must independently find a supervisor at the Department of Computational Linguistics. They may either propose their own topic or work on a predefined topic. If a programming project is carried out outside the department, the student must contact the module coordinator by email before the project begins and provide the supervisor's details (full name, position, email address) together with the project topic, so that it can be clarified whether the project can be credited.

After successful completion of the programming project, the supervisor must send an email to programmkoordination@cl.uzh.ch containing the following information:

- (1) full name
- (2) matriculation number
- (3) degree program
- (4) module number 06SM523-512
- (5) project title
- (6) number of ECTS credits earned (3, 6, or 9)
- (7) confirmation that the corresponding workload (90, 180, or 270 hours) has been completed

The module is then booked by the program coordination office for the semester in which the main part of the work was carried out and recorded as passed. Self-enrollment via the booking tool is not possible. The project may begin before the official start of the semester. A maximum of two programming project modules may be booked per study level.

Learning Outcome:

The students:

- autonomously design a project;
- realize the project plan;
- use existing tools;
- do software engineering;
- document their work according to standards;
- evaluate the results;
- use software repositories

Languages of Instruction:

Deutsch und/oder Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Simon Clematide

Requirements:

Prerequisites: In the duration of a study level a maximum of two programming projects can be booked. This module can be booked to credit work done in a programming project. It cannot be booked by the students themselves, the booking has to be authorized by the module coordinator. Before a programming project is started, it is essential to get the permission of the module coordinator (per Email). The prerequisites will be set according to the topic.

Module Student Teaching Assistant

06SM523-513 / Module

Description:

General description:

A student teaching assistance serves the acquisition of basic teaching skills. This requires a deeper insight of the contents of the associated lecture and the ability to prepare teaching material in order to help the students to better understand it. The task also involves the preparation and correction of exercises. This module can be booked to credit the conducting of exercises/tutorials. This module can be booked with 3 or 6 ECTS points. The amount of points will be decided in consultation with the module coordinator.

ECTS: 6

Notes:

Students who have successfully completed a course and are interested in taking on a tutorial or teaching assistant role in a future semester should contact the course instructor at an early stage. The instructor reports the assignment to the program coordination office (programmkoordination@cl.uzh.ch). In addition, before each semester, students are informed by email about open tutorial positions for which they may apply.

After successful completion of the tutorial, the module is booked by the program coordination office with 3 or 6 ECTS credits, depending on the workload, and recorded as passed. Self-enrollment via the booking tool is not possible. A maximum of two "Student Teaching Assistant" modules may be booked per study program level, and they must relate to different courses.

Learning Outcome:

The students :

- cope with computational linguistics content from a teaching perspective;
- learn to prepare computational linguistics content in a way tailored to a student's audience;
- learn to correct exercises and give appropriate feedback.

Languages of Instruction:

Deutsch und/oder Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Simon Clematide

Requirements:

Prerequisites:

In the duration of a study level a maximum of two modules «Student Teaching Assistant» can be booked, whereby the two modules must differ in content (also to any previously completed student teaching assistant modules). This module is booked in order to receive credit for a first job as a student teaching assistant at master's level.

This module is an application module, the application has to be authorized by the module coordinator (per Email). The lecturers have to be included in the communication. The open positions for student teaching assistants are usually posted on the mailing list of the Institute of Computational Linguistics (cllist@lists.ifi.uzh.ch) a few weeks before the semester starts. Students interested in conducting exercises/tutorials of a specific course can apply anytime for the position directly with the lecturer and the module coordinator. The module in question must have been passed successfully beforehand.

Module English Literature: Textual Analysis

06SM440-020 / Module

Description:

General description:

The "English Literature: Textual Analysis" module is a two-semester module that consists of weekly seminar sessions and an accompanying fortnightly lecture. Designed as an introduction, the module familiarises students with the critical vocabulary and methodology used in the study of literature. The emphasis is on the structural analysis and close reading of poetry, narrative texts, drama, film and other visual examples so that students learn how to approach various genres and different media. The module also trains students in the conventions of academic research and writing practised in literary studies. The lecture offers an overview of the most important theoretical concepts and illustrates these by means of concrete literary examples. The seminars, which are taught in smaller classes, provide an opportunity for in-depth discussions, exercises and group work.

ECTS: 9

Learning Outcome:

Students are able to: (a) closely read primary and secondary texts; (b) define the most important literary terminology; (c) apply these terms in their analysis of literary texts; (d) reflect on various literary genres and forms as well as different media; (e) evaluate and interpret their findings, develop thesis statements, structure arguments and support these with textual evidence; (f) search for relevant material in library catalogues and the most important databases used in the subject.

Module Language Skills and Culture: Introduction

06SM440-030 / Module

Description:

General description:

The Language Skills and Culture: Introduction module is a two-semester module that consists of weekly classroom sessions (Übung) and an accompanying fortnightly lecture. The classroom sessions take place every week and have two main foci: academic writing skills and cultural studies. The writing skills component introduces and practices the key competences required to write academic essays in English such as writing introductions, main body paragraphs and conclusions; illustration and elaboration of ideas; coherence and cohesion; argumentation and critical thinking skills; and focused work on common language difficulties. The cultural studies element examines key topics in cultural studies such as national identity, postcolonialism, multiculturalism, gender, class, sexuality, and the consumption of culture. They are closely based on the accompanying fortnightly lectures, and re-examine, consolidate and expand upon the ideas presented there.

ECTS: 12

Learning Outcome:

Students can structure an argumentative essay, independently research and use academic support, and write cohesively in an appropriate academic register. They can critically analyse sociological developments and cultural texts.

Module Literature in Context: History and Theory

06SM440-200 / Module

Description:

General description:

This two-semester module consists of a weekly lecture in the first semester and a self-study component in the second semester. In order to provide students with a historical survey, the module traces the forms and evolution of poetry, fiction, drama and non-fictional prose from the Renaissance to the present. The lecture introduces the individual periods in literary history and analyses selected literary examples in their respective historical, cultural and artistic contexts. Enlarging upon the material discussed in the lecture in the first semester, students spend the second semester reading a selection of texts they chose from the reading list in addition to a number of set texts from the lecture and an introduction to literary theory. The module concludes with a final oral exam at the end of the second semester.

ECTS: 6

Notes:

This course will be accompanied by two tutorials. Participation in a tutorial is voluntary but highly recommended.

Learning Outcome:

Students are able to: (a) reproduce the key features of all the literary periods from the Renaissance to the present; (b) list and describe a range of texts written in different genres; (c) contextualize these texts by relating them to their specific historical, cultural and artistic contexts; (d) identify specific features of a particular literary period in textual examples; (e) outline the most important schools in literary theory and apply theoretical concepts in their discussion of literary texts.

