Event Bilder als Beweise

06SE380p807a / Seminar / 5,534

Description:

Business event contents:

Immer häufiger ist zu hören, den Bildern sei nicht mehr zu trauen. Tatsächlich aber war die Beweiskraft technischer Bilder nie unumstritten. Zwar war bereits in den Anfängen der Fotografie im 19. Jahrhundert klar, dass hier ein völlig neues Mittel der Beweissicherung entstanden war. Doch zugleich wurden Fotografien von Beginn an retuschiert und manipuliert, und was sie tatsächlich zeigen und beweisen konnten, war stets Gegenstand widerstreitender Interpretationen. Unter digitalen Bedingungen hat sich diese Spannung verschärft: Während Smartphones und soziale Medien Aufnahmen von Polizeigewalt, Menschenrechtsverletzungen und Kriegsverbrechen in Echtzeit global zirkulieren lassen, steigern generative KI und andere digitale Tools die Möglichkeiten der Fälschung. Der Manipulationsverdacht ist damit heute nahezu zum Standardmodus der Bildwahrnehmung geworden.

Mit dem Aufkommen digitaler Medien haben sich allerdings auch neue Formen forensischer Analyse, kollektiver Bildinterpretation und vernetzter Beweissicherung etabliert, die sowohl auf die Absicherung von Beweisansprüchen wie auch auf die Aufdeckung von Manipulationen zielen. Rechercheagenturen wie Forensic Architecture oder Bellingcat rekonstruieren aus verstreuten Aufzeichnungen umstrittene Ereignisse, bildforensische Verfahren machen digitale Spuren der Bearbeitung lesbar, und in sozialen Medien entstehen spielerische wie problematische Formen pseudoforensischer Investigation.

In gemeinsamen Lektüren, Recherchen und Diskussionen widmet sich das Seminar solchen und weiteren künstlerischen, journalistischen, wissenschaftlichen und medialen Alltagspraktiken, in denen digitale Fotos und Videos als Beweise verhandelt werden. Es fragt nicht einfach, ob den Bildern noch zu trauen ist, sondern wie Vertrauen in die Beweiskraft von Bildern gegenwärtig erzeugt, bestritten und erschüttert wird.

Notes:

Das Seminar wird als Blockveranstaltung durchgeführt und zwar Mo 25.01.2027 bis Do 28.01.2027 jeweils von 9-16 Uhr .

Event Stay Abroad Portfolio

06ST440-410a / Selbststudium mit Leistungsnachweis / 4,059

Description:

Business event contents:

Students who have spent six or more weeks within one year and with max. one interruption (i.e. min. 42 days) in the same particular Anglophone region (region = usually not a whole country) compile a research-based portfolio. The portfolio must be handed in no later than 6 months after the end of the stay abroad and consists of four parts: (1) a short account of their stay abroad, in the form of a report that goes beyond mere narrative (i.e. which includes some meta-level reflection on the experience); (2) a brief presentation and discussion of one linguistic feature of the local variety of English, in a format that would be accessible to non- specialists; (3) an encyclopedia-style entry about one literary text or author from the region; (4) a short journalistic text on one key cultural and/or historical dimension of the Anglophone area in question.

Notes:

Students must submit written proof of their stay abroad (e.g. flight tickets, certificates of employment, etc.) in their application in the booking tool. Study abroad exchange semesters and summer schools do NOT count as a possible stay abroad case for the portfolio. Before applying to this module students must contact the study abroad coordinator at studyabroad@es.uzh.ch to confirm that their stay abroad fulfils the requirements and to receive additional guidelines.

Description:

Business event contents:

Im Laufe des Praktikums erhalten die Studierenden Einblicke in die vielfältigen Tätigkeiten des Schweizerischen Instituts für Kinder- und Jugendmedien SIKJM, das als nationales Kompetenzzentrum von praxisorientierten Projekten der literalen Förderung bis hin zur Forschung unterschiedlichste Aufgaben wahrnimmt. Das SIKJM beherbergt in seiner Bibliothek verschiedene historische Kinderbuchsammlungen, darunter die «Sammlung Waldmann» mit einem gewichtigen Bestand englischsprachiger Bücher, dessen inhaltliche Erschliessung grosse Potentiale aufweist. Es bieten sich verschiedene Möglichkeiten, nach Absprache mit der Kandidatin/dem Kandidaten, aus einem ausgewählten gattungs-, epochen- oder themenspezifischen Blickwinkel zur weiteren Erschliessung dieser Sammlung bzw. des Nachlasses von Elisabeth Waldmann beizutragen.

Das Praktikum wird mit einem Portfolio basierend auf den Forschungsergebnissen abgeschlossen, vorzugsweise in Form von Inhalten für die Social Media Kanäle des SIKJM und des Englischen Seminars

Event Short Internship: The Art Collection of the Zurich James Joyce Foundation
06PR440p518a / Praktikum / 4,068

Description:

Business event contents:

The Zurich James Joyce Foundation hosts one of the world's most important collections on the Irish modernist James Joyce. In addition to books and other types of texts, the Foundation also has a unique collection of posters, photographs, and artworks.

At the start of their internship, students will be given a short introduction into the history and activities of the Foundation. They will also be given material that will help them gain a basic overview of the life and works of James Joyce. However, the main aim of this short internship project is for the students to assist the Foundation team in creating an illustrated inventory of the artworks in the Foundation's collection.

Tasks will include:

taking high-quality pictures of the artworks; researching information on the creators and the artworks in question; identifying gaps in the information available; defining a set of keywords that will make it easier to locate individual works; presenting one piece of art on the Foundation's website.

In addition, students may be asked to assist members of the team during public events, readings, etc..

The analysis should be concerned with either a distinctive linguistic feature occurring in the particular region or an anglophone literary work which displays a strong connection to that region.

Event Formale Strategien und Ausdrucksmodi des zeitgenössischen Dokumentarfilms
06KO255p503a / Colloquium / 3,370

Description:

Business event contents:

In der Veranstaltung wird auf die vielfältigen Ausdrucksformen dokumentarischen Arbeitens anhand theoretischer Texte und einer grossen Auswahl von zeitgenössischen Filmbeispielen eingegangen und gemeinsam mit den Studierenden diskutiert. Im Zentrum stehen dabei Fragen der dokumentarischen Haltung und der ethischen Verantwortlichkeit ebenso wie zeitgenössische Erzählstrategien und Präsentationsformen (Reenactment, Animation und CGI, Drohnenflüge, Musik, Sounddesign). Dabei richtet sich der Fokus stets darauf, wie unterschiedliche formal-ästhetische, erzählerische und stilistische Entscheidungen das komplexe Verhältnis von Authentizität und Fiktion berühren und reflektieren. Der Filmkorpus setzt sich mehrheitlich aus aktuellen dokumentarischen Arbeiten zusammen, wobei auch Schweizer Produktionen angemessen berücksichtigt werden. Für die Teilnahme am Kurs sind keine spezifischen theoretischen Vorkenntnisse erforderlich; erwartet wird jedoch eine aktive Mitarbeit, die das selbstständige Lesen der Texte sowie die Sichtung von Filmen ausserhalb der Unterrichtszeit einschliesst. Hierfür ist ein eigens vorgesehener Tag des Selbststudiums eingeplant.

Event Shakespeare Week
06EX440p514a / Field Trip / 2,745

Description:

Business event contents:

25 years ago, the English Department started the beloved tradition of the Shakespeare Week. Taking students to London and Stratford, this excursion offers an exciting encounter with new productions of Shakespeare's plays and explores his legacy through the material sites connected with his life and work. At London's Globe Theatre we will find out more about the historical theatre practices, while at Stratford we will explore the places where Shakespeare was born and lived with his family. Most importantly, we will see some Shakespeare plays in performance - in the summer of 2026, some of his most famous comedies including A Midsummer Night's Dream and Much Ado About Nothing. Post-production conversations among participant - wherever possible including actors, directors and other theatre practitioners -- will help students appreciate the performances watched, and will feed into the theatre reviews students will learn to write.

Notes:

Students must have participated in the excursion in summer 2026 to book this module.

Event Short Internship: Library Exhibition (University Library English Literature and Linguistics)
06PR440p516a / Praktikum / 2,747

Description:

Business event contents:

This internship offers master's students the opportunity to actively contribute to the curation of a library exhibition. A possible topic for the exhibition could be centered around (feminist) retellings of classical myths, but other topic ideas are welcome. Working closely with the UB Anglistik's library team, the participant will engage in extensive research and create additional materials for the exhibition. Tasks include choosing a suitable topic, researching relevant titles, getting an insight into various library workflows, drafting texts, gathering supplemental information to enrich the exhibition's context and creating an accompanying website.

At the end of the internship, students will submit a short documentation of their practical work to the module coordinator at UZH, together with a timesheet signed by the contact person at the partner institution.

If both the partner institution and the student agree, there can be max. one follow-up internship in a future semester. It is not possible to receive ECTS credits for more than two internships at the same partner institution.

06PR683p002a / Praktikum / 3,947

Description:

Business event contents:

In Zusammenarbeit mit der Kantonsarchäologie VS und der Universität Lausanne finden seit dem Sommer 2024 Gletscherprospektionen statt. Ziel ist es, die Funde aus den schmelzenden Gletschern grossflächig zu sichern. Dazu wird dieses Jahr das inzwischen gletscherfreie Gebiet des Monte Moros an der Grenze nach Italien begangen. Zudem werden Eisenschmelzplätze in den Walliser Hochalpen mittels geophysikalischer Prospektion und durch Sondagen untersucht. Den Studierenden werden dabei grundlegende Kenntnisse der Prospektion, Dokumentation, Grabungstätigkeit und Vermessung vermittelt.

Notes:

Erwartet wird eine hohe körperliche Belastbarkeit. Erfahrung im Hochgebirge/auf Gletschern ist wünschenswert. Die An- und Abreise erfolgt eigenständig. Unterkunft und Logis stellen die Forschungsprojekte.

Event Exkursion an die Duisburger Filmwoche
06EX255p008a / Field Trip / 877

Description:

Business event contents:

Die Duisburger Filmwoche gehört seit 1977 zu den interessantesten Dokumentarfilmfestivals im deutschsprachigen Raum; 2026 feiert sie ihren 50. Geburtstag. Eine Besonderheit des Festivals, das sich Produktionen aus Deutschland, Österreich und der Schweiz widmet, ist der Schwerpunkt auf den ausführlichen Gesprächen und Diskussionen nach den Filmen, die binnen 24 Stunden protokolliert werden. Da es keine gleichzeitigen Screenings gibt, schauen alle Festivalbesucher*innen die Filme gemeinsam und haben danach Zeit, mit den Filmemacher*innen über die ästhetischen, formalen und politischen Entscheidungen zu sprechen. Auch deshalb eignet sich die Filmwoche besonders für filmwissenschaftliche Exkursionen.

In einer vorbereitenden Seminarsitzung (22. Oktober, 10:00 bis 13:00) wird ein film- und theoriehistorischer Rahmen für die Exkursion geschaffen. Dabei wird die Geschichte des Festivals ebenso wie das enge Verhältnis zwischen Dokumentarfilmproduktion und öffentlich-rechtlichem Fernsehen eine wichtige Rolle spielen. Nach dem Festival (13. November 10:00 bis 13:00) findet eine Nachbereitungssitzung statt, bei der die Eindrücke und Erfahrungen des Festivalbesuchs im Zentrum stehen. Im Rahmen der Exkursion sind auch Gespräche mit Mitgliedern der Duisburger Auswahlkommission oder einer der Jurys geplant.

Notes:

Die Anmeldung durch Modulbuchung ist verbindlich. Die Exkursion findet an den folgenden Daten statt: Montag, 2. November (Anreise tagsüber), bis Donnerstag, 5. November (Rückreise tagsüber). Die verbindlichen Vor- und Nachbesprechungstermine sind: Donnerstag, 22. Oktober, 10:00 bis 13:00 Uhr sowie Freitag, 13. November, 10:00 bis 13:00 Uhr. Im Rahmen der Exkursion werden Kosten entstehen, die von den Studierenden selbst übernommen werden: 3 Übernachtungen in Duisburg (Kosten abhängig von selbst gewählter Unterkunft) sowie Verpflegung. Die Akkreditierung fürs Festival (15 Euro) und die Reisekosten mit dem Zug zwischen Zürich und Duisburg (bis zu CHF 125) werden von der Universität Zürich getragen.

Event Advanced Research Internship: Waxing and Waning Words in Middle English (WAW-ME)
06PR440p515a / Praktikum / 213

Description:

Business event contents:

This internship offers students hands-on experience with historical lexicology and semantics through participation in the project Waxing and Waning Words: Lexical Variation and Change in Middle English (<https://www.waw-me.uzh.ch/en/About.html>). The project focuses on four lexical domains: medicine, law, religion, and education. Interns will assist with data collection (e.g., compiling and organising lexical material from Middle English lexicographic sources and corpora) and copy-editing of scholarly outputs. The internship provides practical insight into Middle English lexical and semantic change and the workflows of academic research.

Students are expected to put in 180 hours in the course of the semester. Initial instruction will be provided on site at the project office in FRF (<https://www.plaene.uzh.ch/FRF>) (days by arrangement). Afterwards students can work on site or from home; however, they are expected to participate in bi-weekly meetings.

Notes:

Students must submit a letter of motivation, their newest transcript and information on their language skills to waw-me@es.uzh.ch by August 12th, 2026.

Students must also apply to the module via the module booking tool.

Event digital social sciences: AI, Text2Data and Applied Economics (S)
03SEDOEC6116 / Doktorandenseminar / 3,110

Description:

Business event contents:

In this seminar aimed at PhD students of all years, we will introduce new AI and text2data methods in economics. We will experiment with a "lab model", where groups of students explore research ideas with new tools and data under the instructors' guidance. The aim is explore a wide set of strategies and methods in parallel. In the end, we hope that participants complete one joint paper - with the entire group including the instructors as authors. We will proceed in three steps:

Day 1: Introduction, Overview, and Assignments (Corpora, Methods, Tools).
Student presentation of hallmark papers in Text2data meets Applied Economics

Day 2: Presentations of methodological choices and preliminary results. We discuss as a team and provide feedback.

Day 3: Presentation of final results. We pick most promising results and discuss strategies for producing a paper.

Event The Rational Inquirer: Disagreement, Evidence, and Doxastic Attitudes
06SE160p507a / Seminar / 4,077

Description:

Business event contents:

In this seminar, we will primarily read the recent book (2025) by Prof. Michele Palmira. The book examines how rational agents ought to respond to disagreement. We will also engage with a number of foundational papers on the topic of disagreement.

The aim of the seminar is to prepare students to present their work at a small workshop at the end of the semester, which Michele Palmira will attend. This will provide them with an opportunity to develop proposals and/or objections to which he will seek to respond. The assessment is designed with this goal in mind.

Event Zwischen Handschrift, Buchdruck und Bildschirm – Materialität in den neueren skandinavischen Literaturen
06SE360-602a / Seminar / 3,108

Description:

Business event contents:

In den letzten Jahrzehnten hat sich die Literaturwissenschaft intensiv mit der Frage auseinandergesetzt, ob und inwiefern die materielle Grundlage von Texten auf unsere Lektüregewohnheiten Einfluss nimmt oder nicht. Macht es einen Unterschied, ob wir einen Text auf dem Blatt einer Handschrift, in einem gedruckten Buch oder am scrollend am Bildschirm lesen. Das Seminar soll in die unterschiedlichen Forschungstraditionen der Semiotik, der Medientheorie, der Buchgeschichte und der Editionsphilologie einführen, die sich mit den entsprechenden Phänomenen auseinandergesetzt haben. Dabei werden wir fortlaufend aus Beispiele aus unterschiedlichen Epochen der skandinavischen Literaturen (Aufklärung, Romantik, Moderner Durchbruch, Klassische Moderne und Gegenwart) zurückgreifen, um die theoretischen Konzepte in der Auseinandersetzung mit einem konkreten Material zu erproben. Als integraler Teil der Veranstaltung ist eine Archivreise nach Skandinavien vorgesehen. Die Detailplanung findet zu Vorlesungsbeginn gemeinsam statt.

Event Pergament, Papier, Archiv – Materialitäten der älteren skandinavischen Literaturen
06SE360-602b / Seminar / 2,128

Description:

Business event contents:

Kleine Heftchen, hingeschmierte Kladden, illuminierte Prachthandschriften: Vormoderne Texte sind bis zur Erfindung des Buchdrucks in handschriftlicher Form verfasst. Oftmals sind Texte in einer Vielzahl von Abschriften überliefert, und jeder Textzeuge weist materielle Besonderheiten auf. Ausgehend von materiell-philologischen und historisch-mediologischen Ansätzen werden wir uns in diesem Seminar an ausgewählten Texten mit dieser Materialität der vormodernen skandinavischen Textüberlieferung beschäftigen und dabei auch die Erfassung und Erschliessung der vormodernen Texte in Archiv- und Bibliotheksgründungen der Frühen Neuzeit und in ersten gedruckten Editionen und Übersetzungen im Zuge antiquarischer Bemühungen und (proto-)nationaler Entwicklungen beleuchten.

Als integraler Teil der Veranstaltung ist eine Archivreise nach Skandinavien vorgesehen. Die Detailplanung findet zu Vorlesungsbeginn gemeinsam statt.

Event Ortsnamenforschung: Methoden, Theorien, Erkenntnisinteresse
06UE360p121a / Exercise Group / 2,094

Description:

Business event contents:

Eigennamen bilden eine der wenigen echten sprachlichen Universalien. Jede Sprache kennt sie, und die enge Beziehung jedes Menschen zu seinem eigenen Personennamen und zu den Örtlichkeitsnamen seines Erfahrungshorizonts «stellt eine anthropologische Grunderfahrung dar» (Friedhelm Debus). Ohne Namen ist eine Orientierung im Raum schwierig, ja Kommunikation überhaupt stark erschwert. Eine Welt ohne Namen, eine Sprache ohne Namen wäre nutzlos. Die Erforschung der Eigennamen ist darum nicht einfach eine akademische Spielerei, sondern sie dient dem tieferen Verständnis dafür, wie der Mensch sich und seine Umwelt wahrnimmt, wie er sie organisiert und er sie kommunikativ gestaltet - in Gegenwart und Vergangenheit. In der Lehrveranstaltung soll auf diese spezifische Wertigkeit von Örtlichkeitsnamen im Sprach- und Kommunikationssystem eingegangen werden, es sollen jedoch besonders auch die historischen Gesichtspunkte zur Sprache kommen, indem die wichtigsten Strukturen und Bildungsmuster insbesondere von Orts- und Flurnamen, im weiteren Sinne aber auch von Gewässernamen analysiert werden sollen. Ziel der Veranstaltung ist es, Vertrautheit mit den Methoden der Toponomastik zu gewinnen und selbständig eigene Forschungsfragen angehen zu können.

Nach einführenden Sitzungen zu theoretischen und methodischen Grundfragen soll es gezielt um einzelne Namentypen gehen.

Voraussetzungen sind neben der Bereitschaft zur aktiven Teilnahme und Mitarbeit Grundlagenkenntnisse der synchronen und diachronen Linguistik.

Course Materials: Empfohlene Literatur zur Anschaffung: Nübling, Damaris (mit Fabian Fahlbusch, Rita Heuser): Namen. Eine Einführung in die Onomastik, 2. Auflage, Tübingen 2015.
Weitere Unterlagen werden elektronisch zur Verfügung gestellt.

Event Wissenschaftliches Schreiben
06SE360p135a / Seminar / 5,373

Description:

Business event contents:

Die schriftliche Arbeit ist der wichtigste Leistungsnachweis des Germanistikstudiums. Thematische Seminare bieten zwar Hilfestellungen. Dennoch setzen sie Schreibkompetenz in der Regel eher voraus, als dass sie sie schulen. In diesem Seminar haben wir Zeit, uns von Grund auf theoretisch und praktisch mit dem wissenschaftlichen Schreiben zu beschäftigen. Anhand von literarischen Texten (u. a. Musil), schreibdidaktischer Forschung sowie germanistischen Vorbildern vermittelt das Seminar das klassische Handwerk: Ideenfindung, Planung und Durchführung der Projektphasen, Formulierung argumentativer und interpretativer Textstrukturen, wissenschaftlichen Stil oder den Umgang mit Schreibblockaden. Das Zentrum des Seminars bildet dabei die praktische Erfahrung am Schreibtisch. Um die Arbeitsschritte und -methoden zu reflektieren, entwerfen und verfassen wir kleinere Forschungsvorhaben, die wir gemeinsam diskutieren und weiterentwickeln.

Event Spatial proteomics using mass spectrometry
07SMBIO697 / Lecture with Practical Exercises / 2,771

Description:

Business event contents:

Spatial proteomics methods are used for studying the organization and the function of proteins in their local micro-environment. Most imaging approaches can determine the spatial distribution of proteins at single-cell resolution, typically focusing on a small number of proteins but lacking the throughput necessary to achieve comprehensive proteome quantification.

The objective of this course is to introduce mass spectrometry (MS)-based spatial proteomics, employing liquid-chromatography (LC) or matrix-assisted laser desorption/ionization (MALDI) imaging MS methods.

The participants will learn how the field evolved from the analysis of entire tissues to the combination of laser-assisted microdissection and LC-MS proteomics for the simultaneous quantification of hundreds to thousands of proteins in specific regions of interest. Moreover, they will become aware of the potential of using MALDI-MS imaging approaches to integrate the spatial analysis of target proteins and other classes of biomolecules (i.e. glycans, small molecules).

The course is designed to bring theory and practice together and introduce the participants to basics MS-based spatial proteomics workflows, including sample preparation, state-of-the-art mass spectrometry, and software for data analysis.

Event Mass Spectrometry-based Proteomics Training Course at FGCZ
07VUBIO698 / Lecture with Practical Exercises / 1,747

Description:

Business event contents:

Proteomics aims to investigate the entire content of proteins present in cells, tissues, body fluids, whole organisms, or in any type of biological sample. Mass spectrometry-based proteomics is currently the most comprehensive approach for quantitative profiling of proteins, their interactions and spatial localizations, and for the identification of protein modifications. The objective of this course is to introduce the field of proteomics, focusing on fundamental concepts in sample preparation, peptide and protein identification, and quantification. These concepts are reinforced through the practical training using state-of-the-art mass spectrometers and open-source software for data analysis.

The course is designed to provide the participants with the knowledge necessary to access the resources and infrastructure of the proteomics unit at the Functional Genomics Center Zurich.

Event Vorbereitung zum Forschungsseminar Schweizer Politik: Entscheidungsprozesse in der Schweizer Politik
06SE615-509a / Seminar / 2,993

Description:

Business event contents:

Trotz ihrer Kleinräumlichkeit haben sich in der Schweiz allerlei unterschiedliche Wahl-, Regierungs- und Parteiensysteme entwickelt: Sie reichen von Proporz- zu Majorzsystemen, von vorgedruckten Wahlvorschlägen zu Wahlzetteln mit leeren Linien, von Fünferregierungen zu Siebnerregierungen, von hegemonialen Parteiensystemen zu hoch fragmentierten Parteiensystemen, etc. In der Lehrveranstaltung geht es zunächst um eine Beschreibung dieser Vielfalt, sodann aber auch um Erklärungen für dieses bunte Kaleidoskop an Volksrechten. Zuletzt geht es auch um Output-Leistungen, beispielsweise um die Frage, weshalb trotz direkter Volkswahl der kantonalen Exekutiven oftmals eine ähnliche parteipolitische Zusammensetzung resultiert wie auf Bundesebene, wo die Regierung bekanntlich von der Vereinigten Bundesversammlung gewählt wird. (Diese Beschreibung wurde auf Wunsch des Dozenten am 1.9.26 angepasst.)

Die Schweiz gilt als das Mutterland der direkten Demokratie. Nirgendwo sonst auf der Welt steht den Bürgerinnen und Bürgern eine solche Fülle an Volksrechten zur Verfügung. Im Zentrum des Seminars stehen die Effekte der direkten Demokratie - stets im Vergleich mit der repräsentativen Demokratie.

Neben der Schweiz befassen wir uns vor allem mit den US- Gliedstaaten und einigen westeuropäischen Ländern.

Event ST: PS Religionsphilosophie: Was tun wir, wenn wir „glauben“?
01PS23LB002 / Proseminar / 2,624

Description:

Business event contents:

Eine Gallup-Umfrage aus dem Jahr 2022 ergab, dass etwa 81 Prozent der Nordamerikaner:innen an Gott glauben (2016: 89 Prozent). Doch wie wahrscheinlich ist es, fragt der Religionshistoriker Ethan Shagan, dass all jene Menschen, die den Meinungsforscher:innen versichern, sie glaubten an Gott, mit dieser Aussage dasselbe meinen? In seinem viel beachteten Buch *The Birth of Modern Belief* (Princeton 2018) liefert Shagan die Antwort gleich mit: höchst unwahrscheinlich. Denn „Glaube“ kann vieles bedeuten – unerschütterliche Gewissheit ebenso wie vage Wahrscheinlichkeit; existenzielle Entscheidung ebenso wie Gehorsam gegenüber Autorität; propositionale Einstellung, Regung des Herzens oder körperliche Handlung. Glaube kann sich auf die Vernunft stützen oder sie bewusst zurückweisen. Wenn also bereits ein kurzer Moment des Nachdenkens zeigt, wie vielgestaltig „Glauben“ sein kann – warum antwortet dann niemand auf die Frage „Glauben Sie an Gott?“ mit: „Was meinen Sie mit glauben?“

In dieser Veranstaltung gehen wir der Frage nach, warum wir heute, trotz besseren historischen Wissens, so leben und handeln (müssen), als wäre Glaube immer und überall dasselbe – nämlich „persönliche“ Überzeugung oder subjektives Urteil. Wir verfolgen den Wandel mittelalterlicher Glaubenskonzptionen über die „Verknappung“ des Glaubens im Reformationseitalter bis in die Gegenwart, in der sich „Glaube“ unterschiedslos auf nahezu jedes beliebige Objekt richten kann. Welche Folgen hat diese geschichtliche „Verflachung“ des Glaubensbegriffs – und wie können wir den daraus resultierenden Konfusionen begegnen?

