XP Lab Kickstart is your entry point into Innovation & Entrepreneurship. This interdisciplinary, experience-based course invites students to explore how ideas, initiatives, and projects that create impact emerge in business, society, culture, and research. You will experiment with Design Thinking, practice agile ways of working, and learn how feedback and iteration drive problem-solving. Through teamwork and guided reflection, you will analyze your strengths, values, and mindset, and discover how entrepreneurial skills can enhance your academic and professional path. Working in diverse teams, you will craft compelling narratives, exchange constructive feedback, and explore how entrepreneurial thinking can contribute to societal and organizational impact.

ECTS: 1

Notes:

The course is open to advanced Bachelor's students, Master's students and doctoral students.

Learning Outcome:

Students will be able to...

- Identify opportunities in uncertain and complex environments.
- Experiment with Design Thinking and iterate based on feedback and learning.
- Experience and apply an entrepreneurial mindset, including failure culture and growth mindset.
- Craft compelling narratives to communicate ideas effectively.
- Collaborate in interdisciplinary teams and contribute to collective problem-solving.
- Analyze how entrepreneurial skills can enhance academic and professional paths.
- Reflect on personal strengths and plan how they could be used to create societal and organizational impact

Target Groups:

Bachelor, Master, PhD

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Claudia Witt

Requirements:

Prerequisites:

None.

Assessment:

1. Oral Presentation (delivered in the second session followed by a team reflection).
 2. Written Reflection (2500 characters) focussing on the personal mindset development, due 13th of November, 2026.

Module The language of power. The power of language

10SMSTSp100 / Module

Description:

General description:

Sprache ist nicht nur Kommunikationsmittel, sondern auch ein zentrales Instrument der Machtausübung. Die Art und Weise, wie Akteure Sprache, Bilder und Gestik verwenden, kann Denk-, Wahrnehmungs- und Handlungsmuster prägen. Dieser Zusammenhang ist in Zeiten, in denen in vielen Bereichen extremistische Strömungen erstarken, von besonderer Relevanz.

Der interdisziplinäre Blick in der Vorlesungsreihe ermöglicht es, Sprache und Macht umfassend zu analysieren und zu verstehen - sei es aus sprachwissenschaftlicher, soziologischer, kulturalistischer, psychologischer oder historischer Sicht. Ziel der Ringvorlesung ist somit, einen bewussten und kritischen Umgang mit Sprache als gesellschaftlichem Machtfaktor zu befördern.

Die Ringvorlesung spannt für die interdisziplinäre Beleuchtung des Themenkomplexes einen breiten historischen und geographischen Raum auf, um Themen wie Propaganda, Hate Speech, Klimawandel, gesellschaftliche Minderheiten oder Desinformation zu untersuchen.

ECTS: 3

Learning Outcome:

Die Studierenden sind in der Lage, die komplexe Beziehung von Sprache und Macht aus verschiedenen Perspektiven verstehen und an Beispielen analysieren zu können.

Target Groups:

Bachelor, Master, PhD

Languages of Instruction:

Deutsch und Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Marianne Hundt

Requirements:

Assessment:

Als Leistungsnachweis erstellen die Studierenden ein digitales Poster, das an der Abschlussveranstaltung (17.12.26) gezeigt wird. Es soll sich dabei nicht um ein klassisches wissenschaftliches Poster handeln, sondern um einen Beitrag, der verschiedene grafische Ausdrucksformen nutzt, um die Komplexität des Gegenstandes Sprache der Macht - Macht der Sprache auf Basis der gehörten Vorträge auszudrücken. Abgabetermin ist am 15.12.26 in Form eines digital darstellbaren Inhalts (PDF, Bewegtbild).

Grading Scale:

Module Truth and Lies

10SMSTSp102 / Module

Description:

General description:

Untersucht werden in dieser Mehrdozierendenveranstaltung zusammen mit den Studierenden verschiedene Aspekte von Wahrheit und Lüge, deren Unterscheidung voneinander heute eine neue Dringlichkeit gewinnt. Zur Sprache kommen unterschiedliche Thematisierungen von Wahrheit und Lüge in Philosophie und (digitaler) Religion, Literatur und Kunst, in Wirtschaft und Recht, in Geschichte und Politik, in Psychologie, Pädagogik und Anthropologie, in Medizin, Biologie und Chemie. Für ein vertieftes Verständnis von Wahrheit und Lüge und für die Eröffnung neuer Perspektiven auf diese fundamentalen Aspekte von Wissenschaft, Kultur und Moral, bedarf es einer transdisziplinären Betrachtung und Reflexion. Diese wird durch die dialogische Struktur der Vorlesungsreihe gefördert: Eine Sitzung wird jeweils von mindestens zwei Dozierenden geleitet.

ECTS: 3

Notes:

Das Modul ist für Studierende im Bachelor- und Masterstudium geöffnet. Bachelorstudierenden wird jedoch empfohlen, das Modul erst in einer fortgeschrittenen Studienphase zu besuchen.

Learning Outcome:

Die Studierenden a) reflektieren über die Bedeutung von Wahrheit und Lüge in sozialen, politischen, rechtlichen, künstlerischen und lebensweltlichen Kontexten und wirken aktiv am Veranstaltungsdiskurs mit; b) analysieren und diskutieren die Konzepte «Wahrheit» und «Lüge» aus unterschiedlichen disziplinären Perspektiven; c) setzen sich kritisch mit anderen Perspektiven auf Wahrheit und Lüge auseinander (Forschungsergebnisse, Praxisbeispiele) und interpretieren diese mit Blick auf disziplinspezifische Konventionen und eigene Erfahrungen; d) sind in der Lage, verschiedene disziplinäre Perspektiven begründet zu integrieren und ihren Verständnishorizont zu erweitern (Synthese).

Target Groups:

Bachelor, Master

Languages of Instruction:

Deutsch und Englisch

Merkmale:

Responsible instructor: Michelle Dreiding

Requirements:

Prerequisites: Keine

Assessment:

Eine 3-4er Gruppe übernimmt jeweils die Aufgabe, ein Sitzungsprotokoll zu erstellen. Das Protokoll bezieht sich auf eine Sitzung mit zwei Vorträgen und hält deren zentrale Inhalte strukturiert und präzise fest (Fragestellungen, Argumente, zentrale Begriffe, Ergebnisse). Auf Grundlage dieses Protokolls verfasst die Gruppe anschliessend eine (interdisziplinäre) Synthese. Ziel der Synthese ist es, die beiden Vorträge nicht nur zusammenzufassen, sondern sie auch zueinander in Beziehung zu setzen: Gemeinsamkeiten und Unterschiede herauszuarbeiten, mögliche Spannungen, Widersprüche und Ergänzungen zu benennen oder Erkenntnisse sichtbar zu machen. Die Synthese soll zeigen, wie unterschiedliche disziplinäre Perspektiven zum Verständnis von Wahrheit und Lüge beitragen. Protokoll und Synthese werden als kohärenter Text bis am 18.12.2026 eingereicht.

Grading Scale: 1-6, Half Grades Given

Module Fake Science - Isolated Cases or a Systemic Problem?

10SMSTSp101 / Module

Description:

General description:

Doctored images, invented data, published studies that never took place - are these unfortunate but inevitable isolated cases? Or do they unveil a systematic problem in how research operates?

In this lecture we investigate the problem of scientific misconduct from multiple angles - ranging from specific cases, investigative techniques and the role of whistleblowing, to epistemological considerations, systemic causes and possible solutions.

The main event consists of biweekly lectures by national and international experts. At the same time, participants will collaboratively write a short book on the problem of fake science, which will be published online. The book chapters will follow the content of the lecture series. We will meet in person in sessions that directly precede the lectures. In these sessions, we will discuss the content of the previous lecture and students will receive guidance on how to write their contribution to the book.

ECTS: 2

Notes:

The module is targeted at PhD students as well as Master students or advanced Bachelor students who consider a career in research.

The biweekly sessions are structured as follows:

17:15 - 18:00: Discussion and writing session

18:15 - 20:00: Lecture

We expect active participation in the discussion sessions as well as in the writing process for the short book.

Learning Outcome:

Participants understand the prevalence of fraudulent research results; they can assess its consequences for them as consumers of published research; they know techniques to spot questionable research, and know how to react appropriately; they are aware of the risks of fraudulent research for public trust in science; and they understand how they can contribute to improving the situation with their own research and with their behavior as (future) parts of the research system.

Target Groups:

Bachelor, Master, PhD

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Leonhard Held

Requirements:

Prerequisites:

The module is targeted at students who envision or consider a career in research.

Assessment:

The main event consists of biweekly lectures. Participants wishing to obtain credits will collaboratively write a short book on the problem of fake science, which will be published online and will be freely accessible after the lecture. The book chapters

follow the structure and the content of the lecture series. We will hold biweekly in-person sessions directly preceding the lectures. In these sessions, we will discuss the content of the previous lecture and students will receive guidance on how to write their contribution to the book. It has to be submitted by the end of the semester and is evaluated on a pass/fail basis.

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Information Retrieval (Seminar)

06SM523p002 / Module

Description:

General description:

This module provides in-depth engagement with a specific topic in language technology. Students learn scientific working methods, including analyzing research literature, interpreting empirical results, and evaluating theoretical approaches. They prepare and deliver a scientific presentation and write a paper expanding on their topic.

ECTS: 6

Learning Outcome:

Students can:

1. gain insight into a specific area of language technology.
2. acquire methodological skills for scientific research.
3. present complex topics clearly.
4. write a scientific paper.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Rico Sennrich

Requirements:

Prerequisites:

- All compulsory modules must have been successfully completed.
- Familiarity with Python
- Fundamentals of Machine Learning

Assessment:

Portfolio (50% written paper und 50% presentation)

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can't be repeated

Organisation:

Offer pattern:

1 Semester (One-Time)

Booking Deadline/Period:

Module Focus course Speech: Neurocognition of speech and language

06SM523p001 / Module

Description:

General description:

In this seminar, we will address the functional neuroanatomy of speech and language processing in association with brain plasticity across the lifespan from multiple perspectives and highlight a wide range of relevant topics. In particular, after a general introduction to anatomy, physiology, and methods, we will illustrate neurological models of speech and language processing, discuss the unique challenges of language acquisition, and examine the neural dynamics underlying the encoding of linguistic units and word learning. We will also highlight the importance of predictive processing for speech and language and discuss the neural basis of foreign language learning. Other topics include multilingualism and transfer effects, functional and anatomical correlates of language expertise, sign language as well as aging, hearing loss and brain plasticity. Some topics in clinical neuropsychology such as dyslexia and aphasia are also discussed. It is not a must, but it is advantageous if the participants have already attended the lecture "The neural foundation of speech".

ECTS: 6

Learning Outcome:

- Participants engage comprehensively with the literature on language and the brain, learn to question it critically and argue from a scientific perspective.
- Participants are familiar with the brain areas and functions traditionally associated with speech and language processing and can assess the relevance of the different methods used.
- Participants learn about relevant influencing factors and can theoretically weigh up the advantages and disadvantages of the respective topics.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Volker Dellwo

Requirements:

Assessment:

- Active participation in the seminar and discussions is desired.
 - PowerPoint presentation of a scientific article (30%).
 - Processing an essay question (70%, one selection from three given topics)
-

Grading Scale:

1-6, Half Grades Given

Module Minsk in Literature

06SM480p007 / Module

Description:

General description:

"Minsk war die Stadt in der die Freiheit ihren Anfang nahm" - schreibt der belarusische Dichter Zmicer Vishniou in seinem Gedicht "Anwesenheit" aus dem Jahr 2021 und bezieht sich damit auf den Aufschwung der 1990er Jahre. Als er in diesem Gedicht das schwindende Leben in seiner Stadt archiviert, ist er bereits nach der niedergeschlagenen Revolution 2020 im Exil. Das Erzählen von Minsk wird derzeit angesichts der fortschreitenden Repressionen besonders virulent. In diesem Kurs erkunden wir, wie Minsk einerseits von den zeitgenössischen belarusischen Autor:innen literarisch festgehalten wird, wie Artur Klinau, Alhierd Bacharevich, Julia Cimaŭejewa, Hanna Seviarynets, Tatsiana Zamirouskaya, Zmicer Vishniou, Valzhyna Mort und anderen. Welche Orte in der Stadt, welche Staatengemeinschaften, Ereignisse und historische Zeiten finden Eingang in die Literatur. Andererseits schauen wir auch darauf, wie Minsk in den Texten deutschsprachiger Autor:innen wie Ilma Rakusa, Franz Hohler, Irena Brezna oder Marcel Beyer erzählt wird, und analysieren die Konstrukte von Ost und West, wozu Minsk sich als Grenzland perfekt eignet.

ECTS: 6

Notes:

Lektüresprachen: Die Originaltexte sind auf Belarusisch oder Russisch (auch in deutscher oder englischer Übersetzung) und Deutsch.

Learning Outcome:

Die Studierenden vertiefen ihre textanalytischen Fähigkeiten in verschiedenen Gattungen, bekommen einen Einblick in die Darstellung von Minsk in der belarusischen und deutschsprachigen Literatur, reflektieren und analysieren die Konstrukte von Ost und West sowie die Fragen des Kulturtransfers und entdecken zeitgenössische belarusische und deutschsprachige Autor:innen.

Module Historical Avant-garde Movements in Eastern, South-Eastern, and Eastern Europe

06SM480p001 / Module

Description:

General description:

Im Seminar behandeln wir eine Auswahl von kanonischen und wenig kanonischen Bewegungen der klassischen Avantgarde (vor Ende des Zweiten Weltkriegs) in Zentral-, Südost- und Osteuropa. Dabei will das Seminar, nach einer kurzen Beschäftigung mit der Theorie der Avantgarde, die Avantgarde-Bewegungen nicht nur hinsichtlich Poetologie und Programmatik betrachten, sondern kulturwissenschaftliche Fragestellungen ins Zentrum rücken. Ist der jugoslawische Zenitismus als Phänomen einer Selbst-Balkanisierung (Maria Todorova) zu beschreiben? Wie wurde "jiddisch" vom Kreis avantgardistischer Schriftsteller_innen Jung Idysz, gegründet 1919 in Łódź, Polen, verstanden? Inwiefern wurde die Körperpoesie des rumänischen Surrealisten Gherasim Luca vom Freudomarxismus beeinflusst? Inwiefern kann die Malerei der aus Serbien stammenden surrealistischen Malerin Milena Pavlović-Barilis als queer angesehen werden? Wir werfen einen Blick auf Bewegungen der klassischen Avantgarde einer ganzen Reihe von Ländern Zentral-, Südost- und Osteuropas, und betrachten die Avantgarde als transkulturelles Phänomen.

Ein weiterer Schwerpunkt wird auf der sowjetischen Filmavantgarde liegen. Nach einer Rekonstruktion der Prinzipien des Montagefilms Sergei Eisensteins und der Konzeption des Kinoauges (oder der Kino-Pravda) Dziga Vertovs wird nach einem spezifisch ukrainischen Beitrag zum sowjetischen Avantgardefilm gefragt, etwa auch durch Oleksandr Dovženko. Das Seminar stellt sich auch die Frage, wie eine transkulturelle, 'dekolonisierte' Avantgardeforschung für Osteuropa aussehen könnte.

ECTS: 6

Notes:

Close-Readings und Interpretationen von Werken verschiedenster Medienarten (Manifeste, Gedichte, Malerei, Kinofilme). Close-Reading von Theorietexten.

Learning Outcome:

Die Studierenden erarbeiten sich einen Überblick über spezifische Literaturgeschichten der Slavischen Literaturen und Theorien der (Literatur-)Geschichtschreibung.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Matthias Meindl

Requirements:

Prerequisites: Literaturwissenschaftliche Grundlagenkenntnisse

Assessment: Portfolio (Essay 50%, schriftliche und mündliche Übungen 50%)

Der Essay macht 50% der Gesamtnote aus, 50% die anderen schriftlichen (Thesepapier/Protokoll) oder mündlichen Leistungsnachweise (Referat), zusammen mit engagierter Teilnahme an der Seminardiskussion

Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden.

Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden.

Module Laughing at Art. Soviet Visual and Textual Satire between Propaganda and Subversion

06SM480p002 / Module

Description:

General description:

Satire in Bild und Text war in der Sowjetunion und den Ostblockstaaten ein zentrales Propaganda-Instrument zur Vermittlung ideologischer Normen. Sie war unterhaltsam, leicht verständlich und erzeugte durch das "richtige" Lachen und das "korrekte" Sehen klar codierte Feindbilder. Das Seminar richtet den Blick jedoch auf die ambivalente, potenziell subversive Seite dieser offiziellen Satire. Anhand von Karikaturen und satirischen Texten über bildende Kunst und Literatur untersuchen wir, mit welchen Techniken und Narrativen Satire sich der intendierten pädagogischen Steuerung entzog und zum ideologischen Querschläger werden konnte. Dabei zeigt sich, dass Angriffe auf "westliche" Kunstströmungen nicht selten ungewollt differenziertes Wissen über diese vermittelten. Ausgehend von Russland verfolgen wir satirische Praktiken von der DDR über Georgien und Armenien bis nach Kirgistan und fragen nach regionalen Spezifika ebenso wie nach transnationalen Mustern.

ECTS: 6

Learning Outcome:

Die Studierenden erarbeiten sich einen Überblick über satirische Bild- und Textpraktiken im sowjetischen und ostblockstaatlichen Kontext und deren Bedeutung für Kunst-, Literatur- und Ideologieggeschichte.

Module Language Immersion Russian and/or Belarusian Reading: An Anonymous Diary from Minsk
06SM480p008 / Module

Description:

General description:

Im Kurs "Lektüre" werden nicht adaptierte Texte, literarische und andere, zu verschiedenen Themen, Epochen oder Autoren in der Originalsprache gelesen. Die Studierenden befassen sich in mündlichen und schriftlichen Beiträgen mit Inhalten und sprachlichen Phänomenen der Texte und erweitern kontinuierlich ihren Wortschatz.

ECTS: 3

Learning Outcome:

Die Studierenden verbessern ihre Lesekompetenz nicht adaptierter Texte in der Originalsprache und erweitern ihren aktiven und passiven Wortschatz sowie ihre kulturellen Kompetenzen. Sie beherrschen das selbständig erworbene neue Vokabular, indem sie es grammatikalisch und stilistisch korrekt anwenden. Die Studierenden können sich mündlich und schriftlich adäquat zu Inhalten sowie zu verschiedenen sprachlichen Phänomenen des Originaltextes äussern. Das Modul führt zum Niveau B2 gemäss Europäischem Referenzrahmen.

Module Language and Propaganda

06SM480p009 / Module

Description:

General description:

What is the power of the word? How does it create trust and convey urgency? How can people be persuaded to believe something they never did, abandon their old ways and embrace a completely new behaviour? Can they, at all? These questions are among the hardest and most burning for those facing the problems of language and power, in both practical and scholarly (even philosophical) approaches. In the modern age, since the advent of nation state and mass society, much of this problematic coalesced around the concept of propaganda. While it had its ups and downs, it is also clearly surging in recent years, calling for inquiry and action. In this seminar, we will address the difficult relationship between language and political persuasion from a variety of perspectives. Beginning with the linguistic theories of representation, such as those by Wilhelm von Humboldt, Olexandr Potebnya, Ferdinand de Saussure, Walter Benjamin, Martin Heidegger, Émile Benveniste and other towering figures in linguistics and philosophy, we will take a deep dive into the political science and media theory dealing with communication influence at a high theoretical level. At the same time, we will also anchor it in empirical evidence and most recent advances in cognitive sciences to try and pin down the unholy Grail of propaganda: the evidence, and limits, of its influence. The seminar will also take a critical distance to West-centric perspectives, highlighting the variety of ideas and models beyond the Western world. A significant attention will be paid to Slavic and Eastern European (particularly, Russian) cases. In so doing, the seminar will deal upfront with our own era of geopolitical instability and the great AI disruption of language, unconcealing the continued relevance of the word amid political apocalypticisms. For, if "in the beginning was the Word", it will also be in the ending.

ECTS: 6

Learning Outcome:

Upon completing the course, the students will be able to:

- Critically approach the problem of representation within different philosophical, linguistic, epistemological and political paradigms;
- Discern, grasp, critically apply and develop models of communication influence from a number of theoretical perspectives;
- Analyse and interpret the history and theory of propaganda in different cultural approaches and traditions (including those from Eastern Europe);
- Competently discuss, in writing and oral debate, the problems of communication influence;
- Analyse and discuss relevant cases of influence and persuasion;
- Apply theoretical concepts from linguistics, philosophy, history, cultural and media studies, to problems of propaganda and persuasion;
- Synthesise their own conceptualisations and interpretations on the foundation of different traditions in philosophy and linguistics.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Roman Horbyk

Requirements:

Assessment:

Portfolio: seminar participation and group presentation (30%), final strictly non-AI written assignment (30%), oral examination (40%)

- Seminar participation and group presentation (30%): students have to participate actively in seminar discussions and prepare the required group presentation on a specific topic
- Final written assignment (strictly non-AI, 30%): students also have to produce a short 1,000-word essay without any AI use whatsoever in a special examination session at the university premises;
- Oral examination (40%): at the designated examination occasion, students will present their assignments and answer additional questions regarding them as well as, if needed, other course content.

To complete the course successfully, students need to get a pass on each of these three components.

Module Language Immersion Czech Reading: Autofiction in Contemporary Czech Literature

06SM480p004 / Module

Description:

General description:

Im Kurs "Lektüre" werden nicht adaptierte Texte, literarische und andere, zu verschiedenen Themen, Epochen oder Autoren in der Originalsprache gelesen. Die Studierenden befassen sich in mündlichen und schriftlichen Beiträgen mit Inhalten und sprachlichen Phänomenen der Texte und erweitern kontinuierlich ihren Wortschatz.

ECTS: 3

Learning Outcome:

Die Studierenden verbessern ihre Lesekompetenz nicht adaptierter Texte in der Originalsprache und erweitern ihren aktiven und passiven Wortschatz sowie ihre kulturellen Kompetenzen. Sie beherrschen das selbständig erworbene neue Vokabular, indem sie es grammatikalisch und stilistisch korrekt anwenden. Die Studierenden können sich mündlich und schriftlich adäquat zu Inhalten sowie zu verschiedenen sprachlichen Phänomenen des Originaltextes äussern. Das Modul führt zum Niveau B2 gemäss Europäischem Referenzrahmen.

Languages of Instruction:

Tschechisch

Merkmale:

Responsible instructor: Tomas Glanc

Requirements:

Prerequisites: beständenes Modul "Mittelstufe 2" oder entsprechende Vorkenntnisse (mind. B1+)

Assessment: Portfolio (mündliche und schriftliche Übungen)

Neben der aktiven Teilnahme an der Lektüre und Analyse des Textes wird die Erstellung kurzer Berichte zu jeder Sitzung vorausgesetzt. Diese belegen nicht nur das gute Verständnis der behandelten Aspekte der gelesenen Passagen, sondern sind auch Ausdruck eigener Überlegungen, des zusätzlichen Selbststudiums und bieten die Möglichkeit, eigene Fragen und Probleme zu formulieren.

Bitte beachten: Das Modul wird als <bestanden> bewertet, wenn alle Elemente des Portfolios <bestanden> sind.

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Language Immersion Russian: Russian in the Operatic Soundscape: Listening Comprehension and Audio Comp
06SM480p003 / Module

Description:

General description:

Zahlreiche Werke der russischen Oper gehen auf Texte Alexander Puschkins zurück und prägen das musikalisch sprachliche Erbe bis heute. In diesem Kurs wird das Hörverstehen gezielt anhand ausgewählter Opern trainiert, etwa Eugen Onegin oder Pique Dame von Tschaikowski oder Boris Godunov von Mussorgski.

Im Vergleich zwischen literarischem Original, Libretto und musikalischer Gestaltung untersuchen wir, wie sich Bedeutung verändert, wenn ein Text in Klang, Stimme und Bühnensprache übergeht. Durch präzises Lesen und differenziertes Hören entwickeln die Studierenden ihre Audiokompetenz und lernen, anspruchsvolle russische Opernszenen sprachlich und klanglich sicher zu erschließen.

Ergänzend dazu beziehen wir kulturelle Kontexte ein, um ein vertieftes Verständnis für Ausdrucksformen, historische Bezüge und Figurenbilder in russischen Texten zu gewinnen.

Der Kurs richtet sich an alle, die Russisch nicht nur lesen, sondern im Klang wahrnehmen und verstehen wollen. Die Oper dient dabei nicht als Musikthema, sondern als konzentrierte akustische Lernumgebung, in der Sprache besonders deutlich, verdichtet und wirkungsvoll hörbar wird.

ECTS: 3

Notes:

Offen für Muttersprachler:innen

Learning Outcome:

Ziel des Kurses ist es, das Hörverständnis und die allgemeine Audiokompetenz in ihrer ganzen Komplexität zu fördern und zu stärken. Die Studierenden erwerben Strategien, um anspruchsvolle authentische russische Hörtexte aus dem Opernbereich sicher, differenziert und reflektiert zu erschließen.

Module Language and cognition

06SM480p010 / Module

Description:

General description:

In this course we will explore manifold ways in which language and cognition are entangled.

The question whether thought informs language or the other way around is as old as it gets. How language is structured and how meaning is constructed has much to tell about how cognition functions - cognition being a fuzzy buzzword which we take it onto ourselves to define and engage with during this course.

Have you ever heard about the Linguistics Wars? We will depart from how currently much-debated Noam Chomsky and his once student George Lakoff developed a full-fledged conflict on the relationship between language and cognition.

We will analyze a number of case-studies from typologically distinct languages showcasing the link between how we think and how we speak.

Examples treated range from several Slavic languages, Albanian, Romance languages, Basque, Navajo, Mongolian, English, German and many others depending on your interests and previous knowledge. Topics in language and cognition covered include e.g.: spatial relations, the expression of time, embodied cognition, metaphor in language, the cognitive underpinnings of alignment systems, and many others.

This course is highly interactive in mode, and you are very welcome to get involved, discuss and discover what you are interested in.

ECTS: 6

Learning Outcome:

By the end of this course, students will have gained knowledge of the complex ways in which language and cognition intertwine. Students will attain general knowledge of current scientific trends at the interface of linguistics and cognitive science, as well as of traditions such as linguistic relativity, generativist approaches, cognitive linguistics, metaphor theory, usage-based linguistics, cultural linguistics, language embodiment research, and others. Next to theoretical approaches, students will become familiar with concrete examples from specific languages, among which Slavic, languages of Eastern Europe, and other Indo-European and non-Indo-European languages. A further objective of this course is for students to be able to develop independent concepts for projects to be elaborated upon within a research paper (see Portfolio).

Module Slavic Languages in Music Yesterday and Today

06SM480p011 / Module

Description:

General description:

Oper und Rap? Pop und Metal? Rock und Folk? All diese Genres und ihre Sub-Genres können ein Gegenstand für Analysen in der Slavischen Sprachwissenschaft sein, denn sie verbindet ein Umstand: In all diesen Genres gibt es Texte bzw. Lyrics, die von Musiker:innen geschrieben und in Kombination mit Musik aufgeführt werden. Die Grundlage des Moduls bieten Einblicke in sowie Forschungsartikel zu diesen Genres in verschiedenen slavischen Kulturen. Im Mittelpunkt steht dabei immer die Frage danach, wie Sprachen, Dialekte, Soziolekte etc. eingesetzt werden. Hierbei ist nicht nur das gesungene/gesprochene Wort zentral, sondern auch die sprachliche Gestaltung von Alben, Werbeplakaten und anderen gedruckten und digitalen Zeugnissen, die ein fester Teil des musikalischen Werkes sind.

ECTS: 6

Learning Outcome:

Das Ziel dieses Moduls ist es, die Studierenden zur eigenständigen linguistischen Analyse von Musiktexten im slavischen Kontext zu befähigen und ihnen weitreichende Kenntnisse in diesem Bereich zu vermitteln. Die Teilnehmer:innen lernen, Songtexte, Alben und begleitende Artefakte nicht nur als kulturelle Phänomene, sondern als komplexe sprachliche Zeugnisse zu begreifen. Ein zentrales Lernziel ist die Identifikation und funktionale, soziolinguistische, sprachhistorische und ggf. politische Einordnung von Texten und den darin verwendeten Varietäten, wie Dialekten, Soziolekten oder multilingualen Elementen, innerhalb verschiedener Genres von Oper bis Metal, von Volksmusik bis Rap. Darüber hinaus entwickeln die Studierenden die Kompetenz, die Wechselwirkung zwischen dem sprachlichen Ausdruck und seiner medialen Inszenierung in digitalen und gedruckten Formaten kritisch zu hinterfragen und mit aktuellen Forschungsmethoden der slavischen Sprachwissenschaft zu untersuchen.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Aleksej Tikhonov

Requirements:

Prerequisites: Sprachwissenschaftliche Grundlagenkenntnisse, Kenntnisse mind. einer slavischen Sprache auf mind. A2-Niveau

Assessment: Portfolio (Referat 40%, schriftliche und mündliche Übungen 30%, Essay 30%)

Das Portfolio besteht aus zwei Kurzvorträgen (Übersicht zu eine:r Künstler:in oder einem Genre + vertiefte Analyse von einem Text im grösseren Kontext oder die Vorstellung eines Forschungsartikels), der Lektüre von aufgegebener Forschungsliteratur und publizistischen Beiträgen sowie der aktiven Teilnahme an den Diskussionen während der Sitzungen und aus einem Kurzessay. Die Kurzvorträge werden während der Vorlesungszeit erbracht, das Kurzessay kann, muss aber nicht, am Ende des Semesters geschrieben werden.

Module Lecture in Classical Archaeology

06SM682p001 / Module

Description:

General description:

Die Studierenden gewinnen einen vertieften und kritischen Einblick in ein ausgewähltes archäologisches und kulturhistorisches Thema aus dem antiken Mittelmeerraum in griechisch-römischer Zeit und die aktuellen Forschungen auf diesem Gebiet. Sie kennen sich in den Denkmälern und Befunden aus, die für dieses Thema relevant sind. Sie haben einen Überblick über den das ausgewählte Gebiet betreffenden aktuellen Forschungsstand und die entsprechende Forschungsliteratur.

ECTS: 3

Learning Outcome:

Die Studierenden gewinnen einen vertieften und kritischen Einblick in ein ausgewähltes archäologisches und kulturhistorisches Thema aus dem antiken Mittelmeerraum in griechisch-römischer Zeit und die aktuellen Forschungen auf diesem Gebiet. Sie kennen sich in den Denkmälern und Befunden aus, die für dieses Thema relevant sind. Sie haben einen Überblick über den das ausgewählte Gebiet betreffenden aktuellen Forschungsstand und die entsprechende Forschungsliteratur.

Module Object-Based Visual Training

06SM682p002 / Module

Description:

General description:

Diese Übung widmet sich dem wissenschaftlichen Sehen in der Klassischen Archäologie in Bezug auf Artefakte (Skulptur, Vasenmalerei etc.). Wir werden uns gemeinsam erschliessen, wie man an ein Artefakt herangeht und mittels Beschreibung eine systematische erste Analyse vornimmt. Worauf ist generell zu achten? Was sind stilistische Merkmale? Wie gelingt eine nicht-wertende Beschreibung? Wie findet man die geeigneten Worte? Wie kann man auf dieser Grundlage vergleichen? Die Übung findet direkt vor den Objekten statt

ECTS: 3

Notes:

Das Modul wird nach Abschluss der Studieneingangsphase empfohlen.

Learning Outcome:

Die Studierenden sind in der Lage, antike Artefakte systematisch zu beschreiben. Sie können auf dieser Grundlage diejenigen Phänomene benennen, diese mit anderen Artefakten vergleichbar machen. Sie kennen die zentralen Merkmale jeweils zeittypischer Phänomene (Stile, Motive etc.).

Module Exercise in Identifying Prehistoric Archaeological Finds

06SM682p003 / Module

Description:

General description:

Themen der Veranstaltung sind das genaue Betrachten, das Beschreiben und das archäologische Bestimmen archäologischer Funde anhand von Standardliteratur. Die genaue Beobachtung und knappe, aber präzise Beschreibung sowie die typologische, geographische und chronologische Einordnung von Funden aus unterschiedlichen Materialien und in verschiedenen Formen sowie Formaten zählt zu den zentralen Aufgaben und Arbeiten in der Archäologie, auf Ausgrabungen wie im Museum.

ECTS: 3

Notes:

Die Veranstaltung findet extern in den Räumen des Landesmuseums in ZH statt.

Learning Outcome:

Die Studierenden kennen die Grundlagen der Bestimmung archäologischer Funde und haben einen Überblick über die für die Arbeit mit den häufigsten Materialgattungen massgebliche Literatur. Sie können ausgewählte Funde nach deren eingehender Betrachtung in selbständiger Weise einordnen und eine bestimmte Anzahl an Objekten nach vorgegebenen Kriterien beschreiben.

Merkmale:

Module Visual Documentation

06SM683p001 / Module

Description:

General description:

Viele Aspekte der archäologischen Wissenschaften können durch analoge oder digitale visuelle Dokumentationen unterstützt werden. Dies gilt für Befundsituationen wie auch für einzelne Befunde und Funde, wobei zeichnerische, fotografische und andere digitale Bildverfahren zur Anwendung kommen. Das Applikationsfeld wird nicht nur im Bereich Auswertung, sondern auch bei der Aufnahme im Feld immer breiter. Es gilt, diese Techniken kennenzulernen und an kleinen praktischen Arbeiten anzuwenden.

ECTS: 3

Notes:

Das Modul ist online nicht buchbar. Die Anmeldung erfolgt per Mail an den Dozierenden (oliver.bruderer@iaka.uzh.ch) mit folgenden kurz gefassten Informationen: Name, Motivation für Kursbesuch, allfällige Vorkenntnisse, Studiengang, Semester.
Der definitive Entscheid fällt nach Ablauf der Anmeldefrist intern.

Learning Outcome:

Die Studierenden lernen Aspekte archäologischer Arbeit mit Bezug auf visuelle Dokumentationen kennen. Sie kennen ein Spektrum an Möglichkeiten, um Funde oder Befunde bzw. Befundsituationen wahlweise zeichnerisch, fotografisch oder mit erweiterten digitalen Verfahren zu dokumentieren. Diverse praktischen Arbeiten ermöglichen ihnen, Anwendungsbeispiele umzusetzen und so die Bandbreite an Optionen zu erforschen.

Module GEO 445 Data acquisition and processing from drone and ground surveying

07SMGEO445 / Lecture with Practical Exercises

Description:

General description:

This 5 ECTS course (150 hours total workload) runs over 14 weeks and combines lectures, computer labs, and a one-week field course. The course begins with an intensive one-week field course (30 hours, a week before the starting of the semester) that introduces the theoretical foundations of data acquisition and provides hands-on training in drone and terrestrial laser scanning (TLS) surveys and georeferencing techniques. This component enables students to directly link theory with practical field experience. The remainder of the semester builds on this foundation by integrating field data collection with data processing and analysis. Through lectures and labs, students will work with their own drone, TLS, and georeferencing datasets to apply standard workflows used in geoscientific practice.

Students will learn to design, justify, and evaluate surveying strategies using drone, TLS, and GNSS methods; process data into products such as point clouds, digital elevation models (DEMs), and orthomosaics; and integrate multi-sensor datasets for quantitative analysis. These skills are applied to real-world contexts, including forest structure analysis, geomorphological mapping, and agricultural or infrastructure studies.

The course concludes with a structured group project in which students present their methodology, results, and associated uncertainties and limitations.

For further information, please contact Livia Piermattei (livia.piermattei@geo.uzh.ch).

ECTS: 5

Notes:

The one-week field course will start the week before the semester. The lectures and exercises take place on site.

- Insurance is the responsibility of the participants.

The Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 6; 13 & 15

Learning Outcome:

- Explain and compare drone-based and ground-based surveying methods (e.g. drone photogrammetry, TLS, GNSS), including their georeferencing principles, accuracy, and limitations across different environments.
- Participate in and critically evaluate surveying campaigns that meet scientific objectives, safety standards, and relevant regulatory frameworks.
- Implement and assess georeferencing strategies (e.g. RTK/PPK, ground control points, reference networks) and evaluate their impact on positional accuracy and data quality.
- Process and analyse drone- and TLS-derived data using dedicated software and GIS tools to generate standard spatial products (e.g. point clouds, DEMs, orthomosaics, surface change metrics).
- Select, justify, and critically reflect on appropriate sensors, surveying techniques, and processing workflows for diverse geoscientific applications.
- Design and communicate an independent surveying project, including data acquisition, processing workflow, results, uncertainties, and limitations, in both written and oral formats.

Target Groups:

Master's students enrolled in the GEO and ESS study programs.

Languages of Instruction:

English

Course Materials:

Lecture slides and course information will be provided via OLAT. Dedicated datasets for practical exercises will be made available during the lab sessions. Course materials will include:

- a) instructions for fieldwork,
- b) technical sheets for drone/TLS/GNSS,
- c) processing step-by-step guides,
- d) readings for photogrammetry, TLS, georeferencing.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Livia Piermattei

Requirements:

Prerequisites:

None

Prior Knowledge:

Students are expected to have basic familiarity with geospatial data acquisition concepts gained at the bachelor's level. Introductory knowledge of 3D remote sensing (e.g., from GEO113) and geolocation techniques (e.g., from GEO233) is recommended. These bachelor's courses provide a foundational understanding of Structure-from-Motion (SfM), LiDAR, and general principles of 3D remote sensing, including how different methods generate and represent 3D data. Basic programming skills and familiarity with GIS for mapping and spatial analysis are also expected. In particular, experience with Python and/or R for data processing and analysis is recommended.

Assessment:

Assessment is based on the following components:

- Attendance in the field course, lecture and lab sessions
- Lab work and reports (groups of 2 students) - pass/fail
- The final group project is completed in groups of 2 students and consists of two graded components: a written report, which accounts for 70% of the project grade, and an oral presentation, which accounts for the remaining 30%.

There are no resit opportunities. If the module is failed, it must be repeated in full in the following term.

Module Medieval History 2 (Lecture)

06SM600p014 / Module

Description:

General description:

Das Modul bietet eine Einführung in grundlegende Themen der Geschichtswissenschaft mit einem Schwerpunkt in der Geschichte des Mittelalters.

ECTS: 3

Learning Outcome:

Die Studierenden können das in der Vorlesung vermittelte Fachwissen zu grundlegenden Themen der Geschichtswissenschaft reflektiert wiedergeben.

Languages of Instruction:

Deutsch oder Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Target Group: Open to School Students

Responsible instructor:

Andreas Victor Walser

Requirements:

Assessment:

schriftliche Prüfung

Schriftliche Prüfung, On-site (Online)

Do, 17.12.26 um 10:15-10:45.

Die Prüfung dieser Vorlesung findet einmalig statt. Das Nachholen, und Wiederholen, ist ausgeschlossen. Für das erfolgreiche Bestehen der Prüfung wird die regelmässige Teilnahme an der Vorlesung erwartet.

Module Introduction to Language Technology

06SM523-001 / Module

Description:

General description:

This module provides an introductory overview of computational linguistics and language technology. It covers central tasks such as text encoding, tokenization, morphological and syntactic processing, sequence tagging, and text classification. Students are introduced to language models, conversational systems, information retrieval, multilingual technologies, and speech and vision applications. The module integrates theoretical concepts with practical demonstrations and includes discussion of accessibility-oriented tools and responsible AI.

ECTS: 3

Learning Outcome:

Students can:

1. explain core concepts, tasks, and methods in modern language technology.
2. apply fundamental NLP techniques such as tokenization, tagging, and text classification.
3. describe how language models, chatbots, information retrieval pipelines, multilingual models, and translation systems operate.
4. outline principles of speech processing, multimodal approaches, and accessibility-oriented technologies.
5. assess the capabilities and limitations of language technologies, including fairness and bias.

Languages of Instruction:

Module Programming in Language Technology 1

06SM523-002 / Module

Description:

General description:

This module introduces the fundamentals of command line interfaces and programming. It covers core programming constructs such as control structures, data types, and basic principles of object-oriented programming. Theoretical instruction is combined with hands-on exercises in natural language processing and data analysis. Practical work focuses on applying algorithmic approaches to problems typically encountered in computational linguistics.

ECTS: 6

Learning Outcome:

Students can:

1. operate command line interfaces.
2. use control structures and data types effectively.
3. apply basic principles of object-oriented programming.
4. conduct data analysis and natural language processing tasks.
5. address real-world problems using algorithmic approaches.

Module Art on paper – Artistic craftsmanship and its means of expression 1450–1850

06SM640p002 / Module

Description:

General description:

Die wissenschaftliche Arbeit in einer Graphischen Sammlung ist geprägt durch den Umgang mit Originalen auf Papier und der Konzeption von Ausstellungen. Ungeachtet ob druckgraphische Werke von Dürer, Piranesi oder Goya bzw. anonyme oder sicher zuschreibbare Zeichnungen im Zentrum stehen, immer beginnt die Analyse mit der Erfassung des Objektes. Die Veranstaltung möchte den Teilnehmenden das wissenschaftliche Instrumentarium vermitteln, das im Umgang mit Werken auf Papier unerlässlich ist und ihnen Fragen im Zusammenhang mit Ausstellungsvorbereitungen nahebringen. Ein Schwerpunkt der Veranstaltung sind die Ausdrucksmöglichkeiten verschiedenster künstlerischer Techniken, seien es solche aus der zeichnerischen Praxis (Kreiden, Federn, Pinsel) oder Drucktechniken (Holzschnitt, Kupferstich, Radierung, Aquatinta, usw.). Die Erfahrung am und mit dem Original bietet sowohl Gelegenheit, Objekte als Primärquellen des Wissens verstehen und nutzen zu lernen als auch erste Erfahrungen in der Museumsarbeit zu sammeln. Wenn immer möglich von den Originalen ausgehend, werden die vielfältigen Fragen zu Papier, zeichnerischer Handschrift, zu Druckqualität, zu Druckstöcken und -platten, zum Verhältnis von Kopie und Vorlage, zur Konservierung und Restaurierung, aber auch zur Geschichte des Sammelns und der wissenschaftlichen Erschliessung behandelt.

ECTS: 6

Learning Outcome:

Die Studierenden lernen die sprachliche wie auch materielle Erfassung von Objekten und erhalten Einblick in konservatorische Fragen der kunsthistorischen Praxis.

Merkmale:

Responsible instructor: Anna Pawlak

Requirements:

Prerequisites: Keine

Assessment: Referat und schriftliche Übung

Der Leistungsnachweis besteht aus Referat und schriftlicher Arbeit.

Abgabe der schriftlichen Arbeit bis zum 3. Januar 2027

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Module GEO 846 Spatial Theory Lab

07SMGEO846 / Seminar

Description:

General description:

Today, democracy seems to be under threat, authoritarian rules seem to be on the rise, colonial traits and racism seem to become respectable again, left-woke attitudes are increasingly ridiculed, scientific facts about climate change are bluntly negated, the rule-governed international order is overturned, etc. etc.. Some say that "fascism is back". But if we do not want to further these fascist tendencies, before we chime in with this saying, we need to thoughtfully explore in a nuanced way what this actually means, and how this relates to what we as critical geographers do and how we may influence the developments ahead of us.

In this intensive reading and discussion seminar, that brings together master- and PhD-Students and other academics from the department with an interest in Theory and Critical geography, we study a very recent book by Prof. Chris Philo (2025) in which he explores (and critically enhances) the work of the very influential classical antifascist author, Theodor Adorno, as an inspiring source for an anti-fascist geographical imagination of today. In the framework of this course, we intend to invite Prof. Chris Philo personally to exchange with us on these issues. Together, we will try to 'crack the code' of the readings and jointly discuss selected chapters of this major work in seminar-style meetings.

ECTS: 6

Learning Outcome:

Upon completion of the module, students will have:

1. acquired substantial knowledge about key concepts (fascism, authoritarianism, critical geography),
2. improved their writing/communication/debating skills, and 3) their creative and critical thinking skills.

Target Groups:

Advanced Bachelor students, Master students, PhD candidates

Languages of Instruction:

English, possibly German, if all participants speak German

Course Materials:

The book by Chris Philo (Adorno and the Antifascist Geographical Imagination, Edinburgh University Press, 2025) will be available to students as an online resource.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Benedikt Korf

Requirements:

Assessment:

To get 6 ECTS credits, students will read all assignments, prepare questions to all readings, present one reading input for a selected discussion session, produce a group work output (interview, blog-post, podcast) and write a final reflection essay (1000 words), critically relating the readings to the positioning of geography in general and the positioning of the student's own research and re-search interests in particular, towards the current societal developments.

Participants will give brief presentations, work in small groups and prepare a portfolio of research materials and data analysis. Details will be specified in the course syllabus.

Language of assessments: English

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Second Fall Semester)

Module GEO 870 Making sense of empirical data

07SMGEO870 / Lecture with Practical Exercises

Description:

General description:

This course deepens and extends the principles, theories, and methods for designing empirical studies and for analyzing and reporting empirical data. The interactive lecture component provides an in-depth overview of quantitative data analysis and data visualization methods, as well as guidance on reporting results in accordance with established open-science guidelines, moving from raw observations to meaningful insights. In the practical, hands-on lab component, students apply the concepts introduced in the lectures to select and apply appropriate methods to analyze empirical data (i.e., provided or their own data) and report their findings in a publication-like format.

ECTS: 3

Notes:

Attendance at the lecture portion (GEO 870.1) is required. The assignments for this course will be completed individually using appropriate software to analyze and report empirical data. The finalized course schedule will be announced by the module coordinator at the first mandatory course meeting (for enrolled and not-yet-enrolled participants).

Learning Outcome:

- You will be able to explain the key methodological foundations of empirical research.
- You will be able to critically assess, summarize, and discuss analysis methods and visualization choices.
- You will be able to select appropriate methods for preprocessing and analyzing empirical data.
- You will be able to produce a publication-style report that presents data, analysis methods, and results, in accordance with open-science and reproducibility guidelines.
- You will be able to present your chosen data, study, analysis method, and empirical findings.

Target Groups:

Master's students majoring in geography or GIScience; students from other disciplines contact the instructor.

Languages of Instruction:

Language of instruction: English

Course Materials:

All class materials (e.g., lectures, papers, data, analysis scripts) will be available through OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Armand Kapaj

Requirements:

Prerequisites:

BSc

Assessment:

The module grade consists of three assessment components, each of which must be passed independently:

1. Lecture part: active in-class participation (20 points max).
2. Lecture part: guided exercises (30 points max).
3. Lab part: final project report and presentation (50 points max).

To pass the entire module, you must earn at least 60% on each assessment

component. Specifically, this means you need to earn at least 12 points in the lecture portion through active participation and at least 18 points in the individual exercises. For the lab component, you need to earn at least 30 points in the individual project report and presentation. If any assessment component scores below 60%, the entire module must be repeated.

Language of assessments: English.

Module Software Lab

06SM523-115 / Module

Description:

General description:

This module treats software development as a collaborative team process. It focuses on the development of language technology applications using a combination of technologies, including web interfaces, AI models, databases, and data visualizations. A special focus is placed on the creative process: collaborating effectively with team members, turning an initial idea into a working prototype, and presenting the result to an audience.

ECTS: 6

Learning Outcome:

Students can:

1. collaborate in a small team to design and implement a software project in language technology.
2. demonstrate a prototype to an audience.
3. document the project in a written report and reflect on the creative process.
4. provide constructive, actionable feedback to peers.
5. independently acquire technical skills needed for their project, such as software development tools, web technologies, and data modelling.

Module Norms and norm orientation in English (1476-2026): From the introduction of the printing press to the age of social media

06SM440p004 / Module

Description:

General description:

This lecture series traces how speakers and writers of English have oriented toward linguistic norms from the advent of the printing press to the era of social media and artificial intelligence. We examine the interplay between usage norms (what people actually say), descriptive norms (observed linguistic patterns), and prescriptive norms (codified rules about "correct" language). Individual sessions investigate the social significance of norm orientation in each historical period: the standardizing effect that Early and Late Modern lexicographers and grammarians may (or may not) have had, the social stratification reinforced through "proper" usage, and the contemporary reshaping of linguistic norms in the age of AI. We explore who has possessed the power to establish norms, how norm orientation intersects with questions of identity and access, and the ways in which AI systems may be shaping current language use.

Research into norm orientation has used usage guides and metalinguistic commentary as primary sources, but also corpus-based evidence on changing usage and sociolinguistic approaches to attitudes and ideologies. Based on this research, the lecture series aims to provide a survey on how language has been discussed, debated, and regulated across the centuries and how speakers have actually responded to competing norms and prescriptive pressures.

ECTS: 3

Learning Outcome:

Students acquire an overview of a subdiscipline in English linguistics

Module Specialization: Political Economy of International Organizations

06SM615p004 / Module

Description:

General description:

Durch die Lektüre und problemorientierte Diskussion von Forschungsarbeiten werden die analytischen und forschungspraktischen Kompetenzen der Studierenden geschult. Im Kontext des Seminars erarbeiten die Studierenden ein Forschungsdesign, auf dessen Grundlage sie im Frühjahrssemester eine eigene empirische Forschungsarbeit (BA- Arbeit) durchführen können.

ECTS: 6

Learning Outcome:

Fachkompetenzen: Theoretisch und methodisch fundierte Kenntnisse über die zentralen Akteure, Institutionen und Prozesse in einem ausgewählten Forschungsbereich; Verortung von Argumenten und empirischen Studien in den relevanten wissenschaftlichen Debatten; Methodenkompetenzen: Theoretische Argumente und deren (quantitative oder qualitative) empirische Analyse anhand von politikwissenschaftlichen Forschungsbeiträgen verstehen, nachvollziehen und kritisch beurteilen können; Erstellen eines Research-Designs; Formulierung einer hypothesengestützten wissenschaftlichen Fragestellung auf Basis selbstgewählter Quellen Selbstkompetenzen: Auffassung und Notizen nehmen, Selbstorganisation, Planungsfähigkeit;

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Hanno Degner

Requirements:

Prerequisites:

Grundlegende Ansätze und Theorien der Politikwissenschaft (Modulgruppe Einführung in die Politikwissenschaft), vertiefte Kenntnisse (Vorlesung, Seminar) im für die Veranstaltung ausgewählten Fach- und Themenbereich; erweiterte Kenntnisse sozialwissenschaftlicher Forschung (Konzeptualisierung, Forschungsdesign, Operationalisierung, Korrespondenzanalysen)

Assessment:

Portfolio

Schriftliche Arbeit 80% / Referat 20%

Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden. Please note: All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed.

Module Narrating Place: The Spatial Imaginaries of Literature

06SM440p006 / Module

Description:

General description:

During the final quarter of the twentieth century, the humanities and social sciences underwent what has since been termed the "spatial turn." As a result of this shift, space is no longer understood as a mere backdrop or neutral container within which history unfolds, but as a shaping force in social and cultural processes. From that perspective, space is a contested social construction that cannot be separated from power relations.

Although - or perhaps because - imaginative literature offers fictionalized representations of space and place, the insights of the spatial turn encourage us to rethink the role of literary "settings." As this lecture course will argue, literature accomplishes important cultural work by both reinforcing and challenging the shifting meanings attributed to space and place, and by reflecting the experience of lived space from the perspective of a wide range of characters, including marginalized and oppressed groups.

The course is organized into three sections. The first, theoretical section reconstructs key moments in the spatial turn and also considers earlier approaches to space in literature that predate - and arguably prefigure - this development, such as Bakhtin's concept of the chronotope and Lotman's spatial theory of narrative. The second section examines historical case studies from the late nineteenth century, showing how the peak of urbanization and imperial expansion fostered an increasing awareness of space and its social significance in texts as diverse as the Sherlock Holmes stories, the Gothic novel "Dracula," and colonial literature. In the final section, I explore contemporary writings by authors from former colonies, many of which reflect the experiences of migrants and challenge the hegemonic readings of space established during colonialism.

ECTS: 3

Notes:

No books need to be purchased for this course. Short readings, including theoretical texts and excerpts from literary works, will be made available electronically on a weekly basis to accompany the lectures. The OLAT platform will also provide a wealth of optional background reading.

Languages of Instruction:

Englisch

Merkmale:

Module The language of power and the power of language

06SM440p511 / Module

Description:

General description:

Language is never neutral. From political discourse and institutional communication to everyday interactions and digital platforms, language both reflects and constructs power relations. This research seminar examines how language serves as an instrument of power - shaping public opinion, maintaining social hierarchies, legitimizing authority - and how power shapes language itself through who gets to speak, whose voices are heard, and what ways of speaking are valued.

In an era of political polarization, algorithmic content moderation, and AI-generated text, questions about linguistic power have urgent contemporary relevance. How do political actors frame debates and construct narratives? How do institutional discourses include or exclude particular groups? How does language used to signal and reproduce social inequalities? How are new technologies redistributing communicative power?

Students will develop their own research projects, collecting and analysing their own data. Whether examining political speeches, social media discourse, institutional language policies, media representations, or everyday interactions, students will apply appropriate analytical methods to uncover the mechanisms through which language and power intersect.

In the final week of the semester, there will be a poster session where students present preliminary findings from their research. This session will take place in conjunction with the interdisciplinary lecture series "Macht der Sprache - Sprache der Macht," providing an opportunity to engage with broader scholarly conversations about language and power across disciplines and to receive feedback from the wider academic community.

ECTS: 9

Languages of Instruction:

Englisch

Merkmale:

Responsible instructor:

Marianne Hundt

Requirements:

Prerequisites:

Students are expected to know the core concepts of different areas of linguistics. They need to have experience with data analysis for linguistic research projects and they are expected to have written term papers in English linguistics at Bachelor level. Students are required to have good (written) academic English language skills (Level C1). Students are expected to have taken the Methods and Theories in English Linguistics Module or equivalent Master-level courses elsewhere.

This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module

Assessment:

Schriftliche Arbeit

The deadline for the seminar paper is the first of June, 2027

Grading Scale:

1-6, Half Grades Given

Module Digital Democracy: How Digitalization Shapes Democracy in the 21st Century

06SM615p515 / Module

Description:

General description:

The rapid digitalization of the private and public sphere is not only fundamentally changing the way we interact, communicate or work but also affects politics and our democratic institutions. This course introduces students to research on digital democracy, i.e., research on the impact of digitalization on politics. It bridges current substantial topics of interest with the underlying advances in (digital) research technologies that allow to explore those topics and provides hands-on insights into the research process.

ECTS: 6

Learning Outcome:

After completion of this module, students will (1) have a good overview of current research on the implications of digitalization for politics and (2) understand current research designs and best practices and can apply them in their own research

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Karsten Donnay
Lucas Leemann

Requirements:

Assessment:

Portfolio

Grading is based on the successful completion of three short response papers (20%) throughout the term and a final written assignment (80%). For the three weeks in which students are preparing their response papers, they also have to serve as discussants, presenting the week's readings to the class and leading the in-class discussion.

Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden. Please note: All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed.

Module Specialization: Digital Public Governance

06SM615p005 / Module

Description:

General description:

This course builds on key debates about digital public governance and translates them into concrete research practice. It takes as its starting point the observation that political authority today increasingly operates through interconnected databases and platform architectures that render citizens legible as data subjects and subject them to algorithmically mediated decision logics. The central aim of the course is to enable participants to design and execute a BA thesis project that investigates a concrete case of digital public governance while situating it within broader theoretical and political debates. Students will learn how to formulate precise research puzzles, develop theoretically grounded arguments, and devise feasible empirical strategies for their own research projects.

ECTS: 6

Learning Outcome:

Fachkompetenzen: Theoretisch und methodisch fundierte Kenntnisse über die zentralen Akteure, Institutionen und Prozesse in einem ausgewählten Forschungsbereich; Verortung von Argumenten und empirischen Studien in den relevanten wissenschaftlichen Debatten; Methodenkompetenzen: Theoretische Argumente und deren (quantitative oder qualitative) empirische Analyse anhand von politikwissenschaftlichen Forschungsbeiträgen verstehen, nachvollziehen und kritisch beurteilen können; Erstellen eines Research-Designs; Formulierung einer hypothesengestützten wissenschaftlichen Fragestellung auf Basis selbstgewählter Quellen Selbstkompetenzen: Auffassung und Notizen nehmen, Selbstorganisation, Planungsfähigkeit;

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Hanno Degner

Requirements:

Prerequisites:

Grundlegende Ansätze und Theorien der Politikwissenschaft (Modulgruppe Einführung in die Politikwissenschaft), vertiefte Kenntnisse (Vorlesung, Seminar) im für die Veranstaltung ausgewählten Fach- und Themenbereich; erweiterte Kenntnisse sozialwissenschaftlicher Forschung (Konzeptualisierung, Forschungsdesign, Operationalisierung, Korrespondenzanalysen)

Assessment:

Portfolio

Research design outline (30%)

Students will design a research outline that accounts for 30% of the final grade. It consists of a structured document that responds to a set of guiding questions concerning the project's research question and underlying puzzle, theoretical framework, case selection, data sources, and overall feasibility. It is to be submitted at the end of week 11 of the course.

BA thesis proposal (70%)

The BA thesis proposal accounts for 70% of the final grade. It should be approximately 3,000-3,500 words in length and include a clearly formulated research question, a review of the relevant literature, a theoretical framework, a detailed research design, a discussion of the project's expected contribution, and a

realistic timeline that demonstrates its overall feasibility. It is to be submitted by 8 January 2027.

Grading Scale: 1-6, Half Grades Given

Module TikTok Politics: Navigating Information, Influence, and Online Harm

06SM615p006 / Module

Description:

General description:

The rapid digitalization of the private and public sphere is fundamentally changing the way we encounter news, engage with political actors, and participate in public life. This course introduces students to the study of how the digital transformation affects politics providing a hands-on introduction on central topics related to political online behavior and how these can be studied empirically.

ECTS: 6

Learning Outcome:

After completion of this module, students will (1) have a good overview of current research on the implications of digitalization for political online behavior and (2) understand current best practices for studying these phenomena empirically.

Module Politics of Investment into Developing Countries

06SM615p503 / Module

Description:

General description:

Das Modul fördert vertieftes Fachwissen in einem ausgewählten Forschungsfeld. Es vermittelt die Kompetenz, zu einem ausgewählten Thema Fragestellungen aus Sicht der Politikwissenschaft zu entwickeln und zu analysieren. Im Zentrum des Seminars stehen die politikwissenschaftliche und normative Analyse, das trennscharfe Analysieren der Begriffe in ihrer Anwendung auf empirische Studien und das Begründen politischer Sachverhalte. Die unterschiedlichen Themen werden theoretisch und empirisch vertieft.

ECTS: 6

Learning Outcome:

Fachkompetenzen: Verortung von Argumenten und empirischen Studien in den relevanten wissenschaftlichen Debatten zu einem ausgewählten Thema; Methodenkompetenzen: wissenschaftliches Schreiben und Argumentieren; Verfassen eines schriftlichen Beitrags (Policy Paper, wissenschaftliche Abhandlung, etc.)
Selbstkompetenzen: Definition eigener inhaltlicher Schwerpunkte, Selbsteinschätzung, Planungsfähigkeit.

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Responsible instructor: Silja Häusermann

Requirements:

Prerequisites: Students should have taken at least one introductory course on political science and at least one quantitative research methods course to be able to engage with the empirical literature covered in the seminar.

06SM760p012 / Module

Description:

General description:

Zu den Proseminaren buchbare Hausarbeit, die vom Dozenten der jeweiligen Lehrveranstaltung betreut wird. Das genaue Thema - meistens in enger Anlehnung an das im Proseminar gehaltene Referat - wird mit dem Dozenten frühzeitig vereinbart. Für das Verfertigen der Arbeit steht ein Semester zur Verfügung. Sie kann im Semester, in dem die Lehrveranstaltung angeboten wird, separat gebucht werden.

ECTS: 3

Learning Outcome:

Schriftliche Ausarbeitung musikwissenschaftlicher Themen in einer wissenschaftlichen Standards genügenden Hausarbeit.

Module GEO 875 Spatial Databases

07SMGEO875 / Lecture with Practical Exercises

Description:

General description:

This course is structured in two parts.

The first part introduces the fundamentals of database technology and database design, guiding participants from requirements analysis through conceptual, logical, and physical data models. The focus is on (object-)relational databases with corresponding data models. The course covers the basics of SQL and discusses the principles of efficient and effective data management.

The second part builds on these foundations and introduces spatial databases, focusing on the storage, management, and querying of spatial data with both geometrical and attribute variables. The focus will be on the fundamental approaches enabling the efficient storage, management and querying of geometrical and raster data, including considerations for the storage of topological data, intricacies of spatial indexing and the optimization of topological analysis through spatial indexes. The course will cover the extensions to the SQL query language that relate to spatial data handling. A brief overview of the current trends in non-relational spatial data handling will conclude the course. Applying theoretical fundamentals in practical exercises and a real-world project will further deepen the understanding of spatial databases.

ECTS: 6

Learning Outcome:

- Understand the fundamentals of database technology and the key steps in database design, from requirements analysis to an implementable data model;
- Apply principles and tools for data modeling and database design in realistic scenarios;
- Understand the fundamentals of spatial data storage, including the management of geometric and raster data in object-relational databases;
- Understand spatial indexing, topological data models, and spatial queries;
- Apply principles and tools for spatial data loading, storage, and querying in object-relational spatial databases.

Target Groups:

Master's majoring in geography or GIScience; students from other disciplines contact the instructor

Languages of Instruction:

English

Course Materials:

Lecture, practical exercises, Web resources

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Esra Suel

Requirements:

Prerequisites:

BSc

Assessment:

The module consists of two graded assessments, both of which must be passed separately with a grade of ≥ 4.0 .

1. a written exam
2. a group project

The written exam accounts for 30% and the group project for 70% of the final module grade. Students must pass both components separately to pass the module. Students who fail one or both components have one resit opportunity: a resit exam for the exam component, and one resubmission for the project.

Language of assessments: English

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Module ESS 386 Anmeldung Bachelorarbeit (Literatur)

07SMESS386 / Bachelor Paper / BA-Arbeit MNF

Description:

General description:

Students book the Bachelor's thesis registration module during the autumn semester. All information regarding the Bachelor's thesis GEO and ESS can be found in the Bachelor's thesis information sheet (de) (<https://www.geo.uzh.ch/de/studying/downloads-and-forms/downloads.html>).

In order to book the Bachelor's thesis, the following modules must already have been completed:

- GEO 111
- GEO 113
- GEO 121
- GEO 123
- GEO 186
- GEO 231
- GEO 233

Students who have not yet completed all modules and still need to take modules during the autumn semester cannot book the "Bachelor's Thesis Registration" module and should contact the Teaching Team of GIUZ at teaching-support@geo.uzh.ch.

By registering for the Bachelor's thesis, students simultaneously enrol in the BSc Thesis Seminar. Attendance at the seminar is mandatory. It is a block seminar; the dates will be announced in November.

ECTS: 0

Learning Outcome:

The learning outcomes of the seminar are:

- You are familiar with a structured approach to conceptualising your Bachelor's thesis.
You are acquainted with the requirements of a Bachelor's thesis.
- You are able to formulate a scientific research question.
- You are familiar with the IMRAD structure (Introduction, Methods, Results, and Discussion) for organising scientific texts and can apply it meaningfully to your own topic.
- You are familiar with fundamental formal requirements and practise them: the use of original sources, correct in-text citation, references to figures and tables, and the writing of meaningful captions.
- You have a draft structure for your Bachelor's thesis as well as a brief data and file management plan ready for discussion with your supervisor.

Merkmale:

Responsible instructor: Benedikt Korf

Requirements:

Assessment: The written bachelor's thesis is graded on a scale of 1 to 6 in quarter-point increments. If it is not passed, the module must be repeated.

Language of assessment: German or English

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module GEO 722 Transborder Urbanism

07SMGEO722 / Field Trip

Description:

General description:

Switzerland's third largest urban agglomeration of Basel extends across Swiss borders into French and German territories, bringing with it unique opportunities and challenges in terms of urban planning, mobility, and governance in Basel as well as its adjacent towns and cities. Rather than approaching northwestern Switzerland's tri-national, metropolitan region from its supposed center, this excursion interrogates how this transborder condition and the cross-border initiatives that have sprung from it affects urban development and everyday life in the French town and agglomeration of Saint-Louis. Participants will learn about the region's history of cross-border cooperation before exploring its effects on Saint-Louis's urban form and fabric using field-based methods. Site visits will include the Euroairport, Quartier de la Gare de Saint-Louis, and various spaces at and along the French-Swiss border. While multiple initiatives and efforts have sought greater territorial cohesion in this tri-national space over the years, the field course emphasizes a critical interrogation of enduring challenges and urban asymmetries as they materialize in Saint-Louis in particular.

Authorization clause: Students agree that the Department of Geography may make bookings and reservations on their behalf for the excursion within the specified budget.

Insurance coverage is the responsibility of the participants.

ECTS: 3

Notes:

Cost: The estimated costs of this excursion for participants is approximately 300 CHF (upper estimate) and includes accommodation, meals, and transport to, from, and within Saint-Louis (FR).

Course Format: Participants will meet twice in Zurich prior to the field excursion to discuss readings, form small groups, and determine independent site visits and thematic research focus prior to embarking on the field excursion. The course and the excursion are limited to 20 participants.

Registration OLAT-link:

- The registration deadline is August 1, 2026.
- <https://www.geo.uzh.ch/de/studying/during-your-studies/excursions.html>

The Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>) are a collection of 17 global goals interacting with each other, which are designed to be the "blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 10 & 11

Learning Outcome:

- Engage with key literature from border studies and urban studies to situate one's research into current debates on transborder urbanism
- Independently and collaboratively apply qualitative methods of field-based inquiry to explore how transborder territories shape spatial configurations and societal relations
- Deepen understanding of socio-territorial border effects in regional and international contexts

Languages of Instruction:

While knowledge of French is an asset for the field component, it is not required for

participation in the course.

Language of instruction: English

Merkmale: Target Group: Suitable for English Speakers

Requirements:

Assessment: Written assignment in conjunction with an oral/visual assignment.

Language of assessments: English

Grading Scale: Pass/Fail

Module Satisfaction with Politics: How People Experience Democracy in the 21st Century

06SM615p509 / Module

Description:

General description:

Das Modul fördert vertieftes Fachwissen in einem ausgewählten Forschungsfeld. Es vermittelt die Kompetenz, zu einem ausgewählten Thema Fragestellungen aus Sicht der Politikwissenschaft zu entwickeln und zu analysieren. Im Zentrum des Seminars stehen die politikwissenschaftliche und normative Analyse, das trennscharfe Analysieren der Begriffe in ihrer Anwendung auf empirische Studien und das Begründen politischer Sachverhalte. Die unterschiedlichen Themen werden theoretisch und empirisch vertieft.

ECTS: 6

Learning Outcome:

Fachkompetenzen: Verortung von Argumenten und empirischen Studien in den relevanten wissenschaftlichen Debatten zu einem ausgewählten Thema; Methodenkompetenzen: wissenschaftliches Schreiben und Argumentieren; Verfassen eines schriftlichen Beitrags (Policy Paper, wissenschaftliche Abhandlung, etc.)
Selbstkompetenzen: Definition eigener inhaltlicher Schwerpunkte, Selbsteinschätzung, Planungsfähigkeit.