Module History of the English Language 1: Focus on Old English

06SM440-100 / Module

Description:

General description:

This module introduces students to the history of English and to English historical linguistics. It is intended for Bachelor students in their second year and consists of two parts: a lecture and a seminar. The lecture provides an overview on the history of the English language from the Indo-European pre-history of English to the Norman Conquest of 1066. The seminar introduces the students to Old English (the language spoken and written in Britain between AD 450-1150). The module gives an insight into these early forms of English and provides guidance on how to read original texts in Old English with the help of glossaries. It also introduces some basic principles of English historical linguistics and of the study of early medieval English literature.

ECTS: 6

Learning Outcome:

Students have basic knowledge of English historical linguistics (periods of language history, linguistic phenomena and their diachronic developments). They are able to read and understand simple Old English texts in the original using appropriate study tools.

Description:

General description:

Students who have spent six or more weeks within one year and with max. one interruption (i.e. min. 42 days) in the same particular Anglophone region (region = usually not a whole country) compile a research-based portfolio consisting of four parts: (1) a short account of their stay abroad, in the form of a report that goes beyond mere narrative (i.e. which includes some meta-level reflection on the experience); (2) a brief presentation and discussion of one linguistic feature of the local variety of English, in a format that would be accessible to non-specialists; (3) an encyclopedia-style entry about one literary text or author from the region; (4) a short journalistic text on one key cultural and/or historical dimension of the Anglophone area in question.

ECTS: 3

Notes:

Students are expected to submit written proof of their stay abroad (e.g. flight tickets, certificates of employment, etc.). Study abroad exchange semesters and summer schools do NOT count as a possible stay abroad case for the portfolio. Before applying to this module students must contact the study abroad coordinator at studyabroad@es.uzh.ch to confirm that their stay abroad fulfils the requirements and to receive additional guidelines.

Learning Outcome:

Students are able to: (a) summarize research from the fields of literary studies, linguistics, and history; (b) present their findings in different text types and for different audiences.

Module Experiments with Speech (Supplement: Research Paper)

06SM450-620 / Module

Description:

General description:

The media often reports that speech played backwards contains secret messages. Is that true? Does it really contain information relevant for speech communication or even secret messages? Scientists showed that babies can extract information from the speech signal right after they are born without even knowing anything about the linguistic system. In backward speech, such abilities may be lost. Other research showed that non-native speakers can be identified in speech even when it is played backwards. Why playing speech backwards? How is this done? And what do scientists want to demonstrate with this? In this seminar we will learn how to study speech communication using experimental techniques. Students will run their own experiments in which they will address a variety of questions. There are many things to discover but most likely not that speech played backwards contains secret messages.

ECTS: 3

Learning Outcome:

In this research module the acquired knowledge from the seminar 'Experiments with speech' will be applied to an experimental study.

Students will (a) design their own experimental study in the field of phonetics, (b) do an in depth literature review on their topic, (c) carry out the study and (b) write an extended report on the study.

06SM450-850 / Module

Description:

General description:

Students who have spent six or more weeks within one year and with max. one interruption (i.e. min. 42 days) in the same particular Anglophone region (region = usually not a whole country) compile a research-based report consisting of two parts: (1) a short account of their stay abroad in the form of a report that goes beyond a mere narrative (i.e. which includes some meta-level reflection on the experience); (2) an in-depth analysis of either linguistic or literary data in the context of the region in question that shows the student's close familiarity with current research on a specific aspect of that region. The analysis is concerned with either a distinctive linguistic feature occurring in the particular region or an anglophone literary work which displays a strong connection to that region.

ECTS: 3

Notes:

Before applying to this module students must contact the study abroad coordinator at studyabroad@es.uzh.ch to confirm that their stay abroad fulfils the requirements and to receive additional guidelines.

Learning Outcome:

Module Language Class: Consolidation of Greek Grammar

06SM321-001 / Module

Description:

General description:

Das Modul eignet sich für Studierende, deren Griechischkenntnisse noch nicht vertieft sind. Es dient als mögliche, aber nicht verpflichtende Vorstufe oder Ergänzung (im gleichen Semester) zum Pflichtmodul Griechische Sprachübungen I. Der Fokus des Moduls liegt auf der Formenlehre: Die griechischen Verbal- und Nominalparadigmata werden systematisch erarbeitet; Konjugationen und Deklinationen werden repetiert und intensiv geübt; die Akzentregeln sollen besprochen und aktiv angewendet werden. Neben Formenübungen werden ganze Sätze und kleinere Texte aus der Originalsprache ins Deutsche und vor allem kurze Sätze vom Deutschen ins Griechische übersetzt.

ECTS: 3

Learning Outcome:

Konsolidierung der Kenntnisse der altgriechischen Verbal- und Nominalparadigmata sowie der Akzentregeln; erste Erfahrungen mit Übersetzen aus dem Deutschen ins Altgriechische.

Module Greek Prose Composition I

06SM321-005 / Module

Description:

General description:

In den beiden Teilen der Sprachübungen werden die aus der Schule oder aus dem Graecum vorhandenen Kenntnisse in Grammatik, Stilistik, Semantik und Wortschatz aufgefrischt und wissenschaftlich vertieft. Zu diesem Zweck wird die massgebliche Grammatik (Bornemann/Risch) in zwei Semestern systematisch durchgearbeitet; ausserdem werden Formenkenntnisse und Wortschatz (Meyer/Steinthal) gefestigt und ausgebaut. Der Fokus liegt auf dem Erwerb einer aktiven Sprachbeherrschung, die anhand der Übersetzung von Einzelsätzen und kurzen Texten aus dem Deutschen ins Altgriechische eingeübt wird. In Sprachübungen I werden insbesondere die Formenlehre, die Syntax des einfachen Satzes und die Kasuslehre behandelt. Als mögliche Vorbereitung oder Ergänzung zu den Sprachübungen wird das jeweils im Herbstsemester angebotene Modul «Grundkurs griechische Sprachkompetenz» empfohlen. Sprachübungen II setzt Sprachübungen I fort.

ECTS: 6

Learning Outcome:

Festigung und Erweiterung der aus der Schule oder dem Graecum vorhandenen Kompetenzen in Grammatik (besonders Formenlehre, Syntax des einfachen Satzes und Kasuslehre), Semantik und Wortschatz (Niveau: Grammatik von Bornemann/Risch und Wortschatz von Meyer/Steinthal); Fähigkeit, Einzelsätze und kurze Texte aus dem Deutschen ins Altgriechische zu übersetzen.