Am Ende des Proseminars sind die Studierenden in der Lage, selbständig eine religionsphilosophische Proseminararbeit zu verfassen.

Notes:

Pro Teilnehmer:in wird um ein Referat gebeten. Dessen Thema wird gemeinsam verabredet und kann auch für die Proseminararbeit am Ende genutzt werden.

Während der Reading Week vom 12.-16.10.2026 finden keine Lehrveranstaltungen an der TRF statt.

Event Sozialarchäologie
06VL682p005a / Course / 3,959

Description:

Business event contents:

Sozialarchäologie ist die Archäologie der Gesellschaft: Wie waren in schriftlosen Kulturen Gesellschaften organisiert und strukturiert? Welches sind wiederkehrende Muster im gesellschaftlichen Aufbau und in der Art und Weise, wie Gesellschaften funktionieren? Welche Quellen und Instrumente stehen für eine archäologische Analyse von Gesellschaften zur Verfügung? Wie lassen sich sozialarchäologische Diskurse mit kulturanthropologischen oder historischen Vergleichen ergänzen und präzisieren? Solchen Fragen gehen wir in der Vorlesung nach, illustriert an Fallbeispielen aus der europäischen Vor- und Frühgeschichte.

Event ST Seminar Ethics: Ethics of Organ Transplantation
01SE23SS127 / Seminar / 2,616

Description:

Business event contents:

Die Schweizer Bevölkerung hat am 15. Mai 2022 der Einführung der Widerspruchsregelung bei der Organspende zugestimmt. Wer keine Organe oder Gewebe spenden möchte, muss dies künftig aktiv dokumentieren. Die Umsetzung der neuen Regelung ist frühestens für den Frühling 2027 vorgesehen. Die Einführung der Widerspruchsregelung in der Schweiz ist ein zentrales Thema für die ethische Auseinandersetzung mit Organtransplantation in diesem Seminar. Studierende können die Regelung als praktisches Beispiel für ethische, rechtliche und gesellschaftliche Fragestellungen nutzen, etwa: Welche Rechte hat die einzelne Person, über ihren Körper nach dem Tod zu bestimmen? Inwiefern kann eine gesetzliche Regelung (Opt out) die Versorgung von Patientinnen und Patienten verbessern? Wie lassen sich freiwillige Spende und gesetzlicher Zwang ethisch abwägen? Wie lassen sich Leib, Gabe, Würde und Verantwortung aus religiöser Sicht reflektieren? Das Seminar führt in die ethischen, theologischen und gesellschaftlichen Fragen der Organtransplantation ein. Ausgehend von den medizinischen und rechtlichen Grundlagen werden zentrale ethische Problemfelder wie Tod und Personsein, Körperverständnis, Organspende als Gabe, Fragen der Gerechtigkeit sowie neue Entwicklungen wie Xenotransplantation diskutiert. Ein besonderer Schwerpunkt liegt auf der theologischen Anthropologie und der Ethik: Wie lassen sich Leib, Würde, Verantwortung und Solidarität theologisch verstehen und für bioethische Urteile fruchtbar machen? Klassische und aktuelle theologische Positionen werden mit philosophischen und medizinethischen Ansätzen ins Gespräch gebracht. Anhand konkreter Fallbeispiele lernen die Studierenden, ethische Dilemmata im Kontext der Transplantationsmedizin differenziert zu analysieren und begründete eigene Urteile zu entwickeln.

Studierenden können:

1. die medizinischen und rechtlichen Grundlagen der Organ-, Gewebe- und Zelltransplantation in der Schweiz darstellen,
2. zentrale ethische Problemfelder der Organtransplantation – insbesondere Autonomie, körperliche Integrität, informierte Zustimmung und Verantwortung – differenziert analysieren,
3. theologische Anthropologie sowie christliche und islamische ethische Argumentationsmuster (z. B. Leibverständnis, Würde, Gabe, Verantwortung) auf Fragen der Organtransplantation anwenden,
4. gesellschaftliche und politische Regelungen, insbesondere den Übergang von der Zustimmungslösung zur Widerspruchslösung, ethisch bewerten und deren Auswirkungen auf individuelle Entscheidungsfreiheit und solidarische Verantwortung zu reflektieren und
5. eigenständige, theologisch fundierte ethische Urteile zu konkreten Fragestellungen der Organtransplantation (z. B. Allokation, Lebendspende, Organhandel) argumentativ begründet formulieren.

Event Übung Eine Drucktechnik verstehen: Siebdruck als künstlerische und politische Praxis
06UE640p013a / Exercise Group / 5,370

Description:

Business event contents:

In dieser Übung widmen wir uns dem Siebdruck als künstlerischer Technik und als Medium visueller Kultur. Ausgehend von praktischen Einblicken in Arbeitsprozesse und Gestaltungsmöglichkeiten beleuchten wir die Geschichte des Siebdrucks und untersuchen Originale aus unterschiedlichen Kontexten. Dabei wird das Medium im Spannungsfeld von Kunst, Textildruck, Werbegrafik, DIY-Kultur und politischer Praxis betrachtet. Ziel ist es, den Siebdruck sowohl in seiner materiellen und ästhetischen Eigenlogik als auch in seiner kunsthistorischen und gesellschaftlichen Bedeutung zu verstehen.

Notes:

Die erste und letzte Sitzung im Seminarraum dienen der Vor- bzw. Nachbesprechung. Die weiteren Sitzungen werden in Grafikateliers und -sammlungen stattfinden. Die Prüfungsleistung wird in Form eines Protokolls zu einer Übungseinheit erbracht.

- Aufgabenverteilung in der ersten Sitzung, die Teilnahme in der ersten Sitzung ist daher obligatorisch. -

Event J.J. Thomson: Normativity
06SE163p501a / Seminar / 4,072

Description:

Business event contents:

Judith Jarvis Thomson (1929-2020) ist eine der einflussreichsten Moralphilosophinnen und Metaphysikerinnen der letzten Jahrzehnte. Bekannt ist sie insbesondere für einzelne weit über die Philosophie hinaus bekannte akademische Artikel zu Abtreibung, dem Trolley-Problem oder dem Recht auf Privatsphäre. Sie hat sich aber auch in systematischer Weise mit philosophischen Fragen auseinandergesetzt, etwa in ihrem vielbeachteten Buch «The Realm of Rights».

In «Normativity» (2008) geht sie der Frage nach, wie evaluative Urteilen (z.B. «Dies ist ein guter Regenschirm») mit direktiven Urteilen (z.B. «Ein Toaster sollte gleichmässig toasten») zusammenhängen und was sie wahr macht, wenn sie wahr sind.

Im Seminar werden wir sowohl Thomsons Buch als kritische Auseinandersetzungen damit lesen, diskutieren und auf ihre Plausibilität testen.

Und um nicht alleine für die Werbung verantwortlich zu sein, soll hier Gilbert Harmans Lob für «Normativity» zitiert werden: ««Normativity» is a careful, rigorous account of the meanings of the most basic normative terms: good, virtue, correct, ought, should, and must. Along the way, Thomson refutes almost everything other philosophers have said about these topics. It is a very important book.»

Notes:

Die Texte des Seminars sind allesamt auf Englisch. Die Diskussion wird auf Deutsch geführt - Studierende dürfen sich aber auch auf Englisch einbringen.

Course Materials:

Das Seminar dreht sich um das Buch 'Normativity' von Judith Jarvis Thomson, Chicago, Open Court 2008. Eine Anschaffung (auch über Second-Hand-/antiquarische Quellen) empfiehlt sich. Alle Texte werden aber auch über Olat digital zur Verfügung gestellt.

Event Care-Ethik

06SE160p011a / Seminar / 3,975

Description:

Business event contents:

Die Care-Ethik ist in den 1980er Jahren als eine feministische Ethik aufgekommen, die die einseitige Betonung von Individualismus, Rechten, Abstraktion und Universalismus im Utilitarismus und der Deontologie hinterfragte. Im Gegensatz dazu betont die Care-Ethik, dass Menschen in gegenseitigen Abhängigkeiten und Beziehungen leben, dass ethische Argumentation an Erfahrungen und den jeweiligen Kontext anknüpfen muss und, dass Gefühle und Haltungen eine wichtige Rolle spielen. Daraus ergibt sich ein Fokus auf den Begriff 'Care', also das Sorgetragen, Sorgen und die Fürsorge für andere.

Im Seminar werden wir unterschiedliche Ansätze und Schwerpunkte innerhalb der Care-Ethik kennenlernen. Ausgehend von Carol Gilligan und Nel Noddings, die meist als Begründerinnen dieser ethischen Richtung gelten, werden wir verschiedene Weiterentwicklungen sowie Kritik an der Care-Ethik betrachten. Dabei diskutieren wir unter anderem die Verbindung von Care-Ethik und Feminismus, die Frage ob Ethik 'parteiisch' sein darf, und inwiefern mit Care-Ethik auch politische Fragen diskutiert.

Event Englisch III: Human Rights Education in the English Classroom
06SE090E3 / Seminar / 793

Description:

Business event contents:

Human Rights Education in the English Classroom Our educational goals to teach our students to be responsible human beings, prepare them to take on challenging tasks within our society, and encourage their sensitivity to ethical concerns can weigh heavily on our shoulders. This is all the more true when we are still struggling with classroom management and finding engaging activities to promote the development of our students' language skills. In this course, we are going to discover the many ways in which human rights education (HRE) supports our students in becoming compassionate members of their community and how we can easily implement HRE in the English classroom. We are going to start theory-centered by learning what human rights education is. From there we will move on to the practice-focused work of how we can introduce HRE into the English classroom, which will constitute the core of our course. We are going to create HRE activities to teach language skills as well as literature. Finally, we are going to conceptualize more elaborate HRE projects (multiple-lesson units), which offer students great opportunities to participate and constitute a deeply formative experience. It is my goal that after this course considering HRE will lose its daunting quality and instead will become second nature when planning your English lessons.

Event Recent Case Law of International Courts

02VL90IL15-1 / Course / 3,936

Description:

Business event contents:

Cases before international courts and tribunals raise fascinating, often highly political issues and shape the future development of international law. In this course we will critically analyse some of the most important judgments issued in recent years by the International Court of Justice as well as other international and regional courts and tribunals, such as the European Court of Human Rights. The course will be based on a reader of recent international case law. Each block lesson will be devoted to the thorough analysis of four cases decided by an international court or tribunal.

The number of participants is limited to 20. Places are assigned during the allocation period (see ORGANIZATION). The admitted participants are informed promptly. Students without assignment are placed on a waiting list. Cancellation of participation is only possible until the end of the cancellation period (see ORGANIZATION). Participants who could not be considered in the first place will be informed immediately when they move up (during the move up period, see ORGANIZATION).

Course Materials: The course will be based on a reader of recent international case law.

Event Spatial Theory Lab
07SEGE0846.1 / Seminar / 3,705

Description:

Business event contents:

Today, democracy seems to be under threat, authoritarian rules seem to be on the rise, colonial traits and racism seem to become respectable again, left-woke attitudes are increasingly ridiculed, scientific facts about climate change are bluntly negated, the rule-governed international order is overturned, etc. etc.. Some say that "fascism is back". But if we do not want to further these fascist tendencies, before we chime in with this saying, we need to thoughtfully explore in a nuanced way what this actually means, and how this relates to what we as critical geographers do and how we may influence the developments ahead of us.

In this intensive reading and discussion seminar, that brings together master- and PhD-students and other academics from the department with an interest in Theory and Critical geography, we study a very recent book by Prof. Chris Philo (2025) in which he explores (and critically enhances) the work of the very influential classical antifascist author, heodor Adorno, as an inspiring source for an anti-fascist geographical imagination of today. In the framework of this course, we intend to invite Prof. Chris Philo personally to exchange with us on these issues. Together, we will try to 'crack the code' of the readings and jointly discuss selected chapters of this major work in seminar-style meetings.

Course Materials: The book by Chris Philo (Adorno and the Antifascist Geographical Imagination, Edinburgh University Press, 2025) will be available to students as an online resource.

Event Information Retrieval (Seminar)

06SE523p002a / Seminar / 3,505

Description:

Business event contents:

This seminar provides an understanding of the Information Retrieval field, with a focus on textual search. Students explain and compare core IR concepts, evaluation methods, and both traditional and neural approaches. They analyse scientific publications by identifying key arguments, methods, and limitations, and evaluate research developments with respect to their relevance and contribution to the field. Through structured presentations and group discussions, students present and defend IR topics, respond to peer feedback, and formulate counter-arguments. Finally, students identify a relevant research contribution, design and conduct an experimental extension, and document their findings in a structured scientific report.

After completing this seminar, students can:

1. Explain core concepts and methods in Information Retrieval and describe how they relate to modern retrieval systems.
2. Analyse scientific publications in the Information Retrieval field by identifying key arguments, methods, and limitations.
3. Evaluate research developments in Information Retrieval with respect to their relevance and contribution to the field.
4. Present and discuss IR topics in a structured manner, responding to questions and peer feedback.

Event Political Behavior
06VL615-026a / Course / 3,189

Description:

Business event contents:

This course provides an overview of the most important forms of mass political behavior: participation in social movements and the voting booth, and public opinion (attitudes, beliefs, and values). The course stands out through its combination of both macro- and micro-level perspectives and the blending of political sociological and psychological approaches. The course is organized along a narrative of evolving political conflict since the early 20th Century in Western Europe and North America, including new cultural conflicts that were first manifest in the social movement arena (centering on issues of gender, gay rights, global peace, and ecology). These conflicts ultimately resulted in today's conflict between "New Left" and radical populist right. In parallel, we discuss the individual-level underpinnings of this evolution (values, ideologies, preferences and attitudes). A final part focuses on democratic representation, and broadens the view to new democracies.

Notes:

Course requirements - Weekly readings for each session (the readings will be made available via OLAT) - Exam in last week of term We strongly advise participants to engage with these slides after class and re-think the reading for the specific week in the light of what has been presented.

Event Daten, Code & Schweizer Politik: R-Programmierskills für die Praxis
06SE615p517a / Seminar / 5,567

Description:

Business event contents:

Dieser Kurs gibt eine Einführung in das Programmieren und die Informatik. Das Ziel ist es, besseren Code in R zu schreiben und in der Lage zu sein, nützliche neue Funktionen mit der gesamten R-Gemeinschaft zu teilen. Wir beginnen mit tidyverse, gefolgt von grundlegenden Konzepten (Sequenz, Verzweigung, Schleife) und lernen, wann und wie man eine Funktion schreibt. Dann sehen wir, wie wir effizienten und parallelen Code schreiben können, um ihn schneller zu machen.

Wir sehen uns ein Tool an, mit dem wir verschiedene Codes gegeneinander auswerten können, um zu sehen, welcher schneller ist. Danach sehen wir uns an, wie man eine generische S3-Funktion und objektorientierten Code zusammen mit dem Grundkonzept schreibt. Dann werden wir uns mit SQL beschäftigen und sehen, wie wir es in R verwenden können, um Daten aus einer SQL-Datenbank zu lesen und in sie zu schreiben. Danach schauen wir uns Regex und Webscraping an. Am Ende sehen wir, wie wir in R ein Paket erstellen und es auf GitHub und CRAN hochladen können. Dabei verwenden wir immer mal wieder Beispiele aus der Schweizer Politik.

Event Human Evolutionary Eco Physiology Experiential Field Course
07SMBIO546 / Block Course / 5,637

Description:

Business event contents:

Throughout the evolution of our species, natural environments have provided the context within which natural selection has acted to shape our biology. During the last 200-300 years, however, urban centres have rapidly become our primary habitat. This change may have created an evolutionary mismatch; a situation in which health and evolutionary fitness may be negatively influenced by an incompatibility between the environment Homo Sapiens are primarily adapted to and the habitat we currently occupy. This one-week intensive field course is embedded within a larger experimental research project examining how exposure to natural environments influences human biological function (immune, reproductive, physical, cognitive), psychophysiological state and the microbiome. Using an experiential learning design, students will serve as research participants while also acting as investigators. Through daily journal clubs and seminar discussions, students will critically engage with primary literature. Working collaboratively, they will also analyse anonymised class datasets and compare their findings to published research, culminating in an integrative presentation that situates their lived field experience within the broader scientific literature on environmental influences on human health and function.

Event Parties and Party Competition in Europe and the EU

06SE615-011a / Seminar / 5,416

Description:

Business event contents:

Political parties are the central actors of democratic politics. They structure competition, form governments, represent voters, and make policy. In the member states of the European Union (EU), parties operate across multiple levels, including the national and the European level. In this course, we discuss the role of political parties in these two arenas. We begin with the fundamentals of party politics at the national level: party types and systems, models of political competition, and coalition governance. We then examine how the EU and European integration have shaped party competition by generating a new dimension of conflict, fuelling Euroscepticism, and contributing to the rise of challenger parties. In the final sessions, we focus on the role of parties within the political system of the EU and on the behavior of parties across the two levels.

Throughout, we tackle a number of normative and empirical questions at the intersection of domestic and EU politics: What are the dimensions of political competition domestically and in the EU? How do attitudes toward European integration shape party behavior and citizens' electoral choices? Do partisan preferences shape policy outcomes in EU institutions? And does the EU suffer from a democratic deficit, and if so, what role do parties play in deepening or closing it?

Event International Relations and Regime type
06SE615p514a / Seminar / 5,566

Description:

Business event contents:

Regime type increasingly shapes the major lines of conflict and cooperation in international relations. This seminar explores how patterns of international cooperation are influenced by regime type, and conversely, how international cooperation affects domestic political regimes.

In the first part of the seminar, we review major conceptions of democracy and examine how democracy has historically figured in debates in international relations. In the second part, we turn to empirical questions: Do democracies pursue foreign policies that differ systematically from those of autocracies? How are international regime complexes in areas such as human rights or trade shaped by conflict and cooperation between different regime types? How do international organizations structure democratic representation and deliberation at the international level?

The third part of the seminar addresses the reverse causal relationship. We analyze the conditions under which international cooperation contributes to democratization in target countries, as well as the ways in which international cooperation may sustain or accelerate processes of autocratization.

Throughout the semester, students are expected to complete assigned readings in preparation for class. Seminar sessions will focus on discussing the core arguments of the readings and critically evaluating their research designs. Students will develop the skills necessary to conduct their own empirical research, including formulating a research question, developing a theoretical argument, and designing an empirical test.

Event Kant, Metaphysik der Sitten
06SE160p505a / Seminar / 3,982

Description:

Business event contents:

Entgegen der Erwartung, dass eine Pflichtethik wie die Kants den Tugenden allenfalls eine marginale Rolle zuweisen kann, widmet Kant in der Tugendlehre seiner Metaphysik der Sitten (1797) überraschend starke Aufmerksamkeit. Welche Stellung aber kommt der Kategorie der Tugend im Ganzen seiner Ethik und Anthropologie tatsächlich zu? Welche Implikationen ergeben sich umgekehrt aus dem systematischen Rahmen der Philosophie Kants für sein Verständnis von Tugenden, moralischen Vorbildern etc.? Im Seminar soll diesen Fragen anhand einer genauen Lektüre der Tugendlehre, aber auch von Texten aus der gegenwärtigen analytischen Debatte nachgegangen werden.

Event Communication Skills for Leaders

07SECMS103.1 / Kurs / 550

Description:

Business event contents:

Demands on today's leaders in science and business continue to get higher and higher. In addition to proven professional skills, so-called soft factors are becoming increasingly important, and are often decisive for individual careers.

No matter whether we want to successfully lead a group, recruit new colleagues, convince potential investors or funding sources about a research project, or negotiate with customers and suppliers: communication is an essential part of daily life.

We talk to each other, listen to each other, write, read, and exchange non-verbal signals. We constantly convey and reveal information while we are in contact with other people - consciously and deliberately, but also unintentionally and unknowingly.

The CMSZH Graduate School aims at providing optimum development opportunities for you as future top leaders and researchers. We have designed a two-day communication course, in cooperation with an external partner. The program is tailored to meet your needs.

Event Introduction to chemical crystallography
07VUKR1101.1 / Lecture with Practical Exercises / 1,458

Description:

Business event contents:

An introduction to the principles and theory of X-ray diffraction and crystal structure determination as it relates to Chemistry. Fundamental crystallographic concepts: what is crystallography and what can it tell us, unit cells, Bravais lattices, Laue symmetry, crystal classes, point groups, space groups, crystal growth, instrumentation. Diffraction of X- rays by crystals: physical and geometric basics, powder and single crystal methods. A brief demonstration of structure solution and modelling. Interpretation of crystal structure data; internal coordinates for structure description: atom spacing, co-ordination polyhedra, bond angles, torsion angles; intermolecular interactions, absolute configuration determination. Crystallographic databases. Overview of the principles of macromolecular crystallography.

The course should equip participants with the knowledge that will enable them to understand how a crystal structure determination is performed and to analyse critically any crystal structure reported in the literature or retrieved from a crystallographic database.

Notes:

This course is a prerequisite for the subsequent course, KRI 102, which focuses more on the practical aspects of crystal structure determination and the interpretation of results.

Event Automation and Chemical Data Science in Practice
07PRDSA105.1 / Praktikum / 318

Description:

Business event contents:

Lab automation and data science are powerful tools in the modern-day life sciences. This course will serve as capstone for the minor program "Lab Automation and Chemical Data Science". In a two-semester student project all the content of the program lectures and exercises will be utilized: Selected data sets will be processed and analysed, ML models will be applied and experiments will be performed using lab automation tools to complement the data collection or validate predictions and classifications.

While the preparation of the data sets will be performed as home assignment, the practical work will be done in small groups upon arrangement. The research infrastructure of the Department of Chemistry, such as the HTEL, will be made available for the experimental part of the project.

The module is supposed to be done in parallel with or after the courses DSA 103 and DSA 104 and can be started in either the fall or spring semester.

Notes:

Registration until 2 weeks after the start of the lecture period via email to Johannes Schörgenhumer (johannes.schoergenheimer@chem.uzh.ch) [The module can be started in either fall or spring semester.]

Event Trans Philosophie
06SE160p004a / Seminar / 3,992

Description:

Business event contents:

Trans Personen sind im politischen und medialen Diskurs zu Projektionsflächen geworden: zu Objekten vermeintlicher Sorge, moralischer Panik, bürokratischer Kontrolle und ideologischer Überformung. Dass Philosophie in diesen Konflikten keine neutrale Beobachterin ist, zeigt sich daran, wie häufig philosophische Begriffe, Methoden und vermeintlich «wertfreie» Argumente zur Legitimation transfeindlicher Positionen herangezogen werden. Der gegenwärtige Moment markiert daher einen epistemisch und politisch entscheidenden Punkt: Die Philosophie muss sich ihrer eigenen Verantwortung stellen. Trans Philosophie ist der Name für diesen Anspruch - und für ein Forschungsfeld, das ihn aktiv einlöst.

Trans Philosophie soll begriffen werden als politisch-epistemische Intervention, die sichtbar macht, wie die Grundlagen philosophischen Denkens hergestellt, abgesichert und politisch aufgeladen sind. Wenn Kategorien wie Person, Körper, Identität, Vernunft oder Öffentlichkeit strukturell trans Leben verfehlen, dann ist das kein Problem der "Grenzfälle", sondern ein Symptom einer philosophischen Methodologie, die sich selbst fälschlich für neutral hält.

Um dieses weite Themenfeld zu öffnen, werden wir uns in einem ersten Block mit der Frage auseinandersetzen, wo die Wurzeln der trans Philosophie ausfindig gemacht werden können. Anhand von Texten Jack Halberstam und Sandy Stone werden wir einige der Anfänge der trans Philosophie im amerikanischen Raum untersuchen. Anschliessend daran widmen wir uns eingehend der Frage, was trans Philosophie ist und was sie leisten kann und soll. Dazu lesen wir Texte von Talia Mae Bettcher und Robin Dembroff.

Im zweiten Block des Seminars wenden wir uns konkreten Subdisziplinen der Philosophie zu und werden diese anhand trans philosophischer Perspektiven und Antworten betrachten. Dazu gehören z.B. die Frage nach trans philosophischen Perspektiven auf Probleme der Epistemologie und der Phänomenologie. In diesem Block lesen wir Texte von Perry Zurn, Amy Marvin und Blas Radi.

Im dritten Block untersuchen wir die Kategorie trans intersektional: Wie verhält sie sich zu anderen Kategorien wie race, disability oder Intersexualität? Dazu lesen wir Texte von Marquis Bey, C. Riley Snorton, Cameron Ackward Rich und Maren Behrensen.

Als letztes widmen wir uns der trans Philosophie im deutschsprachigen Kontext und lesen Texte aus dem ersten deutschen Sammelband zu trans Philosophie, u.a. von Gen Eickers, Anna Klieber, Tyan Fritschy und Flora Löffelmann.

Dieses Seminar ist offen für alle Interessierte, unabhängig von der Geschlechtsidentität. Offenheit und Neugier sind gute Voraussetzungen, um daran teilzunehmen.