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Petra Holtrup Mostert

Requirements:

Assessment:

Portfolio

Presentation (30%)

Final paper (70%)

Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden. Please note: All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed.

Module Spezialisierung: Global Party Systems

06SM615p007 / Module

Description:

General description:

Durch die Lektüre und problemorientierte Diskussion von Forschungsarbeiten werden die analytischen und forschungspraktischen Kompetenzen der Studierenden geschult. Im Kontext des Seminars erarbeiten die Studierenden ein Forschungsdesign, auf dessen Grundlage sie im Frühjahrssemester eine eigene empirische Forschungsarbeit (Ba- Arbeit) durchführen können.

ECTS: 6

Learning Outcome:

Fachkompetenzen: Theoretisch und methodisch fundierte Kenntnisse über die zentralen Akteure, Institutionen und Prozesse in einem ausgewählten Forschungsbereich; Verortung von Argumenten und empirischen Studien in den relevanten wissenschaftlichen Debatten; Methodenkompetenzen: Theoretische Argumente und deren (quantitative oder qualitative) empirische Analyse anhand von politikwissenschaftlichen Forschungsbeiträgen verstehen, nachvollziehen und kritisch beurteilen können; Erstellen eines Research-Designs; Formulierung einer hypothesengestützten wissenschaftlichen Fragestellung auf Basis selbstgewählter Quellen Selbstkompetenzen: Auffassung und Notizen nehmen, Selbstorganisation, Planungsfähigkeit;

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Hanno Degner

Requirements:

Prerequisites:

Grundlegende Ansätze und Theorien der Politikwissenschaft (Modulgruppe Einführung in die Politikwissenschaft), vertiefte Kenntnisse (Vorlesung, Seminar) im für die Veranstaltung ausgewählten Fach- und Themenbereich; erweiterte Kenntnisse sozialwissenschaftlicher Forschung (Konzeptualisierung, Forschungsdesign, Operationalisierung, Korrespondenzanalysen)

Assessment:

Portfolio

70% research design / 30% presentation

Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden. Please note: All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed.

Module Authoritarianism in the Digital Age

06SM615p510 / Module

Description:

General description:

Authoritarianism is back. Today, nearly 72 percent of the world's population lives under autocratic rule, and for the first time in more than two decades there are more autocracies than democracies worldwide (V-Dem, 2025). Understanding how authoritarian regimes maintain, legitimize, and stabilize power has therefore become one of the central challenges for political science. This seminar seeks to address this question by critically examining how contemporary non-democratic regimes exercise, legitimize, and stabilize power in the digital age. The course consists of three different blocks. The first block introduces the conceptual foundations necessary to distinguish various non-democratic, and illiberal regimes. The second block examines the evolving core toolkit of non-democratic rule by exploring how autocrats use institutions, elections, repression, co-optation, legitimation, diplomacy, and surveillance to maintain power, with particular attention to how these tools are reshaped by digital technologies and Big Tech corporations. In the final block, students apply the theoretical frameworks developed throughout the semester to a contemporary case of their choice, analysing how a specific non-democratic regime mobilizes political and technological resources to secure its rule. Assessment consists of an individual presentation, a social media video, and an end-of-term case regime report.

ECTS: 6

Learning Outcome:

Fachkompetenzen: Verortung von Argumenten und empirischen Studien in den relevanten wissenschaftlichen Debatten zu einem ausgewählten Thema; Methodenkompetenzen: wissenschaftliches Schreiben und Argumentieren; Verfassen eines schriftlichen Beitrags (Policy Paper, wissenschaftliche Abhandlung, etc.) Selbstkompetenzen: Definition eigener inhaltlicher Schwerpunkte, Selbsteinschätzung, Planungsfähigkeit.

Module Labor Migration in and from Eastern Europe (Lecture Series)

06SM480p012 / Module

Description:

General description:

Eastern, Central, and Southeast Europe offer a critical vantage point for understanding the complexities of migration, one of the defining forces of our time. Labor migration in and from this region has shaped economies, social structures, and political debates across Europe and beyond. Yet these movements are often overlooked or oversimplified in public discourse.

Since the nineteenth century, people have moved to, from, and within Eastern Europe in search of employment and social mobility. In many of the region's cities and localities, labor migration has transformed local economies, altered political dynamics, and reshaped everyday social life. In destination countries, these movements have contributed to the formation of new diaspora communities and increasingly interconnected labor markets. At the same time, migrants have built transnational networks and sustained cross-border cultural and economic ties that link workplaces, households, and communities across Europe.

This lecture series explores labor migration in and from Eastern Europe, broadly conceived, from a wide range of disciplinary and geographic perspectives. Across fourteen lectures, anthropologists, historians, sociologists and scholars from related fields trace key themes in labor migration from the nineteenth century to the present. Topics include border regimes and the racialization of migrants, precarity, informality, and remittances, as well as return migration and gendered dimensions of care and domestic work.

ECTS: 3

Learning Outcome:

Students will deepen their knowledge of Eastern Europe and become familiar with current research on migration across different disciplines.

Module Philosophy in Poetry and Poetry in Philosophy in Early and Medieval China

06SM280p516 / Module

Description:

General description:

Examination of a topic through comprehensive consideration of primary sources and wide reading in the relevant research literature under the guidance of the supervisor.

ECTS: 6

Learning Outcome:

Acquisition of in-depth and comprehensive knowledge of the current state of research on a selected specific topic on the basis of partly accompanied examination of the relevant research literature and primary sources. Practicing of the ability to independently examine and critically classify controversial issues and topics.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Wolfgang Behr

Requirements:

Prerequisites:

Good reading knowledge of Classical and Modern Chinese and English; ideally: reading knowledge of other European (German, French, Russian...) or Asian (Japanese, Korean ...) languages relevant to the topic.

Assessment:

Portfolio: Oral presentation, incl. preparation of a handout/presentation (30%); 30 minute oral exam during the first week after the end of the term (70%).

Oral exams:

- can be conducted in German or English. Dates will be fixed in the 9th week of the semester.
- specification of a self-chosen topic by the 8th week of the semester. For this purpose, an outline with a half-page sketch of the topic and at least five references should be submitted 4 weeks before the end of the term.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can't be repeated

Module Lecture in Prehistoric Archaeology

06SM682p005 / Module

Description:

ECTS: 3

Learning Outcome:

Die Studierenden gewinnen einen vertieften und kritischen Einblick in ein ausgewähltes archäologisches und kulturhistorisches Thema aus dem prähistorischen Europa und die aktuellen Forschungen auf diesem Gebiet. Sie kennen sich in den Denkmälern und Befunden aus, die für dieses Thema relevant sind. Sie haben einen Überblick über den das ausgewählte Gebiet betreffenden aktuellen Forschungsstand und die entsprechende Forschungsliteratur.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Philippe Della Casa

Requirements:

Assessment: Lektüre von ausgewählten Texten, Formulierung und Beantwortung von Fragen, Essay.

Die Vorlesung besteht aus jeweils einer VL-Lektion und einer (vorbereiteten) Diskussionslektion.

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Module Practical Field Training PRA

06SM682p004 / Module

Description:

General description:

Das Feldpraktikum erfolgt organisiert durch den Fachbereich Prähistorische Archäologie in Form von mindestens vierwöchigen Forschungs- und Lehrgrabungskampagnen. Diese Einheiten finden im In- wie Ausland statt und führen die Studierenden an die Praxis der Feldarbeit im Kontext der interdisziplinären Forschung heran. Aufgrund der begrenzten Teilnehmerzahl wird auf das Modul "Externes Berufspraktikum" als Alternative hingewiesen.

ECTS: 6

Notes:

Die Ausschreibung wird per separatem Aushang/Infomail angekündigt. Vorgängig zur Modulbuchung ist eine schriftliche Bewerbung bei der Lehrperson erforderlich.

Learning Outcome:

Die Studierenden kennen Methoden und praktische Anwendungen archäologischer Feldforschung. Gängige Abläufe für Feldprojekte sind ihnen bekannt und sie können diese praktisch umsetzen. Sie haben Erfahrung mit Dokumentationsstandards und dem Umgang mit Werkzeugen und Ausrüstung. Die Studierenden erfassen mittels Fotografie, Zeichnung und Vermessung archäologische Befunde. Sie beherrschen den Umgang mit Karten, Luftbildern etc. zur Umsetzung von Surveys. Die Handhabung und Archivierung von Fundmaterial ist den Studierenden vertraut. Neben vertiefter Fach- erwerben die Studierenden auch Sozial- und Teamkompetenz bei gemeinschaftlicher Bearbeitung praktischer Aufgaben.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Philippe Della Casa

Requirements:

Prerequisites:

Fachliche Eignung und Motivation: Motivationsschreiben und CV.
Überdurchschnittliches Engagement, Belastbarkeit und Motivation werden vorausgesetzt. Die Grabungssprache ist Französisch, deshalb sind gute Französischkenntnisse und vor allem auch die Bereitschaft, sich in einem mehrsprachigen Umfeld aktiv einzubringen Grundvoraussetzungen für eine Teilnahme. Eine einfache Unterkunft in einem nahe gelegenen Sportzentrum und die Verpflegung werden von den französischen Partnern gestellt. Neben den Tätigkeiten auf der Grabung wird die Mithilfe bei der Organisation des gemeinsamen Alltags erwartet.

Module AI 111 Artificial Intelligence and Critical Thinking

07SMAI111 / Block Course

Description:

General description:

The course is aimed at students in quantitative scientific disciplines at an early stage in their studies.

It introduces the concepts crucial for them to develop their epistemic agency, including the principles of and practice of scientific work, knowledge generation and critical thinking.

On this basis, the course is concerned with the integration of artificial intelligence (AI) methods into the scientific discovery process, including the analysis of large and complex datasets, pattern recognition, reasoning, and hypotheses building and testing. It is designed to enable productive and responsible use of AI.

ECTS: 1

Notes:

FAQ here: <https://dm3l.uzh.ch/studies/faq-modul-ai-critical-thinking>

Learning Outcome:

By the end of this lecture, students will understand the fundamentals of critical thinking, scientific logic, and the potential role of AI tools in the sciences. They should be able to critically evaluate the implementation of AI in the scientific method and demonstrate AI literacy.

Specific goals: - Explain the process and goals of critical thinking and the idealized scientific method and workflows, including critiques of them, especially when these are relevant to the use of AI tools.

Differentiate exploratory vs. confirmatory experiments.

- Describe at a surface level the functioning of key AI tools and their limitations (help prevent students from thinking that their LLM is becoming conscious/sentient)
- Define core AI terminology (AI, ML, DL, GenAI, LLM, dataset, feature, training/inference, bias, hallucination, prompt).
- Apply effective prompting and evaluation techniques - structure prompts (roles, goals, constraints), assess AI outputs for completeness, factuality, and bias, and explore retrieval-augmented generation (RAG) concepts.
- Describe the environmental impacts of AI use. Explain methods to counter AI fatigue, skill stunting, and skill atrophy
- Describe how AI tools can be implemented within scientific research, including writing, editing, coding.
- Apply critical thinking to evaluate AI implementations in science.
- Identify appropriate and inappropriate uses of AI in the scientific method.
- Assess the reliability and limitations of AI-generated scientific outputs. Describe the significance and limitations of foundation models.
- Reflect on ethical, legal, privacy and safety aspects - recognize bias and fairness issues, understand data protection, and practice responsible AI use in academic and everyday contexts.

Target Groups:

All bachelor students of MNF (in their first semester)

See FAQ: <https://dm3l.uzh.ch/studies/faq-modul-ai-critical-thinking>

Languages of Instruction:

Deutsch/Englisch

Course Materials:

Slides with notes will be provided. For browser-based interactive interventions, a laptop (or, less optimally also a tablet) is required.

Merkmale:

Responsible instructor: Jan Dirk Wegner
Reinhard Furrer
Titus Mangham-Neupert

Requirements:

Assessment: The exam for the module takes place on Saturday, 12.09.2026 between 14:00 and 14:30 as a "Bring Your Own Device (BYOD on site)" online exam. Doors open at 13:15.

To take the exam, you must bring your own laptop (Windows or macOS). The exam cannot be taken on tablets. To take the exam, it is required to install the Safe Exam Browser (SEB). Furthermore, online examination supervision (proctoring) is possible and is agreed upon booking the module.

In order to be admitted to the exam, you must complete a functional test using your individual technical equipment. Exact information on the required SEB version and other details will be provided to you during the lecture. A functional test will take place during the lecture on Friday, 11.09.2026. Completion of a functional test is mandatory. Students who have not completed a functional test will not be admitted to the exam.

For questions see FAQ: <https://dm3l.uzh.ch/studies/faq-modul-ai-critical-thinking>

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: The lectures take place from Wednesday to Friday, 09.-11.09.2026.
The exam takes place on Saturday, 12.09.2026.
An alternative exam date for students with NTA or who are ill is on 11.11.2026

Booking Deadline/Period: from We 12.08.2026 10:00 to Fr 11.09.2026 14:00

Cancellation Deadline: from We 12.08.2026 10:00 to Fr 11.09.2026 14:00

Module Political Campaign Strategy

06SM615p027 / Module

Description:

General description:

Das Modul dient dazu, erworbenes Fachwissen und die damit einhergehenden analytischen Fähigkeiten auf ein konkretes Politikthema anzuwenden und kritisch zu reflektieren

ECTS: 6

Learning Outcome:

Transfer theoretischer und methodischer Konzepte auf politische Fragen;
Reflektion & Einordnen & Bewertung von Faktenwissen in Bezug auf eine konkrete Themenstellung

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Hanno Degner

Requirements:

Prerequisites:

Grundlegende Ansätze und Theorien der Politikwissenschaft (gemäss Modulgruppe "Einführung in die Politikwissenschaft")

Assessment:

Portfolio

Oral presentation (30%) / Essay (70%)

Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden. Please note: All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can't be repeated

Organisation:

Offer pattern:

Module Computational Approaches to Study Political Communication

06SM615p544 / Module

Description:

General description:

Das Modul fördert vertieftes Fachwissen in einem ausgewählten Forschungsfeld. Es vermittelt die Kompetenz, zu einem ausgewählten Thema Fragestellungen aus Sicht der Politikwissenschaft zu entwickeln und zu analysieren. Im Zentrum des Seminars stehen die politikwissenschaftliche und normative Analyse, das trennscharfe Analysieren der Begriffe in ihrer Anwendung auf empirische Studien und das Begründen politischer Sachverhalte. Die unterschiedlichen Themen werden theoretisch und empirisch vertieft.

ECTS: 6

Learning Outcome:

Fachkompetenzen: Verortung von Argumenten und empirischen Studien in den relevanten wissenschaftlichen Debatten zu einem ausgewählten Thema; Methodenkompetenzen: wissenschaftliches Schreiben und Argumentieren; Verfassen eines schriftlichen Beitrags (Policy Paper, wissenschaftliche Abhandlung, etc.)
Selbstkompetenzen: Definition eigener inhaltlicher Schwerpunkte, Selbsteinschätzung, Planungsfähigkeit.

Module Specialisation: Regional Inequalities and Conflicts

06SM615p010 / Module

Description:

General description:

Durch die Lektüre und problemorientierte Diskussion von Forschungsarbeiten werden die analytischen und forschungspraktischen Kompetenzen der Studierenden geschult. Im Kontext des Seminars erarbeiten die Studierenden ein Forschungsdesign, auf dessen Grundlage sie im Frühjahrssemester eine eigene empirische Forschungsarbeit (Ba- Arbeit) durchführen können.

ECTS: 6

Learning Outcome:

Fachkompetenzen: Theoretisch und methodisch fundierte Kenntnisse über die zentralen Akteure, Institutionen und Prozesse in einem ausgewählten Forschungsbereich; Verortung von Argumenten und empirischen Studien in den relevanten wissenschaftlichen Debatten; Methodenkompetenzen: Theoretische Argumente und deren (quantitative oder qualitative) empirische Analyse anhand von politikwissenschaftlichen Forschungsbeiträgen verstehen, nachvollziehen und kritisch beurteilen können; Erstellen eines Research-Designs; Formulierung einer hypothesengestützten wissenschaftlichen Fragestellung auf Basis selbstgewählter Quellen Selbstkompetenzen: Auffassung und Notizen nehmen, Selbstorganisation, Planungsfähigkeit;

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Responsible instructor: Hanno Degner

Requirements:

Prerequisites: Grundlegende Ansätze und Theorien der Politikwissenschaft (Modulgruppe Einführung in die Politikwissenschaft), vertiefte Kenntnisse (Vorlesung, Seminar) im für die Veranstaltung ausgewählten Fach- und Themenbereich; erweiterte Kenntnisse sozialwissenschaftlicher Forschung (Konzeptualisierung, Forschungsdesign, Operationalisierung, Korrespondenzanalysen)

Assessment: Portfolio

Module French Theory: Deleuze, Lyotard, Foucault, Derrida

06SM160p001 / Module

Description:

General description:

The seminar will be devoted to some of the main thinkers of «French Theory»: Deleuze, Lyotard, Foucault and Derrida. We'll also work in this framework on the philosophy of Althusser, whose influence on these thinkers is massive. One session at least will be devoted to Rorty's interpretation of Derrida.

We will focus during the semester on what these thinkers advanced about the very nature of philosophy, its margins, its limits, and its relations to science and to politics. In other words, the seminar will be about the metaphilosophy of French Theory.

We'll study one text a week. I'll upload all the texts on OLAT a bit before the beginning of the semester. They will be English translations. Reading French won't be necessary then.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Philosophie des 19. und 20. Jahrhunderts»

Learning Outcome:

Kenntnis grundlegender Begriffe, Probleme und Theorien zum Thema des Seminars; die Fähigkeiten zur selbständigen Erarbeitung und Interpretation philosophischer Texte sowie der kritischen Reflexion von Argumenten aus der Philosophie des 19. und 20. Jahrhunderts. Fähigkeit zur konstruktiven und textbezogenen Diskussion.

Languages of Instruction:

Siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Benoit Gaultier

Requirements:

Prerequisites:

Für die Teilnahme sind keine Vorkenntnisse erforderlich.

Assessment:

We'll study one text a week. Portfolio

- 3 online comments about the text of the week will have to be made, on every week (40% of the grade).

- One in-class presentation will have to be made during the semester (40% of the grade).

- One essay version of the presentation will have to be written before the end of the semester (20% of the grade).

Module Rousseau's Political Philosophy

06SM160p016 / Module

Description:

General description:

«Der Mensch ist frei geboren, und überall liegt er in Ketten.» So schreibt Jean-Jacques Rousseau (1712-1778) zu Beginn seines Werks "Vom Gesellschaftsvertrag". In dem Seminar lesen und diskutieren wir dieses Buch sowie weitere Schriften Rousseaus zur politischen Philosophie, darunter den "Diskurs über die Ungleichheit unter den Menschen" sowie Auszüge aus "Émile". Sie sind überaus einflussreiche und bis heute aktuelle Untersuchungen von fundamentalen Fragen der politischen Philosophie, darunter: Wie -falls überhaupt - kann es gerechtfertigt sein, dass einige über andere herrschen? Wie kann Eigentum gerechtfertigt sein? Ist die Tatsache sozialer Ungleichheit mit dem bestehen gleicher natürlicher Rechte vereinbar? Welche Charaktereigenschaften müssen Menschen haben, um in einer freien Gesellschaft zusammen zu leben?

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Philosophie der Neuzeit» oder «Politische Philosophie».

Learning Outcome:

Kenntnis grundlegender Begriffe, Probleme und Theorien zum Thema des Seminars; die Fähigkeiten zur selbständigen Erarbeitung und Interpretation philosophischer Texte sowie der kritischen Reflexion von Argumenten aus der Philosophie der Neuzeit. Fähigkeit zur konstruktiven und textbezogenen Diskussion.

Module Immanuel Kant: Perpetual Peace

06SM160p015 / Module

Description:

General description:

Die erste Auflage von Immanuel Kants «Zum Ewigen Frieden» ist 1795 erschienen. In ihr entfaltet Kant die philosophischen Grundlagen für eine internationale Rechts- und Friedensordnung, u.a. des Völkerbunds. Gleichzeitig stellt er einen Ansatz für das Verständnis kultureller und ethischer menschlicher Evolution bereit, und stellt sich Fragen nach der Beziehung zwischen Philosophie und Politik und, wie normative Theorie und politische Praxis vermittelt werden können. «Zum Ewigen Frieden» ist einer der wichtigsten klassischen Texte zu einer der dringlichsten, allerdings häufig vernachlässigten, Aufgaben der Politik.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Philosophie der Neuzeit».

Learning Outcome:

Fähigkeiten zur selbständigen Erarbeitung und Interpretation eines schwierigen philosophischen Textes, sowie der kritischen Reflexion von Argumenten aus von Kants Schrift "Zum Ewigen Frieden". Fähigkeit zur konstruktiven und textbezogenen Diskussion. Fähigkeit des Teilens eigener Gedanken in einem geschützten Raum mit anderen Studierenden und der Dozentin. Mentaler Mut. Geistige Offenheit.

Languages of Instruction:

Siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Responsible instructor: Regina Surber

Requirements:

Prerequisites:

Wille zum Denken. Bereitschaft der Auseinandersetzung mit einem anregenden und herausfordernden deutschen Text. Geistiges Durchhaltevermögen. Bereitschaft zum Teilen der eigenen Gedanken in einer geschützten Gruppe. Fähigkeit zum respektvollen Austausch. Aushalten von Gegensätzen und Annahme des Offenbleibens wichtiger Fragen. Neugier gegenüber sich selbst und dem Leben. Bereitschaft zur Teilnahme an einem Computer-freien Seminar.

Assessment:

Portfolio

Portfolio, bestehend aus:

1. Entweder eine einmalige philosophische Präsentation einer Textstelle ohne Powerpoint, mit Bereitstellung eines Handouts zur Präsentation für die anderen Teilnehmer, oder eine einmalige schriftliche Abgabe eines eigenen Arguments mit persönlicher mündlicher Verteidigung bei der Dozentin. (Näheres zu Punkt 1 wird vor Beginn des Seminars von der Dozentin mitgeteilt.)
2. Je eine Diskussionsfrage um Thema des Textes für mindestens acht Sitzungen via OLAT.
3. Je ein Input zu einer Diskussionsfrage eines Studienkollegen oder einer Studienkollegin auf OLAT

4. Wöchentlich sichtbar bearbeitete Lektüretexte
Alle Teile des Portfolios müssen erfüllt sein, um das Modul zu bestehen.

Module Ethics of Artificial Intelligence

06SM160p009 / Module

Description:

General description:

Der Kurs untersucht ethische Herausforderungen im Kontext von KI. Wir werden u.a. folgende Fragen diskutieren: Gibt es Entscheidungen, die Künstliche Intelligenz (KI) prinzipiell niemals treffen soll? Weshalb soll aktuelle KI (basierend auf einem «Deep Learning Netz») niemals ein AKW steuern oder ein Flugzeug fliegen? Unter welchen Voraussetzungen ist es gerechtfertigt, KI den Status eines moralischen Subjekts zuzuschreiben, und ist eine solche Zuschreibung überhaupt jemals angebracht? Welche Kriterien muss KI erfüllen, damit wir verpflichtet sind, ihr Wohlergehen moralisch zu berücksichtigen? Sollten wir gegenüber Chatbots emotionale Bindungen entwickeln? Dürfen wir digitale Abbilder von uns selbst erschaffen? Ist KI eine Gefahr oder eine Chance, Arbeit sinnvoller zu gestalten? Welche Auswirkungen hat KI auf das Vertrauen in die Medizin und in andere gesellschaftlich zentrale Bereiche?

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Angewandte Ethik».

Learning Outcome:

Sie haben einen Überblick über wichtige ethische Fragestellungen zur KI.
Sie kennen wichtige moralische Argumente zum Status von KI.

Module Statistics and Probability

06SM160p007 / Module

Description:

General description:

Statistische Daten begegnen uns in Wissenschaft und Alltag ständig. Häufig scheinen sie unser einziger Zugang zu Ursache-Wirkungs-Zusammenhängen zu sein. In dieser Form dienen sie dann nicht nur dem wissenschaftlichen Erkenntnisgewinn sondern auch der Begründung weitreichender medizinischer oder politischer Entscheidungen. Doch bekanntlich sind statistische Daten fallibel und können leicht in die Irre führen. Insbesondere lässt sich der für die Statistik zentrale Begriff der Wahrscheinlichkeit in einer Reihe von verschiedenen Weisen interpretieren. Eine zentrale Frage in diesem Zusammenhang ist, ob Wahrscheinlichkeiten etwas sind, das objektiv in der Welt vorhanden ist, oder ob Sie lediglich unser Unwissen über die tatsächlichen Zusammenhänge widerspiegeln (oder vielleicht beides). Eine weitere zentrale Frage ist, inwiefern es möglich ist, durch statistische Daten auf Zusammenhänge zu schliessen, die über blossе Korrelation hinausgehen.

Im Seminar werden wir uns mit diesen und einer Reihe weiterer philosophischer Probleme im Zusammenhang mit Statistik und Wahrscheinlichkeit befassen.

Das Seminar ersetzt weder Einführungskurse zu statistischen Methoden, noch setzt es Kenntnisse solcher Methoden voraus. Wir werden uns in den ersten vier Sitzungen des Kurses die grundlegenden begrifflichen Werkzeuge der Wahrscheinlichkeitstheorie weitestgehend informell zueigen machen. Personen, die bereits vertraut mit statistischen oder wahrscheinlichkeitstheoretischen Methoden sind, soll das Seminar helfen, den philosophischen Hintergrund dieser Werkzeuge besser zu verstehen.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Erkenntnistheorie», «Sprachphilosophie» oder «Metaphysik».

Learning Outcome:

Die Studierenden erhalten Kenntnis grundlegender Begriffe der Wahrscheinlichkeitstheorie und Statistik und lernen, wie diese Begriffe philosophisch einzuschätzen sind.

Module Scepticism

06SM160p006 / Module

Description:

General description:

Was wissen wir, wirklich? In diesem Kurs betrachten wir skeptische Philosophie von der Antike bis heute. Hauptsächlich geht der Kurs um Erkenntnistheorie: Was ist Wissen, wie bekommen wir es, und wie prüfen wir, ob wir wirklich wissen? Die Hauptlernziele des Kurses sind: i) die Fähigkeit zu entwickeln, sorgfältiger und kritischer zu denken, ii) die eigenen Überzeugungen begründen zu können und iii) die notwendigen Werkzeuge zu erwerben, um philosophische Fragen selbstständig zu diskutieren.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Erkenntnistheorie», «Philosophie der Neuzeit».

Learning Outcome:

Kenntnis grundlegender Begriffe, Probleme und Theorien zum Thema des Seminars; die Fähigkeiten zur selbstständigen Erarbeitung und Interpretation philosophischer Texte sowie der kritischen Reflexion von Argumenten aus der Erkenntnistheorie. Fähigkeit zur konstruktiven und textbezogenen Diskussion.

Module Knowledge: Nature, Function, and Value

06SM160p008 / Module

Description:

General description:

In diesem Seminar werden wir klassische Texte zu grundlegenden Fragen der Erkenntnistheorie studieren. Was ist Wissen? Wozu dient es? Hat es einen Wert, und wenn ja, warum?

Wir werden uns hauptsächlich auf die neuere Literatur konzentrieren, die diese Fragen diskutiert (20. und 21. Jahrhundert). Ein Teil des Seminars wird einer der einflussreichsten Ideen der letzten zwanzig Jahre gewidmet sein, nämlich der Auffassung, dass Wissen ein nicht analysierbarer mentaler Zustand ist, der vielmehr zur Analyse anderer zentraler Begriffe der Erkenntnistheorie wie etwa Glaube, Rechtfertigung usw. herangezogen wird.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Metaphysik», «Erkenntnistheorie» oder «Sprachphilosophie».

Learning Outcome:

Kenntnis grundlegender Begriffe, Probleme und Theorien zum Thema des Seminars; die Fähigkeiten zur selbständigen Erarbeitung und Interpretation philosophischer Texte sowie der kritischen Reflexion von Argumenten aus der Metaphysik, Erkenntnistheorie und Sprachphilosophie. Fähigkeit zur konstruktiven und textbezogenen Diskussion.

Module Varieties of Understanding

06SM160p005 / Module

Description:

General description:

Modern epistemological theorizing has primarily been concerned with our ability to secure knowledge of reality as illustrated by the various attempts to offer an informative and systematic elucidation of this notion. One reason for this is that it has often been assumed that other epistemic achievements such as understanding are fundamentally a matter of knowing certain truths. However, recent developments in epistemology, philosophy of language and philosophy of science, cast doubt on that assumption and several philosophers have come to think of understanding - be it linguistic, empirical or moral - as a cognitive standing that needs to be addressed for its own sake, the question of its nature acquiring thereby a central place. This seminar will explore key philosophical questions pertaining to the nature of understanding with the aim to familiarise students with the main problems related to this issue. Particular attention will be given to distinctions that can be drawn between different types of understanding and to the way they might relate to one another.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Erkenntnistheorie» oder «Sprachphilosophie».

Module Trans Philosophy

06SM160p004 / Module

Description:

General description:

Trans Personen sind im politischen und medialen Diskurs zu Projektionsflächen geworden: zu Objekten vermeintlicher Sorge, moralischer Panik, bürokratischer Kontrolle und ideologischer Überformung. Dass Philosophie in diesen Konflikten keine neutrale Beobachterin ist, zeigt sich daran, wie häufig philosophische Begriffe, Methoden und vermeintlich «wertfreie» Argumente zur Legitimation transfeindlicher Positionen herangezogen werden. Der gegenwärtige Moment markiert daher einen epistemisch und politisch entscheidenden Punkt: Die Philosophie muss sich ihrer eigenen Verantwortung stellen. Trans Philosophie ist der Name für diesen Anspruch - und für ein Forschungsfeld, das ihn aktiv einlöst.

Trans Philosophie soll begriffen werden als politisch-epistemische Intervention, die sichtbar macht, wie die Grundlagen philosophischen Denkens hergestellt, abgesichert und politisch aufgeladen sind. Wenn Kategorien wie Person, Körper, Identität, Vernunft oder Öffentlichkeit strukturell trans Leben verfehlen, dann ist das kein Problem der "Grenzfälle", sondern ein Symptom einer philosophischen Methodologie, die sich selbst fälschlich für neutral hält.

Um dieses weite Themenfeld zu öffnen, werden wir uns in einem ersten Block mit der Frage auseinandersetzen, wo die Wurzeln der trans Philosophie ausfindig gemacht werden können. Anhand von Texten Jack Halberstam und Sandy Stone werden wir einige der Anfänge der trans Philosophie im amerikanischen Raum untersuchen. Anschliessend daran widmen wir uns eingehend der Frage, was trans Philosophie ist und was sie leisten kann und soll. Dazu lesen wir Texte von Talia Mae Bettcher und Robin Dembroff.

Im zweiten Block des Seminars wenden wir uns konkreten Subdisziplinen der Philosophie zu und werden diese anhand trans philosophischer Perspektiven und Antworten betrachten. Dazu gehören z.B. die Frage nach trans philosophischen Perspektiven auf Probleme der Epistemologie und der Phänomenologie. In diesem Block lesen wir Texte von Perry Zurn, Amy Marvin und Blas Radi.

Im dritten Block untersuchen wir die Kategorie trans intersektional: Wie verhält sie sich zu anderen Kategorien wie race, disability oder Intersexualität? Dazu lesen wir Texte von Marquis Bey, C. Riley Snorton, Cameron Ackward Rich und Maren Behrensen.

Als letztes widmen wir uns der trans Philosophie im deutschsprachigen Kontext und lesen Texte aus dem ersten deutschen Sammelband zu trans Philosophie, u.a. von Gen Eickers, Anna Klieber, Tyan Fritschy und Flora Löffelmann.

Dieses Seminar ist offen für alle Interessierte, unabhängig von der Geschlechtsidentität. Offenheit und Neugier sind gute Voraussetzungen, um daran teilzunehmen.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Erkenntnistheorie», «Metaphysik» oder «Sprachphilosophie».

Learning Outcome:

Kenntnis grundlegender Begriffe, Probleme und Theorien zum Thema des Seminars; die Fähigkeiten zur selbständigen Erarbeitung und Interpretation philosophischer Texte sowie der kritischen Reflexion von Argumenten

aus der Metaphysik, Erkenntnistheorie und Sprachphilosophie. Fähigkeit zur konstruktiven und textbezogenen Diskussion.

Module Bachelor thesis colloquium

06SM160p003 / Module

Description:

General description:

In den Kolloquien werden Texte der Teilnehmerinnen und Teilnehmer (insbesondere erste Fassungen und Teile von Bachelorarbeiten) gemeinsam diskutiert. Bei Bedarf können auch andere Texte besprochen werden. Studierende stellen ihre eigenen Texte den anderen Teilnehmenden rechtzeitig vor einem Kolloquiumstermin zur Verfügung und präsentieren und verteidigen ihre eigenen Texte im Kolloquium. Sie kommentieren die Texte von anderen Studierenden in Form von Koreferaten und in der gemeinsamen Diskussion. Bewertet wird die im Portfolio dokumentierte Gesamtleistung.

ECTS: 3

Learning Outcome:

Fähigkeit zur kurzfristigen Einarbeitung in fremde Themen, zur konstruktiven Kritik der Texte von anderen Studierenden, zur Verteidigung eigener Texte, zur Umsetzung von Kritik und zur Überarbeitung eigener Texte

Languages of Instruction:

Siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Responsible instructor: Christoph Caspar Pfisterer

Requirements:

Prerequisites: Die Teilnahme wird insbesondere fortgeschrittenen Bachelorstudierenden empfohlen.

Assessment: Portfolio (Präsentation des eigenen Textes 7/10, Koreferat bzw. Kommentar zu einem anderen Text 2/10, Diskussionsbeiträge 1/10)

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Kant, Metaphysics of Morals

06SM160p505 / Module

Description:

General description:

Entgegen der Erwartung, dass eine Pflichtethik wie die Kants den Tugenden allenfalls eine marginale Rolle zuweisen kann, widmet Kant in der Tugendlehre seiner Metaphysik der Sitten (1797) überraschend starke Aufmerksamkeit. Welche Stellung aber kommt der Kategorie der Tugend im Ganzen seiner Ethik und Anthropologie tatsächlich zu? Welche Implikationen ergeben sich umgekehrt aus dem systematischen Rahmen der Philosophie Kants für sein Verständnis von Tugenden, moralischen Vorbildern etc.? Im Seminar soll diesen Fragen anhand einer genauen Lektüre der Tugendlehre, aber auch von Texten aus der gegenwärtigen analytischen Debatte nachgegangen werden.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Philosophie der Neuzeit (Vertiefung)» oder «Allgemeine Ethik (Vertiefung)».

Learning Outcome:

Kenntnisse zum Thema des Seminars; die Fähigkeit, sich in komplexe philosophische Themen und Fragen sowie den jeweiligen Forschungsstand einzuarbeiten; die Fähigkeit zur kritischen Reflexion von Argumenten aus der Philosophie der Neuzeit.

Module Wittgenstein: Tractatus

06SM160p506 / Module

Description:

General description:

Wittgensteins Logisch Philosophische Abhandlung (Tractatus Logico-Philosophicus) ist einer der einflussreichsten philosophischen Texte des 20ten Jahrhunderts. Der junge Wittgenstein gibt im Vorwort dieser Abhandlung vollmundig zu verstehen, dass er die Probleme, die er im Buch bespricht, "im Wesentlichen gelöst" habe. Um was für Probleme geht es ihm? Um Probleme der Ontologie (Was gibt es und wie hängt es miteinander zusammen?), um Probleme der Sprachphilosophie (Wie hängen Sprache und Wirklichkeit miteinander zusammen? Was sind die Grenzen des Sagbaren?), um Probleme der Erkenntnistheorie (Was können wir wissen und was nicht?), um Probleme der Philosophie der Logik (Was ist Logik? Was sagt uns die Logik über die Welt?) aber auch um Probleme der Subjektivität, der Religion und des Mystischen. Um diese Probleme zu seiner Befriedigung zu lösen, benötigt Wittgenstein lediglich etwas mehr als 70 Seiten, an deren Ende er uns mitteilt, dass die Sätze seiner Abhandlung eigentlich unsinnig sind. Und obwohl Wittgenstein uns im Vorwort der Abhandlung mitteilt, dass ihm an einer vergnüglichen Lektüre für verständige Leser gelegen sei, lassen diese Stichpunkte schon erahnen, dass es in jedem Fall keine einfache Lektüre sein wird.

Im Seminar werden wir uns den Text Schritt für Schritt erschliessen. Wir werden dabei versuchen, uns nicht in den Bann der Wittgensteinschen Prosa reissen zu lassen, um den sachlichen Gehalt des Textes prüfen zu können.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Philosophie des 19. und 20. Jahrhunderts (Vertiefung)», «Sprachphilosophie (Vertiefung)», «Metaphysik (Vertiefung)» oder «Erkenntnistheorie (Vertiefung)».

Learning Outcome:

Die Studierenden lernen einen der wichtigsten Texte der Philosophie des 20ten Jahrhunderts kennen. In kleinschrittiger Analyse erarbeiten sie sich Interpretationskompetenzen bei der Auslegung schwieriger, ungewöhnlich strukturierter Texte. Im Zuge der Lektüre lernen vertiefen sie ihre Kenntnis zentraler Probleme der Metaphysik und der Philosophie der Logik.

Module Platon: Sophistes

06SM160p504 / Module

Description:

General description:

Platons Dialog Sophistes ist der modernste seiner Texte, da er Fragen behandelt, die bis heute die theoretische Philosophie prägen. Dazu zählen die Frage, ob es allgemeinste Begriffe gibt und wenn ja, welche, die Frage, wie man über das Nichtseiende sprechen kann, ohne es damit zu etwas Seiendem zu machen sowie die Frage, was eine Aussage wahr macht.

Das Seminar wird vor allem Platons Problemstellungen und Lösungsansätze behandeln. Dies wird grundsätzlich lehrreich sein für ein besseres Verständnis der theoretischen Philosophie. Griechischkenntnisse sind nicht erforderlich.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Philosophie der Antike und des Mittelalters (Vertiefung)».

Learning Outcome:

Kenntnisse zum Thema des Seminars; die Fähigkeit, sich in komplexe philosophische Themen und Fragen sowie den jeweiligen Forschungsstand einzuarbeiten; die Fähigkeit zur kritischen Reflexion von Argumenten aus der Philosophie der Antike sowie grundsätzlich von Themen der theoretischen Philosophie.

Module Authority, Coercion, and Political Power

06SM160p503 / Module

Description:

General description:

The concept of authority may seem morally problematic or downright incompatible with autonomy. On the other hand, it is not clear on inspection what normative significance the exercise of authority might have for those who are subject to it. On the other hand, moral, political, and legal philosophers generally agree that the notion of authority is central to parenthood or our self-conception as members of a shared political community or legal order. In this course, we will try to work our way out of the ambivalence of authority by exploring how the concept relates to us individually and as members of a common body politic. We specifically analyze the relation between the concepts of theoretical and practical authority and the relation between authority, coercion, and power.

ECTS: 6

Notes:

Studierende der Philosophie sowie des Programms Grundlagen der Moralphilosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Politische Philosophie (Vertiefung)».

Learning Outcome:

The aims of the course are that students

- a) gain an understanding of the concepts of authority, coercion, and power as proposed in the literature;
- b) gain an understanding of the normative questions surrounding authority and of how they are located within the wider debates in moral and political philosophy
- c) gain reading comprehension skills of demanding theoretical texts;
- d) gain systematic tools to normatively evaluate various approaches to authority;
- e) improve their ability to critically engage with philosophical arguments, both in writing and speaking;
- f) widen their experience of academic writing in moral and political philosophy

Module Conservatism

06SM160p502 / Module

Description:

General description:

Michael Oakeshott described conservative thinking as a preference for the familiar, the tried and tested, the limited, the close at hand, the sufficient, the pleasant, and the existing, which can be found to a certain degree in every human being. However, he considered the idea that conservative thinking should occupy a central place in practical politics for normative reasons to be questionable-but justifiable under certain conditions. In this seminar, we will explore and critically discuss this idea and supporting arguments based on texts mainly from contemporary political philosophical discourse. Topics will include the situational or context-dependent nature of conservative thinking (Oakeshott, Huntington); the anti-rationalist and skeptical foundations of conservative theory formation (e.g., Oakeshott, Hayek); attempts to conceptualize a specifically conservative type of values (e.g., Cohen, Matthes), as well as precautionary principles and other systematic reservations against innovation efforts (e.g., O'Hara, Brennan & Hamlin).

Module Philosophical Distinctions: A Critique

06SM160p501 / Module

Description:

General description:

In der Philosophie haben wir es oft mit sehr grundlegenden Unterscheidungen zu tun, die zum Standardrepertoire des philosophischen Denkens gehören. Solche Unterscheidungen können äusserst nützlich sein, insofern sie es ermöglichen, komplexe Sachverhalte präzise zu beschreiben und eine zuvor unübersichtliche oder verschwommene begriffliche Landschaft systematisch zu ordnen. Gleichzeitig können selbst liebgewonnene Unterscheidungen leicht zum Verhängnis werden, insbesondere dann, wenn sie problematisch, nicht erschöpfend oder nicht trennscharf sind, wenn ihre Grenzen oder Reichweite verkannt werden, oder wenn sie einfach falsch angewendet werden. In diesem Seminar werden wir anhand klassischer und zeitgenössischer Texte eine Reihe philosophischer Unterscheidungen kritisch erörtern, wie zum Beispiel jene zwischen analytischer und synthetischer Wahrheit, apriorischen und aposteriorischen Urteilen, Wissen (know that) und Können (know how), intrinsischen und extrinsischen, primären und sekundären Eigenschaften, Substanz und Qualität, Zustand und Ereignis, Type und Token, absolut und relativ, notwendig und kontingent, direkt und indirekt sowie subjektiv und objektiv. Indem die Kunst des Unterscheidens selbst zum Gegenstand philosophischer Überlegungen wird, können die Studierenden nicht nur ihr Problembewusstsein schärfen, sondern erhalten auch die Gelegenheit, zusätzliche Sicherheit im Umgang mit philosophischem Fachvokabular zu gewinnen.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vgl. programmspezifische Wegleitung): «Sprachphilosophie (Vertiefung)», «Erkenntnistheorie (Vertiefung)», «Metaphysik (Vertiefung)», «Philosophie der Antike und des Mittelalters (Vertiefung)», «Philosophie der Neuzeit (Vertiefung)» oder «Philosophie des 19. und 20. Jahrhundert (Vertiefung)».

Learning Outcome:

Kenntnisse zum Thema des Seminars; die Fähigkeit, sich in komplexe philosophische Themen und Fragen sowie den jeweiligen Forschungsstand einzuarbeiten; die Fähigkeit zur kritischen Reflexion von Argumenten aus der Metaphysik, Erkenntnistheorie und Sprachphilosophie

Prerequisites: Für die Teilnahme sind keine Vorkenntnisse erforderlich.

Assessment:

Portfolio (Input mit Thesenpapier, wöchentliche Diskussionsbeiträge im Forum, Disposition oder Kurzessay). Das Modul wird als <bestanden> bewertet, wenn alle Elemente des Portfolios bestanden sind.

Der fünf bis maximal zehnminütige Input zu einer Sitzung mit einem maximal einseitigen Thesenpapier kann von mehreren Teilnehmer:innen gemeinsam vorbereitet werden. Auch die Forumsbeiträge entwickeln sich im günstigen Fall zur gemeinsamen Diskussion. Der drei- bis fünfseitige Kurzessay zu einer vorgegebenen Frage ist bis zum 15. Januar 2027 abzugeben.

Grading Scale: Pass/Fail

Module Philosophy in the public sphere

06SM160p002 / Module

Description:

General description:

Philosoph:innen sind gefragt: als Expert:innen zu praktischen Fragen der Lebensführung, zu ethischen Konflikten im Bereich der Biotechnologie oder zur Einordnung von gesellschaftspolitischen Fragestellungen von der allgemeinen Wehrpflicht über gerechte Bildungschancen bis zu Fragen der Integration. Wie bringen sie ihre Themen präzise und doch verständlich in die Öffentlichkeit? Wie lässt sich über philosophische Fragen zugänglich und packend für ein breites Publikum schreiben? Und wie gelingt die Moderation einer philosophischen Debatte? In diesem Seminar geht es um die Kunst, philosophische Themen in die Öffentlichkeit zu tragen - mündlich wie schriftlich. Die Studierenden erproben verschiedene Formate, schreiben Texte, feilen am eigenen Auftritt und gestalten gemeinsam eine philosophische öffentliche Abendveranstaltung mitten in Zürich. Sie lernen ausserdem die Macher:innen des Zürcher Philosophiefestivals kennen sowie die Chefredakteurin des Philosophie Magazins in Berlin.

Barbara Bleisch, langjährige Moderatorin der "Sternstunde Philosophie" und Autorin philosophischer Sachbücher, teilt ihre Erfahrungen und erprobt gemeinsam mit den Studierenden verschiedene Formen des öffentlichen Philosophierens. Das Tutorat übernimmt die Philosophin Nina Weiss, die ebenfalls bei den Sternstunden gearbeitet hat.

ECTS: 6

Learning Outcome:

Die Studierenden lernen, philosophische Inhalte attraktiv aufzubereiten, dass sie einem breiteren Publikum verständlich werden, und vermögen in Eigenregie entsprechende Beiträge zu verfassen. Die Studiengruppe führt mit der Dozentin als Schlusspunkt des Seminars einen öffentlichen Abend durch, in dem wir unterschiedliche Formate präsentieren und mit der Öffentlichkeit ins Gespräch kommen. Ausserdem wird das Schreiben von Kolumnen und Zeitungsartikeln eingeübt.

Merkmale:

Responsible instructor: Barbara Christa Bleisch

Requirements:

Assessment:

Portfolio: 1. Erarbeiten eines Konzepts für eine philosophische Debatte oder ein philosophisches Gespräch; 2. Kurzvortrag zu einem selbst gewählten philosophischen Thema im Stil eines 'Science Slams'; 3. Verfassen eines Zeitungsartikels oder einer Kolumne zu einem philosophischen Thema; 4. Interview und dessen Verschriftlichung mit einer Philosophin / einem Philosophen; 5. Präsentation der genannten Inhalte respektive Umsetzung an der gemeinsamen Abendveranstaltung.

Das Modul wird als <bestanden> bewertet, wenn drei der Elemente 1 bis 4 des Portfolios bestanden sind sowie Element 5 bestanden ist.

Module Thomas Aquinas on Human Happiness

06SM160p013 / Module

Description:

General description:

Das Glück bildet für Thomas von Aquin das Ziel allen menschlichen Strebens. Aber worin besteht es? Welche Lebensform verheisst ein glückliches Leben? Wie ist der Zusammenhang von Glück und Lust zu verstehen? Ist das Glück überhaupt ein erreichbares Ziel? Diesen Fragen soll anhand einer Diskussion des Glückstraktats aus Thomas von Aquins Hauptwerk, der Summa Theologiae, (S.Th. I.II., q. 1-5) nachgegangen werden.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Philosophie der Antike und des Mittelalters».

Learning Outcome:

Kenntnis grundlegender Begriffe, Probleme und Theorien zum Thema des Seminars; die Fähigkeiten zur selbständigen Erarbeitung und Interpretation philosophischer Texte sowie der kritischen Reflexion von Argumenten aus der Philosophie der Antike und des Mittelalters. Fähigkeit zur konstruktiven und textbezogenen Diskussion.

Module Social Contract Theory

06SM160p014 / Module

Description:

General description:

What makes political authority legitimate? What do citizens owe each other? these are questions we ask, either directly or indirectly, all the time. This course examines one of the most influential traditions of political philosophy that provides a comprehensive answer to these questions - social contract theory. We explore how philosophers have used the idea of a hypothetical agreement to justify political authority, explain the origins of society, and define the rights and obligations of citizens and governments.

This course examines some of the main thinkers of social contract theory. This will include theorists such as Thomas Hobbes, John Locke, and Jean Jacques Rousseau. At the same time, it will try to 'improve' upon this legacy by looking at contemporary theorists, namely John Rawls. Finally, it will take a critical lens of this approach from non-Western perspectives.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Philosophie der Neuzeit».

Learning Outcome:

By the end of this course, students will be able to explain core concepts and arguments of major social contract theorists, including Hobbes, Locke, Rousseau, and Rawls. They will also be able to critically engage with these thinkers from non-western perspectives.

They will be able to understand key challenges to traditional contract theory, including feminist and critical race perspectives. They will be able to critically assess the explanatory and normative power of social contract as a basis for political obligation

Module Role Models and Ideals in Ethics

06SM160p012 / Module

Description:

General description:

Gibt es in der Ethik Raum für Ansprüche, die über die Erfüllung unserer Pflichten hinausgehen? Welche Rolle spielen dabei Ideale und Vorbilder, etwa Figuren wie Helden oder Heilige? Führt die Orientierung an Idealen eher zu Selbstüberforderung und Zynismus - oder inspiriert sie im Gegenteil zu Handlungen, die ohne hohe Selbstansprüche gar nicht möglich gewesen wären? Anhand von Texten aus der analytischen Philosophie der Gegenwart soll diesen Fragen im Seminar nachgegangen werden.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Allgemeine Ethik».

Learning Outcome:

Kenntnis grundlegender Begriffe, Probleme und Theorien zum Thema des Seminars; die Fähigkeiten zur selbständigen Erarbeitung und Interpretation philosophischer Texte sowie der kritischen Reflexion von Argumenten aus der allgemeinen Ethik. Fähigkeit zur konstruktiven und textbezogenen Diskussion.

Module Normative Foundations of Democracy

06SM160p010 / Module

Description:

General description:

The objectives of the seminar are that students:

- gain an understanding of fundamental concepts and key debates of normative democratic theory;
- learn to critically analyze concepts, arguments, and theories of democracy;
- gain systematic tools to normatively evaluate specific political processes;
- develop skills in reading and discussing demanding theoretical texts;
- widen their experience of academic writing in normative political theory.

Module Care Ethics

06SM160p011 / Module

Description:

General description:

Die Care-Ethik ist in den 1980er Jahren als eine feministische Ethik aufgekommen, die die einseitige Betonung von Individualismus, Rechten, Abstraktion und Universalismus im Utilitarismus und der Deontologie hinterfragte. Im Gegensatz dazu betont die Care-Ethik, dass Menschen in gegenseitigen Abhängigkeiten und Beziehungen leben, dass ethische Argumentation an Erfahrungen und den jeweiligen Kontext anknüpfen muss und, dass Gefühle und Haltungen eine wichtige Rolle spielen. Daraus ergibt sich ein Fokus auf den Begriff 'Care', also das Sorgetragen, Sorgen und die Fürsorge für andere.

Im Seminar werden wir unterschiedliche Ansätze und Schwerpunkte innerhalb der Care-Ethik kennenlernen. Ausgehend von Carol Gilligan und Nel Noddings, die meist als Begründerinnen dieser ethischen Richtung gelten, werden wir verschiedene Weiterentwicklungen sowie Kritik an der Care-Ethik betrachten. Dabei diskutieren wir unter anderem die Verbindung von Care-Ethik und Feminismus, die Frage ob Ethik 'parteiisch' sein darf, und inwiefern mit Care-Ethik auch politische Fragen diskutiert werden können. Anhand ausgewählter Beispiele werden wir auch die Rolle der Care-Ethik in konkreten Bereichsethiken, beispielsweise in der biomedizinischen Ethik, der Tierethik oder Umweltethik, thematisieren.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Angewandte Ethik».

Learning Outcome:

Kenntnis grundlegender Begriffe, Probleme und Theorien der Care-Ethik; die Fähigkeiten zur selbständigen Erarbeitung und Interpretation philosophischer Texte sowie der kritischen Reflexion von Argumenten aus der angewandten Ethik. Fähigkeit zur konstruktiven und textbezogenen Diskussion.

Module Field Practicum: Advanced Skills

06SM682p501 / Module

Description:

General description:

Die Studierenden sind eng in das Team eingebunden und sind für einen ausgewählten Bereich der Grabung zuständig und verantwortlich. Sie übernehmen eine Schnittleitung oder bestimmte Bereiche der Dokumentation, für deren Abläufe und Vollständigkeit sie verantwortlich sind. In Zusammenarbeit mit der Grabungsleitung werden die genauen Aufgaben festgelegt, zu denen auch die Anleitung von weniger fortgeschrittenen Studierenden gehört. Im praktischen Umgang auf der Grabung werden relevante Methoden und Lerninhalte des gesamten Studiums angewandt. Der Transfer auf die Grabung stellt eine besondere, eng am Berufsfeld orientierte Herausforderung dar. Das Modul steht an der Schnittstelle zwischen universitärer Lehre und beruflicher Praxis.

ECTS: 3

Learning Outcome:

Als erfahrene Teilnehmerinnen und Teilnehmer sind die Studierenden in der Lage, die Verantwortung für bestimmte Bereiche einer Grabung und/oder der entsprechenden Dokumentation zu übernehmen. Sie sind befähigt, Entscheidungen über die Arbeitsabläufe zu treffen. Die Dokumentation erstellen sie im vorgegebenen Rahmen selbständig. Sie können Befunde interpretieren und dokumentieren sowie Fundmaterial beschreiben und bestimmen. Neben vertiefter Praxis erwerben die Studierenden auch Sozial- und Teamkompetenz bei der Erledigung praktischer Aufgaben im Grabungsteam.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Corinna Reinhardt

Requirements:

Prerequisites: Fachliche Eignung, überdurchschnittliches Engagement, Belastbarkeit und Motivation werden vorausgesetzt. Erfahrungen in praktischer Feldarbeit.

Dieses Modul steht nur Master-Studierenden offen. Es darf nicht von Bachelor-Studierenden als vorgezogenes Mastermodul gebucht werden.

Assessment: dokumentierte praktische Arbeit

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Request period: not bookable

Place allocation at the latest:

Waiting list progression period: not bookable

Cancellation period: not cancelable

Module Focus courses Speech: Speech Technology

06SM523p003 / Module

Description:

General description:

This module focuses on advanced topics in human and machine speech and voice processing. It covers core principles of acoustic modelling, feature extraction, and computational methods used in applications such as speech recognition, speech synthesis, and voice identification. Students also explore how humans produce and perceive speech and voice, allowing for a comparative understanding of biological and computational systems. The module integrates theoretical perspectives with practical work using speech and voice processing tools. It is designed to deepen students' knowledge of speech communication and prepare them for engagement with current scientific questions in the field.

ECTS: 6

Learning Outcome:

Students can:

1. deepen their knowledge in selected areas of human and machine speech and voice processing.
2. strengthen methodological skills for analyzing and working with speech and voice data.
3. evaluate contemporary scientific questions related to speech and voice communication.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Srikanth Madikeri Raghunathan

Requirements:

Prerequisites:

Successfully completed module "Introduction to Speech and Voice Processing" or equivalent knowledge.

Assessment:

Portfolio: 60% assignments and 40% final exam.

The final assessment will be a written exam with pen and paper.

Date of the written exam on site (paper pencil): Jan 22, 2027 from 10:15 - 11:45
(90 minutes).

Grading Scale:

1-6, Half Grades Given

Repeatability:

Module Language attitudes

06SM440p513 / Module

Description:

General description:

This course explores language attitudes toward English and its varieties, examining how beliefs, ideologies, and evaluations of language shape social interaction, identity, and power relations. Students will engage with key theoretical frameworks from sociolinguistics, social psychology, and linguistic anthropology, including concepts such as standard language ideology, prestige, stigma, accent bias, and linguistic discrimination. The course combines classic and contemporary research on attitudes toward native and non-native varieties of English, global Englishes, and multilingual contexts.

Methodological approaches to studying language attitudes - such as matched-guise experiments, surveys, interviews, and discourse analysis - are critically evaluated. Through readings, discussions, and empirical analysis, students will develop a nuanced understanding of how language attitudes are formed, reproduced, and challenged, and how they intersect with issues of race, class, gender, education, and policy. The course equips students with both theoretical insight and analytical tools for advanced research in English linguistics and sociolinguistics.

ECTS: 9

Learning Outcome:

Students are able to research relevant theoretical and methodological background of selected aspects of sociolinguistics in the British Isles, including data collection, analysis and statistical testing. On the basis of relevant literature, they develop their own research hypotheses and apply the core concepts in the analysis of their data. They learn to discuss and present these aspects in class and subsequently integrate them into their written work.

Languages of Instruction:

Englisch

Merkmale:

Responsible instructor: Daniel Schreier

Requirements:

Prerequisites:

Students are expected to know the core concepts of different areas of linguistics. They need to have experience with data analysis for linguistic research projects and they are expected to have written term papers in English linguistics at Bachelor level. Students are required to have good (written) academic English language skills (Level C1). Students are expected to have taken the Methods and Theories in English Linguistics Module or equivalent Master-level courses elsewhere.

This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module

Assessment:

Portfolio: mündliche Präsentation 1/3, schriftliche Arbeit 2/3

Paper deadline: February 15, 2027

Grading Scale:

1-6, Half Grades Given

Module Short Internship: Englischsprachige Bücher einer historischen Kinderbuchsammlung (Partner Institut Schweizerische Eidgenossenschaft)
06SM440p517 / Module

Description:

General description:

Im Laufe des Praktikums erhalten die Studierenden Einblicke in die vielfältigen Tätigkeiten des Schweizerischen Instituts für Kinder- und Jugendmedien SIKJM, das als nationales Kompetenzzentrum von praxisorientierten Projekten der literalen Förderung bis hin zur Forschung unterschiedlichste Aufgaben wahrnimmt. Das SIKJM beherbergt in seiner Bibliothek verschiedene historische Kinderbuchsammlungen, darunter die «Sammlung Waldmann» mit einem gewichtigen Bestand englischsprachiger Bücher, dessen inhaltliche Erschliessung grosse Potentiale aufweist. Es bieten sich verschiedene Möglichkeiten, nach Absprache mit der Kandidatin/dem Kandidaten, aus einem ausgewählten gattungs-, epochen- oder themenspezifischen Blickwinkel zur weiteren Erschliessung dieser Sammlung bzw. des Nachlasses von Elisabeth Waldmann beizutragen.

Das Praktikum wird mit einem Portfolio basierend auf den Forschungsergebnissen abgeschlossen, vorzugsweise in Form von Inhalten für die Social Media Kanäle des SIKJM und des Englischen Seminars

ECTS: 3

Notes:

Bewerbungsunterlagen (in einem einzigen PDF-Dokument einzureichen):

ein Motivationsschreiben (1 bis 2 Seiten) ein kurzer Lebenslauf (max. 2 Seiten)

Bachelordiplom

falls vorhanden, letztes Semestertranskript aus dem Masterstudium

Die englischen Bewerbungsunterlagen sind einzureichen bei: englishstudies@es.uzh.ch

Deadline: 19. August 2026

Das Modul muss ebenfalls im Modulbuchungssystem angefragt werden!

Learning Outcome:

Studierende können:

den Charakter und Inhalt einer historischen Kinderbuchsammlung umreissen; Recherchearbeiten mit SLSP durchführen, in Kombination mit weiteren Onlinerecherchen (Bibliotheken/Online-Textplattformen); Resultate adressat*innengerecht präsentieren.

Languages of Instruction:

Englisch

Merkmale:

Responsible instructor: Olivia Tjon-A-Meeuw

Requirements:

Prerequisites:

- Affinität zur Kinder- und Jugendliteratur - Bereitschaft, einen Teil der Arbeit vor Ort in der SIKJM-Bibliothek zu leisten - Sprachkenntnisse: Englisch und Deutsch

This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module.

Assessment:

Documented practical work: Inhalte für die Social Media Kanäle des SIKJM und

des Englischen Seminar. Zusätzlich kurze Reflexion über die Arbeit und die Inhalte.

Grading Scale: Pass/Fail
Repeatability: Can't be repeated

Module Short Internship: The Art Collection of the Zurich James Joyce Foundation

06SM440p518 / Module

Description:

General description:

The Zurich James Joyce Foundation hosts one of the world's most important collections on the Irish modernist James Joyce. In addition to books and other types of texts, the Foundation also has a unique collection of posters, photographs, and artworks.

At the start of their internship, students will be given a short introduction into the history and activities of the Foundation. They will also be given material that will help them gain a basic overview of the life and works of James Joyce. However, the main aim of this short internship project is for the students to assist the Foundation team in creating an illustrated inventory of the artworks in the Foundation's collection.

Tasks will include:

taking high-quality pictures of the artworks; researching information on the creators and the artworks in question; identifying gaps in the information available; defining a set of keywords that will make it easier to locate individual works; presenting one piece of art on the Foundation's website.

In addition, students may be asked to assist members of the team during public events, readings, etc..

ECTS: 3

Notes:

How to Apply (Deadline 19 August 2026)

The application dossier (in one single PDF) should contain:

a letter of motivation (1 to 2 pages)

a short CV Bachelor diploma

Last semester transcript

Please send the application dossier to englishstudies@es.uzh.ch and martin.muehlheim@joycefoundation.ch.

Students must also apply to the module via the booking system.

Learning Outcome:

After the internship, students will be able to:

outline James Joyce's life and works, including their broader significance within the modernist canon;

list the main aims and activities of the Zurich James Joyce Foundation;

provide an overview of the Foundation's art collection;

contextualize some of these works of art;

create a website entry on a piece of art inspired by Joyce.

Module What is a Question?

06SM160p508 / Module

Description:

General description:

Questions themselves give rise to further questions. The aim of this seminar is to explore some of them. We begin with an issue in the philosophy of language: do interrogative sentences express propositions? A second issue belongs to the philosophy of mind: what kind of mental state are we in when we ask ourselves a question? Finally, we turn to the central question of whether all questions are good questions—one that will enable us to engage with several particularly delicate problems in epistemology. The seminar thus situates itself at the intersection of three core areas of theoretical philosophy.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Metaphysik (Vertiefung)», «Erkenntnistheorie (Vertiefung)» oder «Sprachphilosophie (Vertiefung)».

Learning Outcome:

Familiarity with the seminar topic; the ability to engage with complex philosophical issues and questions, as well as with the current state of research; and the capacity for critical reflection on arguments in metaphysics, epistemology, and the philosophy of language.

Languages of Instruction:

Siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Anne Meylan

Requirements:

Prerequisites:

Für die Teilnahme sind keine Vorkenntnisse erforderlich.

Assessment:

Portfolio

- A. Leading the discussion (1/3)
- B. Presentation with handout (1/3)
- C. Essay (1/3)

If any one of these components is not completed, the entire portfolio will be considered incomplete and the module will therefore be graded as failed (grade 1).

Active participation in class discussion is expected.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Request period: from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Place allocation at the latest: Sa 29.08.2026 22:00

Waiting list progression period: from Sa 29.08.2026 22:00 to Do 10.09.2026 24:00

Cancellation period: from Sa 29.08.2026 22:00 to So 13.09.2026 24:00

Module The Rational Inquirer: Disagreement, Evidence, and Doxastic Attitudes

06SM160p507 / Module

Description:

General description:

In this seminar, we will primarily read the recent book (2025) by Prof. Michele Palmira. The book examines how rational agents ought to respond to disagreement. We will also engage with a number of foundational papers on the topic of disagreement.

The aim of the seminar is to prepare students to present their work at a small workshop at the end of the semester, which Michele Palmira will attend. This will provide them with an opportunity to develop proposals and/or objections to which he will seek to respond. The assessment is designed with this goal in mind.

ECTS: 6

Notes:

Philosophy students wishing to write a seminar paper should, in consultation with the instructor, enroll in the corresponding elective module without a course component, within which the paper will be written (cf. programme-specific guidelines): "Epistemology (Advanced)".

Learning Outcome:

Knowledge of the seminar topic; the ability to work through complex philosophical issues and questions, as well as the relevant research literature; and the capacity for critical reflection on arguments in <metaphysics / epistemology / philosophy of language>.

Languages of Instruction:

Siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Anne Meylan

Requirements:

Prerequisites:

Für die Teilnahme sind keine Vorkenntnisse erforderlich.

Assessment:

Portfolio.

A. Presentation with handout (2-3 pages maximum);

B. Preparation of a short presentation (30 minutes) to be delivered as part of the Palmira workshop at the end of the semester (based on the presentation previously given in the seminar);

C. Participation in the Palmira workshop at the end of the semester.

All assessment components (A-C) must be completed in order for the seminar to be considered as passed.

E. Participation in discussion: bonus.

Leading the discussion (1/3), initial presentation with handout (1/3), workshop presentation (1/3).

All components of the portfolio must be completed in full. If any component is not completed, the entire portfolio will be considered incomplete and the module will therefore be graded as failed (grade 1).

Grading Scale:

1-6, Half Grades Given

Repeatability: Can't be repeated

Module J.J. Thomson: Normativity

06SM163p501 / Module

Description:

General description:

Judith Jarvis Thomson (1929-2020) ist eine der einflussreichsten Moralphilosophinnen und Metaphysikerinnen der letzten Jahrzehnte. Bekannt ist sie insbesondere für einzelne weit über die Philosophie hinaus bekannte akademische Artikel zu Abtreibung, dem Trolley-Problem oder dem Recht auf Privatsphäre. Sie hat sich aber auch in systematischer Weise mit philosophischen Fragen auseinandergesetzt, etwa in ihrem vielbeachteten Buch «The Realm of Rights».

In «Normativity» (2008) geht sie der Frage nach, wie evaluative Urteilen (z.B. «Dies ist ein guter Regenschirm») mit direktiven Urteilen (z.B. «Ein Toaster sollte gleichmässig toasten») zusammenhängen und was sie wahr macht, wenn sie wahr sind.

Im Seminar werden wir sowohl Thomsons Buch als kritische Auseinandersetzungen damit lesen, diskutieren und auf ihre Plausibilität testen.

Und um nicht alleine für die Werbung verantwortlich zu sein, soll hier Gilbert Harmans Lob für «Normativity» zitiert werden: ««Normativity» is a careful, rigorous account of the meanings of the most basic normative terms: good, virtue, correct, ought, should, and must. Along the way, Thomson refutes almost everything other philosophers have said about these topics. It is a very important book.»

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Allgemeine Ethik (Vertiefung)»

Studierende des Minor «Grundlagen der Moralphilosophie», die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Jüngere Debatten in der Moralphilosophie»

Learning Outcome:

Kenntnisse zur philosophischen Diskussion rund um Normativität; die Fähigkeit, sich in komplexe philosophische Themen und Fragen sowie den Forschungsstand in Bezug auf Normativität einzuarbeiten; die Fähigkeit zur kritischen Reflexion von Argumenten aus der allgemeinen Ethik.