Module Term Paper (Master, Medieval Latin)

06SM324-501 / Module

Description:

General description:

Die Seminararbeit wird in der Regel mit einem Seminar-Modul zu semesterweise wechselnden Themen kombiniert, kann aber, wenn die Lehrperson einverstanden ist, auch zu einer anderen Veranstaltung oder unabhängig von einer anderen Veranstaltung geschrieben werden. In Absprache mit der Lehrperson wird ein Thema ausgewählt, zu dem fristgerecht eine Arbeit zu verfassen ist. Seminararbeiten festigen die Fähigkeiten, sich an formale Kriterien zu halten, Fragestellungen korrekt und nachvollziehbar zu behandeln, Erkenntnisse angemessen zu ordnen und Methoden nachprüfbar anzuwenden.

ECTS: 3

Learning Outcome:

In der schriftlichen Arbeit zeigen Studierende, dass sie in der Lage sind, auf der Grundlage eines Primärtextes, in Auseinandersetzung mit der Sekundärliteratur, systematisch und wissenschaftlich seriös sowie unter Wahrung der äusserlichen Form und der zeitlichen Vorgaben einen eigenen Standpunkt zu entwickeln. In Seminararbeiten liegt der Fokus darauf, wissenschaftliche Sachverhalte selbständig zu analysieren und Forschungsmeinungen kritisch zu hinterfragen.

Module Japanese History (Synergies between Cultural Formations in Text and Image)

06SM290-002 / Module

Description:

General description:

Das Modul vermittelt Grundkenntnisse zur japanischen Geschichte in ihren politischen, sozialen und kulturellen Aspekten. Es besteht aus den zwei Veranstaltungen «Politische Geschichte» und «Kulturgeschichte», die eng aufeinander abgestimmt sind. Im Zentrum stehen die zentralen Entwicklungslinien und Ereignisse der japanischen Geschichte. Im Blick darauf behandelt das Modul Fragen der Periodisierung, stellt die politischen Systeme im historischen Wandel vor und diskutiert ihren Zusammenhang mit der sozialen und kulturellen Entwicklung. Weitere Themen sind die Gattungen und exemplarische Werke der vorherrschenden Kunstformen sowie zentrale religiöse Ideen und Institutionen.

Die Vorlesung ist auch Teil der AOI-Modulreihe «Synergien kultureller Formationen in Text und Bild», die Indologie, Islamwissenschaft, Japanologie und Sinologie in Kooperation mit dem Museum Rietberg und anderen Museen jährlich anbieten. Die Modulreihe thematisiert auf der Grundlage textlicher und materieller Quellen synergetische Formationen in der Kultur von der Antike bis zur Gegenwart und nimmt dabei insbesondere die Themen «kulturelles Gedächtnis», «Religion» und «moderne Ideologien» in den Fokus. Mit diesem Ansatz fördert sie - über die fachlichen Grenzen hinaus - die kritische Auseinandersetzung mit selektiven Narrativen und deren Auswirkungen auf globale Herausforderungen wie Gesellschaft und Polarisierung.

Module Introduction to Contemporary History

06SM598-506 / Module

Description:

General description:

Das Lektüreseminar erschliesst auf Basis von ausgewählten Texten zentrale Referenzwerke, theoretische Positionen und methodische Werkzeuge der Zeitgeschichte. Es setzt sich zum Ziel, die Historizität von gesellschaftlichen Umbrüchen und Konflikten in der Gegenwart verstehen zu lernen und die Studierenden zu befähigen, sich an Kontroversen und Debatten über die Gegenwart zu beteiligen. Im Zentrum des Seminars steht die ausführliche Diskussion anspruchsvoller Texte.

Dabei soll insbesondere auch die Fähigkeit erprobt werden, kürzere, pointierte mündliche Interventionen und prägnante Kurzesays zu verfassen und im Rahmen einer schriftlichen Seminararbeit auf Basis von Literatur eine eigenständige Auseinandersetzung mit Fragen der Zeitgeschichte zu leisten.

ECTS: 12

Learning Outcome:

Die Studierenden verfügen über vertieftes Wissen der Methoden und Konzepte der modernen und zeitgenössischen Geschichte. Sie können eigenständige komplexe historische Fragestellungen entwickeln und diese in Auseinandersetzung mit den im Seminar behandelten methodisch- theoretischen Konzepten der Geschichtswissenschaft strukturiert zur Darstellung bringen.

Module Film History 1: From the Cinema of Attractions to 1945

06SM255-002 / Module

Description:

General description:

Wie wandelt sich der Film im Laufe seiner Geschichte? Welcher Zusammenhang besteht zwischen technischen Veränderungen des Mediums, ökonomischen Bedürfnissen der Filmindustrie, filmischen Gestaltungskonzepten und der Mentalität einer Epoche? Wie wirken gesellschaftliche, kulturelle und ästhetische Entwicklungen, auch solche in anderen Medien, auf den Film ein? Was macht zu unterschiedlichen Epochen die Faszinationskraft aus, die vom Kino ausgeht? Und wie lassen sich filmgeschichtliche Entwicklungen theoretisch fassen? Diesen und ähnlichen Fragen geht die Überblicksvorlesung zur Filmgeschichte nach. Sie ist als Grundlagenveranstaltung für alle, die Filmwissenschaft studieren, angelegt. Dabei konzentriert sie sich auf ausgewählte Hauptstationen der Filmgeschichte. In Teil 1 reicht der Bogen vom frühen Kino der Attraktionen (ab ca. 1895) über das Stummfilmkino der 1910er und 1920er Jahre (u.a. Weimarer Kino, französische Avantgarde und sowjetisches Montagekino) bis hin zur ersten Dekade des Tonfilms. Die Überblicksvorlesung ist insgesamt für zwei Semester (je einzeln zu buchen) konzipiert und wird im folgenden Semester mit Teil 2 zur zweiten Jahrhunderthälfte (vom Film Noir bis zum postmodernen Kino) fortgesetzt. Jede Vorlesung (2 Stunden) wird durch einen Visionierungstermin (2 Stunden) ergänzt. Gezeigt wird jeweils ein zentrales Filmbeispiel zu der in der Vorlesung am selben Tag thematisierten Hauptstation der Filmgeschichte. Mit Vorlesungsbeginn werden auf OLAT das Programm der Vorlesung (inklusive der Visionierungen) sowie die Lektüre zu den Themen der einzelnen Vorlesungen bereitgestellt.

ECTS: 6

Learning Outcome:

Ziel ist das Erlangen von grundlegenden filmhistorischen Kompetenzen und Kenntnissen über filmgeschichtliche Epochen, stilistische Traditionen und kulturelle Kontexte sowie über historiographische Ansätze und Debatten in der ersten Hälfte des 20. Jahrhunderts.