Event Ugaritic I: Language and Scribal Culture
01SK91L0039 / Sprachkurs / 2,921

Description:

Business event contents:

Der Kurs vermittelt einen Einstieg in die ugaritische Sprache und Schriftkultur. Ugaritisch gehört zur semitischen Sprachfamilie – wie etwa Akkadisch, Aramäisch, Hebräisch und Arabisch. Schriftzeugnisse sind aus dem 14.-12. Jahrhundert vor Christus erhalten. Sie sind in Originalen erhalten (Tontafeln) und in ugaritischer Keilschrift verfasst, einer Alphabetschrift mit 30 Zeichen. Die materielle Kultur der Stadt Ugarit (Texte, Architektur, Kleinkunst etc.) gibt einen einzigartigen Einblick in die Religionsgeschichte der späthbrözeitlichen Levante und erhellt auch die mythologischen Hintergründe einiger alttestamentlicher Texte.

Notes:

Der Kurs setzt keine Kenntnisse semitischer Sprachen voraus. Im Frühlingsemester folgt der Kurs Ugaritisch II: Texte und Kontexte.

Während der Reading Week (im HS) finden keine Lehrveranstaltungen an der TRF statt.

Course Materials: Unterrichtsmaterialien werden auf OLAT bereitgestellt.

Event Intermedial Approaches to Modern Genre Fantasy
06SE440-227b / Seminar / 1,433

Description:

Business event contents:

All literature crosses media boundaries to some extent, but modern genre fantasy arguably stands out due to the sheer scale and depth of its intermedial networks. Big fantasy franchises such as Wicked, The Witcher and LOTR develop narratives across a seemingly endless range of different kinds of media, both adapting texts and engaging in what Henry Jenkins has called 'transmedia storytelling'. In this seminar, we will explore fantasy's intermediality from various angles. What are the strategies and implications of artistic efforts to make visible the non-visible, the non-real, in and through different media forms? What is the significance of intermedial 'worldbuilding' in the context of the high fantasy series, a process that is represented by the mandatory map at the beginning of such books? We will explore these and further questions by working with fantasy scholarship and intermediality studies as well as a range of 20th- and 21st-century fantasy texts that combine and span different media forms. We will start with the LOTR franchise, but then focus on more recent works such as the TV show Arcane and fantasy fiction by Diana Wynne Jones. We will also read works of fantastic 'literary fiction' and investigate the intermedial exchange across different spheres of literary production.

Notes:

The deadline for the essays is April 17th, 2027.

Course Materials:

We will read several secondary texts (fantasy scholarship & intermediality studies) and work with a range of fantasy texts and franchises such as LOTR, the TV series Arcane, fantasy fiction by Diana Wynne Jones, and other works from various fantasy sub-genres, including fantastic works of 'literary fiction'. Note that we will do a significant amount of reading in this seminar. A full list will be made available on OLAT.

Event Liv Strömquist & Co.: Körper, Geschlecht und Gesellschaft im nordischen Comic
06SE360-211a / Seminar / 1,713

Description:

Business event contents:

Das grafische Erzählen hat längst den Sprung von der letzten Zeitungsseite in den gesellschaftlichen Diskurs geschafft. Spätestens mit den Comics von Liv Strömquist ist deutlich geworden, dass das Medium komplexe soziale, politische und ökonomische Fragen ebenso pointiert wie zugänglich verhandeln kann. Comics und Graphic Novels sind dabei thematisch kaum begrenzt: Sie reichen vom humorvollen Comicstrip über autobiografische Alltagsschilderungen bis hin zu dezidiert kulturalistischen und politischen Formaten. Gerade im Norden hat sich eine vielfältige und international rezipierte Comiclandschaft herausgebildet. Neben Strömquist zählen dazu Tove Janssons Mumin-Serie ebenso wie die minimalistischen, philosophisch grundierten Comics des norwegischen Zeichners Jason. In jüngerer Zeit sind zudem vermehrt grafische Erzählungen erschienen, die queere, samische und jüdische Perspektiven sichtbar machen und vielfach ausgezeichnet wurden. Diese Arbeiten nutzen die spezifischen Möglichkeiten des Mediums - das Zusammenspiel von Wort, Bild und Körperlichkeit - um Erfahrungen von Marginalisierung, Zugehörigkeit und Identität auf neue Weise zu vermitteln.

Das Seminar widmet sich der Frage, was das Erzählen mit Wort und Bild auszeichnet und wie die Materialität grafischen Erzählens literaturwissenschaftliche Analyseverfahren herausfordert und erweitert. Anhand exemplarischer Comics und Graphic Novels aus dem Norden - von den 1950ern bis in die Gegenwart - lernen die Teilnehmer*innen zentrale Entwicklungslinien des Mediums kennen. Theoretisch stützt sich das Seminar unter anderem auf transmediale Narratologie, Gender- und Queertheorie, Medientheorie sowie postkoloniale Ansätze. Im Zentrum stehen Fragen nach Form und Funktion grafischer Erzählungen: Welche Themen werden verhandelt, und welche Rolle spielen dabei kulturelle und regionale Kontexte? Warum eignen sich Comics besonders dazu, intersektionale Erfahrungen und soziale Ungleichheiten darzustellen?

Notes:

Grundkenntnisse in der Narratologie werden vorausgesetzt.

Course Materials: Das Primärmaterial enthält u.a. Tove Janssons Mumin-Comics, Liv Strömquists "Der Ursprung der Welt", Jasons "Hemingway", Anneli Furmarks "Bring mich noch zur Ecke", Hanneriina Moisseinens "Kannas".

Event Reorienting Middle East Studies: Gulf Studies as Area Studies
06SE615p505a / Seminar / 3,192

Description:

Business event contents:

This master seminar reorients Middle East Studies by conceptualizing Gulf Studies as Area Studies within Political Science and International Relations. It responds to ongoing debates about the limits of universalist IR theory, the role of context-sensitive research, and the place of Area Studies in contemporary political analysis.

Rather than approaching the Gulf as a marginal subregion or as a set of empirical anomalies, the seminar treats it as a theoretically productive site for examining core IR concerns: state formation, legitimacy, foreign policy behavior, regional order, and international positioning. The Gulf is thus not studied as an exception to theory, but as a region whose political dynamics challenge, refine, and inform IR concepts.

At the same time, the seminar explicitly addresses the conditions under which knowledge about the Gulf is produced. Moving beyond a narrow focus on Eurocentrism, it introduces students to the contemporary political economy of Gulf Studies, including the role of funding structures, institutional affiliations, access, and policy relevance. This dimension is treated analytically and reflexively, as a foundational issue shaping theory, method, and scholarly practice, rather than as an empirical object of rivalry or foreign policy analysis.

The seminar is anchored in Middle East and Gulf Studies and guided by the framework of contextual realism, which foregrounds the interaction between state formation, domestic legitimacy, regional dynamics, and international structures. This approach enables students to link internal political logics to external behavior while remaining attentive to context, history, and power.

Notes:

Aims of the Seminar (Political Science & IR)

The seminar pursues four interrelated aims:

1. Theoretical Reorientation in IR

To critically assess how major IR approaches explain Gulf politics, and where their assumptions, abstractions, or categories fall short.

2. Area Studies as Theory-Relevant Inquiry

To demonstrate how Gulf Studies, when grounded in Area Studies, contributes to middle-range theorizing rather than merely applying externally generated models.

3. Conceptual Analysis of Regional Order

To examine how regional roles, influence, and rivalry in the Gulf can be understood conceptually, without reducing analysis to event-driven or policy-focused case studies.

4. Methodological Training and Reflexivity

To equip students with qualitative IR methods suited to regionally grounded research, while fostering critical awareness of how knowledge is produced, authorized, and circulated.

Thematic Structure

Block I: Gulf Studies, IR, and Knowledge Production (Foundational)

Block II: State Formation, Legitimacy, and Political Authority in the Gulf

Block III: Regional Order and Influence in Conceptual Perspective

Block IV: The Gulf in International and Transregional Contexts

Methodological Focus

The seminar highlight qualitative methods central to Political Science and IR, adapted to Area Studies:

- Qualitative foreign policy analysis
- Process tracing at the conceptual level
- Comparative analysis of political systems
- Discourse analysis of elite narratives and policy texts
- Reflexive engagement with sources, access, and positionality

Students are encouraged to reflect on how methodological choices shape theory building, explanation, and causal claims in IR.

Intended Learning Outcomes

By the end of the seminar, students will be able to:

Theoretical Competence

- Explain and critically assess major IR approaches in relation to Gulf politics
- Evaluate the contribution of Area Studies to theory development in IR

Analytical Skills

- Analyze Gulf political dynamics through concepts of state formation, legitimacy, and regional order
- Apply contextual realism to regionally grounded political analysis

Research Competence

- Design a qualitative research project situated at the intersection of IR and Gulf Studies
- Produce an analytically rigorous paper that reflects theoretical awareness and methodological reflexivity

Event Revolutions and Uprisings in the Past, Present, and Future: A Contextual Reappraisal
06SE615p507a / Seminar / 3,193

Description:

Business event contents:

Revolutions have shaped modern history-from the storming of the Bastille to the Arab Uprisings and the ongoing struggles in Tehran, Caracas, and beyond. This seminar, co-taught by Prof. Dr. Elham Manea and PD Dr. Stephan Kux, offers a critical, multi-theoretical, and comparative examination of revolutionary movements, their causes, outcomes, and long-term consequences.

Combining classical theory with new empirical insights, we explore revolutions through the lens of Contextual Realism, a framework that bridges materialist and ideational analyses. Special attention is paid to how global, regional, and local dynamics intersect in revolutionary crises, particularly in the Middle East.

The Master course will be enriched through guest lectures, and an optional research field trip to Tunisia or Syria in winter 2026, subject to security conditions.

Event Exkursion Biosphärenreservat Engiadina Val Müstair
07VLGEO721.2 / Field Trip / 873

Description:

Business event contents:

Der Schweizerische Nationalpark bildet die Kernzone des Biosphärenreservats Engiadina Val Müstair. Auf der Exkursion werden Entstehungsgeschichte und die (politischen) Regionalisierungen des Gebiets vermittelt. Die Forschung spielt in sowohl im Nationalpark (Kernzone) als auch in der Umgebungs- und Entwicklungszone im Unterengadin eine wichtige Rolle. Forschungs- und Monitoringprogramme verschiedener Disziplinen werden während der Exkursion vermittelt. Zudem führen die Studierenden jeweils ein kleines Volunteer Employed Photography-Projekt durch.

Notes:

Die Wanderung ist relativ lang (5h reine Marschzeit, 1000 Höhenmeter, 13-15 km). Im Notfall besteht eine (kleine) Abkürzung durch Auslassung des Munt la Schera. Bei sehr schlechtem Wetter nehmen wir eine alternative Route.

Event Schatten im Film: Ästhetik und Technologie
06SE255o012 / Seminar / 2,635

Description:

Business event contents:

In diesem Aufbauseminar werden Schatten als wesentlicher Bestandteil filmischer Gestaltung behandelt. Obwohl Schatten im Kino allgegenwärtig sind, werden sie in der Filmanalyse oft nur am Rande berücksichtigt. Das Seminar setzt hier an und untersucht, wie man Schatten filmisch gestaltet, wie man sie wahrnimmt und welche ästhetischen Wirkungen sie entfalten. Das Ziel besteht darin, Schatten nicht als bloße Begleiterscheinung von Licht, sondern als bewusst eingesetztes Ausdrucksmittel des Mediums Film zu betrachten.

Ausgehend vom Stummfilm werden in diesem Seminar verschiedene historische Phasen bis zum Gegenwartskino betrachtet. Dabei wird analysiert, wie sich die jeweiligen visuellen Konzepte von Schatten auf die Filmästhetik auswirken und inwiefern diesbezügliche Veränderungen mit technologischen bzw. technischen Entwicklungen verbunden sind. Ein weiterer Schwerpunkt liegt auf dem Vergleich von Live-Action-Film und Zeichentrickfilm. Die jeweils unterschiedlichen gestalterischen und technologischen Voraussetzungen führen zu eigenen ästhetischen Erscheinungsformen, die im Seminar vergleichend untersucht werden.

Methodisch arbeitet das Seminar mit der formalen Filmanalyse der historischen Poetik, insbesondere in Anlehnung an Bordwell und Thompson (1985). Anhand ausgewählter Filmausschnitte werden Schattendarstellungen im Seminar genau beobachtet und in ihren technologischen und historischen Zusammenhängen analysiert. Die Lernziele bestehen darin, die filmische Beobachtungsfähigkeit zu schärfen, ein vertieftes Verständnis für die ästhetischen Besonderheiten, insbesondere von Zeichentrickfilmen, zu entwickeln und die Beziehung zwischen technologischen Voraussetzungen, ästhetischer Gestaltung und filmischer Wirkung differenziert zu erfassen.

Event Zur Probe: Szenarien des Testens und Trainierens

06SE255o010 / Seminar / 3,099

Description:

Business event contents:

In Proben werden Darbietungen einstudiert, Versuche inszeniert oder Wissen abgefragt. Kulturtechniken des Testens und Trainierens kommen in künstlerischen, wissenschaftlichen oder edukativen Szenarien zur Anwendung. In ihnen werden vielschichtig eingebettete Lebensrealitäten erprobt und durchgespielt, indem sie abgebildet und generiert werden. In audiovisuellem Testmaterial, in Lehrfilmen, experimentellen Videos oder metareflexiven Spielfilmsequenzen treten sie medialisiert in Erscheinung. Die Bezeichnung «Szenario» für derart dokumentierte und fingierte Ereignisse macht die darin stattfindenden Handlungen und Erfahrungen als testendes, eingeübtes und beispielhaftes Verhalten begreifbar. In den Blick geraten damit prozesshafte, strukturelle und operative Aspekte.

Im Seminar werden wir filmische Probeszenarien gemeinsam betrachten und besprechen. Dabei wollen wir insbesondere nach den medialen, sozialen und materiellen Umständen der inszenierten Test- und Trainingssituationen fragen. Wie werden sie entworfen und ausgestaltet? Was sind ihre Bezugssysteme und Funktionen? Welche Narrative und Implikationen transportieren die dargestellten und angewendeten Praktiken des Probens, Testens und Trainierens? In welchem Verhältnis stehen instruierende und ausführende Instanzen und welche Spielräume werden hier performativ ausgehandelt?

Event Cinema Expanded: Film als Idee und erweiterte Realität

06SE255o003 / Seminar / 536

Description:

Business event contents:

Was könnte ein erweitertes Kino sein? Ein Kino ohne Film, ohne Kamera, ohne Screen. Eine Idee, ein Experiment, eine Aktion, eine Performance, ein Klangraum, eine Computersimulation. Im Kopf, auf der Strasse, unter Wasser, im Weltraum. Als projizierter Lichtkegel, mit dem man interagiert (bei Anthony McCall), als Pappkasten, in dem man Brüste ertasten kann (bei Valie Export), als kybernetische Kuppel, die Bilder aus dem All empfängt (bei Stan Vanderbeek), als Schwimmbad mit unter Wasser hörbarem Soundtrack (bei Hélio Oiticica) oder als sauer eingelegte Filmstreifen im Küchenglas (bei Tony Conrad).

Unter dem Begriff des «Expanded Cinema» werden ganz unterschiedliche künstlerische Praktiken gefasst, die die Grenzen gewöhnlicher Weisen des Filmemachens und

-schauens ausloten und das Feld filmischer Erfahrung radikal erweitern. Seine Anfänge reichen zurück in die filmische Avantgarde der

1960er Jahre, als sich das Kino unter dem Eindruck technologischer Entwicklungen und politischer Bewegungen neu ausrichtete. Von heute betrachtet, im Blick auf die installativen und performativen Erweiterungen des Films sowie auf die Erkundung partizipativer und immersiver Formen filmischer Erfahrung, können diese Anfänge als wegweisend für die zeitgenössische künstlerische Praxis gelten.

Im Seminar werden wir die Geschichte des Expanded Cinema aus der Perspektive heutiger Filmerfahrung erschliessen. Ziel ist es, sowohl ein historisches Verständnis erweiterter Formen des Films zu entwickeln als auch zu explorieren, wie sich diese Formen in aktuellen künstlerischen Arbeiten und Projekten artikulieren. Dabei wird es auch darum gehen, nach der neuerlichen Relevanz eines erweiterten Kinos in seinen sozialen, ökologischen und pädagogischen Dimensionen zu fragen. In diesem Zusammenhang sind auch gemeinsame Ausflüge in das erweiterte Feld des Films geplant. Diese sind Bestandteil des Seminars und können ausserhalb der regulären Seminarzeiten liegen.

Event Flashback und Trauma: Zur Poetik der Rückblende

06SE255o004 / Seminar / 963

Description:

Business event contents:

Obwohl die filmische Rückblende eines der gängigsten erzählerischen Mittel darstellt, ist sie verhältnismässig wenig erforscht. Seit Maureen Turims

1989 veröffentlichter Monografie Flashbacks in Film ist keine umfassende Studie mehr zum Thema erschienen.

Dies ist nicht zuletzt deshalb erstaunlich, als die Rückblende seither insbesondere im seriellen Erzählen an Wichtigkeit gewonnen hat. Wohlverstanden: Flashbacks und Flashforwards unterschiedlichster Art werden in Film und Fernsehen seit Jahrzehnten eingesetzt. Ausgangspunkt des Vertiefungsseminars ist die Beobachtung, dass sich insbesondere in jüngeren Streamingserien neue Formen etabliert haben, denen andere Funktionen zukommen als «klassischen» Rückblenden.

Zwei Beispiele seien hier stellvertretend angeführt: In der ersten Staffel von DAMAGES (Idee: Todd A. Kessler, Glenn Kessler, Daniel Zelman, US

2007-2012) wird bereits in der ersten Folge der Anfang eines Flashforwards gezeigt, das offensichtlich die Lösung des zentralen Rätsels der Serie - die Identität des Mörders - enthält. Über die insgesamt

13 Folgen der Staffel hinweg wird diese Sequenz immer ausführlicher gezeigt, bis sie am Ende vollständig zu sehen ist. Bemerkenswert an dieser Erzählordnung ist, dass die verzögerte Enthüllung einzig dramaturgischen Zwecken dient und dies offen ausstellt.

Ganz anderer Art sind die Flashbacks in A HANDMAID'S TALE (Idee: Bruce Miller, US

2017-). Während viele Formen der Rückblende entscheidende Plot-Elemente enthalten und somit dazu dienen, die Handlung zu vervollständigen respektive überhaupt erst verständlich machen, besitzen viele der ausgedehnten Rückblenden in A HANDMAID'S TALE keine im engeren Sinne erzählerische Notwendigkeit, sondern dienen primär der Ausstaffierung der Handlungswelt.

So unterschiedlich die beiden Beispiele gelagert sind, was sie verbindet, ist, dass im Zentrum der Rück- bzw. Vorblenden jeweils traumatische Ereignisse stehen. Auch dies ist freilich nichts Neues, sondern findet sich bereits in klassischen Beispielen wie etwa SPELLBOUND (Alfred Hitchcock, US 1945). Der Unterschied ist, dass das traumatische Ereignis bei Hitchcock als grosse Enthüllung inszeniert wird, die das mysteriöse Verhalten der Hauptfigur erklärt. Im jüngeren Mainstreamkino sind Traumata dagegen Teil des erzählerischen Standardinventars geworden. Das Trauma ist keine Überraschung mehr, sondern wird als Teil der üblichen Charakterisierung der Figuren regelrecht erwartet.

In den neuen Formen der Rückblende verbinden sich - so die Arbeitsthese des Vertiefungsseminars - zwei unterschiedliche Entwicklungen: Zum einen ein gesamtgesellschaftlicher Diskurs, der Traumata immer mehr ins Zentrum rückt («post-traumatic stress disorder» wird seit

1980 von der APA offiziell als Diagnose anerkannt), zum anderen das Aufkommen «komplexer» erzählerischer Formen (Jason Mittell), bei denen Worldbuilding immer wichtiger wird.

Event Filmische Naturerscheinungen? Film-Natur zwischen Anschauung und Begriff in den Audiovisionen
06SE255o502 / Seminar / 946

Description:

Business event contents:

"Natur" ist derzeit angesichts multipler ökologischer Bedrohungen in aller Munde und zugleich scheinbar im Anthropozän im Schwinden begriffen. Natur ist dabei mit Film und Kino von Beginn an verbunden und beide prägen einander wechselseitig, auch in einem unmittelbar materiell-ökonomischen Sinne, bis heute. Film als Technologie und Ökonomie verhält sich hierbei zu Natur und Umwelt zunächst negativ, denn seine Produktion setzt den Verbrauch von natürlichen Ressourcen voraus. Zugleich sind aber die Kinoleinwand und andere Bildschirme teils die einzigen Flächen, von denen aus 'Natur' dem Publikum entgegenscheint. Sei es als Landschaft, Stimmung oder in Form von Einzellebewesen Natur prägt nicht nur filmische Zeige- und Erzählordnungen, diese prägen umgekehrt durch Settings, Kreaturen, Protagonisten und Antagonisten das, was wir meinen, wenn wir "Natur" sagen - so zumindest die Ausgangsthese des Seminars.

Die Lehrveranstaltung hat also zum Ziel, in verschiedenen Ausdrucksqualitäten von Natur in der Filmsprache einzuführen und diese als eine Form sinnlicher Begriffsbildung anzuschauen. Dabei sollen von einer filmphilosophischen Perspektive aus filmisch-ästhetische Gebräuche der Natur untersucht werden und die verschiedenen Umschreibungsverfahren, die der Film am Naturbegriff vollzieht, vorgestellt und analysiert werden. Im Seminar sollen dabei einerseits gegenstandsbezogene Kenntnisse in der Filmphilosophie entwickelt und vertieft werden, andererseits soll über die Einbeziehung aktueller film- und kulturwissenschaftlicher Diskurse die Position des Filmischen in den gegenwärtigen Debatten um Umwelt/Mitwelt, Ökologie und (Post-)Anthropozentrismus verortet und diskutiert werden.

Im Seminar werden sowohl filmanalytische und filmtheoretische Kompetenzen vertieft als auch Perspektiven auf den Film als einer Praxis der philosophischen Ästhetik evaluiert. Hierbei geht es insbesondere auch darum, Film in anderen Dimensionen zu betrachten, als seine Konzeption als Vermittlungsinstanz vorsieht.

Event Techniques de la traduction (B2/C1)
06SK390-013a / Sprachkurs / 2,842

Description:

Business event contents:

Ceci est un cours d'apprentissage de la langue française. Il est conduit dans une perspective comparatiste. Il est axé sur la lecture de textes utilitaires et littéraires et sur l'écoute de documents oraux. Il propose de brefs exposés théoriques suivis d'exercices de grammaire française portant sur la syntaxe et la phraséologie: le passif, les temps du récit, les phrases participiales, la traduction du groupe adjectival, la négation et certains idiomatismes. Dans ce mouvement, nous mettrons à l'épreuve quelques logiciels de traduction courants. Enfin, la comparaison de textes traduits de l'allemand vers le français (ou l'inverse) ouvrira sur la question des enjeux culturels de la traduction.

Ce cours ne teste pas les connaissances de l'allemand. Néanmoins, la comparaison des langues nécessite la maîtrise de l'allemand au niveau B2/C1 ; il faut aussi accepter de mémoriser un petit nombre de tournures germaniques (sich helfen lassen = se faire aider...)

Course Materials: Des extraits de grammaires universitaires variées seront disponibles sur OLAT. Aucun achat n'est nécessaire.

Event Le génie des lieux
06UE390-509a / Exercise Group / 1,651

Description:

Business event contents:

Aujourd'hui, le style se définit comme une appropriation individuelle de la langue. Ce cours propose des outils d'analyse linguistique permettant de reconnaître le style d'auteurs et d'époques variées. L'étude des concepts d'analyse conduira à l'écriture créative sous forme de pastiches (l'IA sera sollicitée). Le style universitaire fera l'objet d'une séance à part. Même remarque pour l'histoire des conceptions du style et des figures de style. Notre fil conducteur sera l'écriture géographique. Ici, la construction du référent (un lieu, un espace, un paysage) se singularise par sa charge imaginaire. Nous arpenterons villes et campagnes, curieux du génie des lieux. Nos guides seront suisses, de Ramuz et Roud jusqu'à Fanny Désarzens et Alexandre Lecoultré. Il y aura aussi les poètes de Paris, des romantiques à Milène Tournier.

Course Materials: Des extraits à lire seront disponibles sur OLAT.

Event La liste Goncourt 2026

06KO390p502a / Colloquium / 1,624

Description:

Business event contents:

Chaque année, au mois de septembre, l'Académie Goncourt publie la liste Goncourt. Celle-ci contient une quinzaine de romans, parmi lesquels sera choisi le futur lauréat du Prix Goncourt, prix littéraire français le plus important, qui a été décerné, entre autres, à Marcel Proust (1919), Simone de Beauvoir (1954), Patrick Modiano (1978), Marguerite Duras (1984), Michel Houellebecq (2010), Lydie Salvayre (2014), Mathias Énard (2015) et Mohamed Mbougar Sarr (2021). Le but de ce cours est de donner l'occasion aux étudiantes et aux étudiants de lire les romans de la liste Goncourt et de découvrir ainsi des tendances et principes esthétiques caractéristiques de la littérature d'aujourd'hui. Ce cours sera également un lieu de rencontre pour ceux et celles qui voudront s'engager à titre personnel dans la sélection nationale de la liste Goncourt (voir <https://ch.ambafrance.org/-Choix-Goncourt-de-la-Suisse->).