Languages of Instruction:

Module Scientific Theories, Observation, and Reality

06SM164p501 / Module

Description:

General description:

Science makes claims about observable features of the world that can be tested by observation and experiment, but it also seems to make claims about entities, processes, and structures that are not directly observable. This raises important questions. Is there a principled way to distinguish between the observable and the unobservable? More importantly, if observation and experiment are the evidential basis for science, what-if anything-can justify belief in theoretical claims that cannot be directly tested in experience? Scientific realism holds that such claims aim at truth and that we are sometimes warranted in believing them; anti-realism holds that accepting a theory does not require belief in its truth beyond what can be observed and measured.

How we approach these issues is shaped by how we conceive of scientific theories. On one account, theories are bodies of statements; on another, they are families of models; a further account treats theories as inseparable from their use in inquiry, including idealisations, measurement practices, and experimental techniques. These contrasting pictures affect how the observational/theoretical divide is framed, how evidence is taken to support theory, and what a realist stance could amount to.

By engaging with classic and contemporary texts, we will explore how these issues connect and how scientific theories relate to the world. No scientific knowledge is assumed.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Erkenntnistheorie (Vertiefung)», «Metaphysik (Vertiefung)».

Studierende des Minor «Wissenschaftsphilosophie», die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Philosophie der Naturwissenschaften».

Learning Outcome:

Kenntnisse zum Thema des Seminars; die Fähigkeit, sich in komplexe philosophische Themen und Fragen sowie den jeweiligen Forschungsstand einzuarbeiten; die Fähigkeit zur kritischen Reflexion von Positionen und Argumenten zu Fragen der Philosophie der Einzelwissenschaften

Module Lecture Series in Social Anthropology Fall Semester 2026

06SM721p514 / Module

Description:

General description:

The Lecture Series in Social Anthropology (Ethnokolloquium) is a series of lectures and a module for students at Bachelor's and Master's level. Participation in the Lecture Series offers insights into current socio-anthropological research, facilitates exchange with professionals about their research, and may help to extend your academic network.

Four to five of the sessions consist of public lectures with an invited guest speaker. Guest speakers may be either external academics or members of the ISEK-Social Anthropology. These sessions are composed as a 45'-long lecture, followed by a discussion between guest speaker and the audience. Afterwards, we usually go for a drink or a meal in the neighbourhood. In addition, there are four to five sessions to prepare the lectures through in-depth text discussions with departmental academic staff.

In a few sessions students work with the co-ordinator of the lecture series and they participate in the "Talk at the Library".

ECTS: 3

Learning Outcome:

Students are able to discuss and present their reflections on a variety of anthropologically relevant topics. Students learn how to introduce a guest speaker and formulate questions in discussions.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Juliane Neuhaus

Requirements:

Prerequisites:

It is recommended for participating students in the Bachelor that all modules of the assessment year (module group "Einführung in die Ethnologie") be taken first.

Assessment:

Portfolio: Written paper (90%), oral participation (10%)

Students write a paper on the basis of the guest speaker's texts and presentation.

Grading Scale:

Pass/Fail

Repeatability:

Can't be repeated

Module Law and AI

02SM90WM113 / Course

Description:

General description:

What is a machine learning model, and where does the law attach to it? Why are neural networks black boxes, and what does that mean for the right to an explanation? Can fairness be put in legal terms, and if competing fairness definitions cannot all hold at once, who decides? When an AI system decides, what does meaningful human oversight actually require?

This course equips students to reason rigorously about artificial intelligence - not as a metaphor or buzzword, but as a set of concrete technical systems with concrete legal consequences. Its central wager is that sound legal reasoning about AI is impossible without a real understanding of how these systems work - one built from the ground up, using only the mathematics the arguments genuinely require.

The first half of the course demystifies the technology - machine learning, neural networks, data pipelines, and large language models - at a genuine conceptual and technical level; the second half turns to the conceptual problems that follow: accuracy, discrimination, fairness, explainability, automation, and value alignment. Regulation is woven in where it attaches and consolidated at the end, so that it appears as the answer to problems students already understand.

Two cases run through the whole course, met first as technical objects and later as legal problems: COMPAS (recidivism risk scoring), which threads through the machine-learning, data, accuracy, discrimination, and fairness sessions and resurfaces in *State v. Loomis*; and *Mata v. Avianca* (the lawyer sanctioned for AI-fabricated citations), which anchors the session on large language models.

Module Lecture Series on Law & Finance

02SM90WM115 / Course

Description:

General description:

The Law & Finance Lecture Series brings together leading international scholars, practitioners, and policymakers to explore key developments at the intersection of law, finance, technology, corporate governance, and sustainability. Through a series of guest lectures, speakers address both foundational and emerging issues shaping global financial and corporate systems, offering comparative and cross-jurisdictional perspectives. The series covers a broad range of topics, including financial regulation, corporate law and governance, fintech and digital platforms, and the growing role of sustainability and ESG considerations in finance. By engaging with cutting-edge research and real-world regulatory experiences, students are exposed to contemporary policy debates and the legal challenges arising from technological innovation and sustainable finance initiatives. The lecture series aims to complement classroom teaching by fostering critical discussion and providing students with direct access to international expertise, enhancing their understanding of how legal frameworks respond to economic, technological, and societal change in a global context.

ECTS: 6

Learning Outcome:

By the end of the Law & Finance Lecture Series, students will be able to critically assess key legal and regulatory issues in finance, corporate governance, technology, and sustainability from an international perspective. Students will gain exposure to comparative approaches and real-world regulatory experiences, enhancing their ability to understand and evaluate how legal frameworks respond to financial innovation, corporate practices, and sustainability objectives. The series will also strengthen students' analytical and discussion skills by engaging with leading experts and contemporary policy debates at the global level.

Module Regulating AI - A comparative introduction of legal frameworks for developing and employing AI
02SM90WMG9 / Course

Description:

General description:

Künstliche Intelligenz (KI) entwickelt sich mit enormer Geschwindigkeit und verändert viele Bereiche des Alltags. Dies birgt das Potenzial für schnellere, intelligentere und inklusivere Produkte und Dienstleistungen. Gleichzeitig bringt jede bahnbrechende technische Entwicklung neue Institutionen, neuartige soziale Interaktionen, gesellschaftlichen Wandel und letztlich neue Lebensweisen mit sich. Die Vorlesung untersucht, wie Gesetzgeber und Regulatoren auf KI reagiert haben. Es wird ein globaler Ansatz verfolgt, der die Studierenden sowohl mit Entwicklungen in der Schweiz, der EU und den USA vertraut macht. Im ersten Teil des Kurses wird ein knapper Überblick über Datenschutzrecht gegeben, soweit dies für die Entwicklung von KI erforderlich ist. Der zweite Teil des Kurses stellt, ebenfalls knapp, die EU KI-Verordnung vor. Im dritten Teil werden aktuelle KI-Anwendungsfälle unter allen drei Rechtsordnungen besprochen. Der Schwerpunkt liegt auf dem Finanzmarkt- und dem Kapitalgesellschaftsrecht, aber, nach Wahl der Studenten, können auch Anwendungsfälle aus dem Arbeitsrecht oder dem Medizin-/Arztrecht besprochen werden.

ECTS: 3

Learning Outcome:

Lernziel ist Verständnis dafür, wie die Entwicklung und die Verwendung von KI rechtlich eingeordnet wird.

Target Groups:

Fortgeschrittene Studenten

Module Disability Rights: Law and History

02SM120WM24 / Course

Description:

General description:

The course explores how societies have understood disability across different historical periods and examines the development of modern disability rights frameworks at both national and international levels. Students will also analyze the contemporary human-rights-based model by examining key legal milestones, social movements, and landmark policies, including the UN Convention on the Rights of Persons with Disabilities (CRPD). Through case studies, readings, and discussions, the course encourages students to critically assess how legal systems shape the lived experiences of persons with disabilities and how historical struggles for recognition continue to inform today's debates on equality, accessibility, and inclusion.

ECTS: 3

Learning Outcome:

After completing the course, the student will be able to:

1. Explain the historical development of societal understandings of disability across different periods.
2. Analyze key legal milestones and landmark policies that have shaped disability rights, with particular attention to the UN Convention on the Rights of Persons with Disabilities (CRPD).
3. Evaluate contemporary issues of accessibility, equality, and inclusion through the lens of disability rights and human-rights principles.

Target Groups:

The course is open not only to students enrolled in the Faculty of Law but also to students from all other faculties who are interested in disability rights, social justice, human rights, or related interdisciplinary perspectives.

Module Introduction to the Law of Finance, Technology & Sustainability

02SM120WM25 / Course

Description:

General description:

Introduction to the Law of Finance, Technology and Sustainability provides students with a foundational understanding of the key actors, activities, and regulatory challenges shaping contemporary financial markets. The course introduces the legal frameworks governing financial institutions, markets, and instruments, while situating them within broader economic, technological, and societal contexts.

Students are exposed to both traditional issues in financial regulation-such as market stability, investor protection, and systemic risk-and emerging challenges driven by technological innovation, including digital finance, platforms, fintech, and data-driven business models. The course also focuses on the growing role of sustainability considerations in finance, including ESG factors, sustainable finance initiatives, and the legal responses to climate-related financial risks.

Throughout the course, students are initiated into the policy debates surrounding the regulation of finance, gaining insight into how legal rules are designed, justified, and adapted in response to innovation and crises. By combining legal analysis with real-world examples, the course equips students with the conceptual tools necessary to understand how finance, technology, and sustainability intersect in modern financial systems.

ECTS: 3

Learning Outcome:

By the end of the course, students will be able to identify and explain the main actors, instruments, and activities in contemporary financial markets and understand the core legal principles governing them. Students will develop a basic ability to analyze regulatory challenges arising from financial innovation, technological change, and sustainability objectives, and to situate these challenges within ongoing policy debates. They will gain familiarity with key concepts related to fintech, platforms, and sustainable finance, and acquire the foundational skills necessary to critically assess how law responds to contemporary developments in modern financial systems.

Module BIO 655 Journal Club Medical Virology

07SMBIO655 / Colloquium

Description:

General description:

The Journal Club Medical Virology is a weekly colloquium where students at the Institute of Medical Virology present and critically evaluate current research papers, followed by a discussion. Topics cover the breadth of medical virology, including viral pathogenesis, host-pathogen interactions, immunology, and clinical diagnostics.

ECTS: 1

Notes:

For Master students and PhD students.

Internal room, Institute of Medical Virology

Learning Outcome:

The Journal Club Medical Virology equips students with the essential competencies for analyzing, reviewing, and presenting cutting-edge research. Participants explore core topics in pathogenesis, host-pathogen interactions, and clinical virology while developing the ability to critically appraise peer-reviewed literature, synthesize complex scientific findings, and discuss their implications.

Module An Introduction to the Philosophy of Embodied AI

06SM160p017 / Module

Description:

General description:

This course investigates the role of embodiment within the discourse on language-focused artificial intelligence («Language AI»), centered around a fundamental question: Is an entity such as a Large Language Model (LLM)- which is non-embodied and non-living-capable of speaking or understanding language? This is essentially a conceptual inquiry, revolving around the precise meanings of specific pivotal concepts, especially the concepts of living being and language.

Designed as an introduction, the course is intended for undergraduate philosophy students as well as students from other disciplines with an interest in the subject matter.

The two central concepts of the course are living being and language. The significance of language manifests in two ways:

The Course's Technological Focus: An examination of AI systems that process natural language, specifically LLMs.

The Course's Conceptual Focus: An emphasis on the notions of linguistic understanding and the act of speaking.

We begin by examining what it means to be alive, building on the Neo-Aristotelian position of PMS Hacker.

Next, we focus on language, drawing upon the fundamental pragmatic insight that language is essentially a rational, norm-governed social practice, as highlighted by Robert Brandom.

This will be followed by a theoretical and practical introduction to LLMs.

Building upon these three sections, the fourth and final part of the course addresses our guiding question: Can a non-embodied, non-living being-specifically an LLM-engage in speech or truly understand language? This concluding section will be informed by current relevant academic literature, including research by David Chalmers and Thomas Fuchs.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Metaphysik» oder «Sprachphilosophie».

Learning Outcome:

Upon completion of this course, students will:

1. Possess a comprehensive understanding of central philosophical positions regarding the nature of linguistic understanding and the act of speaking.
2. Be conversant with foundational perspectives within the philosophy of embodied cognition, especially in its Neo-Aristotelian varieties.
3. Demonstrate the ability to critically apply these theoretical positions and perspectives to the conceptual analysis of Large Language Models (LLMs).

Languages of Instruction:

Siehe Sprache der Lehrveranstaltung(en)

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Reto Gubelmann

Requirements:

Prerequisites: Für die Teilnahme sind keine Vorkenntnisse erforderlich.

Assessment: The assessment for this module is based on a tripartite portfolio, comprising the following components:

1. Introductory Presentation: A presentation of approximately 10 minutes regarding a selected text (40% of final grade).
2. Three Position Papers: Three concise papers formulating central theses on three distinct texts (60% of final grade).
3. Six Peer Comments: Six critical responses to the position papers submitted by fellow students, focusing on further distinct texts (pass/fail).

Please note: The completion of portfolio components necessitates physical attendance during the respective seminar sessions.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Module Praktikum

06SM615p025 / Module

Description:

General description:

Das Modul dient dazu, erworbenes Fachwissen und die damit einhergehenden analytischen Fähigkeiten auf ein konkretes Politikthema anzuwenden und kritisch zu reflektieren.

ECTS: 6

Notes:

Bitte entnehmen Sie weitere Informationen unserer Webseite unter www.ipz.uzh.ch/de/studium/praktikum-und-karriere.html#Praktika (<https://www.ipz.uzh.ch/de/studium/praktikum-und-karriere.html%23Praktika>)

Sie können dieses Modul nicht selbst einbuchen.

Learning Outcome:

Transfer theoretischer und methodischer Konzepte auf politische Fragen;
Reflektion & Einordnen & Bewertung von Faktenwissen in Bezug auf eine konkrete Themenstellung.

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Responsible instructor: Petra Holtrup Mostert

Requirements:

Prerequisites: Grundlegende Ansätze und Theorien der Politikwissenschaft (gemäss Modulgruppe "Einführung in die Politikwissenschaft").

Assessment: Portfolio: Praktische Tätigkeit bescheinigt durch Arbeitgeber:in (80%), Praktikumsbericht (20%) Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden.

Please note: All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed.

Module BIO 656 Journal Club HIV-Biology: Experimental and Theoretical Aspects

07SMBIO656 / Colloquium

Description:

General description:

The Journal Club HIV-Biology is a weekly colloquium where students present and critically evaluate current research papers, followed by a discussion. Topics cover the breadth of HIV biology, including experimental and theoretical aspects

ECTS: 1

Notes:

For Master students and PhD students.

Internal room, USZ, Rämistrasse 100, U-85-RAE

Learning Outcome:

Equips students with the essential competencies for analyzing, reviewing, and presenting cutting-edge research. Participants explore core topics in HIV biology while developing the ability to critically appraise peer-reviewed literature, synthesize complex scientific findings, and discuss their implications.

Module The Labour Market: Occupational Structures, Changes and Outcomes

06SM240p014 / Module

Description:

General description:

This course examines the labour market, occupational change, and individual outcomes, focusing on how macro-level arrangements, such as institutions and occupational structures shape people's working lives. The course explores key occupational characteristics and structural processes, such as (de)segregation, digitalisation, institutionalisation, flexibilization, and segmentation, and how they transform the organisation and distribution of work. Building on this, students will also investigate how different occupations are associated with varying risks and chances, including unemployment, wages, flexibility, and working time arrangements. Combining theoretical and empirical perspectives, the course equips students to understand how structural forces, occupational positions, and individual attributes interact to produce social inequalities in work and employment.

ECTS: 6

Learning Outcome:

The students will:

- Develop a solid understanding of how labour market dynamics and occupational structures shape individual outcomes such as unemployment risk, wages, and working time.
- Strengthen their ability to critically engage with theoretical and empirical research on structural change and occupational inequality.
- Improve their capacity to analyse and communicate complex ideas about how macro-level processes and occupational positions contribute to social stratification.
- Enhance oral communication skills by presenting, synthesising, and debating contemporary research on work, occupations, and labour market change.

Module The Everyday in Theory: An Introduction to Ethnographic Methods

06SM240p022 / Module

Description:

General description:

This course introduces students to ethnographic methods as part of a broader sociological research toolkit. It traces the development of ethnography as a method and introduces students to key elements of fieldwork, alongside the theoretical and political implications of such research. A central focus is the interplay between ethnographic practice and sociological theory. Students will be encouraged to bring theories from their own work to explore how ethnography can complement, expand, or challenge other sociological methods. The course combines seminars, selected readings, writing exercises, and mini-fieldwork tasks. Each student will produce a short ethnographic piece related to their research interests. Sessions involve discussions of methodological texts and exemplary ethnographies, tailored to student projects. We will consider what kinds of questions ethnography can answer-and what new questions it may raise for their projects.

ECTS: 6

Notes:

Students will be expected to bring their own laptop, to prepare a short reflective piece on set texts, and to participate in a short 'field trip'. Additionally, students will be encouraged to 'practice ethnography', which - where possible - will contribute to their final paper. Overall, students will be encouraged to bring their own thematic and research interests to the course.

Learning Outcome:

By the end of the course, students will:

- Be familiar with ethnographic methods, what they involve, and their implications for sociological theory
- Understand how ethnography has developed across the social sciences and how it differs from other approaches
- Be able to situate ethnography within contemporary methods and articulate its value in mixed-methods research
- Reflect on the epistemological, ethical, and political dimensions of ethnographic knowledge production
- Produce a short ethnographic piece related to their research and theoretical interests
- Engage critically with the possibilities and limits of 'getting close' to the social worlds they study

Module American Society

06SM240p024 / Module

Description:

General description:

This course provides an introduction to American society as interpreted by sociological perspectives. Emphasis is placed on dominant themes in sociology: inequality, the reproduction of inequality across generations, and social capital. In exploring these themes, we will consider major questions that Americans are asking themselves today: Why are there Black ghettos? Why do the "richer get richer, and the poor get poorer?" And is the American society disintegrating as trust is destroyed and an American "aristocracy emerges?"

ECTS: 6

Learning Outcome:

The course aspires to serve as an introduction to basic concepts in sociology, a look at some major social problems in American society, and a stimulus to think about Switzerland in sociological terms.

Module The Social Dimension of Climate Change

06SM240p025 / Module

Description:

General description:

Climate change is not just an environmental crisis; it is deeply embedded in social structures and dynamics. This course examines the complex interactions between climate change and human societies, focusing on its causes, consequences, and responses at both local and global levels. Students will analyze climate-induced migration, health disparities, and the unequal distribution of environmental risks. Further, they will explore the political and cultural narratives shaping climate action, including debates on climate justice and responses from communities, policymakers, and international organizations. The course adopts a global and comparative perspective, with a strong emphasis on the Global South and the disproportionate environmental burdens faced by vulnerable populations.

ECTS: 6

Learning Outcome:

By the end of the course, students will:

1. Understand how climate change interacts with social, political, and economic systems.
2. Analyze the social and demographic impacts of climate change, including migration, economic inequality, and public health.
3. Critically engage with climate justice debates and policies at local and global levels.
4. Develop critical thinking skills to assess climate action initiatives and environmental justice discussions.

Module Introduction to Sociological Gender Studies

06SM240p026 / Module

Description:

General description:

Das Seminar vertieft zentrale Fragestellungen und Theoriekonzepte der soziologischen Geschlechterforschung. Nach einer Einführung in die Grundbegriffe werden zentrale Theorieperspektiven und ihre jeweiligen Untersuchungsgegenstände vorgestellt. Darauf aufbauend wird der neuere Diskurs zur (De-)Konstruktion von Geschlecht eingeführt und Verbindungen zur Queer Theory hergestellt. In einem letzten Teil werden Einblicke in aktuelle Forschungsfelder wie Geschlecht und Organisationen/Hochschule sowie Familie und Reproduktion gegeben.

ECTS: 6

Learning Outcome:

Vermittlung von Kenntnissen über die zentralen theoretischen und methodischen Konzepte zur soziologischen Analyse von Geschlechterverhältnissen sowie verbundene empirische Forschungsfelder, Gendersensibilisierung

Module Sociological Imagination and Other Classic Texts

06SM240p027 / Module

Description:

General description:

A core task of Sociologists is to think about how to think about the interaction between the individual and society - in other words, discuss how sociological research and theory building should be done. This includes general perspectives on the social world, as well as approaches to specific sub-domains of the discipline. In each of these approaches, a set of facts and assumptions are used to reach conclusions using logically structured arguments. This course aims to strengthen the understanding of these approaches, as well as understanding how arguments are built and structured. To this end, each week a different classic or modern sociological text is discussed and dissected.

ECTS: 6

Learning Outcome:

The goal of this course is to (i) get insights into a variety of different theoretical perspectives on Sociology, (ii) understand and reproduce the logical structure of an argument, and (iii) learn to write clearly structured essays. Especially the last two parts are crucial in this course. Students of the course are expected to read a preparatory article before each session and write a short essay (~1000-1500 words) every 1-2 weeks to improve their ability to develop and communicate clear arguments surrounding the classic texts treated in class. The aim is to prepare students for writing excellent theses and other theoretically informed academic works.

Module Casusal Inference in the Social Sciences

06SM240p007 / Module

Description:

General description:

Max Weber definiert Soziologie als Wissenschaft, die soziales Handeln deutend verstehen und ursächlich erklären will. Ziel ist es also, Ursachen und Wirkungen zu erkennen. Beispiele: Wir können prüfen, ob ein höherer Mindestlohn Beschäftigung verändert, ob frühkindliche Bildung spätere Lebensläufe beeinflusst oder ob strengere Sanktionen Normbefolgung fördern. Schwierigkeit: Viele Faktoren hängen zusammen, es gibt mehrere Erklärungen oder Experimente sind außerhalb des Labors kaum machbar. Deshalb ist es oft schwer, klare Kausalzusammenhänge nachzuweisen. In den letzten Jahrzehnten haben die Sozialwissenschaften jedoch Fortschritte erzielt: Mit dem Potential-Outcome-Framework rückt das Studiendesign ins Zentrum, um Kausalität sichtbar zu machen. Das Seminar setzt Grundkenntnisse in Forschungsdesign und Regressionsanalysen voraus, führt in zentrale Konzepte (DAGs, Potential Outcomes) ein und gibt einen Überblick über verschiedene Methoden der Kausalinferenz und deren Umsetzung in R.

ECTS: 6

Learning Outcome:

Die Studierenden...

- ... kennen die Grundbegriffe der Kausalanalyse und können diese auf empirische Analysen anwenden
- ... können für eine Forschungsfrage ein 'ideales' Forschungsdesign entwickeln
- ... verstehen versch. Methoden der Kausalanalyse und können diese auf empirische Daten anwenden

Module Sociology of Work

06SM240p008 / Module

Description:

General description:

This course offers a sociological overview of work and employment, exploring how work is structured, experienced, and transformed in contemporary societies. With a particular focus on technological change, globalization, and the shifting nature of labour, the course examines how work shapes identity, well-being, and everyday life. Drawing on classical and contemporary theories, historical developments, and current debates, students will critically analyse job quality, workplace inequalities, professionalization, and the challenges of balancing work and family. Topics include labour market restructuring, deindustrialization, workplace culture, unpaid and informal labour, gendered divisions of labour, and evolving employment relations. Combining macro-level analysis with micro-level experiences, the course emphasizes intersectionality, diversity, and cross-national comparisons to foster a deeper understanding of work in a globalized world.

ECTS: 6

Learning Outcome:

This course provides students with a sociological foundation in topics related to work and employment, with a particular focus on the impact of emerging technologies in the workplace. By the end of the course, students will be able to: a) identify and critically engage with major sociological and interdisciplinary theories about work, labour markets, and employment relations; b) discuss how social structures such as class and gender shape patterns of work; c) reflect on issues of precarity, job quality, identity, control, and resistance. Students will develop the ability to analyse how work intersects with broader systems of power, and how these dynamics are experienced differently across social groups. The course encourages students to challenge assumptions and think critically about their own work-related experiences and expectations.

Module Exemplary Studies of Political Sociology and the Welfare State

06SM240p010 / Module

Description:

General description:

Competition is a fundamental pillar of any capitalistically organized market economy. On the one hand, competition creates incentives that promote innovation, ensure quality, and reduce prices. Competition creates markets, and markets create profits and winners. On the other hand, competition produces socially undesirable and sometimes unintended consequences. Competition redistributes opportunities and risks, generates losses, and creates losers. In democratic regimes, citizens and organized interests have (fought for) opportunities to control these processes, compensate for losses, and secure profits. As a result, the welfare state has become a central component of political conflicts and modern democratic market economies. The welfare state is intended to protect citizens from the negative consequences of market mechanisms and market failures, improve opportunities in life, and alleviate social injustice.

ECTS: 6

Learning Outcome:

This seminar systematically analyzes the welfare state in tension between democracy and capitalism. Firstly, we will look at the 'classics' of capitalism research, which continue to shape current political debates and ideologies. We then define democracy and explore why (different) types of welfare states have emerged and what role organized interests and social ideas have played. This will be followed by a brief review of the current situation and challenges before we look at the non-European area in the last third of the seminar. The seminar is intended to provide an analytical and theoretical fundament in the field of political sociology.

Module Industrial society and the Crisis at its End

06SM240p011 / Module

Description:

General description:

Vierzig Jahre nachdem Ulrich Beck beschrieb, das Ende der Industriegesellschaft würde ähnlich radikal verändernd werden wie ihr Anfang, erleben wir in der Tat eine neuerliche globale Krise, die neben Unterschieden auch einige Ähnlichkeiten zu derjenigen der 1930er Jahre aufweist. Ein guter Grund, sich die vergangene Phase dazwischen einmal historisch-soziologisch anzuschauen, samt der sozialen Realität, die den Alltag in den 1950er bis 1970er Jahren prägte, und den Prozessen, die dazu und seit 1968 wieder von dort weg führten und führen.

ECTS: 6

Learning Outcome:

Sie besitzen ein Verständnis der gesellschaftsgeschichtlichen Phase der Industriegesellschaft und der krisenhaften Phänomene in ihrer Entstehung und an ihrem Ende.

Module Group and Identity: Processes of Ethnic Delineation

06SM240p018 / Module

Description:

General description:

Unsere Zugehörigkeit zu bestimmten sozialen Gruppen prägt maßgeblich, wie wir uns selbst sehen und wird Teil unserer sozialen Identität. Im Seminar beschäftigen wir uns mit der Entstehung sozialer Gruppen mit einem Fokus auf die Ethnie. Dabei stehen die Prozesse ethnischer Grenzziehung im Mittelpunkt. Anhand soziologischer Konzepte und empirischer Studien werden wir untersuchen, wie sich ethnische Identitäten ausbilden bzw. geformt werden und welche Bedeutung sie für das Handeln von Akteuren haben. Fragen, die uns in diesem Kontext beschäftigen werden, betreffen u.a. die Frage, unter welchen Bedingungen die ethnische Identität vor allem einen symbolischen Wert hat oder wann sie gezielt eingesetzt wird, um bestimmte Vorteile zu erlangen. Dabei wird auch die Frage der empirischen Erfassung von Ethnizität und ethnischen Minderheiten berücksichtigt und kritisch hinterfragt.

ECTS: 6

Learning Outcome:

Die Teilnehmenden bekommen einen Einblick in die Migrationssoziologie und erwerben fundiertes Grundlagenwissen über Prozesse der ethnischen Grenzziehung und deren Implikationen. Darüber hinaus erlernen/vertiefen sie die Fähigkeit, Methoden des wissenschaftlichen Arbeitens erfolgreich anzuwenden.

Module Poverty and Wealth in Highly Developed Economies

06SM240p019 / Module

Description:

General description:

Soziale Ungleichheit bezeichnet die ungleiche Verteilung (im-)materieller Ressourcen in einer Gesellschaft und die daraus resultierenden unterschiedlichen Möglichkeiten zur Teilhabe an dieser. Soziale Ungleichheit manifestiert sich nicht nur in der Einkommens- oder Vermögensverteilung sondern auch in anderen Lebensbereichen wie im Bereich der Bildung, Gesundheit oder der sozialräumlichen Teilung. In der Vorlesung werden wir die Auswirkungen sozialer Ungleichheit auf Gesellschaften und Individuen aus theoretischer Sicht erörtern. Insbesondere in hochentwickelten Ökonomien ist die Diskussion um soziale Ungleichheit in letzter Zeit wieder stark entfacht. Empirisch gesehen ist Armut in hochentwickelten Ökonomien in den letzten Jahren massiv zurückgegangen. Aber nicht der Reichtum. Wir konzentrieren uns hierbei auf die Schweiz und hochentwickelte Ökonomien wie USA, Deutschland, Frankreich. Der Kurs bietet eine Einführung in soziale Ungleichheit aus Perspektive der Wirtschaftssoziologie.

ECTS: 6

Learning Outcome:

Studierende können folgende Fragen kritisch diskutieren: Wie hat sich die soziale Ungleichheit an den Rändern der Verteilung, also für sehr reiche und sehr arme Personen, auf nationaler und globaler Ebene in den einzelnen Ländern und Regionen entwickelt? Steigt der Anteil an Spitzenverdienern und -vermögen tatsächlich immer stärker an? Und wie entwickelt sich die gefühlte soziale Ungleichheit, insbesondere in Wohlstandsländern? Wie sieht es in der Schweiz aus: Ist soziale Ungleichheit ein Problem, oder eher nicht?

Module Organizational and Innovation Sociology

06SM240p020 / Module

Description:

General description:

Unter den Gesichtspunkten Arbeitsteilung, Kooperation und Herrschaft analysiert die Organisationssoziologie unterschiedliche Organisationstypen (u.a. Unternehmen, Verbände, Universitäten, Krankenhäuser, Verwaltung, Kirchen, Militär, NGO, Klöster) und die Einbettung dieser Organisationstypen in Gesellschaften. Den Kern bilden Organisationstheorien, die in Folge ihrer Vielfalt die soziologische, ökonomische, politikwissenschaftliche und psychologische Forschung befruchtet haben. Die mit der Organisationssoziologie verwandte Innovationssoziologie untersucht, wie soziale, technologische und ökonomische Innovationen entstehen, wie sich diese in Gesellschaften und Märkten verbreiten und wie diese mit der Zeit durch neue Innovationen abgelöst werden. Organisations- und Innovationssoziologie haben gemeinsam, dass diese Mikro-, Meso- und Makrosoziologie in Theorie und Empirie miteinander vereinen.

ECTS: 6

Learning Outcome:

Erwerb von Wissen über Organisationen und Innovation in Gesellschaften. Dieses Wissen ist für den späteren Einstieg in die Berufspraxis von Relevanz. Zudem kann dieses Wissen auch für die Forschung hilfreich sein.

Module Digital Violence Through the Course of Life

06SM240p021 / Module

Description:

General description:

Das Seminar untersucht digitale Gewalt als lebenslauf- und generationenspezifisches Phänomen, das je nach Lebensphase mit unterschiedlichen Manifestationen, Risiken und Ressourcen einhergeht. Im Fokus steht, wie sich Exposition, Vulnerabilität, Bewältigung und institutionelle Unterstützung über Übergänge wie Schule, Arbeitsmarkt, Partnerschaft/Elternschaft oder Alter verändern. Denn Betroffenheit und Täterschaft sind nicht zufällig: Jugendliche erleben Cybermobbing und Sexting in Gruppenchats oder nutzen gewaltförmige Profile zur sozialen Positionierung; beim Berufseinstieg treten reputationsbezogene Angriffe und "Cancel"-Dynamiken auf. In Familienkontexten sind Sharenting-Konflikte und digitale Partnergewalt relevant, im Alter unter anderem Identitätsdiebstahl oder Altersdiskriminierung. Auf Basis soziologischer Lebenslauf-Theorien und empirischer Studien analysieren die Teilnehmenden diese Dynamiken und entwickeln Transferideen für Praxisfelder wie Schule oder Arbeitswelt.

ECTS: 6

Notes:

Der Termin am Montag 14.09.26 wird online/remote stattfinden.

Learning Outcome:

Die Teilnehmenden erwerben (1) fundiertes Grundlagenwissen zu digitaler Gewalt und ihren Mechanismen, (2) können digitale Gewalt mit lebenslauf- und generationensoziologischen Ansätzen verknüpfen und daraus Muster von Exposition, Vulnerabilität und Bewältigung ableiten. Sie erlangen zudem 3) die Fähigkeit, evidenzbasierte, kontextspezifische Transferideen für Praxisfelder zu formulieren kritisch zu beurteilen.

Module Writers Workshop for Social Scientists

06SM240p501 / Module

Description:

General description:

This workshop is intended to help graduate students become confident and capable writers of scientific articles in English. The seminar is intended for students who wish to begin to write a scientific article or are currently writing such an article. Professor Shanahan will introduce some preliminary material and then students will circulate their drafts to the rest of the class for peer critique of the writing. Emphasis is placed on providing a constructive, collegial atmosphere of support and encouragement with the goal that each participant will make substantial progress on her or his article during the semester.

ECTS: 3

Learning Outcome:

Participants in this seminar will (1) learn the basic orientation to scientific writing in English and common pitfalls, (2) provide and receive feedback about scientific writing, and (3) make substantial progress on their own scientific articles.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Module Computational Social Science

06SM240p001 / Module

Description:

General description:

Over the last decade, new forms of data have become available through the spread of websites, digitization of public records, and the proliferation of mobile technologies. This has given rise to new techniques to collect and analyze data. As a result, the field of computational social sciences has emerged, trying to harness the immense opportunities these developments bear for the social sciences. This course is designed as a hands-on introduction into this growing field.

ECTS: 6

Notes:

- All used software is open source.
- Preliminary readings (limited number of core texts/exemplary studies).
- Basic familiarity with R or (great) willingness to learn it is advisable.

Learning Outcome:

The course has three goals: (1) It will provide you with concrete skills to leverage these opportunities for your own work. Drawing on the programming language R, this course will introduce you to important techniques in this field, including techniques to gather data from the web, analyze text, and various forms of machine learning. (2) As we develop these skills, we will critically engage with exemplarily studies that have used these techniques to answer social science questions. (3) This course will introduce you to the ethical and methodological considerations that come with using modern, digital forms of data in the social sciences.

Module Applying LLMs in Research: Methods, Logics, and Constraints

06SM240p002 / Module

Description:

General description:

This course explores the application of Large Language Models (LLMs) in social science research, focusing on their computational workings, practical uses, and limitations. Participants will learn to integrate LLMs into research workflows using R, including hands-on experience with prompt engineering, API interactions, and local/remote model access. The curriculum also covers the processing multimodal inputs, including "Image-to-Data" workflows and automated transcriptions (e.g., local and remote Whisper-based models) for automated qualitative coding of diverse media. Emphasis is placed on the methodological and ethical challenges inherent in AI-assisted inquiry, ensuring that students develop the technical proficiency to apply these tools responsibly across various empirical domains.

ECTS: 6

Notes:

We will provide a script and example datasets.

Learning Outcome:

This course equips students with the understanding and methodological skills to effectively use Large Language Models (LLMs) in their research practices. The primary goals are:

- (1) To provide a foundational understanding of LLMs and their potential applications.
- (2) To develop practical expertise in embedding LLMs into research pipelines using R, covering prompt engineering and API connectivity.
- (3) To enable the programmatic processing of diverse data formats, including text, images and audio for automated data extraction and processing.
- (4) To foster critical thinking for addressing ethical and methodological challenges posed by generative AI in academic research.

Module Narrative Identity: Bridging Theory and Empirical Research

06SM240p003 / Module

Description:

General description:

Die Veranstaltung rückt die Verhältnisbestimmung von Theorie und qualitativer empirischer Analyse anhand des soziologischen Konzepts «Identität» ins Zentrum und führt in das theoriegeleitete Forschen ein. Im ersten Teil erarbeiten wir uns eine Übersicht über verschiedene prominente Identitätskonzepte (Sozialpsychologie, Kritische Theorie, Systemtheorie, Poststrukturalismus). Wofür steht jeweils der Begriff «Identität»? Was ist mit personaler, sozialer oder kollektiver Identität gemeint? Im zweiten, empirisch orientierten Teil gehen wir der Frage nach, wie sich Identität in einer Erzählung dar- und herstellt. Wir lernen die Erhebungs- und Auswertungstechnik der «narrativen Identität» (Lucius-Hoene und Deppermann) kennen, greifen auf bereits erhobenes qualitatives Interviewmaterial zurück, das in Gruppen analysiert und auf die theoretischen Konzepte bezogen wird.

ECTS: 6

Learning Outcome:

Die Teilnehmer*innen werden einerseits anhand ausgewählter Texte mit sozialwissenschaftlichen Konzepten und Grundbegriffen der Identität und andererseits mit der Methodik der narrativen Identität vertraut gemacht. Sie sind in der Lage, diese zu erläutern und die Unterschiede und Gemeinsamkeiten der Konzepte zu eruieren. Die Teilnehmer*innen lernen die Methodik der narrativen Identität auf das konkrete Datenmaterial anzuwenden. Sie können zum Schluss die Themen, die aus dem Datenmaterial emergieren, mit den behandelten identitätstheoretischen Konzepten verknüpfen und schriftlich angemessen darstellen.

Module Career Prospects for Sociology Students

06SM240p004 / Module

Description:

General description:

Das Fach Soziologie umfasst eine Vielzahl an Themengebieten und Forschungsfeldern wie auch ein breites Spektrum an wissenschaftlichen Methoden. Dementsprechend vielfältig sind die beruflichen Anwendungsmöglichkeiten der im Studium erworbenen Kenntnisse und Kompetenzen. Die Lehrveranstaltung soll den Studierenden einen Ein- und Überblick zu den verschiedenen Berufsfeldern und Sektoren geben, in denen Soziologinnen und Soziologen häufig tätig sind. In Zusammenarbeit mit ehemaligen Studierenden und dem Career Service erhalten Studierende ein zentrales Orientierungsinstrument, ihre eigenen Kompetenzen mit möglichen Anforderungen einer breiten Berufswelt übereinzubringen.

ECTS: 3

Learning Outcome:

Sich im Hinblick auf die Berufswahl selber kennenlernen, die eigenen beruflichen Potentiale erkennen, die relevanten Basiskompetenzen für die Stellensuche und Bewerbung aneignen und den eigenen Berufseinstieg planen und realisieren.

Module Good or Bad Times? Prosperity and Well-Being

06SM240p005 / Module

Description:

General description:

Die (interdisziplinäre) Frage, was Menschen glücklich und zufrieden macht, hat auch in der Soziologie eine lange Forschungstradition. Dabei ist neben der Messung objektiver Lebensbedingungen auch ihre subjektive Einschätzung in der sozialwissenschaftlichen Forschung eine etablierte Vorgehensweise, um soziale Tatbestände abzubilden und Wohlstand und Wohlbefinden zu messen. Die individuelle Lebensqualität, sprich Wohlfahrt, ist dabei das Produkt der vorhandenen tatsächlichen Gegebenheiten einerseits und der subjektiv wahrgenommenen Bewertung andererseits. Insgesamt ist davon auszugehen, dass objektiver Wohlstand und vor allem auch subjektives Wohlbefinden keinen konstanten Zustand darstellen, sondern im Lebensverlauf variieren können. Vor diesem Hintergrund sollen im Rahmen des Seminars verschiedene Bereiche des objektiven Wohlstands und des subjektiven Wohlbefindens im lebenszeitlichen Ablauf genauer in den Blick genommen werden.

ECTS: 6

Learning Outcome:

Ziel der Veranstaltung ist es, einen Einblick in die theoretische und empirische Forschung zu dieser Thematik zu erhalten und die Schweiz im internationalen Vergleich zu betrachten. Die Teilnehmer:innen sollen dabei insbesondere auch mit der Interpretation und Diskussion empirischer Arbeiten vertraut gemacht werden. Von den Studierenden wird eine aktive Teilnahme erwartet.

Module Peer Effects in Adolescence

06SM240p013 / Module

Description:

General description:

If your friend jumped off a bridge - would you jump too? While in childhood, the family plays an important role, peers are increasingly important sources of socialisation in adolescence. This course will explore how this plays out in different areas of life, such as the educational and occupational career, deviant behaviour, health, or cultural taste. We will consider and discuss empirical research using different methods and data sources.

ECTS: 6

Learning Outcome:

By the end of this course, students will have acquired a thorough understanding of how peer effects can be analysed empirically and what conclusions can be drawn substantively from existing empirical research.

Module Radicalisation, Extremism and Affective Polarisation

06SM240p017 / Module

Description:

General description:

Das Modul "Radikalisierung, Extremismus und affektive Polarisierung" behandelt gesellschaftliche Radikalisierungsdynamiken, Extremismustendenzen und politische Konsequenzen der affektiven Polarisierung. Die Studierenden erhalten eine Einführung in Radikalisierungstheorien, analysieren die Parallelen zwischen unterschiedlichen extremistischen Phänomenbereichen - von Islamismus und Rechtsextremismus bis hin zu neuartigen nihilistischen Ideologien - und diskutieren aktuelle Trends in der Rekrutierung, Mobilisierung und internationalen Koordinierung extremistischer Netzwerke. Untersucht werden auch die Folgen: einerseits direkte Gefahren wie politisch motivierte Gewalt und Terrorismus, andererseits schleichende Bedrohungen für die Demokratie, etwa durch Angriffe auf Menschenrechte und Institutionen infolge des Mainstreaming extremistischer Positionen und wachsender radikaler Mobilisierung im digitalen Raum.

ECTS: 6

Learning Outcome:

Ziel des Moduls ist es, ein fundiertes Verständnis für Prozesse der Radikalisierung und der affektiven Polarisierung zu vermitteln. Am Ende des Moduls verfügen die Studierenden über ein differenziertes Verständnis dafür, wie solche Dynamiken entstehen, sich offline wie online verbreiten und gesellschaftliche Auswirkungen entfalten. Dabei werden unterschiedliche ideologische und postideologische extremistische Bewegungen analysiert, um gemeinsame Muster zu identifizieren. Das Modul integriert soziologische, sozialpsychologische, anthropologische und politikwissenschaftliche Perspektiven, um ein ganzheitliches Verständnis für Anfälligkeitsfaktoren, Radikalisierungspfade und den Zusammenhang zwischen Radikalisierung, Polarisierung und politisch motivierter Gewalt zu fördern.

Module Women and Forms of Politics, 1750-1850

06SM440p506 / Module

Description:

General description:

'Women it is said have no business with politics.-Why not?' (Charlotte Smith, Desmond (1792))

Although women were denied direct political representation, scholars have shown that women were actively involved in the world of eighteenth-century politics. Far from being unconcerned with contemporary politics, women attended public events such as the trial of Warren Hastings (1787-1795) and debates at the Houses of Parliament in great numbers, facilitated political discussions in salons across the continent, and were key figures in political campaigns such as the 1784 Westminster election. In the wake of the French Revolution, women campaigned for active citizenship, as Olympe de Gouges demanded in *Déclaration des droits de la femme et de la citoyenne* (1782). Women were also instrumental in promoting abolition campaigns and reform movements. As monarchs, empresses, queen consorts, and courtiers, women across Europe exercised political power and authority through official and non-official channels. This seminar will explore the different forms that women's political participation took between 1750 and 1850. We will consider the role of print and the different forms of political writing women adopted, as well as networks of correspondence. We will consider British as well as American writers.

We will explore topics such as friendship, political reform campaigns, abolition, historiography, among others. We will consider established figures such as Mary Wollstonecraft and Hannah More as well as lesser-known writers such as the prison reformer Elizabeth Fry.

ECTS: 9

Languages of Instruction:

Englisch

Merkmale:

Responsible instructor: Anne-Claire Michoux

Requirements:

Prerequisites:

Students are expected to be familiar with the core concepts of textual analysis and be experienced in the close reading of primary and secondary texts. They should have read a wide range of texts from all the literary periods from the Renaissance to the present, and they are also expected to have written term papers in (English) literature at Bachelor level. Students are required to have good (written) academic English language skills (Level C1). Students are expected to have taken the Reading Literary and Critical Theory Module or an equivalent Master-level course elsewhere.

This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module

Assessment:

Portfolio: Lernportfolio 1/3, schriftliche Arbeit 2/3

Essay deadline: 1st of March, 2027

Module Bodies, Senses, Beauty: Embodied Power and The Politics of Belonging

06SM721p129 / Module

Description:

General description:

Was verbindet staatliche Kampagnen gegen verfilzte Haare in Südindien, die mediale Inszenierung eines jährlichen "Cook and Share a Pot of Curry"-Events in Singapur, NGO-Programme zur Vermittlung "angemessenen" Auftretens migrantischer Arbeitssuchende in Kanada, urbane Verschönerungsinitiativen in Ruanda oder China sowie staatlich geförderte nationale Schönheitswettbewerbe und Paraden? Diese unterschiedlichen Kontexte verweisen auf die zentrale Rolle von Körpern, sinnlichen Ordnungen und ästhetischen Normen in der Aushandlung und Hervorbringung staatlicher Macht und politischer Zugehörigkeit.

Das Seminar untersucht, wie Schönheit, sinnliche Erfahrungen, Affekte und Körper mit der Konstitution von Staatsbürgerschaft und politischer Zugehörigkeit verwoben sind. Ausgehend von Ansätzen der politischen Anthropologie, der Anthropologie der Sinne und der Critical Beauty Studies analysieren wir, wie ästhetische und sinnliche Praktiken Aushandlungsprozesse und Erfahrungen von Inklusion und Exklusion strukturieren. Im Fokus steht die Frage, wie staatliche Akteure soziale Hierarchien über Körper, Erscheinungsbilder und kulturelle Normen regulieren und wie "gute" Bürger*innen durch alltägliche ästhetische Erwartungen und subtile Disziplinierungsformen geformt werden (sollen). Zugleich fragen wir, wie sich Menschen diese Normen aneignen, sich ihnen widersetzen oder sie umdeuten. Macht wird dabei nicht primär als institutionelle Gewalt, sondern als verkörpert, gelebt und affektiv wirksam verstanden- eingeschrieben in alltägliche Praktiken, Gesten und Regulierungen, die sich entlang von Differenzachsen wie race, Gender, Klasse, Sexualität oder Religion materialisieren.

ECTS: 6

Notes:

Dieses Modul ist zweisemestrig. Der Unterricht findet nur im ersten Semester statt, und das Modul kann entweder nach einem oder nach zwei Semestern abgeschlossen werden. Sie können das Modul nur nach zwei Semestern abschliessen, wenn Sie im zweiten Semester ebenfalls immatrikuliert sind.

Learning Outcome:

Die Studierenden lernen Texte kritisch zu lesen, verschiedene Positionen und Argumente zu reflektieren, offene Fragen zu identifizieren und Konzepte und Debatten aus der Kurslektüre zusammenzufassen und zu diskutieren.

Die Studierenden eignen sich Wissen in den Themenbereichen Körper, Sinne und Schönheit an und lernen diese als kritische analytische Perspektiven auf eigene gewählte Fallbeispiele anzuwenden.

Module Anthropology of Migration

06SM721p131 / Module

Description:

General description:

One of the characteristics of contemporary societies is the flow of people across national borders: people migrate as workers, as family members, as refugees, as employees of global corporations. Some migrate permanently, others eventually return to their homelands, yet others travel on to third or more destinations. Using mainly ethnographic case studies, this seminar will explore contemporary migration from an anthropological perspective, delving into the myriad motivations of these people crossing borders, their experiences in their places of destination, and the ones of those left behind.

We begin this course with a brief historical overview, followed by engaging with anthropological theorizing of migration and mobilities. We then go on to consider the meanings relocation brings to the identities of the people on the move, as well as the ramifications of this movement for receiving countries, sending communities, and the role intermediary actors play in organizing movement. We will examine issues that are currently being debated, such as the economics of migration and migration policy, citizenship and belonging, refugees and border control, gender, racism and inequality, as well as return migration, lifestyle/retirement migration, and global nomadism.

ECTS: 6

Notes:

This module lasts two semesters. Classes only take place in the first semester, and the module can be completed after either one or two semesters. You can only complete the module after two semesters if you are also enrolled in the second semester.

Learning Outcome:

Upon successful completion of this course, students will be able to

- Explain the key categories and concepts developed within mobility, migration, and refugee studies.
- Connect global developments to local situations and appreciate what can be learned from ethnographic materials to situate everyday experiences of migrants and the postmigratory society as a key resource.
- Recognize the effects border politics have on the ability of people to migrate from one state to another.
- Consider how migration is changing contemporary forms of relatedness (gender, kinship, and other forms of intimacy).
- Engage critically with academic theory related to transnational migration and apply this knowledge to gain a deeper understanding of the complexity of contemporary migration.

Furthermore, the seminar places particular focus on the acquisition and further training of the following two core competences of the Bachelor program in Social and Cultural Anthropology:

- Reading, understanding and analysing academic texts
- Presenting and discussing

Module Anthropology of Rural Development

06SM721p133 / Module

Description:

General description:

This core seminar offers an introduction to the anthropological study of rural development, agricultural transformation, and exploring how development processes shape and are shaped by the social, cultural, and economic realities of rural communities. Empirical examples will be drawn from Central Asia, West Africa, and other regions. Students will engage with foundational and contemporary theoretical frameworks in development anthropology, examining concepts such as local knowledge, power hierarchies, institutions, agency and transformation. The students will explore how neoliberal agricultural policies and agricultural transformation, along with the colonialism, and globalization gets intertwined with lived experiences of rural populations. Some themes which the seminar will focus on, among others, are land reform, resistance, food sovereignty, environmental conservation, and rural livelihoods.

ECTS: 6

Learning Outcome:

By the end of this seminar, students will have acquired an understanding of the key theoretical debates and conceptual tools that define the anthropological study of rural development. Students will develop the following academic skills:

1. Critical analysis of development interventions in rural settings using core anthropological concepts such as local knowledge, agency, and power relations;
2. Be able to interpret case studies from diverse rural contexts and assess how communities negotiate, resist, or adapt to external development programs;
3. Apply theoretical frameworks including modernization theory, post-development, and political ecology - to real-world rural development issues

Furthermore, the following basic competencies will be addressed in this course.

- reading, understanding and analysing academic texts
- writing your own text passages and texts
- presenting and discussing

Module Urban Anthropology

06SM721p335 / Module

Description:

General description:

This seminar explores key themes and debates in urban anthropology, focusing on how cities are lived, imagined, and contested. Drawing on classic and contemporary scholarship, the course examines how urban spaces shape and are shaped by social relations, power, inequality, and cultural creativity. The seminar addresses topics such as gentrification, urban planning, material infrastructures, or rights-to-the-city activism. Through case studies from cities across the Global North and South, students will analyze how class, race, gender, and citizenship are negotiated in everyday urban life.

ECTS: 6

Learning Outcome:

Students will be able to critically engage with central concepts in urban anthropology and apply them to contemporary urban issues. Students practice key academic competences by engaging critically with texts, by contextualizing arguments and conceptual frameworks, and by conducting a practical field research assignment.

Module Anthropology of Siberia

06SM721p290 / Module

Description:

General description:

This course introduces the anthropology of Siberia, a vast and culturally diverse region stretching from the Arctic north to the borders of Mongolia and China. The course examines the historical and contemporary lives of Siberian peoples, including their social organization, belief systems, material culture, and interactions with the environment. Special attention is given to the different periods of research: early Russian and European expeditions, Soviet-era fieldwork, and post-1990 international studies. Students will learn about the challenges and opportunities of fieldwork in Siberia, from archival research to long-term immersion in local communities, and will explore how historical and contemporary approaches shape the understanding of the region.

Through a combination of historical and ethnographic case studies, the course highlights the contributions of indigenous and outsider researchers, including how Siberian peoples themselves have participated in knowledge production. Topics include shamanism, reindeer-herding societies, urbanization, modernization, resource management, and the effects of state policies, as well as the continuing transformations of traditional cultures.

ECTS: 6

Learning Outcome:

By the end of the course, students will gain a solid understanding of how ethnography and then anthropology in Siberia have evolved, from early Russian and European expeditions to Soviet-era studies and contemporary research. They will explore key historiographical debates and see how different generations of researchers have approached Siberia's rich cultural diversity. Through lectures and discussions of ethnographic case studies, students will develop a sense of the practical and ethical challenges anthropologists face in remote, multilingual, and culturally complex communities.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Iuliia Koreshkova

Requirements:

Prerequisites:

It is recommended that all modules of the introduction to Social Anthropology be taken first.

Assessment:

Portfolio: Paper 60%, Presentation 20%, Oral Participation 20%. All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is considered not completed and the module is therefore failed.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Module Anthropology of Australia

06SM721p250 / Module

Description:

General description:

This module introduces Australia as a complex and contested anthropological field shaped by deep Indigenous histories, British settler colonialism, migration, and contemporary multiculturalism. Rather than approaching Australia as a coherent national culture, the course examines it as a layered social and political formation structured by uneven sovereignties, racialised governance, environmental struggles, and shifting regimes of belonging. Central to the module is the recognition that Australia is a settler-colonial formation in which the sovereignty of Aboriginal and Torres Strait Islander peoples was never ceded, yet remains denied in constitutional doctrine.

The first half of the course centres on Indigenous Australia. It explores Aboriginal and Torres Strait Islander ontologies, kinship systems, relations to Country, and legal traditions, while tracing the historical entanglement of anthropology with colonial administration. Students engage both classical ethnography and contemporary Indigenous scholarship to examine land rights, native title, sovereignty, and political resurgence. Particular attention is given to how Indigenous thinkers and activists challenge liberal models of recognition and reframe questions of authority, law, and environmental stewardship. The second half turns to white-settler culture and contemporary Australian society. Here, settler colonialism is analysed as an ongoing structure rather than a past event. The course interrogates national myths such as the 'fair go', mateship, and egalitarianism, and examines how whiteness, nationalism, and multiculturalism are institutionalised in everyday life. Themes include migration and border regimes, extractive capitalism and mining conflicts, rural imaginaries and masculinity, urban Indigeneity, environmental governance, and the politics of constitutional reform. Students will consider how settler identities are negotiated in relation to Indigenous sovereignty, Asia-Pacific geopolitics, and global capitalism.

Throughout the semester, the module engages classical and contemporary anthropological debates while encouraging critical reflection on power, representation, and the ethics of research in settler-colonial contexts. By the end of the course, students will understand Australia not simply as a nation-state, but as a dynamic and uneven terrain of authority, resistance, and transformation.

ECTS: 6

Notes:

This module lasts two semesters. Classes only take place in the first semester, and the module can be completed after either one or two semesters. You can only complete the module after two semesters if you are also enrolled in the second semester.

Learning Outcome:

By the end of the course, students will be able to:

1. Explain key features of Aboriginal and Torres Strait Islander social organisation, including kinship, law, and relations to land and Country.
2. Analyse settler colonialism in Australia as an ongoing social, political, and epistemic structure.
3. Critically assess the role of anthropology in colonial governance and in contemporary Indigenous advocacy and scholarship.
4. Evaluate central narratives of Australian national identity and their relationship to race, class, and gender.
5. Compare Indigenous and settler conceptions of sovereignty, belonging, and environmental stewardship.
6. Apply anthropological theory to contemporary Australian issues such as mining conflicts, migration, climate politics, and reconciliation processes.
7. Develop regionally grounded, historically informed analyses of Australia within broader Asia-Pacific and global contexts.

Module Doing Ethnography

06SM721p400 / Module

Description:

General description:

In this course, students will apply ethnographic methods within the framework of an individual research project. The aim is to learn how to set up an ethnographic research project independently, which means finding a research question, developing a research design and getting familiar with different methodological approaches. At the end of the course students will write a research report in which they summarise their findings and provide an anthropological analysis. Over the semester, students reflect upon their ethnographic research experiences in plenary and group discussions throughout the seminar. Several readings have been selected to facilitate this process by serving as prompts for the weekly discussions.

ECTS: 3

Learning Outcome:

Students learn to formulate a clear research question that concerns an anthropologically relevant problem or puzzle.

Students learn to decide which ethnographic methods are most suitable in order to answer their research question and can legitimise their methodological choices.

Students are able to become part of a social milieu that is unfamiliar to them and establish relations to people as an ethnographer.

Students learn to critically reflect upon their position as researchers, ethics, power dynamics, their own biases, and the role that their interlocutors ascribe to them while in the 'field.'

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Michelle von Dach

Requirements:

Prerequisites:

Es wird sehr dringend empfohlen, zuerst entweder das Modul «Ethnologische Forschungsmethoden» oder ein äquivalentes Modul zu absolvieren.

Assessment:

Portfolio: Assessment will be based on a portfolio comprising: Practical Work: 40%
Written Work: 60%. All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed.

Grading Scale:

1-6, Half Grades Given

Module Narrating Otherwise: Graphic Anthropology, Ethnographic Poetry and Interstitial Arts

06SM721p411 / Module

Description:

General description:

Powerful ethnography and storytelling go hand in hand. Both of them require creativity and craftsmanship. They also build upon the ever-changing axis of aesthetic forms and cultural paradigms, as well as our desire for meaning and resonance. Storytelling is essential to translate the flourishing vitality of a fieldsite, and embracing it can profoundly deepen one's rapport with the multifaceted layers of social reality and the richness of communal life that often escape simplistic expression. So, how can ethnographers become better narrators and collaborators using various (artistic) media and ways of constructing storyworlds? In this seminar, we will carefully experiment with, and integrate the multiple forms and media of storytelling available to us. We will reflect on the qualities of the chosen formats for their intended purposes. Emphasis will be placed on discovering how graphic anthropology, ethnographic poetry, multimodality, interstitial art, and experimental methods can further strengthen the foundations of ethnographic storytelling.

ECTS: 3

Learning Outcome:

In this methodological extension, students will learn to organise and re-plot their ethnographic data using various creative media. Through personalized projects and self-chosen media, students will explore storytelling in innovative ways.

This methods course is open to follow projects from poet-ethnographers, creative writers, illustrators, visual artists, or musicians, and all forms and types of ethnographic material are welcome. Students will be given personalized guidance, selected readings, guided prompts, and diverse exercises to actualize and animate their ethnographic storyworlds.

Module Museum Internship

06SM721p450 / Module

Description:

General description:

Dieses Modul bietet einen Einblick in wissenschaftliche, technische und organisatorische Dimensionen konkreter Museumsarbeit.

Angeleitet durch Mitarbeitende der verschiedenen Abteilungen des Völkerkunde?museums lernen Studierende die vielfältigen Tätigkeiten in Forschung, Kollaboration, Restaurierungs- und Archivarbeit, Vermittlungsformaten, Besucherdienst und Öffentlichkeitsarbeit kennen.

Angebunden an das aktuelle Ausstellungsprojekt "Neubenennen" diskutieren wir auch Fragen und Debatten rund um ethnologische Museen und ihre Sammlungen, ihre (Namens)Geschichten sowie ihre Aufgaben und Rollen in Gegenwart und Zukunft.

ECTS: 6

Notes:

Präsenzveranstaltung

Learning Outcome:

Studierende lernen die praktische Arbeit an einem ethnologischen Museum kennen und werden mit Diskursen in der Museologie und Museumsethnologie vertraut. Sie erhalten Einblicke in ein aktuelles Ausstellungsprojekt ("Neubenennen").

Mittels kleiner praktischer Übungen erwerben sie erste Kompetenzen im Umgang mit Sammlungs- und Archivbeständen und mit verschiedenen Öffentlichkeiten.

Module Internship in Applied Social Anthropology

06SM721p475 / Module

Description:

General description:

Studierende im Bachelor und im Master können selbst organisierte externe Praktika à 6 ECTS (ca. 180h) in Institutionen, die in Anwendungsbereichen der Ethnologie tätig sind, anrechnen lassen. Vor Ende der Buchungsfrist sind - nach vorgängiger Absprache - einer Betreuungsperson (= Betreuer*innen für Bachelorarbeiten) die anbietende Stelle (Praktikumsort), die/der dortige*n Betreuer*in sowie die geplanten Tätigkeiten und die Dauer (Tage und Stunden) anzugeben. Im Anschluss an das Praktikum wird ein schriftlicher Bericht (2'000 bis 2'500 Wörter) eingereicht, mit Darstellung der Tätigkeiten, Diskussion des Berufsfeldes und Bezug nehmend auf Literatur zu diesem Anwendungsbereich; sowie Praktikumszeugnis, das Arbeitsumfang und Tätigkeiten benennt.

ECTS: 6

Learning Outcome:

Studierende erhalten durch ihr ca. vierwöchiges selbständig organisiertes Praktikum einen vertieften Einblick in ein nicht-akademisches Berufsfeld für Ethnolog:innen wie der Museumspädagogik, der Interkulturellen Kommunikation, der Arbeit mit Geflüchteten, im Tourismus oder der Unternehmensberatung. Sie erlangen praktische Kenntnisse darüber wie sie zahlreiche fachliche wie überfachliche Kompetenzen aus ihrem Studium auch im nicht-akademischen Berufsleben gewinnbringend anwenden können. Die individuellen Erfahrungen stellen sie im Praktikumsbericht Berichten aus der Literatur gegenüber.

Merkmale:

Responsible instructor: Juliane Neuhaus

Requirements:

Prerequisites: Es wird empfohlen, zuerst alle Module des Einführungsstudiums der Ethnologie zu absolvieren. Weitere Voraussetzungen können von den Praktikumsanbietenden verlangt werden.

Module Anthropological Approaches to 'Alienation'

06SM721p617 / Module

Description:

General description:

This seminar introduces the concept of "alienation" via theoretical texts and exemplary ethnographies. The former includes texts by Karl Marx, Frantz Fanon, Sara Ahmed, Rahel Jaeggi, Monique Wittig, and Hartmut Rosa (amongst others). The ethnographic examples will include writings by Laura Bear and Roberto Beneduce as well as examples from the fields of feminist anthropology, medical anthropology (psychiatry and psychoanalysis), the anthropology of ethics, and existential anthropology.

ECTS: 6

Notes:

This module lasts two semesters. Classes only take place in the first semester, and the module can be completed after either one or two semesters. You can only complete the module after two semesters if you are also enrolled in the second semester.

Deadlines: 05.01.2027 for completion at the end of fall semester 2026, 30.03.2027 for completion at the end of spring semester 2027

Learning Outcome:

This seminar introduces the concept of 'alienation' through theoretical debates and empirical case studies. Students will familiarise themselves with the relevant literature and gain an understanding of the various applications of 'alienation'. They will then write a research paper based on their own academic interests in any of the fields discussed in the seminar.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Paola Juan
Johannes Quack

Requirements:

Assessment:

Portfolio: papers (50%), active participation (30%) and presentations (20%).
All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is considered not completed and the module is therefore failed.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can't be repeated

Organisation:

Offer pattern:

2 Semesters (One-Time)

Module LECTURE: Protest and Counter-Representation: An Introduction to South African Photography (1900s-2020s)
06SM640p006 / Module

Description:

ECTS: 3

Learning Outcome:

Die Studierenden verfügen über vertieftes Überblickswissen zum Thema der Vorlesung. Sie sind in der Lage, Argumente der relevanten Forschungsdiskussion nachzuvollziehen und Gründe für ihre Bewertung anzuführen.

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Bettina Gockel

Requirements:

Assessment: schriftliche Prüfung am Ende der Vorlesungszeit (paper + pencil)

The assessment consists of a written exam with open questions conducted during class hours at the end of the lecture period, on Wednesday 16.12.26 (on a pass/fail basis). Students will have the possibility to bring physical notes to assist them during the exam; however, no computers will be allowed. In addition, active participation during the term, including short group discussions based on assigned readings, is expected. Please note that the lecture, readings, and all evaluation materials will be conducted in English.

Module Exercise: Swiss landscape prints at Einsiedeln Abbey

06SM640p007 / Module

Description:

ECTS: 6

Learning Outcome:

Die Studierenden lernen, einen Bau und/oder Teile seiner Ausstattung unter Anwendung der Fachterminologie zu beschreiben und mit Hilfe von Schrift- und Bildquellen historisch zu verorten. Sie sind in der Lage, zu jedweden baulichen Befund eine knappe Zustandsbeschreibung, Baugeschichte und Würdigung zu verfassen. Sie kennen die Geschichte des Inventarisierens und kennen die Aufnahmekriterien der Inventare.

Merkmale:

Module Specialisation: Swiss Direct Democracy in the 21st Century (DDS-21)

06SM615p008 / Module

Description:

General description:

Durch die Lektüre und problemorientierte Diskussion von Forschungsarbeiten werden die analytischen und forschungspraktischen Kompetenzen der Studierenden geschult. Im Kontext des Seminars erarbeiten die Studierenden ein Forschungsdesign, auf dessen Grundlage sie im Frühjahrssemester eine eigene empirische Forschungsarbeit (Ba- Arbeit) durchführen können.

ECTS: 6

Learning Outcome:

Fachkompetenzen: Theoretisch und methodisch fundierte Kenntnisse über die zentralen Akteure, Institutionen und Prozesse in einem ausgewählten Forschungsbereich; Verortung von Argumenten und empirischen Studien in den relevanten wissenschaftlichen Debatten; Methodenkompetenzen: Theoretische Argumente und deren (quantitative oder qualitative) empirische Analyse anhand von politikwissenschaftlichen Forschungsbeiträgen verstehen, nachvollziehen und kritisch beurteilen können; Erstellen eines Research-Designs; Formulierung einer hypothesengestützten wissenschaftlichen Fragestellung auf Basis selbstgewählter Quellen Selbstkompetenzen: Auffassung und Notizen nehmen, Selbstorganisation, Planungsfähigkeit;

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Responsible instructor: Hanno Degner

Requirements:

Prerequisites: Grundlegende Ansätze und Theorien der Politikwissenschaft (Modulgruppe Einführung in die Politikwissenschaft), vertiefte Kenntnisse (Vorlesung, Seminar) im für die Veranstaltung ausgewählten Fach- und Themenbereich; erweiterte Kenntnisse sozialwissenschaftlicher Forschung (Konzeptualisierung, Forschungsdesign, Operationalisierung, Korrespondenzanalysen)

Assessment: Portfolio

Schriftliche Arbeit 60% / Referat 40%

Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden. Please note: All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed.

Module Divergent Giants: State, Market, and Power in China and India

06SM278p500 / Module

Description:

General description:

By 1950, China and India shared a number of structurally comparable conditions: both were vast agrarian societies newly reconstituted as sovereign states following the collapse or withdrawal of imperial rule, each confronting the intertwined challenges of political consolidation, economic development, and national integration. However, they embarked on these tasks under strikingly different political regimes: China under a Communist Party-led one-party state, and India under a competitive electoral democracy. In the decades since, their trajectories have diverged in ways that are as striking as they are analytically instructive. Most notably, China has undergone a far more extensive structural transformation, shifting labour and output into manufacturing at a scale India has yet to match. This course takes that divergence as its central puzzle and uses it to examine the relationship between political institutions, developmental strategy, and state capacity.

ECTS: 3

Learning Outcome:

Students will engage with major debates in comparative politics and political economy, including the developmental state, authoritarian resilience, democratic accountability, and the politics of economic reform.

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Nicolas Martin
Christopher Mittelstädt

Requirements:

Prerequisites:

The course presupposes no prior knowledge of China or India but assumes a willingness to engage seriously with both the empirical complexity and the theoretical ambitions of comparative analysis.

Module What Justifies Hierarchies?