Das Modul vermittelt Grundlagenkenntnisse im Bereich Alltagskulturen. Es besteht aus zwei Lehrveranstaltungen: einer Vorlesung und einem begleitenden Tutorat, das in mehreren Gruppen geführt wird. Die Einführungsvorlesung bietet einen Überblick über Geschichte, Theorien, Fragestellungen und Perspektiven der Alltagskulturforschung. Es werden Fachtraditionen, ihre gesellschaftlichen und politischen Hintergründe sowie die daraus erwachsenen Paradigmen beleuchtet. Vor allem aber werden die zentralen Begriffe des Faches diskutiert und die methodologischen und theoretischen Grundlagen anhand exemplarischer Forschungsfelder vorgestellt. In den Tutoratsgruppen erhalten die Studierenden die Gelegenheit, Grundlagentexte gemeinsam zu lesen und zu diskutieren sowie Fragen zur Vorlesung zu klären. Die Tutorate unterstützen damit auch die Prüfungsvorbereitung.

Module Comparative Politics (Lecture)

06SM615-023 / Module

Description:

General description:

Das Modul behandelt politische Systeme der demokratischen Industrie- und Schwellenländer im Vergleich seit Mitte des 19. Jahrhundert bis heute. Es vertieft die Theorien der vergleichenden Politik (Strukturalismus, Institutionalismus, Kulturforschung, "Rational Choice", Systemfunktionalismus) und die vergleichenden Methoden, anhand empirischer Anwendungen zu den wichtigsten Elementen des politischen Systems: Staat und Nation, Revolutionen und Regime (Demokratie und Totalitarismen), Institutionen (Parlamente, Regierungen, Föderalismus, direkte Demokratie, Wahlsysteme), politische Akteure wie Parteien, Verbände und soziale Bewegungen, sowie Prozesse der politischen Kommunikation, Partizipation und Kultur. Das Modul spricht auch «Policies» an, insbesondere den Wohlfahrtsstaat. Erklärungsmodelle basieren auf einer Vielfalt von empirischen Daten (Umfragen, Wahlergebnisse, Texte, soziale Indikatoren) welche den internationalen und historischen Vergleich ermöglichen.

ECTS: 3

Learning Outcome:

Fachkompetenzen: Die Studierenden verfügen über vertiefte Kenntnisse der politischen Strukturen zeitgenössischer Demokratien und ihrer Entwicklung sowie der dazu erforderlichen theoretischen Konzepte und analytischen Instrumente der vergleichenden Politikwissenschaft. Sie sind mithilfe des vermittelten Wissens fähig, aktuelle politische Entwicklungen und die Unterschiede sowie Gemeinsamkeiten zwischen den einzelnen (nationalen) politischen Systemen zu beschreiben und zu analysieren. Methodenkompetenzen: Die Studierenden entwickeln ihre wissenschaftliche Analyse- und Schreibkompetenz entscheidend. Sie sind fähig, selbständig einen Gegenstand systematisch und differenziert zu analysieren, Theorien und Konzepte reflektiert anzuwenden, sowie unter Einbezug wissenschaftlicher Fachliteratur schlüssig und überzeugend zu argumentieren.

Module Political Behavior (Lecture)

06SM615-026 / Module

Description:

General description:

Dieses Modul gibt einen Überblick über die wichtigsten Formen des politischen Massenverhaltens: Partizipation (Beteiligung, Protest, Abstimmung) und öffentliche Meinung (Einstellungen, Überzeugungen und Werte). Studierende lernen die wichtigsten theoretischen Grundlagen zum Verständnis von Verhalten (Kulturalismus, Strukturalismus, Rational Choice und politische Psychologie) sowie Schlüsselmethoden zum Erforschen von Verhalten (offizielle Statistiken, Umfragen und Experimente) kennen. Der Ansatz ist vergleichend: Ein wichtiges Ziel des Moduls ist es zu verstehen, wie systemische Prozesse, Gruppen- und Einzelprozesse das Verhalten beeinflussen.

ECTS: 3

Learning Outcome:

Nach erfolgreichem Abschluss des Moduls sind Studierende in der Lage, (1) die Rolle verschiedener Formen des politischen Verhaltens im politischen Prozess zu verstehen; (2) die theoretischen Konzepte und Analyseinstrumente im Bereich des politischen Verhaltens zu kennen und die wissenschaftliche Literatur auf diesem Gebiet zu lesen und zu verstehen; und (3) ein theoretisches Modell zur Erklärung eines bestimmten Phänomens zu entwickeln und zu beschreiben.

Module Democracy Studies (Lecture)

06SM615-032 / Module

Description:

General description:

Dieses Modul bietet eine Vertiefung im Bereich der Demokratieforschung an und besteht aus drei thematischen Blöcken. Der erste behandelt die Demokratisierung und Konsolidierung demokratischer Systeme. Hierbei werden zuerst aus einer Makroperspektive Demokratisierung als einförmiger Prozess betrachtet. Anschliessend wird auch aus einer Mikroperspektive, die sich mehr auf einzelne institutionelle Elemente fokussiert, der Prozess der Demokratisierung behandelt. Der zweite thematische Block behandelt die Varianz demokratischer Formen und Prozesse. Untersucht werden Idealtypen der Demokratie (bspw. Konsens vs. Majoritär), deren spezifische Institutionen und die Interaktion aus demokratischen Institutionen und ihren Akteuren. Der letzte thematische Block befasst sich mit Krisen und Herausforderungen der Demokratie. Hier steht die Frage im Mittelpunkt, wie mit Bedrohungen umgehen und diese abwehren können.

ECTS: 3

Learning Outcome:

Fachkompetenzen: Die Studierenden verfügen über vertiefte Kenntnisse im Bereich der Demokratieforschung, der dazu erforderlichen theoretischen Konzepte und analytischen Instrumente, sowie einen Überblick über die relevante wissenschaftliche Literatur in diesem Forschungsfeld.

Methodenkompetenzen: Sie sind mit Hilfe des vermittelten Wissens fähig, aktuelle Entwicklungen in Demokratien und Autokratien weltweit zu beschreiben, zu analysieren und zu verstehen. Selbstkompetenzen: Sie sind fähig, selbstständig einen Gegenstand systematisch und differenziert zu analysieren, Theorien und Konzepte zu reflektieren, sowie unter Einbezug wissenschaftlicher Fachliteratur schlüssig und überzeugend zu argumentieren.