Notes:

Dans la première séance de ce cours, qui aura lieu le 18 septembre 2026, nous étudierons la liste Goncourt et choisirons un certain nombre de romans, que nous lirons ensuite pendant le semestre.

Event Fachdidaktik Chemie I
06SE090Ch1 / Seminar / 890

Description:

Business event contents:

Der Chemieunterricht am Gymnasium soll einerseits grundlegende chemische Kenntnisse für den Alltag vermitteln und andererseits auf ein naturwissenschaftlich orientiertes Hochschulstudium vorbereiten. Diese beiden Ziele sind im Unterricht gleichermassen zu berücksichtigen. Da viele Lerninhalte sequentiell und einander benützend strukturiert sind, ist dem logischen Aufbau des Unterrichts besonderes Augenmerk zu schenken. Dies bedingt eine feine Abstimmung von fachlichen Inhalten und didaktischen Methoden auf die kognitive Leistungsfähigkeit der Lernenden. Anhand der Diskussion bewährter Beispiele und dem Entwurf eigener Unterrichtsbausteine soll die zukünftige Lehrperson befähigt werden, einen den spezifischen Rahmenbedingungen angepassten Unterricht zu entwickeln, der diesem hohen Qualitätsanspruch genügt.

Notes:

FD 2 deals with aspects of teaching students at upper-intermediate and advanced levels. A substantial part of our course is dedicated to teaching and discussing literature. Participants are expected to read several novels, plays, poems and short stories. A reading list will be provided towards the end of FD 1. We will devise lesson plans on short stories with a view to LM exam requirements. Other areas addressed in this course include written and oral assessment (grammar at advanced levels, essay writing, presentations, oral marks), the use of ICT, film, literary theory, 21st-century skills, the Matura examination and continuous professional development. As in the first semester, students are expected to take an active part in the course.

Event Fachdidaktik Geschichte I (Weber)
06SE090Ge1a / Seminar / 907

Description:

Business event contents:

Im Kurs Fachdidaktik Geschichte I bestimmen wir zunächst Ziele und Merkmale guten Geschichtsunterrichts (Wissen, Kompetenzen, Inhalte, Leitfragen). Wir isolieren dabei Narrativität und Dialog als zentrale Potentiale von Geschichtsunterricht heraus, um Geschichtsunterricht gut zu gestalten. Anschliessend besprechen wir Unterrichtseinstiege und studieren dann während mehreren Sitzungen jene Geschichten, mit denen Schülerinnen und Schüler historisch lernen können. Dabei geht es um die ganze Bandbreite geschichtskultureller Erzählungen, mit denen sich historisches Lernen auseinandersetzen kann (Lehrmittel, Vorträge, Filme, digitale Formate etc.). Die Studierenden bauen während dieser Phase bis Ende Semester ein Portfolio mit geeigneten Erzählungen für ein Unterrichtsthema auf. Für jede Sitzung müssen die Studierenden fachdidaktische Texte lesen und Aufgaben zur Lektüre schriftlich bearbeiten.

Notes:

- Obligatorische Gestaltung eines Lektionsteils im November/Dezember sowie eine Hospitation an der Kantonsschule Zug - In den Sitzungen brauchen die Studierenden ein Notebook/Tablet, auf dem das Programm «onenote» installiert ist; die im Kurs bearbeiteten Aufgaben werden mit den anderen Studierenden auf «onenote» geteilt - Vorausgesetzt wird die Bereitschaft, während der Arbeit mit den Schülerinnen und Schülern der Kantonsschule Zug (praktischer Teil) videographiert zu werden und vom Dozenten ausgewählte Videoausschnitte im Kurs zu präsentieren (Videodaten werden nur für Kurs benutzt und am Ende des Kurses gelöscht).

Course Materials: Fachdidaktische Texte, die elektronisch zur Verfügung gestellt werden.

Event Exercise: Where Does the Artwork End?—Perception and Immersion in Contemporary Chinese Digital Art
06UE642p003a / Exercise Group / 5,654

Description:

Business event contents:

This course explores the phenomenology of art reception through the lens of digital and virtual media, taking the work of Chinese artist Cao Fei (1978-) as its central case study. Using her 2026 solo exhibition "Testimonies to the Near Future" at the Kunstmuseum Basel—which transforms the museum into an immersive total work of art spanning video installations, virtual reality settings, and physical installations—as a shared reference point, we ask: where are the physical and perceptual boundaries of an artwork and how have digital methods of art creation transformed these boundaries?

The course combines close analysis of Cao Fei's work with readings in phenomenology, media theory, and contemporary art criticism, and consists of two components: in-class teaching and an excursion. The excursion to Kunstmuseum Basel, led by Dr. Uli Sigg, includes an exchange with the exhibition curators and discussions on curatorial practices relevant to digital and immersive art, while the seminar sessions provide critical frameworks for understanding perception and immersion in contemporary digital art.

Notes:

We begin the seminar sessions by exploring some of the available tools used for creating digital video art, virtual reality (VR), and augmented reality (AR), to better understand their contribution to and impact on art creation. Then we proceed with foundational questions of phenomenological aesthetics: how does the perceiving body relate to an artwork it stands before, walks through, or inhabits? We then turn to the specific perceptual challenges posed by digital media. How does video art differ from fully immersive VR? What happens to the boundary between artwork and environment when reality is augmented? And how "real" is virtual reality for the viewer and for art? Finally, we examine the cultural specificity of Cao Fei's work, asking what it means to construct virtual spaces saturated with the textures of Chinese urban life, labor, and technological transformation.

The language of instruction is English; all course assignments can be completed either in English or German.

06SE360-532 / Seminar / 2,389

Description:

Business event contents:

Das Modul bietet eine intensive Einführung in die kulturjournalistische Praxis und erprobt die erworbenen Kompetenzen in der literaturkritischen Begleitung der aktuellen Schweizer Gegenwartsliteratur. Als semesterweise, on- und offline zusammenarbeitende Redaktion sichten wir die relevanten Neuerscheinungen des Frühjahrs, rezensieren diese für Print- und Onlinemedien, produzieren Audiobeiträge und begleiten die Solothurner Literaturtage als offizieller Blog. Die Kooperation mit namhaften Medienpartnern begleitet den Transfer von der universitären Theorie in die publizistische Praxis und lädt zur Netzwerkbildung und Publikation erster Texte ein. Gleiches gilt für die redaktionseigene Plattform <https://www.buchjahr.uzh.ch>, die sich als viel beachtetes Archiv der Schweizer Gegenwartsliteratur etabliert hat und den Studierenden auch über das Modul hinaus eine publizistische Bühne bietet.

Event Generative Künstliche Intelligenz in der Gesundheitskommunikation
06SE254p101a / Seminar / 1,127

Description:

Business event contents:

Der Einsatz Generativer Künstlicher Intelligenz (GenKI) eröffnet in der Gesundheitskommunikation vielfältige neue Möglichkeiten, ist jedoch zugleich mit erheblichen Herausforderungen und Risiken verbunden. Von KI-gestützten Gesundheitstools über ethische Fragestellungen bis hin zu Fragen nach Wirkungen und nach notwendigen Kompetenzen von Nutzenden ergeben sich zahlreiche Forschungsfelder, die sowohl aus theoretischer als auch aus praktischer Perspektive relevant sind.

In diesem Forschungsseminar untersuchen wir den Einsatz und die Wirkung von GenKI im Kontext der Gesundheitskommunikation und analysieren, welche Chancen und Herausforderungen sich daraus für Individuen, Organisationen und die Gesellschaft ergeben. Die Studierenden erarbeiten Einblicke in aktuelle Entwicklungen KI-basierter Kommunikationsangebote im Gesundheitsbereich und setzen sich kritisch mit deren Potenzialen sowie mit möglichen Risiken - etwa in Bezug auf Fehlinformation, Qualität, Verantwortung, Transparenz oder Datenschutz - auseinander.

Übergeordnetes Ziel des Forschungsseminars ist die Konzeption einer Bachelorarbeit, die sich mit GenKI im Bereich der Gesundheitskommunikation auseinandersetzt. Im Rahmen eines Projektes werden daraufhin selbstständig und im Team wissenschaftliche Fragestellungen formuliert und mit Hilfe sozialwissenschaftlicher Theorien und Methoden bearbeitet. Dabei werden die im Studium vermittelten Methoden-, Vermittlungs- und Organisationskompetenzen angewandt. Der methodische Zugang des Forschungsprojekts ist frei wählbar. Die Projektergebnisse werden mündlich und schriftlich präsentiert und bilden die Grundlage für die anschließende Ausarbeitung im Modul Bachelorarbeit.

Nach Abschluss des Seminars sind die Teilnehmenden in der Lage, eigenständig an einem wissenschaftlichen Projekt sowohl theoretisch als auch methodisch zu arbeiten und selbstständig Forschungsfragen zu entwickeln. Sie sind damit optimal auf die Weiterbearbeitung ihrer Thematik und das Verfassen der Bachelorarbeit vorbereitet.

Event Gruppe 10, Proseminar 2: Umstrittene Zugehörigkeiten in der Schweizer Geschichte (15. bis 20. Jahrhundert)
06SE600-007w / Seminar / 416

Description:

Business event contents:

Wer ist Teil der Gesellschaft? Wer wird ausgeschlossen? Wie funktioniert der Ausschluss von sozialen Gruppen? Welche Rolle spielen dabei materielle und symbolische Praktiken der Kategorisierung, Herabwürdigung, Marginalisierung und Verfolgung? Wer sind die vorwärtstreibenden Kräfte? Wie reagieren Betroffene, wie setzen sie sich zur Wehr? Welche «Stimmen» können wir heute noch «hören», und wie laut? Diesen Fragen gehen wir im Basismodul I nach.

Wir betrachten anhand von Auszügen aus der Forschungsliteratur, mit welchen analytischen Herangehensweisen Fragen nach Zugehörigkeit historisiert werden. Dabei arbeiten wir mit Quellen aus der spätmittelalterlichen Eidgenossenschaft und der Schweiz im 20. Jahrhundert.

Zum einen schauen wir uns an, wie die eidgenössischen Orte an Tagsatzungen seit dem späten Mittelalter gesellschaftliche Zugehörigkeiten verschiedener Personengruppen - etwa Juden, Lombarden und fremde Bettler - verhandelten. Als Quellen sind uns die Beschlussdokumente (Abschiede) dieser Treffen in 16 edierten Bänden erhalten. Zum anderen nehmen wir die Überfremdungsdiskurse in der Schweiz seit Beginn der 1950er-Jahre in den Blick. Anhand von Propagandamaterial und Medienberichten rekonstruieren wir, wie die Schwarzenbach-Initiative ganzen Menschengruppen die Zugehörigkeit absprach. Aktivistische Stellungnahmen führen uns die Bedeutung von Counter-narratives vor Augen.

Neben inhaltlichen Schwerpunkten vermittelt das Basismodul grundlegende geschichtswissenschaftliche Arbeitstechniken wie Recherche- und Lesemethoden, korrektes Zitieren sowie den Umgang mit wissenschaftlichen Texten und historischen Quellen.

Exkursionen: Im PS1 nehmen wir an einer Führung am «Schauplatz Brunngasse» teil, einem wichtigen Erinnerungsort jüdischer Geschichte in Zürich. Im PS2 besuchen wir das Schweizerische Sozialarchiv, wo wir gemeinsam Archivmaterial der «Schwarzenbach-Initiative» sichten werden.

Notes:

Im Proseminar 1 besteht der Leistungsnachweis aus einem Vortrag und einem Forschungsbericht (3-5 Seiten). Im Proseminar 2 wird verlangt: Ausarbeitung eines Konzepts zur Proseminararbeit (2-3 Seiten) und Proseminararbeit (8-10 Seiten plus Literaturapparat). In beiden Proseminaren werden die Teilnahme an den Exkursionen (Schauplatz Brunngasse, Sozialarchiv) und mündliche Beteiligung erwartet. Kleinere Leistungsnachweise auf die Sitzung sind geplant.

Event Data and Computing in Historical Research: Methodology and Methods
06UE598-503a / Exercise Group / 2,335

Description:

Business event contents:

Die Übung widmet sich der Frage, wie die Geschichtswissenschaft den methodischen Herausforderungen als Folge der Digitalisierung von Fotografien und dem Aufkommen der digitalen Fotografie begegnen könnte. Wie verändern digitale Datenbanken und die Digitalisierung von Fotografien aus dem

19. und

20. Jahrhundert das historische Arbeiten? Welche Folgen haben die zunehmende Sichtbarkeit, Zirkulation und Multiplikation von Bilddokumenten auf die Geschichtsschreibung? Worin unterscheidet sich die digitale Fotografie von analogen Techniken wie der Daguerreotypie, der Kodak-Knipser-Fotografie oder der Polaroid-Fotografie? Welches Potential liegt in Tools wie dem Screenshot für die historische Methode? Und wie verändern Blogs die Schreibpraxis der Historikerinnen und Historiker? Wir werden in der Übung neuere Beiträge aus den Bildwissenschaften, Medienwissenschaften und dem neuen Feld der Digital History lesen und diskutieren. Zudem werden wir uns im Archiv unterschiedliche Fotografie-Formate seit dem 19. Jahrhundert anschauen und ein Pressebildarchiv besichtigen.

Bildarchivar:innen werden uns die Tücken und Potentiale der Digitalisierung von Bildbeständen erklären. Und wir werden verschiedene Online-Archive auch aus forschungsethischer Sicht untersuchen.

Event ST Seminar Ethics: My Body, My Choice? – Theological Perspectives on the Beginning of Life and Reproduction
01SE23SS128 / Seminar / 2,617

Description:

Business event contents:

„My Body, My Choice?“ – unter diesem Leitgedanken untersucht das Seminar die theologischen, ethischen und bioethischen Fragen der Reproduktionsmedizin in Christentum und Islam. Diagnostische Verfahren, Hormontherapien und künstliche Befruchtung haben zunehmend Eingang in die Therapiemöglichkeiten von Eltern mit unerfülltem Kinderwunsch gefunden. Vor diesem Hintergrund reflektieren wir über die theologischen Positionen zu medizinischen Eingriffen am Lebensanfang und diskutieren, wie religiöse Ethiken menschliche Autonomie, Verantwortung und Solidarität beurteilen. Ein besonderer Schwerpunkt liegt auf dem Begriff der „Person“ im Kontext der Embryonenforschung: Die Studierenden erörtern, wie Embryonen und Föten in christlicher und islamischer Theologie betrachtet werden, und entwickeln ein theologisches Verständnis von Personsein in frühen Lebensstadien. Darüber hinaus werden zentrale ethische Fragen zu Themen wie Schwangerschaftsabbruch, Leihmutterschaft und Samenspende interreligiös diskutiert.

Ziel des Seminars ist es, die Studierenden dazu zu befähigen, die Gemeinsamkeiten und Unterschiede zwischen christlichen und islamischen Positionen systematisch aufzuzeigen, kritisch zu reflektieren und konstruktiv darüber ins Gespräch zu kommen. Durch die Kombination von medizinischem Wissen, theologischer Analyse und ethischer Reflexion lernen die Studierenden, verantwortungsvolle, theologisch fundierte Urteile in Fragen der Reproduktionsmedizin zu entwickeln.

Das Seminar findet als Blockveranstaltung während der Reading Week von Montag bis Freitag 10-16 Uhr in Präsenz und mit einer integrierten eigenständig organisierten Selbstlernzeiten im Ethik-Zentrum der Universität (Zollikerstrasse 115, 8008 Zürich) statt.

Event PT Liturgics Training: Evensong
01UE24SU027 / Exercise Group / 2,096

Description:

Business event contents:

Der „Evensong“ ist ein Abendgottesdienst in der anglikanischen Tradition. Typisch sind der gepflegte Gesang und die liturgischen Elemente der Vesper. Wir orientieren uns an dieser Form, aber interpretieren und erweitern sie zugleich. Wir hören eine kurze Predigt und nicht nur eine Lesung, lassen die Gemeinde und nicht nur den Chor singen und wagen den bewussten Stilbruch mit verschiedenen Traditionen (Gregorianik, Genfer Psalter und Worship). Ausserdem feiern wir ein schlichtes und schlankes Abendmahl. Wir üben uns also im Feiern und experimentieren mit Formen. Es geht einerseits darum, mit der klassischen Liturgie Vertrautheit zu gewinnen und andererseits darum, Neues zu erproben. Die Studierenden können im Rahmen des Moduls PT4 erste Schritte in Gottesdienstleitung, (öffentlich) Beten und Predigen üben. Selbstverständlich kann man die Übung, die jedes Semester stattfindet, auch als Wahlmodul buchen.

Event Lake Lucerne excursion: hiking and exploring the Swiss national mythology
01EX61SE001 / Field Trip / 875

Description:

Business event contents:

Vom 31.8. bis zum 4.9. findet die Exkursion in die nationalmythologische Kernlandschaft der Schweiz statt. Der Blockkurs im FS 2026 ist die obligatorische Vorbereitung für diese Exkursion und damit Teil einer zweisemestrigen Veranstaltungskombination.

Zwischen dem 31.8. und dem 4.9.2026 gehen wir dem Vierwaldstättersee entlang und beschäftigen uns mit der Nationalmythologie der Schweiz, ihrer literarisch-religiösen Genealogie und den am Urnersee gelegenen zentralen Erinnerungsorten wie Rütli, Tellplatte oder Schillerstein sowie ihrer touristischen Nutzung. Gegebenenfalls finden auch Orte der zeitgeschichtlichen Religionsgeschichte Eingang in die Exkursion, wie etwa Seelisberg als Hauptsitz der Bewegung "Transzendente Meditation".

Im Zentrum stehen die religionshistorischen und literarischen Konstruktionen der genannten Schauplätze vom 18. Jahrhundert bis in die Gegenwart, die wir wandernd erforschen. Ergänzend dazu widmen wir uns der kulturell erlernten Landschaftswahrnehmung. Dies tun wir einerseits mit der Perspektive der von Lucius und Annemarie Burckhardt-Wackernagel begründeten Promenadologie, welche die kulturelle Prägung unserer Wahrnehmung von Landschaft (etwa als „schön“ oder „ursprünglich“) analysiert und dekonstruiert. Andererseits berücksichtigen wir auch Perspektiven wie die ökokritische Sicht, welche das Verhältnis von Mensch und Natur im Anthropozän in den Blick nimmt. Wandern und Spazieren werden dabei nicht nur als kulturelle Praktiken, sondern auch als potenzielle Formen wissenschaftlicher Erkenntnis befragt. Die Promenadologie wie auch die Ökokritik – letztere ursprünglich in der Literaturwissenschaft verortet und heute ein interdisziplinäres Forschungsfeld – bieten methodische Zugänge, die während der Exkursion in situ erprobt und reflektiert werden.

Event Antike Rechtsgeschichte
02VL90GL1-2 / Course / 3,777

Description:

Business event contents:

Das römische Recht in seiner endgültigen Form, wie es im Corpus Iuris Civilis Justinians zusammengefasst ist, bildet die Grundlage aller kontinentaleuropäischen Rechtsordnungen und wird daher häufig isoliert als einzige Quelle unseres Rechtsdenkens betrachtet.

Entgegen diesem idealisierten römischen Recht der romanistischen Tradition entstand und entwickelte sich das eigentliche römische Recht neben vielen anderen antiken Rechtstraditionen, die ihm Jahrhunderte, wenn nicht Jahrtausende vorausgingen.

Die Rechtsgeschichte war also schon alt, als das römische Recht seine Entwicklung begann. Ziel der Vorlesung «Antike Rechtsgeschichte» ist es, diese «anderen» Rechtstraditionen und ihre Wechselwirkungen mit dem römischen Recht zu untersuchen. Anhand von Beispielen aus der mesopotamischen, ägyptischen und griechischen Rechtstradition wird die tatsächliche Rechtspraxis dieser antiken Kulturen untersucht, die uns durch zahlreiche Dokumente, insbesondere Tontafeln aus Mesopotamien und Papyri aus dem griechischen und römischen Ägypten und dem Nahen Osten, überliefert ist.

Der Kurs wird sich auch mit den Problemen befassen, die sich aus der Ausdehnung des Römischen Reiches ergaben: Insbesondere wie die römischen Juristen, die römischen Gerichte und die kaiserliche Bürokratie mit einer Rechtspraxis in den Provinzen umgingen, die anders als in Italien oft noch von nicht-römischen Rechtstraditionen beherrscht war.

Notes:

Keine Vorkenntnisse in Antikem Recht inkl. Römischem Recht nötig. Es wird mit übersetzten Quellen gearbeitet, keine Kenntnisse Antiker Sprachen nötig.

Course Materials: Die wesentlichen Quellentexte und weitere Materialien werden ab Beginn der Veranstaltung auf der Homepage des Lehrstuhls kontinuierlich publiziert.

Event Hacking the HTEL - Prototyping in action!
07PRDSA302.1 / Praktikum / 5,303

Description:

Business event contents:

The whole UZH HTEL is a giant prototype and subject to constant development. Whether it is small robotic solutions, improvements of robotic tools or creating more automation-friendly setups: Custom solutions are needed on a regular basis in various shapes. In these practical HTEL projects you will apply basics in electronics, microcontroller programming, digital and analogue input/output processing, feedback control and low-level automation, 3D design and 3D printing in a practical laboratory context.

Notes:

Availability of this course depends on current projects in the HTEL and available resources. Contact johannes.schoergenhummer@chem.uzh.ch for more information and application.

Priority will be given to students enrolled in the DSA minor. Students not enrolled in the DSA Minor may be admitted if requirements are met and resources are available.

Event Electrochemical Technologies

07VUCHE732.1 / Lecture with Practical Exercises / 5,302

Description:

Business event contents:

This course provides a rigorous foundation in electrochemistry, covering thermodynamics, electrode kinetics (including Butler–Volmer and Marcus-type frameworks), and mass transport processes. These concepts are integrated through key experimental techniques such as cyclic voltammetry and impedance spectroscopy. Emphasis is placed on connecting fundamental principles to modern applications, including electrocatalysis, energy conversion and storage, and electrochemical synthesis, with the goal of enabling students to analyze and interpret complex electrochemical systems.

Event Introduction OT: Composition
01UE14LB000 / Exercise Group / 333

Description:

Business event contents:

In dieser Übung setzen wir uns intensiv mit einem der bedeutendsten literarischen und kulturellen Werke der Menschheitsgeschichte auseinander: dem Alten Testament. Ziel der Veranstaltung ist es, einen fundierten Überblick über die vielfältigen Bücher des Alten Testaments zu vermitteln.

Die Bibelkunde richtet sich nicht nur an Theologiestudierende, sondern steht auch Interessierten aus anderen Fachrichtungen und ohne Vorkenntnisse offen. Im Fokus stehen zentrale Themen (z. B. Schöpfung, Prophetie, Gesetz, Weisheit), unterschiedliche Gattungen (Erzählungen, poetische Texte, Gesetzestexte) sowie bekannte und weniger bekannte Personen. Dabei wird auch die historische und literarische Einordnung der Texte behandelt, um eine breitere Perspektive auf ihre Bedeutung und ihren Aufbau zu ermöglichen.

Notes:

Die Übung bildet mit der Einleitungsvorlesung zum Alten Testament ein Modul. Die Veranstaltungen sind aufeinander abgestimmt und dienen als Grundlage für eine systematische Beschäftigung mit den Texten des Alten Testaments.

Für die 1. Sitzung der Übung ist eine Vorbereitung nicht zwingend. Die Lehrveranstaltung bedarf im Verlauf des Semesters einer aktiven Mitarbeit und sorgfältigen Vor- und Nachbereitung. Sollten Sie schon vor der Veranstaltung mit dem Lesen des Alten Testaments beginnen wollen, werden die folgenden Bücher empfohlen: Rut, Ester, Kohelet (Prediger), Hohelied, Klagelieder, Esra, Nehemia, Psalmen, Proverbia (Sprüche).

Während der Reading week (jeweils im HS) finden keine Lehrveranstaltungen statt.

Course Materials:

Die Unterrichtsmaterien werden auf OLAT bereitgestellt. Für die Übung benötigen Sie eine eigene Bibel (vorzugsweise ein physisches Exemplar, in das Sie auch Notizen machen können). Empfohlene Bibelübersetzungen sind die Zürcher Bibel (2007) oder die Elberfelder Bibel (2006).

Zur Erarbeitung der bibelkundlichen Gliederungen, Themen und Übersichten können weiter folgende Werke hilfreich sein:

Rösel, Martin und Dirk Schwiderski. Bibelkunde Des Alten Testaments. 11., durchgesehene Auflage. Neukirchener Theologie, 2021.
Digitale Bibelkunde v. Rösel/Schwiderski: <https://www.die-bibel.de/bibelkunde/ueber-die-bibelkunde>; <https://www.die-bibel.de/bibelkunde>.

Event Götter, Gurus, Scharlatane: Lukian und die religiöse Vielfalt im Osten des Römischen Reiches
06KO322p004a / Colloquium / 5,310

Description:

Business event contents:

Der Osten des Römischen Reiches war in der Kaiserzeit ein Raum intensiver religiöser Vielfalt: traditionelle Kulte, neue Heilsangebote, wandernde Wundermänner und das entstehende Christentum existierten nebeneinander und konkurrierten um Aufmerksamkeit und Autorität.

Der Autor Lukian von Samosata steht im zweiten Jahrhundert mitten in dieser Szene und seziert sie in bissigen Satiren. Er führt Figuren vor wie Peregrinos, der zeitweise Christ war und durch seinen spektakulären Feuertod Aufsehen erregte, sowie Alexander von Abonuteichos, den Gründer eines Orakels. Gemeinsam lesen wir Lukians Texte in Übersetzung und fragen, wie religiöse Autorität entsteht, wie "Aberglaube" definiert wird und warum gerade diese Epoche eine Vielzahl von Propheten und Wundermännern hervorbringt.