06SM160p018 / Module

Description:

General description:

Modern liberal societies believe in the fundamental equality of individuals, and yet hierarchies of rank and status persist. This seminar examines whether, and under what conditions, such hierarchies can be morally justified. Engaging with different forms of social hierarchy—from state authority and workplace management to inequalities of class, gender, and race—we draw on a range of justificatory approaches discussed in political philosophy to assess how, if at all, such arrangements can be reconciled with the ideal of equality. In doing so, we will continually ask how the discussed ideal-theoretical approaches relate to real-world social practice and what implications they have for the structure of contemporary society.

ECTS: 6

Notes:

Studierende der Philosophie, die eine Seminararbeit verfassen wollen, buchen nach Absprache mit der Dozentin oder dem Dozenten ein entsprechendes Wahlpflichtmodul ohne Veranstaltung, in dessen Rahmen die Arbeit verfasst wird (vergl. programmspezifische Wegleitung): «Politische Philosophie». Buchungen, welche nicht vorgängig mit der Dozentin abgesprochen sind, werden zurückgewiesen.

Learning Outcome:

Understand the key concepts and theories covered in the seminar: ability to critically engage with important texts in analytic political philosophy; develop and defend one's own philosophical position, both in writing and in class discussion; apply abstract theories and concepts from political philosophy to contemporary social and political questions

Languages of Instruction:

Siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Target Group: Suitable for English Speakers

Target Group: Open to School Students

Responsible instructor:

Anna Katharina Boos

Requirements:

Prerequisites:

Für die Teilnahme sind keine Vorkenntnisse erforderlich.

Assessment:

Portfolio

- (1) Preparation: Students are expected to complete the assigned readings in advance. Careful preparation is a prerequisite for participation in the seminar.
- (2) Discussion Contributions: a) Each student will prepare 1 written discussion input based on the assigned readings and present it orally in class (max. 1 page).
b) Each student will prepare 1 short written response to another participants' discussion inputs and presents it as a brief reaction in class (max. 0.5 page).
- (3) Blog post: Each student selects a concrete example from their everyday life that involves hierarchical relations and critically examines it in light of the theoretical approaches discussed in the course (max. 500 words).
- (4) Essay: At the end of the semester, each student will submit a short essay on a self-chosen topic related to the seminar theme, in which they develop and defend their own philosophical position (max. 2500 pages)

- (1) Reading Preparation (not graded); (2) Discussion Contributions (1/3); (3) Blog

Post (1/3); (4) Essay (1/3).

All components of the portfolio must be completed. If any component is not completed, the entire portfolio is considered incomplete and the module is therefore failed (grade 1).

Grading Scale: 1-6, Half Grades Given

Repeatability: Can't be repeated

Module Party, State, and Market: The Political Economy of CCP Rule

06SM280p609 / Module

Description:

General description:

This seminar examines the political economy of China through the organisational and ideological logic of Chinese Communist Party rule. It begins from a premise absent in most existing courses: that the CCP is not merely one institution among many shaping China's economy, but the generative structure through which markets are authorised, capital is directed, firms are governed, labour is disciplined, and economic narratives are constructed and policed. Each week pairs an analytical problem from comparative political economy with an examination of how Party organisation, intra-Party regulation, cadre incentives, ideological campaigns, and modes of institutional embedding produce distinctive economic outcomes. Topics include Party-building in private firms, disciplinary enforcement and its economic externalities, the fiscal-political nexus at the local level, the Party's role inside SOEs and financial institutions, the ideological governance of technology and innovation, and the construction of dominant economic narratives under Xi Jinping. The seminar is designed for graduate students in political science, comparative authoritarianism, or China studies who seek to theorise the Party as an economic institution.

Module Origin of the World and True Self – Dimensions of Cosmogony in Hinduism

06SM330p020 / Module

Description:

General description:

Das Seminar vermittelt forschungsrelevantes Wissen über die Lehren und Darstellungsformen indischer Religionen und Philosophien anhand der Lektüre und Analyse von ausgewählten Texten. Die Grundstrukturen und Techniken der Analyse von Kommentarliteratur in Sanskrit werden erörtert. Unter Einbeziehung des Forschungsstandes werden Konzepte und Lehrpositionen analysiert und im Hinblick auf deren historische, soziale und intellektuelle Kontexte und unter Einbeziehung theoretischer Fragestellungen interpretiert.

ECTS: 6

Learning Outcome:

Die Studierenden haben vertieftes Wissen über die Inhalte religiöser und philosophischer Grundtexte und die Formen ihrer Darlegung und können diese auf historische Kontexte und zeitgenössische intellektuelle Diskurse und Debatten beziehen. Sie beherrschen die Techniken der Analyse von Kommentarliteratur in Sanskrit und können selbständig Übersetzungen anfertigen und theoretisch reflektieren. Sie kennen den Stand der Forschung und können deren Fragestellungen und Resultate methodisch reflektiert mündlich präsentieren und argumentativ darlegen. Sie können Befunde der Textanalyse unter Einbeziehung von ausgewählten Forschungsansätzen schriftlich darlegen.

Languages of Instruction:

Module Texts and Contexts – Perspectives on Indological Research

06SM330p507 / Module

Description:

General description:

In diesem Seminar werden wir uns mit einigen grundlegenden Arbeitsweisen und Hilfsmitteln kulturwissenschaftlicher Fächer im Allgemeinen und der Indologie im Besonderen beschäftigen. Themen sind unter anderem die Ausarbeitung von Projekten und die Erstellung kritischer Editionen, Feldforschung in Indien sowie einige für Südasienforscher:innen interessante digitale Datenbanken. Dabei ist auch die Einladung auswärtiger Gäste vorgesehen. Masterstudierende benachbarter AOI-Fächer sind herzlich willkommen.

Module DSA 301 Automating Chemistry - HTEL Live!

07SMDSA301 / Praktikum

Description:

General description:

Take your automation skills to the next level and get to know our robotic system for all Chemistry workflows: The Chemspeed SWING XL. As part of this practical course, you will learn how to use the main automation platform of the HTEL and employ novel AI tools to establish workflows for chemical reactions. The Chemspeed training will be complemented by participation in ongoing projects in the HTEL to apply all automation skills and prior training in a live research setup.

ECTS: 4

Notes:

Availability of this course depends on research projects in the HTEL and available training resources. Contact johannes.schoergenhummer@chem.uzh.ch for more information and application.

Priority will be given to students enrolled in the DSA minor. Students not enrolled in the DSA Minor may be admitted if requirements are met and resources are available.

Learning Outcome:

Understanding and applying the content covered

Target Groups:

Students of the DSA Minor

Languages of Instruction:

English or German

Merkmale:

Responsible instructor: Johannes Schörgenhummer

Requirements:

Prior Knowledge: DSA 102 or accomplished HTEL Opentrons training strictly required. Experience and basics in HPLC/MS strongly recommended.

Assessment: Project report (English, per request also in German)

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Semester)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Organisation: Department of Chemistry

Offered in: Spring Semester 2027

Module Internal Constants in the History of the German Language

06SM360p133 / Module

Description:

ECTS: 3

Notes:

Es handelt sich um eine Ringvorlesung der Gesellschaft für germanistische Sprachgeschichte, vertreten durch die Universität Passau. Die Vorlesung findet über Zoom statt, eine Anmeldung ist nicht erforderlich. Studierende der UZH buchen das Modul an der UZH und legen die Prüfung vor Ort an der UZH ab.

Learning Outcome:

Die Studierenden verfügen über vertiefte Kenntnisse in einem spezifischen Teilgebiet der synchronen und/oder diachronen Sprachwissenschaft. Sie gewinnen einen Überblick zu diesem Teilgebiet und lernen die relevante aktuelle Forschung kennen.

Languages of Instruction:

Deutsch

Merkmale:

Module Judith Le Soldat, or: The Swiss Revolution of Queer Studies

06SM360p557 / Module

Description:

General description:

Masterclass: Since its inception circa 1990, Queer Studies has understood itself as an interdisciplinary field of social research. Yet the place of psychoanalysis in this young discipline's theoretical toolbox remains contentious. The heteronormativity of the Oedipus complex, the Freudian teleology of human psychosexual development, the primacy of heterosexual identification and the pathologization of homosexuality are just a few reasons why Freud & Co. have been censured. This groundbreaking masterclass on Zurich-based psychoanalyst Judith Le Soldat explores how her seminal work-in particular *Grund zur Homosexualität* and *Land ohne Wiederkehr*--revolutionizes recent efforts to redeem productively Freudian psychoanalysis for Queer Studies. The Masterclass includes a discussion with the editor of Le Soldat's collected works, Monika Gsell, published by Frommann & Holzboog.

ECTS: 3

Learning Outcome:

Die Studierenden verfügen über vertiefte Kenntnisse in einem spezifischen Teilgebiet der Neueren deutschen Literaturwissenschaft. Basierend auf dem aktuellen Stand der Forschung können sie eigene literaturgeschichtliche und -wissenschaftliche Fragestellungen bearbeiten und/oder in einem praxisbezogenen Zusammenhang darstellen.

Module INI 509 Readings in Neuroinformatics 1

07SMINI509 / Seminar

Description:

General description:

Thirteen major areas of research have been selected, which cover the key concepts that have led to our current ideas of how the nervous system is built and functions. We will read both original papers and explore the conceptual links between them and discuss the 'sociology' of science, the pursuit of basic science questions over a century of research.

Besides the formal course hour, the course work will also require additional time (ca. 2 hour per week) to complete.

ECTS: 3

Learning Outcome:

It is a commonplace that scientists rarely cite literature that is older than 10 years and when they do, they usually cite one paper that serves as the representative for a larger body of work that has long since been incorporated anonymously in textbooks. Worse than that, many authors have not even read the papers they cite in their own publications. This course, 'Readings in Neuroinformatics' is one antidote. Major areas of research have been selected, which cover the key concepts of Neuroinformatics. Unusually, we will explore these areas of research by reading the original publications, instead of reading someone else's digested summary from a textbook or review. By doing this, we will learn how the discoveries were made, what instrumentation was used, how the scientists interpreted their own findings, and how their work, often over many decades and linked together with related findings from many different scientists, generate the current views of mechanism and structure of the nervous system. We will also explore the personalities of the scientists and the context in which they made their seminal discoveries. Students will be given original papers to read plus some additional assignments. We will then meet weekly with the course leader and an assistant for an interactive seminar. An intimate knowledge of the papers will be assumed so that the discussion does not center simply on an explication of the contents of the papers. Assessment will be in the form of assignments throughout the semester.

Target Groups:

This course is reserved for NSC Masterstudents.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Wolfger von der Behrens

Requirements:

Assessment:

The performance will be assessed throughout the term by evaluating the student assignments.

Module Introduction to the Sociology of Crime

06SM240p006 / Module

Description:

General description:

Die Erklärung von Abweichung und kriminellem Verhalten ist ein bedeutsames Thema soziologischer Forschung. Im Seminar soll zunächst in zentrale theoretische Ansätze zur Erklärung von kriminellem Verhalten eingeführt werden. Hierbei werden sowohl Ansätze auf Mikroebene, also auch auf Meso- und Makroebene sowie die verschiedenen Ebenen verbindende Ansätze betrachtet; der Fokus wird auf erklärende Ansätze gelegt, wenngleich auch konstruktivistische Ansätze berücksichtigt werden. Die Prüfung der verschiedenen Theorien erfolgt in der Kriminalsoziologie mittels Hell- und Dunkelfeldforschung, weshalb im Seminar die verschiedenen methodischen Herangehensweisen, ihre Besonderheiten und Herausforderungen, beleuchtet werden. Zusätzlich werden aktuelle Kriminalitätsthemen wie Jugendkriminalität, Migration und Kriminalität, Häusliche Gewalt u.a.m. im Seminar behandelt.

ECTS: 6

Learning Outcome:

1. Die Studierenden kennen aktuelle Theorien der Erklärung von Kriminalität.
2. Die Studierenden kennen Vor- und Nachteile von Hell- und Dunkelfeldforschung.
3. Die Studierenden haben Grundkenntnisse zu ausgewählten Kriminalitätsphänomenen der Schweiz erworben.

Module Sociological Theories of Action

06SM240p009 / Module

Description:

General description:

In der Soziologie sind verschiedene Handlungstheorien entwickelt worden. In diesem Seminar sollen einige dieser Theorien kennengelernt und miteinander verglichen werden. Zuerst sollen Theorien besprochen werden, die dem Akteurmodell des Homo Sociologicus zuzuordnen sind. Einer groben Zweiteilung entsprechend wird es sich dabei um Ansätze handeln, die zum einen dem normativen und zum anderen dem interpretativen Paradigma folgen. Im zweiten Teil werden wir auf die Austauschtheorie und auf Rational-Choice-Ansätze eingehen. Im dritten Teil soll diskutiert werden, welche Rolle Emotionen für Handlungserklärungen spielen und wie Emotionen in soziologische Handlungstheorien integriert werden können. Im letzten Teil werden wir uns generell mit der Integration von Theorieperspektiven beschäftigen und dabei als Beispiel für eine intergrative Theorie das Framing-Modell von Esser und Kroneberg behandeln.

ECTS: 6

Learning Outcome:

Die Teilnehmenden lernen verschiedene soziologische Handlungstheorien und ihre zugrundeliegenden Annahmen kennen und können sie in die soziologische Theoriegeschichte einordnen. Es wird geübt zentrale Thesen und Argumente herauszuarbeiten und kritisch zu diskutieren. Außerdem sollen Erfahrungen im analytischen Vergleich von Theorien gesammelt werden und eine Auseinandersetzung mit der Integration von Handlungstheorien erfolgen.

Languages of Instruction:

Module Markets and Norms

06SM240p012 / Module

Description:

General description:

This course introduces market theories and introduces aspects of social norms that are relevant in market interactions. Game theory and other tools from economics and sociology are used for the analysis.

ECTS: 6

Learning Outcome:

Students are encouraged to think about market interactions, and in particular in the context of new market technologies. The aim of the course is to teach students the complex social interdependencies present in market interactions, and to teach students modern methods (e.g. game theory) used in economics and sociology.

Module Sustainable Development and Democracy

06SM240p015 / Module

Description:

General description:

Im Seminar wird die komplexe Beziehung zwischen Demokratie und Nachhaltiger Entwicklung in Theorie und Praxis beleuchtet. Dabei ist zu fragen, welche spezifischen Herausforderungen das normative Leitbild einer Nachhaltigen Entwicklung und die damit verbundenen Themenkomplexe für die demokratische Verfasstheit einer Gesellschaft bedeuten. Wir betrachten im Sinne einer Problemlösungskapazität zunächst die Output-Seite und politische Ergebnisse in ausgewählten Politikfeldern (u.a. Konsum, Mobilität). Zudem werden prozessuale Neuerungen, wie z.B. die Entwicklung nicht-verfasster Prozesse politischer Partizipation (deliberative Verfahren, z.B. Bürger:innenräte) oder Protestformen (u.a. Demonstrationen, ziviler Ungehorsam, Konsumboykotte) in der Bearbeitung Nachhaltiger Entwicklung im Zusammenhang mit der Vorstellung einer Input-Legitimation analysiert. Schliesslich werden weitere aktuelle Reformdebatten analysiert und kritisch reflektiert, wie z.B. Diskurse um Freiheit und Ordnungspolitik.

ECTS: 6

Learning Outcome:

Die Studierenden kennen die positiven und negativen Korrelationen zwischen Demokratie und Nachhaltiger Entwicklung. Die Studierenden kennen das normative Leitbild der Nachhaltigen Entwicklung als inter- und transdisziplinäres Konzept, seine Charakteristiken einer ethischen Anforderung sowie einer Multi-Stakeholder-Governance.

Die Studierenden kennen zentrale Handlungsfelder einer Nachhaltigen Entwicklung sowie unterschiedliche Perspektiven im Hinblick auf die Beurteilung einer demokratisch verfassten Problemlösungskapazität.

Die Studierenden kennen Formen prozessualer Reformen in demokratischen Systemen sowie aktuelle demokratiethoretische Debatten, v.a. liberaler und republikanischer Entwürfe.

Module Research Lab Online Surveys

06SM240p023 / Module

Description:

General description:

Der Workshop führt in die Technik der Online-Befragung ein und ermöglicht insbesondere die Erhebung eigener Surveydaten auf Basis einer vorrekrutierten Stichprobe, dem SUZ-Online Panel. Er bietet einen praxisorientierten Kompetenzerwerb im Bereich der Online-Fragebogenprogrammierung an. Zudem bietet er fortgeschrittenen Studierenden die Möglichkeit, für Seminar- und Abschlussarbeiten eine eigenständige, fragebogenbasierte Datenerhebung unter professionellen Bedingungen durchzuführen.

ECTS: 3

Notes:

Der Workshop findet an 4 Terminen statt:

1. Einführung und Auffrischung Erhebungsmethoden und Fragebogenkonstruktion
2. Diskussion/Pretest von Fragebogenentwürfen & Einführung in die Praxis von Online-Befragungen
3. Hands-on EFS Online Survey - Praktische Konstruktion des Online-Fragebogens & Spezielle Themen der Online-Befragung (Monitoring, Datenretrieval, Dateninspektion)
4. Fragebogenpräsentation

Learning Outcome:

1. Fähigkeit zu eigenständiger onlinebasierter Datenerhebung
2. Anwendungskompetenz Online-Befragungssoftware
3. Management onlinebasierter Primärdaten
4. Konsolidierung der Kenntnisse zur Fragebogenkonstruktion

Module Doing Business in China: Markets, Consumers, and Strategy

06SM280p227 / Module

Description:

General description:

This course offers students a practice-oriented introduction to China's contemporary business world. It focuses on current developments in digital platforms, consumer behaviour, e-commerce, social commerce, branding, market entry, and localisation. The course connects perspectives from China Studies with applied business questions and helps students understand how China's digital ecosystem works, how key consumer segments differ, and what opportunities and challenges international companies face in the Chinese market. The course will include case studies of Chinese and international companies, discussions of current market trends, and insights into the cultural and strategic factors that shape business success in China.

ECTS: 3

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Christopher Mittelstädt

Requirements:

Assessment:

Portfolio (group presentation; written assignment)

The short group presentation will be based on a case study.

In order to pass the module all elements of the portfolio must be successfully completed.

Grading Scale:

Pass/Fail

Repeatability:

Can't be repeated

Organisation:

Module Legal History (BLaw), Part 1 (no exam registration)

02SM60PM4T1 / Module without Credits

Description:

General description:

Das Modul umfasst die Vorlesung "Rechtsgeschichte" im Herbstsemester sowie die "Übungen zur Rechtsgeschichte" im Frühjahr. Das Modul Rechtsgeschichte vermittelt grundlegende Kenntnisse über die historischen Grundlagen der mitteleuropäischen Rechtsordnung. Es dient zugleich dazu, die Fähigkeit zur selbständigen Textinterpretation vor dem Hintergrund der Wandlungen in Gesellschaft, Wirtschaft und politischer Herrschaft sowie der kulturellen Grundlagen zu entwickeln. Der zeitliche Rahmen des Moduls reicht von der Spätantike bis ins 20. Jahrhundert.

ECTS: 0

Notes:

Rechtsgeschichte (BLaw), 1. Teil (keine Prüfungsanmeldung) ist der erste Teil des zweisemestrigen Pflichtmoduls Rechtsgeschichte (BLaw). Die Buchung von Rechtsgeschichte (BLaw), 1. Teil (keine Prüfungsanmeldung) kann freiwillig vorgenommen werden, sie gilt nicht als Anmeldung zur Prüfung. Die Prüfungsanmeldung für das Pflichtmodul Rechtsgeschichte (BLaw) soll frühestens im 2. Semester (FS) vorgenommen werden. Die Prüfung wird jedes Semester angeboten (FS oder HS).

Learning Outcome:

1. Wissens- und Verständniskompetenzen: Rechtsgeschichtliche Kenntnisse sowie Verständnis für Zusammenhänge in der Entwicklung der Rechtsordnung.
1. Analytische und hermeneutische Kompetenzen
- Fähigkeit zur Betrachtung der modernen Rechtsordnung aus der historisch vermittelten Distanz
- Fähigkeit zur verstehenden Auseinandersetzung mit unbekannten Texten
2. Reflexionskompetenz: Einsicht in die Verflechtung von Recht, Gesellschaft, Wirtschaft, Herrschaft und Kultur.

Target Groups:

Das Modul wendet sich in erster Linie an Studienanfängerinnen und Studienanfänger der Rechtswissenschaften, ist aber auch für Minor-Studierende der philosophischen Fakultät geeignet.

Languages of Instruction:

Deutsch

Course Materials:

Allgemeine Informationen sowie Informationen zur Verfügbarkeit der Materialien finden sich auf der Website der veranstaltenden Lehrstühle.

Merkmale:

Target Group: Open to School Students

Responsible instructor:

Andreas Thier
Johannes Liebrecht

Requirements:

Prerequisites:

Interesse an rechtlicher Normativität, Rechtswissen und der Frage nach ihren Voraussetzungen, Inhalten und Wandlungen.

Prior Knowledge:

Historische Vorkenntnisse wären von Vorteil, sind aber nicht erforderlich.

Assessment: siehe Modul Rechtsgeschichte (BLaw) (02SM60PM4) -> schriftliche Prüfung Ende Frühjahrssemester oder im darauffolgenden Herbstsemester

Module Roman Civil Law, Part 1 (no exam registration)

02SM60PM5T1 / Module without Credits

Description:

General description:

Das Modul Römisches Privatrecht dient der Einführung in das Studium des Privatrechts. Entsprechend werden grundlegende Institute, wie Eigentum und Vertrag, Rechtsfiguren, wie Stellvertretung und Auftrag und Rechtsprinzipien, wie Formalismus und Typenzwang, am historischen Beispiel vorgestellt und analysiert. Das Römische Privatrecht bildet die gemeinsame Grundlage der europäischen Privatrechtsordnungen und war auch für die Entstehung des schweizerischen Obligationenrechts und Zivilgesetzbuchs massgeblich, weshalb diese Regelungen ebenfalls vergleichend vorgestellt und gewürdigt werden. Im Einzelnen erhalten die Studierenden Einblick in die Institute und Prinzipien des Personenrechts, des Sachenrechts und vor allem des Obligationenrechts in Form des Vertrags- wie des Haftpflichtrechts. Ein besonderer Schwerpunkt liegt dabei auf der Analyse von römischrechtlichen Quellentexten (in deutscher Übersetzung), die bestimmte Problemlagen und Fallgestaltungen veranschaulichen und es erlauben, Gemeinsamkeiten und Unterschiede zwischen dem antiken römischen Recht und der heutigen Rechtslage zu erfassen und herauszuarbeiten.

ECTS: 0

Notes:

Römisches Privatrecht, 1. Teil (keine Prüfungsanmeldung) ist der erste Teil des zweisemestrigen Pflichtmoduls Römisches Privatrecht. Die Buchung von Römisches Privatrecht, 1. Teil (keine Prüfungsanmeldung) dient der Anmeldung zur Vorlesung, sie gilt nicht als Anmeldung zur Prüfung. Die Prüfungsanmeldung für das Pflichtmodul Römisches Privatrecht soll frühestens im 2. Semester (FS) vorgenommen werden. Die Prüfung wird jedes Semester angeboten (FS oder HS).

Bei mehrfach geführten Lehrveranstaltungen kann die Gruppe frei gewählt werden.

Learning Outcome:

Die Studierenden lernen zentrale Institute des Römischen Rechts sowie die Methode der Textexegese, d.h. der systematischen Interpretation römischrechtlicher Texte, kennen. Anhand dieser Grundlagen soll das eigene juristische Denken erprobt und geschärft werden - eine Fähigkeit, die auch für den verständigen Umgang mit dem geltenden schweizerischen Privatrecht unerlässlich ist.

Target Groups:

Studierende der Assessment-Stufe, Minor-Studierende und weitere Interessierte.

Languages of Instruction:

Deutsch

Course Materials:

Module Civil Law I, Part 1 (no exam registration)

02SM60PM6T1 / Module without Credits

Description:

General description:

Das Modul Privatrecht I erstreckt sich über zwei Semester und enthält im HS die Vorlesungen «Personenrecht» (3 ECTS) sowie im FS die «Übungen im Personenrecht» (1.5 ECTS). Schriftliche Prüfung Ende des Frühjahrssemesters.

ECTS: 0

Notes:

Privatrecht I, 1. Teil (keine Prüfungsanmeldung) ist der erste Teil des zweisemestrigen Pflichtmoduls Privatrecht I. Die Buchung von Privatrecht I, 1. Teil (keine Prüfungsanmeldung) dient der Anmeldung zur Vorlesung, sie gilt nicht als Anmeldung zur Prüfung. Die Prüfungsanmeldung für das Pflichtmodul Privatrecht I soll frühestens im 2. Semester (FS) vorgenommen werden. Die Prüfung wird jedes Semester angeboten (FS oder HS).

Learning Outcome:

Die Absolvierenden des Moduls Privatrecht I kennen die vermittelten Inhalte, finden sich in den entsprechenden Erlassen zurecht und wissen über die einschlägige Judikatur und kontroverse Lehrmeinungen Bescheid. Sie können dazu Rechtsgutachten verfassen und im Rahmen der ihnen gestellten Fälle zu selbständigen Lösungen gelangen, bei denen sie Pro und Contra gegeneinander abwägen und begründete Entscheide fällen.

Target Groups:

Studierende der Assessment-Stufe.

Minor-Studierende auf Bachelorstufe (Rechtswissenschaft).

Languages of Instruction:

Module Research Colloquium in Ethics

06SMG11p007 / Module

Description:

General description:

Dieses Forschungskolloquium bietet fortgeschrittenen Studierenden die Möglichkeit, ihre laufenden Arbeiten einer auf Ethik spezialisierten Forschungsgruppe vorzustellen.

Gleichzeitig stellt das Kolloquium eine Gelegenheit dar, Vorträge von Personen zu besuchen, die universitär im Bereich der Ethik und in angrenzenden Bereichen forschen. Es bietet damit einen Einblick in die aktuelle Forschung in der Ethik und in angrenzenden Bereichen und erlaubt es, sich mit der Arbeitsweise in der akademisch-philosophischen Forschung vertraut zu machen.

Module Criminal Law I, Part 1 (no exam registration)

02SM60PM7T1 / Module without Credits

Description:

General description:

Das Modul "Strafrecht I" setzt sich zusammen aus der Vorlesung Strafrecht AT I, der Arbeitsgemeinschaft Strafrecht AT I, der Vorlesung Strafrecht AT II und den Übungen im Strafrecht I.

Es beginnt jeweils im HS mit "Strafrecht I,

1. Teil" (Vorlesung Strafrecht AT I, Arbeitsgemeinschaft Strafrecht AT I, ab Mitte Semester). Im FS wird es fortgesetzt mit "Strafrecht I,
2. Teil" (Vorlesung Strafrecht AT II, Übungen im Strafrecht I).

ECTS: 0

Notes:

Strafrecht I, 1. Teil (keine Prüfungsanmeldung) ist der erste Teil des zweisemestrigen Pflichtmoduls Strafrecht I. Die Buchung von Strafrecht I, 1. Teil (keine Prüfungsanmeldung) dient der Anmeldung zu Vorlesung und Arbeitsgemeinschaften, sie gilt nicht als Anmeldung zur Prüfung.

Die Prüfungsanmeldung für das Pflichtmodul Strafrecht I soll frühestens im 2. Semester (FS) vorgenommen werden. Die Prüfung wird jedes Semester angeboten (FS oder HS).

Learning Outcome:

Die Studierenden sollen auf wissenschaftlicher Grundlage einen Zugang zu Grundfragen, Grundlagen und Lösungsmethoden des Allgemeinen Teils des Strafrechts erhalten, der sie zu sicherem Umgang mit der Materie befähigt.

Aufgrund der erworbenen Kenntnisse sind sie am Ende des FS in der Lage, Fälle aus dem Bereich des AT StGB selbstständig zu analysieren und gutachterlich zu lösen.

Target Groups:

Studierende der Assessmentstufe und Minor-Studierende.

Languages of Instruction:

Deutsch

Course Materials:

Konsultieren Sie für Informationen zu den Unterrichtsmaterialien die Hinweise zu den einzelnen Lehrveranstaltungen dieses Moduls und die Webseiten der Lehrstühle, die im jeweiligen Semester die Lehrveranstaltungen abhalten.

Merkmale:

Responsible instructor:

Thierry Urwyler

Requirements:

Prerequisites:

Vorbereitung der Vorlesung; aktive Teilnahme in der Vorlesung.

Prior Knowledge:

keine

Assessment: siehe Modul Strafrecht I (02SM60PM7)
-> schriftliche Prüfung Ende Frühjahrssemester oder im darauffolgenden Herbstsemester

Grading Scale: Not Graded

Repeatability: Can be repeated as necessary

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 20.10.2026 24:00

Module Public Law I, Part 1 (no exam registration)

02SM60PM8T1 / Module without Credits

Description:

General description:

Das Modul dient als Einführung in das Öffentliche Recht und vermittelt die Grundlagen des schweizerischen Staatsrechts aus der Perspektive des geltenden Rechts, eingebettet in grundsätzliche und rechtsvergleichende Überlegungen.

Das Modul erstreckt sich über zwei Semester, der 1. Teil umfasst die Veranstaltungen:

- Staatsrecht I
- Grundrechte I.

ECTS: 0

Notes:

Öffentliches Recht I, 1. Teil (keine Prüfungsanmeldung) ist der erste Teil des zweisemestrigen Pflichtmoduls Öffentliches Recht I. Die Buchung von Öffentliches Recht I, 1. Teil (keine Prüfungsanmeldung) dient der Anmeldung zu Vorlesungen und Tutoraten, sie gilt nicht als Anmeldung zur Prüfung.

Die Prüfungsanmeldung für das Pflichtmodul Öffentliches Recht I soll frühestens im 2. Semester (FS) vorgenommen werden. Die Prüfung wird jedes Semester angeboten (FS oder HS).

Eine Vorbereitung auf die jeweilige Veranstaltung (Vorlesung, Übung) anhand der angegebenen Literatur/Unterlagen ist unerlässlich.

Learning Outcome:

Die Studierenden sollen die wichtigsten Elemente der schweizerischen Demokratie verstehen und auf konkrete Fragen anwenden können:

- Staatsaufbau (insbes. Föderalismus),
- Staatsaufgaben/Kompetenzverteilung,
- Mitbestimmungsrechte des Volkes (insbes. politische Rechte),
- Verhältnis zwischen Staat und Bürgerinnen/Bürgern (insbes. Grundrechte),
- Grundzüge des Rechtsschutzes im Staatsrecht.

Die Studierenden sind nach Absolvierung des Moduls in der Lage, konkrete staatsrechtliche Fragen zu lösen und schriftliche Fälle im "Öffentlichen Recht I" zu bearbeiten (Methode und Argumentation der Falllösung).

Target Groups:

Studierende der Assessmentstufe sowie Minor-Studierende.

Languages of Instruction:

Deutsch

Course Materials:

Giovanni Biaggini/Thomas Gächter/Regina Kiener (Hrsg.), Staatsrecht, 4.Auflage, Zürich/St. Gallen 2026.

Giovanni Biaggini/Benjamin Schindler (Hrsg.) [bis 10. Aufl.: Giovanni Biaggini/Bernhard Ehrenzeller], Textausgabe Öffentliches Recht (jeweils neueste Auflage) oder Peter Hänni u.a.(Hrsg.),Texto-Gesetzesausgabe Öff. Recht I (jeweils neueste Auflage).

"Begleitband Staatsrecht I" "Begleitband Grundrechte I" jeweils neueste Ausgabe (PDF; erhältlich via Website der beteiligten Lehrstühle).

Module Civil Law II, Part 1 (no exam registration)

02SM120PM1T1 / Module without Credits

Description:

General description:

Das Modul "Privatrecht II" erstreckt sich über zwei Semester und enthält die Vorlesungen und Übungen Obligationenrecht I und II, die Vorlesung und Übung zum Haftpflichtrecht sowie ein Kolloquium zum Obligationenrecht. Die Vorlesungen im Obligationenrecht I und Haftpflichtrecht, sowie die Übungen im Obligationenrecht I finden jeweils im Herbstsemester statt, die anderen Lehrveranstaltungen jeweils im Frühjahrssemester. Die Prüfung "Privatrecht II" erfolgt jeweils schriftlich am Ende des Frühjahrssemesters. Die Prüfungsanmeldung für das Modul "Privatrecht II" erfolgt ebenfalls im Frühjahrssemester.

ECTS: 0

Notes:

Privatrecht II, 1. Teil (keine Prüfungsanmeldung) ist der erste Teil des zweisemestrigen Pflichtmoduls Privatrecht II. Die Buchung von Privatrecht II, 1. Teil (keine Prüfungsanmeldung) dient der Anmeldung zu Vorlesungen und Übungen, sie gilt nicht als Anmeldung zur Prüfung. Die Prüfungsanmeldung für das Pflichtmodul Privatrecht II wird im Frühjahrssemester vorgenommen.

Learning Outcome:

Die Studierenden des Moduls Privatrecht II, 1. Teil kennen die vermittelten Inhalte, finden sich in den entsprechenden Erlassen zurecht und wissen über die einschlägige Judikatur und kontroverse Lehrmeinungen Bescheid. Sie können dazu kleine Gutachten verfassen und im Rahmen der ihnen gestellten Fälle zu selbständigen Lösungen gelangen, bei denen sie Pro und Contra gegeneinander abwägen und begründete Entscheide fällen.

Target Groups:

Studierende der Aufbaustufe

Languages of Instruction:

Deutsch

Course Materials:

Die Unterrichtsmaterialien sind bei den einzelnen Veranstaltungen sowie auf den Homepages der beteiligten Lehrstühle aufgeführt.

Module Civil Law III, Part 1 (no exam registration)

02SM120PM2T1 / Module without Credits

Description:

General description:

Das Modul «Privatrecht III» setzt sich zusammen aus den Rechtsgebieten Erb-/Güterrecht, Sachenrecht und Familienrecht.

Es beginnt jeweils im HS mit «Privatrecht III, 1. Teil» und beinhaltet die Vorlesungen zu den genannten Rechtsgebieten sowie begleitende Tutorate. Im FS wird das Modul fortgesetzt unter «Privatrecht III, 2. Teil» und beinhaltet die Übungen zu den obgenannten Rechtsgebieten. Im FS ist das Modul für den Leistungsnachweis buchbar.

ECTS: 0

Notes:

Privatrecht III, 1. Teil (keine Prüfungsanmeldung) ist der erste Teil des zweisemestrigen Pflichtmoduls Privatrecht III. Die Buchung von Privatrecht III, 1. Teil (keine Prüfungsanmeldung) dient der Anmeldung zu Vorlesungen und Tutoraten, sie gilt nicht als Anmeldung zur Prüfung. Die Prüfungsanmeldung für das Pflichtmodul Privatrecht III wird im Frühjahrssemester vorgenommen.

Learning Outcome:

Den Studierenden werden aufbauend auf den Modulen Privatrecht I (Assessment) und Privatrecht II (Aufbaustufe), die Grundkenntnisse im Erb-/Güterrecht, Sachenrecht und Familienrecht vermittelt. Für genauere Informationen konsultieren Sie die Hinweise zu den einzelnen Lehrveranstaltungen.

Module Research Colloquium Medieval German Literature

06SMG41p001 / Module

Description:

General description:

Das Modul besteht aus einem (Forschungs-)Kolloquium, das mit einer kleinen schriftlichen Arbeit abgeschlossen wird. Im Kolloquium werden medial und historisch spezifische Gegebenheiten der älteren Literatur, aktuelle Forschungsansätze und individuelle Forschungsprojekte diskutiert.

ECTS: 6

Learning Outcome:

Ausgehend von aktuellen Fragen der Forschung sind die Studierenden in der Lage, die medial und historisch spezifischen Gegebenheiten der älteren deutschen Literatur zu analysieren und eigenständige Perspektiven darauf zu entwickeln.

Sie verfügen über ein weitergehendes literarhistorisches Wissen, ein methodologisch geschultes Problembewusstsein und eine Kenntnis grundlegender fachgeschichtlicher Paradigmen.

Module Private International Law (BLaw), Part 1 (no exam registration)

02SM120PM3T1 / Module without Credits

Description:

General description:

Die zweiteilige Veranstaltung widmet sich dem Allgemeinen Teil sowie

ausgewählten Bereichen des Besonderen Teils des internationalen Privatrechts.

Neben den methodischen Grundlagen stehen insbesondere die wirtschaftsrechtlichen Fragestellungen im grenzüberschreitenden Kontext im Vordergrund.

Die erste Veranstaltung im Herbstsemester ist als reine Vorlesung ausgestaltet; die zweite im Frühjahrssemester als Vorlesung mit integrierten Übungen. In den Übungen soll das zuvor in den Vorlesungen erworbene Wissen anhand konkreter Fälle angewendet werden.

ECTS: 0

Notes:

Internationales Privatrecht (BLaw), 1. Teil (keine Prüfungsanmeldung) ist der erste Teil des zweisemestrigen Pflichtmoduls Internationales Privatrecht (BLaw). Die Buchung von Internationales Privatrecht (BLaw),

1. Teil (keine Prüfungsanmeldung) dient der Anmeldung zur Vorlesung, sie gilt nicht als Anmeldung zur Prüfung. Die Prüfungsanmeldung für das Pflichtmodul Internationales Privatrecht (BLaw) wird im Frühjahrssemester vorgenommen.

Module Criminal Law II, Part 1 (no exam registration)

02SM120PM5T1 / Module without Credits

Description:

General description:

Das Modul "Strafrecht II" setzt sich zusammen aus der Vorlesung Strafrecht BT I, der Arbeitsgemeinschaft Strafrecht BT I, der Vorlesung Strafrecht BT II, der Vorlesung Strafprozessrecht und den Übungen im Strafrecht II. Es beginnt jeweils im HS mit "Strafrecht II, 1. Teil" (Vorlesung Strafrecht BT I, Arbeitsgemeinschaft Strafrecht BT I). Im FS wird es fortgesetzt mit "Strafrecht II, 2. Teil" (Vorlesung Strafrecht BT II, Vorlesung Strafprozessrecht, Übungen im Strafrecht II).

ECTS: 0

Notes:

Strafrecht II, 1. Teil (keine Prüfungsanmeldung) ist der erste Teil des zweisemestrigen Pflichtmoduls Strafrecht II. Die Buchung von Strafrecht II, 1. Teil (keine Prüfungsanmeldung) dient der Anmeldung zu Vorlesung und Tutoraten, sie gilt nicht als Anmeldung zur Prüfung. Die Prüfungsanmeldung für das Pflichtmodul Strafrecht II wird im Frühjahrssemester vorgenommen.

Learning Outcome:

Die Studierenden lernen - aufbauend auf den Veranstaltungen im Modul Strafrecht I - einzelne Deliktgruppen des Besonderen Teils des Strafgesetzbuches kennen. Aufgrund der erworbenen Kenntnisse sind die Studierenden in der Lage, Fälle, in denen es um diese Deliktgruppen geht, gutachterlich zu bearbeiten sowie Problemstellungen aus dem Besonderen Teil des Strafrechts wie auch in Verbindung mit Problemstellungen aus dem Allgemeinen Teil des Strafrechts selbständig zu analysieren und zu bewerten.

Module Public Law II, Part 1 (no exam registration)

02SM120PM6T1 / Module without Credits

Description:

General description:

Das Modul baut auf dem Modul Öffentliches Recht I auf und umfasst zwei Vorlesungen im 3. Semester sowie Übungen im 4. Semester:

- Die Vorlesung Allgemeines Verwaltungsrecht (mit Tutoraten) widmet sich den allgemeinen Lehren des Verwaltungsrechts (Grundprinzipien des Verwaltungsrechts, Handlungsformen der Verwaltung, verwaltungsrechtliche Institute, Verwaltungsorganisation usw.).
- Die Vorlesung Öffentliches Verfahrensrecht behandelt die Grundlagen des Verfahrensrechts, das Verwaltungsverfahren sowie das öffentliche Prozessrecht, insbesondere die Rechtsmittel auf Bundesebene.
- Die Übungen dienen der fallbezogenen Anwendung des Stoffs.

ECTS: 0

Notes:

Öffentliches Recht II, 1. Teil (keine Prüfungsanmeldung) ist der erste Teil des zweisemestrigen Pflichtmoduls Öffentliches Recht II. Die Buchung von Öffentliches Recht II, 1. Teil (keine Prüfungsanmeldung) dient der Anmeldung zu Vorlesungen und Tutoraten, sie gilt nicht als Anmeldung zur Prüfung. Die Prüfungsanmeldung für das Pflichtmodul Öffentliches Recht II wird im Frühjahrssemester vorgenommen.

Learning Outcome:

Die Studierenden sind nach Absolvierung des Moduls in der Lage, Problemstellungen des materiellen Verwaltungsrechts und des öffentlichen Verfahrensrechts zu erkennen, einzuordnen und anwendungsbezogen einer sachgerechten, überzeugenden und dogmatisch fundierten Lösung zuzuführen.

Target Groups:

Studierende der Aufbaustufe (Rechtswissenschaft)

Languages of Instruction:

Deutsch

Module Civil Law II for future notaries, Part 1 (no exam registration)

02SMNOPM3T1 / Module without Credits

Description:

General description:

Das Modul "Privatrecht II für Notariatsstudierende" erstreckt sich über zwei Semester und enthält die Vorlesungen und Übungen im Obligationenrecht I und II. Die Vorlesungen und Übungen im Obligationenrecht I finden jeweils im Herbstsemester statt, die Vorlesungen und Übungen im Obligationenrecht II jeweils im Frühjahrssemester. Die Prüfung von Privatrecht II für Notariatsstudierende erfolgt jeweils mündlich am Ende des Frühjahrssemesters. Die Prüfungsanmeldung für das Modul Privatrecht II für Notariatsstudierende erfolgt ebenfalls im Frühjahrssemester.

ECTS: 0

Notes:

Privatrecht II für Notariatsstudierende, 1. Teil (keine Prüfungsanmeldung) ist der erste Teil des zweisemestrigen Pflichtmoduls Privatrecht II für Notariatsstudierende. Die Buchung von Privatrecht II für Notariatsstudierende, 1. Teil (keine Prüfungsanmeldung) dient der Anmeldung zu Vorlesung und Übungen, sie gilt nicht als Anmeldung zur Prüfung. Die Prüfungsanmeldung für das Pflichtmodul Privatrecht II für Notariatsstudierende wird im Frühjahrssemester vorgenommen.

Learning Outcome:

Die Absolvierenden des Moduls Privatrecht II kennen die vermittelten Inhalte, finden sich in den entsprechenden Erlassen zurecht und wissen über die einschlägige Judikatur und kontroverse Lehrmeinungen Bescheid. Sie können dazu kleine Gutachten verfassen und im Rahmen der ihnen gestellten Fälle zu selbständigen Lösungen gelangen, bei denen sie Pro und Contra gegeneinander abwägen und begründete Entscheide fällen.

Target Groups:

Module Colloquium

06SMG26p001 / Module

Description:

General description:

Ziele, Methoden und Ergebnisse der Doktorarbeit sind in Form eines Referats im Rahmen eines Kolloquiums zur Diskussion zu stellen. Die Doktorierenden beteiligen sich aktiv an der Diskussion der Forschungsergebnisse anderer Kolloquiumsteilnehmender.

Dabei erwerben sie grundlegende Fach- und Medienkompetenzen zur Präsentation eines spezialisierten wissenschaftlichen Themengebiets sowie zur Teilnahme an der aktuellen wissenschaftlichen Diskussionskultur.

ECTS: 3

Learning Outcome:

Die Doktorierenden sind in der Lage, den Inhalt ihrer eigenen wissenschaftlichen Arbeit auf dem Niveau aktueller Forschung mündlich vor Publikum zu präsentieren und im Rahmen einer kritischen Diskussion argumentativ zu vertreten. Ebenso können sie sich in Form von Diskussionsbeiträgen mit den Forschungsergebnissen anderer Teilnehmender fundiert auseinandersetzen.

Module Longing at a Dead End: Retromania and Crises of the Future as Narrative Mottos in Contemporary Popular Culture

06SM506p404 / Module

Description:

General description:

«2026 Is The New 2016» heisst es aktuell parolenähnlich in den Sozialen Medien. Paradigmatisch bündelt sich darin eine Zeitdiagnostik mit Wiederholungscharakter, die seit 2016 in leitmotivischem Gestus in der transatlantischen Mainstream-Medienlandschaft vertreten ist. Zwischen politisch-ökonomischer Prekarität, weltweit umstrittener Zukunft/-losigkeit sowie weitervererbten (Dauer-)Krisen, suchen insbesondere gegenwärtige populärkulturelle Phänomene wie Stranger Things, Westworld oder Bridgerton Halt (oder Zuflucht) in einem retro-nostalgisch inszenierten und (hyper-)ästhetisierten 'Früher'. Das Abrufen, Referenzieren, Revidieren und Ummodellieren altbewährter Narrative sowie wiedererkennbarer visueller Schemata geschieht vor dem Hintergrund einer Phase des sozialgesellschaftlichen Umbruchs. Das Kolloquium widmet sich ebendieser massenmedialen Entwicklung innerhalb eines hochpolitisierten und konfliktären Klimas. Gemeinsam werden wir eine Varietät an audiovisuellen (Para-)Texten diskutieren, und diese unter Berücksichtigung von Theorien wie Derridas 'Hauntologie' oder den Schriften Hannah Arendts, Umberto Ecos, Bell Hooks etc. kritisch beleuchten.

ECTS: 3

Notes:

Studentische Kolloquien werden von Masterstudierenden für Bachelorstudierende konzipiert und durchgeführt. Gemeinsam werden Texte zu einem bestimmten Thema intensiv gelesen und diskutiert.

Learning Outcome:

Die Studierenden haben einen Überblick über ein spezifisches Themenfeld der Populären Kulturen und können dieses in der Gruppe gemeinsam fachlich einordnen, perspektivieren und diskutieren.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Sibylle Künzler

Requirements:

Prerequisites: Studentische Kolloquien sind für Studierende geeignet, die die Modulgruppe «Einführung in die Populären Kulturen» erfolgreich absolviert haben.

Assessment: Referat (mit schriftlichen Unterlagen)

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Module Insights into Teaching Practice

06SM506p509 / Module

Description:

General description:

Masterstudierende haben die Möglichkeit, sich für eine eigenständige Lehrveranstaltung zu bewerben. Dabei handelt es sich um das Studentische Kolloquium, das von Masterstudierenden (mit Unterstützung und Begleitung erfahrener Dozierender) für Bachelorstudierende konzipiert und durchgeführt wird. Das Modul beinhaltet die inhaltliche Erarbeitung eines selbstgewählten Themenschwerpunkts, zwei Semesterwochenstunden Lehre inkl. wöchentlicher Sitzungsvor- und -nachbereitung.

ECTS: 3

Notes:

Das Modul kann nicht selbstständig gebucht werden. Studierende des Studentischen Kolloquium melden sich bitte bei pk-tutorat@isek.uzh.ch.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Sibylle Künzler

Requirements:

Assessment: Portfolio (Syllabus, Schlussbericht). Das Modul wird als bestanden bewertet, wenn alle Elemente des Portfolios bestanden sind.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can't be repeated

Module Medical Anthropology & Global Health

06SM721p336 / Module

Description:

General description:

Wie erleben Menschen Krankheit sowie körperliches oder psychisches Leid? Wie werden diese Erfahrungen interpretiert, und welche sozialen, ökonomischen oder politischen Ursachen lassen sich herausarbeiten? Wie gestalten sich Praktiken des Heilens oder der Prävention? Mit solchen Fragen beschäftigt sich die Medizinanthropologie. In den ersten Sitzungen des Seminars erarbeiten wir anhand klassischer Ethnographien zentrale Begriffe, Theorien und Ansätze dieser Teildisziplin. Im Hauptteil widmen wir uns kritisch aktuellen Problemfeldern der globalen Gesundheit: von der globalen Expansion biomedizinischer und psychotherapeutischer Ansätze sowie ihrer lokalen Aneignung und Umdeutung; über strukturelle Gewalt und Ungleichheit in der Gesundheitsversorgung, etwa im Zusammenhang mit Rassismus und Migration; bis hin zu dekolonialen Bewegungen in der globalen Gesundheit sowie konstruktiven Beiträgen anthropologischer Forschung. In diesem Rahmen können Studierende auch eigene Schwerpunkte setzen.

ECTS: 6

Notes:

Dieses Modul ist zweisemestrig. Der Unterricht findet nur im ersten Semester statt, und das Modul kann entweder nach einem oder nach zwei Semestern abgeschlossen werden. Sie können das Modul nur nach zwei Semestern abschliessen, wenn Sie im zweiten Semester ebenfalls immatrikuliert sind.

Learning Outcome:

Die Studierenden lernen, zentrale Begriffe, Theorien und Ansätze der Medizinanthropologie zu benennen, zu erklären und anhand klassischer Ethnographien zu konkretisieren.

Sie lernen, aktuelle Problemfelder der Globalen Gesundheit mithilfe medizinanthropologischer Konzepte einzuordnen, zu analysieren und kritisch zu diskutieren.

Sie erwerben die Fähigkeit, eigenständig ein spezifisches Thema zu identifizieren, zu recherchieren und in wissenschaftlicher Form mündlich (Kurzreferat) und schriftlich (Seminararbeit) darzustellen.

Zudem werden die akademischen Kompetenzen der Literaturrecherche und Quellenkritik vertieft.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Gabriel Scheidecker

Requirements:

Prerequisites: Es wird empfohlen, zuerst alle Module des Einführungsstudiums der Ethnologie zu absolvieren.

Assessment: Portfolio: Aktive Teilnahme 20%, Kurzreferat 30%, Seminararbeit 50%.
Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can't be repeated

Organisation:

Offer pattern: 2 Semesters (One-Time)

Request period: from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Module Precarity and Opportunity: Anthropological Perspectives on Inequality, Strategic Interaction and Institutional Change
06SM721p616 / Module

Description:

General description:

"Precarity" has become an academic buzzword in recent years. It is used most often to describe the transformation processes in a global world where labour relations are increasingly insecure in so-called 'post-Fordist' production systems. But this usage of the word disguises more than it explains. In a general sense, human life has always been shaped by precarious conditions, either of an environmental nature or caused by social and political inequalities. Thus, precarity can also be understood in a more fundamental ontological sense as something inherent in the world we live. It refers to the fact that we can never be sure about our hopes, plans, and achievements.

Similarly, opportunity is an integral part of people's shared experiences across the globe. These may come as chances or part of a planned strategy but we can never be sure with certainty that an effort or investment we make will bring the results hoped for. Taken together, precarity and opportunity provide an analytic tool to understand the processes by which humans organise their livelihoods, become locked in mutual dependency, and experience luck, misfortune, and discrimination. These two dimensions of life form a continuum of chances and obstacles that are at the same time mutually constitutive.

In this seminar, we will discuss these two concepts. We will begin with some theoretical insights before moving to ethnographic examples and extensions for a broad range of economic themes, such as international migration, processes of rural development and urbanisation, economic and social transformations in the global South and the former socialist world, or ongoing changes in European societies, from labour unions and refugee livelihoods to bankers in Zurich. Taken together this may help us to better understand people's livelihood strategies, aspirations, meanings, and motivations in the world of today and tomorrow.

ECTS: 6

Notes:

This module lasts two semesters. Classes only take place in the first semester, and the module can be completed after either one or two semesters. You can only complete the module after two semesters if you are also enrolled in the second semester.

Learning Outcome:

This course is designed to help students acquire core skills in academic work. Participation is designed to develop: a) academic skills (understanding and discussing academic texts, using academic sources); b) communication skills (writing academic essays, giving oral presentations); and c) self-management skills (time management, self-assessment, independent work).

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Peter Finke

Requirements:

Assessment:

Portfolio: Written assignments (60%), presentation (20%), active participation (20%)

All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is considered not completed and the module is therefore failed.

Module BME 328 Current Topics in Microbiology

07SMBME328 / Course

Description:

General description:

This course covers contemporary research topics in microbiology including antibiotic resistance, new therapies against pathogens, virulence, microbiome-host interactions, microbe-microbe interactions, microbial genome evolution, etc. The focus of the course is primarily on bacteria and on understanding mechanistic, ecological and evolutionary aspects of the above-mentioned topics. This is an interactive course, in which students deliver oral presentations, moderate discussion sessions, and together acquire knowledge on the selected topics.

ECTS: 3

Learning Outcome:

After completing this module, students should be able to:

- recognise and discuss several contemporary research topics in microbiology
- describe mechanisms mediating interactions between bacteria and hosts, drugs, environments
- assess the ecological and evolutionary benefits of microbial behaviours
- introduce a specific contemporary research topic to colleagues in oral and written forms

Merkmale:

Responsible instructor: Rolf Kümmerli

Requirements:

Prerequisites: Basic studies completed

Assessment: Attendance and active participation in the discussions is required. Assessment is based on: (a) oral presentation, (b) session moderation, and (c) a short essay on a topic of choice covered in the lecture

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Module BIO 116 Molekulare Genetik

07SMBIO116 / Course

Description:

General description:

In dieser Grundvorlesung werden die Grundprinzipien der Genetik auf molekularer Ebene erarbeitet: Struktur der Gene, Replikation der DNA, Transkription, RNA Prozessierung, Translation, Regulation der Genexpression, Mutationen und DNA Reparatur, Grundprinzipien der rekombinanten DNA-Technologie und Genomik und wie diese neuen Technologien die moderne Gesellschaft beeinflussen.

ECTS: 2

Learning Outcome:

Am Ende dieses Moduls sind die Studierenden in der Lage

- Prozesse der Genexpression und deren molekulare Komponenten zu beschreiben
- die für die Genetik relevanten zellbiologischen Prozesse zu beschreiben und mit genetischen Abläufen zu verknüpfen
- genetische Grundlagen und Konzepte an ausgewählten Problemstellungen der Medizin und der Biologie anzuwenden
- Standardmethoden der Molekularbiologie zu beschreiben und deren Anwendungen zu erklären

Überfachliche Kompetenzen

Am Ende dieses Moduls sind die Studierenden in der Lage

- selbständig zu entscheiden, welches die wesentlichen Konzepte und Inhalte für die Molekularbiologie sind und welche Beispiele und Ausführungen nur als Ausblick oder zur Veranschaulichung dienen
- Informationen und Zusammenhänge selbständig zu verstehen und auszuwerten

Target Groups:

Studierende mit Hauptfach Chemie oder Wirtschaftschemie.

Languages of Instruction:

Deutsch (Unterlagen z.T. in Englisch)

Course Materials:

Unterrichtsmaterialien:

Empfohlenes Lehrbuch: "An Introduction to Genetic Analysis" von Anthony J.F. Griffiths et al., 12th Edition.

Merkmale:

Responsible instructor: Alex Hajnal

Requirements:

Assessment: Im Modul BIO116 findet eine Modulprüfung im Januar 2027 statt.

Prüfungsformat:

- Online Prüfung vor Ort in verschiedenen Hörsälen (BYOD-SEB: 'Bring-your-own-device' mit 'Safe exam browser')
- Aufgabentypen:
 - Multiple Choice (verschiedene Fragetypen)
 - kurze Freitext-Aufgaben
- Prüfungssprache: Deutsch mit englischer Übersetzung

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Module Research Colloquium in East Asian Art History

06SMG32p001 / Module

Description:

General description:

The Research Colloquium in East Asian Art History offers a platform for MA students, doctoral candidates and postdoctoral researchers to develop their individual research projects. Participants will engage in the process of formulating research questions, identifying pertinent research materials and methodologies, and exploring relevant theoretical frameworks. They will have the opportunity to present their works in progress and receive feedback from their peers.

Additionally, the colloquium will facilitate discussions on secondary sources relevant to both individual research projects and the broader field of East Asian Art History.

ECTS: 4

Languages of Instruction:

Englisch

Merkmale:

Responsible instructor: Ewa Machotka

Requirements:

Assessment: Referat
Kommentar zum Vortrag oder Diskussionsbeitrag oder Teilnahme an wissenschaftlicher Diskussion

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module DSA 302 Hacking the HTEL - Prototyping in action!

07SMDSA302 / Praktikum

Description:

General description:

The whole UZH HTEL is a giant prototype and subject to constant development. Whether it is small robotic solutions, improvements of robotic tools or creating more automation-friendly setups: Custom solutions are needed on a regular basis in various shapes. In these practical HTEL projects you will apply basics in electronics, microcontroller programming, digital and analogue input/output processing, feedback control and low-level automation, 3D design and 3D printing in a practical laboratory context.

ECTS: 2

Notes:

Availability of this course depends on current projects in the HTEL and available resources. Contact johannes.schoergenhummer@chem.uzh.ch for more information and application.

Priority will be given to students enrolled in the DSA minor. Students not enrolled in the DSA Minor may be admitted if requirements are met and resources are available.

Learning Outcome:

Understanding and applying the content covered

Target Groups:

MSc and PhD Students, students of the DSA Minor

Languages of Instruction:

English or German

Merkmale:

Responsible instructor: Johannes Schörgenhummer

Requirements:

Prior Knowledge: CHE 725 or equivalent knowledge in prototyping required, workshop course and Python skills recommended.

Assessment: Project report (English, per request also in German)

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Semester)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Organisation: Department of Chemistry

Offered in: Spring Semester 2027

Module CHE 732 Electrochemical Technologies

07SMCHE732 / Lecture with Practical Exercises

Description:

General description:

This course provides a rigorous foundation in electrochemistry, covering thermodynamics, electrode kinetics (including Butler–Volmer and Marcus-type frameworks), and mass transport processes. These concepts are integrated through key experimental techniques such as cyclic voltammetry and impedance spectroscopy. Emphasis is placed on connecting fundamental principles to modern applications, including electrocatalysis, energy conversion and storage, and electrochemical synthesis, with the goal of enabling students to analyze and interpret complex electrochemical systems.

ECTS: 2

Notes:

The final exam (1 hour) takes place on Friday December 18th during the normal lecture time.

Learning Outcome:

Students will be able to analyze and interpret complex electrochemical systems

Target Groups:

Advanced undergraduate students and Masters students

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

David Tilley

Requirements:

Assessment:

final exam (usually written in the last lecture hour)

The exam is held in English

Module Migration and Language in Switzerland

06SM440p007 / Module

Description:

General description:

Migration is one of the defining features of today's world - in 2020, nearly 281 million people were living outside their country of birth, and in Switzerland, more than a third of the adult residents are first-generation migrants. Migrants need to make decisions daily on which language they use or want to learn and are met with different reactions, both positive and negative, depending on the choices made. In this colloquium, we will look at what happens to language when people move across borders, and how migration shapes the way we speak, the way we are perceived, and the way we see ourselves. To answer these questions, it is important to understand the existing perceptions as well as the circumstances of the people that are interacting: Do they potentially have conflicting cultural expectations?

During this class, we will look further into reasons to choose one language over another, what makes someone want to learn a language, and what the consequences of these decisions are by focusing on the following questions:

- How do people navigate speaking different languages in their daily lives?
- Why do certain accents or languages carry more prestige or stigma than others?
- How does language influence identity, belonging, and cultural understanding?

Drawing on examples from Switzerland and our own experiences, we will discuss topics like multilingualism, language and identity, and language attitudes. By the end of the course, you will have gained a deeper understanding into how language shapes social life and how migrants navigate languages.

ECTS: 3

Learning Outcome:

Students will

be able to reflect on and analyze the motivations behind language acquisition and use of migrants in Switzerland.

be aware of the intercultural differences which might hinder communication.

build skills for reflecting on their own language use and for interacting with Swiss residents and migrants alike.

Module The mediatisation of everyday life in digital media: A comparison of Switzerland and the English-speaking world
06SM440p008 / Module

Description:

General description:

The transformation of the media landscape, with the development of digital media, has radically changed human communication and social interaction. Now digital technologies allow individuals to represent their daily lives on myriad platforms, and engage in strategic presentation of the self across the entire lifespan (Harley et al. 2018). Everyday experience has become visible and searchable on social media, as individuals allow digital media into their lives with new levels of intimacy and familiarity, marking a shift from "mundane" private experience to public, curated and commodified online personae.

This module uses the concept of mediatisation as its analytical foundation and investigates how digital media are used to shape key life-course phases. Mediatisation theory argues that media do not simply transmit information but increasingly organise and structure social life itself (Krotz 2017). Through a cross-cultural comparison of Switzerland and the English-speaking world, students in this module will examine how daily life is experienced and represented online at different stages of the lifespan, including childhood, adolescence, parenting, working life, older age, and death/bereavement, and how such representation is influenced by the structures and ideologies of digital media.

Switzerland provides a distinctive and academically valuable case for comparison. Its multilingual media landscape, strong public service media mandate, and high levels of institutional trust contrast sharply with the highly commercialised, platform-driven media ecologies of the US and UK. Swiss digital culture also places particular emphasis on privacy and decentralised governance, offering students an opportunity to analyse how cultural values and regulatory environments shape online life. Extant research on Swiss digital life is also sparse, allowing students to contribute to knowledge in this field of inquiry.

Across the semester, students will be introduced to key concepts such as mediatisation, platformisation, datafication, digital intimacy, and strategic self-presentation. Each life phase will be explored through relevant platforms (e.g., TikTok and adolescence; LinkedIn and professional identity; Instagram and parenting; online fora and grief communities), allowing students to examine both what people do in digital media and the deeper question of how digital media reorganise our everyday lives.

Students will undertake small empirical research projects, applying methods such as discourse analysis and qualitative visual analysis. This enables students to acquire transferable skills in digital literacies, cross-cultural comparison, online research, and critical media competences.

ECTS: 3

Learning Outcome:

By the end of the module, students will be able to:

- Analyse mediated everyday practices
- Compare Swiss and Anglophone digital cultures
- Identify institutional, cultural and regulatory differences in digital media environments
- Critically reflect on the implications of platformed life across the human lifespan.

Module Caste in India

06SM721p130 / Module

Description:

General description:

In diesem Kernbereich-Seminar wird das Thema "Kaste" im gegenwärtigen Indien eingeführt. Dabei handelt es sich um eine äußerst komplexe und beharrliche Form der sozialen Hierarchisierung und Ausbeutung, die weite Bereiche des Alltags der Menschen beeinflussen kann. Anhand von anschaulichen Beispielen und exemplarischen Ethnographien werden grundlegende Fragen geklärt, wie: - Wird man zwangsläufig in eine Kaste hineingeboren? Kann man ausgestoßen werden oder austreten? Gibt es Kasten auch unter Muslimen und Christen in Indien? Wie hat sich das sogenannte Kastensystem in den letzten hundert Jahren gewandelt? Welche Anti-Kasten-Bewegungen gab es? Welche Rolle spielen dabei religiöse, kulturelle, rechtliche, politische, wirtschaftliche und ethnische Aspekte der sozialen Differenzierung und Diskriminierung?

ECTS: 6

Notes:

Dieses Modul ist zweisemestrig. Der Unterricht findet nur im ersten Semester statt, und das Modul kann entweder nach einem oder nach zwei Semestern abgeschlossen werden. Sie können das Modul nur nach zwei Semestern abschliessen, wenn Sie im zweiten Semester ebenfalls immatrikuliert sind.

Abgabetermine: 05.01.2027 für den Abschluss per Ende Herbstsemester 2026, 28.02.2027 für den Abschluss per Ende Frühlingsemester 2027

Learning Outcome:

Ein besseres Verständnis von

- 'Kaste' in Indien (im Verhältnis zu 'Klasse', 'Ethnizität' und 'race')
- der Rolle von Religion(en) in Indien (insbesondere Aspekten des Hinduismus)
- der Verflechtung religiöser, kultureller, rechtlicher, politischer, wirtschaftlicher und ethnischer Aspekte von sozialer Differenzierung und Diskriminierung

Die folgenden akademischen Kompetenzen werden hier vertieft:

- Lesen, Verstehen und analysieren akademischer Texte
- Schreiben eigener Textpassagen und Texte
- Präsentieren und Diskutieren

Languages of Instruction:

Deutsch

Module Research Colloquium

06SMG33p001 / Module

Description:

General description:

Im Forschungskolloquium stellen einerseits Doktorierende ihre Projekte zur Diskussion. Andererseits werden internationale Wissenschaftler*innen, die im Themenbereich der Forschungsschwerpunkte des Seminars für Filmwissenschaft arbeiten, zu Gastreferaten eingeladen.

Am Forschungskolloquium sind auch MA-Studierende im Hauptfach herzlich eingeladen teilzunehmen (ohne ECTS Credits).

ECTS: 2

Learning Outcome:

Befähigung der Doktorierenden zur methodologisch reflektierten Präsentation und Verteidigung der eigenen Forschungsergebnisse sowie zur kritischen Positionierung in der internationalen Forschungsdiskussion.

Languages of Instruction:

Deutsch, z.T. Englisch

Module The Fauna of Ancient Egypt: Between Divinity and Exploitation

06SM322p003 / Module

Description:

General description:

Der altägyptische Zugang zur Tierwelt ist auf der einen Seite durch die Vergöttlichung von bzw. Gleichsetzung verschiedener Gottheiten mit tierischen Lebensformen geprägt. In der Repräsentation der Götter bediente man sich teilweise tiergestaltiger Formen wie bei der löwenköpfigen Göttin Sachmet oder dem krokodilköpfigen Sobek. Als Gegenpol, zumindest aus postmoderner Sicht, steht der Umgang mit dem Tier als Jagd- und Nutztier und die Behandlung derselben, wenn zum Beispiel in Darstellungen Esel verprügelt werden.

Die Übung soll verschiedenste Facetten der altägyptischen Tierwelt untersuchen. Neben Vergöttlichung und Nutzung sollen Fragen wie jene der Taxonomie (z.B. waren Fledermäuse für Ägypter Vögel?), der Medizin (das Tier als Patient vs. Tiere als Heilmittel) oder heimische vs. fremde Tiere verfolgt werden.

ECTS: 3

Learning Outcome:

Vertiefte Kenntnisse zu wissenschaftlichen Zugangsweisen allgemein und zum jeweiligen Thema im Besonderen; Vertrautheit mit fachlichen Hilfsmitteln und Referenzwerken; fremde Forschungsergebnisse publikumsgerecht präsentieren; Fähigkeit zur Teilnahme an wissenschaftlichen Diskussionen; selbständige bibliographische Recherche zu bestimmten Fachthemen; selbständige Analyse wissenschaftlicher Sachverhalte und kritische Hinterfragung von Forschungsmeinungen.

Module Colloquium Antiquity and Christianity

06SM322p004 / Module

Description:

General description:

Im Kolloquium stehen Austausch und Diskussionen über ausgewählte Teile eines Werkes im Vordergrund. Dieses soll in vertiefter gemeinsamer Lektüre (in Übersetzung) umfassend erschlossen werden.

ECTS: 3

Learning Outcome:

Förderung der Fähigkeit zur Analyse von Quellentexten aus der christlichen Antike in Übersetzung; Vermittlung von Kenntnissen über die historischen, philosophischen und theologischen Entwicklungen in der Spätantike.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Andreas Victor Walser

Requirements:

Assessment: schriftliche Arbeit

Essay zu einem selbstgewählten Thema in Zusammenhang mit dem gelesenen Werk. Abgabedatum: 27.12.2026.