Module Preparation for the Research Seminar Democracy, Development and International Relations

06SM615-501 / Module

Description:

General description:

Dieses Modul bereitet auf das entsprechende Forschungsseminar vor. Es vermittelt ein vertieftes Verständnis eines Forschungsgebietes innerhalb der Bereiche der Entwicklungspolitik, der Demokratieforschung, der Demokratisierungsforschung, der internationalen Beziehungen und/oder der Konfliktforschung. Dazu lernen die Studierenden die wichtigsten theoretischen Ansätze innerhalb eines Forschungsgebietes und deren Punkte der Übereinstimmung und der Dissonanz kennen und können konkrete wissenschaftliche Arbeiten den verschiedenen Ansätzen zuordnen. Sie lernen, diese Ansätze auf die Erforschung eines konkreten Problems anzuwenden und ein eigenes Erklärungsmodell für eine konkrete Forschungsfrage zu entwickeln. Zentral ist dabei die selbständige Identifikation einer relevanten Fragestellung. Darauf aufbauend führen die Studierenden im folgenden Semester ein eigenes Forschungsvorhaben durch.

Module The Craft of Political Analysis

06SM615-503 / Module

Description:

General description:

This course equips students with the skills needed to conduct, evaluate, and communicate rigorous political research. The course approaches political analysis as a practical and intellectual craft that goes beyond statistical modeling alone. Students learn to formulate research questions, design empirical studies, assess data and measurement choices, and work with messy, imperfect data as it is encountered in real-world political research. The course also addresses reproducibility, transparency, research ethics, and the philosophical foundations of social scientific inquiry. By the end of the course, students will be able to critically assess political research and make well-reasoned analytical decisions of their own.

ECTS: 6

Learning Outcome:

Nach Abschluss des Moduls haben die Studierenden (1) einen Überblick über verschiedene statistische Modelle in der Politikwissenschaft, (2) wissen, warum sie verwendet werden, (3) haben praktische Erfahrung mit der Programmierung dieser Modelle in R; (4), wissen, wie die Ergebnisse zu interpretieren sind; und (5) haben Erfahrung in der Kommunikation dieser Ergebnisse im Kontext konkreter Forschungsfragen.

Module Advanced Methods of Empirical Communication Research

06SM254-013 / Module

Description:

General description:

In der Veranstaltung werden die theoretisch erworbenen Kenntnisse in einer Vorlesung vertieft und in einer begleitenden Übung empirisch umgesetzt. Im Rahmen eines eigenen kleinen Forschungsprojektes durchlaufen die Studierenden alle Phasen eines Forschungsprozesses. Während in der Vorlesung die einzelnen Schritte theoretisch vorbereitet werden, sammeln die Studierenden in der Übung praktische Erfahrungen mit der Entwicklung eigener Fragestellungen und Hypothesen sowie der Operationalisierung relevanter Konstrukte. Im ersten Teil des Semesters werden in einem Befragungsprojekt ein Fragebogen entwickelt, im zweiten Teil ein inhaltsanalytisches Kategoriensystem entworfen. Die anschliessend erhobenen Daten werden statistisch ausgewertet und die Ergebnisse in einem Forschungsbericht dokumentiert. Die Teilnahme als Befragte, Beobachtete oder Kodierer an Feld- und Experimentalstudien bzw. Inhaltsanalysen am IKMZ komplettiert die Erfahrungen mit der empirischen Forschungspraxis.

ECTS: 6

Notes:

Die Veranstaltung findet online zu den angegebenen Terminen statt. Die Veranstaltung hat integrierte Übungen. Eine aktive Teilnahme in den Projektsitzungen ist für die Erbringung des Leistungsnachweises notwendig. Die Projektsitzungen werden nicht aufgezeichnet. Sie müssen daran online teilnehmen können.

Learning Outcome:

Die Studierenden verfügen über praktische Erfahrungen und Wissen in der empirischen Kommunikationsforschung. Sie sind in der Lage ein einfaches Forschungsprojekt zu planen, umzusetzen und sind mit der Leistungs- und Zeitplanung im Rahmen eines professionellen Projektmanagements vertraut. Die Studierenden sind in der Lage, einen Fragebogen sowie ein inhaltsanalytisches Kategoriensystem zu entwerfen und zu testen. Sie haben zudem Erfahrungen als Befragte und Kodierer gesammelt.

Module Core Area: Media Content & Media Use

06SM254-022 / Module

Description:

General description:

In der Vorlesung werden die zentralen Fragestellungen, Konzepte und Befunde aus der kommunikationswissenschaftlichen Medieninhaltsforschung und Mediennutzungsforschung diskutiert sowie die Frage beantwortet, wer welche Inhalte nutzt. Bei den Inhalten lassen sich dabei Angebotstypen (z.B. Nachrichten) und Angebotsmerkmale (z.B. Qualität) unterscheiden, die mittels Inhaltsanalysen untersucht werden und in der Vorlesung prototypisch sowie beispielhaft vorgestellt werden. Beim Forschungsfeld der Mediennutzung interessieren neben den verschiedenen Erhebungsmethoden die individuellen und sozialen Determinanten, welche über die Zuwendung zu verschiedenen Medien und Inhalten ausschlaggebend sind.

ECTS: 3

Learning Outcome:

Die Studierenden kennen die wichtigsten methodischen und theoretischen Ansätze der Mediennutzungs- und Medieninhaltsforschung. Sie sind sensibilisiert für die hybride Rolle des Publikums, das neue Medien zugleich nutzt und gleichzeitig als Produzent mitgestaltet. Die Studierenden wissen um die wichtigsten Studien und Forschungsbefunde in diesem Bereich. Sie sind in der Lage, neue Studien und methodische Weiterentwicklungen entsprechend einordnen und kritisch zu reflektieren.

Description:

General description:

Die Vorlesung führt in die qualitative Sozialforschung ein, wobei Problemstellungen aus der Kommunikationswissenschaft und Medienforschung im Zentrum stehen. Es werden sowohl qualitative Forschungsmethoden vorgestellt, bei denen die Bildung von Kategorien im Vordergrund steht (verschiedene Formen der Inhaltsanalyse), als auch rekonstruktive Ansätze (Diskursanalyse, narrative Analysen, Objektive Hermeneutik etc.). Die Forschungsmethoden werden verglichen und hinsichtlich ihrer unterschiedlichen Erkenntnismöglichkeiten eingeordnet. Verschiedene Formen der Datenerhebung (zB Interviews, Online, Beobachtung) und Datenaufbereitung werden vorgestellt und in Bezug zu den Auswertungsmethoden gesetzt.

ECTS: 3

Notes:

Die Veranstaltung verbindet Vorlesungsinputs mit praktischen Übungen, in denen das Gelernte an konkretem Material angewendet wird. Gearbeitet wird mit der Software MAXQDA.