Event Abstimmungsforschung in der Schweiz
06SE615p543a / Seminar / 3,471

Description:

Business event contents:

Was die Abstimmungshäufigkeit auf nationaler Ebene anbelangt, so sind die Schweizer unangefochtene Weltmeister. Nirgendwo wird so häufig über Sachfragen abgestimmt wie in der Schweiz. In diesem Seminar stehen Fragen zum direktdemokratischen Meinungsbildungsprozess im Vordergrund: Wie gelangt der Stimmbürger zu seinem Entscheid? Welche Rolle spielen Elitensignale, Framing und Priming, Kampagnenausgaben und andere kontextuelle Bestimmungsgrößen? Zusätzlich wird auf Erhebungsmethoden und Auswertungsverfahren, welche für die Abstimmungsforschung zentral sind, eingegangen.

Event QO Varieties of Economic History
06SE599-504a / Seminar / 2,479

Description:

Business event contents:

This seminar aims to discuss the methodological, theoretical, and empirical variety of economic history. In contrast to other source and archival based research seminars, the final goal of the seminar is to help students write an in-depth analytical paper based on secondary literature. This seminar will not provide a survey of classical authors, themes, and approaches but rather, through a selected list of important monographs and papers, will explore the multiple ways of doing economic history. We will focus on the differences, boundaries, and overlaps between qualitative and quantitative approaches as well as between social and economic history and other fields of historical inquiry such as history of science and technology, gender, law and global history. Discussions will be held in English and German and you may write your short contributions and final research paper in either German or English.

Event QO Raum, Wissen und Gesellschaft – eine Kulturgeschichte der griechischen Welt
06SE600-035a / Seminar / 2,458

Description:

Business event contents:

In der Lehrveranstaltung stehen sozio-politische Netzwerke von Intellektuellen in der Antike im Zentrum der Aufmerksamkeit. Auf der Grundlage literarischer und dokumentarischer Zeugnisse sowie der Ergebnisse aktueller Forschungsarbeiten werden wir mit Hilfe von Methoden der Historischen Netzwerkanalyse Verbindungen von Gelehrten untereinander sowie zu Mitgliedern der Oberschichten rekonstruieren und über Werkzeuge des online-Tools «Geovistory» visualisieren. Ziel ist es aufzuzeigen, wie Wissensbestände in antiken Gesellschaften geformt, institutionalisiert und über die Zeit tradiert wurden und dabei das konkrete Handeln historischer Akteure prägten. Hierbei ist eine interdisziplinäre und internationale Zusammenarbeit mit Studierenden der Universität Complutense de Madrid mit fakultativer Exkursion nach Madrid am Ende des Frühlingsemesters geplant. Teilnehmende der Lehrveranstaltung werden sich im Laufe des Semesters mit ausgewählten Gelehrerschulen beschäftigen und dabei sowohl den Werdegang ihrer Mitglieder als auch die Verbindungen zwischen denselben im Detail studieren. Als Unterrichtssprache werden wir Deutsch und Englisch nutzen. Latein- oder Griechischkenntnisse werden nicht vorausgesetzt.

Europa in der Frühen Neuzeit (ca.
1500 bis

1800) verstand sich als christliches Abendland, das sich gegen Andersgläubige und dem "Orient" abzugrenzen bemüht war. Nach innen dominierte vielerorts der Antijudaismus, während nach außen die Vorstellung von der "Türkengefahr" die Wahrnehmung des Islams prägte.

Unter welchen Bedingungen lebten Juden und "Türken" in diesem Abendland? Welche Kontakte bestanden zu den Osmanen? Anhand dieser Fragen wird auf der Grundlage gedruckter Quellenbeispiele zu diskutieren sein, wie Ausgrenzung in der Frühen Neuzeit erfolgte.

Event Quantification and modelling of the Cryosphere: dynamic processes
07VLGEO815.1 / Lecture with Practical Exercises / 2,501

Description:

Business event contents:

This course introduces quantitative approaches and models to processes of the cryosphere in high mountain areas with a focus on dynamic and thermal processes related to glaciers and permafrost.

This includes applications of simple mathematical and numerical models to investigate ground temperature profiles as well as glacier evolution and dynamics in relation to climate. The course consists of lectures introducing the basic concepts of the different themes, but the main focus lies on extensive computer practicals in which the related quantitative methods and models are applied and explored.

Group work with the quantitative models will also contribute to a deeper understanding of the physical processes involved.

Notes:

Please book module GEO815 in the "Modulbuchungstool" for the fall term.

Event Geographies of Environmental Governance
07VLGEO837.1 / Lecture with Practical Exercises / 1,135

Description:

Business event contents:

The course provides an overview of dominant and emerging trends in the theory and practice of environmental governance. The course addresses environmental issues as policy problems and explores how the environment is regulated, controlled, and contested by a range of actors and institutions. The course focuses on the spatial dimension of environmental change and uses key concepts from geography (scale, region, network) to advance regional environmental governance thinking.

The lectures are complemented by seminar classes to work on case studies in smaller groups of students.

Course Materials: All course materials will be available for download on OLAT at the start of the semester.

Event Unternehmenssteuerrecht I

02VL90WM69-1 / Lecture with Practical Exercises / 4,029

Description:

Business event contents:

Das Modul Unternehmenssteuerrecht I befasst sich mit der Besteuerung der Unternehmen (juristische Personen und Personenunternehmen) sowie mit der Besteuerung der an einem Unternehmen Beteiligten. Unter Berücksichtigung der direkten Bundessteuer, der Verrechnungssteuer und der Stempelabgaben werden insbesondere die handels- und steuerrechtlichen Fragen besprochen, die sich aus der Ermittlung des steuerbaren Jahresgewinns gestützt auf die vom Unternehmen erstellte handelsrechtliche Jahresrechnung (Bilanz und Erfolgsrechnung) ergeben.

Im Fokus der Vorlesung stehen damit die ordentlichen Geschäftsvorfälle (namentlich steuerrechtliche Gewinnermittlung, zeitliche Bemessung und Verlustverrechnung, Ersatzbeschaffung und Reininvestition, Beteiligungsermässigung sowie Besteuerung von Kapitaleinlagen und Kapitalentnahmen). Ausserordentliche Geschäftsvorfälle, wie Umstrukturierungen, Sanierungen, usw. werden daraufhin Gegenstand der Vorlesung Unternehmenssteuerrecht II des HS2023 sein.

Notes:

Die teilnehmenden Studierenden sollten bereits gute Grundkenntnisse im Steuerrecht besitzen und das schweizerische Steuersystem kennen.

Course Materials:

Die Vorlesung richtet sich nach dem Lehrbuch der Dozentin: Madeleine Simonek, Unternehmenssteuerrecht, Grundlagen für das Studium und die Praxis, Zürich 2019 (Schulthess Verlag)

Notwendig sind zudem die Bundessteuererlasse (DBG, StHG, StG, VStG) sowie die BV und das OR.

Event The EU as a Global Actor
06SE615-011c / Seminar / 5,619

Description:

Business event contents:

The European Union's role in world politics has always been shaped by a tension between ambition and contestation. On the one hand, the EU has the potential to act as a global power capable of responding to geopolitical rivalry, economic challenges, and global problems such as climate change. On the other hand, its ability to do so is limited by a political system in which authority is fragmented, sovereignty remains contested, and member states often disagree about threats, interests, values, and appropriate instruments of external action. This seminar starts from this tension. It describes the different institutional set-ups across policy fields and asks how the EU can act internationally despite these internal constraints.

More specifically, we examine the EU as a global actor by connecting its changing international environment with the internal politics of European integration. Rather than treating "actorness" as a fixed quality, we will analyze how the EU's power emerges across different institutional settings, policy instruments, and political conflicts. The seminar introduces students to central debates about the EU as a normative, civilian, market, regulatory, and geopolitical power, while also asking why these roles are often unstable and contested. In doing so, we explore how Europe's external influence is enabled and limited by the distribution of competences between EU institutions and member states, by domestic political conflicts, and by competing visions of Europe's place in the world. With this framework in mind, we analyze current challenges facing the EU, including the Russian war against Ukraine, the new US-Chinese rivalry, emerging trade conflicts, and the EU's role in finding global solutions to global threats such as climate change.

Description:

Business event contents:

This module is designed as a self-study on a research topic defined at the beginning of the Master studies by the supervisor of the Master thesis and the Master coordinator. Through the survey of the current literature on the subject, the student demonstrates a comprehensive understanding of a specialised area of biomedicine. The topic of the module should not overlap with the specific topic of the Master thesis. At the end of the self-study, the examination of the learning outcomes takes the form of a 30-minute oral examination.

Event Keys to a Sonic Past: Synthesizers through the Ages
06SE760p011a / Seminar / 3,714

Description:

Business event contents:

This seminar takes a musicological approach to the cultural history of keyboard synthesizers across the 20th and 21st centuries. Together, we will explore how human creativity and technological innovation shape one another, focusing on the complex feedback loops that emerge within musician-instrument systems. Case studies range from the "switched-on" reinterpretations of classical repertoire by Wendy Carlos and Isao Tomita to the enduring legacy of analog synths in contemporary media such as Blade Runner 2049 and Stranger Things. Across these examples, the seminar traces the technical, commercial, and cultural forces that have defined the life and times of the synthesizer.

As the basic principles of electronic sound generation will be introduced in class, prior knowledge of or experience with synthesizers (though very welcome) is not required. Similarly, while the ability to read musical notation may be advantageous for some case studies, it is not a prerequisite. Instead, the seminar employs a range of analytical approaches-including sonic visualization, close listening, and critical engagement with diverse primary sources-to investigate the aesthetic aspirations and anxieties surrounding electronic sound across different decades. Fundamentally, this seminar invites students from any discipline to think through instruments: to consider how technologies of sound shape musical practices, cultural imaginaries, and the histories we tell about music.

Masterstudierende sind herzlich willkommen, als Gäste am Seminar teilzunehmen.

Description:

Business event contents:

In diesem Kurs lesen wir die Monographie *Haunting Images: A Cultural Account of Selective Reproduction in Vietnam* von Tine M. Gammeltoft (2014, University of California Press).

Tine Gammeltoft zeigt in ihrer Monographie *Haunting Images* eindrücklich auf, wie pränatale Diagnostik und selektive Reproduktion im post-sozialistischen Vietnam zu tiefgreifenden moralischen, affektiven und politischen Aushandlungen führen. Basierend auf ihrer langjährigen ethnographischen Feldforschung in Hanoi zeigt sie, wie Ultraschallbilder zu haunting images werden können, die schwangeren Frauen in das Zentrum von Diskussionen wie Zugehörigkeit, Verantwortung und Vorstellungen guten Lebens rücken, und wie diese sowohl innerhalb von Familien, Gemeinschaften und in Kliniken verhandelt werden. Mit einfühlsamen und emotionalen Fallgeschichten macht Gammeltoft die existenziellen Dimensionen selektiver Reproduktion deutlich: Liebe, Verlust, Schuld, vietnamesische Geister und das Fortwirken der "Nichtgeborenen" prägen das Leben der Frauen, ihrer Familien und des medizinischen Personals in den Kliniken.

Keywords: Selektive Reproduktion, Technologie, Disability Studies, Identität und Zugehörigkeit

Event Im Melting Pot des Mittelalters? Kunst und Kulturen im Königreich Sizilien (1130–1266)

06SE640-024a / Seminar / 4,967

Description:

Business event contents:

Auch im Mittelalter klafften Rhetorik und Realität auseinander: Eugenios, griechischer Gelehrter am Hof Wilhelms II., pries den normannischen König als einen Herrscher, der "das Unstimmige in Einklang" und "disparate und unvereinbare Völker" zu einem einzigen Volk verschmelze. Diese Herrschaftsstrategie zeigt sich auch in der Kunst. Islamische und byzantinische Medien und Ikonografien wurden mit westlichen Elementen kombiniert und trugen dazu bei, den fragilen Frieden zwischen der lateinischen Elite und den griechischen und muslimischen Bevölkerungsgruppen zu wahren. Aber auch unter den nachfolgenden Staufern - die die Bemühungen um Assimilation der nicht-christlichen Bewohner der Insel intensivierten und Zwangsumsiedelungen durchführten - entstanden Kunstobjekte, die von Austauschprozessen zwischen den Kulturen zeugen.

Das Seminar widmet sich diesen Werken als Ausdrucksformen zwischen Austausch und gezielter Aneignung und eröffnet Einblicke in die kulturellen und wirtschaftlichen Verflechtungen im Mittelmeerraum. Im Zentrum stehen die Ausstattungen monumentaler Architekturen (Palazzo Reale in Palermo, Kathedralen von Monreale und Cefalù) sowie Artefakte aus den königlichen Werkstätten. Wir besprechen wandfüllende Mosaik und steinerne Grabmäler, behandeln Werke aus Elfenbein und Edelmetallen, königliche Textilien und Manuskripte. In welchen Kontexten entstanden sie und wie wurden sie rezipiert? Welche Begriffe können wir zur Beschreibung der visuellen Spuren geografischer Mobilität anwenden? Und wie wurden kulturelle Traditionen in Kunst und Architektur appropriiert, um Machtstrukturen zu festigen?

Notes:

In der Einführungssitzung am 18. September werden die Referatsthemen vorgestellt; am 25. September folgt eine Sitzung zur Diskussion zuvor gelesener Texte. Die Pflichtlektüre zur zweiten Sitzung und zu den jeweiligen Referaten wird auf OLAT zur Verfügung gestellt.

Event Übung zum Institutskolloquium "Now Processing"
06UE640p015a / Exercise Group / 5,516

Description:

Business event contents:

Die Übung findet begleitend zum Institutskolloquium "Now Processing: Computergestützte Methoden und digitale Epistemologie in der Kunstgeschichte" statt. Dabei handelt es sich konkret um zwei Workshops, in denen die Teilnehmer*innen ausgewählte digitale Tools und computergestützte Methoden aus der Vortragsreihe praktisch erproben können. Die drei Workshops finden am Freitag, den 18.09. (geleitet von Golnaz Sarkar Farshi), Freitag, den 16.10.26 (geleitet von Sunkyu Lee) und Freitag, den 11.12.2026 (geleitet von Nuria Rodríguez-Ortega) von 10.15 bis 14.00 Uhr statt.

Notes:

Unter dem Titel "Now Processing" soll im Rahmen des Institutskolloquiums (IK) untersucht werden, wie sich computergestützte Methoden auf Forschung und Wissensproduktion in der Kunstgeschichte auswirken. Die Vortragsreihe im HS26 beleuchtet, wie digitale Tools nicht nur die traditionelle kunsthistorische Forschung erweitern, sondern auch wie sie die erkenntnistheoretischen Annahmen beeinflussen, die der Analyse von Kunstwerken, ihrer Geschichte und ihrer Produktionsweise zugrunde liegen. Der Workshop findet begleitend zum IK statt.

Event Exercise: East Asian Ceramics: Technology, Production, and Circulation
06UE642p002a / Exercise Group / 5,358

Description:

Business event contents:

East Asian ceramics have played a significant role in the exchange of ideas, technologies, and objects between East Asia and Europe throughout history. As they were often made specifically for export or produced to order, we encounter them frequently and often in great quantities in European collections. Within East Asia, as well as in the countries they spread to, the fascination with their materiality and aesthetic cannot be overstated. In Japan, highly appreciated tea wares were given individual names, the beauty of Korean celadon wares was praised in the writings of Chinese officials and literati, and Europeans tried for over a century to uncover the secrets of Chinese porcelain production.

Based on East Asian ceramics in collections of Swiss institutions, students will learn about the journeys of ceramic objects, from their creation to their present existence as museum objects. Students will not only investigate the original contexts of production, the materials, methods, and technologies involved, but also the social and cultural functions these objects held in their cultures of origin. They will also explore aspects of interregional and transcontinental movement of objects through trade, collecting, and diplomatic exchange. Tracing the itineraries of these objects, students will critically reflect on the new meanings and entanglements the objects accumulated on their way and in their present role as museum objects.

By collaborating with different institutions, students will have the opportunity to engage directly with objects on site. Furthermore, to better understand the technical and material requirements for ceramic production, a visit to a ceramic studio is also planned.

Event Das Kino von Chantal Akerman
06SE255p001a / Seminar / 600

Description:

Business event contents:

Chantal Akerman, 1950 in Brüssel als Tochter jüdischer Emigrant*innen geboren, erlangte als Filmemacherin und Videokünstlerin mit *Jeanne Dielman, 23 quai du Commerce, 1080 Bruxelles* (1975), einem radikal minimalistischen Film über die alltäglichen Routinen einer verwitweten Hausfrau und Mutter, internationale Bekanntheit. Der Film, der als Meilenstein des feministischen Kinos gilt, wurde im Dezember 2022 vom britischen Filmmagazin *Sight & Sound* zum besten Film aller Zeiten gekürt. Identität, Sexualität und Geschlecht sind in Akermans Werk ebenso wiederkehrende Themen wie Migration, Exil und Zugehörigkeit. Ihre eigene Erfahrung als Tochter polnisch-jüdischer Überlebender der Shoah adressiert sie in verschiedenen Filmen. Insbesondere die Beziehung zu ihrer Mutter Nellie, einer Auschwitz-Überlebenden, spielt in Chantal Akermans Werk eine zentrale Rolle - vom Dokumentarfilm *LETTERS FROM HOME* (1976), in dem die nüchtern gelesenen Briefe der Mutter mit mechanisch gefilmten Stadtansichten von New York in Dialog gebracht werden, bis zu ihrem letzten Film *NO HOME MOVIE* (2015), in dem sie die letzten Jahre ihrer Mutter dokumentiert, über *JEANNE DIELMAN*, den die Regisseurin auch als «Liebesfilm an meine Mutter» bezeichnet hat.

Im Seminar widmen wir uns Chantal Akermans filmischem Werk, das so umfang- wie abwechslungsreich ist: Es bewegt sich zwischen Kino, Kunst und Literatur, zwischen verschiedenen Genres und Gattungen, beinhaltet neben den langen Spiel- und Dokumentarfilmen auch kurze und mittellange Arbeiten, Beiträge für Episodenfilme und fürs Fernsehen.

Ziel der Lehrveranstaltung ist es, innerhalb von Chantal Akermans Werk formale und thematische Bezüge zu ermitteln und zu untersuchen.

Event Gruppe 04, Proseminar 1: Geschlecht und Begehren: Historische Perspektiven
06SE600-007d / Seminar / 405

Description:

Business event contents:

Geschlechterrollen und Sexualität erscheinen heute oft als selbstverständliche Kategorien. Doch wie wurden sie in früheren Gesellschaften gedacht, benannt und gedeutet, und welche Vorstellungen prägten soziale Ordnung, Zugehörigkeit und Abweichung?

Das Basismodul greift diese Fragen auf und führt in grundlegende Fragestellungen der Geschlechter- und Sexualitätsgeschichte sowie in zentrale Arbeitstechniken der Geschichtswissenschaft ein.

Im Proseminar 1 stehen Geschlechterrollen und Identitäten im mittelalterlichen Europa im Zentrum. Die Studierenden setzen sich mit Geschlecht als sozialer, kultureller und politischer Kategorie auseinander und lernen zentrale Fragestellungen, Konzepte und methodische Ansätze der Geschlechtergeschichte kennen. Dabei wird diskutiert, wie Geschlechterordnungen konstruiert, legitimiert, verhandelt und verändert wurden. Zugleich werden grundlegende Techniken der Literaturrecherche, des wissenschaftlichen Lesens und Schreibens sowie korrektes Zitieren eingeübt.

Im Proseminar 2 steht die Begriffsgeschichte von Sexualität und Begehren im Zentrum. Untersucht werden dabei insbesondere Begriffe und Konzepte aus dem 19. und 20. Jahrhundert. Anhand unterschiedlicher Quellentypen analysieren die Studierenden, wie Sexualität(en) und Begehren benannt, gedeutet und reguliert wurden und wie sich Normen, Grenzziehungen und Formen der Selbstbeschreibung wandelten. Ein besonderer Schwerpunkt liegt auf der Einführung in grundlegende Methoden der Quellenanalyse.

Gemeinsam bieten beide Proseminare einen ersten Einblick in die Vielfalt geschichtswissenschaftlicher Perspektiven und Methoden und vermitteln ein Verständnis dafür, wie historisches Wissen über Geschlecht, Sexualität und Begehren entsteht.

Notes:

Erwartet wird die aktive Teilnahme an den Sitzungen, die fristgerechte Einreichung der Leistungsnachweise und weiterer kleiner schriftlichen Aufgaben.

Als Leistungsnachweis wird im Proseminar 1 eine Präsentation sowie ein schriftlicher Forschungsbericht verlangt.

Im Proseminar 2 wird ein schriftliches Konzept sowie eine Proseminararbeit verlangt.

Das Modul gilt als bestanden, wenn die Leistungsnachweise beider Proseminare als bestanden bewertet wurden.

07VUKRI204.1 / Course / 784

Description:

Business event contents:

This course provides a general introduction to the electron- and ion- microscopy methods applied to characterizing inorganic and organic materials. In the first part, the basics of transmission- (TEM) and scanning electron microscopy (SEM) are presented with insights of imaging and image processing. The second part includes the most important aspects of specimen preparation strategies, focused ion-beam (FIB), atom probe tomography (APT), and in-situ microscopy methods. Throughout the semester, various applications in materials science, solid state physics, structural biology, structural geology, and structural chemistry will be reported.

Event Stress Testing of Banks (L)
03VL22MO0044 / Course / 2,826

Description:

Business event contents:

In the aftermath of the financial crisis, regulators looked to ensure banks and financial institutions could survive a severe economic shock and no longer pose systemic risk. As a consequence, bank-wide stress tests became a key tool for risk management.

Bank-wide stress tests measure the resilience against a severe scenario such as a recession. A major advantage of stress tests, compared to more complex risk measures, is that its results are relatively easy to understand which facilitates the communication and usage. However, building a sound stress testing framework and stress testing models is complex.

Event Multilingualism and education
06SE440-121c / Seminar / 2,016

Description:

Business event contents:

This seminar will cover the basics of the concept of multilingualism and multilingual education. In the first part of the seminar, we will take a general look at what multilingualism is and how it can be researched. A broad array of different methods in this field will be covered and current issues, questions, and theoretical foundations of multilingualism research will be discussed. The second part is dedicated to the main theoretical and practical foundations of multilingual education. Among other things, we will explore the importance of teachers' expectations in the multilingual classroom, how attitude research helps us understand the sometimes contradictory stances towards multilingualism in education as well as the interplay between home context and school environment. We will examine different approaches towards including multiple languages in education and students are offered knowledge of bi- and multilingual education at various levels and with respect to language planning and policies as well as a range of target languages: dominant or majority languages, traditional and new foreign languages as well as regional and minority/minoritized and immigrant languages.

Notes:

Deadline of the research paper: 14th of February 2027

Event Black Europe: Afropäische Perspektiven und Geschichte

06SE600-023a / Seminar / 480

Description:

Business event contents:

Die Geschichte der Schwarzen Diaspora in Europa reicht Jahrhunderte zurück. Anhand ausgewählter Beispiele - von der Teilnahme der Tirailleurs Sénégalais am Ersten Weltkrieg über Konzepte des "Black Internationalism" und die Erfahrungen der afrodeutschen Gemeinschaft in der Zwischenkriegszeit bis zu James Baldwins Aufenthalt in der Schweiz - beleuchtet das Seminar das 20. Jahrhundert aus afropäischer Perspektive.

Im Mittelpunkt stehen Fragen nach transnationalen Vernetzungen, nach der Rolle Schwarzer Akteur:innen in Wissenschaft, Kunst, Kultur und Politik sowie nach Formen des Widerstands gegen Rassismus. Dabei diskutieren wir zentrale Begriffe wie "Diaspora", "Afropäisch" und "Black Internationalism" und fragen, wie sich Identität, Zugehörigkeit und politische Solidarität ebenso wie die Produktion von Wissen, Kunst und Kultur über nationale Grenzen hinweg formierten. Die Schwarze Diaspora wird dabei nicht als Randphänomen europäischer Geschichte verstanden, sondern als konstitutiver Bestandteil der europäischen Moderne. Gleichzeitig fragen wir, wie historische Erfahrungen der Schwarzen Diaspora gegenwärtige Debatten über Zugehörigkeit, Erinnerungskultur und strukturellen Rassismus in Europa beeinflussen.

Grundlage der Sitzungen sind aktuelle Forschungsdebatten und unterschiedliche Primärquellen, darunter Selbstzeugnisse, politische Schriften, literarische Werke sowie Fotografien, Plakate, Filme und andere visuelle Quellen.

Event Zwischen Tradition und Innovation – der Musiktheaterbetrieb in der Praxis
06UE760p001a / Exercise Group / 3,109

Description:

Business event contents:

Wie ist ein Theaterbetrieb aufgebaut? Was macht die Programmplanung für eine Musiktheater- und Konzertsaison aus? Welche Stücke kommen warum auf die Bühne? Wie sprechen wir neues Publikum an? Welche Berufe gibt es am Theater - und was bedeutet es dort zu arbeiten? Diesen und vielen anderen Fragen wird in dem Blockseminar mit Exkursion an das Aalto-Theater Essen inklusive Vorstellungsbesuchen von Korngolds "Das Wunder der Heliane" sowie Verdis "Rigoletto" nachgegangen. Die Dozentin Dr. Merle Fahrholz ist seit der Spielzeit 2022/23 Intendantin für das Aalto Musiktheater und die Essener Philharmoniker, zuvor war sie u.a. stellvertretende Intendantin und Chefdramaturgin an der Oper Dortmund. In diesem Seminar soll über die aktuelle Praxis am Theaterbetrieb gesprochen, Fragen zum Berufseinstieg erörtert und allgemeine Überlegungen zur Zukunft der klassischen Kulturszene diskutiert werden.