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Request period: from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Place allocation at the latest: Sa 29.08.2026 22:00

Waiting list progression period: from Sa 29.08.2026 22:00 to Do 10.09.2026 24:00

Cancellation period: from Sa 29.08.2026 22:00 to So 13.09.2026 24:00

Organisation: Institute for Archaeology, Classical Philology, and Ancient Studies

Offered in: Fall Semester 2026

Component of:

Module AI as a Research Tool: Workflow Design for the Social Sciences

06SM615p512 / Module

Description:

General description:

Das Modul fördert vertieftes Fachwissen in einem ausgewählten Forschungsfeld. Es vermittelt die Kompetenz, zu einem ausgewählten Thema Fragestellungen aus Sicht der Politikwissenschaft zu entwickeln und zu analysieren. Im Zentrum des Seminars stehen die politikwissenschaftliche und normative Analyse, das trennscharfe Analysieren der Begriffe in ihrer Anwendung auf empirische Studien und das Begründen politischer Sachverhalte. Die unterschiedlichen Themen werden theoretisch und empirisch vertieft.

ECTS: 6

Notes:

The seminar is organized as a block before the semester begins, with two additional full-day sessions during the semester.

Learning Outcome:

By the end of this course, researchers and students will be able to:

1. Articulate the key differences between the software development paradigm and the social scientific research paradigm as they relate to AI tool adoption.
2. Critically evaluate AI tools (LLMs, coding assistants, data pipelines) against criteria of reproducibility, transparency, and research ethics.
3. Design a human-in-the-loop research workflow that integrates AI tools while preserving researcher judgement and methodological accountability.
4. Identify and mitigate common risks of AI use in research, including hallucination, data leakage, opacity of inference, and undocumented methodological choices.
5. Document and communicate their use of AI tools in a manner consistent with emerging disciplinary standards for transparency and replication.

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Karsten Donnay

Lucas Leemann

Requirements:

Assessment:

Portfolio

Workflow Design Portfolio (60%). Each student develops and documents an AI-augmented research workflow for a project of their choosing. The portfolio includes a workflow diagram, a tool audit (evaluating chosen tools against course criteria), and a reflexive memo on design choices.

Peer Critique Presentation (20%). In the later sessions, students present their workflows and provide structured feedback on a peer's design. Assessed on the analytical quality of the critique.

Participation and In-Class Exercises (20%). Active engagement during the intensive block, including hands-on tool evaluation exercises and small-group

discussions.

Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden. Please note: All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed.

Grading Scale: 1-6, Half Grades Given

Module Psychedelic Psychology

06SM200p557 / Module

Description:

General description:

Diese Lehrveranstaltung bietet eine umfassende Einführung in die psychedelische Psychologie - ein aufstrebendes Gebiet der psychologischen Forschung, das sich mit den Wirkungen und therapeutischen Anwendungen klassischer Psychedelika wie LSD, Psilocybin, Mescaline und DMT sowie verwandter Substanzen wie MDMA befasst. Der Schwerpunkt der Veranstaltung liegt auf psychologischen und psychotherapeutischen Aspekten dieser Substanzen. Zentrale Themen sind dabei die Auswirkungen von Psychedelika auf grundlegende psychische Bereiche (Wahrnehmung, Denken, Emotion, Stimmung, Volition), psychometrische und phänomenologische Erfassung von psychedelischen Erfahrungen sowie die psychedelisch-assistierte Psychotherapie. Ergänzt wird dies durch Beiträge aus biologischer Psychologie und Psychopharmakologie sowie durch Vergleiche mit anderen aussergewöhnlichen Bewusstseinszuständen (z.B. Meditation) und durch Untersuchungen zu möglichen Einflüssen psychedelischer Erfahrungen auf das Weltbild im interdisziplinären Schnittfeld von Psychometrie und Philosophie. Angesichts zunehmender Forschungsbefunde, die zeigen, dass psychedelische Erfahrungen sowohl bei gesunden Personen als auch in klinischen Populationen zumindest mittelfristig mit positiven Effekten assoziiert sein können, hat auch das Interesse an der Erforschung von Psychedelika stark zugenommen. Gleichzeitig bestehen weiterhin offene Fragen hinsichtlich Validität, Wirkmechanismen und Generalisierbarkeit der Befunde, und, obwohl Psychedelika aus physiologischer Sicht allgemein als relativ sicher gelten, bleiben auch Fragen zur Prävalenz und zur systematischen Erfassung anhaltender unerwünschter psychischer Wirkungen noch offen. Die kritische Auseinandersetzung mit diesen methodischen und sicherheitsbezogenen Fragen bildet auch einen zentralen Bestandteil des Kurses. Insgesamt bietet das Modul einen strukturierten und breiten Überblick darüber, wie Psychedelika zu einem zunehmend bedeutsamen Bestandteil psychologischer Forschung und Praxis werden. Diese Lehrveranstaltung ist in keiner Weise dazu gedacht, zur illegalen Einnahme psychedelischer Substanzen zu ermutigen.

ECTS: 4

Notes:

Dieses Modul steht ausschliesslich Studierenden des Master of Science in Psychologie (RVO19) offen. This module is only open to students of Master of Science in Psychology (RVO19).

Learning Outcome:

Studierende, die dieses Modul erfolgreich abschliessen,

- gewinnen einen grundlegenden Überblick über die psychedelische Psychologie als aufstrebendes Feld innerhalb der psychologischen Wissenschaft,
- können zentrale psychologische, psychotherapeutische, phänomenologische, neurobiologische und pharmakologische Aspekte psychedelischer Erfahrungen beschreiben, mit besonderem Schwerpunkt auf psychologischen Prozessen und deren klinischen Implikationen,
- verstehen, wie psychometrische Instrumente eingesetzt werden, um psychedelische Erfahrungen in Forschung und Praxis zu erfassen und zu differenzieren,
- können therapeutische Anwendungen von Psychedelika und verwandten Substanzen wie MDMA in verschiedenen psychotherapeutischen Ansätzen erläutern,
- können psychedelische Erfahrungen im Kontext anderer aussergewöhnlicher Bewusstseinszustände einordnen und mögliche Einflüsse psychedelischer Erfahrungen auf das Weltbild reflektieren,
- setzen sich kritisch auseinander mit aktuellen Debatten und Forschungsrichtungen in der psychedelischen Psychologie sowie mit ihrer Integration in psychologische Forschung, psychologische Praxis und psychische Gesundheitsversorgung.

Module PHY 477 Introduction to Magnetism

07SMPHY477 / Course

Description:

General description:

This course tackles the fundamental question of why only a few materials exhibit magnetism in Nature. The origin of atomic magnetic moments and the key mechanisms that govern their interactions are justified starting from fundamental principles. In addition, the influence of thermal fluctuations on magnetic ordering is discussed as well as the formalism to describe magnetic resonance phenomena.

The lecture "Introduction to Magnetism" aims at letting students familiarize themselves with the basic principles of quantum and statistical physics that determine the behavior of real magnets. Understanding why only a few materials are magnetic at finite temperature will be the leitmotiv of the course. We will see that defining in a formal way what "being magnetic" means is essential to address this question properly. Theoretical concepts will be applied to a few selected nano-sized magnets, which will serve as clean reference systems.

Topics:

- Magnetism in atoms (quantum-mechanical origin of atomic magnetic moments, intra-atomic exchange interaction)
- Magnetism in solids (mechanisms producing inter-atomic exchange interaction in solids, crystal field)
- Magnetic order at finite temperatures (Ising, XY, and Heisenberg models, low-dimensional magnetism)
- Spin precession and relaxation (Larmor precession, resonance phenomena, quantum tunneling, Bloch equation, superparamagnetism)

ECTS: 6

Notes:

This course can only be booked at ETH. Please register as mobility student at ETH.

Learning Outcome:

By the end of this course, students will develop the ability to utilize quantum mechanics concepts to estimate the strength of atomic magnetic moments and understand their reciprocal interactions. They will gain proficiency in interpreting experimental measurements on model systems in terms of material composition and an appropriate, phenomenological spin Hamiltonian. For instance, students will be able to recognize whether the magnetic hysteresis observed in some samples arises from slow dynamics or from a phase transition. Lastly, they will be capable of interpreting the occurrence of abrupt transitions or the emergence of characteristic length scales as resulting from the interplay between competing interactions. Altogether, students will acquire the basic knowledge needed to develop a research project in the field of magnetism or to attend effectively more advanced courses on this topic.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Johan Chang

Requirements:

Prior Knowledge:

Students are assumed to possess a basic background knowledge in quantum mechanics, solid-state and statistical physics as well as classical electromagnetism.

Students will have the opportunity to self-assess their understanding through quizzes and interactive tutorials, mostly inspired by topics of current research in nanoscale magnetism.

Grading Scale:

1-6, Half Grades Given

Repeatability: Can be repeated once

Module PHY 524 Superconductivity

07SMPHY524 / Lecture with Practical Exercises

Description:

General description:

Introduction to the most important concepts of superconductivity both on phenomenological and microscopic level, including experimental and theoretical aspects.

ECTS: 6

Notes:

Superconductivity: thermodynamics, London and Pippard theory; Ginzburg-Landau theory: spontaneous symmetry breaking, flux quantization, type I and II superconductors; microscopic BCS theory: electron-phonon mechanism, Cooper pairing, quasiparticle spectrum, thermodynamics and response to magnetic fields. Josephson effect: superconducting quantum interference devices (SQUID) and other applications.

Learning Outcome:

At the end of this course, students

- have an overview over the basic theoretical and theoretical aspects of superconductivity,
- understand the microscopic theory describing pairing of electrons into Cooper pairs (BCS theory),
- know the response of a superconductor to magnetic fields and can distinguish type I and type II superconductors,
- understand the coherent state of a superconductor and know manifestations of the macroscopic nature of this state.

Target Groups:

MSc students with an interest in both experimental and theoretical condensed matter physics

Languages of Instruction:

English

Course Materials:

Lecture notes are provided on Moodle

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Titus Mangham-Neupert

Requirements:

Prerequisites:

The preceding attendance of a lecture on "Solid State Physics" and "Quantum Mechanics I" are mandatory. The lectures "Quantum Mechanics II" and "Solid State Theory" provide the most optimal conditions to follow this course.

Module External Internship

06SM682p502 / Module

Description:

General description:

Die Studierenden bewerben sich eigenständig bei einschlägigen Institutionen (z.B. Kantonsarchäologien, Grabungsfirmen, Denkmalpflege oder Museen) für ein "externes" Praktikum. Der Umfang des Praktikums umfasst wenigstens vier Wochen zu 100% Arbeitszeit. Nach Zusage der Praktikumsstelle vereinbaren die Studierenden mit dem Modulverantwortlichen ein Praktikumskonzept. Ziel des Praktikums ist der Einblick in die archäologische Arbeitspraxis ausserhalb der Universität. Es obliegt den Studierenden, nach Absolvierung die erforderlichen Unterlagen (schriftliche Bestätigung der anbietenden Organisation, Leistungsnachweise gemäss Praktikumskonzept) einzureichen.

ECTS: 6

Notes:

Vorgängig zur Modulbuchung ist eine schriftliche Vereinbarung einzureichen. Bitte kontaktieren Sie dazu die Studienfachberatung (studium.arch@iaka.uzh.ch).

Learning Outcome:

Die Studierenden beherrschen Methoden und praktische Anwendungen archäologischer Arbeit, wie sie an dem gewählten Praktikumsort zur beruflichen Praxis gehören. Die Studierenden sind mit den gängigen Arbeitsabläufen in mindestens einem der Bereiche Ausgrabung, Prospektion, Bauuntersuchung, Grabungsauswertung, Denkmalpflege oder Öffentlichkeitsarbeit der anbietenden Institution vertraut. Sie handeln eigenverantwortlich in den ihnen anvertrauten Aufgabenbereichen.

Module Economic and Behavioural Analysis of Contract Law

02SM90WMG10 / Course

Description:

General description:

Over the past five decades or so, economic analysis has become the leading interdisciplinary perspective in contract law theory. Based on simplifying assumptions about human motivation and decision-making, it has challenged long-held beliefs and produced fascinating new insights. Economists have never claimed that the postulates of economic rationality precisely depict reality—only that they provide a sufficiently accurate approximation to yield useful explanations, predictions, and policy recommendations.

More recently, a wealth of behavioral studies has demonstrated that deviations from the assumptions of economic rationality are both significant and systematic. Initially, mainstream economics sought to deny the validity and generality of these behavioral findings. But, as often happens when a theory fails to overcome new challenges, economic analysis gradually incorporated behavioral insights. This is especially true in the economic analysis of law, where scholars are relatively more concerned with influencing real-world behavior than with abstract modeling.

The course will introduce the basic tenets of the economic analysis of contract law and its central behavioral findings. It will apply economic tools and psychological insights to examine key issues in contract law, such as pre-contractual disclosure duties, default rules, regulation of the contracting process and transaction content, and remedies for breach of contract. No prior knowledge of economics or psychology is assumed.

ECTS: 3

Languages of Instruction:

english

Course Materials:

Tba

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Yesim M. Atamer

Requirements:

Prerequisites:

Basic knowledge in contract law

Prior Knowledge:

The course is suitable for students who have already taken a basic contract law course, whether they are in their first, second, or third degree studies.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated as necessary

Organisation:

Module Civil liability from a comparative perspective with a focus on artificial intelligence

02SM90WMG11 / Course

Description:

General description:

Der Kurs behandelt das Haftpflichtrecht in Lateinamerika im Allgemeinen und in Argentinien im Besonderen. Zunächst soll das System des Haftpflichtrechts erläutert werden (Funktionen, Bedingungen, Unterschied zwischen vertraglicher und deliktischer Haftung etc.). Hieran schliesst sich ein Vergleich mit Haftpflichtrechtsordnungen in Europa an, insbesondere in Frankreich, Deutschland und der Schweiz. Die allgemeinen Ausführungen werden ergänzt durch aktuelle Anwendungsbeispiele im Bereich der neuen Technologien, insbesondere auch der Künstlichen Intelligenz. So werden beispielsweise die Haftung von Intermediären im Internet, von Suchmaschinen und beim "phishing" thematisiert. Die zentrale Frage auf dem Gebiet der Künstlichen Intelligenz lautet: Wer haftet, wenn ein KI-System einen Schaden verursacht? Bisher setzte das Haftungsrecht immer menschliches Verhalten voraus. KI-Systeme agieren jedoch autonom. Kann man den KI-Systemen selbst eine Art Verantwortlichkeit zuschreiben, oder haftet der Hersteller oder der Betreiber des KI-Systems? Der Kurs wird diesen Fragen in rechtsvergleichender Perspektive nachgehen.

ECTS: 3

Learning Outcome:

Vertiefung des Haftpflichtrechts in rechtsvergleichender Perspektive und mit einem Fokus auf Haftungsfragen der neuen Technologien, insbesondere der Künstlichen Intelligenz

Target Groups:

Masterstudierende mit Interesse an einer Vertiefung des Haftpflichtrechts und an rechtsvergleichender Arbeit

Languages of Instruction:

spanisch

Course Materials:

Werden in der ersten Unterrichtsstunde bekanntgegeben.

Merkmale:

Responsible instructor:

Andreas Heinemann

Requirements:

Prerequisites:

Der Kurs findet in spanischer Sprache statt, so dass Spanischkenntnisse erforderlich sind (mindestens B1).

Prior Knowledge:

OR bzw. Haftpflichtrecht in der Schweiz

Assessment:

Mündlich oder schriftlich

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated as necessary

Organisation:

Module Von Populismus bis Well-being: Religion, Spiritualität und Medien in Zeiten gesellschaftlicher Brüche
06SM254p128 / Module

Description:

General description:

Die Seminare dienen der wissenschaftlichen Vertiefung unterschiedlicher Anwendungen in kommunikationswissenschaftlichen Kernbereichen. Sie zeichnen sich durch ein grosses Mass an Interaktivität aus und schaffen Optionen für ein lösungsorientiertes Lernen in kleineren Gruppen.

ECTS: 6

Notes:

Dieses Seminar ist richtig für Sie, wenn Sie:
sich für gesellschaftliche relevante Akteure, Potentiale und Herausforderungen interessieren
sich in Diskussionen engagieren
Gegenwärtige Entwicklungen erforschen wollen
Theorie und Praxis zusammenbringen wollen
Erfahrungen in Qualitative Methoden, wie Interviews und Inhaltsanalyse machen wollen (es sind Interviewerhebungen geplant)

Learning Outcome:

Die Studierenden vertiefen und erweitern ihre Anwendungs- und Vermittlungskompetenzen in unterschiedlichen Kernbereichen der Kommunikationswissenschaft bzw. der Medienforschung. Sie können den Forschungsstand eines Themas eigenständig recherchieren, aufarbeiten und mit Hilfe sozialwissenschaftlicher Theorien und Methoden bearbeiten. Sie wissen um die (Team)Arbeit in Forschungsprojekten zur Erstellung von Präsentationen in mündlicher und/oder schriftlicher Form.

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Responsible instructor: Frank Esser

Requirements:

Prerequisites: erfolgreich abgeschlossene SEP

Assessment: Portfolio

Medienjournal: 10%;
Poster mit Präsentation: 30%;
Fallstudie (Seminararbeit): 60%

Grading Scale: 1-6, Half Grades Given

Repeatability: Can't be repeated

Module Focus course Text Technology: Model Analysis and Interpretability

06SM523p004 / Module

Description:

General description:

This module focuses on core technologies and tasks in text technology, including text mining, machine translation, language modeling, and text analytics. The module introduces key methods used in these areas and discusses central challenges that arise when processing and analyzing large collections of textual data. Through a combination of theoretical input and practical exercises, students deepen their understanding of the techniques and considerations that shape modern text technology applications.

ECTS: 6

Learning Outcome:

Students can:

1. deepen their knowledge in selected areas of text technology.
2. explain and implement key methods used in text technology.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Rico Sennrich

Requirements:

Prerequisites:

Successfully completed module "Introduction to Language Technology" or equivalent knowledge.

Assessment:

Portfolio: 75% exam, 25% exercises

Written exam (pen-and-paper) on Thursday, 21.1.2027, 12:15-13:15 (60 minutes).

Module Introduction to Applied Economics (L+E)

03SM22BO0156 / Lecture with Practical Exercises

Description:

General description:

What can modern economic research tell us about current social challenges? This course provides an introduction to the different areas of applied micro- and macroeconomics. What are the key elements of economic theory and how do they apply to concrete areas such as labor market, health, education, public finance, environmental economics, development economics, monetary policy, economic cycles, etc.? And where does current empirical research stand on these issues?

Students gain a practical insight into the theoretical and empirical basic concepts of economics by means of concrete examples that show how these concepts flow into politics, society and personal decisions. The course is aimed for students taking economics as a minor as well as students from other disciplines who are interested in learning how economic concepts can help to better understand societal developments - and where their limits lie.

ECTS: 9

Notes:

This course is the new compulsory course for Minor Economics students from other faculties.

Learning Outcome:

Become familiar with economic thinking and apply it to social and economic issues.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Carmen Villa

Requirements:

Assessment:

100% final written exam, closed-book, 6.1.2027, 08.15-09.45 am (90 minutes).

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module ESG Reporting and Analysis (L)

03SM22MO0285 / Course

Description:

General description:

This is a semester-long course that offers an introduction to ESG reporting at the Master level.

ECTS: 3

Notes:

None.

Learning Outcome:

Students will develop an understanding of ESG reporting and learn how to analyze ESG disclosures and think about the economics of sustainability.

Target Groups:

Master students.

Languages of Instruction:

English.

Course Materials:

Course material will be provided on OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Thomas Rauter

Requirements:

Prerequisites:

None.

Prior Knowledge:

None.

Assessment:

The examination for this module will take place on site and will consist of one final written exam (pen and paper). The exam will take place on 13.01.2027 from 10:15 pm to 12:00 pm.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module PhD Course: Information Economics

03SMDOEC1282 / Course

Description:

General description:

Information economics is at the heart of microeconomic theory. We will review the last several years, including forthcoming papers, of top 5 publications related to the economics of information. Special emphasis will be given to the developments in persuasion/information design.

ECTS: 2

Notes:

Venue: ZUH-F-02

(Zürichbergstrasse 14)

Learning Outcome:

Candidates attending the course on a regular basis will be up to date regarding recent developments in the general area of micro-economic theory, and in the area of information economics in particular. This knowledge will allow candidates to assess what it means to publish in a top 5 journal in microeconomic theory. They will also have the basis for choosing a research topic in that area.

Target Groups:

2nd year Ph.D. students

Languages of Instruction:

English

Course Materials:

Electronic libraries (Google Scholar), Journal webpages (American Economic review, Econometrica, Journal of Political Economy, Review of Economic Studies, Quarterly Journal of Economics)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Christian Ewerhart

Requirements:

Prerequisites:

Microeconomics for Research Students II

Prior Knowledge:

Interest in microeconomic theory

Assessment:

Oral exam (open book, onsite, SOF-J-26 ca. 15 minutes), December 16, 16:15-18:00h

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module Computational Approaches to Stylistics and Pragmatics

06SM523p005 / Module

Description:

General description:

This module provides in-depth engagement with a specific topic in language technology. Students learn scientific working methods, including analyzing research literature, interpreting empirical results, and evaluating theoretical approaches. They prepare and deliver a scientific presentation and write a paper expanding on their topic.

ECTS: 6

Learning Outcome:

Students can:

1. gain insight into a specific area of language technology.
2. acquire methodological skills for scientific research.
3. present complex topics clearly.
4. write a scientific paper.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Gerold Schneider

Requirements:

Prerequisites:

- All compulsory modules must have been successfully completed.
- Basic programming skills in Python or R.
- Basic knowledge of linguistics.

Assessment:

Portfolio (75% written paper und 25% presentation)

Grading Scale:

Module tbd

06SM640p013 / Module

Description:

ECTS: 3

Learning Outcome:

Die Studierenden lernen die sprachliche wie auch materielle Erfassung von Objekten und erhalten Einblick in konservatorische Fragen der kunsthistorischen Praxis.

Merkmale:

Responsible instructor: Bärbel Küster

Requirements:

Assessment: Die Prüfungsleistung wird in Form eines Protokolls zu einer Übungseinheit erbracht (Aufgabenverteilung in der ersten Sitzung).

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Request period: from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Place allocation at the latest: Sa 29.08.2026 22:00

Waiting list progression period: from Sa 29.08.2026 22:00 to Do 10.09.2026 24:00

Cancellation period: from Sa 29.08.2026 22:00 to So 13.09.2026 24:00

Module Capstone: Climate Policy in the Swiss cantons: actor constellations and policy belief systems

06SM615p513 / Module

Description:

General description:

Das Modul fördert vertieftes Fachwissen in einem ausgewählten Forschungsfeld. Es vermittelt die Kompetenz, zu einem ausgewählten Thema Fragestellungen aus Sicht der Politikwissenschaft zu entwickeln und zu analysieren. Im Zentrum des Seminars stehen die politikwissenschaftliche und normative Analyse, das trennscharfe Analysieren der Begriffe in ihrer Anwendung auf empirische Studien und das Begründen politischer Sachverhalte. Die unterschiedlichen Themen werden theoretisch und empirisch vertieft.

ECTS: 12

Notes:

Bitte bewerben Sie sich über das Modulbuchungstool. Reichen Sie dazu Ihren Lebenslauf, den aktuellen Leistungsausweis (Transcript of Records), ein Motivationsschreiben (max. 1 Seite) sowie eine Schreibprobe (z.B. Bachelorarbeit) ein.

Learning Outcome:

Fachkompetenzen: Verortung von Argumenten und empirischen Studien in den relevanten wissenschaftlichen Debatten zu einem ausgewählten Thema; Methodenkompetenzen: wissenschaftliches Schreiben und Argumentieren; Verfassen eines schriftlichen Beitrags (Policy Paper, wissenschaftliche Abhandlung, etc.) Selbstkompetenzen: Definition eigener inhaltlicher Schwerpunkte, Selbsteinschätzung, Planungsfähigkeit.

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Responsible instructor: Simon Bornschieer

Requirements:

Assessment:

Portfolio

60% Schlussbericht, 20% Präsentationen und 20% aktive Mitarbeit

Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden.

Please note: All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed.

Module Academic Writing

06SM360p135 / Module

Description:

General description:

Die schriftliche Arbeit ist der wichtigste Leistungsnachweis des Germanistikstudiums. Thematische Seminare bieten zwar Hilfestellungen.

Dennoch setzen sie Schreibkompetenz in der Regel eher voraus, als dass sie sie schulen. In diesem Seminar haben wir die Zeit, uns von Grund auf theoretisch und praktisch mit dem wissenschaftlichen Schreiben zu beschäftigen. Anhand von literarischen Texten (u. a. Musil), schreibdidaktischer Forschung und germanistischen Vorbildern vermittelt das Seminar das klassische Handwerk: etwa die systematische Ideenfindung, die optimale Planung der Arbeitsphasen, den logischen Aufbau von Forschungsvorhaben, die Absatzgestaltung, den fruchtbaren Umgang mit Zitaten oder einen guten Schreibstil. Das Zentrum des Seminars bildet dabei die praktische Erfahrung am Schreibtisch. Um Arbeitsschritte und -techniken zu reflektieren, entwerfen und verfassen wir kleinere Forschungsvorhaben, die wir gemeinsam diskutieren und weiterentwickeln. Wissenschaftliches Schreiben ist ein persönlicher, geselliger und kreativer Prozess. Und beinhaltet folglich weitaus mehr als ein bloßes;szlig;er - womöglich KI-frasierter - Leistungsnachweis.

ECTS: 3

Learning Outcome:

Die Studierenden sind sowohl mit theoretischen Texten wie auch mit praktischen Fragen des wissenschaftlichen Schreibens vertraut. Sie wissen um die einzelnen Arbeitsschritte wissenschaftlichen Schreibens und sind sich der Schwierigkeiten, Voraussetzungen und Anforderungen des Schreibprozesses bewusst. Sie sind in der Lage, ihr Schreiben kritisch zu evaluieren und zu hinterfragen.

Module #ChallengeAccepted? Why Are Social Media Challenges So Appealing – and What This Means for Prevention Eff
06SM254p505 / Module

Description:

General description:

Warum nehmen so viele Menschen an Social Media Challenges teil, selbst wenn die damit verbundenen Risiken offensichtlich sind? Warum kippt ein unterhaltsamer Digitaltrend plötzlich in eine gesellschaftliche Moral Panic? Und sind Kinder und Jugendliche tatsächlich die einzige relevante Zielgruppe für dieses Phänomen? In der Vorlesung beleuchten wir Social Media Challenges als prägnanten Problemfall der digitalen Gesundheitskommunikation. An ihnen zeigen wir exemplarisch, wie gesundheitsrelevante Risiken heute im Spannungsfeld von Plattform-Algorithmen, Peer-Group-Dynamiken und medialer Berichterstattung entstehen, bewertet und moderiert werden.

Im Zentrum der Vorlesung steht nicht nur die Gefährlichkeit einzelner Challenges, sondern vor allem die grundlegende Frage, wie Präventionsarbeit unter den Bedingungen unübersichtlicher und entgrenzter digitaler Umgebungen noch gelingen kann. Zudem werden wir kritisch hinterfragen, wann Berichterstattung, öffentliche Warnungen oder Online-Diskurse unfreiwillig selbst zur Sichtbarkeit problematischer Inhalte beitragen und wie sich riskante Digitaltrends kommunikativ eindämmen lassen, ohne in Alarmismus oder Verbotslogiken zu verfallen. Im Fokus der Vorlesung stehen Fragen wie:

- Warum nehmen Kinder, Jugendliche und junge Erwachsene an Social Media Challenges teil?
- Wie wirken soziale Anerkennung, Peer-Druck, Unterhaltung, Identitätsarbeit und Nachahmung bei der Teilnahme an gesundheitsgefährdenden Challenges zusammen?
- Durch welche Mechanismen werden gesundheitsrelevante Risiken auf digitalen Plattformen sichtbar, verstärkt oder auch begrenzt?
- Welche Rolle spielen Schulunterricht, Journalismus, Familie und die digitalen Plattformen in der Prävention?
- Wann hilft Risikokommunikation und wann produziert sie zusätzliche Aufmerksamkeit für problematische Inhalte?
- Wie können positive oder gesundheitsförderliche Challenges gezielt als Kommunikationsform genutzt und in die Präventionsarbeit integriert werden?

ECTS: 6

Module Machine Learning in Economics (L)

03SM22MO0287 / Course

Description:

General description:

This course provides students with background and examples on how machine learning techniques are used in economics and policy analysis. This course will feature lectures from the professor as well as guest lectures from experts in the industry.

ECTS: 3

Learning Outcome:

Students understand the basic machine learning pipeline and how this is applied in a variety of problems facing economists

Target Groups:

MA students who have completed intermediate statistics as well as basic economics courses

Course Materials:

Various research papers distributed via OLAT

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Damian Kozbur

Requirements:

Assessment:

Assignments 50% and Final Project 50%

Grading Scale:

Module Cognitive Foundations of Economics (L)

03SM22MO0288 / Course

Description:

General description:

Cognitive Foundations of Economics studies how the basic architecture of human thinking — how we pay attention, remember, simplify, and compare — generates the behavioral patterns that drive markets, policy, and everyday decisions. A key insight of this course is that many seemingly unrelated puzzles across economics share a surprisingly small number of cognitive roots.

We cover three big themes:

1. How noisy mental computations lead to systematic biases in economic choices — and when people over- vs. underreact to new information.
2. How what comes to mind — through attention, memory, and mental models — quietly shapes what we believe and what we choose.
3. How people cope with complexity by categorizing, drawing analogies, and simplifying in ways that are often smart but sometimes spectacularly wrong.

Applications span consumer behavior, financial markets, and public policy — from how firms exploit attention biases in pricing to why diversification failures keep showing up in household portfolios.

While this is a lecture course, it is designed to be highly interactive. Each week, we engage with key ideas and research findings together through discussion, working through the reasoning rather than just absorbing results. No prior background in psychology or neuroscience is required — just curiosity about why people behave the way they do.

ECTS: 3

Notes:

The course takes place at BLU003, Blümlisalpstrasse 10.

Learning Outcome:

Students will develop a deep understanding of how cognitive constraints shape economic decision-making. Specifically, they will learn to (1) identify the key cognitive mechanisms — such as noisy mental computations, selective attention, memory-based reasoning, and simplification strategies — that drive departures from standard economic models, (2) critically read and evaluate cutting-edge research papers in behavioral and cognitive economics, (3) write a professional referee report assessing the strengths and weaknesses of a research paper, and (4) develop and present their own original research proposal on a topic in cognitive economics.

Target Groups:

Master students in Economics, Finance, Neuroeconomics, and related programs.

Course Materials:

All readings will be research articles provided on OLAT. There is no required textbook.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Thomas Graeber

Requirements:

Prior Knowledge:

Basic microeconomics and some familiarity with probability/statistics are helpful but not strictly required.

Assessment:

Referee Report and Presentation (30%)

Each student writes one referee report on an assigned research paper and presents it in class. The referee report should summarize the paper, evaluate its contribution, and offer constructive suggestions. This in-class presentation will be around 25 minutes.

Research Proposal (30%)

Students write a short research proposal (approx. 5–8 pages) on a topic related to the themes of the course. The proposal should formulate a clear research question, explain why it matters, and describe the proposed methodology. Teamwork (two students per group) is encouraged. Due at the end of the semester.

Active Participation (40%)

Regular attendance and active engagement in class discussions are essential.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Poverty and Social Policy in Welfare States: Comparative and Contemporary Perspectives

06SM615p520 / Module

Description:

General description:

Das Modul fördert vertieftes Fachwissen in einem ausgewählten Forschungsfeld. Es vermittelt die Kompetenz, zu einem ausgewählten Thema Fragestellungen aus Sicht der Politikwissenschaft zu entwickeln und zu analysieren. Im Zentrum des Seminars stehen die politikwissenschaftliche und normative Analyse, das trennscharfe Analysieren der Begriffe in ihrer Anwendung auf empirische Studien und das Begründen politischer Sachverhalte. Die unterschiedlichen Themen werden theoretisch und empirisch vertieft.

ECTS: 6

Learning Outcome:

Fachkompetenzen: Verortung von Argumenten und empirischen Studien in den relevanten wissenschaftlichen Debatten zu einem ausgewählten Thema; Methodenkompetenzen: wissenschaftliches Schreiben und Argumentieren; Verfassen eines schriftlichen Beitrags (Policy Paper, wissenschaftliche Abhandlung, etc.)
Selbstkompetenzen: Definition eigener inhaltlicher Schwerpunkte, Selbsteinschätzung, Planungsfähigkeit.

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Responsible instructor: Silja Häusermann

Requirements:

Assessment: Portfolio

Der Leistungsnachweis erfolgt in Form eines Portfolios mit mehreren mündlichen und schriftlichen Teilleistungen, die im Verlauf des Semesters erbracht werden. Er umfasst zwei Reflexionen zur Pflichtlektüre (SU1 15 % und SU2 15 %), die Moderation einer Sitzung (RE1 10 %), eine kurze schriftliche Policy-Analyse (SA 40 %) sowie eine Posterpräsentation (RE2 20 %). Die Policy-Analyse wird im Rahmen der Posterpräsentation aufbereitet und diskutiert.

Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden.

Please note: All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed.

Grading Scale: 1-6, Half Grades Given

Module Populism in Digital and Traditional Media

06SM240p028 / Module

Description:

General description:

Der Populismus spielt heute eine bedeutende Rolle in der Politik. Um den Erfolg vor allem rechtspopulistischer Parteien zu erklären, arbeitet die Forschung seit Jahren an der Erklärung des Phänomens. Zum einen werden sozialstrukturelle Faktoren (z. B. Immigration) zur Erklärung des Phänomens herangezogen, zum anderen werden politische Faktoren (z. B. das Wahlsystem) betont. Ein neuer Zweig der Populismusforschung hat die Qualität der massenmedialen Berichterstattung als wesentlichen Faktor für den Erfolg populistischer Akteure ausgemacht: Das Mediensystem hat sich gewandelt und neue Selektions- und Interpretationslogiken ausgebildet (vor allem durch die Entwicklung von Social Media), die den populistischen Parteien erhöhte Resonanzchancen geben und damit ihren Wahlerfolg begünstigen. Dieser neue Zweig der Populismusforschung und die diesbezügliche Bedeutung von digitalen Medien wird im Mittelpunkt der Vorlesung stehen.

ECTS: 6

Learning Outcome:

Den Studierenden wird der Forschungsstand in Bezug sowohl auf die klassische Populismusforschung als auch schwerpunktmässig in Bezug auf die jüngere Forschung zum Medienpopulismus vermittelt. Die Studierenden entwickeln Reflexionskompetenz, die sie in die Lage versetzt, den komplexen Zusammenhang zwischen Medienqualität, digitalen Medien und politischem Populismus zu analysieren und einzuordnen.

Module Media Education in the Age of Generative Artificial Intelligence

06SM222MZKI / Module

Description:

General description:

Generative Künstliche Intelligenz verändert grundlegend, wie Medien produziert, verbreitet und wahrgenommen werden - und stellt damit die Medienbildung vor neue Herausforderungen.

In diesem Kurs setzen sich angehende Lehrpersonen der Sekundarstufe II kritisch mit den medienkulturellen Auswirkungen generativer KI auseinander. Ein besonderer Schwerpunkt liegt auf der Frage, wie Schüler:innen für die potenziellen Risiken und Manipulationsmöglichkeiten KI-generierter Inhalte sensibilisiert werden können.

Die Teilnehmenden stärken ihre Kreativität, ethische Reflexionsfähigkeit und kritische Medienkompetenz. Auf Grundlage theoretischer Impulse und praxisnaher Übungen entwickeln sie Unterrichtsideen und Lernsettings, die Schüler:innen dazu befähigen, sich sicher, reflektiert und verantwortungsvoll in einer von KI geprägten Medienwelt zu bewegen.

Module Theories of Sexuality: Pleasure, Shame, and the Politics of Desire

06SM245p522 / Module

Description:

General description:

Lektürekurse zu zentralen Themen oder Theorien der Gender Studies sowie zu Theorien, welche für die Gender Studies grundlegend sind.

ECTS: 6

Learning Outcome:

Die Studierenden verfügen über die Fähigkeit, komplexe theoretische Texte zu erschliessen, zu analysieren und zu diskutieren.

Languages of Instruction:

Deutsch oder Englisch - siehe Lehrveranstaltung(en)

Merkmale:

Responsible instructor: Bettina Dennerlein

Requirements:

Prerequisites: Dieses Modul steht nur Master-Studierenden offen. Es darf nicht von Bachelor-Studierenden als vorgezogenes Mastermodul gebucht werden.

Assessment: Portfolio (drei Lektüreprotokolle 1/3; mündlicher Input 1/3; Essay 1/3)

Die drei Lektüreprotokolle verteilen sich über das Semester.
Beim mündlichen Input wird ein Thesenpapier vorgestellt, ggf. mit visuellem Anteil.
Der Essay dient der abschliessenden Reflexion.

Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can't be repeated

Module Summer School Japanese

06SM290p027 / Module

Description:

General description:

Einwöchiger Japanisch-Intensivkurs vom 03. bis 07.08.2026, täglich von 09:00 bis 13:00 Uhr. Im Zentrum der Veranstaltung stehen die Aktivierung und Vertiefung des Hörverstehens und der mündlichen Ausdrucksfähigkeit im modernen Japanischen.

ECTS: 3

Notes:

Studierende, die das Modul belegen möchten, melden sich bitte bis zum 07. Juni 2026 bei Guido Gefter (guido.gefter@aoi.uzh.ch) an. Bei grosser Nachfrage ist eine Beschränkung der Teilnehmerzahl möglich. Die Anmeldungen werden in diesem Fall in der Reihenfolge ihres Einganges berücksichtigt. Es empfiehlt sich daher, sich bei Interesse rasch anzumelden

Learning Outcome:

Produktive ("aktive") Beherrschung der in den Modulen Modernes Japanisch 1-3 vermittelten grundlegenden Ausdrucksmittel (Grammatik, Vokabular) des modernen Japanischen.

Languages of Instruction:

Japanisch

Merkmale:

Responsible instructor: Guido Gefter

Requirements:

Prerequisites: Das Modul richtet sich ausschliesslich an Studierende der Japanologie, welche die Module Modernes Japanisch 1 und 2 bestanden und noch keinen längeren Japanaufenthalt absolviert haben.

Module Arabic Literature of the 20th Century

06SM307p010 / Module

Description:

General description:

In diesem Modul wird der klassische Roman "al-Ayyām" (Band 1, 1926) von Ṭaha Ḥusayn mithilfe verschiedener Lesemethoden analysiert. Dabei wird seine Bedeutung innerhalb der modernen arabischen Literaturgeschichte beleuchtet und Beispiele aus zeitgenössischen Texten werden untersucht.

Module Excursion Biennale Venice

06SM640p014 / Module

Description:

ECTS: 6

Notes:

-- Bewerbungen für die Teilnahme müssen bis zum 15. Mai 2026 eingehen! --

Bitte mit Angabe der Matrikelnummer, BA oder MA-Studiengang, Angabe des Hauptfachs/Nebenfachs. Bitte geben Sie ggf. schon gewünschtes Referatsthema aus den Rubriken an: Länderpavillon/Künstlerbeitrag/Hauptausstellung/Geschichte der Biennale.

Bewerbung an die Hilfsassistentin am Lehrstuhl Moderne und zeitgenössische Kunst: leonie.meierhofer@uzh.ch

Learning Outcome:

Die Studierenden erlernen Techniken der Beschreibung und Analyse von Originalen. Sie reflektieren den räumlichen und kulturellen Kontext, in den die Werke eingebunden sind.

Module PHY 525 Quantum Physics for Non-Physicists

07SMPHY525 / Lecture with Practical Exercises

Description:

General description:

This is an introduction to the physics of quantum mechanics following an information-theoretical approach. We start from the basic postulates, study the behaviour of quantum systems from a single spin to entangled particles in space, and connect the learnings to groundbreaking experiments from the past and the present. This course is well-suited for students with little background in physics.

Quantum formalism, from qubits to particles in space; Time and dynamics for quantum systems; Problems in 1D; Uncertainty and open systems; Spin; Problems in 3D; Non-locality and foundational aspects of quantum theory

ECTS: 6

Learning Outcome:

This course teaches the basics of quantum physics, and complements courses in quantum computation and information theory. Students are equipped with tools to tackle complex quantum mechanical problems and foundational questions. The course covers approximately the same content as QM1, but from an information-driven perspective.

Languages of Instruction:

English

Course Materials:

Quantum Processes Systems, and Information, by Benjamin Schumacher and Michael Westmoreland, available at

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Titus Mangham-Neupert

Requirements:

Prior Knowledge:

This course is aimed at non-physicists, and in particular at students with a background in computer science, mathematics or engineering. Basic linear algebra and calculus knowledge is required (equivalent to first-year courses). Physics knowledge is not required. Physicists and students from a different background than outlined above are welcome at their own risk.

Note that while we follow an information-theoretical approach, this is not a course on quantum information theory or quantum computing. It therefore complements those courses offered at ETH Zurich.

This course can be taken in parallel to Quantum Information Processing I & II.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Module AST 111 Astrophysik I

07SMAS111 / Lecture with Practical Exercises

Description:

General description:

The class is an introductory course in cosmology which does not require previous knowledge of General Relativity, rather introduces all the key concepts of modern cosmology using newtonian physics. It covers basic observations of the extragalactic cosmos, the cosmological principle, the notions of geometry and dynamics of an expanding Universe (including redshift), newtonian derivation of the Friedmann equations, large scale structure, the cosmic distance ladder, the cosmological constant, the Hot Big Bang model (especially recombination and nucleosynthesis), the cosmic microwave background, dark matter in the current cosmological paradigm, and basic notions of cosmic structure formation starting from linear perturbation theory in the newtonian approximation.

ECTS: 8

Notes:

Summary slides will be provided, derivations and diagrams on blackboard during class

Learning Outcome:

Essential understanding of the extragalactic Universe and modern cosmology.

Target Groups:

Bachelor students (Bsc Astrophysics and Cosmology, Minor A&A in Bsc Physics)

Languages of Instruction:

English

Course Materials:

“Introduction to Cosmology” (Barbara Ryden) and “An Introduction to Modern Cosmology” (Andrew Liddle)

Module Reinforcement Learning for Language Modeling (Master's seminar)

06SM523p501 / Module

Description:

General description:

This module provides in-depth engagement with a specific topic in language technology. Students learn scientific working methods, including analyzing research literature, interpreting empirical results, and evaluating theoretical approaches. They prepare and deliver a scientific presentation and write a paper expanding on their topic.

ECTS: 6

Learning Outcome:

Students can:

1. gain insight into a specific area of language technology.
2. acquire methodological skills for scientific research.
3. present complex topics clearly.
4. write a scientific paper.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Sarah Ebling

Requirements:

Prerequisites:

- This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module.
- This is an advanced Master's seminar, knowledge in machine learning, natural language processing and ideally reinforcement learning are required.
- Physical attendance is required.

Assessment:

Portfolio (60% written paper und 40% presentation)

Deadline for submitting the written paper: December 20th 2026

Grading Scale:

Module BIO 411 BioEntrepreneurship and Innovation Program

07SMBIO411 / Block Course

Description:

General description:

The BioEntrepreneurship & Innovation program equips life science students with the mindset and practical skills needed to turn scientific discoveries into real-world healthcare innovations. Through workshops led by industry experts and entrepreneurs, case studies and teamwork, students gain hands-on exposure to the BioTech, MedTech startups, and Pharma ecosystem.

ECTS: 6

Notes:

REGISTRATION FOR BLOCKCOURSES HERE <https://www.mybioportal.uzh.ch>

Learning Outcome:

At the end of the course students are able to: develop a startup idea from scratch, identify unmet medical needs, develop value-driven solutions, communicate ideas effectively, navigate regulatory and IP landscapes, understand business models and funding strategies, and work collaboratively in interdisciplinary teams to drive innovation from concept to market. Learn more at <https://www.bep.uzh.ch>

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Simon Hoerstrup

Requirements:

Prerequisites:

Basic studies completed

Assessment:

50% Written team report on startup project (homework to be handed in the last week).
50 % Oral Team Presentation of startup project (taking place on the last afternoon of the block course).

Grading Scale:

Module Anatomy of a Coup d'État: the politics of autocratic power

06SM615p011 / Module

Description:

General description:

Das Modul dient dazu, erworbenes Fachwissen und die damit einhergehenden analytischen Fähigkeiten auf ein konkretes Politikthema anzuwenden und kritisch zu reflektieren

ECTS: 6

Learning Outcome:

Transfer theoretischer und methodischer Konzepte auf politische Fragen;
Reflektion & Einordnen & Bewertung von Faktenwissen in Bezug auf eine konkrete Themenstellung

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Responsible instructor: Hanno Degner

Requirements:

Prerequisites: Grundlegende Ansätze und Theorien der Politikwissenschaft (gemäss Modulgruppe "Einführung in die Politikwissenschaft")

Assessment: Portfolio

oral presentation (35%) / written term paper (65%)

Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden. Please note: All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed.

Module Computational cognitive modeling of language processing (Master's seminar)

06SM523p502 / Module

Description:

General description:

This module provides in-depth engagement with a specific topic in language technology. Students learn scientific working methods, including analyzing research literature, interpreting empirical results, and evaluating theoretical approaches. They prepare and deliver a scientific presentation and write a paper expanding on their topic.

ECTS: 6

Learning Outcome:

Students can:

1. gain insight into a specific area of language technology.
2. acquire methodological skills for scientific research.
3. present complex topics clearly.
4. write a scientific paper."

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Lena Ann Jäger

Requirements:

Prerequisites:

- This module is open only to Master's students. It may not be booked by Bachelor's students as a pre-Master's module.
- Python programming skills equivalent to 12 ECTS credits

Assessment:

Portfolio (70% written paper und 30% presentation)

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can't be repeated

Organisation:

Offer pattern:

1 Semester (One-Time)

Request period:

from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Module Excursion

06SM523p006 / Module

Description:

General description:

Excursions, similar to practical training off-site, offer the opportunity to gain insight into the daily work of computational linguists. In contrast to these, however, the emphasis is not on concrete work in a company, but on the ability to recognize and assess the problems and methods of a field of application of computational linguistics in direct contact as accurately as possible. This provides insights into problem areas, allows one to measure one's own specific interests and, if necessary, to fix future work areas and employers. The students prepare for the excursion by effectively researching and studying relevant literature. This module can be booked to credit the participation in excursions.

ECTS: 3

Learning Outcome:

The students (1) gain insight into language technology companies and university or non-university research departments (2) get to know the theory and practice of computational linguistics in a concrete example (3) find or develop one's own specific interests (4) gain the ability to get insight into practical problems and methods through interviews with practitioners (5) get in contact with potential employers

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Rico Sennrich

Requirements:

Prerequisites:

This module can not be booked by the students themselves, the booking has to be authorized by the module coordinator. In order to credit the participation in an excursion, it is essential to contact the module coordinator before the start of the excursion.

Assessment:

Those students who want to earn 3 ECTS credits for the excursion will have to fulfill the appropriate workload requirements. This might entail some or all of the following tasks: reading publications of the host institutions, conducting a short interview with some of the researchers at one of the host institutions, fulfilling a theoretical or practical technical task/programming project (self-selected or offered by a host institution), writing a short report about the visit.

Grading Scale:

Pass/Fail

Repeatability:

Can't be repeated

Organisation:

Offer pattern:

1 Semester (One-Time)

Module Ethics of AI for Language and Speech

06SM523p503 / Module

Description:

General description:

This course addresses ethical aspects related to language and speech AI technologies, such as large language models (e.g., ChatGPT), speech synthesis (e.g., deepfakes), or speech recognition. It will cover ethical use, particularly in an academic context, as well as the social, political, media, and environmental impacts of language AI.

ECTS: 3

Learning Outcome:

Students can:

1. identify ethical aspects of language and speech AI
2. determine mitigation strategies for a subset of these aspects

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Module Anthropology of Disaster / Anthropocene and Natural Disasters

06SM722p003 / Module

Description:

General description:

This module dives into the field of Anthropology of Disaster, an area that examines how societies experience and respond to catastrophic events. Moving beyond a narrow understanding of "natural" disasters, the course situates crisis within the broader context of the anthropocene: a geological epoch in which human activity has become a dominant force shaping the earth's systems. Disasters and their consequences (such as earthquakes, hurricanes, pandemics, or nuclear accidents) are deeply entangled with historical processes of environmental transformation, political decision-making, economic inequality and technological development.

The module interrogates how vulnerability to disaster is unevenly distributed, often reflecting colonial legacies, global inequalities, and different access to resources and protection. It looks at the varied human experiences of disaster, from institutional responses to everyday strategies through which individuals and communities prepare for, endure, adapt, and rebuild.

Students will analyse how disasters transcend borders also through global humanitarian interventions and international policy frameworks. In addition, it considers how disasters contribute to the processes of displacement and forms of mobility, and how they are linked to broader questions of human rights, governance, and global inequality.

Through this lens, the course connects the study of disaster to wider debates on sustainability, resilience, justice and climate change, asking how communities around the world navigate increasingly uncertain and precarious futures.

ECTS: 6

Learning Outcome:

By the end of the module, students will be able to:

- Demonstrate an advanced understanding of anthropological approaches to the thematic field of anthropology of disaster, relating to development, sustainability, and social justice.
- Critically assess the existing debates on these topics, reflect on different positions and arguments, identify open questions, and synthesize concepts and debates from course readings.
- Interrogate the role of gender, intersectionality, and power relations in shaping the trajectories, the strategies and impacts of (natural) disasters
- Present the main argument around disaster anthropology and critically evaluate differing perspectives
- Communicate research and reflection in creative and dialogical forms, using the classroom as a safe environment for respectful exchange, and exploring artistic or media-based formats (e.g. blogs, podcasts, photo-essays, short films, zines, or visual storytelling) to present research and critical reflections

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Michelle von Dach

Requirements:

Assessment:

Portfolio: - active participation in the seminar 20% - in class presentation 20% - creative multimedia assignment 10% - 3 reflection/protocol papers 30% - final essay 20%.

All elements of the portfolio must be completed. If an element is not completed,

the entire portfolio is considered not completed and the module is therefore failed.

Module Digital Tools for Data Analysis and Visualization in Linguistics

06SMG61p106 / Module

Description:

General description:

This course introduces doctoral students to digital tools for analyzing and visualizing linguistic data, with a hands-on approach and examples drawn primarily from Italo-Romance linguistics.

The course is divided into two main blocks.

The first block covers Geographic Information Systems (GIS). Participants will (a) learn to use QGIS to create publication-ready maps, (b) perform spatial autocorrelation tests, and (c) discover new methods in the field of geolinguistics (Bayesian clustering, travel-time as a predictor of linguistic distance, etc.).

The second block introduces R and RStudio for statistical analysis and data visualization. Topics include research design for quantitative studies (translation tasks, fieldwork, crowdsourcing, Likert scales), repurposing existing data such as historical corpora for statistical testing, and selecting appropriate plot types to present results effectively. The course is designed for doctoral students with a more traditional humanities background (e.g., Dialectology, Historical Linguistics) who wish to develop practical quantitative skills in response to the growing emphasis on empirical methods in linguistic research.

Module Persuasive and Manipulative Language Strategies

06SMG61p107 / Module

Description:

General description:

This course investigates the linguistic realization of persuasion and manipulation from an empirical, corpus-based and experimental perspective. While cross-linguistically oriented, its primary focus is on Romance and Germanic languages. The course sets out by addressing the conceptual and terminological challenges involved in defining persuasion, manipulation, and propaganda, drawing on theoretical frameworks from (evolutionary) linguistics, psychology, and social sciences. The course then examines a range of public communicative arenas in which persuasive and manipulative strategies operate, with particular attention to political discourse and clickbait practices in digital media. From a linguistic perspective, the course focuses on implicit meaning, specifically implicatures, presuppositions, and vagueness, and their discourse-pragmatic functions across different text types. Finally, it explores similarities and differences between human-produced and AI-driven propaganda, with special reference to the use of Large Language Models.

Module Between Grave Robbery and Science – The History of the Discovery of Important Egyptian Artifacts 06SM322p006 / Module

Description:

General description:

Die Rekonstruktion der altägyptischen Kultur beruht auf fundamentalen Entdeckungen, die jeweils spezifische Einblicke in die pharaonische Zivilisation und die Glaubensvorstellungen offenbart haben. In dieser Übung sollen die inhaltliche Tragweite der bedeutendsten Funde und deren Beitrag zu unserem heutigen Geschichtsbild vermittelt werden. Im Fokus steht dabei die Transformation von rein materiellen Objekten zu Informationsträgern über Religion, Politik und Gesellschaft. Beispielsweise bot die Entdeckung des Grabes von Tutanchamun weit mehr als materiellen Reichtum; sie lieferte essenzielle Erkenntnisse über das Bestattungsritual und die sakrale Rolle des Königs; und die Funde aus der Arbeitersiedlung Deir el-Medineh machen die soziale Realität, den Glauben und die ökonomischen Bedingungen der Bevölkerung greifbar. Diese und weitere Fundkomplexe prägten das Verständnis Ägyptens als einer vielschichtigen Gesellschaft

ECTS: 3

Learning Outcome:

Vertiefte Kenntnisse zu wissenschaftlichen Zugangsweisen allgemein und zum jeweiligen Thema im Besonderen; Vertrautheit mit fachlichen Hilfsmitteln und Referenzwerken; fremde Forschungsergebnisse publikumsgerecht präsentieren; Fähigkeit zur Teilnahme an wissenschaftlichen Diskussionen; selbständige bibliographische Recherche zu bestimmten Fachthemen; selbständige Analyse wissenschaftlicher Sachverhalte und kritische Hinterfragung von Forschungsmeinungen.

Module Virtues and Vices (Lecture Series Middle Ages)

06SM620p001 / Module

Description:

General description:

Dozierende unterschiedlicher mediävistischer Fächer halten Vorträge zu einem definierten mediävistischen Themenbereich, der in seiner interdisziplinären Breite ausgeleuchtet wird.

ECTS: 3

Learning Outcome:

Die Studierenden erlangen Kenntnis eines spezifisch mediävistischen Themas und lernen, die Herangehensweise der unterschiedlichen mediävistischen Disziplinen an eine bestimmte Thematik zu unterscheiden.

Languages of Instruction:

Module Lecture in Interdisciplinary Archaeological Sciences

06SM683p003 / Module

Description:

ECTS: 3

Learning Outcome:

Die Studierenden gewinnen einen vertieften und kritischen Einblick in ein ausgewähltes interdisziplinäres archäologisches Thema mit natur- oder sozialwissenschaftlichen bzw. komparativen und ethnoarchäologischen Implikationen. Sie kennen sich in den Quellsituationen und Befunden aus, die für dieses Thema relevant sind. Sie haben einen Überblick über den das ausgewählte Gebiet betreffenden aktuellen Forschungsstand und die entsprechende Forschungsliteratur.

Module Summer School

06SM523p007 / Module

Description:

General description:

Summer schools are designed to give students an in-depth insight into specific subject areas. This way, they consolidate what they have learned so far during their studies, expand their knowledge of core theories and understand new approaches in a compact way. They become aware of current trends, they exchange experiences and assessments with students from other universities, and thus get the opportunity to get to know the international level and at the same time establish relationships that can be helpful beyond their studies. This module can be booked to credit the attendance at summer schools that are related to Natural Language Processing. This module can be booked with 3 or 6 ECTS points. The amount of points will be decided in consultation with the module coordinator.

ECTS: 3

Notes:

Students must independently find a suitable summer school relevant to their degree program. Before the summer school begins, they must send a request to the module coordinator, including details on the institution, title, dates, workload, content, and relevance.

Note: No financial support from the Department is foreseen.

After completing the summer school, students must send an email to the module coordinator with the following details:

- (1) full name,
- (2) matriculation number,
- (3) degree program,
- (4) module number,
- (5) number of ECTS credits to be awarded (typically 3 or 6 ECTS),
- (6) official confirmation of participation (PDF),
- (7) a short reflection (500-1000 words, approx. 1-2 pages) on learning outcomes and relevance.

The module will then be booked and marked as passed by the module coordinator for the semester in which the summer school took place. Self-enrollment via the booking tool is not possible.

Learning Outcome:

Learning objectives are (1) repeat and consolidate what you have learned (2) acquire new content / topic areas in a compact form (3) get to know the latest trends (4) exchange of experiences with students from other universities (5) networking at international level

Merkmale:

Responsible instructor: Simon Clematide

Requirements:

Prerequisites: This module can not be booked by the students themselves, the booking has to be authorized by the module coordinator. In order to credit the attendance at a summer school, it is essential to submit a request to the module coordinator before the start of the summer school.

Assessment: Evidence of study achievements during Summer School

Grading Scale: Pass/Fail
Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Request period: not bookable

Place allocation at the latest:

Waiting list progression period: not bookable

Cancellation period: not cancelable

Module Language Immersion Albanian: Reading, Grammar, Culture

06SM480p013 / Module

Description:

General description:

Diese Lehrveranstaltung dient der Vertiefung der albanischen Sprachkompetenz mit einem besonderen Fokus auf literarische Lektüre. Im Zentrum steht die gemeinsame Analyse ausgewählter Werke zeitgenössischer Autor:innen aus dem albanischsprachigen Raum sowie der Diaspora. Die Lektüre umfasst u. a. Texte von Pajtim Statovci, Jehona Kicaj, Gazmend Kapllani und Besa Myftiu.

Inhaltlich werden zentrale literarische Themen und Strömungen der Gegenwart behandelt, insbesondere Migration, Mehrsprachigkeit, Identität und queere Perspektiven. Die Texte ermöglichen einen Einblick in unterschiedliche gesellschaftliche Erfahrungen und ästhetische Ausdrucksformen und eröffnen zugleich einen Zugang zu aktuellen Diskursen innerhalb und ausserhalb des albanischsprachigen Raums.

Anhand der Werke werden sprachliche Strukturen, grammatische Phänomene sowie stilistische und kulturelle Aspekte erarbeitet. Die Veranstaltung verbindet Lektüre mit gezielter Grammatikvertiefung und fördert zugleich das Verständnis für unterschiedliche Varietäten und kulturelle Kontexte des Albanischen. Die Studierenden erhalten zu Beginn des Semesters eine Liste der zu behandelnden Werke.

ECTS: 3

Notes:

Der Kurs richtet sich sowohl an Herkunftssprecher:innen (Heritage Speaker) des Albanischen als auch an Studierende mit Grundkenntnissen der Sprache. Unterschiedliche sprachliche Ausgangsniveaus werden im Unterricht berücksichtigt und gezielt eingebunden.

Learning Outcome:

Die Studierenden

- vertiefen ihre Lesekompetenz im Albanischen anhand literarischer Texte unterschiedlicher Schwierigkeitsgrade
- analysieren grammatische Strukturen im Kontext authentischer Texte
- erweitern ihren Wortschatz und ihr stilistisches Ausdrucksvermögen
- entwickeln ein Verständnis für kulturelle, gesellschaftliche und sprachliche Vielfalt im albanischsprachigen Raum
- setzen sich kritisch mit Themen wie Migration, Identität und queeren Perspektiven auseinander
- sind in der Lage, literarische Texte analytisch zu diskutieren und einzuordnen

Languages of Instruction:

Deutsch, Albanisch, Englisch

Merkmale:

Target Group: Open to School Students

Responsible instructor:

Ledio Hala

Requirements:

Prerequisites:

bestandenes Modul "Grundlagen Albanisch 2" oder entsprechende Vorkenntnisse (mind. A1.2)

Assessment:

Portfolio (Schriftliche Abschlussarbeit (Essay), mündliche und schriftliche Übungen)

Der Leistungsnachweis besteht aus folgenden Bestandteilen:

- mündliche Übungen in Form von aktiver Teilnahme an Diskussionen und

schriftliche Übungen im Unterricht

- schriftliche Abschlussarbeit (Essay)

Bitte beachten: Das Modul wird als <bestanden> bewertet, wenn alle Elemente des Portfolios <bestanden> sind.

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Module Summer School

06SM523p008 / Module

Description:

General description:

This module allows students to deepen their knowledge in specific areas of language technology by attending a summer school. Students consolidate prior learning, engage with core theories, explore new approaches, learn about current trends, and exchange experiences with students from other institutions.

This module can be booked for 3 or 6 ECTS points, determined in consultation with the module coordinator.

ECTS: 3

Notes:

Students must independently find a suitable summer school relevant to their degree program. Before the summer school begins, they must send a request to the module coordinator, including details on the institution, title, dates, workload, content, and relevance.

Note: No financial support from the Department is foreseen.

After completing the summer school, students must send an email to the module coordinator with the following details:

- (1) full name,
- (2) matriculation number,
- (3) degree program,
- (4) module number,
- (5) number of ECTS credits to be awarded (typically 3 or 6 ECTS),
- (6) official confirmation of participation (PDF),
- (7) a short reflection (500-1000 words, approx. 1-2 pages) on learning outcomes and relevance.

The module will then be booked and marked as passed by the module coordinator for the semester in which the summer school took place. Self-enrollment via the booking tool is not possible.

Learning Outcome:

Students can:

1. consolidate previously learned material.
2. acquire new content in a compact format.
3. identify current trends.
4. exchange experiences with students from other universities.
5. develop international networks.

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Simon Clematide

Requirements:

Prerequisites:

This module can not be booked by the students themselves, the booking has to be authorized by the module coordinator. In order to credit the attendance at a

summer school, it is essential to submit a request to the module coordinator before the start of the summer school.

Assessment: Evidence of study achievements during Summer School

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Request period: not bookable

Place allocation at the latest:

Waiting list progression period: not bookable

Module Focus course Speech: Crosslinguistic Corpus Phonetics

06SM523p009 / Module

Description:

General description:

This module focuses on advanced topics in human and machine speech and voice processing. It covers core principles of acoustic modelling, feature extraction, and computational methods used in applications such as speech recognition, speech synthesis, and voice identification. Students also explore how humans produce and perceive speech and voice, allowing for a comparative understanding of biological and computational systems. The module integrates theoretical perspectives with practical work using speech and voice processing tools. It is designed to deepen students' knowledge of speech communication and prepare them for engagement with current scientific questions in the field.

ECTS: 6

Learning Outcome:

Students can:

1. deepen their knowledge in selected areas of human and machine speech and voice processing.
2. strengthen methodological skills for analyzing and working with speech and voice data.
3. evaluate contemporary scientific questions related to speech and voice communication.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Module 4-Week Writing Marathon for Doctoral Students

06SMG00p104 / Module

Description:

General description:

The guided writing marathon for PhD students concentrates on intensive progress in your writing project. On four Mondays in September, classroom sessions take place from 10:15 a.m. to 12:00 p.m. In these sessions, SMART goals are set, and strategies for achieving them are discussed. We do writing exercises and receive feedback on our goals and plans.

On Fridays, a Teams call takes place from 7:00 to 8:00 p.m., during which we review the week. By Saturday of each week, a reflection of 200 to 500 words must be submitted.

During the writing marathon, writing space will be set up (if possible), which is reserved daily from 8:00 a.m. to 6:00 p.m. for participants in the writing marathon.

Joint closing celebration (optional): Thursday, October 1st from 7 to 9 pm

ECTS: 2

Notes:

Language of instruction is English (those who write their dissertation in other languages are welcome to participate).

To request participation, please contact Miriam Volmert by 7 August 2026 and include your matriculation number (limited number of participants, first come, first served):
miriam.volmert@phil.uzh.ch

Learning Outcome:

You make intensive progress on your writing project. You develop a sustainable work routine and learn more about yourself and your potential. By the end of the marathon, you will know yourself better.

Module Research Colloquium Modern and Contemporary Art

06SMG31p004 / Module

Description:

General description:

Masterstudents and dissertation candidates are welcome to present their research, discuss theoretical approaches and methods, the interpretation of art works and structural organization of content in their Master Thesis or dissertation. Research strategies will be discussed, as well as mappings of topics, modes of presentation, the stages of preparing research trips, text production and outcome within different forms of self-organisation. The group will dive into aspects of presenting a research outline, working and re-working the table of content, and the basics of a state of research report, which should be at the beginning of the journey. Each participant should present at least once his or her research in the group and insert a text discussion to the colloquium.

Module Data Visualization

06SM615p518 / Module

Description:

General description:

Das Modul fördert vertieftes Fachwissen in einem ausgewählten Forschungsfeld. Es vermittelt die Kompetenz, zu einem ausgewählten Thema Fragestellungen aus Sicht der Politikwissenschaft zu entwickeln und zu analysieren. Im Zentrum des Seminars stehen die politikwissenschaftliche und normative Analyse, das trennscharfe Analysieren der Begriffe in ihrer Anwendung auf empirische Studien und das Begründen politischer Sachverhalte. Die unterschiedlichen Themen werden theoretisch und empirisch vertieft.

ECTS: 6

Learning Outcome:

Fachkompetenzen: Verortung von Argumenten und empirischen Studien in den relevanten wissenschaftlichen Debatten zu einem ausgewählten Thema; Methodenkompetenzen: wissenschaftliches Schreiben und Argumentieren; Verfassen eines schriftlichen Beitrags (Policy Paper, wissenschaftliche Abhandlung, etc.)
Selbstkompetenzen: Definition eigener inhaltlicher Schwerpunkte, Selbsteinschätzung, Planungsfähigkeit.

Module GEO 424 Participatory Methods

07SMGEO424 / Seminar

Description:

General description:

This seminar introduces students to methods, practices, and ethics in participatory research. The course draws on literature and examples from human geography and other social sciences to explore how participation can shape research in partnership with stakeholders beyond academic spaces.

The sessions will draw on current societal issues such as co-creating knowledge on the implications of environmental pollution on health, mapping climate change impact with young people, and developing tools with patients to communicate experiences of chronic illness. It discusses questions such as: how might participatory research help understand people's embodied experiences? What challenges and ethical dilemmas may arise from using such methods? What is the role of such research in contributing to sustainable and more equitable societies beyond research?

This course will combine lectures, exercises, and group work. We will discuss the principles and challenges of participatory research and explore different methods, including body mapping and collaging, participatory mapping, and photovoice. The course will be interesting to students planning to integrate participatory elements in their research, and those who are just curious about such approaches and want to learn more.

Please note that the course will be organised in a workshop format and the students are expected to actively participate in all sessions.

ECTS: 3

Notes:

The Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

- These SDGs are covered in this module: 5 & 10

The course takes place in room Y25-K-22. On 12 November 2026, the seminar will be held in room Y25-H-79.