Learning Outcome:

Die Studierenden lernen verschiedene Ansätze qualitativer Sozialforschung in der Kommunikationswissenschaft und Medienforschung sowie die Einordnung dieser Ansätze kennen. Sie erwerben die Fähigkeit qualitative Fragestellungen zu formulieren. Module History and Sociology of Media

06SM254-055 / Module

Description:

General description:

Mit der Digitalen Transformation rücken Kommunikations- und Medienstrukturen noch stärker als bisher ins Epizentrum gesellschaftlicher Entwicklung: Gesellschaften charakterisieren sich nämlich dadurch, wem welche Kommunikations- und Medienstrukturen zu welchem Daten- und Informationsverkehr zur Verfügung stehen. Die Überblicksvorlesung zeichnet nach, wie sich die Kommunikations- und Medienformen und die damit verbundenen Professionen im Laufe unserer Kulturgeschichte bis in die Gegenwart entwickeln und ausdifferenzieren. Bei der Analyse des langfristigen Wandels gesellschaftlicher Kommunikations- und Medienstrukturen werden insbesondere publizistische, aber auch technische, wirtschaftliche, rechtliche, politische und kulturelle Aspekte berücksichtigt. Die Vorlesung vermittelt zudem theoretische und methodische Grundlagen für die Analyse und Interpretation des historischen und aktuellen Medien- und Gesellschaftswandels.

ECTS: 3

Learning Outcome:

Die Studierenden werden in das für die Publizistik- und Kommunikationswissenschaft wichtige Themengebiet der Geschichte und Soziologie der Medien eingeführt. Sie erwerben spezifische Analyse- und Reflexionskompetenzen, die es Ihnen ermöglichen, Theorien, Studien und Aussagen kritisch zu vergleichen und zu bewerten.

Module Academic Work

06SM254-011 / Module

Description:

General description:

Mit dieser Lehrveranstaltung werden Studienanfängerinnen und -anfänger schrittweise in das wissenschaftliche Arbeiten eingeführt. Es werden einerseits spezifische Kenntnisse und Techniken vermittelt, andererseits erhalten Studierende die Möglichkeit, in Übungen und Tutoraten diese Kenntnisse und Techniken anzuwenden und zu vertiefen. Die aufeinander aufbauenden Übungen befähigen die Studierenden, unter Anleitung der Tutorinnen und Tutoren ihre erste eigene wissenschaftliche Arbeit zu verfassen, Fallstudien zu bearbeiten und ein wissenschaftliches Referat zu halten.

ECTS: 3

Notes:

Die Übungsgruppe wird in der ersten Semesterwoche zugeteilt. Sie erhalten die Informationen dazu in der Vorlesung.

Eine Aufzeichnung der Vorlesung steht als zusätzliches Lernmaterial zur Verfügung.

Learning Outcome:

Die Studierenden haben Kenntnis von Bibliothekssystemen und verschiedenen Quellen wissenschaftlicher Literatur. Sie besitzen die Fähigkeit der problemorientierten fachwissenschaftlichen Literatursuche sowie des kommunikationswissenschaftlichen Umgangs mit Quellen und Bibliographien. Sie haben das Rüstzeug zur selbständigen Erstellung einer schriftlichen Arbeit. Sie können wissenschaftliche Zitierweisen und bibliographischer Regeln anwenden, mündliche Präsentationen wissenschaftlicher Forschungsergebnisse vorbereiten und im wissenschaftlichen Team arbeiten.

Module Core Area: Media Production & Media Management

06SM254-023 / Module

Description:

General description:

Die Vorlesung beschäftigt sich mit Medienorganisationen und den vielfältigen Akteuren, die an der Medienproduktion und dem Medienmanagement beteiligt sind. Dies umfasst ebenso journalistische wie nichtjournalistische Akteure, also neben Nachrichtenorganisationen auch andere an der Massenkommunikation beteiligte Organisationen (z.B. aus Politik, Wirtschaft, Zivilgesellschaft). Die Produktionsroutinen, Kommunikationsstrategien, Konkurrenzbeziehungen und Automatisierungstendenzen werden in einem Multikanalkontext analysiert. Im Medienmanagement-Teil wird nach den Produktionsbedingungen von Journalismus- und Unterhaltungsangeboten gefragt: In welchem Verhältnis stehen Qualitäts-, Publikums- und Profitorientierung? Ausgehend von den theoretischen Grundlagen werden auch Innovationen und Umbrüche diskutiert.

ECTS: 3

Learning Outcome:

Die Studierenden erwerben Wissen in den Bereichen Medienproduktion, Medienmanagement, Medienorganisationen und Medienmärkte. Sie sind sensibilisiert für den Doppelcharakter von Medien als ökonomisches und publizistisches Gut. Die Studierenden verstehen die Herausforderungen der Digitalisierung und des gesellschaftlichen Wandels. Sie erwerben Analyse- und Reflexionskompetenzen, die es Ihnen ermöglichen, Theorien, Studien und Aussagen im Fachgebiet Medienproduktion und -management kritisch zu vergleichen und zu bewerten.

Module Core Area: Media Reception & Media Effects

06SM254-024 / Module

Description:

General description:

Die Medienwirkungsforschung fragt nach den Wirkungen, die die Nutzung von Medieninhalten auf das Denken und Wissen, auf Emotionen und Einstellungen sowie auf das Handeln haben. Die Medienrezeptionsforschung fragt zudem, wie Medienangebote wahrgenommen und verarbeitet werden und wie dabei Gedanken, Gefühle und Urteile generiert werden. In der Vorlesung werden die wichtigsten klassischen und neueren Begriffe, Konzepte, theoretischen Ansätze sowie empirischen Befunde zu diesen beiden Forschungsbereichen vorgestellt. Zudem wird diskutiert, welche Bedeutung die Rezeption für die Art und die Intensität von Medienwirkungen hat und welche funktionalen bzw. dysfunktionalen Folgen Medienwirkungen wiederum für die Gesellschaft haben.

ECTS: 3

Learning Outcome:

Die Studierenden erlangen Kenntnisse der zentralen Konzepte, Ansätze und Theorien der Rezeptions- und Wirkungsforschung sowie deren Entstehungsgeschichte. Sie kennen grundlegende kognitive und emotionale Prozesse bei der Verarbeitung medialer Information und haben die Fähigkeit, wissenschaftliche Forschungspublikationen in die bestehende Forschung einzuordnen und zu beurteilen. Die Studierenden erkennen Potenziale und Grenzen bestehender Studien zu zentralen Theorien der Rezeptions- und Wirkungsforschung und können diese kritisch reflektieren.