Notes:

Die Veranstaltung umfasst eine Planungssitzung (18.9., mit Referatsthemenvergabe) und drei Seminarblöcke, deren mittlerer in einer Exkursion nach Essen besteht. Die Exkursion ist integraler Bestandteil der Lehrveranstaltung. Verpflichtender Anmeldetermin: bis spätestens zur 1. Sitzung. Eine preisgünstige gemeinsame Unterbringung wird für die Exkursion organisiert.

Event B: When structures break: disruption and creativity in language
06SE440-120d / Seminar / 325

Description:

Business event contents:

Course description

This course explores how language users creatively exploit and disrupt established linguistic structures. Focusing on English, we examine cases in which grammatical and/or pragmatic conventions are bent, stretched, or broken, as well as how such disruptions open up new expressive possibilities. The course situates these practices at the intersection of linguistic structure, language use, and language change.

Theoretically, the course draws on usage-based linguistics, construction grammar, and pragmatics to address questions of normativity, grammaticality, and creativity. We consider how "rules" emerge from use, how they are negotiated in interaction, and how deviations can become conventionalized over time. These issues will be explored in a range of more applied topics, such as poetic and literary language, advertising and slogans, digital discourse (e.g. memes, hashtags, emoji), spoken interaction, and politically or socially marked language use. Students will work with authentic data and real-world examples to analyze how structural disruption functions meaningfully in context. Through guided discussions and small analytical tasks, they will develop a critical understanding of the relationship between linguistic convention, innovation, and change.

Learning objectives

By the end of the course, students will be able to:

1. Explain key theoretical perspectives on linguistic convention, creativity, and language change.
2. Identify and analyze instances of structural disruption in different genres and modes of language use.
3. Critically assess the communicative and social functions of non-conventional language use.
4. Apply linguistic concepts to authentic data in a clear and methodologically informed way.

General course requirements

All students are expected to carefully prepare the reading assignments, participate actively during the sessions (ask and answer questions, engage with the material, contribute to discussions, etc.), complete assignments and additional exercises.

Notes:

Deadline for submitting the research paper (2/3 of total grade): 15.03.2027

Course Materials: The syllabus for this course will include a number of selected readings, which will be made available on OLAT.

Event Children and Childhood in Shakespeare

06SE440-220b / Seminar / 522

Description:

Business event contents:

This BA seminar explores how William Shakespeare represents children and childhood, and what these figures reveal about early modern English culture. Far from being marginal, children in Shakespeare's plays often occupy emotionally charged and politically significant positions, illuminating questions of innocence, vulnerability, lineage, education, and power. We will examine selected plays that feature striking child characters, and we will consider how these children function dramatically and symbolically, and how their portrayal intersects with issues of succession, tyranny, gender and family.

The seminar also situates Shakespeare's drama within broader early modern conceptualisations of childhood. We will engage with historical ideas about children as both innocent and sinful, malleable and morally instructive figures, and consider how these ideas were shaped by humanist education, religious thought, and social hierarchy. Attention will also be paid to theatrical practice: the existence of children's playing companies and the central role of boy actors on the early modern stage, whose performances complicate distinctions between age, gender and identity.

The course combines literary analysis with historical context and is open to students interested in early modern drama, cultural history and childhood studies.

Description:

Business event contents:

Für die moderne Gesellschaft ist die fast grenzenlose Mobilität in Beruf, Freizeit sowie Aus- und Weiterbildung eine Selbstverständlichkeit. Was aber bedeutet Mobilität für Menschen mit unterschiedlicher Behinderung? Wie müssen sich Menschen mit Behinderung organisieren, um in allen Lebensbereichen teilhaben zu können? Welche Unterstützungsmöglichkeiten stehen ihnen zur Verfügung? Wie gestaltet sich das Gleichstellungsrecht für Menschen mit Behinderung im Bereich Mobilität? Diese Fragen werden in der Theorie besprochen und anlässlich der Exkursionen praktisch erfahren.

Wer plant, an beiden Semestern (HS und FS) teilzunehmen, dem wird der Kauf der Kompaktversion empfohlen, die die Stufen A1 bis B1 umfasst. Es stehen zwei Alternativen zur Verfügung: eine deutschsprachige Ausgabe (Klett) und eine spanischsprachige (Difusión). Die deutschsprachige Version kann insbesondere für Studierende ohne romanistischen Hintergrund hilfreich sein.

Falls noch unklar ist, ob eine Teilnahme an beiden Semestern gewünscht oder möglich sein wird, kann die Ausgabe von CAMPUS SUR gewählt werden, die die Niveaus A1 bis A2 umfasst und nur auf Spanisch erhältlich ist (Difusión).

Da der Preisunterschied zwischen beiden Ausgaben gering ist, wird der Kauf der Kompaktversion empfohlen, auch im Fall einer Teilnahme nur am ersten Semester.

Event Forschungsseminar (Beginn HS 2026), Teil I
06SE226-513b / Seminar / 1,013

Description:

Business event contents:

Jugend geriet ab Ende des 19. Jahrhunderts zunehmend ins Blickfeld des wissenschaftlichen und gesellschaftlichen Interesses. Zunächst wurde sie unter dem Begriff der «Adoleszenz» intensiv wissenschaftlich erforscht. Adoleszenz wurde dabei als Lebensabschnitt mit besonderen Herausforderungen, Aufbruchsbedürfnissen, der Sehnsucht nach Horizonterweiterung und einer ausgeprägten Identitätssuche beschrieben. Im weiteren Verlauf des 20. Jahrhunderts wurden dann unterschiedliche Jugendbilder, zu denen u. a. «Jugend als Problem» gehörte, nicht nur wissenschaftlich verhandelt, sondern sie erlangten auch praktische Relevanz im Umgang mit jungen Menschen. Die Problematisierungen bzw. Marginalisierungen des Jugendalters waren vielfältig. So wurde etwa die proletarische «Grossstadtjugend» als bedrohlich wahrgenommen. Zahlreiche Jugendliche, die als «gefährdet», «verwahrlost» oder «sittlich verdorben» galten, wurden in sog. Erziehungsanstalten eingewiesen, wo sie durch Arbeit zu «sittsamen» Mitgliedern der Gesellschaft erzogen werden sollten. Junge, unverheiratete Frauen wurden zudem gezwungen, einer Abtreibung, Sterilisation oder Adoption zuzustimmen. Auch solche Interventionen trugen zur Marginalisierung der Betroffenen bei. Heute gilt das Jugendalter als Phase, in der bisherige Prägungen auf den Prüfstand gestellt, teilweise bestätigt oder auch korrigiert werden können. Dies kann mit neuen Möglichkeiten, aber auch mit Herausforderungen und Risiken verbunden sein. Dementsprechend können im Jugendalter Kreativität und besondere Leistungen freigesetzt werden, ebenso können aber auch Positionierungen durch Jugendliche selbst oder durch ihr Umfeld erfolgen, die zu Marginalisierungen beitragen und mit ganz unterschiedlichen Etiketten verbunden werden, z. B. Schulabsentismus, Gewalt, Mobbing, Drogenabhängigkeit, Extremismus oder psychische Auffälligkeit. Aber auch geschlechterbezogene oder sozioökonomische Etikettierungen oder ein Migrationshintergrund können Marginalisierung befördern. Solche Marginalisierungen sind nicht nur mit aktuellen Belastungen oder Problemen verbunden, sondern sie können auf frühere Konflikte oder psychische, mikrosoziale oder gesellschaftliche Ausgangskonstellationen verweisen, die diese Prozesse verständlich machen. Zudem können sie gravierende Folgen haben, sodass es wichtig sein kann, sich mit ihrer Bearbeitung bzw. Bewältigung zu beschäftigen. Das Forschungsseminar soll einen Raum zur Bearbeitung von Forschungsvorhaben bieten, in denen sich mit verschiedenen Formen, Dynamiken und Konsequenzen der Marginalisierung von Jugendlichen beschäftigt wird. Dabei besteht die Möglichkeit, Jugendliche sowohl als Akteur*innen als auch als Objekte von Marginalisierungsprozessen in den Blick zu nehmen, so wie auch Zusammenhänge zwischen diesen Aspekten zu untersuchen. Auch in thematischer Hinsicht bietet das Seminar die Möglichkeit, unterschiedliche Marginalisierungen in verschiedenen sozialen Kontexten (Wissenschaft, Bildungs- und Fürsorgeeinrichtungen, Familie, Peers, Sport, Freizeit) zu fokussieren. Schliesslich soll das Seminar auch die Möglichkeit bieten, in methodologischer und methodischer Hinsicht ein breites Spektrum empirischer Zugänge zu erproben.

Description:

Business event contents:

Effective negotiation is an essential skill in nearly every professional and many personal contexts. Whether securing employment, navigating complex organizational dynamics, or resolving disputes, negotiation competence is key to success. Beyond individual career advancement, strong negotiation skills are critical for managing societal and international conflicts - of which there is no shortage today.

Successful negotiation does not depend on innate talent. Rather, it is grounded in skills that can be learned, refined, and strengthened through intensive, practice-oriented training. Effective negotiation goes far beyond persuasive argumentation. It requires the ability to analyze complex and ambiguous situations, manage emotions (especially one's own), maintain focus under pressure, and translate strategy into measurable outcomes. Above all, effective negotiation requires continuous, deliberate practice.

- analyze and reflect on how to resolve conflicts of interest in an integrative and principled manner;
- develop practical negotiation skills through simulations, case studies, and exercises closely aligned with real-world professional challenges;
- experience negotiation under pressure and deliberately step outside their comfort zones;
- critically assess negotiation processes and outcomes, identify areas for personal development, and engage constructively in peer feedback; and
- apply the skills and insights gained in class to real-life professional and personal situations.

Some participant testimonials:

- "This course has been one of my favorite courses in my entire university career." - Andrew Harris, course participant (2025)
- "This course has been a transformative experience. It has given me the tools to approach negotiations with greater clarity, confidence, and adaptability." - Stefanie Camenzind, course participant (2024)
- "This negotiation course proved invaluable in deepening my understanding of both the strategic and interpersonal dimensions of negotiation." - Nancy Quispe Avellaneda, course participant (2024)
- "This course was about far more than just learning new concepts. It is much about getting to know oneself better ... not about optimizing my learning strategy, but about optimizing myself." - Janick Elsener, course participant (2023).

Notes:

This course is a classroom-based course only (no online instruction).

It is a highly interactive, learning-by-doing course. It combines theory and core concepts with extensive preparatory reading and hands-on training methods designed to make the learning process more sustainable and effective. These methods include structured role plays and mock negotiations, case analysis, facilitated class discussions, and self-assessment tools.

The course language is English (proficiency required).

To ensure an interactive and intensive learning environment, the number of participants is limited to a maximum of 24.

Course Materials:

Required reading (to be completed no later than the second day of class):

Roy J. Lewicki, Bruce Barry, and David M. Saunders, Essentials of Negotiation, 8th International Edition (2024), New York: McGraw-Hill, ISBN 978-1-266-91339-6. This book explores major concepts and theories of negotiation psychology, as well as the dynamics of interpersonal and intergroup conflict and their resolution. It can be ordered from Orell Füssli and is also expected to be available at the ETH Store.

Additional required readings and homework assignments (including preparation and debriefing materials) will be distributed during the course. Optional readings are available for further study.

Event Political Communication and the American Public Sphere
06SE254p117a / Seminar / 2,204

Description:

Business event contents:

This course offers a comprehensive introduction to political communication in the United States, and as a field of academic study.

Students enrolled in this course will learn about the history of political communication and information systems in the United States, classical media effects theories, and the cognitive and psychological mechanisms behind political preferences. They will also be introduced to campaign rhetoric and strategy, populist communication, and the evolving role of digital technologies in US elections.

Underlying these issues is the structure and function of the US media ecosystem.

Particular attention will be given to the growing influence of partisan propaganda and political polarization in shaping political discourse. Finally, the course will address the convergence of partisan acrimony and broader threats to information integrity declining trust in institutions, the proliferation of conspiracy theories and disinformation, and the troubling rise of political violence.

By the end of the semester, students will have developed a strong foundation in classical political communication research and should have the necessary tools to engage in informed discussions about the crisis of the American public sphere.

Event Research Internship in Molecular and Cellular Biology
07PRBIO259 / Praktikum / 2,557

Description:

Business event contents:

Die teilnehmenden Studierenden arbeiten unter individueller Betreuung durch eine/n fortgeschrittene/n Forscher/in (Doktorierende/r, Postdoc, Gruppenleiter/in) an einem spezifisch definierten Forschungsprojekt und verfassen einen Bericht nach Projektabschluss. Die Studierenden erhalten somit theoretischen und praktischen Einblick in aktuelle Forschung im Gebiet Molekular- und Zellbiologie.

Participating students work under individual guidance of an advanced researcher (PhD student, postdoc, group leader) on a specific defined research project and write a scientific report upon completion of the project. Thereby students acquire practical and theoretical insight into actual cutting edge research in Molecular and Cellular Biology.

Event CRISPR-Cas: A versatile and scalable gene perturbation system for Genetic Screens
07VUBIO695 / Lecture with Practical Exercises / 506

Description:

Business event contents:

The CRISPR-Cas system revolutionized the genome engineering field with its ease of use and versatility, and has thus been widely adopted for basic and applied research. Yet, the feature that distinguishes CRISPR-Cas from the previous genome engineering tools is its scalability. Combined with the increasingly powerful and accessible Next-generation sequencing (NGS) technologies, thousands of genetic perturbations can now be performed and assessed simultaneously.

The Genome Engineering and Measurement Lab (GEML) is the knowledge and technology Hub of FGCZ, with the mission to stimulate, support, and lead research activities in the genome engineering space. As part of our training and technology transfer activities, we offer a three-day course with hands-on practicals on the cutting edge application of CRISPR Screens. The lectures cover theoretical background on genetic approaches for the functional interrogation of entire genomes, the pooled genetic screen concept, and considerations when designing CRISPR Screens including their compatibility with modern NGS technologies. The practicals consist of NGS library preparation, sequencing and evaluation of CRISPR libraries, and bioinformatic analysis of CRISPR Screen datasets.

Event Gruppe 08, Proseminar 1: Geschlechter, Rollen und Räume: Historische Perspektiven vom Mittelalter bis zur Neuzeit
06SE600-007h / Seminar / 411

Description:

Business event contents:

Geschlechterrollen und -identitäten sind auch heute noch ein hochaktuelles Thema. Doch wie gestaltete sich das Verhältnis der Geschlechter in der Vergangenheit? Lange standen in der Geschichtsschreibung Männer im Mittelpunkt - Rittern und Könige des Mittelalters, koloniale Eroberer und Industriearbeiter. In den letzten Dekaden haben Historiker*innen dieses Bild korrigiert und neue Perspektiven auf historische Geschlechterrollen eröffnet. In diesem Proseminar behandeln wir zentrale Fragestellungen, Konzepte und methodische Ansätze zur Analyse von Geschlecht als sozialer, kultureller und politischer Kategorie und untersuchen anhand ausgewählter historischer Fallstudien, wie Geschlechterrollen konstruiert, verhandelt und verändert wurden. Neben inhaltlichen Schwerpunkten vermittelt das Seminar grundlegende geschichtswissenschaftliche Arbeitstechniken wie Recherche- und Lesemethoden, korrektes Zitieren sowie den Umgang mit wissenschaftlichen Texten und historischen Quellen.

Event Schwarzer Internationalismus. Afro-amerikanische und Diasporische Moderne Kunst im internationalen Kontext
06SE640-013a / Seminar / 5,697

Description:

Business event contents:

Ausgehend von Denise Murrells Feststellung, dass die künstlerische und literarische Gemeinschaft der Harlem Renaissance "never either exclusively Black or American" war (Murrell 2024), untersucht das Seminar die Afro-Transatlantische Moderne als Teil eines internationalen kulturellen und politischen Beziehungsgeflechts. Im Mittelpunkt steht das Konzept des Black Internationalism, das Afro-amerikanische und Afro-Diasporische Kunstgeschichte nicht als nationale Entwicklung, sondern als transatlantisch und global vernetzten Prozess versteht.

Ausgehend von der Harlem Renaissance der 1920er und 1930er Jahre verfolgt das Seminar zentrale Stationen Afro-amerikanischer und Diasporischer Kunst bis zu den Black Power- und Black Arts Movements der 1960er und 1970er Jahre sowie zu zeitgenössischen Positionen, die vielfältige Konzepte von Blackness entwickeln. Dabei werden künstlerische, institutionelle und politische Austauschprozesse zwischen den USA, der Karibik, Europa und Afrika in den Blick genommen.

Neben der Analyse ausgewählter Künstler und Werke werden grundlegende Begriffe und Diskurse wie Pan-Afrikanismus, Ethiopianismus, Harlem Renaissance, Black Internationalism und African Diaspora historisch eingeordnet und kritisch diskutiert. Ziel des Seminars ist es, einen Themenbereich zu erschließen, der in der europäischen Kunstgeschichte lange marginalisiert wurde, und ihn zugleich als integralen Bestandteil der Geschichte der Moderne sowie ihrer transnationalen Verflechtungen zu verstehen.

Notes:

Die erste Sitzung wird aus einer Vorstellungsrunde sowie einer Einführung in die Hauptthemen, Leitfragen, Begrifflichkeiten und Ziele des Seminars bestehen.

Die folgenden Sitzungen werden die gemeinsame Besprechung der Lektüren für alle und die Referate von den Studierenden abwechseln. Die letzte Sitzung wird zu einer Abschlussdiskussion gewidmet sein. Die Abgabefrist für die schriftliche Seminararbeiten ist am: 22.12.2026.

Course Materials:

Die Unterrichtsmaterialien unterteilen sich in die folgenden Hauptkategorien: Die einführende Literatur; die Pflichtlektüren; die Unterrichtsfolien von Seite der dozierenden Person (auf OLAT zur Verfügung gestellt); die Power Point Präsentationen als visuelle Unterstützung der Referate von Seite der Studierenden (nach den jeweiligen Referaten auf OLAT zur Verfügung zu stellen); die Bibliografie als integraler Teil der Recherchearbeit, entwickelt in Vorbereitung auf das Referat und die Seminararbeit.

Event Wie Politik funktioniert: Akten zur Debatte über Pornografie, 1970er-1990er Jahre
06KO600p005a / Colloquium / 3,028

Description:

Business event contents:

1973 hat die sozialliberale Koalition in der Bundesrepublik Deutschland die Gesetzgebung zur Pornografie liberalisiert und diese damit weitgehend freigegeben. Schon 1978 klagten Alice Schwarzer und andere Frauen gegen den "Stern" wegen Sexismus. Es war der Auftakt zu Protesten gegen sexistisch-pornografische Publikationen, die in den 1980er Jahren in der von Schwarzer lancierten PorNo-Kampagne mündeten. Ziel dieser Kampagne war ein Antipornografie-Gesetz, das auch im Deutschen Bundestag und in allen politischen Lagern Fürsprecherinnen fand - jedoch nie eine Mehrheit.

Das Kolloquium untersucht anhand von Ministerialakten von Mitte der 1970er bis in die 1990er Jahre die Verflechtung zwischen sozialen Bewegungen und institutionalisierter Politik, die Machtkämpfe zwischen unterschiedlichen politischen Lagern, und die Zählebigkeit von Verwaltungshandeln und Gesetzgebungsprozessen. Es schult dabei den Umgang mit Quellen und die Erschließung von zeitgeschichtlichen Kontexten.

Event Readings in Neuroinformatics 1

07SEI509.1 / Seminar / 5,218

Description:

Business event contents:

It is a commonplace that scientists rarely cite literature that is older than 10 years and when they do, they usually cite one paper that serves as the representative for a larger body of work that has long since been incorporated anonymously in textbooks. Worse than that, many authors have not even read the papers they cite in their own publications. This course, 'Readings in Neuroinformatics' is one antidote. Major areas of research have been selected, which cover the key concepts of Neuroinformatics. Unusually, we will explore these areas of research by reading the original publications, instead of reading someone else's digested summary from a textbook or review. By doing this, we will learn how the discoveries were made, what instrumentation was used, how the scientists interpreted their own findings, and how their work, often over many decades and linked together with related findings from many different scientists, generate the current views of mechanism and structure of the nervous system. We will also explore the personalities of the scientists and the context in which they made their seminal discoveries. Students will be given original papers to read plus some additional assignments. We will then meet weekly with the course leader and an assistant for an interactive seminar. An intimate knowledge of the papers will be assumed so that the discussion does not center simply on an explication of the contents of the papers. Assessment will be in the form of assignments throughout the semester.

Event Geschichte in der Praxis: Museum Schloss Kyburg
06KO600p015a / Colloquium / 3,592

Description:

Business event contents:

Wie lässt sich (mittelalterliche) Geschichte im Museum lebendig und wissenschaftlich fundiert vermitteln? Das Kolloquium "Geschichte in der Praxis: Museum Schloss Kyburg" widmet sich dieser Frage am konkreten Beispiel des Museums Schloss Kyburg. Im Spannungsfeld zwischen historischen Quellen, fachlichem Wissen und den Erwartungen eines breiten Publikums stehen Museen vor besonderen Herausforderungen - besonders, wenn das Ausstellungsgebäude selbst, wie die Kyburg, eine bewegte Baugeschichte aufweist.

Im Mittelpunkt stehen die Konzeption von Ausstellungen, der Umgang mit Objekten und deren Abwesenheit sowie die inhaltliche Schwerpunktsetzung des Museums. Gleichzeitig richten wir den Blick auf die Besuchenden: Welche Zielgruppen werden angesprochen? Wie prägen populäre Mittelalterbilder (Stichwort: (Neo-)Mediävalismus) die Erwartungen an historische Darstellungen?

Die Veranstaltung verbindet theoretische Reflexion mit praktischen Einblicken und bietet Raum für Diskussionen über die Chancen und Grenzen historischer Wissensvermittlung.

Description:

Business event contents:

Course Materials:

Unterrichtsmaterialien

Alberts B. et al., "Molekularbiologie der Zelle" 7. Auflage, Wiley-VCH, ISBN: 978-3-527-34072-9

oder alternativ die englischsprachige Ausgabe: Alberts B. et al., "Molecular Biology of the Cell", 7th edition, Garland Science, New York, NY, 2014, ISBN 9780815344322.

Dieses Buch gibt einen umfassenden Überblick über die moderne Zellbiologie. Es bildet das Rückgrat der Vorlesung und bietet Beispiele für Problemstellungen und Fragen sowie Selbsttests. Ein Glossar am Ende des Buches fasst die wichtigsten Begriffe zusammen.

Das Studium der englischen Version ist eine hervorragende Vorbereitung für den späteren Umgang mit englischer Fachliteratur. Obwohl nur selektive Ausschnitte dieses umfassenden Lehrbuchs für die Vorlesung direkt relevant sind, empfehlen wir dieses Buch auch im Hinblick auf die Veranstaltungen in Molekularer Biologie der höheren Semester.

Event "Culture is a Weapon of Struggle": Art and Resistance in Apartheid South Africa
06KO600p007a / Colloquium / 3,179

Description:

Business event contents:

Throughout the apartheid era, the cultural field was inseparable from politics. Artists did not work at the margins of protest movements but often stood at their forefront. Art, in this sense, was not an elite project removed from everyday realities; it was deeply embedded in the social and material conditions of the oppressed majority. Community art projects fostered collective participation and political education. Cultural activism also played a crucial role in mobilising global solidarity. Posters, performances, exhibitions, and publications travelled across borders, shaping international public opinion and strengthening transnational networks of resistance.

This colloquium explores the role of art and culture - including "protest theatre," music, photography, literature, poetry, and fine art - in the struggle against racial oppression and violence in South Africa. What aesthetics and visual languages emerged from life under apartheid? How did artistic works circulate within South Africa and beyond? In what ways does art shape, preserve, and challenge public memory in post-apartheid South Africa? In collaboration with South African artists and cultural practitioners, the colloquium will work intensively with primary sources - songs, theatre productions, posters, poetry, and fine art - to explore these and related questions. Based on student research, the course may culminate in an exhibition (to be confirmed).

Notes:

The colloquium is bilingual (English and German). Students may contribute in either language.

Event Field trip: Lägeren
07UEESS101.2 / Field Trip / 867

Description:

Business event contents:

Earth System Science (ESS) is the science that aims at understanding the processes by which Earth's atmosphere, hydrosphere, cryosphere, geosphere and biosphere operate and interact among themselves and how human societies might impact them, interact with them and be affected by them. To this regard it focuses on compartments and flows, being by nature the study of dynamic earth processes and their changes due to global change. To study compartments and flows, we will explore the interactions between earth system spheres in situ with a day day hike excursion to the UZH research site Lägeren <https://www.gcb.uzh.ch/en/Research/TestSites/Laegeren.html> .

This site because it represents a gradient of geological, biological, and human conditions that interact through for example the natural cycles of energy and matter - water carbon, nitrogen, phosphorus, among others - and deep layer processes. It also includes human society, through a direct or indirect effect. During the excursion you will get an overview of each of the geo-biosphere, water-atmosphere, and human environments, and how they relate to the ecosystem services that support our livelihoods.