Learning Outcome:

At the end of the course, the students will be able to:

- define and discuss core concepts and principles of participatory research
- identify and critically assess challenges and ethical questions of participatory approaches
- know the key tools to design a participatory research project

Target Groups:

Master students and PhD students in Geography, Master "Global Futures", Master students in Gender Studies

Course Materials:

Will be made available on OLAT at the start of the semester.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Karin Schwiter

Requirements:

Assessment: The course assessment consists of a 60-minute written essay, which will be marked. To be eligible for the exam, students must attend at least five of the six sessions and complete the accompanying exercises (pass/fail basis).

Module Immobilienzyklen, Wohnungsangebot und Einkommen (S) (Real Estate Cycles, Housing Supply, and Income) 03SM22BO0157 / Seminar

Description:

General description:

Der dreitägige Blockkurs behandelt Immobilienzyklen und deren Wirkungsmechanismen: wie Einkommens- und Zinsschocks in Wohnungsnachfrage übersetzt werden, wie Angebotsrestriktionen und Bauzeitverzögerungen Preiszyklen verstärken, und wie Kreditbedingungen sowie der schweizerische makroprudenzielle und aufsichtsrechtliche Rahmen zyklische Risiken prägen. Schweizer Primärquellen und Brancheninformationen bilden den analytischen Rahmen. Die Kursinhalte werden in drei Themenblöcken vermittelt:

- (1) Nachfrageschocks: Zyklus-Konzepte und Messung, Indizes und Segmentierung (Gastvortrag Wüest Partner), Raum- vs. Anlagemarkt / Vier-Quadranten-Logik, Bezahlbarkeit unter Einkommens- und Zinsschocks.
- (2) Angebot und Kreditkanal: Angebotselastizität als Zyklusverstärker, Monitoring und Ungleichgewichte in der Schweiz (Gastvortrag UBS), Kreditkanal, Endogenität und Feedback-Schleifen, Transition als „effektives Angebot“ (Gastvortrag EBP).
- (3) Anwendung: Gruppenpräsentationen auf Basis eines gemeinsamen Datensatzes zu den zehn grössten Schweizer Städten (Hauspreise, Mieten, Bezahlbarkeit, Neubau) mit transparent dokumentierten Ergänzungen.

ECTS: 3

Notes:

Die Anzahl der Teilnehmenden ist beschränkt. Informationen zum Bewerbungsverfahren finden Sie unter:

[https://www.df.uzh.ch/de/studies/bachelor-master/bachelor/ba-seminare.html#Bachelor:_Immobilienzyklen,_Wohnungsangebot_und_Einkommen_\(S\)](https://www.df.uzh.ch/de/studies/bachelor-master/bachelor/ba-seminare.html#Bachelor:_Immobilienzyklen,_Wohnungsangebot_und_Einkommen_(S))

Blockveranstaltung vom 31.08.2026 bis 02.09.2026 an der UZH (Seminarraum). Integrale Bestandteile sind drei Gastvorträge (Wüest Partner, UBS, EBP) und Gruppenpräsentationen am dritten Kurstag. Ein kursinterner Datensatz zu den zehn grössten Schweizer Städten (Hauspreise, Mieten, Bezahlbarkeit, Neubau) wird vor Kursbeginn auf OLAT bereitgestellt.

Learning Outcome:

Die Studierenden können nach Abschluss des Moduls: (i) Immobilienzyklen konzeptionell einordnen und Schweizer Zyklusindikatoren (Hauspreis-, Miet-, Bezahlbarkeits- und Bauindizes) inklusive ihrer Verzerrungen korrekt interpretieren; (ii) Nachfrageschocks (Einkommen, Zinsen) und Angebotsrestriktionen über das Vier-Quadranten-Modell durch Miet-, Preis- und Bauaktivitätsdynamik verfolgen; (iii) Kreditkanal und Feedback-Schleifen in Kausalschlaufendiagrammen abbilden sowie den schweizerischen makroprudenziellen und aufsichtsrechtlichen Rahmen (SNB CCyB, FINMA-Aufsichtsmitteilung) einordnen; (iv) eine datenbasierte, evidenzgestützte Zyklusdiagnose für eine Schweizer Stadt erstellen und vor einem Fachgremium argumentativ vertreten.

Target Groups:

Studierende im BA in Finance mit Interesse an Immobilienökonomie

Course Materials:

Wird zu gegebenem Zeitpunkt auf OLAT aufgeschaltet.

Merkmale:

Responsible instructor:

Francisco Osswald do Amaral

Requirements:

Prior Knowledge:

Grundkenntnisse in Finance und Immobilienökonomie sowie in deskriptiver Statistik von Vorteil; sicherer Umgang mit Excel wird vorausgesetzt.

<u>Assessment:</u>	Gruppenpräsentation einer Zyklusdiagnose für eine Schweizer Stadt am Mi 02.09.2026 (10 Min. Präsentation + 5 Min. Q&A pro Gruppe) vor Dozierenden und Gastreferierenden. Präsenz an allen drei Kurstagen obligatorisch. Keine separate schriftliche Prüfung
<u>Grading Scale:</u>	1-6 Quarter Grades Given

Module PhD Course: Inequality

03SMDOEC1284 / Course

Description:

General description:

The course will focus on how to measure inequality, behavioral aspects related to inequality, as well as gender differences and gender inequality.

ECTS: 2

Notes:

Venue: SOF E-09

Except: 4 and 11 November. Venue: SOE-F-9

Learning Outcome:

All students will write a course paper on a topic related to the course. We will provide some suggested topics and help with finding useful data for empirical work. Through this work, the student will learn how to write a short paper – from idea to paper.

Target Groups:

PhD students (Zurich GSE)

Course Materials:

Selected articles

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Ingvild Almas

Requirements:

Assessment:

3–4-page term paper on a suggested topic with a presentation (85%), and class participation (15%).

A first draft of the term paper has to be sent to ingvild.almas@econ.uzh.ch by December 8, 2026 and the final version no later than January 11, 2027.

Grading Scale:

1-6, Half Grades Given

Module CHE 744 Methods of X-ray Analysis

07SMCHE744 / Lecture with Practical Exercises

Description:

General description:

This module provides a comprehensive introduction to X-ray based analytical methods, covering both laboratory and synchrotron-based techniques. Students are guided from the physical fundamentals of X-ray–matter interaction through instrument design to practical quantitative and structural analysis. Emphasis is placed on developing the ability to select the appropriate technique for a given analytical problem and to critically evaluate experimental data.

The module integrates modern developments including free-electron laser sources, spectral CT, X-ray emission spectroscopy, and ptychography alongside established techniques such as XRF, XRD, EXAFS, and X-ray reflectometry. Radiation safety and regulatory aspects are treated in a dedicated unit.

ECTS: 2

Learning Outcome:

Upon successful completion of this module, students will be able to:

- Explain the physical mechanisms of X-ray–matter interaction and their analytical consequences
- Describe the operating principles of laboratory and synchrotron X-ray sources and detectors
- Apply the fundamental parameter formalism to quantitative XRF analysis
- Interpret XANES, EXAFS, and XES spectra in terms of electronic structure and local geometry
- Analyse powder diffraction data for phase identification, lattice parameters, and microstructure
- Describe and compare thin film characterisation techniques: XRR, GIXRD, SAXS, TXRF
- Understand the principles of X-ray CT, phase contrast imaging, and XRF-CT
- Apply radiation protection principles and identify relevant regulatory requirements
- Design a measurement strategy for a given analytical problem and justify technique selection

Target Groups:

- MSc Chemistry students seeking specialisation in analytical or physical chemistry
- MSc students in Materials Science, Biochemistry, and Earth Sciences
- BSc Chemistry students (Year 3) with completed physical chemistry courses
- PhD students from chemistry, physics, and materials science departments

Languages of Instruction:

English

Course Materials:

- Lecture notes and slides distributed via OLAT
- Course textbook: Instructor's handouts
- Python demonstration scripts for all chapters (provided on OLAT)
- Supplementary reading list provided per chapter

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Davide Bleiner

Requirements:

Prior Knowledge:

- General chemistry and physical chemistry at undergraduate level
- Introductory quantum mechanics (atomic orbitals, energy levels)
- Basic optics (wave phenomena, diffraction, interference)
- Elementary statistics (Gaussian distributions, error propagation)
- Basic programming skills in Python are advantageous but not required

Assessment: Assessment consists of three components (all held in English):
 1. Written Examination (60 %): 90-minute closed-book exam at end of semester
 2. Laboratory Report (25 %): Written report on one practical measurement exercise
 3. Oral Presentation (15 %): 10-minute technique presentation in the last week

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Module Increase Your Motivation for Your PhD

06SMG00p106 / Module

Description:

General description:

Dieser Motivationskick für Doktorierende richtet sich an Doktorierende aller Stufen. Wir werden den Fragen nach der Motivation für einzelne Handlungsschritte im Prozess der Fertigstellung einer Doktorarbeit in den Geistes- und Sozialwissenschaften nachgehen. Folgende Fragen leiten durch das Kursprogramm: "Weshalb doktorierst du?", "Welche Hindernisse gibt es?", "Was ist das Ziel deiner Doktorarbeit?" und "Welche Routinen helfen dir auf dem Weg zum Dokortitel?". Ergänzt werden die Sitzungen durch Inputs zu Energiekompetenz, Projektmanagement und Selbstführung.

Vier Sitzungen finden vor Ort im Plenum statt (unregelmässig an Montagen von 10:15 bis 12:00 Uhr). An den Nachmittagen finden Einzelsitzungen statt.

ECTS: 2

Notes:

Um die Teilnahme anzufragen, kontaktieren Sie bitte bis 30. September 2026 unter Nennung Ihrer Matrikelnummer Miriam Volmert (begrenzte Teilnehmendenzahl, first come, first served): miriam.volmert@phil.uzh.ch

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Anna Pawlak

Requirements:

Assessment: dokumentierte praktische Arbeit

Der Leistungsnachweis besteht aus vier Einträgen (200 bis 500 Wörter) im Reflexionstagebuch, die während des Kurses abgegeben werden.

Module Restitution and the Moving Image

06SMG33p103 / Module

Description:

General description:

Today, "restitution" is part of the everyday language of postcustodial museum practice and international cultural diplomacy, where it is often used interchangeably with terms such as return or repatriation. But what happens, when "restitution"-a concept historically formulated in relation to unique artifacts, human remains, and dispossessed land-is rearticulated through moving images and their medium-specific affordances?

In a cinema event, a public lecture, and a doctoral workshop, we will discuss that restitution, approached through the moving image, must be rethought beyond the narrow question of return, toward a broader reparative horizon that confronts the epistemic violence embedded in archival media and infrastructures, the legal and economic frameworks that govern image property and authorship, and wider legacies of uneven development and unequal exchange in global archival relations.

ECTS: 2

Notes:

The cinema event takes place on 10 November, 19.00-22.00, in Xenix.

For further details on the dates/times and locations of all parts of the workshop, see below.

Module Artificial Intelligence and/or the Social Sciences

06SM615p534 / Module

Description:

General description:

Das Modul fördert vertieftes Fachwissen in einem ausgewählten Forschungsfeld. Es vermittelt die Kompetenz, zu einem ausgewählten Thema Fragestellungen aus Sicht der Politikwissenschaft zu entwickeln und zu analysieren. Im Zentrum des Seminars stehen die politikwissenschaftliche und normative Analyse, das trennscharfe Analysieren der Begriffe in ihrer Anwendung auf empirische Studien und das Begründen politischer Sachverhalte. Die unterschiedlichen Themen werden theoretisch und empirisch vertieft.

ECTS: 6

Learning Outcome:

Fachkompetenzen: Verortung von Argumenten und empirischen Studien in den relevanten wissenschaftlichen Debatten zu einem ausgewählten Thema; Methodenkompetenzen: wissenschaftliches Schreiben und Argumentieren; Verfassen eines schriftlichen Beitrags (Policy Paper, wissenschaftliche Abhandlung, etc.)
Selbstkompetenzen: Definition eigener inhaltlicher Schwerpunkte, Selbsteinschätzung, Planungsfähigkeit.

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Module The State, Democracy and the People: Switzerland and Modern Political Thought

06SM600p017 / Module

Description:

General description:

Early Modern and Enlightenment Europe was a hotbed of debates over the nature of the state, the value (and dangers) of democracy, and the problem of what it meant to be politically 'free'. Strikingly, both Swiss theorists and the example of Switzerland as a federated republic played an outsized role in how philosophers and political actors from the sixteenth through to the eighteenth centuries responded to these questions. Together, participants in this course will explore and how and why this occurred, and what impact this has had on how we talk about politics today. By working with texts by thinkers with roots in what is now modern Switzerland, including Jean-Jacques Rousseau, Emer de Vattel and Benjamin Constant, the module will introduce students to the historical development of key political concepts including the social contract, republican freedom, political representation, international law and military neutrality. We will also see how engagement with both Swiss political and social practices, and institutions such as the local publishing industry, exerted an influence on the work and reception of other European thinkers, such as Thomas More, Niccolo Machiavelli and Samuel Pufendorf. By the end of the module, students will not only have a stronger understanding of the history of political thought and its methods, but will also recognise that the history of these ideas is not, itself, 'neutral'.

ECTS: 6

Learning Outcome:

1. Gaining a broad understanding of historiographical trends in the history of political thought and intellectual history;
2. Precisely outlining the contributions made by key thinkers in the history of political thought and relating these to each other and to major philosophical traditions;
3. Critically analysing texts by political philosophers, using both textual and contextual methods;
4. Successfully constructing written and oral arguments about the meaning of philosophical texts;
5. Describing how the meanings of political concepts have changed over time.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Marietta Meier

Requirements:

Assessment:

Students will write one essay, to be submitted at the end of the term. Over the course of the term they will complete various smaller tasks related to the writing of the essay (source analysis, an essay plan, and an essay draft) which they will share with assigned writing partners, as a form of peer review and critique. They will also be assessed on their oral contributions in class.

Breakdown of Grade:

Final Essay: 45%

Shorter Writing Tasks: 35%

In-Class oral engagement: 20%

Grading Scale:

Pass/Fail

Repeatability:

Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Request period: from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Module GEO 442 Remote Sensing Theory: Understanding signals

07SMGEO442 / Lecture with Practical Exercises

Description:

General description:

The module "Remote Sensing Theory: Understanding signals" deepens the theoretical knowledge of student about the measurement of electromagnetic radiation by remote sensing sensors and the interpretation of these measurements. The course provides students with a thorough understanding of various topics, including i) radiative transfer and radiometric measurements in situ and from airborne sensors, ii) sources of data errors, strategies to assess data quality, and concepts to quantify measurement uncertainties, iii) approaches to quantify and compensate atmospheric, anisotropy, and other confounding effects. Furthermore, the module provides students with the opportunity to apply learned theory on their own measurements of radiance and irradiance over water and land using field instruments. Students will gain skills in collecting, analyzing and characterizing the information content and quality of in situ remote sensing data using state-of-the-art the programming language Python. The module is composed of the lecture module GEO 442.1, which introduces the underlying theory, and the exercise module GEO442.2, which conveys important methods and skills of data analysis. The content and skills gained in this module are an important foundation for advanced remote sensing data analysis and interpretation as aimed for in the master modules GEO441, GEO443, GEO444).

ECTS: 4

Notes:

The lectures and exercises take place on site.

The Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 6; 13 & 15

The exam will take place in rooms Y25-J-09 and Y25-J-10 from 9:00 to 10:00 a.m. on January 13, 2027.

Learning Outcome:

After participating in the module, students:

- i) have a thorough understanding of remote sensing measurements and signals;
- ii) are able to identify data errors, quantify data quality and compensate disturbing effects in remote sensing data;
- iii) can write programming scripts to analyze remote sensing in situ and airborne data over land and water;
- iv) are enabled to comprehensively characterize, interpret, and discuss remote sensing data.

Target Groups:

Required module for a specialisation in Remote Sensing.

Languages of Instruction:

English

Course Materials:

Lecture supplements, exercise sheets will be made available on OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Alexander Damm-Reiser

Requirements:

<u>Prior Knowledge:</u>	GEO371, GEO374, programming skills in Python.
<u>Assessment:</u>	Lecture component: a 60-minute written examination, sat in person without aids, graded 1.0–6.0 in quarter-point steps. Exercise component: a portfolio of five exercises, each assessed on a pass/fail basis. Failed exercises may be revised once. Students may sit the examination only if all exercises have been passed. Language of examination: English
<u>Grading Scale:</u>	1-6 Quarter Grades Given

Module GEO 443 Advanced Methods in Earth Observation - assessing spatial and temporal dynamics

07SMGEO443 / Lecture with Practical Exercises

Description:

General description:

The module "Advanced Methods in Earth Observation - assessing spatial and temporal dynamics" deepens the knowledge of students about advanced methods to analyze mono-and multitemporal, multimodal remote sensing images and extract spatial and temporal variation of atmospheric/earth surface information. The course provides students with a thorough understanding of various topics, including:

- i) the design and planning of remote sensing projects,
- ii) advanced data processing using collaborative, cloud-based processing platforms,
- iii) advanced methods to exploit the spatial, spectral and temporal information dimension of remote sensing data,
- iv) concepts and approaches for causal inference. Furthermore, the module provides students with the opportunity to apply learned theory in practice by working on small remote sensing projects.

Students will gain skills in working in collaborative data platforms and implement small methods with the programming language Python to analyze remote sensing data together with other geospatial data. The module is composed of the lecture module GEO 443.1, which introduces the underlying theory, and the exercise module GEO443.2, which conveys important methods and skills of data analysis. The content and skills gained in this module are an important foundation to implement advanced remote sensing data analysis and qualifies for the work on a master thesis in remote sensing.

ECTS: 4

Notes:

The lectures and exercises take place on site.

The Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. These SDGs are covered in this module: 6; 13 & 15

The exam will take place in rooms Y25-J-09 and Y25-J-10 from 9:00 to 10:00 a.m. on January 12, 2027.

Learning Outcome:

After participating in the module, students:

- i) have a thorough understanding of information dimensions in remote sensing and suited methods to exploit them;
- ii) are able to quantify spatial and temporal changes of atmospheric/surface properties with remote sensing data;
- iii) can write small scripts to analyze satellite-based remote sensing data in a cloud-based environment;
- iv) are enabled to comprehensively interpret and discuss remote sensing results.

Module From Idea to Text – A Writing Seminar

06SMG11p101 / Module

Description:

General description:

Während des Schreibens einer Dissertation haben wir manchmal eine Idee, die gut klingt und sich auch gut erzählen lässt, die wir aber (zu) lange nicht im Schreiben konkretisieren. Aber wir alle wissen eigentlich, dass sich erst im Schreibprozess herausstellt, wie gut eine Idee funktioniert, ob sie trägt, ob sie genug hergibt, wie sie sich entwickeln lässt - und kennen auch die befreiende Erfahrung, dass sich eine gute Idee beim Schreiben wie von selbst weiterentwickelt.

Das Ziel dieses Seminars ist es, den Weg von einer Idee zu einem Text gemeinsam in einer kleinen Gruppe zu gehen. Wir diskutieren zusammen eine Idee für ein Kapitel, einen Aufsatz oder einen Antrag und erstellen dann im Austausch mit andere/n einen konkreten Plan für die Umsetzung. Wir beschäftigen uns dabei auch mit konkreten praktischen Fragen wie zum Beispiel: Wie bereite ich einen Text für die Publikation in einer Zeitschrift vor, und wie antworte ich auf Reviewer? Was sind die wichtigsten Punkte in einem Forschungsantrag und was/wer kann mir helfen, diese umzusetzen? Was sind die letzten Schritte auf dem Weg der Abschluss einer Dissertation? Was gehört in die Einleitung/Synopsis und den Schluss?

Das Seminar ist für alle geeignet, die Unterstützung und Struktur beim Umsetzen einer Idee in einen Text brauchen können, und die sich verpflichten möchten, eine erste Version eines Textes im Laufe des Herbstsemesters bis Ende Januar zu schreiben. Besonders geeignet ist der Kurs für Doktorierende ab dem zweiten Jahr.

Der Schreibprozess wird begleitet durch kurze Treffen online und durch individuelle Besprechungen während des Semesters, und durch vier längere Treffen im Semester, bei denen wir Ideen und Texte gemeinsam diskutieren und immer einen praktischen Schwerpunkt haben.

Module Synthesizing Research Evidence: Systematic Reviews and Meta-Analyses

06SMG80p119 / Module

Description:

General description:

Day 1 will introduce the foundations of synthesizing research evidence. We will cover the key principles, goals, and quality criteria of systematic reviews, and guide participants through the full workflow-from defining a research question and conducting literature searches to screening studies and extracting data. Particular emphasis will be placed on hands-on activities, where participants work with real datasets to move from raw search results to a structured dataset ready for meta-analysis. In addition, we will explore the use of AI-based tools to support the screening process, alongside a critical reflection on their benefits, limitations, and implications for transparency and reproducibility.

Day 2 will focus on the statistical analyses to synthesize quantitative evidence. We will dive into standard and complex meta-analytic modeling approaches, including robust variance estimation, multilevel and multivariate meta-analysis. These approaches deal with effect size multiplicity-a characteristic of most meta-analyses.

ECTS: 2

Module Does Good Education Need Research? On the Purpose, Benefits, and Limitations of Educational Research 06SMG80p121 / Module

Description:

General description:

Führt didaktische Forschung zu besserem Unterricht? Trifft die Bildungspolitik tatsächlich bessere Entscheide, wenn sie sich an wissenschaftlicher Evidenz orientiert? Und was ist mit der Theorie - ist sie ein Hobby für nostalgische Akademiker:innen?

Im Alltag der Doktorierenden stehen solche Fragen meist nicht im Vordergrund. Sie sind aber nicht bedeutungslos, da sie die Frage berühren, warum und wie wir forschen. Sie prägen auch die öffentliche Debatte damit das zukünftige Berufsfeld von Doktorierenden.

Auf der Basis von Gerd Biestas Educational Research: An Unorthodox Introduction denken wir in diesem Modul gemeinsam darüber nach, warum wir Bildungsforschung betreiben, was sie leisten kann (oder vielleicht auch nicht) und welche Rolle sie für pädagogische (Schul)Praxis, Politik und Gesellschaft spielt. Ziel des Moduls ist es, die eigene Forschungsarbeit zu reflektieren und dabei neue Perspektiven auf das eigene wissenschaftliche Tun zu gewinnen.

Module The Role of Theory in Empirical Educational Research

06SMG80p122 / Module

Description:

General description:

The course introduces participants to different types of educational theories and examines how such theories are developed, refined, and tested within empirical educational research. It is shown how theoretical perspectives inform the design, implementation, and interpretation of empirical studies, as well as how theoretical constructs can be operationalised. The course also explores how theory and empirical evidence are integrated and presented in scholarly publications, particularly in academic journals. A focus lies on outlining typical deficits in theory building and evaluation in this (and related) research fields and on how to overcome these deficits.

The course is designed to be accessible to PhD-students from diverse methodological backgrounds and is not intended solely for those with a quantitative focus.

Module Ethnography: Principles, Research Practice and Reflection on Qualitative Research Standards

06SMG80p123 / Module

Description:

General description:

Ethnografien ermöglichen es, alltägliche Lebenswelten von Menschen sowie institutionelle Prozesse und Praktiken forschend zu verstehen. Der Workshop vermittelt ein Grundverständnis für ethnografisches Denken, Forschen und Schreiben und damit für zentrale Prämissen qualitativer Sozialforschung.

Im Fokus stehen neben der Ethnografie als Forschungsstrategie mit ihrem breiten Methodenrepertoire insbesondere die reflexive Auseinandersetzung mit der eigenen Standortgebundenheit als Forscher:in - ein Erkenntnispotential, das auch für andere qualitative Forschungszugänge fruchtbar ist. U.a. werden folgende Fragen adressiert: Wie lässt sich Ethnografie in den qualitativen Methodendiskurs einordnen? Wie reflektiere ich meine Positioniertheit? Wie verfasse ich Feldnotizen?

Der Workshop verbindet theoretische Inputs mit Einzel-, Kleingruppen- und Plenumsarbeit sowie einer Forschungswerkstatt, in der Bezüge zu den eigenen Projekten hergestellt werden. Wir werden vor allem forschungspraktisch an Datenmaterial aus laufenden Projekten arbeiten.

ECTS: 2

Merkmale:

Responsible instructor: Silke Werner

Requirements:

Prerequisites: Der Workshop richtet sich an Promovierende unterschiedlicher sozialwissenschaftlicher Disziplinen, die mit der Ethnografie als Forschungsstrategie arbeiten, diese kennenlernen oder sich zu dieser weiterbilden möchten. Vorkenntnisse zur Ethnografie werden nicht vorausgesetzt.

Assessment: Kommentar zum Vortrag oder Diskussionsbeitrag oder Teilnahme an wissenschaftlicher Diskussion

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Module Student Participation in Education

06SMG80p124 / Module

Description:

General description:

Im bildungspolitischen, erziehungswissenschaftlichen und (fach-)didaktischen Diskurs spielt der Partizipationsbegriff schon seit geraumer Zeit (immer wieder) eine wichtige Rolle. Zum einen hat sich Partizipation in einem normativen Sinn Gehör verschafft, was zu einer zunehmenden Akzeptanz und Verbreitung schulischer Partizipationsformate beigetragen hat. Zum anderen hat sich Partizipation in der Unterrichtsforschung auch in einem deskriptiven Sinn als Analysekategorie etabliert, was zu einem besseren Verständnis von Beteiligungsstrukturen in Unterrichtsprozessen beitragen kann.

Das Modul befasst sich mit unterschiedlichen Konzeptionen von Partizipation und diskutiert aus erziehungswissenschaftlicher und fachdidaktischer Perspektive, welche Potenziale und welche Herausforderungen mit dem Partizipationspostulat einhergehen.

Module Older Adults and Digital Media

06SM254p129 / Module

Description:

General description:

Im Rahmen eines Projektes werden selbstständig und im Team wissenschaftliche Fragestellungen formuliert und mit Hilfe sozialwissenschaftlicher Theorien und Methoden bearbeitet. Dabei werden alle im Studium vermittelten Kompetenzen (Methoden-, Vermittlungs- und Organisationskompetenzen) angewandt. Die Projekte werden mündlich und schriftlich präsentiert und sind Grundlage für die nachfolgende Ausarbeitung im Modul Bachelorarbeit.

ECTS: 9

Learning Outcome:

Die Studierenden sind in der Lage selbstständig und im Team an einem wissenschaftlichen Projekt sowohl theoretisch als auch methodisch zu arbeiten und Fragestellungen zu formulieren. Sie sind nach Abschluss des Seminars optimal auf die Weiterbearbeitung der Thematik und das Verfassen der Bachelorarbeit vorbereitet.

Languages of Instruction:

Module Noh Theatre: Narrative and Metaphor in Performance

06SM290p126 / Module

Description:

General description:

This course aims to introduce students to the study of noh theatre through the analysis of various noh plays. Particular focus will be placed on the intertextual relationships between the classical literature and the multiple levels of the plays' structure. At the same time, theoretical approaches-primarily drawing on metaphor theory and narratology-will shed light on the distinctive features of noh texts that shape the audience's unique theatrical experience.

In the first online meeting, followed by individual reading and video viewing, students will learn about the historical development and performative characteristics of noh theatre. At the first on-site meeting, they will also have the opportunity to learn the basics of noh movement. In the remaining sessions, we will engage in close analysis of selected noh plays.

The works to be discussed include Takasago (deity play), Atsumori (warrior play), Izutsu and Yuya (woman plays), and Funabashi (miscellaneous play). Through these, students will be thus exposed to a range of source materials and subcategories of noh, though not exhaustively.

Recurrent topics of discussion will include: how "newness" is introduced in the theatrical adaptation of well-known stories; how "dead metaphors" are revitalized through rhetorical and structural techniques; the effects of narration, characters' speech, and their fusion; and the synergistic relationship between chant and the physical performance on stage.

Module Topics in the Cognitive Sciences of Morality

06SM160p019 / Module

Description:

General description:

Die moralischen Kognitionswissenschaften sind ein interdisziplinäres Forschungsfeld, das untersucht, wie menschliche Moralvorstellungen im Gehirn entstehen und verarbeitet werden. An der Schnittstelle von Psychologie, Neurowissenschaften, Philosophie und Evolutionsbiologie wird analysiert, welche kognitiven Mechanismen hinter unseren Urteilen über "Gut" und «Böse» stehen. In den letzten Jahren widmen sich die moralischen Kognitionswissenschaften zusehend konkreten Anwendungsproblemen.

In dieser Vorlesung wollen wir uns einige Themen aus der aktuellen Debatte näher anschauen. Zu diesem Zweck werden internationale Gäste Vorträge zu ihrer Forschung halten.

Die Vorlesung folgt folgendem Schema:

- Einführung in ein Thema und Diskussion von Grundlagenliteratur.
- Vortrag eines Gasts zu eben diesem Thema.
- Einführung in ein Thema und Diskussion von Grundlagenliteratur.
- Vortrag eines Gasts zu eben diesem Thema.

Alle Gastvorträge finden über Zoom statt und ermöglichen eine flexible Teilnahme von überall. Nur die Einführungssitzungen finden in Person im Seminarraum statt.

ECTS: 3

Learning Outcome:

Studierende sind nach Besuch der Vorlesung in der Lage, die Relevanz empirischer Studien für moralische Fragestellungen zu bewerten. Sie entwickeln ein Gespür dafür, wie philosophische Gedanken in empirisch testbare Hypothesen übersetzt werden können. Darüber hinaus erwerben sie ein Grundverständnis für interdisziplinäre Forschungsprojekte innerhalb der Moralforschung, an denen die Philosophische massgeblich beteiligt ist.

Languages of Instruction:

Siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Target Group: Open to School Students

Responsible instructor:

Pascale Willemsen

Requirements:

Prerequisites:

Bereitschaft, einige Texte in englischer Sprache zu lesen sowie Fragen auf Englisch zu stellen.

Keine weiteren Kenntnisse sind erforderlich.

Assessment:

Für den Erhalt eines Leistungsnachweises müssen folgende Leistungen erbracht werden:

1. Fragen oder Kommentare zu drei verschiedenen Online-Vorträgen.
2. Fragen oder Kommentare zu drei verschiedenen Texten.

Die Veranstaltung gilt als bestanden, wenn alle Einzelleistungen absolviert wurden.

Module Introduction to Vedic Sanskrit

06SM272p624 / Module

Description:

General description:

This seminar introduces students to Vedic Sanskrit language and to the history, culture, and literature of the Vedic period. The first part of the course provides an overview of Vedic literature, religion, and linguistic features. The second part focuses on the close reading of selected Vedic texts in poetry (Ṛgveda, Atharvaveda Saṃhitās) and prose (Taittiriya Saṃhitā; Jaiminiya and Śatapatha Brāhmaṇas), with emphasis on grammatical analysis, translation, and interpretation.

Module Luwian

06SM272p632 / Module

Description:

General description:

Diese Vorlesung bietet eine Einführung ins Luwische, das im 2. und 1. vorchristlichen Jahrtausend in Anatolien und Nordsyrien gesprochen wurde. Das Luwische gehört, wie etwa das Hethitische, zum anatolischen Zweig der indogermanischen Sprachen. Neben dem eigentlichen Luwischen - Keilschriftluwisch und Hieroglyphenluwisch - werden wir uns auch die luwischen Sprachen im weiteren Sinne ansehen, u.a. Lykisch und Karisch.

Module R for Doctoral Students

06SMG70p102 / Module

Description:

General description:

This workshop offers a basic introduction to R. The R system for statistical computing is freely available (<http://www.r-project.org>) and provides a flexible software environment for statistical analyses and graphics. The workshop covers the basics of programming in R, data formats in R, and the basics of data analyses including data manipulation, simple graphical representations and statistical methods. Exercises with correct solutions are provided to facilitate the analyses.

Aims: After the workshop students will be able to organize elementary statistical analyses in R. This will be tested by an exercise that includes the analysis of a provided data set. Furthermore, the students will be able to find R implementations of psychometric methods and the corresponding documentation.

ECTS: 1

Notes:

Online-Workshop

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Maike Krannich

Requirements:

Prerequisites:

A laptop computer with the current version of R (<http://CRAN.R-project.org/>) and the R-Studio editor (<http://www.rstudio.org/>).
The following R packages should be installed: AER, car, gplots, HSAUR, psych, Rcmdr

Assessment:

schriftliche Übung

Grading Scale:

Module Introduction to Structural Equation Modeling in R

06SMG70p118 / Module

Description:

General description:

Investigating multivariate relationships on a latent level has become a standard way of analyzing data in psychology and the social sciences in recent years. This course provides an introduction into Structural Equation Modeling a technique to conduct such analyses. SEM is a statistical framework that allows researchers to test complex multivariate models that involve multiple relationships between latent and or manifest variables.

With a focus on hands-on learning, this course will focus on conducting SEM in R using the lavaan and blavaan packages. Specifically, the course will cover:

- 1 the basic logic underlying structural equation modelling
- 2 how to specify structural equation models
- 3 simulating data from structural equation models
- 4 analyzing data using structural equation models with both frequentist and Bayesian inference approaches
- 5 reporting and illustrating results from structural equation models

The course is design for beginners that have no experience with structural equation modeling. Throughout the course, students will learn how to use the statistical software R to simulate and fit SEM models, interpret model results, and assess the fit of SEM to data. As a written assignment students will prepare a Markdown document that requires them to develop, test, and interpret their own SEM models.

ECTS: 1

Module Meta-Analysis

06SMG70p117 / Module

Description:

General description:

This meta-analysis workshop is taking place as an Online-workshop.

It is an introductory course planned based on the excellent book of Borenstein et al.:

Borenstein, M., Hedges, L. V., Higgins, J. P. T., & Rothstein, H. (2009). Introduction to meta-analysis. Chichester, UK: John Wiley & Sons

An eBook version of this is available via the library of the university.

The chapters that are recommended to read and being helpful for the workshop are:

- Preface
- Chapters 1-3

Chapters 4-7 are about computing effect sizes and a thorough reading is not necessary for preparation. Scanning these chapters is sufficient.

Additionally recommended are:

- Chapters 8-13
- Chapters 15-17
- Chapters 20-21

Chapter 30 is about publication bias. This chapter is a good explanation of publication bias methods, but it is a bit outdated.

Together with another colleague, Robbie van Aert, who is teaching the workshop, wrote a book chapter which is a nice overview of the state-of-the-art with respect to publication bias methods and illustrates how these methods can be applied using R:

Van Aert, R.C.M. & Niemeyer, H. (2021). Publication bias. In S. O Lilienfeld, W. O'Donohue, & A. Masuda. Questionable research practices in clinical psychology. Springer. doi: 10.31222/osf.io/3rdys

It is therefore recommend to read this book chapter rather than the one of Borenstein et al.

The book chapter is available at:
osf.io/preprints/metaarxiv/3rdys/

Note that the amount of literature may look overwhelming. However, the chapters of Borenstein et al. are generally quite short.

ECTS: 1

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Maike Krannich

Requirements:

Prerequisites: Students are requested to bring a laptop to the sessions with the free software R (<https://www.r-project.org/>) and RStudio (www.rstudio.com/products/rstudio/#rstudio-desktop) (<https://www.rstudio.com/products/rstudio/%23rstudio-desktop>) installed on it. Note that familiarity with R is helpful but not a prerequisite to attend the course.

Basic knowledge about statistics and particular regression analysis is a prerequisite to attend the workshop.

Assessment:

- dokumentierte praktische Arbeit
- Kommentar zum Vortrag oder Diskussionsbeitrag oder Teilnahme an wissenschaftlicher Diskussion

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Module Writing Research Articles in Psychology

06SMG70p101 / Module

Description:

General description:

Publishing research in the age of AI presents a new series of challenges. Even as mastery of language and grammar has become self-evident, scientific writers still struggle to articulate the content, importance, and impact of their work effectively and persuasively. This course will provide participants with the tools to understand how to produce the readable sentences, smooth and coherent texts, and organizational structures that meet the expectations of their specific audiences and publication venues. In addition, participants will receive concrete feedback on their texts in progress from both peers and from the lecturer, becoming more aware of the strengths and weaknesses of their writing. From this combination of input and feedback, participants will develop their ability to make more informed decisions about how to best communicate their psychology research.

ECTS: 2

Notes:

This module is designed for PhD students who are beginning to write their own research articles.

Participants complete five short writing tasks, which may later be incorporated into a paper, during the course. They receive feedback on these and compile five second drafts of these assignments as a writing portfolio. This portfolio is graded at the end of the course.

Module M3L 324 Deep Learning

07SMM3L324 / Lecture with Practical Exercises

Description:

General description:

Deep Learning has emerged as arguably the most influential technology of the last five years, seamlessly integrating into our everyday lives. This course offers a rigorous, hands-on introduction to this field.

The course will cover the basics of neural networks, popular architectures, such as convolutional neural networks, transformers and large language models, and will explain how to train and fine-tune them. We will also cover ethical and safety considerations of deep learning models. The exercises will focus on practical implementations to reinforce the knowledge.

ECTS: 4

Learning Outcome:

Design and train neural networks for different domains (such as image or language) using modern optimization strategies.

Target Groups:

Mathematics (BSc, MSc)

Applied Probability and Statistics Minor

Students with the appropriate background from other programs are welcome as well.

Not for AMML students

Course Materials:

- Book "Dive Into Deep Learning" By Aston Zhang, Zachary C. Lipton, Mu Li, and Alexander J. Smola
- Book "Deep Learning" By Ian Goodfellow, Yoshua Bengio, Aaron Courville
- "The little book of Deep Learning" by François Fleuret

Merkmale:

Responsible instructor: Anastasiia Koloskova

Requirements:

Prior Knowledge: Previous coursework in analysis, linear algebra, and probability is required. Familiarity with optimization, python and/or machine learning is useful.

Assessment: Midterm and Written Module Exam
(repetition exam may also be oral)

Language of assessment: English

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module Written Paper Greek Linguistics

06SM272p603 / Module

Description:

General description:

Die schriftliche Arbeit ist mit einem linguistischen Seminar-Modul aus dem gleichen oder aus dem letzten Semester zu kombinieren. Aus dieser Veranstaltung wird in Absprache mit der Lehrperson ein Thema ausgewählt, zu dem selbständig und fristgerecht eine Arbeit zu verfassen ist.

ECTS: 3

Learning Outcome:

Konsolidierung der sprachwissenschaftlichen Kompetenzen. Kompetente Analysen wissenschaftlicher Sachverhalte. Selbständige Präsentation und Hinterfragung fremder Forschungsergebnisse. Fähigkeit zur Teilnahme am wissenschaftlichen Diskurs.

Languages of Instruction:

Deutsch

Module Workshop Cultural Analysis

06SM380p808 / Module

Description:

General description:

Im Modul «Kulturanalytische Werkstatt» geht es darum, die kulturanalytischen Kompetenzen und Fertigkeiten einzuüben und zu reflektieren, die für die Methoden und die Praktiken der Kulturanalyse grundlegend und unerlässlich sind:

"Kultur analysieren": Was heisst das und wie geht das? Was heisst «Kultur», was heisst «analysieren»?

Wie finde ich relevante kulturanalytische Theorie und Materialien, die ich analysieren möchte?

Wie analysiere ich Bilder, Filme, Serien, Photographien, Alltagspraktiken, Social Media-Inhalte?

Wie lese ich herausfordernde theoretische Texte?

Was heisst Lesen, was heisst Text, was heisst Theorie?

Was sind Zeichen, Diskurse, Medien, Praktiken?

Wie bereite ich mich auf eine kulturanalytische Seminarsitzung, auf eine Schriftliche Arbeit, auf das Prüfungsgespräch vor?

Wie recherchiere ich (etwa für meine kulturanalytischen Leistungsnachweise)?

Wie verwende ich in der Kulturanalyse legal und gewinnbringend KI?

ECTS: 3

Learning Outcome:

Ziel der «Kulturanalytischen Werkstatt» ist es, den Studierenden die Fertigkeiten und Kompetenzen zu vermitteln, um am Leitfaden der in den Pflichtmodulen gelehrtten Methoden und Praktiken Kultur in allen ihren möglichen Erscheinungs- und Gegebenheitsweisen analysieren zu können. Zudem geht es darum, die fachliche Orientierung und Sicherheit, die sich KA Studierende wünschen, sowie ausreichend Betreuung und Begleitung zu bieten, die es Ihnen ermöglicht, das Studium der Kulturanalyse mit all ihren Herausforderungen gelingend bestreiten zu können.

Module Digital platforms: power, economics, aesthetics

06SM380p806 / Module

Description:

General description:

Digitale Plattformen erscheinen allgegenwärtig und unverzichtbar. Wir kommunizieren und informieren uns auf ihnen, streamen Filme, Serien, Podcasts und Musik über sie, kaufen ein, buchen unseren Urlaub und bewegen uns mit ihnen durch die Stadt. Für immer mehr Menschen bestimmen sie auch den Arbeitsalltag. Doch was sind Plattformen überhaupt? Woher kommt ihre Macht, welche Geschäftsmodelle liegen ihnen zugrunde, und wie haben sie unsere digitale Kultur verändert? Welche technischen, sozialen und kulturellen Bedingungen haben den Aufstieg der Plattformkonzerne ermöglicht, und warum erscheint es zunehmend schwieriger, sie einer demokratischen Kontrolle zu unterwerfen? Befinden wir uns im Zeitalter des Plattformkapitalismus oder führt uns die marktbeherrschende Stellung der Tech-Konzerne gar in neo-feudalistische Verhältnisse, wie manche argumentieren? Nicht zuletzt: Was bedeutet es für die ästhetische Produktion und kreative Arbeit, wenn sie nahezu ausschliesslich unter Plattformbedingungen stattfindet? Welche neuen kulturellen Genres und ästhetischen Formate sind mit dem Aufstieg der Plattformen entstanden, und wie verändern sie unsere Wahrnehmung?

Diesen Fragen widmet sich das Seminar anhand von ausgewählten Lektüren aus den Medien-, Sozial- und Kulturwissenschaften. Es geht um die Analyse konkreter Fallbeispiele ebenso wie um die Auseinandersetzung mit künstlerischen Arbeiten, die das Leben unter Plattformbedingungen reflektieren. In den Blick kommen dabei Plattformen wie Amazon, Google, Netflix, Instagram, TikTok, Uber oder Spotify, die wir in ihrer jeweiligen Spezifik und auf gemeinsame Strukturmerkmale hin untersuchen. Ebenso soll es darum gehen, was die aktuellen Entwicklungen der sogenannten «Künstlicher Intelligenz» für die Zukunft der Plattformen bedeuten und wie diese selbst die Voraussetzungen für den KI-Hype geschaffen haben, von dem sie nun von zu profitieren versuchen.

ECTS: 3

Notes:

Ein integraler Bestandteil des Seminars ist das zweitägige Symposium «Im Maschinenraum der Cloud. Perspektiven einer demokratischen Digitalisierung» des Zentrums Künste und Kulturtheorie (ZKK), das ganztägig am 29. und 30. Oktober 2026 im Cabaret Voltaire stattfindet und Expert:innen aus Wissenschaft, Kunst, Aktivismus und Journalismus versammelt, die gemeinsam über Alternativen zur Macht der Plattformen nachdenken. Ein Reader mit Texten und Materialien wird zu Beginn des Seminars bereitgestellt.

Learning Outcome:

Die Studierenden erwerben einen fundierten Überblick über aktuelle kultur-, medien- und sozialwissenschaftliche Theorien zu Plattformökonomien und digitalem Kapitalismus. Anhand konkreter Beispiele und Fallstudien analysieren sie, wie Formate, Distributionslogiken und Geschäftsmodelle digitaler Plattformen kulturelle Praktiken prägen. Zudem erfahren sie, wie künstlerische und gestalterische Ansätze auf diese Entwicklungen reagieren und diese reflektieren.

Module Images as evidence

06SM380p807 / Module

Description:

General description:

Immer häufiger ist zu hören, den Bildern sei nicht mehr zu trauen. Tatsächlich aber war die Beweiskraft technischer Bilder nie unumstritten. Zwar war bereits in den Anfängen der Fotografie im 19. Jahrhundert klar, dass hier ein völlig neues Mittel der Beweissicherung entstanden war. Doch zugleich wurden Fotografien von Beginn an retuschiert und manipuliert, und was sie tatsächlich zeigen und beweisen konnten, war stets Gegenstand widerstreitender Interpretationen. Unter digitalen Bedingungen hat sich diese Spannung verschärft: Während Smartphones und soziale Medien Aufnahmen von Polizeigewalt, Menschenrechtsverletzungen und Kriegsverbrechen in Echtzeit global zirkulieren lassen, steigern generative KI und andere digitale Tools die Möglichkeiten der Fälschung. Der Manipulationsverdacht ist damit heute nahezu zum Standardmodus der Bildwahrnehmung geworden.

Mit dem Aufkommen digitaler Medien haben sich allerdings auch neue Formen forensischer Analyse, kollektiver Bildinterpretation und vernetzter Beweissicherung etabliert, die sowohl auf die Absicherung von Beweisansprüchen wie auch auf die Aufdeckung von Manipulationen zielen. Rechercheagenturen wie Forensic Architecture oder Bellingcat rekonstruieren aus verstreuten Aufzeichnungen umstrittene Ereignisse, bildforensische Verfahren machen digitale Spuren der Bearbeitung lesbar, und in sozialen Medien entstehen spielerische wie problematische Formen pseudoforensischer Investigation.

In gemeinsamen Lektüren, Recherchen und Diskussionen widmet sich das Seminar solchen und weiteren künstlerischen, journalistischen, wissenschaftlichen und medialen Alltagspraktiken, in denen digitale Fotos und Videos als Beweise verhandelt werden. Es fragt nicht einfach, ob den Bildern noch zu trauen ist, sondern wie Vertrauen in die Beweiskraft von Bildern gegenwärtig erzeugt, bestritten und erschüttert wird.

ECTS: 3

Notes:

Das Seminar wird als Blockveranstaltung durchgeführt und zwar Mo 25.01.2027 bis Do 28.01.2027 jeweils von 9-16 Uhr .

Learning Outcome:

Die Studierenden erwerben einen fundierten Überblick über aktuelle bild- und medienwissenschaftliche Diskurse zu investigativer Ästhetik, "wilder Forensik" und digitaler Propaganda. Durch exemplarische Analysen erschließen sie sich die medialen und ästhetischen Strategien, mit denen Evidenz produziert, gesichert und behauptet wird, wo Bilder in digitalen Kulturen und Künsten als Beweise zirkulieren.

Module PhD Seminar Marketing

03SMDOEC1285 / Doktorandenseminar

Description:

General description:

The seminar is open to PhD students attached to the chair of Prof. René Algesheimer and invited guests. To be prepared for the seminar, students need to read up on central topics in the related literature. They are invited to present "work in progress". The work to be presented could either be early work in progress, or, in a state that allows for submission to an international peer-reviewed journal in the not-too-distant future.

ECTS: 3

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: René Algesheimer

Requirements:

Assessment: Participation, discussion and presentation of own research project.

Module Construction Research Week Kehlhof Ermatingen

06SM640p004 / Module

Description:

General description:

Das Feldpraktikum wird wahlweise durch den Fachbereich Prähistorische Archäologie und/oder den Fachbereich Mittelalterarchäologie in Form von mindestens einwöchigen Kursen organisiert. Diese Einheiten finden im In- oder Ausland statt und führen die Studierenden an die Praxis der archäologischen Arbeit im Kontext interdisziplinärer Forschung heran. Aufgrund der begrenzten Teilnehmerzahl wird auf das Modul "Externes Berufspraktikum" als Alternative hingewiesen.

ECTS: 3

Learning Outcome:

Die Studierenden beherrschen die Methoden und praktische Anwendungen archäologischer Feldarbeit. Je nach Kampagne werden Grundlagen der Ausgrabung, der Prospektion im Feld und der Bauuntersuchung vermittelt. Die Studierenden kennen gängige Abläufe für Feldprojekte und können diese umsetzen. Sie erlernen den Umgang mit Werkzeug, technischer Ausrüstung und Dokumentationsstandards. Die Studierenden erfassen mittels Fotografie, Zeichnung und Vermessung archäologische Befunde. Sie sind mit den erforderlichen Schritten und Tools für die Vorbereitung, Durchführung und Auswertung des Projektes sowie der Handhabung und Archivierung von Fundmaterial vertraut.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Carola Jäggi

Requirements:

Prerequisites: Fachliche Eignung und Motivation: Bewerbung mit Motivationsschreiben und CV. Überdurchschnittliches Engagement, Belastbarkeit und Interesse werden vorausgesetzt.

Assessment: dokumentierte praktische Arbeit

Der Leistungsnachweis (3 ECTS) umfasst eine selbstständige inhaltliche Vorbereitung, die aktive Teilnahme an der Bauforschungswoche sowie eine während der Woche in Gruppen erarbeitete und präsentierte Ergebnisdarstellung.

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Module Curating in Performance, Film and Art: Current Research

06SM380p809 / Module

Description:

General description:

Das Seminar dient dem Austausch über aktuelle interdisziplinäre Forschungsperspektiven zu ästhetischen Praktiken in Performance, Film und Kunst und geht besonders auf die öffentlich-diskursive, wissenschaftlich-reflexive und ästhetische Auseinandersetzung mit den Künsten im Ausstellungskontext ein.

Das Seminar widmet sich dabei den zeitgenössischen kuratorischen und künstlerischen Praktiken, die gesellschaftliche Umbrüche und Kontinuitäten reflektieren und aushandeln. Im Zentrum steht deshalb der Austausch über Methoden und Diskurse interdisziplinären Forschens an der Schnittstelle der Performance Studies, Filmwissenschaft und Kunst- und Ausstellungsforschung unter besonderer Berücksichtigung der Medien Film, Tanz, Performance und der kuratorischen Praxis im Kontext der documenta. Ausstellungen werden dabei als Medien der gesellschaftlichen Selbstverständigung und diskursive Plattformen verstanden.

Die Studierenden der kooperierenden Masterstudiengänge Literatur-Kunst-Medienkulturen der Universität Kassel, Theaterwissenschaft & Performance Studies und Szenische Forschung der Ruhr-Universität Bochum und Kulturanalyse der Universität Zürich erarbeiten zusammen Seminarstudien, die die aktuellen Entwicklungen und Perspektiven der Forschung gesellschaftlicher Transformationsprozesse und künstlerischer Praxis vertiefen. Im Rahmen der Seminartermine (siehe unten) werden auch Veranstaltungen von Performance und Theater in Bochum, Ausstellungen im Kunsthaus und im Migros Museum für Gegenwartskunst in Zürich wie auch das documenta Archiv und die Neue Galerie in Kassel besucht. Die Studierenden werden so konkret an das Praxisfeld der Künste und die institutionellen Kontexte herangeführt.

ECTS: 6

Notes:

Das Seminar findet exkursionsförmig als Blockveranstaltung an drei verschiedenen Veranstaltungsorten statt, nämlich an der Universität Zürich (Studienprogramm Kulturanalyse), an der Universität Kassel (Master Literatur-Kunst-Medienkulturen, Fachgebiet Kunst und Gesellschaft, documenta Institut) und an der Ruhr-Universität Bochum (Master Theaterwissenschaft & Performance Studies und Szenische Forschung, Institut für Theaterwissenschaft.).

Die Termine sind wie folgt geplant:

Di 13. Oktober 2026, 18 Uhr: Online-Einführung und Vorbereitung

Do 29., Fr 30., Sa 31. Oktober 2026: Universität Bochum

Do 19., Fr 20., Sa 21. November 2026: Universität Zürich

Do 10., Fr 11., Sa 12. Dezember 2026: Universität Kassel, documenta Institut

Learning Outcome:

Ziel des Seminars ist der Austausch über Methoden und Diskurse interdisziplinären Forschens an der Schnittstelle der Performance Studies, Filmwissenschaft und Kunst- und Ausstellungsforschung unter besonderer Berücksichtigung der Medien Film, Tanz, Performance und der kuratorischen Praxis im Kontext der documenta. Es geht darum, Ausstellungen als Medien der gesellschaftlichen Selbstverständigung sowie als diskursive Plattformen zu verstehen.

Module Current Topics in OT and Strategy — Emotional Foundations of Strategy (S)

03SMDOEC1286 / Doktorandenseminar

Description:

General description:

Distinguished Scholars Seminar with Timo Vuori (Aalto) on November 2-4, 2026

For more details, please visit our website:

<https://www.business.uzh.ch/en/research/professorships/om/teaching/PhDSeminar.h>

ECTS: 3

Notes:

Places in the seminar are limited. In order to be admitted to participate in this seminar, please send your application to om@business.uzh.ch by August 31, 2026.

Your application should include:

- (1) a motivation letter
- (2) your CV
- (3) transcripts of your grades

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: David Seidl

Requirements:

Assessment: Handing in an improved version of one of your papers or of your PhD thesis project (30 pages) or of a synthesis of the topics discussed in the seminar (minimum 5 pages).

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Second Fall Semester)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module AI 121MAT AI and Critical Thinking Seminar

07SMAI121MAT / Seminar

Description:

General description:

The course complements the lecture module AI111 with practical exercises.

It is offered to students from the Math and AMML study programs.

The course is designed to deepen the students' understanding of how to use artificial intelligence (AI) methods for scientific problems and to strengthen their critical thinking in using them. With a set of practical problems, the students are guided to apply different AI methods and tools to research-like problems. They are also encouraged to experiment with the abilities and limitations of the AI tools to develop a first-hand experience and understanding. The course is designed to enable productive and responsible use of AI.

ECTS: 1

Learning Outcome:

By the end of this module, students will learn how AI tools can be used in research-like problems. They will be able to critically evaluate the outcome of these tools and understand their capabilities and limitations.

Specific goals:

- Apply quantitative AI and Machine Learning tools to concrete research datasets and analyze the performance of these tools.
- Apply effective prompting of Large Language Models to analyze, investigate, and solve specific research-related tasks, such as brainstorming a problem solution, or writing a scientific text.
- Apply critical thinking to evaluate AI implementations in science.
- Identify appropriate and inappropriate uses of AI in the scientific method.
- Assess the reliability and limitations of AI-generated scientific outputs.
- Reflect on their experience and learning in a written essay.

Target Groups:

Math BSc students and AMML BSc students in their 1st semester, who have completed the AI Blockseminar AI111

Languages of Instruction:

Deutsch (mit Unterlagen in Deutsch und Englisch)

Module PHY556 Physics and Characterization of Emerging Solar Cells

07SMPHY556 / Lecture with Practical Exercises

Description:

General description:

This course introduces the physics behind how solar cells work, with a focus on the materials that make them—and other optoelectronic devices—possible. Instead of covering many different solar cell types, we focus on the fundamental concepts of how semiconductors convert sunlight into electricity, what limits their performance, and how these ideas apply across different technologies.

A special emphasis is placed on new and emerging solar cell materials, especially metal-halide perovskites. These materials have exciting and unusual properties, like combining ionic and electronic conductivity, which we'll explore in depth.

You'll learn how key processes—like absorbing light, generating voltage and current, and recombining charge carriers—connect to experimental techniques used to study them. These include spectrally resolved current-voltage measurements, steady-state and transient optical methods such as photo- and electroluminescence, and impedance spectroscopy.

The course combines theory with practical examples and hands-on exercises, using current research to show how these concepts are applied in real-world solar cell development.

ECTS: 3

Learning Outcome:

By the end of this course, students will be able to:

- Understand the fundamental principles of solar energy conversion.
- Identify the key material properties and mechanisms that influence the efficiency of photovoltaic energy conversion.
- Describe the unique properties of perovskite semiconductors.
- Develop strategies to electrically characterize solar cells and analyze the underlying mechanisms that affect their performance.

Target Groups:

Master students in solid state physics, electrical engineering, materials science PhD students working on solar cells or semiconductors

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Christof Aegerter

Requirements:

Prerequisites:

Knowledge of solid state and semiconductor physics

Assessment:

participation in the exercises and passed, documented by a brief presentation and an oral exam.

Module History of Linguistics: Greek Concepts of Language and Linguistics (Lecture Greek Linguistics) 06SM272p609 / Module

Description:

General description:

Die westliche Geschichte der Sprachwissenschaft beginnt in der griechischen Antike; aber sind Nachdenken bzw. Schreiben über Sprache und Sprachwissenschaft dasselbe? Welche Motive liegen griechischen Abhandlungen über Sprache und Grammatik zugrunde? Welche Bilder und Begriffe nutzen sie? Für welchen Zweck sind sie gemacht? In welchem Verhältnis stehen sie zu aktuellen Konzeptionen von Grammatik? - Abwechseln werden sich Themenüberblicke (Sprache und Philosophie; Alexandrinische Textkritik; Techne Grammatike; wichtige Begriffe und zugrundeliegende Vorstellungen) und kommentierte Einzellektüren exemplarischer Textpassagen (Apollonios Dyskolos, Herodian, Dionysios Thrax, Hesych, Platon, Aristoteles, Herodot u.a.m. [keine Vorbereitung durch Studierende notwendig]). Durch Rück- und Vorbezüge sowie Ausblicke (römische, mittelalterliche, altindische Grammatiktradition) und viel Textnähe entsteht ein - immer vorläufiges - Bild.

Module Digital and Digitised Ethnography. Shaping the Online Component of Ethnographic Research 06SMG90p112 / Module

Description:

General description:

Workshop rationale

Ethnographers today rarely work in environments untouched by digital communication. Whether a project is fully online or whether it folds a digital layer into otherwise face-to-face fieldwork, researchers need a working set of methodological choices, fieldwork practices, and ethical commitments suited to those settings.

This workshop is hands-on and oriented towards research practice. Participants should expect to engage with research design and critique, and to apply practical skills to their own research project. The workshop will consider ethical dilemmas, challenges and debates emerging from practice.

Who this workshop is for

Doctoral researchers in qualitative social science whose projects involve, or could involve, digital or digitised dimensions. Researchers working on:

- Full-online projects: researchers planning ethnography of online communities, platforms, or digitally-mediated practices.
- Hybrid or partly-digital projects: researchers whose primary site is offline, but whose participants live part of their lives online through messaging groups, social media, professional platforms, or other digital infrastructures.

How the workshop is structured

The workshop will address the following components: Foundations → Design → Fieldwork practice → Data and analysis → Ethics-in-practice → Synthesis. Roughly 70% of the time is spent on methods and practice; roughly 30% addresses ethics. Most sessions involve small-group work, platform walkthroughs, or work on participants' own projects.

What to bring

- A short description of your research project
- A laptop
- A small sample of digital material from your field-site, anonymised where appropriate (e.g. a few screenshots, a thread, a short video, a set of posts).
- Headphones, in case of video material

ECTS: 1

Notes:

Offered as part of the complementary training for PhD candidates in the Social Sciences.

Registration via e-mail to Dr. Doreen Spörer-Wagner (doreen.spoerer-wagner@phil.uzh.ch) not later than September 20, 2026.

Learning Outcome:

By the end of the two days, participants will be able to:

- Articulate the methodological assumptions of digital, digitised, and hybrid ethnographic designs and choose deliberately between them.
- Design and justify a fieldwork strategy for at least one digital site relevant to their project, including access, observation, interaction, and exit.
- Produce digital fieldnotes in ways that support later analysis.
- Identify the ethical questions specific to their site and platform and develop a defensible response, drawing mostly on the AoIR 3.0 framework.
- Complete a Digital Ethnography Research Design Canvas for their own project that integrates these decisions.

Module Internship Prehistoric History

06SM682p008 / Module

Description:

General description:

Das Feldpraktikum wird wahlweise durch den Fachbereich Prähistorische Archäologie und/oder den Fachbereich Mittelalterarchäologie in Form von mindestens einwöchigen Kursen organisiert. Diese Einheiten finden im In- oder Ausland statt und führen die Studierenden an die Praxis der archäologischen Arbeit im Kontext interdisziplinärer Forschung heran. Aufgrund der begrenzten Teilnehmerzahl wird auf das Modul "Externes Berufspraktikum" als Alternative hingewiesen.

ECTS: 3

Notes:

Die Bewerbungsmodalitäten wurden per Newsletter verschickt.

Learning Outcome:

Die Studierenden beherrschen die Methoden und praktische Anwendungen archäologischer Feldarbeit. Je nach Kampagne werden Grundlagen der Ausgrabung, der Prospektion im Feld und der Bauuntersuchung vermittelt. Die Studierenden kennen gängige Abläufe für Feldprojekte und können diese umsetzen. Sie erlernen den Umgang mit Werkzeug, technischer Ausrüstung und Dokumentationsstandards. Die Studierenden erfassen mittels Fotografie, Zeichnung und Vermessung archäologische Befunde. Sie sind mit den erforderlichen Schritten und Tools für die Vorbereitung, Durchführung und Auswertung des Projektes sowie der Handhabung und Archivierung von Fundmaterial vertraut.

Module Emerging Scholars Forum Provenance Research

06SM640p504 / Module

Description:

General description:

Das Forschungskolloquium versteht sich explizit als lehrstuhl-, instituts-, und universitätsübergreifende Nachwuchsveranstaltung, deren Schwerpunkt sich aus dem gerade sehr dynamischen Forschungsfeld der Provenienzforschung in der Schweiz ergibt. Dafür sind sowohl Beiträge willkommen, die sich mit der Herkunft und Geschichte von Kulturgütern auseinandersetzen, als auch solche, die deren Bedeutungs-, Funktions- oder Präsentationswandel in ihrem jeweiligen historischen Kontext thematisieren.

ECTS: 3

Notes:

Die Auswahl der Teilnehmenden erfolgt auf Grundlage einer kurzen Projektskizze der Master- bzw. Doktorarbeit.
Projektskizze an: Mattes Lammert mattes.lammert@khist.uzh.ch

Learning Outcome:

Das Nachwuchsforum Provenienzforschung bietet im Workshopformat Masterstudierenden und Doktoranden den Raum, um gemeinsam ihre aktuellen Arbeiten zu diskutieren und sich sowohl über spezifische inhaltliche als auch methodische Fragestellungen auszutauschen.

Merkmale:

Responsible instructor: Bärbel Küster

Requirements:

Prerequisites: Dieses Modul steht nur Master-Studierenden und Doktoranden offen. Es darf nicht von Bachelor-Studierenden als vorgezogenes Mastermodul gebucht werden.

Assessment: Referat

Grading Scale: Pass/Fail

Module Anthropology of Commodification

06SM721p132 / Module

Description:

General description:

Anthropology of Commodification explores how things, relationships, knowledge, bodies, emotions, nature, and the environment become part of market exchange. The course looks at how different spheres of life are marketized and under what conditions something becomes a commodity. It also examines the limits of this process, asking why certain forms of life and social interaction resist full commodification. Particular attention is given to the social, moral, and political consequences of extending market logic into diverse domains of life.

The course is grounded in key anthropological approaches that distinguish between gift and commodity, analyze commodity fetishism, and examine the social production of value. Rather than treating commodities as fixed properties of objects, we approach them as the result of historically and culturally specific processes. This perspective helps students understand commodities as part of broader social relations shaped by power, norms, and inequality.

ECTS: 6

Notes:

This module lasts two semesters. Classes only take place in the first semester, and the module can be completed after either one or two semesters. You can only complete the module after two semesters if you are also enrolled in the second semester.

Learning Outcome:

Throughout the semester, students engage with ethnographic studies of the commodification of bodies, labor, care, culture, nature, digital data, and other domains. The course analyzes how markets expand into intimate and sacred spheres, how moral boundaries around what may or may not be sold are negotiated and contested, and how market logics may be limited or reversed. By the end of the course, students will be able to connect theoretical concepts with empirical materials and apply anthropological tools to the analysis of contemporary market formations.

In addition, students will develop key academic skills:

- literature research and identification of relevant academic sources
- academic writing and development of structured arguments

Languages of Instruction:

Englisch

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Iuliia Koreshkova

Module Data, Code, and Swiss Politics: Practical R Programming Skills

06SM615p517 / Module

Description:

General description:

Bietet eine Einführung in die Programmierung und Informatik. Ziel ist es, besseren Code in R zu schreiben und in der Lage zu sein, nützliche neue Funktionen mit der gesamten R-Gemeinschaft zu teilen. Dabei verwenden wir viele Beispiele aus der Schweizer Politik.

ECTS: 6

Learning Outcome:

1. Die Studierenden können die grundlegenden Informatik-Konzepte (auf Softwareebene) erklären.
2. Die Studierenden können das Statistikprogramm R auf konkrete Probleme anwenden.
3. Die Studierenden können selbstständig 1-3 kleine Projekt in R entwickeln.

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Responsible instructor: Karsten Donnay
Lucas Leemann

Requirements:

Prerequisites: Es wird vorausgesetzt, dass die Teilnehmenden die Grundlagen von R bereits können. Beim Kurs handelt es sich nicht um einen Einführungskurs.

Assessment: Portfolio

Schriftliche Übung 75% / Mini Projekte 25%

Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden.

Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden.

Please note: All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed.

Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden. Please note: All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Request period: from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Module GEO 361 Specialisation in Human Geography: Critical Approaches to Urban Studies

07SMGEO361 / Lecture with Practical Exercises

Description:

General description:

This course explores key concepts and ideas from Urban Geography. It takes as its starting point that what happens in cities is the outcome of the relationships and power struggles between the public sector, private sector actors and communities. The course is therefore broken into three blocks to explore each of these in turn through real world examples in Zurich, as well as by putting Zurich into conversation with other cities globally. In 2025 the course is particularly focused on the urban challenge of housing.

ECTS: 5

Notes:

The Sustainable Development Goals (SDGs (<https://sdgs.un.org/goals>)) are a collection of 17 global goals interacting with each other, which are designed to be the "blueprint to achieve a better and more sustainable future for all". The 2030 Agenda for SDGs, is adopted by all United Nations Member States.

These SDGs are covered in this module: 10 & 11

Learning Outcome:

By the end of this course, students will be able to: Analyze the intended and potential outcomes of urban change, considering social, spatial, economic, and environmental impacts; Identify and articulate the interests and motivations of various urban stakeholders, including those supporting and opposing specific interventions; Apply key urban geography concepts to critically assess urban interventions and their implications. Develop and communicate a hypothetical urban intervention, demonstrating creativity and critical engagement with urban issues; Give, receive, and integrate peer feedback to strengthen the conceptual foundations and refine the quality of the written and presented work; Construct evidence-based arguments both visually and in writing, that connect theoretical frameworks with real or imagined urban transformations, and integrate peer feedback.

Target Groups:

Bachelor's and Master's students in geography or other social science programmes

Languages of Instruction:

English

Course Materials:

Available on Teams

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Frances Brill

Requirements:

Assessment:

This course is assessed through a portfolio developed cumulatively across the semester. Students are required to identify an urban problem and present a hypothetical urban intervention (an idea of how to change the city).

Grading criteria:

- Presentation of problem statement - pass/fail
- Presentation of core concepts to be addressed – presented either orally or written - pass/fail
- Class participation through discussion - pass/fail

Portfolio (graded):

- Clear problem statement, engagement with relevant literature from critical urban studies (25%)
- Outline of idea/proposition (5%)
- Discussion of idea's benefits and challenges, including a recognition of what problems it could create (70%)

Language of assessments: English

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Request period: from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Module Summer School in the History of the English Language

06SM440p009 / Module

Description:

General description:

The History of English summer school at the Centre of Medieval Studies, Cardiff University offers BA and MA students an opportunity to deepen their understanding of historical linguistics while also developing digital skills. Designed for those who have completed a basic course in the subject, this program also fosters collaboration between Cardiff and Zurich as well as other European universities participating in the scheme.