Following the preliminary meetings, students will draft a concept for their Master's thesis and submit it via this online form. The deadline for submitting the concept is May 30th to start in the fall semester and December 5th for a start in the spring semester. Based on the topics, priorities, and capacities, the concepts will be distributed among all eligible supervisors. After the allocation process is completed, you will be contacted by your supervisor. The confirmation of supervision is a prerequisite for registering for the Master's thesis and the Master's colloquium. <https://www.ikmz.uzh.ch/en/studies/graduation/master.html>

Es besteht kein Anrecht auf Annahme des Antrages. Vor der Buchung muss ein von der Betreuungsperson akzeptiertes Konzept mit Fragestellung, Disposition und Angaben der Quellen/Literatur für die Arbeit vorliegen. Die Studierenden wenden sich frühzeitig - vorzugsweise im Vorsemester - mit einem Themenvorschlag für die Arbeit an die gewählte Betreuungsperson. Diese berät die Studierenden und erteilt Auskunft über die Anforderungen. Je nach Lehrstuhl werden mögliche zu bearbeitende Themen angeboten, welche der eigenen Themenwahl Orientierung bieten. Die Themenwahl ist grundsätzlich Sache der Studierenden. Der Umfang der Arbeit beträgt 35 bis max. 45 Seiten (ohne Titelblatt, Inhalts- und Literaturverzeichnis sowie Anhang).

ECTS: 15

Learning Outcome:

Die Bachelorarbeit ist der Ausweis über die Fähigkeit, eine wissenschaftliche Aufgabenstellung innerhalb der vorgegebenen Frist selbständig zu bearbeiten und adäquat darzustellen. Die Studierenden können im Bereich der Erziehungswissenschaft relevante wissenschaftliche Literatur adäquat recherchieren, korrekt und einheitlich zitieren sowie kritisch diskutieren. Sie erlangen überdies die Fähigkeit, wissenschaftliche Zusammenhänge inhaltlich korrekt und graphisch angemessen zu präsentieren, Sachverhalte prägnant zu formulieren und logisch zu argumentieren.

Die mündliche Prüfung dauert

45 Minuten und wird bei einem/r am Studienprogramm beteiligten Professor/in nach Wahl abgelegt. Die Studierenden beschäftigen sich in diesem Modul einerseits mit allgemeiner sowie einschlägiger Forschungsliteratur und vertiefen andererseits ein Thema nach Wahl. Dabei bezieht sich rund die Hälfte der Prüfungsliteratur auf eine Auswahl von (Grundlagen-)Werken, die vom Studiengang vorgegeben wird. Die Studierenden sind dazu angehalten, zur ausgehandelten Literatur ein Thesenpapier vorzubereiten, welches den Ausgangspunkt der mündlichen Prüfung darstellt. Sie nehmen frühzeitig - am besten im Vorsemester und vor allem vor der Buchung des Moduls - mit dem/r Professor/in ihrer Wahl Kontakt auf, um Themen, Thesenpapier und Datum der Prüfung vorgängig abzusprechen. Idealerweise findet die Prüfung zu Beginn der Vorlesungszeit statt. Es gelten die üblichen Buchungsfristen und regulären Notenabgabetermine der Fakultät.

Erwerb von grundlegenden Kenntnissen zu Begriffen, Theorien, Methoden und der Geschichte der Erziehungswissenschaft. Dazu gehören die Begriffe und Konzepte der Erziehung und Bildung, der Entwicklung und Sozialisation und des Lehrens und Lernens. Die Studierenden können unterschiedliche erziehungswissenschaftliche Forschungsmethoden und -positionen unterscheiden und kennen die damit verbundenen historisch gewachsenen Ansätze (z.B. geisteswissenschaftliche Pädagogik, kritische Erziehungswissenschaft, empirische Bildungsforschung).

Module Final Exam

06SM226-501 / Module

Description:

General description:

Die Abschlussprüfung, die im gewählten Schwerpunkt absolviert wird, dauert 45 Minuten und kann nach Wahl bei einem/r am Schwerpunkt beteiligten Professor/in abgelegt werden. Die Studierenden nehmen frühzeitig - am besten im Vorsemester und vor allem vor der Buchung des Moduls sowie der online-Prüfungsanmeldung - mit dem/r gewünschten Prüfer/in Kontakt auf, um die Prüfungsthemen zu definieren und die Literaturliste, welche in der Regel sechs einschlägige Monographien und zwölf Aufsätze umfassen soll, zu vereinbaren. Die Studierenden legen vorgängig zur Prüfung ein Thesenpapier vor. Das Prüfungsgespräch kann mit einem (vorbereiteten) mündlichen Exposé der Studierenden beginnen, welches fünf bis höchstens zehn Minuten dauern soll. Die Masterabschlussprüfung wird in dem Semester absolviert, in welchem alle für den Abschluss notwendigen Leistungen erbracht werden, d.h. die Prüfung kann frühestens im letzten Studiensemester absolviert werden. Es gelten die üblichen Buchungsfristen und regulären Notenabgabetermine der Fakultät.

ECTS: 6

Learning Outcome:

Die Studierenden können ausgewählte Themen aus einem spezifischen Schwerpunkt selbstständig erarbeiten und ein Thesenpapier dazu formulieren. Im Rahmen der mündlichen Abschlussprüfung können die Studierenden die aufgestellten Thesen vertreten, die aufbereitete Literatur und die verschiedenen thematischen Inhalte miteinander in Beziehung setzen und kritisch dazu Stellung nehmen.

Module Master's Thesis

06SM226-MA / Master Paper / MA-Arbeit

Description:

General description:

Die Masterarbeit wird im Schwerpunkt bei einem/r im Masterstudienprogramm mit Lehre beteiligten Professor/in geschrieben und von diesem/r betreut. Vor der Buchung muss ein von der Betreuungsperson akzeptiertes Konzept mit Fragestellung, Disposition und Quellen-/Literaturangaben für die Arbeit vorliegen. Der Umfang der Masterarbeit umfasst i.d.R. 50 bis 90 Seiten (ohne Titelblatt, Inhalts- und Literaturverzeichnis sowie Anhang). Während des Verfassens der Masterarbeit ist - ebenfalls aus der Modulgruppe «Abschluss» - das Forschungskolloquium des entsprechenden Schwerpunkts zu besuchen. Je nach Stand der Masterarbeit kann in Absprache mit der Betreuungsperson das Forschungskolloquium für ein zweites Semester besucht und die Arbeit ein zweites Mal präsentiert werden.