Notes:

The excursion will take place in the forest of Lägeren, close to Baden. Meeting point will be the bus stop "Wettingen Brunnenwiese" (bus 3 from train station) at 8:49 h (exact schedule will be provided during first lecture of the first week). From there we will hike 4 km uphill, with several stops, explore the surroundings, visit the experimental field site, make our own observations, then hike back in the afternoon. Bring food and water for the whole day. No other costs involved.

Event Seminar Corporate Governance (S)
03SE22MO0041 / Seminar / 2,702

Description:

Business event contents:

This course will provide students with a synthesis of Corporate Governance theory, key findings of the empirical academic literature, and actual examples from the market. The aim is to use the theoretical models and findings of the empirical literature to evaluate and qualify governance frameworks of individual companies as well as legal and regulatory proposals that are widely discussed in the media. The course will cover the main actors of Corporate Governance, from shareholders to the board of directors to auditors and regulators. Note that the course is not intended as a pure classical lecture, but also involves a fair amount of discussion about current governance developments and actual cases.

Notes:

The number of students is limited. Please register by Email and include a copy of your latest Leistungsausweis (christoph.wenk@uzh.ch).

The course intends to allow for a fair amount of time for discussion.
Please only take the course if you intend to actively participate in a discussion.

Course Materials:

The course will not follow a specific textbook. We will look at academic papers and other resources on corporate governance that are available online. A reading list will be distributed at the beginning of the course.

Event Praktische Filmkritik – Produktion von Video-Essays
06UE255p016a / Exercise Group / 5,635

Description:

Business event contents:

In der an zwei Wochenenden online stattfindenden Blockveranstaltung werden theoretische Erkenntnisse mit praktischer Montage-Arbeit zusammengeführt. Ziel ist die Herstellung kurzer, skizzenhafter analytischer Kommentarfilme (Video-Essays) über einen Film. Der (noch zu bestimmende) Film wird im Anschluss an die erste online-Sitzung von allen individuell geschaut.

In den Video-Essays werden mittels Voice-Over sowie Montage der Bilder und Töne aus dem Film individuell gewählte Aspekte fokussiert. Es werden also keine «eigenen» Bilder gefilmt, sondern ausschliesslich Bilder aus dem vorliegenden Film verwendet! Dabei sollen sich mittels Schnitt und kommentierendem Text persönliche Auseinandersetzungen sowie die Reflexion über formale Fragen und damit korrespondierende Erzählhaltungen artikulieren. Theorie wird überführt in Praxis, Filminterpretation wird selbst Film.

Notes:

Durchführung: online only.

Event Preparedness-Diskurse und Prepping-Praktiken in Gegenwartsgesellschaft und Populärkultur
06SE506p002a / Seminar / 1,335

Description:

Business event contents:

In Krisenzeiten verspricht Preparedness Sicherheit. Wenn die Umstände unberechenbar erscheinen, sollen Vorbereitungsmaßnahmen die eigene Handlungsmacht unter allen Umständen absichern und Kontinuität stiften. Im Seminar befassen wir uns mit der Entstehung und Entwicklung von Preparedness-Diskursen und -Praktiken in der neueren Geschichte. Zudem wirft das Seminar ein Schlaglicht auf aktuelle Prepping- und Preparedness-Praktiken in unterschiedlichsten Kontexten, seien es Katastrophenschutzübungen der Zivilschutzbehörden, Demonstrationstrainings der Polizei oder Kriegstaktiken des Militärs. Die Aneignung von Preparedness-Logiken von aktivistischen Kreisen, etwa im Kontext des solidarischen Preppens, oder breiten Bevölkerungsschichten in Form eines Notvorrats oder Preppens steht ebenfalls im Fokus. Stets geht es dabei auch um die Frage, wie Preparedness spezifische Zukunftsbezüge etabliert, spezifische Machtverhältnisse konserviert, Gefahren privatisiert und bestimmte Personengruppen responsibilisiert.

Event Proseminar: Social-scientific study of religion\s
01PS55LB000 / Proseminar / 2,280

Description:

Business event contents:

Mit Religion wird derzeit weltweit Politik gemacht, werden Kriege begründet und Wahlen gewonnen. Yoga- und Meditationskurse sind gefüllt, Kirchen leer: Bestimmte Formen von Religion/Spiritualität scheinen ab-, andere zuzunehmen. "Säkularisierung", "Pluralismus", "Individualisierung" und "Fundamentalismus" sind einige Schlagworte, mit denen der Stellenwert von Religionen und Religiosität/Spiritualität in der Gegenwart beschrieben werden. Im Proseminar werden Beispiele diskutiert und durch die gemeinsame Lektüre und Diskussion sozial- und religionswissenschaftlicher Texte ein differenzierter Umgang mit diesen und weiteren Begriffen erarbeitet. Wir werden religiöse/spirituelle Orte und Gemeinschaften besuchen, uns Filmmaterial ansehen und einen ersten Einblick in die Relevanz von Religion/Spiritualität in verschiedenen Bereichen erhalten. Anhand konkreter Beispiele werden zudem einige der typischen Methoden (Interviews, teilnehmende Beobachtung) religions- und sozialwissenschaftlicher Gegenwartsforschung vorgestellt.

Event Von Populismus bis Well-being: Religion, Spiritualität und Medien in Zeiten gesellschaftlicher Brüche
06SE254p128a / Seminar / 5,345

Description:

Business event contents:

Ob Klimakrise, Populismus oder Einsamkeit - die Krisen unserer Zeit fordern nicht nur Gesellschaften insgesamt, sondern besonders auch junge Erwachsene heraus. Der andauernde technologische Wandel prägt dabei nicht nur unseren Alltag, sondern verändert auch grundlegend, wie Öffentlichkeit und Gemeinschaft strukturiert sind - in einem ständigen Wettbewerb um Aufmerksamkeit, Vertrauen und Legitimität.

In diesem Spannungsfeld treten Religion und Spiritualität auf unterschiedliche Weise in Erscheinung: sichtbar und laut in aktivistischen Haltungen, populistischen Bewegungen oder politischen Konflikten; subtiler in digitaler Sinnsuche, neuen spirituellen Praktiken oder alternativen Gemeinschaftsformen.

Im Seminar fragen wir deshalb, wie Religion und Spiritualität in Zeiten von Krisen in klassischen wie digitalen Öffentlichkeiten sichtbar werden - ob als Quelle von Polarisierung oder als Ressource für Resilienz und Gemeinschaft. Neben grundlegenden Theorien und aktuellen Studien arbeiten wir auch praktisch mit Übungen und kleinen empirischen Projekten im Feld.

Notes:

Lernziele:

Zentrale Krisenphänomene im Kontext von Öffentlichkeit, Medien und Religion einordnen
Analysieren, wie Religion in klassischen und digitalen Medien als Verstärker oder Ressource wirkt
Theorien zu Polarisierung, Pluralismus und Plattformgesellschaft anwenden
Empirisch untersuchen, wie religiöse Themen in der Medien- und Social-Media-Agenda vorkommen
Normative Perspektiven zu Freiheit, Vielfalt und sozialem Zusammenhalt reflektieren

Description:

Business event contents:

Die Studierenden erarbeiten sich mit Unterstützung der Dozierenden sowie selbstorganisiert in Gruppen ein religionswissenschaftlich relevantes Thema, das historische, sozialwissenschaftliche und systematisch-theoretische Aspekte aufweist und insofern der Konsolidierung einer breiten Fachidentität dienen kann. Sie planen und organisieren gemeinsam einen Studientag für andere Studierende der Religionswissenschaft, denen sie ihr Thema vorstellen und didaktisch sinnvoll (durch Vorträge, Gruppendiskussionen, Gastreferate, Museumsbesuche etc.) vermitteln. Insgesamt bietet das Repetitorium die Möglichkeit, neben fachlichen Grundkompetenzen auch Grundlagen des Projektmanagements, der Organisation und der Teamarbeit kennenzulernen und anzuwenden.

Notes:

Der Projekttag, obligatorischer Bestandteil des Repetitoriums, findet am 11.12.2026 von 9-16 Uhr statt.

Event Introduction to Operations Research (L+E)
03VU22BO0010 / Lecture with Practical Exercises / 1,451

Description:

Business event contents:

In business and technology settings, organizations often make decisions with limited resources, competing priorities, and complex constraints. This course introduces operations research as a practical toolkit for modeling, solving, and interpreting such decision problems. Students will learn to formulate optimization models and solve them using appropriate methods and software tools. Examples are drawn from areas such as supply chain management, logistics, scheduling, resource allocation, network design, and analytics-based decision-making. The course covers linear programming, including model formulation, the simplex method, duality, and sensitivity analysis, and introduces mixed-integer optimization, dynamic programming, and nonlinear programming. Excel Solver will be used for numerical examples, with optional Gurobi and Python materials provided for students interested in advanced computational tools.

Course Materials: Course materials will be published on OLAT.

Event Wittgensteins Tractatus
06SE160p506a / Seminar / 3,995

Description:

Business event contents:

Wittgensteins Logisch Philosophische Abhandlung (Tractatus Logico-Philosophicus) ist einer der einflussreichsten philosophischen Texte des 20ten Jahrhunderts. Der junge Wittgenstein gibt im Vorwort dieser Abhandlung vollmundig zu verstehen, dass er die Probleme, die er im Buch bespricht "im Wesentlichen gelöst" habe. Um was für Probleme geht es ihm? Um Probleme der Ontologie (Was gibt es und wie hängt es miteinander zusammen?), um Probleme der Sprachphilosophie (Wie hängen Sprache und Wirklichkeit miteinander zusammen? Was sind die Grenzen des Sagbaren?), um Probleme der Erkenntnistheorie (Was können wir wissen und was nicht?), um Probleme der Philosophie der Logik (Was ist Logik? Was sagt uns die Logik über die Welt?) aber auch um Probleme der Subjektivität, der Religion und des Mystischen. Um diese Probleme zu seiner Befriedigung zu lösen, benötigt Wittgenstein lediglich etwas mehr als 70 Seiten, an deren Ende er uns mitteilt, dass die Sätze seiner Abhandlung eigentlich unsinnig sind. Und obwohl Wittgenstein uns im Vorwort der Abhandlung mitteilt, dass ihm an einer vergnüglichen Lektüre für verständige Leser gelegen sei, lassen diese Stichpunkte schon erahnen, dass es in jedem Fall keine einfache Lektüre sein wird.

Im Seminar werden wir uns den Text Schritt für Schritt erschliessen. Wir werden dabei versuchen, uns nicht in den Bann der Wittgensteinschen Prosa reissen zu lassen, um den sachlichen Gehalt des Textes prüfen zu können.

Event Scientific Theories, Observation, and Reality
06SE164p501a / Seminar / 4,076

Description:

Business event contents:

Science makes claims about observable features of the world that can be tested by observation and experiment, but it also seems to make claims about entities, processes, and structures that are not directly observable. This raises important questions. Is there a principled way to distinguish between the observable and the unobservable? More importantly, if observation and experiment are the evidential basis for science, what-if anything-can justify belief in theoretical claims that cannot be directly tested in experience? Scientific realism holds that such claims aim at truth and that we are sometimes warranted in believing them; anti-realism holds that accepting a theory does not require belief in its truth beyond what can be observed and measured.

How we approach these issues is shaped by how we conceive of scientific theories. On one account, theories are bodies of statements; on another, they are families of models; a further account treats theories as inseparable from their use in inquiry, including idealisations, measurement practices, and experimental techniques. These contrasting pictures affect how the observational/theoretical divide is framed, how evidence is taken to support theory, and what a realist stance could amount to.

By engaging with classic and contemporary texts, we will explore how these issues connect and how scientific theories relate to the world. No scientific knowledge is assumed.

Event Ethik der Künstlichen Intelligenz
06SE160p009a / Seminar / 3,979

Description:

Business event contents:

Der Kurs untersucht ethische Herausforderungen im Kontext von KI. Wir werden u.a. folgende Fragen diskutieren: Gibt es Entscheidungen, die Künstliche Intelligenz (KI) prinzipiell niemals treffen soll? Weshalb soll aktuelle KI (basierend auf einem «Deep Learning Netz») niemals ein AKW steuern oder ein Flugzeug fliegen? Unter welchen Voraussetzungen ist es gerechtfertigt, KI den Status eines moralischen Subjekts zuzuschreiben, und ist eine solche Zuschreibung überhaupt jemals angebracht? Welche Kriterien muss KI erfüllen, damit wir verpflichtet sind, ihr Wohlergehen moralisch zu berücksichtigen? Sollten wir gegenüber Chatbots emotionale Bindungen entwickeln? Dürfen wir digitale Abbilder von uns selbst erschaffen? Ist KI eine Gefahr oder eine Chance, Arbeit sinnvoller zu gestalten? Welche Auswirkungen hat KI auf das Vertrauen in die Medizin und in andere gesellschaftlich zentrale Bereiche?

Event Literaturgeschichte der skandinavischen Moderne
06SE360-201a / Seminar / 1,706

Description:

Business event contents:

Das Seminar soll einen ersten Einstieg in die Literatur- und Kulturgeschichte der skandinavischen Moderne bieten. Dabei werden bewusst Themenschwerpunkte gesetzt, welche es erlauben, die Entwicklung der skandinavischen Literaturen von der Frühen Neuzeit bis zur Gegenwart exemplarisch nachzuverfolgen. Die Themen wurden so gewählt, dass sie einen Einblick in kulturelle Besonderheiten Skandinaviens bieten. Im Seminar werden wir uns dabei vor allem auf die Geschichte der skandinavischen Dramatik (u.a. Henrik Ibsen, August Stringberg und Jon Fosse) konzentrieren, die in der globalen Rezeption der skandinavischen Literatur eine entscheidende Rolle spielt.

Event Zeit lesen

06SE360-207a / Seminar / 3,081

Description:

Business event contents:

Mit ihrer auf sieben Bände geplanten Roman-Serie "Om udregning af rumfang" hat die dänische Autorin Solvej Balle internationale Aufmerksamkeit erregt und eine ganze Reihe von wichtigen Literaturpreisen gewonnen. In diesem Text greift Balle auf die schon in dem bekannten Film Groundhog Day (1993) realisierte Idee zurück, dass die Hauptfigur wieder und wieder am gleichen Tag aufwacht, also in einer fortlaufenden Wiederholungsschleife gefangen ist. Balle nutzt diesen Stoff, um ausführlich über die merkwürdigen Phänomene der Zeit und der Zeitwahrnehmung nachzudenken. Im Seminar werden wir diesen Roman zum Ausgang nehmen, um über die Problematisierung von Zeit in der Gegenwartsliteratur nachzudenken. Dabei sollen nicht abstrakte Theorien, sondern die Auseinandersetzung mit einzelnen Texten und ihrem jeweils spezifischen Zeitverständnis im Vordergrund stehen.

Course Materials: Eine Liste mit Texten zur relevanten Primär- und Sekundärliteratur wird zu Beginn des Seminars zur Verfügung gestellt.

U.a. folgende Texte werden behandelt:

Solvej Balle: Über die Berechnung des Rauminhalts

Tomas Espedal: Wider die Kunst

Aris Fioretos: Halbe Sonne

Hanna Ørstavik: Die Zeit, die es dauert

Event Glaciological Excursion to Rhonegletscher
07VLGEO704.1 / Field Trip / 1,241

Description:

Business event contents:

This module gives a hands-on introduction into current topics of glacier and high mountain research. It is split in three parts: a preparatory session, a field excursion to Rhonegletscher, and project work. The field excursion provides the opportunity to take a closer look at processes on, within, under and in vicinity of the glacier. These processes include micro-structure of ice, ice deformation, glacier hydrology, glacier mass balance, long-term glacier changes and periglacial processes such as moraine formation/erosion, and proglacial lake and fluvial systems.

Event Praktische Rhetorik
06SE360p134a / Seminar / 5,372

Description:

Business event contents:

Vortrags- und Gesprächskompetenz sind die wichtigsten soft skills, die man in unserem Studium erlernt. Sie sind unentbehrlich für verschiedene Leistungsnachweise (Referat, mündliche Prüfung) und zugleich Schlüsselqualifikationen der meisten späteren Berufe. Die verschiedenen thematischen Seminare bieten dazu Hilfestellungen an. Dennoch setzen sie kommunikative Kompetenzen mehr voraus, als sie systematisch zu schulen. In unserem Seminar wollen wir uns darauf konzentrieren: Wir werden Schritt für Schritt die unterschiedlichen Dimensionen des Sprechens beleuchten und die kennengelernten rhetorischen Strategien selbst ausprobieren.

Eine Besonderheit des Seminars ist, dass wir uns gleichermassen mit den verbalen wie den nonverbalen Aspekten des Sprechens auseinandersetzen. Wir widmen uns u.a. den Fragen: Wie wecke ich zu Beginn Interesse, wie erreiche ich meine Redeziele oder wie schreibe ich fürs Sprechen? Aber genauso den Fragen: Wie spreche ich verständlich, welche Signale senden Mimik und Gestik oder welche Medien unterstützen meine Ausführungen am besten? Um eine möglichst breite Palette rhetorischer Strategien kennenzulernen, werden wir politische Reden genauso wie BookTok-Videos, Dramenmonologe oder Wissenschaftspodcasts analysieren. Das Seminar bietet zudem Raum, eigene Projekte rhetorisch weiterzuentwickeln - Sie können Referate proben, Prüfungen simulieren oder die Kernideen von schriftlichen Arbeiten präsentieren und so ihre Überzeugungskraft testen.

Event Tugenden und Laster (Mediävistische Ringvorlesung)
06VL620p001a / Course / 5,432

Description:

Business event contents:

Tugenden und Laster üben bis heute eine grosse Faszination aus: um Gerechtigkeit oder Mut, Stolz oder Habgier drehen sich noch immer Vorstellungen des (Un-)Sittlichen, des individuell oder gemeinschaftlich Guten oder Schlechten. In der Vormoderne sind Tugenden- und Lasterkonzeption unverzichtbar für die Entwicklung der Auffassungen von Charaktereigenschaften und moralischem Verhalten. Als Personifikationen mit geschlechtlich markierten Attributen dargestellt und erzählt oder durch positive (oder negativen) Vorbilder verkörpert, als Gegeneinander Kämpfende oder als tierische Wesen imaginiert, als Wurzel, Äste und Blätter diagrammatisch oder als Bäume in Gärten repräsentiert, in Traktaten als Haltungen des Geistes und des Körpers definiert und geordnet, nehmen Tugenden und Laster einen zentralen Platz im Wortschatz und der Imagination vormoderner Menschen ein. Die Beitragenden nähern sich dem Thema aus vielfältigen Perspektiven, von der Literaturwissenschaft und Kunstgeschichte bis zur historischen Anthropologie und Geschlechtergeschichte, und erkunden dabei eine weite Zeitspanne und verschiedene Regionen der Welt.

Event Conflict and Protest in the Digital Age

06SE615-003c / Seminar / 3,185

Description:

Business event contents:

What drives peaceful movements to escalate into violent conflicts? How do technological advancements shape state control and the possibilities to organize protests? This seminar examines violent and non-violent political contention through the lens of empirical, quantitative political science. The course moves across a range of contexts, including state violence in Syria, censorship and propaganda in China, protest mobilization during the Arab Spring, and rebel recruitment and communication.

Understanding and applying research methods is a central element of the course. Students develop the skills to read quantitative research critically, assess research designs, and evaluate how measurement choices shape findings. The course culminates in a replication assignment in which students reproduce and critically evaluate a published quantitative study using R.

Course Materials:

The seminar is based upon weekly discussions of academic papers, primarily drawing from empirical, quantitative political science. The reading list includes works in the subfields of peace and conflict/civil war, civil resistance/social movements, and digital technology. A full list of papers will be provided in the detailed course syllabus and on OLAT.

Students of all initial coding skill levels will be able to succeed in the class, as we will have several practical sessions later in the semester where we will be coding in R.

Event Philosophy in Poetry and Poetry in Philosophy in Early and Medieval China
06SE280p516a / Seminar / 3,935

Description:

Business event contents:

Already the "argumentative prose" of the Warring States period is interspersed with countless poetic passages. These subtly convey philosophical content by cloaking it in images and allegories, making it easier to remember and perform in ritual contexts. Beginning with several bronze inscriptions from the Eastern Zhou period, the course will initially focus primarily on poetic passages from the so-called "masters' texts" (zishu) of all philosophical "schools," examining their formal structures (rhyme schemes, rhetorical figures and tropes, forms of embedding in prose text etc.), their presumed audience and functions, as well as their references to pre-imperial society. Apart from gnomic texts, specimens that convey historiographic, divinatory or wisdom contents will also be considered. In the post-imperial period, examples from Daoist and Buddhist literature will be focused and the aesthetic dimensions of religious speech in verse examined.

Notes:

The seminar will be taught in English, unless ALL participants prefer German.

Active preparation of circulated reading materials expected. Discussion lead during one of the sessions per semester. Syllabi dates serve as rough indicators of the course program and associated contents, which can be altered at any time as the course proceeds. If you have to miss a class, please find out with the help of your fellow students what you need to catch up on.

Event Die historische Darstellung von Samurai in der japanischen Filmkunst, Literatur und Popkultur
06SE290-023a / Seminar / 629

Description:

Business event contents:

In diesem Proseminar widmen wir uns der Darstellung von Samurai in der Filmkunst, der Literatur und der Popkultur Japans. Wir erarbeiten den jeweiligen dazugehörigen geschichtlichen Kontext und analysieren, inwieweit diese Darstellung den historischen Tatsachen entspricht. Untersuchungsgegenstände sind unter anderem die historischen Romane Shiba Ryōtarōs, die Samuraifilme von Kurosawa Akira, sogenannte "Taiga Dorama" des Fernsehsenders NHK, die auf James Clavells Roman basierende Serie "Shōgun" und der Manga "Rurouni Kenshin".

Anhand dieser inhaltlichen Thematiken werden wir uns grundlegende Kenntnisse für das wissenschaftliche Recherchieren, Präsentieren und Schreiben in der geisteswissenschaftlichen Japanologie aneignen.

Notes:

Die Diskussion der Themen ist ein wesentlicher Bestandteil des Proseminars, weswegen eine regelmässige und aktive Teilnahme erwartet wird.

Event Japan neu gestalten: Der «Geheime politische Plan» (Keisei hisaku) von Honda Toshiaki (1742-1820)
06UE290-600a / Exercise Group / 1,507

Description:

Business event contents:

1798 verfasste der Gelehrte Honda Toshiaki ein kurzes, aber explosives Traktat zur politischen und wirtschaftlichen Umgestaltung Japans. Das Land befand sich einer Dauerkrise, weil seine politische Verfassung und die ökonomischen Realitäten auseinanderklafften. Toshiaki plädierte für eine Ausweitung des Aussenhandels, den massiven Einsatz von Sprengstoffen zur Verbesserung der Infrastruktur sowie die Kolonisierung der nördlichen «zugehörigen» Inseln, bis hin nach Sachalin. Der Text bietet eine spannende Grundlage, um sich in Edo-Zeitliche, konfuzianisch inspirierte und zugleich innovative politische und ökonomische Theorie einzuarbeiten.

Event Focus course Speech: Crosslinguistic Corpus Phonetics
06VU523p009a / Lecture with Practical Exercises / 5,471

Description:

Business event contents:

In this course, we will explore patterns of variation and systematicity in speech sounds across the world's languages. The course combines theoretical discussion with hands-on analysis. We will introduce key concepts in phonetics and phonology, including how phonological contrasts are identified (e.g., through minimal pairs) and how they are realized acoustically. Students will also learn to recognize and analyze important acoustic cues to speech sounds using Praat. In parallel, we will discuss major questions about phonetic and phonological universals, including different types of universals and possible biological and cognitive explanations for crosslinguistic patterns. On the applied side, students will gain experience working with large speech datasets and will learn basic techniques for investigating phonetic patterns across languages. By the end of the course, students will have both a conceptual understanding of phonetic universals and practical skills for analyzing speech data.

Notes:

Students will be able to:

1. Analyze phonetic and phonological patterns, including identifying contrasts and their acoustic correlates using tools such as Praat.
2. Explain and evaluate phonetic universals based on crosslinguistic data and theoretical concepts.
3. Process and analyze speech data using computational methods, including basic scripting and forced alignment.

Event Development, Democracy, and the Environment in Post-Colonial Contexts
06SE615-009b / Seminar / 3,722

Description:

Business event contents:

This seminar examines how post-colonial democracies navigate the often-conflicting imperatives of economic development, social justice, and environmental protection. The course analyses the political, institutional, and social dynamics that shape environmental governance in rapidly transforming societies. India serves as a central reference case for exploring environmentalism, protest movements, regulatory regimes, and state-society relations. Comparative sessions introduce additional country contexts to illuminate variation in political trajectories, resource conflicts, and developmental models.

Through interdisciplinary scholarship and applied case studies, students evaluate how democratic institutions, colonial legacies, social stratification, indigenous claims, and global economic pressures influence environmental decision-making. The seminar emphasises critical engagement, policy analysis, and historical contextualisation. Students will also assess contemporary debates, from large development and industrialisation to climate adaptation and urban environmental inequalities. The aim is to equip students with analytical tools to assess how diverse democracies negotiate the tensions between growth, equity, and ecological limits.tbd

Event TikTok Politics: Navigating Information, Influence, and Online Harm
06SE615p006a / Seminar / 3,735

Description:

Business event contents:

Social media platforms like TikTok, Instagram, and YouTube have fundamentally transformed how citizens encounter news, engage with political actors, and participate in public life. This course examines the shift toward algorithm-driven, short-form content and what this means for the accuracy and depth of political information, the spread of misinformation, and exposure to harmful online environments. Alongside these risks, we explore the rise of new political influencers, the dynamics of comment sections, and the effects of social media consumption on political knowledge and participation. Students will engage with cutting-edge empirical research and learn about the analytical tools to study digital political behaviour systematically.