The Cardiff summer school (Monday 29 June-Friday 3 July 2026) features:

- A 5 day workshop with lectures, seminars, excursions, and free evenings
- Small-group learning (10-20 students, 3-5 per partner university)
- Teaching by experienced instructors from European universities

Key topics include:

- Anglo-Welsh history
- Standardization of English
- French, Italian, and Scandinavian influences on Middle English
- Corpus linguistics (Helsinki Corpus and other tutorials)
- AI and LLMs in historical linguistics

ECTS: 3

Learning Outcome:

Students will enhance their knowledge of (English) historical linguistics by exploring key topics in history, standardization, and language contact;

They will gain hands-on experience with corpus linguistics (e.g., Helsinki Corpus) and engage with AI and Large Language Models in historical linguistics, strengthening their ability to analyze linguistic data;

Through small-group learning and interdisciplinary instruction, students will develop collaborative research skills, engaging with experts from European universities.

Languages of Instruction:

Englisch

Merkmale:

Responsible instructor: Olga Timofeeva

Requirements:

Prerequisites: To book this module, students must have attended the summer school.

Assessment: Learning Portfolio: study diary and a critical evaluation of one of the sessions.
Deadline 15 September 2026.

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Module Writing for Impact: Leveraging AI Tools to Publish in High-Quality Journals

06SMG80p125 / Module

Description:

General description:

This course explores how AI tools can be used responsibly and strategically to support academic writing and publishing in high-quality journals. Participants will learn how to recognize AI-generated content, formulate effective prompts, engage in dialogic interactions with AI tools, and use AI across different phases of the writing process—from idea development and structuring to revision and refinement. The course also addresses journal guidelines on AI use, distinguishes between productive and problematic practices, and introduces multi-agent approaches to writing and feedback. By the end of the course, participants will be able to critically evaluate AI-supported writing practices and integrate AI tools transparently, ethically, and effectively into their own scholarly work.

Module The Making and Transformation of Geopolitical Order

06SM615p519 / Module

Description:

General description:

Das Modul fördert vertieftes Fachwissen in einem ausgewählten Forschungsfeld. Es vermittelt die Kompetenz, zu einem ausgewählten Thema Fragestellungen aus Sicht der Politikwissenschaft zu entwickeln und zu analysieren. Im Zentrum des Seminars stehen die politikwissenschaftliche und normative Analyse, das trennscharfe Analysieren der Begriffe in ihrer Anwendung auf empirische Studien und das Begründen politischer Sachverhalte. Die unterschiedlichen Themen werden theoretisch und empirisch vertieft.

ECTS: 6

Learning Outcome:

Students acquire the ability to:

- critically analyze competing theoretical approaches to geopolitical order, sovereignty, strategic rivalry, and international transformation;
- situate theoretical arguments and empirical studies within major debates in International Relations, geopolitics, security studies, and historical sociology;
- historically and comparatively contextualize geopolitical developments and transformations of international order;
- critically reflect on geopolitical narratives, strategic cultures, and memory politics in international affairs; critically evaluate qualitative and quantitative research approaches in International Relations and conflict research;
- independently formulate research questions and develop analytical arguments; engage constructively and reflexively with controversial theoretical and political perspectives.

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Simon Bornschieer

Requirements:

Assessment:

Portfolio

80% - Final Critical Essay

Students produce an independent research-based analytical essay engaging with relevant theoretical debates; empirical literature; methodological approaches; historical and/or contemporary case studies.

20% - Seminar Research Portfolio

The portfolio includes a selection of seminar-related assignments, such as:

weekly discussion memos;
methodological critiques;
analytical reflections;

short response papers;
discussion leadership;
annotated bibliography entries.

The portfolio consists of several seminar-related written and oral assignments, including:

short discussion memos on the required readings;
analytical reflections;
short methodological critiques;
moderation/leadership of seminar discussions;
participation in structured debates and analytical exercises.

Please note: All elements of the portfolio must be completed. Failure to complete any individual element will result in the portfolio being considered incomplete and the module therefore failed.

Module LSZ 113 Presenting Science

07SMLSZ113 / Doktorandenseminar

Description:

General description:

This is a highly interactive workshop about communicating and presenting research. We use a mix of practical exercises, discussion and presentation practice to help you strengthen your authentic professional voice and help you get your message across with confidence and impact.

- Gain an insight into the subtleties of verbal and non-verbal communication
 - Explore how balancing internal and external awareness can help you connect with your audience
 - Assess your own presentation strengths and weaknesses and try out new ways of communicating
- Build on and practice the English language of presentation
- Learn strategies for dealing with difficult or provocative questions
 - Design and use PowerPoint slides more effectively
 - Develop confidence and enjoyment in public speaking

Module Global Poverty and Economic Development – Cases (S)

03SM22MO0289 / Seminar

Description:

General description:

This seminar accompanies the lecture "Global Poverty and Economic Development".

Students who want to further explore the topics of the lecture are invited to apply for the seminar as well.

ECTS: 3

Notes:

Admission is by application only and the number of places in the seminar is limited. Students are expected to have completed the MA lecture "Global Policy and Development" by Prof. Lorenzo Casaburi in the past or attend his lecture in this semester.

Please apply for a place in the seminar by sending a short motivation e-mail along with transcript and a CV to natascha.baer@econ.uzh.ch before September 22, 2026.

Learning Outcome:

By the end of the seminar, students will be able to read and assess academic research papers in economics carefully and critically. They will learn to identify the research question, theoretical or empirical contribution, methodology, main results, and limitations of selected papers. Students will also practice presenting research clearly, leading discussion, relating papers to the broader literature, and developing possible extensions or follow-up research ideas. As a final output, students will formulate a short research proposal building on one or more papers discussed in the seminar.

Module MAT 535 Seminar Representation Theory of Compact Groups

07SMMAT535 / Seminar

Description:

General description:

This seminar develops the representation theory of compact groups. We begin with compact abelian groups, where irreducible representations are one-dimensional and Fourier theory provides a complete description. We then pass to the nonabelian case and study fundamental results such as Schur orthogonality, character theory, and the Peter-Weyl theorem. If time permits, we conclude with the classification of irreducible representations of concrete groups, such as $SU(2)$.

The seminar is closely related to “Analysis on Matrix Group” (Spring 2026), as the first part revisits and further develops several things introduced there. Students who have taken that course may find this seminar a natural continuation.

However, participation in that course is not required; the necessary background will be reviewed during the first part of seminar.

ECTS: 3

Notes:

Mathematical Fields: Algebra, Analysis

Learning Outcome:

Students will gain a solid understanding of the representation theory of compact groups, with particular emphasis on the structure theory and the example of $SU(2)$.

They will develop the ability to read advanced mathematical texts independently and to extract the central ideas. Through the preparation and delivery of their own talks, students will improve their skills in presenting mathematical material to an audience and in writing a clear and well-structured mathematical manuscript in LaTeX.

Target Groups:

Advanced BSc students and MSc students in Math

Course Materials:

The seminar will primarily follow Hall's Lie Groups, Lie Algebras, and Representations and Fulton–Harris' Representation Theory: A First Course.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Alexander Gorodnik

Requirements:

Prior Knowledge:

Analysis I-III and Linear Algebra I-II

Assessment:

- Prepare a talk and present it in class.
- Hand in a typed (LaTeX) version of the talk
- Be present throughout the semester and participate actively in discussions

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (Irregular)

Module Evolutionary Games and Cultural Evolution

06SMG61p108 / Module

Description:

General description:

Evolutionary game theory (EGT) studies the dynamics of evolving systems in which interacting agents have bounded rationality: the decisions individuals make are 'local' and may not be 'optimal' in a wider sense, yet they contribute to the dynamics of the overall system. The framework finds application in explaining cultural phenomena as diverse as the dynamics of opinions, social segregation, the propagation of fashion, and language change.

This course is an introduction to EGT as applied to the study of cultural evolution. Basic EGT and dynamical systems notions are illustrated with examples drawn from various disciplines. Special emphasis is placed on detailed explanation of mathematical concepts and techniques which often receive only cursory attention in introductory treatments. The goal is to train enough mathematical routine so that, having completed the course, students are able to read original research papers in this field.

The course is suitable for a wide audience from various disciplines ranging from social sciences to psychology to linguistics. Anybody with a keen interest in finding out how cultural change can be mathematically modelled is welcome.

ECTS: 2

Languages of Instruction:

Englisch

Merkmale:

Responsible instructor: Henri Kauhanen

Requirements:

Prerequisites: high-school level mathematics (basic algebra, differentiation of functions of one variable, the basics of probability) and a willingness to learn more

Assessment: learning portfolio

learning portfolio consists of a number of mathematical and conceptual/
philosophical exercises

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Module Advanced Social Sciences Statistics with R and AI

06SMG90p102 / Module

Description:

General description:

This course is designed for PhD students who want to use R to conduct research with current best practices. It is designed in three parts:

The first part establishes a powerful understanding of quantitative social scientific methods through simulation-based thinking. We start with a tour of "basic" advanced methods (marginal effects, multilevel regression, bayesian statistics) which are investigated through the lens of methodological simulation and epistemological consequences (p-hacking, garden of forking paths, multiverse, specification curves). Participants will gain a unified mental concepts that allow understanding and reasoning about statistical methods from end-to-end.

Building on the foundation of the first part, the second will cover two opposing ways of being statistically precise: Machine learning and AI on the one hand and causal inference on the other. We also cover sensitivity analyses as a strategy for reasoning about causal plausibility. Participants will gain the expertise to plan and implement own analyses using both.

The third part fast-forwards to the immense dilemma facing early career scholars today: Using AI and risking hallucinations and scholarly ostracism, or eschewing AI and being left behind. Instead of replicating moral public debates, we will take a sober "no holds barred" look at effective, ethical, and honest ways of using AI, validation, communicating its use, and defending against blanket criticism. This section is informed by the instructor's own extensive use of ML and AI over the past ten years, his work as journal editor and broad observation of tectonic shifts in social science.

ECTS: 1

Notes:

Offered as part of the complementary methodological training for PhD candidates in the Social Sciences.

Registration via e-mail to doreen.spoerer-wagner@phil.uzh.ch not later than December 15, 2026.

Learning Outcome:

Independently apply, modify, understand and criticize advanced procedures for data collection and analysis in R.

Merkmale:

Responsible instructor: Mark Eisenegger

Requirements:

Prerequisites: Basic knowledge in R (data import, data manipulation with Tidyverse, visualization in ggplot2) Basic knowledge in statistics (regression, clustering, factor analysis)

Assessment: schriftliche Übung

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Module Neural basis of speech and language disorders

06SM523p504 / Module

Description:

General description:

This seminar provides an introduction into the neural foundation of speech and language disorders as well as speech, language and communication alterations in mental health and neurological disorders. We will read and critically discuss current research papers in this area focusing for example on dyslexia, aphasia, speech communication difficulties due to age-related hearing loss, central auditory processing disorders, dementia, Parkinson's disease, schizophrenia, ADHD, autism spectrum disorder with a focus on the whole lifespan. We will work through studies which are based on experiments, which involve neuroscientific methods such as electroencephalography (EEG) and structural and functional neuroimaging (MRI) to assess potential neurobiological foundations of the underlying speech and language pathology/alteration.

ECTS: 3

Learning Outcome:

(a) General understanding of the neural foundation of communication through speech and language and major disorders thereof and becoming familiar with key terms, methods and studies in the field (b) Discovering theoretical and original peer-reviewed journal articles around speech and language pathology with a focus on neuroscientific methods (e.g., EEG, MRI) and learning how to critically read and discuss them and present them orally and in written texts (c) understanding the most important methods (e.g., behavioral testing, EEG, MRI) in the field

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Nathalie Régine Giroud Rickenbacher

Requirements:

Prerequisites:

Successfully completed module "The neural foundation of speech"

Assessment:

Portfolio: (a) oral presentation and handout 45% (b) short paper on design of assessment or intervention 45% (c) oral contributions during discussions 10%

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can't be repeated

Module Digital Literature: Forms, Media, Practices

06SM360p558 / Module

Description:

General description:

Das Seminar widmet sich digitaler Literatur als einem historisch variablen Phänomen, das sich seit den 1990er Jahren in unterschiedlichen medialen und ästhetischen Ausprägungen nachvollziehen lässt: von electronic literature, Hyperfiction, Cybertexts und Netzliteratur bis hin zu generativer Literatur und den aktuellen Erzählverfahren in den sozialen Medien. Ziel des Seminars ist es, unterschiedliche Ausprägungen digitaler Literatur historisch einzuordnen, zentrale Praktiken und theoretische Zugänge kennenzulernen sowie ein methodisches Instrumentarium für die Analyse digitaler literarischer Formen zu entwickeln. Ebenso werden wir diskutieren, wie digitale Literatur etablierte Kategorien der Literaturwissenschaft - darunter Werk- und Textbegriffe sowie Konzepte von Autorschaft, Medialität, Gattung, Archiv und Lektüre - herausfordert und erweitert.

ECTS: 3

Learning Outcome:

Die Studierenden verfügen über vertiefte Kenntnisse in einem spezifischen Teilgebiet der Neueren deutschen Literaturwissenschaft. Basierend auf dem aktuellen Stand der Forschung können sie eigene literaturgeschichtliche und -wissenschaftliche Fragestellungen bearbeiten und/oder in einem praxisbezogenen Zusammenhang darstellen.

Module Large Language Models for Social Science Research

06SMG90p113 / Module

Description:

General description:

A hands-on workshop designed for PhD students in the social sciences. The course introduces Large Language Models (LLMs) as practical research tools, from conceptual foundations to autonomous research workflows. No prior programming experience is strictly required, though basic familiarity with Python is a plus.

Session 1: What Are LLMs and What Can They Do for Social Scientists?

- A concise history of language models: from word embeddings to transformer-based architectures
 - What LLMs can and cannot do: capabilities, limitations, and hallucinations
 - Survey of recent research using LLMs across the social sciences
- Hands-on: comparing model outputs on a simple social science task, with a live demonstration asking the same question under different sampling parameters

Session 2: Prompting, Writing, and Reproducibility

Prompt design is the prerequisite for everything that follows. This session combines prompting fundamentals with the most immediate use case (writing and literature work) and the standards needed to make LLM-based research reproducible.

- Designing effective prompts: zero-shot vs. few-shot, structured constraints, role and context framing, adversarial prompting (asking the model to challenge its own outputs)
 - LLMs as writing assistants: drafting, restructuring, summarizing, translating
 - Literature review workflows: search, screening, synthesis
 - Coding assistance for analysis (writing, debugging, and documenting research code)
 - Reproducibility for LLM-based research: model and version pinning, sampling parameters (temperature, seed) and how to report them, archiving prompts and raw outputs, what belongs in supplementary materials
 - Norms and transparency: disclosure, authorship, and emerging journal/conference policies
- Hands-on: iterating on a prompt for a piece of the PhD students' own work in progress (a draft paragraph, a literature note, or an analysis script), and producing a minimal "reproducibility bundle" (prompt + parameters + outputs + metadata)

Session 3: Text Annotation with LLMs

- Why LLM-based annotation matters for social science research
 - Calling an LLM via API: building a lightweight annotation pipeline in Python
 - Measuring and reporting reliability: inter-coder agreement, construct validity, transparency standards
- Hands-on: classification exercise on real social science text data

Session 4: Exploring Structured Data with an AI Agent

Focus: tabular and structured datasets (CSV, survey data, administrative records, etc.).

- What is an AI agent? From chat interfaces to autonomous tool-using systems
 - Using an agent to perform exploratory data analysis: loading, cleaning, visualizing, and interpreting datasets
 - When to trust agent outputs and when to intervene manually
- Hands-on: students bring a structured dataset and use an agent to generate summary statistics, plots, and preliminary insights

Session 5: Building and Analyzing Unstructured Corpora with an Agent

Focus: constructing an unstructured text corpus from OCR or audio transcription, then analyzing it.

- Source materials: scanned documents, image-based PDFs, archival materials, and audio recordings
 - From raw inputs to clean text: OCR and audio transcription pipelines, common error modes, and quality checks
 - Building a usable corpus: cleaning, segmentation, metadata
 - Moving from corpus to analysis: using an agent for exploratory NLP on the constructed corpus
- Hands-on: end-to-end mini-project - take a small set of scans or audio files through transcription, corpus construction, and a first analytical pass with an agent

ECTS: 2

Notes:

Offered as part of the complementary training for PhD candidates in the Social Sciences.

Registration via e-mail to Dr. Doreen Spörer-Wagner (doreen.spoerer-wagner@phil.uzh.ch) not later than August 30, 2026.

Learning Outcome:

This workshop focuses on the practical use of LLMs in research workflows. It is not a critical course on AI: questions of bias, environmental impact, labor, and epistemic risks will be raised along the way when relevant.

Merkmale: Target Group: Suitable for English Speakers

Module External Internship

06SM640p701 / Module

Description:

General description:

Die Studierenden bewerben sich eigenständig bei einschlägigen Institutionen (z.B. Kantonsarchäologien, Grabungsfirmen, Denkmalpflege oder Museen) für ein "externes" Praktikum. Der Umfang des Praktikums umfasst wenigstens zwei Wochen zu 100% Arbeitszeit. Nach Zusage der Praktikumsstelle vereinbaren die Studierenden mit dem Modulverantwortlichen ein Praktikumskonzept. Ziel des Praktikums ist der Einblick in die archäologische Arbeitspraxis ausserhalb der Universität. Es obliegt den Studierenden, nach Absolvierung die erforderlichen Unterlagen (schriftliche Bestätigung der anbietenden Organisation, Leistungsnachweise gemäss Praktikumskonzept) einzureichen.

ECTS: 3

Learning Outcome:

Die Studierenden besitzen eine konkrete Vorstellung eines möglichen Berufsfeldes im Bereich der Archäologien. Sie verfügen über erste Erfahrungen in der beruflichen Praxis ausserhalb der Universität in mindestens einem der Bereiche Ausgrabung, Prospektion, Bauuntersuchung, Grabungsauswertung, Denkmalpflege oder Öffentlichkeitsarbeit.

Module Principles of Private Law

02SM90WM116 / Course

Description:

General description:

In dieser Vorlesung werden zentrale Prinzipien des Privatrechts auf der Grundlage von wissenschaftlichen Texten und von Gerichtsentscheiden erörtert und vertieft.

Auf Rechtsgebiete und Studienfächer bezogen stehen im Zentrum: der Einleitungstitel des ZGB; der Allgemeine Teil des Obligationenrechts; die allgemeinen Bestimmungen des ZGB zu den juristischen Personen; die Prinzipien des Sachen- und des Immaterialgüterrechts; Aspekte des Familien- und des Erbrechts; die allgemeinen Lehren des Gesellschaftsrechts; die Bezüge des Privatrechts zum Verfahrensrecht, zum Zwangsvollstreckungsrecht, zum öffentlichen Recht und zum Strafrecht; Methodenlehre im Privatrecht.

Einzelheiten zum Ablauf und Inhalt der Vorlesung können dem Kurzaushang (https://www.ius.uzh.ch/dam/jcr:b3e31dbd-b3b7-40ec-b077-036d1c26ed92/Aushang_Vorlesung%20Prinzipien_HS26_kurz.pdf), dem Merkblatt (<https://www.ius.uzh.ch/dam/jcr:c1e9bae6-77dc-4278-9187-1fb6503fe54a/Merkblatt.pdf>) und den verschiedenen Veranstaltungsprogrammen (<https://www.ius.uzh.ch/de/staff/professorships/alphabetical/vogt/lehrveranstaltungen/vorlesungen/Prinzipien-des-Privatrechts.html>) auf der Lehrstuhl-Website entnommen werden.

ECTS: 6

Target Groups:

Masterstudierende

Course Materials:

Die Programme zu den einzelnen Veranstaltungen, die insbesondere Themenvorschläge für die Präsentationen enthalten, werden im August 2026 auf der Website des Lehrstuhls Vogt zugänglich gemacht. Die Lektüretexte für die einzelnen Veranstaltungen werden Ende September 2026 festgelegt und bekannt gegeben.

Siehe hierzu im Übrigen das Merkblatt (<https://www.ius.uzh.ch/dam/jcr:c1e9bae6-77dc-4278-9187-1fb6503fe54a/Merkblatt.pdf>) auf der Lehrstuhl-Website.

Merkmale:

Responsible instructor:

Hans-Ueli Vogt

Requirements:

Prerequisites:

Abschluss der Module Privatrecht II und Privatrecht III oder einer vergleichbaren Veranstaltung an einer anderen Universität

Prior Knowledge:

Kenntnisse des Privatrechts

Assessment:

Der Leistungsnachweis (6 ECTS) besteht aus einer Präsentation sowie der mündlichen Beteiligung während der gesamten Vorlesung. Einzelheiten, insbesondere zur Präsentation, sind dem Merkblatt (<https://www.ius.uzh.ch/dam/jcr:c1e9bae6-77dc-4278-9187-1fb6503fe54a/Merkblatt.pdf>) auf der Website des Lehrstuhls zu entnehmen.

Module Transparent and Reproducible Research, Part I: Fundamentals

06SMG00p111 / Module

Description:

General description:

Many published research results cannot be reproduced. Issues include lack of transparency, poor study design and methodology, and questionable research practices. As part of an ongoing reckoning with poor levels of reproducibility, it is becoming normative to 'follow open and reproducible research practices' in various research fields. But what does it mean for research to be 'reproducible' and which practices actually increase reproducibility?

In Part I of this course (Fundamentals) we start with a fundamental point of view on reproducibility and discuss the relevant concepts and assumptions. You learn how to increase the transparency of your research through applying Open Science principles including how to manage and share data effectively.

Students will prepare a short presentation on one article from the course literature list. Part I will encompass one full course day.

Anyone interested in additional topics in study design and reporting can attend in Part II of this course (Quantitative Aspects).

Instructors (Center for Reproducible Science and Research Synthesis, CRS)

- Gorka Fraga Gonzalez
- Rachel Heyard, CRS
- Fabio Molo, CRS
- N.N.

ECTS: 1

Notes:

Attendance at Part 1 is a prerequisite for participation in Part 2.

Registration via e-mail to doreen.spoerer-wagner@phil.uzh.ch not later than October 27, 2026.

Learning Outcome:

- Understand concepts and different aspects of reproducibility;
- Know about 'failure modes' of science (e.g. publication bias, questionable research practices) and understand how to avoid them in your own research;
- Learn how to effectively manage and share research data

Languages of Instruction:

English

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Doreen Spörer-Wagner

Requirements:

Prerequisites:

Part I is aimed at PhD students in both qualitative social sciences and quantitative empirical research fields.

Assessment: presentation and commentary to a presentation or participation at a scientific discussion

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Booking Deadline/Period: not bookable

Cancellation Deadline: not cancelable

Module Transparent and Reproducible Research, Part II: Quantitative Aspects

06SMG00p112 / Module

Description:

General description:

Many published research results cannot be reproduced. Issues include lack of transparency, poor study design and methodology, and questionable research practices. As part of an ongoing reckoning with poor levels of reproducibility, it is becoming normative to 'follow open and reproducible research practices' in various research fields. But what does it mean for research to be 'reproducible' and which practices actually increase reproducibility?

Whereas Part I of this course covers the fundamentals of reproducibility, Part II focuses on study design and reporting. You learn the epistemological and practical motivations for writing and pre-registering an analysis plan and using registered reports. We cover typical biases and different 'failure modes' of science (like publication bias or questionable research practices) and how to consider them in your research. This track also covers techniques to improve computational reproducibility: versioning with git and dynamic reporting with R and Quarto, and software containerization with Docker. Participants will bring their laptops, and together we set them up to produce a minimal reproducible manuscript.

Students submit an analysis plan for one of their (planned or ongoing) research projects.

Anyone interested in the fundamentals of reproducibility only, can attend Part I of this course (Fundamentals).

Instructors (Center for Reproducible Science and Research Synthesis, CRS)

- Gorka Fraga Gonzalez
- Rachel Heyard, CRS
- Fabio Molo, CRS
- N.N.

ECTS: 1

Notes:

Students will need to bring a laptop to class (where they have admin or equivalent privileges).

Attending Part 1 is a prerequisite for attending Part 2.

Registration via e-mail to doreen.spoerer-wagner@phil.uzh.ch not later than October 27, 2026.

Learning Outcome:

- Understand concepts and different aspects of reproducibility;
- Know about 'failure modes' of science (e.g. publication bias, questionable research practices) and understand how to avoid them in your own research;
- Learn how to effectively manage and share research data;
- Understand principles of the design, pre-registration, and reporting of a study;
- Practice computational reproducibility techniques, including git and dynamic reporting

Module Data Visualization: Principles, Practices and Applications

06SMG90p103 / Module

Description:

General description:

This seminar focuses on the principles of data visualisation and the creation of visual representations of data. We explore the cognitive underpinnings of graphical representation, highlight elements of good and bad data visualisations, and identify trends in the field. Using the ggplot framework, participants will engage in a balanced mix of hands-on exercises and instructor-led sessions to create both basic and advanced graphs, including coefficient plots, heat maps, geographic maps, and interactive visualisations. We will also discuss the customisation of visualisations and address challenges related to publishing, with best practices for reports, articles, and presentations.

Preparatory Online Meetup (09 Nov 2026, 9:00-12:00h): To emphasize the hands-on workshop character of this seminar, a brief online session will be held beforehand. This allows us to gather and integrate your specific needs, particularly regarding the intersection of data visualisation, AI, and research ethics, ensuring the seminar is highly relevant to your work.

Post-Workshop Showcase (23 Nov 2026, 8:30-12:30h): To round off the learning experience, we will reconvene for a final online session after the main seminar. This provides a collaborative space for you to present your implemented visualisations, receive constructive feedback from the instructor and peers, and draw inspiration from the diverse applications created by the rest of the class.

ECTS: 1

Notes:

Offered as part of the complementary methodological training for PhD candidates in the Social Sciences.

Registration via e-mail to doreen.spoerer-wagner@phil.uzh.ch not later than October 12, 2026.

09 Nov: online

16 Nov: AFL-E-003

23 Nov: online

Learning Outcome:

By the end of the seminar, participants will have acquired practical skills to effectively communicate data insights using visualisations, while benefiting from individual feedback tailored to different experience levels.

Module MAT 749 Mathematical Theory of General Relativity

07SMMAT749 / Lecture with Practical Exercises

Description:

General description:

In the theory of general relativity space and time are unified as one geometric entity---spacetime---which is mathematically described as a 3+1 dimensional Lorentzian manifold. The dynamics of spacetime are governed by the celebrated Einstein equations. In this course, we will develop the relevant concepts from analysis, PDE and differential geometry to formulate the precise mathematical framework of general relativity and study some of its most striking predictions, including black holes and gravitational waves.

ECTS: 9

Notes:

Mathematical Fields: Analysis Geometry/Topology

Learning Outcome:

- Use the basic language and techniques of Lorentzian geometry.
- Formulate the Cauchy problem for the Einstein equations.
- Derive robust energy estimates for linear wave equations on curved spacetimes.
- Analyze the geometry of the Schwarzschild solution and related spherically symmetric spacetimes.

Course Materials:

- Wald, Robert; General relativity, The University of Chicago Press, 1984
- Stephen W. Hawking and George F.R. Ellis, The large scale structure of space-time. Cambridge University Press, 1973.
- Ringström, Hans; The Cauchy problem in General relativity, ESI Lectures in Mathematics & Physics, 2009.
- Barrett O'Neill, Semi-Riemannian geometry with applications to relativity. Academic press, 1983.
- John M. Lee, Introduction to Riemannian manifolds. Springer, 1997.

Merkmale:

Responsible instructor: Christoph Kehle

Requirements:

Prior Knowledge: Analysis/PDE; some familiarity with differential geometry

Assessment:

- (1) Midterm on 11. November and
- (2) Oral Exam in the last week of the semester
accounting each for 50% of the grade
- (3) Exercise Performance (details in lecture)

Language of Assessment: English

Module Human Evolutionary Eco Physiology Experiential Field Course

07SMBIO546 / Block Course

Description:

General description:

Throughout the evolution of our species, natural environments have provided the context within which natural selection has acted to shape our biology. During the last 200-300 years, however, urban centres have rapidly become our primate habitat. This change may have created an evolutionary mismatch; a situation in which health and evolutionary fitness may be negatively influenced by an incompatibility between the environment Homo sapiens are primarily adapted to and the habitat we currently occupy. This one-week intensive field course is embedded within a larger experimental research project examining how exposure to natural environments influences human biological function (immune, reproductive, physical, cognitive), psychophysiological state and the microbiome. Using an experiential learning design, students will serve as research participants while also acting as investigators. Through daily journal clubs and seminar discussions, students will critically engage with primary literature. Working collaboratively, they will also analyse anonymised class datasets and compare their findings to published research, culminating in an integrative presentation that situates their lived field experience within the broader scientific literature on environmental influences on human health and function.

ECTS: 2

Notes:

Field Course in Forest of Zürichberg, above UZH Irchel Campus from 24.08.2026 - 30.08.2026.

Registration by Email to colin.shaw@iea.uzh.ch

Learning Outcome:

Upon completion of this course, students will have gained experience in how to:

- Critically evaluate, present, and discuss academic research within the field of human evolutionary ecophysiology.
- Collect and analyse physiological and psychological data in a field-based experimental context.
- Integrate experiential observations with quantitative evidence to produce a research presentation that compares original field data to existing literature and articulates the implications for human health in contrasting environmental contexts.

Module Making Inequality: Social Stratification and Socialization in Contemporary East Asian Societies
06SM290p720 / Module

Description:

General description:

Vermittlung eines fundierten Einblicks in einen spezifischen Themenbereich oder eine Problemstellung der sozialwissenschaftlichen Analyse Japans und der zur wissenschaftlichen Erschliessung notwendigen einschlägigen Theorien und Methoden unter Hinzuziehung originalsprachiger Quellen und Forschungsliteratur.

ECTS: 6

Learning Outcome:

Dem neusten Forschungsstand entsprechend breites und detailliertes Wissen sowie kritisches Verständnis der westlichen und japanischen Forschungsergebnisse und Fachdiskurse zu einem aktuellen Thema der sozialwissenschaftlichen Japanforschung.

Languages of Instruction:

Deutsch oder Englisch - siehe Lehrveranstaltung(en)

Merkmale:

Responsible instructor: David Chiavacci

Requirements:

Assessment: Portfolio (in-class presentation (including critical discussion of weekly readings) 30%; written take-home assignment 70%)

Specific details and instructions will be delivered to students in the first class.

In order to pass the module all elements of the portfolio must be completed.

Grading Scale: 1-6, Half Grades Given

Module Research Colloquium for Graduation Candidates

06SMG31p002 / Module

Description:

General description:

Das Forschungskolloquium dient Abschlusskandidat*innen dazu, in Form von Vorträgen, Präsentationen und Diskussionen den jeweiligen Stand ihrer Qualifikationsarbeit vorzustellen. Nach einer Vorbesprechung wird ein Semesterprogramm erstellt, das auch Lektüresitzungen zu Methoden und Theorien enthalten kann. Vorschläge von Teilnehmenden sind willkommen.

ECTS: 4

Learning Outcome:

Projektvorstellung in einem z.T. interdisziplinären Rahmen. Fähigkeit zur Diskussion und Formulierung konstruktiver Feedbacks für alle Vortragenden. Analyse von Problemen bei der Projektentwicklung und Entwicklung von Lösungsansätzen. Diskussion von forschungsorientierten Recherchepraktiken und Überlegungen zum Einsatz digitaler Recherche- und Forschungsinstrumente.

Module PhD Research Colloquium Cultural Analysis

06SMG35p001 / Module

Description:

General description:

Das kulturanalytische Forschungskolloquium Doktorat bietet Promotionsstudierenden des Doktoratsfachs Kulturanalyse die Gelegenheit, Themen und Thesen des Dissertationsprojekts vor- und zur Diskussion zu stellen. Ergänzend werden Einblicke in aktuelle kulturanalytische Forschungstendenzen, gegenwärtige Debatten wie auch in den öffentlichen und wissenschaftlichen Diskurs über Kultur gewährt.

ECTS: 3

Learning Outcome:

Das Modul gibt den Doktorierenden die Möglichkeit, die Konzeption und Durchführung ihrer Forschungsarbeit zu präsentieren und diese mit ihren Kolleg*innen und Dozierenden zu diskutieren. Dabei werden auch aktuelle Positionen kulturanalytischer Forschung sowie über die Aktualität und Relevanz kulturanalytischer Forschung diskutiert.

Module Kate Manne: Misogyny

06SM160p020 / Module

Description:

General description:

Dieses Modul besteht aus einem auf Vorschlag von Studierenden hin durchgeführten Tutorat zu einem selbst gewählten Thema. Unter der Leitung der Tutorin oder des Tutors und in Absprache mit einer Lehrstuhlinhaberin oder einem Lehrstuhlinhaber erarbeiten Studierende in wöchentlich stattfindenden zweistündigen Sitzungen einen Text oder ein Thema. Dabei muss jede Teilnehmerin und jeder Teilnehmer mindestens ein Referat übernehmen. Fünfseitige Zusammenfassungen der Referate und Teilnahmelisten werden bei der zuständigen Lehrstuhlinhaberin bzw. bei dem zuständigen Lehrstuhlinhaber anschliessend zur Leistungsüberprüfung eingereicht.

ECTS: 3

Learning Outcome:

Fähigkeit, zur gemeinsamen Analyse von Texten zum Thema des Tutorats; Stärkung der Diskussions- und Argumentationsfähigkeit; Fähigkeit, zur selbständigen Erarbeitung philosophischer Theorien und Argumentationen

Module Replication Lab in Macroeconomics and Finance (S)

03SM22MO0290 / Seminar

Description:

General description:

In this seminar, we replicate the key results from prominent recent studies in empirical macroeconomics and finance. The course is open to ambitious MA students. Special emphasis is put on a step-by-step understanding of the empirical analysis. What choices are the authors making? How robust are the results? How would the result change with alternative methods or empirical approaches? Are there straightforward extensions? By replicating others' research, students learn to do their own research, identify open questions and topics for MA theses. In the process, expand their knowledge of empirical methods and of essential research tools such as R, STATA, Python, Julia or MATLAB. They also familiarize themselves with some of the essential infrastructure underpinning replicable research, notably git and container-based work-flows.

ECTS: 3

Notes:

Admission is by application only and the number of places in the seminar is limited to 10 students. Students are expected to have completed the compulsory lectures of their respective MA degree (International Macro is a requirement for Econ-MA students, Asset pricing is a requirement for MA students from Finance. Preference will be given to students who have excellent grades in quantitative subjects and extant programming skills in R, Stata, Python, MATLAB and/or Julia.

Please apply for a place in the seminar by sending a short motivation e-mail along with transcript and a CV with extant skills to cornelia.metzler@econ.uzh.ch before August 30, 2026.

The seminar takes place at ZUH-F-02 (Zürichbergstrasse 14).

Target Groups:

MA Students Economics and Finance

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Mathias Hoffmann

Requirements:

Prerequisites:

Successful completion of MA compulsory modules

Assessment:

Assessment will be based on participation in class (20%), the presentation/discussion lead (40%), and a final report (40%) in which the student summarizes and extends the result of the paper for which (s)he led the discussion. The report has to be accompanied with the students' own version of the replication codes and data which have to be uploaded to the shared gitlab repo.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Open Science and Meta-Science for Communication Research

06SM254p605 / Module

Description:

General description:

This seminar introduces master's students in communication to open science and the broader reform movement that has reshaped psychology and related social science disciplines. Rather than treating open science as a checklist, the course examines key arguments about evidence, transparency, and research credibility, with attention to how they apply in communication research. Students will gain hands-on experience in preregistration, reproducibility, and meta-research. The course is designed to help students build the skills to design, document, and evaluate research according to contemporary standards of openness and rigor.

ECTS: 6

Learning Outcome:

wird je nach semesterspezifischem Angebot ausgearbeitet

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Responsible instructor: Frank Esser

Requirements:

Prerequisites: Dieses Modul steht nur Master-Studierenden offen. Es darf nicht von Bachelor-Studierenden als vorgezogenes Mastermodul gebucht werden.

Assessment: Portfolio

Class participation: 15%
Individual reproducibility report: 25%
Group capstone project: 60%

Grading Scale: 1-6, Half Grades Given

Repeatability: Can't be repeated

Organisation:

Offer pattern: 1 Semester (One-Time)

Request period: from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Place allocation at the latest: Sa 29.08.2026 22:00

Waiting list progression period: from Sa 29.08.2026 22:00 to Do 10.09.2026 24:00

Cancellation period: from Sa 29.08.2026 22:00 to So 13.09.2026 24:00

06SM254p130 / Module

Description:

General description:

Die Seminare dienen der wissenschaftlichen Vertiefung unterschiedlicher Anwendungen in kommunikationswissenschaftlichen Kernbereichen. Sie zeichnen sich durch ein grosses Mass an Interaktivität aus und schaffen Optionen für ein lösungsorientiertes Lernen in kleineren Gruppen.

ECTS: 6

Learning Outcome:

Die Studierenden vertiefen und erweitern ihre Anwendungs- und Vermittlungskompetenzen in unterschiedlichen Kernbereichen der Kommunikationswissenschaft bzw. der Medienforschung. Sie können den Forschungsstand eines Themas eigenständig recherchieren, aufarbeiten und mit Hilfe sozialwissenschaftlicher Theorien und Methoden bearbeiten. Sie wissen um die (Team)Arbeit in Forschungsprojekten zur Erstellung von Präsentationen in mündlicher und/oder schriftlicher Form.

Module Persuasion in Health Communication

06SM254p060 / Module

Description:

General description:

This course introduces the major theories of persuasion and their application to health communication. Students will examine how theory-based message strategies can shape health attitudes, intentions, and behaviors, and will learn to design effective messages for various health contexts. The course emphasizes the role of persuasive communication in promoting individual and public well-being.

ECTS: 3

Learning Outcome:

Die Studierenden erwerben spezifische Analyse- und Reflexionskompetenzen, die es ihnen ermöglichen, Theorien, Studien und Aussagen im jeweiligen Fachgebiet kritisch zu vergleichen und zu bewerten. Den Studierenden wissen, auf welchen Grundlagen spezifischere Inhalte aufbauen. Durch das Herstellen von Bezügen zum Methodenwissen (wo immer möglich) können Studierende die vermittelten Inhalte in einem grösseren Zusammenhang betrachten.

Module Institutional Investing: Case Studies (S)

03SM22BO0158 / Seminar

Description:

General description:

Im Seminar setzen sich die Studierenden mit dem Anlageprozess von institutionellen Investoren wie beispielsweise Pensionskassen auseinander. In praxisbezogenen Case Studies werden Fälle aus folgenden Bereichen bearbeitet und präsentiert:

- (1) Strategic Asset Allocation / Governance
- (2) Nachhaltigkeit / Engagement
- (3) Asset Manager Selection
- (4) Investment Controlling

ECTS: 3

Notes:

Es ist eine Zweitmeldung über OLAT erforderlich. Den Link finden Sie unter Links.

Obligatorische Kick-off-Veranstaltung online am 16.09.2026, 17:00 Uhr. Eine erste Auswahl der Teilnehmenden erfolgt anhand fachlicher Kriterien, danach entscheidet das Los.

Die Teilnehmerzahl ist begrenzt. Maximal 36 Teilnehmer.

Bewerbungsschluss 13. September 2026.

Link: <https://lms.uzh.ch/url/RepositoryEntry/17892114505>

Learning Outcome:

Die Seminarteilnehmenden können praxisbezogene Fragestellungen von institutionellen Investoren verstehen, bearbeiten, lösen und im Rahmen einer Präsentation einem Gremium von Spezialisten vorstellen.

Target Groups:

Studierende im 5./6. Bachelorsemester mit Hauptfach Finance

Course Materials:

Wird zu gegebenem Zeitpunkt auf OLAT aufgeschaltet.

Merkmale:

Responsible instructor:

Markus Leippold

Requirements:

Prior Knowledge:

Besuch der Vorlesung «Asset Management: Investments»

Assessment:

Schriftliche Lösung der Fallstudie in Form von Präsentationsfolien (50%) und mündliche Erläuterung der Fallstudienlösung (50%) – Termin der Präsentationen: 28.01.2027 und 29.01.2027.

Die Teilnahme am Kick-off ist obligatorisch.

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Module Elective Module: Traces, Speed & Science: Hands-on in Legal and Traffic Medicine
04SM26MAS004 / Sonstiges

Description:

General description:

Im Modul sollen die Bereiche klinische Rechtsmedizin, postmortale Rechtsmedizin, 3-D-Rekonstruktion und Verkehrsmedizin inklusive der forensischen Pharmakologie und Toxikologie und forensischen Genetik fallbasiert näher beleuchtet werden. Diese inhaltliche Aufteilung soll sich auch in der Grobgliederung des Moduls (Block Verkehrsmedizin, Block klinische Rechtsmedizin, Block postmortale Rechtsmedizin, Block 3-D-Rekonstruktion) widerspiegeln. Das Modul soll umfassende praktische und fallorientierte Einblicke in die moderne Rechtsmedizin geben und den Studierenden die konkrete Schnittstellenthemen, die im klinischen Alltag wichtig sind (Todesfeststellung, Untersuchung von Personen die Opfer häuslicher oder sexualisierte Gewalt sind, Untersuchung von Fahrzeuglenkern im Auftrag der Polizei/Staatsanwaltschaft), näher beleuchten. Wir wollen die Breite des Fachs Rechtsmedizin und die interdisziplinäre Zusammenarbeit zwischen den medizinischen Bereichen und den Laborbereichen näher bringen. Es soll die angehenden Ärzte optimal auf die Herausforderungen im klinischen Alltag vorbereiten und sie erkennen lassen, welche Rechte und Pflichten sie haben.

Block Verkehrsmedizin: So soll u.a. im Rahmen eines E-Learnings die Ursachen von Fahrunfähigkeit (Alkohol, Betäubungsmittel, Medikamente, andere Gründe) geschildert werden, die körperliche Untersuchung bei Verdacht auf Fahrunfähigkeit sowie das Vorgehen bei Verdachtsgründen fehlender Fahreignung näher gebracht werden. Weiter sollen sich die Studierenden anhand zur Verfügung gestellter Unterlagen mit den theoretischen Grundlagen der medizinischen Mindestanforderungen und der bestehenden Empfehlungen/Richtlinien bezüglich der Beurteilung der Fahreignung auseinandersetzen. In den Präsenzveranstaltungen werden dann verschiedene konkrete Fallbeispiele auch unter Beizug der Forensischen Pharmakologie und Toxikologie besprochen und im Sinne eines POL (problemorientiertes Lernen) das weitere Vorgehen angegangen. Es wird die Möglichkeit zur interaktiven Übung (u.a. mit dem Fahrsimulator) und selbstständigen Durchführung der Untersuchung bei Verdacht auf Fahrunfähigkeit geben. Ergänzt wird dies durch Input aus der forensischen Toxikologie.

Block klinische Rechtsmedizin: Hier wird anhand von konkreten Fallbeispielen einerseits Verletzungsmechanismen sowie klinische Befundung von Verletzungen erlernt. Auch wird mittels praktischer Übungen die korrekte Befunddokumentation vermittelt. Zudem sollen sie radiologische Befunde interpretieren können bei entsprechenden Patienten (z.B. radiologische Besonderheiten bei Kindesmisshandlung oder Gewalt gegen den Hals). Durch Inputs aus der forensischen Genetik lernen sie eine korrekte Spurenasservation bei entsprechenden Opfern häuslicher und sexualisierter Gewalt. Ergänzt wird dies durch Input aus der forensischen Toxikologie zur Indikationsstellung von Asservation von Blut/Urin/Haaren bei Verwendung von sog. K.O.-Mitteln.

Block postmortale Rechtsmedizin: Hier wird der Fokus auf die Todesfeststellung und das Ausstellen der Todesbescheinigung gelegt werden. In der Präsenzveranstaltung führen die Studierenden eine VR-gestützte ärztliche Leichenschau durch und müssen anhand der vorliegenden Befunde die Todesbescheinigung ausfüllen. Sie lernen hier nochmals ausführlich, auf welche Befunde zu achten sind.

ECTS: 4

Learning Outcome:

- Sie können die äussere Leichenschau sicher durchführen und die Todesbescheinigung korrekt ausfüllen. Zudem kennen sie das Vorgehen beim aussergewöhnlichen Todesfall.
- Sie lernen, klinische und radiologische Befunde im Hinblick auf rechtsmedizinische Aspekte (z.B. Kindesmisshandlung, Gewalt gegen die sexuelle Integrität) zu interpretieren und können die Indikation für weitere Spurensicherung sowie den Auftrag für toxikologische Untersuchungen stellen.
- Einsatz interaktiver 3-D-Präsentation: Studierende erproben den Umgang mit Photogrammetriesoftware und die Präsentation forensisch relevanter Befunde.
- 3-D-Modelle können in einer immersiven VR-Umgebung betrachtet werden, um eine wissenschaftlich fundierte,

realitätsnahe Befundanschauung zu ermöglichen.

- Sie beherrschen die rechtlichen Grundlagen im Bezug auf Melderecht und Meldepflicht und können diese anhand von Fallbeispielen anwenden.
- Sie können betreffend Fahr(un)fähigkeit verschiedenen Ursachen (Alkohol, Betäubungsmittel, Medikamente, andere Gründe) benennen, differentialdiagnostische Überlegungen treffen, toxikologische Befunde im Zusammenhang mit Fahrfähigkeit interpretieren, können die ärztliche Untersuchung bei Verdacht auf Fahr(un)fähigkeit korrekt durchführen, im Untersuchungsprotokoll die notwendigen Schlussfolgerungen treffen und Verdachtsgründe fehlender Fahreignung benennen.
- Sie kennen die medizinischen Mindestanforderungen, setzen sich mit den entsprechenden Richtlinien/Empfehlungen in Bezug auf die Fahreignungsuntersuchung auseinander.

Target Groups:

Wenn möglich Studierende des 4. SJ

Course Materials:

- E-Learning im VAM rechtzeitig zur Verfügung gestellt. E-Learning wird derzeit in Zusammenarbeit mit MELS UZH produziert.
- Notwendige Folien und Unterrichtsunterlagen sowie theoretisches Wissen werden im VAM rechtzeitig publiziert.

Merkmale:

Responsible instructor: Constantin Lux

Requirements:

Assessment:

Der Leistungsnachweis erfolgt im E-Learning durch MC-Fragen und Quizzes im Rahmen des E-Learnings.
Für die weiteren Lernziele erhalten die Studierenden am Ende jedes Blocks konkrete Fallbeispiele und konkrete Fragestellungen, müssen anhand der erhaltenen Informationen Fallvorstellungen im Sinne einer Kurzpräsentation vornehmen und diese in der Gruppe vorstellen. Der Dozierende bewertet die Fallvorstellungen und bewertet die Präsentation mit bestanden/nicht bestanden.

Module LSZ 114 Speaking with Confidence and Impact

07SMLSZ114 / Doktorandenseminar

Description:

General description:

Do you want to have more impact when delivering a presentation? Do you want to deliver your message with more clarity, and build more connection with your audience? Or do you simply want to be able to be more relaxed and 'yourself' when speaking to groups?

For those people who already feel comfortable presenting, we work to strengthen your confidence and charisma, developing your ability to be more authentic and have more professional impact when you speak.

For those who experience nerves when speaking to a group, we look at new ways of transforming them. What are we actually dealing with? How can we experience public speaking as energizing and even enjoyable?

This workshop is not about tips, tricks and techniques. It's about building genuine strength as a presenter – from the inside out. If you bring an attitude of open curiosity and a willingness to try something new, you might be surprised by what is possible.

We'll be using a variety of exercises and group work, including video, to help you

- allow yourself to relax into the role of speaker/presenter and strengthen your professional presence
- develop your ability to use eye-contact to engage with individuals and the group
- strengthen your capacity to remain open and flexible in the speaker/presenter role practice delivering your presentations in a more confident and connected way get your point across more clearly, with more impact, and make your presentation more memorable

Module Elective Module: Medical Technology Innovation I - From Concept to Clinics

04SM26MAS005 / Sonstiges

Description:

General description:

Identifikation ungelöster klinischer Probleme aus dem Alltag
Übersetzung klinischer Bedürfnisse in technische und funktionale Anforderungen
Interdisziplinäre Zusammenarbeit mit Ingenieur:innen, Designer:innen und Industrie
Grundprinzipien der Entwicklung medizinischer Technologien und Devices
Evidenz, Testmodelle und klinische Evaluation (von der Idee zur Anwendung)
Regulatorische Grundlagen, Qualität, Sicherheit und Ethik
Einführung in Implementierung, Erstattung und klinische Adoption
Praxisnahe Projektarbeit an realen klinischen Fragestellungen

ECTS: 4

Learning Outcome:

By the end of the course, medical doctors will be able to:

1. Identify and frame high-impact clinical needs. Systematically recognize unmet clinical problems and translate real clinical workflows into clear, innovation-ready problem statements.
2. Translate clinical reality into technical requirements. Convert use cases into functional specifications, constraints, and performance criteria that guide engineering and design decisions.
3. Co-design and critically assess medical technologies. Collaborate effectively with engineers and designers to evaluate feasibility, usability, safety, and translational risk at early development stages. Select appropriate evidence and evaluation pathways
4. Judge which preclinical, clinical, and real-world evidence is needed, and critically assess model selection, bias, and translatability. Understand pathways to clinical adoption
5. Grasp the fundamentals of regulation, quality, reimbursement, and hospital implementation that determine whether a technology reaches patients. Act as responsible clinical innovators and leaders
6. Navigate ethical considerations, conflicts of interest, and interdisciplinary dynamics while championing patient-centered, safe, and impactful innovation.

Target Groups:

Medizinstudierende (und IngenieurInnen ETH)

Languages of Instruction:

Englisch

Course Materials:

Folien und Literature werden über Moodle bereitgestellt.

Merkmale:

Responsible instructor:

Inge Herrmann

Requirements:

Assessment:

Gruppen-Pitch (15 Minuten)
Interdisziplinäre Gruppenpräsentation zu einer selbst gewählten oder vorgegebenen klinischen Problemstellung.
Inhalt des Pitches:
Beschreibung des klinischen Problems und des ungedeckten Bedarfs
Definition des Use Cases und der Zielanwender:innen
Technologisches Lösungskonzept (Funktionsprinzip, Abgrenzung zu bestehenden Lösungen)
Einschätzung von Machbarkeit, Risiken und klinischer Integration

Überblick über Evidenzbedarf, regulatorischen Pfad und Implementierung
Klar strukturierte Darstellung und adressatengerechte Kommunikation
Bewertungskriterien: Problemverständnis, klinische Relevanz, Innovationsgrad, interdisziplinäre Kohärenz, Klarheit der Präsentation.
Schriftlicher Projektbericht (5 Seiten) Schriftliche Ausarbeitung des im Pitch vorgestellten Projekts (max. 5 Seiten, exkl. Referenzen).

Module Shami Intensiv

06SM307p009 / Module

Description:

General description:

Das Modul vermittelt systematische Grundlagen eines arabischen Dialekts sowie die mündliche Handlungsfähigkeit in ausgewählten Standardsituationen.

ECTS: 3

Notes:

Interessierte melden sich bitte bis zum 01.09.2026 verbindlich per E-Mail bei rebecca.sauer@aoi.uzh.ch an. Ein Transcript zum Nachweis der Arabisch-Kenntnisse ist der Anmeldung beizufügen.

Learning Outcome:

Die Studierenden werden in den Dialekt des Levantinisch-Arabischen eingeführt und erwerben in einer interaktiven Lernumgebung alltagsrelevante Kenntnisse dieses Dialekts.

Languages of Instruction:

Deutsch und Arabisch

Merkmale:

Responsible instructor: Rebecca Sauer

Requirements:

Prerequisites: Voraussetzung für die Teilnahme ist die erfolgreiche Absolvierung von Arabisch 3, nachgewiesen anhand eines Transcripts of Records.

Assessment: Portfolio (schriftliche Aufgaben, mündliche Prüfung, schriftliche Prüfung)

Schriftliche Prüfung: 03. Dezember 2026, 8:00 Uhr

On-site (paper-pencil)

Mündliche Prüfungen: 07. Dezember 2026, 08:00 - 10:30 Uhr

Remote (online)

Schriftliche Aufgaben: Es müssen 8 Hausaufgaben eingereicht werden.

Alle Elemente des Portfolios müssen absolviert und bestanden werden. Wird ein Element nicht absolviert bzw. nicht bestanden, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden.

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Module DGEKW University Conference 2026: Nexüs. Networks in Science

06SM506p510 / Module

Description:

General description:

Netzwerke prägen gesellschaftliche, politische, wissenschaftliche und technologische Prozesse - nicht nur als empirisch greifbare Strukturen, sondern auch als analytische Kategorien und kulturelle Metaphern. Sie ermöglichen Kooperation, Mobilität und Teilhabe, bedingen aber auch Spannungen und Ungleichheiten. Zudem ist die Arbeit mit und in Netzwerken konstitutiv für empirisch-kulturwissenschaftliche Forschungen.

Die DGEKW Hochschultagung 2026 untersucht wissenschaftliche Netzwerke mit ihren vielfältigen Verbindungen zwischen Wissenschaft und Gesellschaft, Forschung und Praxis, Akteur:innen und Institutionen. Sie lädt zu Diskussion und Austausch darüber ein, wie Vernetzungen den Forschungsalltag der Disziplin Kulturanthropologie/ Empirische Kulturwissenschaft gestalten und zugleich als Ressource genutzt werden können.

Tagungswebseite:

<https://www.isgv.de/aktuelles/veranstaltungen/details/nexus-netzwerke-in-wissenschaft-und-gesellschaft-hochschultagung-der-deutschen-gesellschaft-fuer-empirische-kulturwissenschaft-dgekw>

ECTS: 3

Notes:

Tagung: Dresden, 21. bis 23. September 2026

Anmeldung (Achtung vor Beginn der Vorlesungszeit): bis zum 31. August 2026!

Bitte zeitgleich zur Anmeldung Sibylle Künzler vom ISEK Populäre Kulturen kontaktieren: sibylle.kuenzler@uzh

Die obligatorische Infoveranstaltung zu diesem Modul findet am 01.09.2026, 13.00-13.45 Uhr über folgenden Link statt:

Der Tagungsbesuch erfolgt selbständig und auf eigene Kosten.

(Informationen zu den Tagungskosten sind auf der Tagungswebseite zu finden.)

Wissenschaftliche Veranstaltungen wie Forschungskongresse, Tagungen oder Exkursionen sind bedeutende Pfeiler wissenschaftlicher Arbeit und dienen neben der Präsentation und Diskussion neuester Forschungsergebnisse der Ausbildung eines wissenschaftlichen Netzwerkes. Das Selbstlernmodul bietet Studierenden die Möglichkeit, bereits früh in ihrer Laufbahn aktiv am wissenschaftlichen Austausch teilzunehmen.

Learning Outcome:

Die Studierenden kennen Formen des wissenschaftlichen Austauschs. Sie sind in der Lage, aus vorbereitender Lektüre und eigenen Notizen einen synthetisierenden Bericht zu erfassen.

Module Diagnostische, therapeutische und Forsch

04SMPSY26001 / Course

Description:

General description:

Veranstaltungsbeschreibung

Das zweitägige Seminar „Diagnostische, therapeutische und Forschungsverfahren in der Verhaltensmedizin“ richtet sich an Medizinstudierende und vermittelt einen praxisnahen Überblick über zentrale Verfahren der Verhaltensmedizin. Im Mittelpunkt steht die Frage, wie gesundheitsrelevantes Verhalten, subjektives Erleben und körperliche Prozesse erfasst, interpretiert und für klinische sowie wissenschaftliche Fragestellungen nutzbar gemacht werden können.

Lerninhalte

Das Seminar behandelt grundlegende Methoden der Verhaltensanalyse, Selbst- und Fremdbeobachtung, Anamnese, Interviewführung, Fragebogendiagnostik sowie computergestützte und neuropsychologische Testverfahren. Anhand klinischer Beispiele wird gezeigt, wie Symptome, Belastungsfaktoren, Ressourcen, Funktionsniveau und Verlauf systematisch beurteilt werden können.

Darüber hinaus werden biologisch und technologisch orientierte Ansätze vorgestellt, darunter psychophysiologische Messverfahren, Biofeedback, digitale Anwendungen, Gesundheitstracking, Lichttherapie, transkranielle Gleichstromstimulation und Virtual Reality. Die Verfahren werden hinsichtlich Aussagekraft, Evidenz, praktischer Umsetzbarkeit und methodischer Grenzen eingeordnet. Ergänzend geben eingeladene Patientinnen und Patienten sowie Therapeutinnen und Therapeuten Einblicke in klinische Erfahrungen und die praktische Anwendung ausgewählter Verfahren

Lernziele

Die Studierenden lernen, wichtige verhaltensmedizinische Verfahren zu beschreiben, sinnvoll auszuwählen und in klinischen Kontexten einzuordnen. Sie entwickeln ein Verständnis dafür, wie diagnostische Befunde zur Behandlungsplanung, Verlaufskontrolle, Prävention und Forschung beitragen können.

Nach Abschluss des Seminars sollen sie unterschiedliche Erhebungs- und Messmethoden kritisch bewerten, deren Limitationen erkennen und verhaltensmedizinische Informationen zu einem klinisch und wissenschaftlich verwertbaren Gesamtbild zusammenführen können

Unterrichtsformate

Das Seminar findet als zweitägige Präsenzveranstaltung an zwei Freitagen, am 23.10.2026 und 30.10.2026, jeweils von 8.00 bis 17.00 Uhr statt. Die Inhalte werden durch kurze theoretische Inputs, praxisnahe Demonstrationen, Fallbeispiele, gemeinsame Diskussionen und die Arbeit mit ausgewählten Materialien vermittelt. Beiträge eingeladener Patientinnen und Patienten sowie Therapeutinnen und Therapeuten ergänzen die praxisnahe Vermittlung. Der Schwerpunkt liegt auf einer medizinisch anschlussfähigen, anwendungsorientierten Darstellung ohne vertieften psychotherapeutischen Fokus.

Prüfungsform

Die Lernzielüberprüfung erfolgt durch dokumentierte aktive Teilnahme sowie die aktive Bearbeitung und Diskussion ausgewählter Fallbeispiele während der Veranstaltung. Eine schriftliche oder mündliche Prüfung ist nicht vorgesehen.

Module Foundations of Human–AI Collaboration (L)

03SM22BI0024 / Course

Description:

General description:

Artificial Intelligence (AI) systems are increasingly used to support decision making and problem solving, automate tasks, and collaborate with humans in organizations. However, successful use of AI depends largely on how these systems are integrated into work processes, roles, and responsibilities. This course examines how humans and AI systems collaborate in complex work and organizational settings, focusing on problem solving, decision-making, workflow design, governance, and performance. Students will learn how to analyze and design human–AI work systems, evaluate their impact on organizations, and understand the managerial and societal challenges of deploying AI responsibly. The course provides a socio-technical perspective that complements technical AI knowledge and prepares students to work effectively with AI in professional environments.

ECTS: 3

Learning Outcome:

- After successfully completing this module, students will be able to:
- Explain how humans and AI systems collaborate within organizational work practices
- Analyze human–AI work systems from a socio-technical perspective, considering roles, responsibilities, workflows, and organizational constraints
- Evaluate the benefits, risks, and limitations of AI-supported work using criteria such as performance, reliability, accountability, and organizational impact
- Design basic concepts for integrating AI systems into organizational workflows, including mechanisms for human oversight and coordination.
- Identify governance, ethical, and regulatory challenges associated with deploying AI systems in professional and societal settings.
- Communicate interdisciplinary considerations of human–AI collaboration to both technical and non-technical stakeholders

Target Groups:

BA-Students

Course Materials:

Material will be provided via OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Eva Bittner

Requirements:

Prerequisites:

Basic prior knowledge on different AI based systems is recommended, as the technological foundations will not extensively be introduced in this lecture.

Assessment:

Module MAT 632 Theoretical Physics for Mathematicians I: Classical Mechanics & Electrodynamics 07SMMAT632 / Lecture with Practical Exercises

Description:

General description:

This course introduces central ideas of classical physics from a mathematically oriented perspective. It is designed for mathematics students who are interested in understanding how fundamental physical theories are formulated in precise mathematical terms.

The course focuses on the mathematical structures underlying classical mechanics and electrodynamics. Starting from the modeling of physical systems, we develop the Lagrangian and Hamiltonian formulations of mechanics and explore the role of symmetries and conservation laws. The second part of the course introduces basic concepts of classical field theory with a particular emphasis on the structure of Maxwell's equations.

Throughout the course, physical theories are presented as examples of broader mathematical ideas such as variational principles, differential equations, and geometric structures. The aim is not only to learn the basic models of classical physics but also to understand the mathematical concepts that organize and connect them.

The course prepares the ground for the second part of the sequence, which introduces the mathematical structure of quantum mechanics.

ECTS: 6

Notes:

Mathematical Fields:

- Analysis
- Geometry/Topology

In case of questions, please contact the lecturer PD Dr. Nima Moshayedi

Learning Outcome:

After successfully completing the course, students will be able to formulate basic models of classical mechanics using the Lagrangian and Hamiltonian formalisms and explain how variational principles lead to equations of motion. They will understand the role of symmetries and conservation laws in classical mechanics and describe the fundamental structure of classical field theory with particular emphasis on Maxwell's equations. Students will be able to interpret physical theories in terms of their underlying mathematical structures, including variational principles, differential equations, and geometric formulations, and connect these ideas to mathematical topics such as calculus of variations, differential equations, and linear algebra. They will also be able to apply mathematical reasoning to analyze and discuss simple physical models.

Course Materials:

- Lecture Notes
- V. I. Arnold, „Mathematical Methods of Classical Mechanics“, 2nd ed., Springer, 1989.
- J. D. Jackson, „Classical Electrodynamics“, 3rd ed., Wiley, 1999

Merkmale:

Responsible instructor: Alberto Cattaneo

Requirements:

Prerequisites: Linear Algebra (MAT 111 & 112 or MAT142) and Analysis (MAT 121 & 122)

122 or MAT132)

No prior knowledge in Physics required

Assessment: Oral Exam

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (One-Time)

Module (Leveraging) AI for Research Purposes

10_1DSID0040 / Block Course

Description:

General description:

This intensive block course introduces PhD students from diverse disciplines to the effective, reflective, and responsible use of AI in research. Combining conceptual foundations with hands-on practice, it covers key topics such as the principles of AI and large language models, the landscape of research-oriented AI tools, and the development of personalized, AI-assisted workflows. Participants explore both research with AI and on AI as an object of scholarly inquiry, while engaging with questions of ethics, academic integrity, and responsible use. Through guided exercises and small-group collaboration, students apply AI tools to discipline-specific research processes, critically evaluate outputs, and refine prompting and context management skills.

Didactic methods

Guided exercises, group work, short presentations.

ECTS: 1

Notes:

PhD candidates in the DSI Excellence Program and other interested PhD candidates of all disciplines (priority is given to DSI Excellence Program participants). This course is a compulsory course for PhD Excellence Program participants in the 1st year.

Course Materials: Will be provided in the course.

Merkmale: Target Group: Suitable for English Speakers

Responsible instructor: Nina Cornelius-Malecha

Requirements:

Assessment: As a final project, each group designs and presents an AI-supported research workflow, demonstrating both practical competence and critical awareness.

Grading Scale: Pass/Fail

Organisation:

Offer pattern: 1 Semester (Irregular)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Agentic Coding

10_1DSID0041 / Seminar

Description:

General description:

Using AI for programming tasks is receiving a lot of attention at the moment. In this course, we want to show how to properly use AI as a tool for coding. In particular, this is not about vibe coding, i.e., writing a few prompts, generating some code, and then hoping for the best. We provide a systematic approach, illustrating how to use AI not only for generating code, but for testing, inspecting, explaining, and refining code. The goal is to keep control of the whole process and to steer the AI into the right direction to avoid getting flawed code. A considerable part of the course consists of hands-on exercises to practice the concepts taught in the lectures.

General introduction:

- What is agentic coding?

Further topics:

- Programming in Python (+ popular frameworks)
- Test-driven development
- Environments for agentic coding
- Best practices for agentic coding
 - planning the development
 - defining constraints
 - testing code
 - refining code
 - better prompting

Planned Class Activity

Practical exercises (individually and in groups), some with real-world datasets.

Learning Objectives

Participants learn fundamental concepts of code development and then move on to using AI for coding. We introduce principles, techniques, best practices, and tools for agentic coding. The goal is to give the participants an opportunity to apply the acquired knowledge in practical exercises.

ECTS: 1

Notes:

PhD candidates in the DSI Excellence Program and other interested PhD candidates of all disciplines (priority is given to DSI Excellence Program participants).

The course will take place in room SOC-E-010

Course Materials:

Link to OLAT page will be provided before the course start.

Reading materials will be provided electronically two weeks before the class

Module Seminar: Human-Centered Information Systems Engineering (MSc)

03SM22MIS109 / Seminar

Description:

General description:

This year's seminar will deal with the topic "Design Science Research for Information Systems".

"Design science research is a research paradigm in which a designer answers questions relevant for human problems via the creation of innovative artifacts, thereby contributing new knowledge to the body of scientific evidence." (Hevner and Chatterjee 2010).

In this seminar students are invited to learn the fundamentals of Design Science Research (DSR) for Information Systems (IS). They apply this knowledge to set up and document a small DSR project in group work. This seminar should prepare students to pursue a design-oriented project or thesis with sound methodological skills. Students will be provided with necessary knowledge on the DSR paradigm, a core method set, and best practices from IS literature as well as tools to plan and execute DSR projects in 4-5 introductory lectures.

Building on the lectures and literature, students will define and plan their own DSR project working in teams of 3–4 members and execute the initial stages of the project to create an academic research-in-progress paper that addresses a real-world challenge.

In addition to the written paper, student groups will present and defend their project in a plenary session and provide peer-feedback on another group's paper.

ECTS: 3

Notes:

The allocation of students to this seminar will be done through the department via the module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>

Application for this seminar is via the module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>

Participation in the in-person seminar sessions is mandatory. Session dates and times will be announced in the kick-off session.

Learning Outcome:

- Understanding DSR as a research paradigm and its positioning in the IS field
- Ability to explore different types of knowledge and contributions delivered by DSR.
- Understanding generic and specific DSR processes.
- Ability to set up a DSR project in a team effort and get hands-on method know-how in selected major DSR activities, e.g., problem analysis.
- Knowledge of selected templates & tools that can support executing DSR projects.
- Knowledge of best practices for writing up DSR.

Target Groups:

MA-Students

Course Materials:

The readings for this class will consist of scientific papers from the DSR literature in the information systems domain and related areas.

More details on the course structure and specific topics of the seminar will be announced in the first meeting.

Material will be provided via OLAT.