ECTS: 30

Learning Outcome:

Die Masterarbeit ist der Ausweis über die Fähigkeit, eine stufenspezifische wissenschaftliche Aufgabenstellung innerhalb der vorgegebenen Frist selbständig zu bearbeiten und adäquat darzustellen. Die Studierenden bereiten im Bereich der Erziehungswissenschaft die relevante Forschungsliteratur zum gewählten Thema auf und entwickeln eigenständig eine Fragestellung sowie ein Forschungsdesign. Bei empirischen Arbeiten erheben sie selbstständig Daten und können diese theorie- und methodenbasiert auswerten und in Bezug auf die gewählten theoretischen Grundlagen, den Forschungsstand und die eigens entwickelte Fragestellung analysieren und interpretieren. Sie erlangen zudem die Fähigkeit, sich kritisch mit den gewählten Methoden und dem Forschungsdesign auseinanderzusetzen. Die Studierenden können die Abschlussarbeit gemäss wissenschaftlichen Konventionen verfassen, die Themen flüssig und prägnant formulieren und inhaltlich korrekte und graphisch hochstehende Illustrationen erstellen.

Module Education, Work, Economics

06SM226-505 / Module

Description:

General description:

Erwerbsbezogene Bildung geht von der Erwerbstätigkeit des Menschen aus und umfasst das gesamte Spektrum von Lern- und Bildungsprozessen, die an einer Erwerbstätigkeit orientiert sind. In der Schweiz ist dieses Verhältnis stark durch das Berufskonzept geprägt, aber auch Hochschulbildung oder Workplace Learning gehören dazu. Generell bezieht sich erwerbsbezogene Bildung auf fachliche und überfachliche Kompetenzen sowie die Gestaltung der eigenen Erwerbsbiografie.

Im Verlaufe des Semesters lernen die Studierenden diese theoretische Perspektive auf Bildung und Arbeit kennen und erhalten einen Einblick in verschiedene Formen erwerbsbezogener Bildung. Durch eigene Recherchen sowie im Gespräch mit externen Gästen werden aktuelle Herausforderungen und Entwicklungen erwerbsbezogener Bildung in der Schweiz bearbeitet, z.B. soziale Selektivität, digitale Transformation, Inklusion, Einfacharbeit, Individualisierung, Flexibilisierung, Nachhaltigkeit, transversale Kompetenzen, Migration oder die Entwicklung zur Dienstleistungsgesellschaft.

Das Modul wird ab HS 2020 jedes zweite Herbstsemester angeboten.

ECTS: 6

Learning Outcome:

Die Studierenden kennen die Bedeutungen von Arbeit für den Menschen und unterschiedliche Formen erwerbsbezogener Bildung. Sie können aktuelle Herausforderungen und Entwicklungen im Verhältnis von Bildung und Erwerbstätigkeit analysieren und kritisch hinterfragen.

Sie können eine Argumentation zu einem aktuellen Thema entwickeln, eine eigene Position dazu einnehmen und diese gestützt auf theoretische und empirische Erkenntnisse begründen. Sie können eine Literaturrecherche zu einem selbstgewählten Thema erwerbsbezogener Bildung durchführen und die Ergebnisse in einem Literaturverwaltungsprogramm dokumentieren und verschlagworten.

Module Ethical and Aesthetic Questions in Education

06SM226-510 / Module

Description:

General description:

Ethische Perspektiven in Bildung und Erziehung widmen sich Fragen der regulativen Bedeutung normativer Prinzipien der Gerechtigkeit, Gleichheit, Freiheit, Verantwortung oder des Glücks in der Beurteilung und Gestaltung von (Entscheidungs-) Praxen auf der Mikroebene (pädagogische Interaktion), Mesoebene (Organisation) und Makroebene (Bildungssystem). Normative und deskriptive ethische Theorien vermitteln Orientierungswissen, um pädagogisch relevante Phänomene von Erziehung und Bildung zu verstehen, angemessen zu artikulieren und die Thematiken damit behandelbar und verhandelbar zu machen. Ästhetische Fragen in Erziehung und Bildung betreffen nebst den Möglichkeiten und der Bedeutung ästhetischer Bildungsprozesse auch die Analyse erziehungswissenschaftlicher und pädagogischer Konzepte und Diskurse, dazu gehören auch Untersuchungen zu hintergründig wirkenden Metaphern und Rhetoriken. Das Modul wird ab HS 2020 jedes zweite Herbstsemester angeboten.

ECTS: 6

Learning Outcome:

Erwerb von vertieften Kenntnissen ethischer und ästhetischer Perspektiven auf Erziehung, Bildung und pädagogische Institutionen; Befähigung, normative von deskriptiven Aussagen zu unterscheiden und die beiden Diskursarten im Hinblick auf ethische und ästhetische Fragen anzuwenden; Kennenlernen von Grundpositionen in einem entsprechenden Teilgebiet (z.B. der moralischen Entwicklung und Erziehung oder der Professionsethik in pädagogischen Berufen).

Module Research Seminar

06SM226-513 / Module

Description:

General description:

Das Forschungsseminar gibt die Möglichkeit, innerhalb eines vorgegebenen, breit gefächerten Themengebietes oder im Rahmen eines bestehenden Forschungsprojekts eine eigene Forschungsfrage zu entwickeln und zu bearbeiten. Dabei können - abgestimmt auf die Forschungsfrage - qualitative, quantitative, historische und textanalytische Erhebungs- und Auswertungsmethoden und Forschungsansätze angewendet werden. Die Teilnehmenden erarbeiten sich den Theorie- und Forschungskontext zur gewählten Fragestellung, entwickeln ein Design, führen Erhebungen und Auswertungen durch und interpretieren diese theorie- und forschungsbezogen. Abschliessend erfolgt eine Präsentation der Forschungsarbeit.

ECTS: 6

Learning Outcome:

Erwerb der Fähigkeit zur eigenständigen Entwicklung einer Forschungsfrage, der Aufbereitung der relevanten Forschungsliteratur zur entwickelten Fragestellung, der selbstständigen Auswahl und Begründung des gewählten Forschungsdesigns, der Erhebung von Daten sowie deren theoriebasierten Analyse, zur kritischen Auseinandersetzung mit den gewählten Methoden und dem Forschungsdesign sowie zur Interpretation der Ergebnisse entlang des Forschungsstandes und den gewählten theoretischen Grundlagen.

Die Studierenden bereiten im Bereich der Erziehungswissenschaft die relevante Forschungsliteratur zum gewählten Thema auf und entwickeln eigenständig eine Fragestellung sowie ein Forschungsdesign. Bei empirischen Arbeiten erheben Sie selbstständig Daten und können diese theorie- und methodenbasiert auswerten und in Bezug auf die gewählten theoretischen Grundlagen, den Forschungsstand und die eigens entwickelte Fragestellung analysieren und interpretieren. Sie erlangen zudem die Fähigkeit, sich kritisch mit den gewählten Methoden und dem Forschungsdesign auseinanderzusetzen. Die Studierenden können die Abschlussarbeit gemäss wissenschaftlichen Konventionen verfassen, die Themen flüssig und prägnant formulieren und inhaltlich korrekte und graphisch hochstehende Illustrationen erstellen.