Merkmale:

Responsible instructor: Eva Bittner

Requirements:

Prerequisites: Prior knowledge in information systems is recommended.

Prior Knowledge: A willingness to actively participate in the course by engaging in teamwork is highly recommended as well as interest in reading and engaging with scientific literature (including IS research methods) and applying such methods to develop IS artefacts to solve real world problems (e.g., in preparation for a project or master's thesis).

Assessment:

- Written Report (50%): Each team works on a DSR project and needs to submit a written report in the form of an academic research-in-progress paper.
- Presentation (30%): Each team presents their research-in-progress paper in a dedicated presentation session.
- Review (20%): Each team submits a written peer-review for another team's research-in-progress paper.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Irregular)

Request period: from Mi 12.08.2026 10:00 to So 30.08.2026 24:00

Module The Social Foundations of Well-being in Contemporary Japan

06SM290p129 / Module

Description:

General description:

In recent decades, happiness research has moved from the margins to the mainstream of social science, driven by the recognition that economic growth alone is an insufficient indicator of societal progress. This seminar uses Japan as a case study to explore what makes a society "liveable" - examining both the structural conditions that shape well-being and the subjective experiences of individuals navigating a rapidly changing social landscape. Japan presents a particularly compelling puzzle: despite high life expectancy, strong educational attainment, and a generally high standard of living, it consistently ranks low on subjective well-being in international comparisons such as the OECD Better Life Index and the UN World Happiness Report. Why? This seminar investigates the social, structural, and cultural factors behind this gap, and asks what a distinctly sociological perspective can contribute to the study of happiness beyond what economics and psychology offer alone.

The seminar meets in three sessions. The opening online session introduces the field: How has happiness research developed, and why does it matter? What are the conceptual and methodological challenges of measuring well-being, particularly across cultural contexts? Where does Japan stand in international comparison and what are recent developments particularly relevant for current well-being trends? At the end of this session, students will choose individual topics to prepare for presentation in the subsequent in-person sessions. These will be held as a block session spanning two half-days.

Topics that we will cover include Japan's welfare state and social policy; work culture and mental health; gender inequality and women's life choices; loneliness, aging, and the weakening of social bonds; alternative life courses beyond the standard script; and the search for meaning in and beyond contemporary consumer and fan cultures. This list is illustrative rather than exhaustive - the seminar is open to other dimensions of well-being in Japan that students wish to bring in.

ECTS: 3

Notes:

Note: Knowledge of Japanese is not a prerequisite for participation.

Learning Outcome:

By the end of the seminar, participants will be familiar with key approaches to measuring social and subjective well-being, understand the specific social dynamics shaping happiness and unhappiness in Japan, and be able to critically evaluate empirical research in this field.

Module Topics in the History of Economics since 1945 (S)

03SM22BO0160 / Seminar

Description:

General description:

The history of current theories, models and methods is approached through (1) having groups of students offer a rendition of key methodological debates between economists, some that have been persistent and (2) then lecturing on how economists have addressed this set of topics. This includes the mathematization of economics, realism and simplification in economics, quantification and the making of economic data, whether theory or data should come first, the changing status of the rationality assumption, how economists have modeled nature, and whether economics is ideological.

The class thus requires reading a set of 1940s to 1970s articles debating these topics, as well as 1-2 2010s-2020s paper by some economists which debate the same issue. Each student contributes one group presentation during the semester, participates in weekly in-class debates and attends lecture. There is no further work needed for final exam (problem set or else)

ECTS: 3

Notes:

This seminar is given by an external lecturer, Prof. Beatrice Cherrier, who is a professor at CNRS, CREST, and ENSAE-Ecole Polytechnique.

The seminar is limited to 20 participants (by application only). To apply for a place in the seminar, please send a short e-mail to Dr. Beatrice Cherrier: beatrice.cherrier@gmail.com before Sept 5, 2026. Please outline why you would like to participate and which topics interest you the most.

Learning Outcome:

Understand the origins of the economic models and tools that students are learning about, as well as the ongoing debates surrounding them. This will help them be more reflexive about their practices and explain their epistemological choices to other scientists, public and private clients and citizens better

Target Groups:

BA-Students

Course Materials:

There are texts to read in advance of each block course. All of them will be provided via OLAT.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Module Applied Natural Language Processing: Using Large Language Models in a Political Context

06SM615p521 / Module

Description:

General description:

Das Modul fördert vertieftes Fachwissen in einem ausgewählten Forschungsfeld. Es vermittelt die Kompetenz, zu einem ausgewählten Thema Fragestellungen aus Sicht der Politikwissenschaft zu entwickeln und zu analysieren. Im Zentrum des Seminars stehen die politikwissenschaftliche und normative Analyse, das trennscharfe Analysieren der Begriffe in ihrer Anwendung auf empirische Studien und das Begründen politischer Sachverhalte. Die unterschiedlichen Themen werden theoretisch und empirisch vertieft.

ECTS: 6

Learning Outcome:

Fachkompetenzen: Verortung von Argumenten und empirischen Studien in den relevanten wissenschaftlichen Debatten zu einem ausgewählten Thema; Methodenkompetenzen: wissenschaftliches Schreiben und Argumentieren; Verfassen eines schriftlichen Beitrags (Policy Paper, wissenschaftliche Abhandlung, etc.)
Selbstkompetenzen: Definition eigener inhaltlicher Schwerpunkte, Selbsteinschätzung, Planungsfähigkeit.

Languages of Instruction:

Deutsch/Englisch - siehe Sprache der Lehrveranstaltung(en)

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Karsten Donnay
Lucas Leemann

Requirements:

Assessment:

Portfolio

The course grade consists of:

One group assignment, which accounts for 50% of the final grade.

Two small individual assignments, which together account for 50% of the final grade.

Bitte beachten: Alle Elemente des Portfolios müssen absolviert werden. Wird ein Element nicht absolviert, gilt das gesamte Portfolio als nicht absolviert und das Modul damit als nicht bestanden. Please note: All elements of the portfolio must be completed. If an element is not completed, the entire portfolio is deemed not to have been completed and the module thus failed.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can't be repeated

Organisation:

Offer pattern:

1 Semester (One-Time)

Request period:

from Mi 12.08.2026 10:00 to Di 25.08.2026 24:00

Place allocation at the latest:

Sa 29.08.2026 22:00

Waiting list progression period: from Sa 29.08.2026 22:00 to Do 10.09.2026 24:00

Cancellation period: from Sa 29.08.2026 22:00 to So 13.09.2026 24:00

Module Digital Government – Succeeding in the Age of AI, Cloud and the Quest for Sovereignty (L+E)

03SM22MI0054 / Lecture with Practical Exercises

Description:

General description:

Why does the public sector lag behind in digital transformation?

While private companies race ahead with sleek online services, automation, and AI, the public sector keeps making headlines for the opposite reason: big projects that blow past their budgets and fail to deliver. Why does this keep happening? And more importantly — how can it be fixed?

This lecture digs into what makes the public sector different, and why those differences turn digitalization into such a challenge — especially when game-changing technologies like AI, Cloud, and the Internet of Things enter the picture. You'll learn the success factors and "good practices" that actually make these projects work, backed by plenty of real-world case studies.

By the end, you'll walk away with concrete concepts, tools, and practical measures to drive and coach digital transformation in public organizations.

In the exercises, you'll tackle three real-world scenarios:

1. E-Government — launching digital services alongside (or instead of) physical ones
2. Legacy to modern — replacing an outdated, historically grown application with a modern, cloud-based architecture
3. Data & AI — building an organization-wide data platform and putting AI to work in everyday business processes

ECTS: 3

Learning Outcome:

- Know the differences between the public sector and other industries in context of digitalization and digital transformation
- Know the challenges posed by game-changing innovation technologies such as AI, cloud, internet of things etc.
- Know the specific success-factors for digitalization in the public sector
- Understand and apply best practices for digital government:

Governance, compliance, security / digital strategy, enterprise architecture, portfolio management / project management, agile development / service management, supplier management, monitoring and reporting

- Innovation technologies: understand key concepts, challenges and success-factors (Deep-dives: AI, IAM/E-ID, Cloud and Sovereignty)
- Gain practical experience (hands-on)

Target Groups:

Master students in Business Informatics or Informatics – interested students of other faculties

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Gerhard Schwabe

Requirements:

Prior Knowledge:

Bachelor studies in Business Informatics and/or Informatics

Assessment:

50% written exam (closed-book, multiple choice)
50% graded exercise (case-studies) + attendance

Grading Scale:

1-6 Quarter Grades Given

Repeatability:

Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Module The Effects of AI on Individuals and Society (L)

03SM22MI0055 / Course

Description:

General description:

As we build and build increasingly sophisticated systems, they're going to have large pieces that will be AI/ML powered. This class is about how we can understand the effects of AI on individuals (cognitive) and groups of people (social, political, economic). We'll take on issues of AI capabilities, fairness, interpretability, and accountability. We'll come to learn about what AI systems can (and cannot) do, about what kinds of mental models people have about such systems, and what we can do to design a user experience to make these systems comprehensible. Ultimately, this is a class about the intersection of human intelligence with artificial intelligence—the two don't necessarily fit well together, and each makes demands on the other. As we design and build out AI-based systems, we will need to have our own deep understanding of the materials of AI, and understand what's possible.

ECTS: 6

Notes:

This course is taught by Daniel M. Russell

Learning Outcome:

Students in the class will acquire knowledge about the human-centered design and implementation knowledge needed to build operational computational systems that have AI subsystems as essential components. The learning outcomes will be (a) detailed knowledge of current AI systems and their expression in user interfaces; (b) knowledge about how to go through a human-centered design process to get to implementation; (c) the key factors of ethical and fairness issues in AI systems; (d) deep knowledge about how current AI systems came to be, and what to expect in their development over the next five years.

Target Groups:

MSc students

Course Materials:

All online materials will be available.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Elaine May Huang

Requirements:

Prerequisites:

Basic HCI knowledge including some background about what a usability study is and knowing how to identify implicit user needs. You don't need to know how to program, but it would be really helpful. (And you should have a willingness to explore low-code implementations.)

Assessment:

There will be 4 assignments and a final project.

#1 15% - analysis task

#2 15% - simple implementation of AI system

#3 15% - needs analysis of systems with AI components

#4 15% - a field study of AI needs / system

Final project: 40% - small team (2-3 people) building or analyzing an AI system, delivered as a final presentation (5 – 10 mins, depending on schedule)

Grading Scale:

1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (One-Time)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Mathematics for AI and Data Science (L+E)

03SM22MI0056 / Lecture with Practical Exercises

Description:

General description:

This course covers the mathematical concepts needed for introductory courses in AI, machine learning and data science. This course has three major topics: i) numerical linear algebra (matrix algebra; vector spaces; linear transformations; orthogonality; determinants; eigenvectors and eigenvalues; singular value decompositions) ii) numerical optimization (gradients and related concepts; chain rule; conditions for local minima, convexity) and iii) probability (rules of probability; random variables; expectation, variance, and covariances; standard distributions, principal component analysis).

ECTS: 3

Learning Outcome:

- Students will develop an understanding of the mathematical concepts that are needed for AI and data science.
- Students will strengthen their core mathematical skills by applying the concepts in practical exercises.

Module Creative Writing II. Novel & Life

06SM360p136 / Module

Description:

General description:

An den flimmernden Orten, an denen Literaturwissenschaft studiert wird, entsteht nicht selten auch das Interesse, sich selbst im Schreiben eines Romans zu versuchen. Diesem Interesse - ob im konkreten Vorhaben, mitten im Schreibprozess befindlich oder im intensiven Überarbeitungswunsch (...) - will sich dieses praxisnahe Seminar widmen, um den Schreibprozess individuell zu fördern, das Schreiben überhaupt auf den Weg zu bringen, zu reflektieren, und dabei zudem eine Sensibilisierung für das Literarische allgemein und somit auch das Lesen und Erforschen von Literatur zu unternehmen. Nicht zuletzt geht es so um die Erkundung der eigenen Kreativität.

In je zwei Blöcken á zwei Tage stehen die Texte der Studierenden im Zentrum, aus denen eine Textprobe gelesen und besprochen wird. Die Texte der Studierenden, noch lose skizziert oder bereits weit fortgeschritten, werden dann im Sinne eines kollektiven Lektorats konstruktiv diskutiert. Parallel stehen Aspekte hinsichtlich der Arbeit um den Roman herum zur Debatte, etwa das Schreiben in der Recherche, das Organisieren und Annähern durch die Arbeit im Notizbuch oder in einer Materialsammlung, das Finden von Stoffen, Figuren, Atmosphären, Erzählstrukturen - wobei auch Elemente wie das Exposé, der Klappentext oder etwaige Ideen zu Titel und zur Gestaltung des Umschlags in experimentellen Übungen erforscht und besprochen werden.

Vorbereitend zu den Sitzungen werden von allen Studierenden Textauszüge und Exposés (s.u.) gelesen und dann im Kurs besprochen, wobei den Verfasserinnen selbst überlassen wird, was sie von diesen Impulsen aufnehmen. Bewertet wird dabei die Teilnahme am Kurs und nicht der jeweils vorliegende Text. Ziel ist es, im Modus des kollektiven Lektorats den Texten fernab einer Bewertungsskala Angebote zu schaffen, die der literarischen Idee, dem Schreiben und Textverständnis weiterhelfen.

ECTS: 3

Notes:

Voraussetzung für die Teilnahme ist die Abgabe eines Exposés und einer Textprobe, beides max. eine Din A4-Seite lang als PDF (Times New Roman, 12pt, Zeilenabstand

1.15, Blocksatz), an hendrik.otremba@uzh.ch; Betreff: Roman & Leben 2026 (bitte Fristen des Bewerbungsmoduls beachten).

Für Exposé und Textprobe gilt: Auch eine lose Skizze oder erste Gehversuche sind ausreichend, es muss kein ausgegorener literarischer Text eingereicht werden. Wichtig ist nur, dass eine Vorstellung Ihres Vorhabens vermittelt wird und Sie Ambitionen hegen, daran weiterzuarbeiten. Sollten diesbezüglich Fragen bestehen, melden Sie sich gern per Mail bei mir.

Learning Outcome:

Am Ende des Seminars liegt Textmaterial vor, das neue Erfahrungen dokumentiert - und gleichzeitig Rückschlüsse auf das eigene Schreiben und die literarische Praxis an sich erlaubt. Der Text selbst kann dabei letztlich alles Mögliche bedeuten: Er kann das bloße Ergebnis einer angeleiteten kreativen Schreibübung sein, kann Auftakt oder Element eines Romans werden, ein Langgedicht entwerfen, eine Kurzgeschichte umfassen. Er kann aber auch Vehikel sein, sich durch das Kreative Schreiben neue Perspektiven und Horizonte zu erschließen, um das Denken und Schreiben in neue Bahnen zu lenken, Routinen zu hinterfragen, Blockaden zu überwinden (oder gleich zu verhindern) und den eigenen Stil zu erweitern. So kann die Schreibpraxis in diesem Kurs zudem Impulse liefern für das Wissenschaftliche Arbeiten, für essayistische oder journalistische Texte, für musikalische Kontexte oder ein dramaturgisches, szenisches Schreiben (etwa im Bereich

Theater). Ein Mehrwert des Seminars also besteht in der Möglichkeit des Transfers der erschlossenen Ansätze, der gemachten Erfahrungen und ausgebildeten Verfahren.

Module Creative Writing

06SM360p138 / Module

Description:

General description:

Kreatives Schreiben erkundet sich bestenfalls im Machen - und so ist der Ansatz dieses Seminars, sich verschiedene Ansätze der Textgewinnung aufmerksam anzuschauen, um diese dann intensiv zu erproben. Dabei werden zunächst, nach einer Einführung und einer Kennenlernrunde, in der bereits über die Schreiberfahrungen und

-ansprüche der Teilnehmenden gesprochen werden soll, einige Klassiker des Kreativen Schreibens hergeleitet, um diese dann einzuüben und anschließend zu reflektieren.

Dozent Hendrik Otremba kombiniert dabei etablierte Schreibansätze mit Erfahrungen, Methoden und Schreibspielen, die aus der eigenen Schreibpraxis als Romanautor und Musiker und seiner jahrelangen Lehre an verschiedenen Institutionen entstanden sind.

Nach dieser Annäherung steht im Zentrum des Seminars die umfangreiche und komplexe Schreibübung Mosaik X, die von Otremba entwickelt wurde und den Studierenden ermöglichen soll, verschiedene Impulse kurzzuschließen, um sich in Bereiche des Schriftstellerischen vorzuwagen, die sonst nur mit einiger Erfahrung zu erreichen sind. So folgt das Seminar etwa der Frage, wie jener Zustand zu begünstigen ist, in dem das Eigenleben der Sprache maßgeblich am Entstehen des Texts mitwirkt, Bedeutungen und Bilder entstehen, die nicht intendiert waren und das Erzählen zum Sprechen bringen. Es entsteht ein wucherndes Konglomerat, das sich immer wieder selbst unterwandert, anreichert, dekonstruiert und verdichtet.

Im gemeinsamen Sprechen über die Texte wird zudem erprobt, wie im Sinne eines Lektorats (auch kollektiv) an noch im Entstehen begriffenen Texten mitgedacht werden kann: Wie nähert man sich einem Text an, von dem die verfassende Person selbst noch nicht allzu viel weiß? Wie spricht man über Texte, die noch beweglich sind - und somit auch verletzlich und fragil?

ECTS: 3

Learning Outcome:

Am Ende des Seminars liegt Textmaterial vor, das neue Erfahrungen dokumentiert

- und gleichzeitig Rückschlüsse auf das eigene Schreiben und die literarische Praxis an sich erlaubt. Der Text selbst kann dabei letztlich alles Mögliche bedeuten: Er kann das bloße Ergebnis einer angeleiteten kreativen Schreibübung sein, kann Auftakt oder Element eines Romans werden, ein Langgedicht entwerfen, eine Kurzgeschichte umfassen. Er kann aber auch Vehikel sein, sich durch das Kreative Schreiben neue Perspektiven und Horizonte zu erschließen, um das Denken und Schreiben in neue Bahnen zu lenken, Routinen zu hinterfragen, Blockaden zu überwinden (oder gleich zu verhindern) und den eigenen Stil zu erweitern. So kann die Schreibpraxis in diesem Kurs zudem Impulse liefern für das Wissenschaftliche Arbeiten, für essayistische oder journalistische Texte, für musikalische Kontexte oder ein dramaturgisches, szenisches Schreiben (etwa im Bereich Theater). Ein Mehrwert des Seminars also besteht in der Möglichkeit des Transfers der erschlossenen Ansätze, der gemachten Erfahrungen und ausgebildeten Verfahren.

Module Generative AI for Marketing Research Methods (S)

03SMDOEC1306 / Doktorandenseminar

Description:

General description:

This seminar introduces generative AI as a practical research infrastructure for marketing scholars. Unlike a general AI tools course, the seminar is organized around marketing research problems: how to design experiments, analyze high-dimensional marketing data, and build auditable AI-supported research workflows. The center of the course is high-dimensional data analysis: text, images, voice, embeddings, behavioral traces, survey data, and large-scale consumer or market datasets.

ECTS: 3

Learning Outcome:

The main objective is to help participants design, execute, and critically evaluate AI-enabled marketing research workflows, with special emphasis on quantitative marketing, high-dimensional data analysis, online field experiments, and consumer behavior applications.

Target Groups:

The seminar is aimed primarily at PhD students in business administration (especially marketing).

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Andrea Giuffredi-Kähr

Requirements:

Prerequisites:

Participants are recommended to have a Google account.

Prior Knowledge:

Basic familiarity with regression, experiments, and marketing research concepts is helpful.
Programming experience in R or Python is useful but not required; the seminar will show AI-assisted coding workflows.

Assessment:

Participation in class (mini-lectures, live demonstrations, guided labs, peer critique, and research clinic) and delivering hands-on output.

1. Text data analysis notebook
2. Online field experiment setup or survey experiment
3. Optional qualitative extension

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern:

1 Semester (One-Time)

Module Seminar: Applied AI Systems: Architecture, Integration, and Scaling (BSc)

03SM22BIS201 / Seminar

Description:

General description:

This seminar explores how modern AI systems can be designed, built, and scaled for real-world organizational use cases in a global context. Students work in small teams to develop and discuss functioning proof-of-concept solutions using current AI tools and architectural patterns.

The seminar combines theoretical foundations with hands-on development and focuses on topics such as AI system architectures, applied governance, software productivity, and IT readiness for regulation. In addition to technical implementation, students discuss go-to-market strategies, scalability, and organizational integration of AI-based solutions.

Guest speakers and interactive discussions help contextualize the technical work with industry practice.

ECTS: 3

Notes:

The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>.

Application for this seminar is via the new module booking tool: <https://studentservices.uzh.ch/uzh/launchpad>

Learning Outcome:

After completing the seminar, students can design and implement AI systems for real-world use cases, including the development of functional prototypes using current tools and architectural patterns. They can analyze and justify architectural decisions with respect to scalability, cost, governance, and risk, and evaluate AI solutions in terms of technical feasibility and value creation. In addition, students can critically assess go-to-market strategies, adoption challenges, and the regulatory, ethical, and organizational implications of deploying AI systems.

Target Groups:

Second to Third year Bachelor Students.

Course Materials:

Slides and material shared during the seminar

Merkmale:

Responsible instructor:

Alberto Bacchelli

Requirements:

Prior Knowledge:

- Basic programming skills (at least one modern language, e.g. Python, Java, JavaScript)
- Ability to design and implement basic software solutions independently
- Understanding of software architecture patterns (monolith, microservices, APIs, event-driven)

Assessment:

Project, written report, and final presentation
(Project 50%, Written Report 30%, Presentation 20%)

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Request period: from Mi 12.08.2026 10:00 to So 30.08.2026 24:00

Module Seminar: Critical HCI: Feminism, Justice, and the Politics of Design (BSc)

03SM22BIS029 / Seminar

Description:

General description:

The same technology that can detect cancer early can also be used to generate nonconsensual sexual images. AI and computing now touch nearly every part of daily life, at home, at work, in medicine, and its effects are never neutral. This seminar asks students to critically examine that range: what technology gets right, what it gets wrong, and why. Drawing on design justice, feminist HCI, queer theory, and critical data studies, students will critically examine the assumptions embedded in technology design, whose interests these technologies serve, and what harms or possibilities they create. They will also engage with how such technologies are designed and researched, including questions of positionality, extractive versus participatory research, working with vulnerable populations, and the ethics of studying communities that have already experienced harm. The seminar is not about summarizing papers. Students are expected to take positions, challenge each other, and defend their critiques, skills they will also need for the final oral exam, in which they apply what they have learned to a concrete research scenario.

ECTS: 3

Notes:

The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>.

Application for this seminar is via the new module booking tool:

<https://studentservices.uzh.ch/uzh/launchpad>

Learning Outcome:

- Students will be familiar with critical theories and lenses on technology, its design, and its research, including feminist, justice-oriented, queer, and activist perspectives.
- Students will be able to analyze technology and its design through these lenses, identifying embedded assumptions, whose interests are served, and what benefits, harms, or possibilities are created.
- Students will be able to apply these critical frameworks to a concrete research or design scenario, identifying strengths, limitations, and alternative approaches.
- Students will be able to engage in reasoned debate, take positions, and defend their arguments in response to critique and challenge.
- Students will be able to weigh and articulate multiple, sometimes competing, perspectives on the social and ethical dimensions of technology, rather than defaulting to a single viewpoint.

Course Materials:

The readings for this class will consist of papers from HCI and related literature on critical computing, feminist HCI, and social justice-oriented technology research. Readings will be uploaded weekly, so students do not need to source them independently.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Elaine May Huang

Requirements:

Prior Knowledge:

Curiosity and interest in the societal effects of technology, as well as a critical engagement with technology itself, are what matter most. A good understanding of HCI fundamentals is recommended, for example, having completed the People

and Computing course at the Assessment level or being comfortable with its content. Students should be comfortable reading academic papers.

Assessment: Cumulative assessment, broken down as follows:

- 20% – participation in weekly seminar discussions
- 40% – research paper, submitted toward the end of the semester (exact date TBA)
- 40% – oral exam, scheduled individually with each student during a designated week in December/January

Both the oral exam and the written report need to be passed individually to pass the course.

Grading Scale: 1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (One-Time)

Request period: from Mi 12.08.2026 10:00 to So 30.08.2026 24:00

Place allocation at the latest: Di 08.09.2026 23:59

Waiting list progression period: from Mo 07.09.2026 00:00 to Fr 18.09.2026 24:00

Cancellation period: from Mo 07.09.2026 00:00 to Mo 21.09.2026 24:00

Organisation: Institut für Informatik

Offered in: Fall Semester 2026

Module Seminar: Critical HCI: Feminism, Justice, and the Politics of Design (MSc)

03SM22MIS029 / Seminar

Description:

General description:

The same technology that can detect cancer early can also be used to generate nonconsensual sexual images. AI and computing now touch nearly every part of daily life, at home, at work, in medicine, and its effects are never neutral. This seminar asks students to critically examine that range: what technology gets right, what it gets wrong, and why. Drawing on design justice, feminist HCI, queer theory, and critical data studies, students will critically examine the assumptions embedded in technology design, whose interests these technologies serve, and what harms or possibilities they create. They will also engage with how such technologies are designed and researched, including questions of positionality, extractive versus participatory research, working with vulnerable populations, and the ethics of studying communities that have already experienced harm. The seminar is not about summarizing papers. Students are expected to take positions, challenge each other, and defend their critiques, skills they will also need for the final oral exam, in which they apply what they have learned to a concrete research scenario.

ECTS: 3

Notes:

The allocation of students to this seminar will be done through the department via the new module booking tool. If there is a shortage of seats, we will give preference to students that are majoring in informatics and have not yet attended a seminar and are already far in their studies. Please note that we cannot guarantee a spot.

More information on the process can be found on our website: <https://www.ifi.uzh.ch/en/studies/seminar.html>.

Module Applied Computer Graphics (L+E)

03SM22MI0057 / Lecture with Practical Exercises

Description:

General description:

This course teaches advanced techniques in computer graphics by addressing an open research problem in geometry acquisition: how to evaluate and diagnose texture quality in 3D capture pipelines.

For the technical part the students learn: WebGPU and WGSL including its pipeline model, compute shaders and their application to per-textel workloads and storage buffers.

Working in small groups, students use their newly gained knowledge to collaboratively develop a browser-native pipeline inspector, each group owning one independent module: UV mapping and texel diagnostics, texture reprojection and error visualisation, physically based rendering (PBR) layer inspection, multi-view surface coverage analysis, or light probe visualisation.

ECTS: 3

Notes:

The course will consist of sessions every two weeks in which

- Topics and techniques will be introduced (Lecture)
- Teams will present and discuss their implementation progress

Prior knowledge on Realtime Computer Graphics such as of the Computer Graphics Lecture or similar are required. Knowledge of Web Development techniques is beneficial.

Learning Outcome:

The students will learn advanced computer graphics concepts, and programming techniques within a defined research problem.

They will gain practical programming skills in WebGPU and WGSL (that are also applicable to other modern frameworks such as Vulkan or Metal), with particular focus on compute shaders and pipelines behind the classical rasterization pipeline.

The tool developed by the students addresses a real open research problem, giving students direct exposure to the gap between current capabilities of pipeline outputs and measurement-quality texture reconstruction in the context of geometry acquisition and 3D reconstruction.

Target Groups:

MA-Students

Course Materials:

WebGPU Fundamentals (<https://webgpufundamentals.org/>).
Slide set of the lecture part.

Merkmale:

Responsible instructor:

Renato Pajarola

Requirements:

Prerequisites:

Computer Graphics Lecture strongly recommended

Assessment:

- Implementation of the project over the course of the course (50%)
- Progress Presentations (average excluding lowest grade) (25%)
- Individual final report explaining and discussing the implementation and techniques used (5-10 pages including images in the provided latex template) (25%)

Grading Scale:

1-6 Quarter Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (One-Time)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Module Professional Traineeship BA Archaeology 3 ECTS

06SM640p201 / Module

Description:

General description:

Die Studierenden bewerben sich eigenständig bei einschlägigen Institutionen (z.B. Kantonsarchäologien, Grabungsfirmen, Denkmalpflege oder Museen) für ein "externes" Praktikum. Der Umfang des Praktikums umfasst wenigstens zwei Wochen zu 100% Arbeitszeit. Nach Zusage der Praktikumsstelle vereinbaren die Studierenden mit dem Modulverantwortlichen ein Praktikumskonzept. Ziel des Praktikums ist der Einblick in die archäologische Arbeitspraxis ausserhalb der Universität. Es obliegt den Studierenden, nach Absolvierung die erforderlichen Unterlagen (schriftliche Bestätigung der anbietenden Organisation, Leistungsnachweise gemäss Praktikumskonzept) einzureichen.

ECTS: 3

Notes:

Vorgängig zur Modulbuchung ist eine schriftliche Vereinbarung einzureichen. Bitte kontaktieren Sie dazu die Studienfachberatung (studienberatung@archaeologie.uzh.ch).

Learning Outcome:

Die Studierenden besitzen eine konkrete Vorstellung eines möglichen Berufsfeldes im Bereich der Archäologien. Sie verfügen über erste Erfahrungen in der beruflichen Praxis ausserhalb der Universität in mindestens einem der Bereiche Ausgrabung, Prospektion, Bauuntersuchung, Grabungsauswertung, Denkmalpflege oder Öffentlichkeitsarbeit.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Carola Jäggi

Requirements:

Prerequisites: Eigenständige Organisation des Praktikums nach Rücksprache mit der Studienfachberatung.

Assessment: dokumentierte praktische Arbeit

Module MAT 111P Lineare Algebra I

07SMMAT111P / Lecture with Practical Exercises

Description:

General description:

- Mengenbegriffe
- Gruppen, Körper
- Matrizen und Lineare Gleichungssysteme
- Vektorräume
- Lineare Abbildungen
- Determinanten
- Polynome
- Eigenwerte und Diagonalisierbarkeit
- Blocktrigonalisierbarkeit und Trigonalisierbarkeit

ECTS: 8

Notes:

HS26:

Die Vorlesung wird im Herbstsemester 26 auf Deutsch stattfinden. Einige der Übungen können auf Englisch sein.

Mehr Informationen: www.math.uzh.ch/mat111

ACHTUNG: Dieses Modul (MAT111P) ist nur für Physik- und Astrophysikstudierende. Mathematik und AMML Studierende buchen MAT111 Lineare Algebra I ohne P.

Target Groups:

Physics/Astrophysics students in their first semester

Languages of Instruction:

Englisch

Course Materials:

Fischer, Gerd (2005): Lineare Algebra. 15. verb. Auflage. Wiesbaden: Vieweg.

Additional material:

Artin, Michael (1998): Algebra. Basel: Birkhäuser.

Merkmale:

Target Group: Open to School Students

Responsible instructor:

Andrew Kresch

Requirements:

Assessment:

Voraussetzung für die Teilnahme an der Modulprüfung sind:

- Erfolgreiche Teilnahme an den Übungen, d.h. 50% der Übungen bearbeitet (Details durch DozentIn in der Vorlesung)

Achtung: Bestehen Sie das Übungstestat nicht, bestehen Sie auch das Modul nicht.

Die Modulnote ist identisch mit der Modulprüfungsnote. Die Modulprüfung ist schriftlich.

Sprache des Leistungsnachweises:
HS26: Die Sprache der Prüfung ist Deutsch.

Grading Scale: 1-6, Half Grades Given

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Every Fall Semester)

Dates/Times/Deadlines: The exam date can be found on the webpage of the Faculty of Science: <https://www.mnf.uzh.ch>

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Module MAT 121P Analysis I

07SMMAT121P / Lecture with Practical Exercises

Description:

General description:

Einführung in die Differential- und Integralrechnung für reellwertige Funktionen in einer Variablen:

- Zahlssysteme, Vervollständigung von $\mathbb{Q}$ nach $\mathbb{R}$ und komplexe Zahlen
- Folgen und Reihen; Grenzwerte;
- Elementare Funktionen
- Stetigkeit von Funktionen; Zwischenwertsatz
- Ableitung; lokales Verhalten von Funktionen (Extrema); Mittelwertsätze;
- Riemann Integral; Hauptsatz der Integralrechnung; uneigentliche Integrale
- Potenzreihen und Taylorentwicklung

ECTS: 8

Notes:

HS26: Die Vorlesung findet auf Deutsch statt.

Die Übungen teilweise auf Englisch.

Übungsblätter wie auch die Prüfung können in Deutsch oder Englisch gemacht werden.

Modulwebseite: www.math.uzh.ch/mat121

ACHTUNG: Dieses Modul, MAT121P, ist nur für AMML (Major) und Physik- sowie Astrophysikstudierende. Mathematikstudierende (sowie AMML Minorstudierende) buchen MAT121 Analysis I (ohne P im Kürzel).

Target Groups:

Physics, Astrophysics and AMML students in their first semester

Course Materials:

Amann, Escher.: Analysis I

Gruaert, Lieb: Differential- und Integralrechnung I Koenigsberger.: Analysis I

Merkmale:

Target Group: Open to School Students

Responsible instructor:

Benjamin Schlein

Requirements:

Assessment:

schriftliche Modulprüfung.

Voraussetzung für die Teilnahme an der Modulprüfung ist die erfolgreiche Teilnahme an den Übungen (Details durch Dozenten in der Vorlesung).

Sprache des Leistungsnachweises:

HS26: Deutsch

Die Prüfung und Übungen können in Deutsch oder Englisch abgegeben werden.

Grading Scale:

1-6, Half Grades Given

Repeatability:

Can be repeated once

Organisation:

<u>Offer pattern:</u>	1 Semester (Every Fall Semester)
<u>Dates/Times/Deadlines:</u>	The exam date can be found on the webpage of the Faculty of Science: http://www.mnf.uzh.ch

Module Internship Indian Studies HS26

06SM330p270 / Module

Description:

General description:

Das Praktikum bietet Studierenden die Möglichkeit, Kenntnisse und Fertigkeiten zu erwerben oder zu vertiefen, die zwar fachlich zu dem gewählten Studienprogramm in Beziehung stehen, aber über das Curriculum im engeren Sinne hinausgehen. Art und Verlauf des Praktikums sind vor der Modulbuchung mit der modulverantwortlichen Person abzusprechen. Die Organisation des Praktikums obliegt der Eigeninitiative der Studierenden.

ECTS: 6

Notes:

Zur Buchung des Moduls beachten Sie bitte die Hinweise auf unserer Homepage: <https://www.aoi.uzh.ch/de/studies/studyorganization/courseofstudies/booking.html>.

Learning Outcome:

Das Praktikum kann zum Kennenlernen möglicher beruflicher Tätigkeitsfelder oder für eine fachliche Vertiefung oder Weiterbildung genutzt werden.

Languages of Instruction:

Deutsch oder Englisch - gemäss individueller Absprache mit der Betreuungsperson

Module Ambulatory Assessment in clinical psychology: Digital methods for assessment and intervention
06SM200p404g / Module

Description:

General description:

Ambulantes Assessment bezeichnet Methoden, die das Verhalten und Erleben von Personen in ihrer natürlichen Umgebung unmittelbar oder mit minimaler zeitlicher Verzögerung erfassen. Digitale Entwicklungen ermöglichen hierbei neben aktiver Erfassung (über Selbstbericht) auch passives Sensing (beispielsweise über wearables und smartphone-Sensoren). Dieses Seminar vermittelt grundlegende Konzepte und Methoden des Ambulanten Assessments mit einem Schwerpunkt auf für die Klinische Psychologie relevante grundlegende Prozesse (Dynamiken von Emotionen und sozialen Beziehungen im Alltag) und Anwendungen. Auf der Grundlage der eingeführten Methoden und Befunde werden eigene Studienideen entwickelt, vorgestellt und diskutiert.

ECTS: 4

Notes:

Dieses Modul ist Teil der Buchungsgruppe "Klinische Psychologie und Gesundheitspsychologie". Studierende können pro Semester in einer Buchungsgruppe maximal einen Platz bekommen.

Learning Outcome:

Die Studierenden können grundlegende Konzepte und Methoden des Ambulanten Assessments wiedergeben und erläutern

Die Studierenden können dieses Wissen anwenden und kritisch reflektieren bei der Entwicklung und Darstellung eines Studienentwurfes

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Andrea Beatrix Horn Wintsch

Requirements:

Prerequisites:

Bestandene Module «Einführung Statistik, Emotions-, Motivations-, Sozialpsychologie» und «Einführung Methoden, Kognition, Entwicklungs-, Biol. Psychologie».

Assessment:

Portfolio

1. Aktive Teilnahme am Seminar (Diskussion, Einbringen in Gruppenarbeiten)
2. Lesen und Reflektieren der Literatur
3. Entwicklung, schriftliche Ausarbeitung und mündliche Präsentation eines Studienkonzepts

Module Introduction to Qualitative Research and the Grounded Theory Approach

06SMG70p106 / Module

Description:

General description:

This workshop offers an introduction to qualitative research with a special focus on grounded theory - a qualitative research approach that is particularly versatile and internationally well-known. The learning goals of this workshop are to (1) familiarize participants with the broad range of possibilities that qualitative research in general and grounded theory in particular have to offer, (2) enable participants to assess under what conditions grounded theory is a useful approach, and (3) provide participants with the opportunity to practice developing strategies for data collection and analysis that are in line with the grounded theory approach. Participants will get hands-on advice on each element of the qualitative research process including conducting qualitative interviews and observations, transcription, and coding. In addition, this workshop will provide valuable information on how to successfully write up and publish qualitative research.

Module MAT526 Seminar Introduction to Hopf Algebras and their Applications in Topology

07SMMAT526 / Seminar

Description:

General description:

The concept of Hopf algebra (now also known as the quantum group) was introduced by Heinz Hopf in 1941 in the context of algebraic topology, and proved to be fundamental, as in subsequent years Hopf algebras were identified in various contexts: as underlying algebras of affine groups in the theory of algebraic groups, as formal groups in number theory, and as universal enveloping algebras in Lie theory. The pioneering works of Drinfel'd, Reshetikin, and Turaev led to the application of Hopf algebras to physics and low-dimensional and topology.

The goal of the seminar is to introduce students to finite-dimensional complex Hopf algebras: their structure theory, examples and their representation category. As an application, we will discuss the construction of Turaev-Viro topological field theories with applications in the theory of quantum codes.

ECTS: 3

Notes:

Mathematical Fields: Geometry/Topology and Algebra

Learning Outcome:

Understanding the basic concepts of Hopf algebra and its representations along with applications of such algebraic structures in low-dimensional topology.

Target Groups:

Math BSc students from 4th semester and MSc students

Course Materials:

The Seminar will follow:

1) Christoph Schweigert, "Hopf algebras, quantum groups and topological field theory", (freely available from the author's website)

2) S. Dascalescu, C. Nastasescu, S. Raianu, Hopf Algebras. An Introduction. Monographs and Textbooks in Pure and Applied Mathematics 235, Marcel-Dekker, New-York, 2001

Additional material will be made available to the students interested in affine or formal groups.

Merkmale:

Responsible instructor:

Anna Beliakova

Requirements:

Module A Best Practice Course for Conducting Systematic Reviews in Psychology

06SMG70p105 / Module

Description:

General description:

This two half-days course on systematic reviews for psychology PhD students describes the essential steps of a systematic review in psychology. Systematic reviews involve a comprehensive search to identify all relevant papers on a topic. They systematically integrate the search results and evaluate the quality of the results in relation to a specific research question. Participants deal with the development of an effective search strategy, the selection of suitable databases and search tools and the creation of search strings using controlled vocabularies and Boolean operators. Participants will learn how to test their search strategy, set up auto alerts and export and deduplicate references. We introduce pre-registration options to ensure transparency and reproducibility. Evaluating the quality of studies and synthesizing both qualitative and quantitative research results are also part of the course. Software tools for creating the search string, accelerating the screening process and scientific writing will be presented. Participants will also benefit from practical exercises and individual feedback.

Module Power, Violence and Conflict

06SMG12p102 / Module

Description:

General description:

Der epochenübergreifende Workshop wird gehalten von zwei Historiker:innen mit Schwerpunkten im Mittelalter respektive im 19./20. Jahrhundert. Doktorierende haben die Gelegenheit, Kapitelentwürfe zum Thema des Workshops von der Vormoderne bis ins 20. Jahrhundert in deutscher oder englischer Sprache zur Diskussion zu stellen. Diese sollten nach Möglichkeit zwei bis drei Wochen im Voraus verschickt werden. Auch mündliche Projektvorstellungen sind nach Absprache möglich. Ausserdem sollen von den Dozierenden ausgewählte Texte gemeinsam diskutiert werden.

The workshop will be held by two historians with a focus on the Middle Ages and the 19th/20th century. Doctoral students will have the opportunity to submit draft chapters on the topic of the workshop from the pre-modern period to the 20th century for discussion in German or English. If possible, these should be sent two to three weeks in advance. Oral project presentations are also possible by arrangement. In addition, participants will discuss texts chosen by the instructors.

Module Poverty and Wealth

06SM240p029 / Module

Description:

General description:

In den allermeisten Ländern der OECD, und auch weltweit, lässt sich eine langfristige Tendenz der Zunahme ökonomischer Ungleichheiten - typischerweise in Form einer Polarisierung von Armut und Reichtum - seit etwa 1980 beobachten. Die Vorlesung will sich mit diesem Trend intensiver beschäftigen. Im Zentrum steht zunächst die deskriptive Analyse ökonomischer Ungleichheiten, auch in ihrer Verschränkung mit anderen Ungleichheitsdimensionen (wie Bildung, Beruf, Geschlecht, Migration). In zwei weiteren Blöcken widmen wir uns vertiefend, auch aus einer mikrosoziologischen Perspektive, der Analyse von Armut sowie von Reichtum. Der letzte Block fragt dann nach den gesellschaftlichen Konsequenzen ökonomischer Ungleichheit: Wieviel Ungleichheit verträgt eine demokratische Gesellschaft?

ECTS: 6

Notes:

Die Veranstaltung findet am 19. Oktober 2026 vor Ort im Raum AFL-F-121 (in Präsenz) statt. Wenn der Unterricht in Präsenz stattfindet, wird ein Podcast aufgezeichnet. Ansonsten findet die Veranstaltung online only statt.

Learning Outcome:

Neben einem fundiertem empirischen Überblick will die Vorlesung auch die konzeptionellen Grundlagen, theoretische Perspektiven sowie die methodischen Werkzeuge der Analyse von Armut und Reichtum vermitteln. Entsprechend verfolgt die Vorlesung vier Lernziele: 1. Theoretisches und methodisches Verständnis der Messkonzepte von Einkommens- und Vermögensungleichheit sowie Armut und Reichtum, 2. Überblickswissen zu den zentralen Entwicklungstrends, Ursachen und Folgen ökonomischer Polarisierung, 3. Vertiefendes Verständnis der (mikrosozialen) Erscheinungs- und Verlaufsformen von Armut sowie von Reichtum, 4. kritisches Problembewusstsein zu den gesellschaftlichen Folgen von ökonomischer Ungleichheit

Module MAT 682 Seminar Coding Theory Meets Molecular Biology

07SMMAT682 / Seminar

Description:

General description:

DNA-based data storage has emerged as a compelling alternative to conventional magnetic and solid-state storage, offering extraordinary density, long-term durability, and near-zero idle power consumption. However, the biochemical nature of DNA introduces a distinct and varied class of challenges that cannot be addressed by classical coding methods alone: from insertions, deletions, and substitutions at the symbol level, to higher-order phenomena such as unordered data retrieval and the probabilistic nature of sequencing coverage. Addressing these requires developing fundamentally new error channel models, coding schemes, and algorithmic frameworks.

This seminar runs alongside the lecture module, and each week, students present and lead a discussion on a current research paper tied to that week's topic. Papers are selected to extend and challenge the ideas introduced in class, including emerging alternatives to the standard DNA storage paradigm, exposing students to active open problems and recent results at the frontier of coding theory for molecular data systems.

Note: This seminar must be taken concurrently with the lecture module "Coding Theory Meets Molecular Biology".

To apply for this seminar please write 2-3 sentences (not more!) why you are interested and whether you already took a class in Coding Theory or not (it's not necessary but needed for topics distribution)

ECTS: 3

Notes:

Mathematical Field: Algebra

Learning Outcome:

By the end of this seminar, students will have a working understanding of the core error models and coding frameworks relevant to DNA-based information systems — including deletion-correcting codes, reconstruction problems, constrained codes, and storage channel models. Beyond the mathematical content, students will develop the ability to independently read and critically assess research-level papers, identify the key contributions and limitations of a result, and present technical material clearly to a mathematical audience. Students will also practice giving and receiving constructive peer feedback.

Course Materials:

There is no single required textbook. Each week's reading is a primary research paper assigned in coordination with the lecture module. Papers span topics including string metrics, Varshamov–Tenengolts codes, the coupon collector problem, graph capacity, DNA synthesis channels, and nanopore sequencing models. A reading list will be distributed at the start of the semester. Students are encouraged to consult standard references in coding theory and combinatorics as background, and the lecture notes from the companion module will be made available throughout the course.

Students without prior exposure to coding theory, or those in their second year of BSc, are encouraged to consult with the lecturer before the semester begins to select a seminar paper suited to their background.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Joachim Rosenthal

Requirements:

Prior Knowledge:

First-year linear algebra, analysis, basic probability, and foundational knowledge of combinatorics and discrete mathematics.

Prior knowledge of coding theory is not a formal prerequisite, but it is highly recommended. While familiarity with the fundamentals of the field will certainly be an asset, the course is designed to be accessible to any student with a strong background in pure mathematics.

Note: Students who have not previously encountered the fundamentals of coding theory should be prepared to invest the additional time necessary to familiarize themselves with some basic concepts and definitions.

Assessment:

- Prepare a talk and present it in class.
- Hand in a typed (LaTeX) version of the talk
- Be present throughout the semester and participate actively in discussions

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Module MAT 681 Coding Theory Meets Molecular Biology

07SMMAT681 / Lecture with Practical Exercises

Description:

General description:

DNA-based data storage has emerged as a compelling alternative to conventional magnetic and solid-state storage, offering extraordinary density, long-term durability, and near-zero idle power consumption. However, the biochemical nature of DNA introduces a distinct and varied class of challenges that cannot be addressed by classical coding methods alone: from insertions, deletions, and substitutions at the symbol level, to higher-order phenomena such as unordered data retrieval and the probabilistic nature of sequencing coverage. Addressing these requires developing fundamentally new error channel models, coding schemes, and algorithmic frameworks. This lecture module covers the mathematical foundations underlying these challenges, progressing from classical string metrics and deletion-correcting codes through to reconstruction theory, the coded coupon collector problem, constrained codes, and emerging channel models including DNA synthesis and nanopore sequencing. The course also explores novel alternatives to the standard DNA storage paradigm. Students will engage with both the theoretical tools and the open problems that define this active research area.

ECTS: 5

Notes:

Mathematical Field: Algebra

Note: Students enrolled in the seminar module "Coding Theory Meets Molecular Biology" must take this lecture concurrently. The lecture may however be taken independently without the seminar.

Learning Outcome:

By the end of this course, students will have a solid understanding of the mathematical foundations of coding theory for DNA-based data storage, spanning string metrics, deletion-correcting codes, reconstruction theory, constrained codes, and emerging channel models. Beyond the technical content, the primary goal of this course is to develop students' ability to think critically and independently about open research problems. Through a hands-on independent project, students will practice identifying a meaningful research question, building on existing literature, and pursuing original ideas — learning from both successful results and dead ends. This course aims to foster the creativity and problem-solving mindset essential for research in mathematics and related fields.

Course Materials:

There is no single required textbook. The course material is self-contained and will be delivered through weekly lecture notes uploaded by the instructor. Students without prior exposure to coding theory are encouraged to consult with the lecturer to identify suitable background references for their level.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Joachim Rosenthal

Requirements:

Prior Knowledge:

First-year linear algebra, analysis, basic probability, and foundational knowledge of combinatorics and discrete mathematics. Prior knowledge of coding theory is not a formal prerequisite but is highly recommended.

Assessment:

Assessment is based entirely on project milestones, the final written report, and active participation. There are no exams. Projects are completed in pairs. Students are not expected to solve their chosen problem (while this will be great!). A rigorous analysis of attempted approaches, including a critical evaluation of why they did not work and what would be needed to make progress, is considered a

fully valid and successful submission.

Module Execution of Justice

02SMW47_30 / Course

Description:

General description:

Das Modul wird vom PhD BmEL / Law Track in Zusammenarbeit mit dem Kompetenzzentrum MERH und Justizvollzug und Wiedereingliederung des Kantons Zürich angeboten. In den Vorlesungen widmen sich ausgewiesene Expertinnen und Experten aus Lehre und Praxis aktuellen Themen des Justizvollzuges. U.a. werden Themengebiete wie die häusliche Gewalt, der Umgang mit elektronischen Fussfesseln oder jugendlichen Gewaltsträtern behandelt. Das komplette und aktuelle Programm ist auf OLAT und der Website des MERH (<http://www.merh.uzh.ch/de.html>) ersichtlich.

ECTS: 3

Notes:

Die Einschreibung erfolgt über die Webseite (<https://www.bmel.uzh.ch/de/law/module/einschreibungen/>) des PhD BmEL. Für die Einschreibung gilt die Modulbuchungsfrist auf der Webseite des PhD BmEL.

Learning Outcome:

Die Teilnehmenden sollen die behandelten und aktuellen Themen des Justizvollzuges verstehen und eigenständig in einer kurzen, schriftlichen Arbeit vertiefen. Sie sind imstande, das Besprochene aus verschiedenen Blickwinkeln zu beleuchten und mit vorhandenem Wissen zu verknüpfen. Sie können die behandelte Problematik autonom weiterdenken.

Target Groups:

Doktorierende des PhD Program BmEL

Languages of Instruction:

Module PhD Course: Development Economics II

03SMDOEC1307 / Course

Description:

General description:

This class contributes to the sequence in development economics. Development economics II mostly focus on human capital and public economics issues, Development economics III introduces economy wide issues.

The PhD courses Development Economics I–IV are offered as a full sequence. Students may take a single course or all four, and courses may be taken out of sequence, but we encourage the whole series for a full preparation to do research in the field.

ECTS: 2

Notes:

Venue: SOF-G-21

Learning Outcome:

By the end of the whole sequence, students should be ready to conduct research in development

Target Groups:

PhD Students Zurich GSE

Course Materials:

Slides will be provided, as well as links to papers

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Esther Duflo

Requirements:

Prior Knowledge:

Microeconomics for Research Students Part I and II (concurrent or prior), and basic statistics

Assessment:

- Class Participation (10%)
- Referee Report (10%): I will assign one referee report. You are required to work individually on this task.
- Research Proposal (20%): A final research proposal (7-10 pages) is due the penultimate week of class. The proposal should clearly describe: i) the research question and the contribution to the literature; ii) the conceptual framework and the hypotheses; iii) the data sources you plan to use; iv) the empirical strategy. The proposals can center around an experimental design, but, in this case, it should also include a discussion of existing data sources (including from previous experiments) that could be used to provide preliminary evidence on the research question. You are encouraged to meet me early in the quarter to discuss your ideas. We will schedule student presentations in the last week.
- Final Exam (60%): There will be a closed-book final exam the last day of class (Tuesday, 15.12.2026, 16:00-18:00).

Grading Scale:

1-6, Half Grades Given

Module M3L 110 Computers and Computing

07SMM3L110 / Lecture with Practical Exercises

Description:

General description:

The goal of this course is to introduce to:

- computers, their components and basic working
- digital logic, binary representation and floating points operations
- scripting and command line programs
- compilers and programs
- basic algorithms, computational complexity
- information, compression and encryption

ECTS: 5

Learning Outcome:

Understanding the basic concepts of:

- basics of computers, programs, compilers
- command line programming environments
- basics of a compiled language
- core algorithms
- concept of computational complexity
- error correction and encryption

Target Groups:

solely:

- BSc Angewandte Mathematik und Machine Learning
- Minor Angewandte Mathematik und Machine Learning

Course Materials:

- Slides and online material; provided during the lectures.

Merkmale:

Responsible instructor:

Reinhard Furrer

Requirements:

Prior Knowledge:

No prior knowledge required.

Assessment:

- Written exam, BYOD
- Active participation: checked through quizzes, in-class tasks and questions, submitting and assessing assignment responses. Details are announced in class.
- There will be a Testat (mandatory exercises for exam). Details are announced in class
- Language of Assessment Deutsch /(English)

Module Computational Modeling of Behavior

06SMG70p107 / Module

Description:

General description:

Computational modeling aims to improve our understanding of human behavior by building mathematical models or computer simulations of the processes involved. This allows researchers to formalize their theories, specify them with more precision, understand better how they work, derive more reliable predictions and test them more robustly.

This course will introduce you to the why and how of modeling - the goals, philosophy and implementation of basic modeling techniques. You will learn why we do modeling and what makes a good model. You will learn how to use R to build computational models, fit them to data, evaluate their performance and compare them against competing models. You will also learn how to use reproducible workflows for modeling.

Prior experience with R is required. To make the most of this class, you need to know how to write custom functions and how to use control flow (if/else statements, for/while loops). For a refresher or self-study prior to the course, see rstudio-education.github.io/hopr/. The course will assume you are familiar with the material in chapters 1-7, 9, and 11.

A good grasp of statistics and probability is helpful, but the course will include an overview/revision of relevant topics. Please bring a laptop with R and Rstudio installed. The course will involve a mixture of lecture segments, hands-on programming, homework exercises and a final modeling project.

Module Anthropology of Rural Development

06SM721p134 / Module

Description:

General description:

This core seminar offers an introduction to the anthropological study of rural development, agricultural transformation, and exploring how development processes shape and are shaped by the social, cultural, and economic realities of rural communities. Empirical examples will be drawn from Central Asia, West Africa, and other regions. Students will engage with foundational and contemporary theoretical frameworks in development anthropology, examining concepts such as local knowledge, power hierarchies, institutions, agency and transformation. The students will explore how neoliberal agricultural policies and agricultural transformation, along with the colonialism, and globalization gets intertwined with lived experiences of rural populations. Some themes which the seminar will focus on, among others, are land reform, resistance, food sovereignty, environmental conservation, and rural livelihoods.

ECTS: 6

Learning Outcome:

By the end of this seminar, students will have acquired an understanding of the key theoretical debates and conceptual tools that define the anthropological study of rural development. Students will develop the following academic skills:

1. Critical analysis of development interventions in rural settings using core anthropological concepts such as local knowledge, agency, and power relations;
2. Be able to interpret case studies from diverse rural contexts and assess how communities negotiate, resist, or adapt to external development programs;
3. Apply theoretical frameworks including modernization theory, post-development, and political ecology - to real-world rural development issues

Furthermore, the following basic competencies will be addressed in this course.

- reading, understanding and analysing academic texts
- writing your own text passages and texts
- presenting and discussing

Module Research Tutorials in East Asian Art History

06SMG32p101 / Module

Description:

General description:

Research Tutorials in East Asian Art History provide doctoral researchers with one-to-one academic guidance tailored to their individual projects. They offer focused discussion and advice on research questions, methods, sources, writing, project planning, and professional development, supporting students in producing high-quality research and completing their dissertations within the planned timeframe. The tutorials complement the Research Colloquium, which focuses on presenting work in progress, peer feedback, and collective scholarly exchange. Together, the two formats combine individual mentorship with participation in a broader research community.

ECTS: 1

Module MAT 503 Introduction to Algebraic Topology

07SMMAT503DP / Lecture with Practical Exercises

Description:

General description:

Algebraic topology provides tools to study topological spaces by computing their algebraic invariants. Important examples of such invariants are homology and cohomology groups used in all branches of modern mathematics.

This course focuses on various constructions of homology (simplicial, cellular, singular, axiomatic), on the study of their properties and on the development of effective computational tools (such as Universal Coefficient Theorem, Mayer-Vietoris exact sequence, etc.). In addition, this course covers cohomology rings, the Künneth Theorem and Poincaré duality.

Module MAT 556DP Category Theory

07SMMAT556DP / Lecture with Practical Exercises

Description:

General description:

This course provides an introduction to category theory as a tool for organizing and unifying ideas across modern mathematics. We will develop the core language of categories, functors, and natural transformations, with an emphasis on universal properties and representability. We will study limits and colimits, adjoint functors, and Kan extensions, and learn how these concepts clarify constructions in algebra, topology, and related fields.

ECTS: 3

Notes:

Mathematical Fields: Algebra; Geometry/Topology

Learning Outcome:

By the end of the course, students will be able to work fluently with the basic language of categories, functors, and natural transformations; use universal properties and the Yoneda lemma to characterize and construct objects via representability; compute and apply limits and colimits in standard examples; recognize and use adjoint functors as a central organizing principle; and understand Kan extensions as a unifying framework for universal constructions and functorial approximation.

Target Groups:

This is the module for Phd students

Math BSc students from 3rd semester and MSc students please book module MAT556 Category Theory without DP in the name

Module MAT 632DP Theoretical Physics for Mathematicians I: Classical Mechanics & Electrodynamics 07SMMAT632DP / Lecture with Practical Exercises

Description:

General description:

This course introduces central ideas of classical physics from a mathematically oriented perspective. It is designed for mathematics students who are interested in understanding how fundamental physical theories are formulated in precise mathematical terms.

The course focuses on the mathematical structures underlying classical mechanics and electrodynamics. Starting from the modeling of physical systems, we develop the Lagrangian and Hamiltonian formulations of mechanics and explore the role of symmetries and conservation laws. The second part of the course introduces basic concepts of classical field theory with a particular emphasis on the structure of Maxwell's equations.

Throughout the course, physical theories are presented as examples of broader mathematical ideas such as variational principles, differential equations, and geometric structures. The aim is not only to learn the basic models of classical physics but also to understand the mathematical concepts that organize and connect them.

The course prepares the ground for the second part of the sequence, which introduces the mathematical structure of quantum mechanics.

ECTS: 1

Notes:

Mathematical Fields:

- Analysis
- Geometry/Topology

In case of questions, please contact the lecturer PD Dr. Nima Moshayedi

Learning Outcome:

After successfully completing the course, students will be able to formulate basic models of classical mechanics using the Lagrangian and Hamiltonian formalisms and explain how variational principles lead to equations of motion. They will understand the role of symmetries and conservation laws in classical mechanics and describe the fundamental structure of classical field theory with particular emphasis on Maxwell's equations. Students will be able to interpret physical theories in terms of their underlying mathematical structures, including variational principles, differential equations, and geometric formulations, and connect these ideas to mathematical topics such as calculus of variations, differential equations, and linear algebra. They will also be able to apply mathematical reasoning to analyze and discuss simple physical models.

Target Groups:

This is the module to be booked by PhD students,
BSc and MSc students please book Module MAT632 without DP in the name

Module MAT 681DP Coding Theory Meets Molecular Biology

07SMMAT681DP / Lecture with Practical Exercises

Description:

General description:

DNA-based data storage has emerged as a compelling alternative to conventional magnetic and solid-state storage, offering extraordinary density, long-term durability, and near-zero idle power consumption. However, the biochemical nature of DNA introduces a distinct and varied class of challenges that cannot be addressed by classical coding methods alone: from insertions, deletions, and substitutions at the symbol level, to higher-order phenomena such as unordered data retrieval and the probabilistic nature of sequencing coverage. Addressing these requires developing fundamentally new error channel models, coding schemes, and algorithmic frameworks. This lecture module covers the mathematical foundations underlying these challenges, progressing from classical string metrics and deletion-correcting codes through to reconstruction theory, the coded coupon collector problem, constrained codes, and emerging channel models including DNA synthesis and nanopore sequencing. The course also explores novel alternatives to the standard DNA storage paradigm. Students will engage with both the theoretical tools and the open problems that define this active research area.

ECTS: 1

Notes:

Mathematical Field: Algebra

Note: This is the Module to be booked by PhD students BSc and MSc students please book the module without DP in the name.

Note: Students enrolled in the seminar module "Coding Theory Meets Molecular Biology" must take this lecture concurrently. The lecture may however be taken independently without the seminar.

Learning Outcome:

By the end of this course, students will have a solid understanding of the mathematical foundations of coding theory for DNA-based data storage, spanning string metrics, deletion-correcting codes, reconstruction theory, constrained codes, and emerging channel models. Beyond the technical content, the primary goal of this course is to develop students' ability to think critically and independently about open research problems. Through a hands-on independent project, students will practice identifying a meaningful research question, building on existing literature, and pursuing original ideas — learning from both successful results and dead ends. This course aims to foster the creativity and problem-solving mindset essential for research in mathematics and related fields.

Course Materials:

There is no single required textbook. The course material is self-contained and will be delivered through weekly lecture notes uploaded by the instructor. Students without prior exposure to coding theory are encouraged to consult with the lecturer to identify suitable background references for their level.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Joachim Rosenthal

Requirements:

Prior Knowledge:

First-year linear algebra, analysis, basic probability, and foundational knowledge of combinatorics and discrete mathematics. Prior knowledge of coding theory is not a formal prerequisite but is highly recommended.

Assessment:

Assessment is based entirely on project milestones, the final written report, and active participation. There are no exams. Projects are completed in pairs. Students

are not expected to solve their chosen problem (while this will be great!). A rigorous analysis of attempted approaches, including a critical evaluation of why they did not work and what would be needed to make progress, is considered a fully valid and successful submission.

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Module MAT 749DP Mathematical Theory of General Relativity

07SMMAT749DP / Lecture with Practical Exercises

Description:

General description:

In the theory of general relativity space and time are unified as one geometric entity---spacetime---which is mathematically described as a 3+1 dimensional Lorentzian manifold. The dynamics of spacetime are governed by the celebrated Einstein equations. In this course, we will develop the relevant concepts from analysis, PDE and differential geometry to formulate the precise mathematical framework of general relativity and study some of its most striking predictions, including black holes and gravitational waves.

ECTS: 3

Notes:

Mathematical Fields: Analysis Geometry/Topology

This is the module to be booked by PhD students, MSc and BSc students please book MAT749 without DP in the name.

Learning Outcome:

- Use the basic language and techniques of Lorentzian geometry.
- Formulate the Cauchy problem for the Einstein equations.
- Derive robust energy estimates for linear wave equations on curved spacetimes.
- Analyze the geometry of the Schwarzschild solution and related spherically symmetric spacetimes.

Course Materials:

- Wald, Robert; General relativity, The University of Chicago Press, 1984
- Stephen W. Hawking and George F.R. Ellis, The large scale structure of space-time. Cambridge University Press, 1973.
- Ringström, Hans; The Cauchy problem in General relativity, ESI Lectures in Mathematics & Physics, 2009.
- Barrett O'Neill, Semi-Riemannian geometry with applications to relativity. Academic press, 1983.
- John M. Lee, Introduction to Riemannian manifolds. Springer, 1997.

Merkmale:

Responsible instructor: Christoph Kehle

Requirements:

Prior Knowledge: Analysis/PDE; some familiarity with differential geometry

Grading Scale: Pass/Fail

Repeatability: Can be repeated once

Organisation:

Offer pattern: 1 Semester (Irregular)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00

Cancellation Deadline: from We 12.08.2026 10:00 to Tu 17.11.2026 24:00

Organisation: Department of Mathematics

Offered in: Fall Semester 2026

Component of:

Module Art History of the Early Modern Period

06SM640p053 / Module

Description:

General description:

Das Modul erforscht anhand wechselnder Vertiefungen die Kunst der frühen Neuzeit. Der Fokus kann auf einer Region in ihrem transkulturellen Wechselverhältnis zu anderen Regionen, auf einem künstlerischen Medium oder einem methodischen Zugang liegen.

ECTS: 6

Learning Outcome:

Die Studierenden setzen sich mit der Kunst der frühen Neuzeit am Beispiel einer bestimmten Region, eines künstlerischen Mediums oder einer methodologischen Fragestellung auseinander. Sie können kritisch mit Forschungsliteratur umgehen und sind in der Lage, eigene Fragestellungen zu formulieren.

Languages of Instruction:

Deutsch

Merkmale:

Responsible instructor: Anna Pawlak

Requirements:

Assessment: Referat und ausführliches Handout

Grading Scale: Pass/Fail

Repeatability: Can't be repeated

Module Japan's Changing Media System and Agenda Setting

06SMG22p104 / Module

Description:

General description:

The workshop consists of two parts. In the first part, we will discuss contemporary transformations in the Japanese media system and Japanese journalism with Professor Kaori Hayashi of the University of Tokyo. In the second part, we will examine forms of agenda-setting and agenda-cutting within the Japanese media system in greater detail together with Yosuke Buchmeier of Oxford University.

Participating doctoral candidates will also have the opportunity to present their own research projects and discuss them with the invited guest lecturers.

ECTS: 3

Languages of Instruction:

Module MAT 767DP Interval exchange transformations and Teichmüller flow

07SMMAT767DP / Course

Description:

General description:

We will discuss the approach to Teichmüller flow based on the Rauzy-Veech renormalization theory. Topics include classical theorems such as weak mixing, the Kontsevich-Zorich conjecture and exponential mixing, as well as more recent developments.

Module PhD seminar: Field experiments in practice

03SMDOEC1308 / Doktorandenseminar

Description:

General description:

This doctoral seminar introduces PhD students to the practical challenges of conducting field experiments. The seminar combines guest sessions with feedback on participants' own projects. It focuses on the parts of field experimental research that are often difficult to see in published papers, including fieldwork obstacles, collaboration with local partners and institutions, implementation fidelity, treatment take-up, budgeting, funding constraints, and how practical constraints shape research design. Participants will discuss concrete project experiences and receive feedback on their own research designs, preliminary results, or fieldwork challenges.

ECTS: 2

Notes:

Please submit your application to teambrenoe@business.uzh.ch as a single PDF containing:

- your CV;
- a motivation letter explaining why you would like to attend the course; and
- a brief abstract of the project you would like to discuss during the course.

The application deadline is November 15.

Only students who have been admitted based on their application may participate in the seminar.

Learning Outcome:

After completing the seminar, participants should be able to: explain practical challenges in the design and implementation of field experiments; assess how local context, institutional partners, costs, funding, implementation fidelity and treatment take-up shape research design; present a field-experiment project or project idea concisely; give and receive structured feedback on research design, preliminary results and fieldwork obstacles; and translate practical lessons from the seminar into their own research.

Course Materials:

Participant/team project materials and selected papers by the participants/guest speakers themselves. Final reading list and any required materials to be announced closer to the date.

Merkmale:

Target Group: Suitable for English Speakers

Responsible instructor:

Anne Ardila Brenoe

Requirements:

Prerequisites:

Enrollment in a PhD program is mandatory.

Prior Knowledge:

Masters-level familiarity with empirical research methods is helpful. Prior exposure to field experiments or an own research/project idea is advantageous for the team presentation and feedback format.

Assessment:

Pass/fail assessment based on active participation throughout the block seminar.

Grading Scale:

Pass/Fail

Repeatability:

Can be repeated once

Organisation:

Offer pattern: 1 Semester (One-Time)

Booking Deadline/Period: from We 12.08.2026 10:00 to Tu 06.10.2026 24:00