Notes:

Students are expected to prepare a final (empirical) research project in which they audit their own social media feed (or comparable online environment) over several weeks, code the content against core course concepts related to user experience, information quality etc. and summarize their findings in an analytical report.

Course Materials: The course materials and readings for each week will be provided through the course syllabus on OLAT.

Event Islam as Social Critique: Positions and Debates
06SE307-500a / Seminar / 3,772

Description:

Business event contents:

While the political visions of modern and contemporary Islamic movements have received considerable attention in Western scholarship and public discourse, their contributions to social critique remain comparatively understudied. This seminar seeks to address this gap by examining Islamic discourses as integral components of broader social and cultural debates in the Arab region. It asks: To which pressing questions of their time do Islamic positions respond? What intellectual and practical projects do they articulate? And how can their analysis enhance our understanding of the complexity of Muslim societies and the reception of normative traditions?

Event Dark/Dissonant/Difficult Heritage and the History of Muslim Cultures and Societies
06SE307p716a / Seminar / 599

Description:

Business event contents:

This course will be an introduction to the concepts of "dark", "dissonant" and "difficult" heritage. We will explore the theoretical basis of the terms, reflecting on how we can talk about places that are connected to painful histories and memories. During the second half of the semester, we will discuss specific case studies that connect the conceptual underpinnings with the history of Muslim Cultures and Societies. A one-day (compulsory) excursion to a place of difficult heritage will round up the course experience.

Event Preparation for the Research Seminar: Electoral Institutions in Europe and the World
06SE615-501c / Seminar / 3,730

Description:

Business event contents:

Elections shape the world we live in. The way we vote influences who gets elected, how politicians behave, and the policies governments pursue. But what makes an electoral system "fair" or "effective"? Does the perfect electoral system exist? Under what circumstances do electoral systems change? Are reforms related to democratic health? And what happens to politics and policies when these fundamental rules of the game change?

This course explores these questions by offering a deep dive into the literature on electoral institutions. Students will examine why different countries adopt different voting systems, how these systems evolve, and the real-world consequences of electoral system design-ranging from minority representation and economic inequality to foreign policy decisions.

The course is divided into three parts: The first, Understanding Electoral Systems, introduces key conceptual frameworks. The second, Why Systems Change, presents an overview of the competing theories of electoral system choice and reform and their ties to democratization. The final, Consequences of Electoral Design, provides a look at how electoral rules shape political behavior, minority representation, economic inequality, and foreign policy

Course Materials: This seminar does not use a textbook. Instead, we will read academic articles, and chapters from books, as well as newspaper articles and blog posts to cover the material.

Event Diaspora, Nation, and Belonging in South Asia
06SE330p269a / Seminar / 3,384

Description:

Business event contents:

This course examines the relationship between migration, nationhood, and belonging in South Asia and its global diasporas. It explores how historical and contemporary patterns of migration have and continue to be shaped by political and economic factors, and how migration in turn reshapes both political economies and societies in the region, with a focus on India, Sri Lanka, Bangladesh, and Pakistan. Drawing on theories of diaspora and transnationalism, the course also analyses how migrants and diasporic communities negotiate questions of citizenship, religion, class, and cultural belonging across national borders.

Event Geophysics in Archaeology
06VL683p003a / Course / 5,431

Description:

Business event contents:

The lecture offers a comprehensive introduction to the geophysical techniques commonly used to detect archaeological remains. The focus will be on the theoretical foundations of key methods, including magnetometry, electrical resistivity, magnetic susceptibility, ground-penetrating radar, electromagnetic induction, and electrical resistivity tomography (ERT).

Students will gain an understanding of the potential and limitations of these methods in different environmental and archaeological contexts. The lecture will also introduce the general workflow of archaeological geophysics, including survey planning, selecting appropriate methods and equipment, basic principles of data processing, and interpreting geophysical results. Examples from real archaeological case studies will be used throughout.

Notes:

The lecture will include demonstrations of data processing and visualisation of geophysical data.

Course Materials: All required readings will be made available online. Additional key literature can be accessed through the university library.

Event Writing back. Postkoloniale Literaturen
06SE504p002a / Seminar / 3,078

Description:

Business event contents:

Wie "antworten" AutorInnen aus ehemals kolonialisierten Regionen auf die kolonialen Geschichten und Mythologien, die sie einst geprägt haben? Dieses BA-Seminar befasst sich mit der dynamischen postkolonialen Literatur, die auf das kulturelle Erbe der europäischen Kolonialmächte reagiert, es umschreibt und hinterfragt. Anhand von Romanen, Theaterstücken, Gedichten, Essays und theoretischen Werken untersuchen wir, wie Autor:innen narrative Autorität zurückgewinnen, koloniale Darstellungen unterlaufen und neue Identitäten und Zukunftsvisionen entwerfen.

Wir werden Texte aus verschiedenen Regionen lesen - darunter Afrika, die Karibik, Lateinamerika und das indigene Australien -, wobei der Schwerpunkt auf englischsprachigen Texten liegt, ergänzt durch ausgewählte Werke, die ursprünglich auf Französisch und Spanisch verfasst wurden. Je nach den Sprachkenntnissen der eingeschriebenen Studierenden lesen wir einige Texte in ihrer Originalsprache oder in Übersetzung. Während des gesamten Semesters werden wir kanonische Werke (wie Jane Eyre oder The Tempest) mit postkolonialen Neufassungen kombinieren, die ihre kolonialen Grundlagen offenlegen. Wir werden uns auch mit wichtigen theoretischen Perspektiven von Denker:innen wie Edward Said, Gayatri Spivak und Homi Bhabha befassen, um zu verstehen, wie Literatur zu einem Ort des kulturellen Widerstands wird.

Am Ende des Seminars werden die Studierenden ein tieferes Verständnis dafür haben, wie Literatur zur Entkolonialisierung beiträgt, wie narrative Macht funktioniert und wie marginalisierte Stimmen das kulturelle Gedächtnis neu gestalten. Vorkenntnisse in postkolonialen Studien sind nicht erforderlich - nur Neugier, Offenheit und die Bereitschaft, Literatur über Kulturen und Sprachen hinweg zu erforschen.

Event Einführung in die Architektur: Terminologie, Typologie, Bautechnik
06SE640-005a / Seminar / 4,061

Description:

Business event contents:

Um kompetent über Architektur sprechen zu können, braucht es ein Vokabular und das Wissen um die Entwicklungsgeschichte einzelner Bautypen, Bauformen und Bauteile. Im Seminar soll dieses Vokabular vermittelt und eingeübt werden. In der ersten Semesterhälfte werden an Beispielen namentlich aus dem Bereich der mittelalterlichen (Sakral-)Architektur die verschiedenen graphischen Darstellungsformen vorgestellt, ferner historische Baumaterialien und Bautechniken gezeigt und ein Überblick über traditionelle Bautypen und ihre Varianz gegeben. Im zweiten Teil des Semesters werden die Studierenden das gelernte Vokabular am Beispiel eines ihnen zugewiesenen Monumentes in Form eines Referates anwenden. Die zweite Komponente des Leistungsnachweises besteht aus einer Klausur.

Notes:

Dies ist ein Bewerbungsmodul. Sie müssen sich in der Anfragefrist über das Buchungstool der UZH dafür bewerben. Geben Sie in der Bewerbung Ihre Fächerkombination und die Semesterzahl an und erläutern Sie in 2-3 Sätzen Ihre Motivation, weshalb Sie die entsprechende Veranstaltung absolvieren wollen. Die obligatorische Anmeldung/Buchung erfolgt durch die Dozierende.

Event Gold. Zur mittelalterlichen Karriere eines besonderen Kunst-Stoffs
06SE640-507a / Seminar / 5,402

Description:

Business event contents:

Gold hat Konjunktur. Jeder Pressetermin im Weissen Haus zeugt von einer eigentümlichen Indienstnahme des Edelmetalls für die Zurschaustellung von Macht. Diese ist keineswegs auf einzelne Akteure oder Orte begrenzt und in bestimmten Bereichen der Popkultur nicht weniger zuhause als in den Schaltzentralen der Politik. Im Seminar fragen wir nach den kulturellen Codes dieser Zurschaustellung von Gold und blicken dabei zurück auf jene Epoche, in der Gold den Spitzenplatz unter den Materialien künstlerischer Praxis einnahm. Auch in der kunsthistorischen Mittelalterforschung hat sich in den letzten Jahren eine umfassende Wiederentdeckung von Gold abgespielt. Die neue Aufmerksamkeit verdankt sich einem neuen Interesse an der Rolle von Materialien in der Kunstgeschichte. Neben der Inszenierung von Macht, Reichtum und Prestige diente Gold im Mittelalter auch einer Sichtbarmachung von Transzendenz. So konnte die sinnliche Qualität des Leuchtens und Glänzens, die für die Ästhetik der Verwendung von Gold ausschlaggebend war, ganz unterschiedlich gedeutet und bewertet werden. Bewunderung und Staunen mischten sich mit Luxuskritik. Wie kaum ein anderes Material war Gold in globale Kreisläufe der Gewinnung, Verarbeitung und Wiederverwendung eingebunden, die das mittelalterliche Europa mit Afrika und Asien verbanden. Wichtige Impulse für die jüngere Forschung kommen von Materialanalysen, die Aufschluss über Praktiken des Einschmelzens und Wiederverwertens von Gold, aber auch der Vortäuschung von Gold durch Ersatzstoffe geben. Im Seminar wollen wir uns unterschiedliche Bereiche der künstlerischen Handhabung von Gold im Mittelalter anschauen: Neben den Werken der Goldschmiedekunst werden wir dabei auch Arbeiten mit Goldschrift, Goldmalerei und Goldstickerei einbeziehen und sie mit Quellen zur Metallkunde, zur Wirtschaftsgeschichte, zum Münzwesen und zu künstlerischen Rezepten verknüpfen.

Event Feministische Ethik
06SE245p627a / Seminar / 3,931

Description:

Business event contents:

Das wissenschaftliche Feld der feministischen Ethik entsteht in den 1970er Jahren in den USA und in Europa als Kritik an traditionellen philosophischen Ethiken, die sich einseitig an androzentrischen Prinzipien orientieren und dabei die lebensweltlichen Erfahrungen von Frauen unberücksichtigt lassen. Der Versuch, gegen diese Theorietraditionen alternative Vorstellungen von Gerechtigkeit und gutem Leben zu entwickeln, führt innerhalb der feministischen Ethik zu Debatten, die sich um die Bedeutung von Gleichheit und Differenz, Universalismus und Relativismus, Autonomie und Fürsorge, nicht-essentialistische Geschlechterkonzeptionen und die Verschränkung verschiedener Unterdrückungssysteme drehen. Im Seminar werden wir uns anhand ausgewählter Texte mit diesen Grundfragen feministischer Ethik auseinandersetzen.

Event Naturwissenschaftsdidaktische Grundlagen 3: Lehren mit Alltagsvorstellungen
06SE090MAF1 / Seminar / 2,054

Description:

Business event contents:

Entlang des Modells der Didaktischen Rekonstruktion erheben und analysieren Sie typische Lernvoraussetzungen, setzen sich kritisch mit wissenschaftlichen Repräsentationen auseinander und entwickeln adaptive Lehr-Lernarrangements. Das Seminar ist am Konzept des Forschenden Lernens orientiert. Das heisst, Sie erwerben ein methodisches und theoretisches Instrumentarium, um die Vorstellungen von Lernenden in Vermittlungskontexten zu erheben und zu verstehen. Entlang der Durchführung einer gemeinsamen Forschungsarbeit werden die methodischen und theoretischen Ansätze in die Praxis übersetzt und erprobt. Über die Analyse individueller Denkpfade im Verlauf einer Intervention (z.B. einer Unterrichtsstunde) lernen Sie prozessorientiert Lernstände zu diagnostizieren.

Die Veranstaltung erfolgt im Master Fachdidaktik Naturwissenschaft mit der ETH und der PHZH.

Event Older Adults and Digital Media
06SE254p129a / Seminar / 5,512

Description:

Business event contents:

Older adults are an increasing portion of the world's population, but have historically lagged behind their younger counterparts in digital media use. This seminar engages with the most recent scholarly literature on the challenges and opportunities facing people aged 60 and over regarding their adoption and use of information and communication technologies. Topics include digital inequality, digital skills, social support, health and wellbeing, privacy, security, misinformation, and learning. In the Fall seminar we will review existing literature and students will develop a research plan for an empirical project, based either on interviews or surveys. In the Spring, students will carry out this project for their BA thesis.

02VL90WM102 / Course / 4,025

Description:

Business event contents:

DESCRIPTION

Why Corporations are so important, debated and sometimes controversial? At once drivers of innovation and lightning rods for criticism, corporations sit at the center of law, politics, and society.

This course examines the most topical and influential theories, cases, and developments in corporate law, focusing on the legal principles and judicial reasoning that shape corporate governance, mergers and acquisitions, shareholder rights, and fiduciary duties.

Through landmark cases, major corporate scandals, and significant reforms, the course explores how corporate law has evolved within the world's most influential legal frameworks. Particular attention will be given to Delaware's courts—especially the Court of Chancery—whose jurisprudence has shaped U.S. corporate practice and influenced governance standards worldwide. Students will also engage with pivotal decisions from the United Kingdom, Canada, Australia, Singapore, and leading continental European jurisdictions such as Germany, France, and Switzerland, evaluating their impact on global corporate regulation.

Combining a case-based approach with theoretical analysis, the course provides a robust understanding of corporate structures and governance. Comparative discussions will equip students to critically assess how corporate law responds to economic, political, technological, and environmental change—preparing them to navigate complex legal issues in an era of rapid global transformation.

COURSE STRUCTURE

The course will consist of lecture sessions that utilized the case law method and interactive discussion of key lecture topics derived from the readings and elaborated upon in class. The required readings and relevant documentation will be available to be downloaded from the course readings page on the course website (website link). Students should read the mandatory readings for each week's lecture and come to class ready to participate. The final lecture will include an examination review session that will cover relevant course themes and topics. The examination will be written and open book. Students will be encouraged to discuss course themes and materials in preparation for the examination.

Notes:

PODCAST

The lectures will be recorded and offered online as podcasts. Please note that due to technical difficulties not all classes may be recorded or there may be technical difficulties with the recordings. Students are encouraged to attend all lectures. If they miss lectures, they take the risk that technical problems or disturbances in the online recordings may make it difficult or impossible for them to access the lectures. The loss of access to the recordings is not sufficient cause for an appeal against the examination. Scripts or other materials declared as examination relevant take priority over the podcasts. In case of ambiguity contact the lecturer immediately. The recordings are for private use only. Redistribution in whatever form, in whole or in part, is not permitted without consent of the lecturer and may be punished by disciplinary measures or otherwise.

Description:

Business event contents:

Politik wirft viele spannende Fragen auf: Was macht eine Demokratie erfolgreich?

Warum gehen manche Menschen wählen und andere nicht? Und wie lässt sich politische Ungleichheit sichtbar machen?

In dieser Veranstaltung lernen Studierende, wie die Politikwissenschaft solche Fragen systematisch untersucht. Im Mittelpunkt steht, wie man politische Phänomene mit Daten erfassen, ordnen und analysieren kann und wie daraus nachvollziehbare wissenschaftliche Erkenntnisse entstehen. Anhand konkreter und aktuell relevanten Themen werden die Grundlagen des wissenschaftlichen Arbeitens, der Messung, der Datenerhebung und des Forschungsdesigns vermittelt. Das Gelernte wird im Semesterverlauf in kleineren schriftlichen Übungen eingeübt und vertieft.

Event Conservatism

06SE160p502a / Seminar / 3,976

Description:

Business event contents:

Michael Oakeshott described conservative thinking as a preference for the familiar, the tried and tested, the limited, the close at hand, the sufficient, the pleasant, and the existing, which can be found to a certain degree in every human being. However, he considered the idea that conservative thinking should occupy a central place in practical politics for normative reasons to be questionable-but justifiable under certain conditions. In this seminar, we will explore and critically discuss this idea and supporting arguments based on texts mainly from contemporary political philosophical discourse. Topics will include the situational or context-dependent nature of conservative thinking (Oakeshott, Huntington); the anti-rationalist and skeptical foundations of conservative theory formation (e.g., Oakeshott, Hayek); attempts to conceptualize a specifically conservative type of values (e.g., Cohen, Matthes), as well as precautionary principles and other systematic reservations against innovation efforts (e.g., O'Hara, Brennan & Hamlin).

Event Optical and Vibrational Spectroscopy
07VUCHE728.1 / Lecture with Practical Exercises / 5,579

Description:

Business event contents:

This course introduces the fundamental principles and applications of vibrational and optical spectroscopies. Building from the basics of light-matter interaction, students will learn both theoretical foundations and experimental methods, covering Raman, infrared, photoluminescence (PL), time-resolved PL, transient absorption, terahertz (THz) spectroscopy, and cathodoluminescence (CL) spectroscopy. The course combines lectures with demonstration sessions and practical examples, showing how these techniques are applied to solve challenges in materials science, health and life sciences, energy, and the environment.

Event Advanced Methods in Earth Observation - assessing spatial and temporal dynamics: Lecture
07VLGEO443.1 / Course / 5,500

Description:

Business event contents:

The lectures deal with detailed and advanced concepts to identify the right remote sensing data and methods to analyze atmospheric and earth surface properties by exploiting the different dimensions of satellite-based remote sensing data. Students will learn about:

- i) the planning of remote sensing projects,
- ii) advanced methods to assess spatial, spectral, and temporal information embedded in remote sensing data
- iii) about strategies to quantify causality between surface dynamics and environmental drivers.

Students will apply the learned theoretical knowledge in specifically designed labs in GEO443.2.

Course Materials: Lecture slides are provided on OLAT. Students are encouraged to bring along electronic devices (laptop, tablet, smart phones) to make notes and comments on these slides during the lecture.

Event KG Seminar: Christliche Kultbilder im frühneuzeitlichen Zeitalter der Globalisierung
01SE22SS051 / Seminar / 1,544

Description:

Business event contents:

Das zweite mosaische Gebot warnt unmissverständlich (Exodus 20,4): „Du sollst Dir kein Gottesbild machen und keine Darstellung von irgend etwas am Himmel droben, auf der Erde unten oder im Wasser unter der Erde.“

Dessen ungeachtet hat das Christentum, das sich auf den Paradigmenwechsel berief, den es in der Inkarnation, der Fleisch- und Bildwerdung Gottes, sah, eine überaus grosse Vielfalt an bildlichen Repräsentationen hervorgebracht. Im Kult um die acheiropoietia, die ‚nicht von Menschenhand‘ geschaffenen Bilder, sowie besonders privilegierter Darstellungen der Muttergottes oder der Heiligen, die zu weinen und bluten fähig sind oder sich auf andere Weise zu äussern vermögen, lebt im Christentum eine Bilderverehrung fort, die vielfältige Wurzeln hat. Über die vergangenen Jahrhunderte hinweg blieb die Beziehung zum Bild jedoch stets von grossen Spannungen gekennzeichnet – ganz besonders dann, wenn es um die Bilder anderer Religionen ging.

Bekanntlich war die Etablierung der iberischen See- und Weltreiche in der Frühen Neuzeit unauflöslich mit der Ausbreitung des christlichen Glaubens verflochten. In Europa wurden die nichtchristlichen Bevölkerungen, denen die europäischen imperialen Mächte begegneten, oft pauschal als „Götzendienen“ wahrgenommen. Die „Zerstörung der Götzen“ fungierte bei der Auseinandersetzung mit Unbekanntem sowohl als Diskurs als auch als Bündel konkreter Praktiken, die sich aggressiv gegen die angetroffenen Bevölkerungen richteten. Stets wurden diese Prozesse von der Etablierung christlicher Kultbilder begleitet – mitunter in überraschend unmittelbaren Akten der Substitution von zuvor Dagewesenem.

Dieses Seminar untersucht die Verehrung christlicher Kultbilder, die im Zeitalter der europäischen Expansion in neu christianisierten Gebieten entstand und beleuchtet die Spannungsverhältnisse, die mit ihrer Einführung einhergingen. Im Zentrum des Seminars steht die Analyse einer Auswahl christlicher Kultbilder, vornehmlich aus den Amerikas und aus Asien. Es werden sowohl weltweit bekannte Kultbilder – etwa die Jungfrau von Guadalupe in Mexiko, die Jungfrau von Copacabana im heutigen Bolivien oder der Santo Niño de Cebú auf den Philippinen – als auch weniger bekannte Bildtypen und Verehrungspraktiken behandelt, darunter die frühneuzeitliche Verehrung der Salus Populi Romani in China oder der sogenannten Maria Kannon in Japan.

Event Digital Democracy: How Digitalization Shapes Democracy in the 21st Century
06SE615p515a / Seminar / 3,723

Description:

Business event contents:

This seminar introduces students to research on the impact of digitalization on politics and will focus in particular on three substantive areas: changes in individual political behavior and means of political participation as a consequence of digitalization, the impact of these changes on political processes, and the implications this has for policy. The seminar will cover conceptual readings on these topics but also new methodological approaches that enable this kind of research and critically discuss their strengths and limitations.

Notes:

Students are expected to prepare an (empirical) research design together with a proof-of-concept implementation as the final assignment for the seminar. The topic can be freely chosen but has to fall within the substantive areas (broadly conceived) covered in the seminar.

Room: AFL-F-150

Course Materials:

The seminar is reading-based, i.e., 3-4 papers will be assigned to be read per session. Students are required to prepare three response papers throughout the term that analyze the readings of a given week in more detail. A full list of papers will be provided in the detailed course syllabus.

Event Kirche und Welt. Spaltungsprozesse im hochmittelalterlichen Europa
06SE600-515a / Seminar / 3,379

Description:

Business event contents:

Die Wahl Papst Alexanders III. im Jahr 1159 führte zu einem neuen, fundamentalen Konflikt zwischen dem Papsttum und dem römisch-deutschen Kaiser Friedrichs I. Barbarossa aus der Stauferdynastie, der erst 18 Jahre später im Frieden von Venedig 1177 beendet werden konnte. Nicht nur Deutschland, Italien und Burgund als Bestandteile des römisch-deutschen Reichs, sondern auch Frankreich, England, die Königreiche auf der Iberischen Halbinsel, das Königreich Sizilien sowie die nach dem ersten Kreuzzug entstandenen Kreuzfahrerherrschaften waren von diesem tiefgreifenden Spaltungsprozess betroffen.

Im Master-Seminar sollen die Ursachen, Entwicklungen und Auswirkungen anhand primärer Quellenzeugnisse untersucht und auf der Grundlage einschlägiger wissenschaftlicher Texte analysiert werden. Von den im Original lateinisch-sprachigen Texten liegen Übersetzungen vor.

Event Authority, Coercion, and Political Power
06SE160p503a / Seminar / 3,974

Description:

Business event contents:

The concept of authority may seem morally problematic or downright incompatible with autonomy. On the other hand, it is not clear on inspection what normative significance the exercise of authority might have for those who are subject to it. On the other hand, moral, political, and legal philosophers generally agree that the notion of authority is central to parenthood or our self-conception as members of a shared political community or legal order. In this course, we will try to work our way out of the ambivalence of authority by exploring how the concept relates to us individually and as members of a common body politic. We specifically analyze the relation between the concepts of theoretical and practical authority and the relation between authority, coercion, and power.

Event Statistik und Wahrscheinlichkeit
06SE160p007a / Seminar / 3,990

Description:

Business event contents:

Statistische Daten begegnen uns in Wissenschaft und Alltag ständig. Häufig scheinen sie unser einziger Zugang zu Ursache-Wirkungs-Zusammenhängen zu sein. In dieser Form dienen sie dann nicht nur dem wissenschaftlichen Erkenntnisgewinn sondern auch der Begründung weitreichender medizinischer oder politischer Entscheidungen. Doch bekanntlich sind statistische Daten fallibel und können leicht in die Irre führen. Insbesondere lässt sich der für die Statistik zentrale Begriff der Wahrscheinlichkeit in einer Reihe von verschiedenen Weisen interpretieren. Eine zentrale Frage in diesem Zusammenhang ist, ob Wahrscheinlichkeiten etwas sind, das objektiv in der Welt vorhanden ist, oder ob Sie lediglich unser Unwissen über die tatsächlichen Zusammenhänge widerspiegeln (oder vielleicht beides). Eine weitere zentrale Frage ist, inwiefern es möglich ist, durch statistische Daten auf Zusammenhänge zu schliessen, die über blossе Korrelation hinausgehen.

Im Seminar werden wir uns mit diesen und einer Reihe weiterer philosophischer Probleme im Zusammenhang mit Statistik und Wahrscheinlichkeit befassen.

Das Seminar ersetzt weder Einführungskurse zu statistischen Methoden, noch setzt es Kenntnisse solcher Methoden voraus. Wir werden uns in den ersten vier Sitzungen des Kurses die grundlegenden begrifflichen Werkzeuge der Wahrscheinlichkeitstheorie weitestgehend informell zueigen machen. Personen, die bereits vertraut mit statistischen oder wahrscheinlichkeitstheoretischen Methoden sind, soll das Seminar helfen, den philosophischen Hintergrund dieser Werkzeuge besser zu verstehen.

Event Varieties of Understanding
06SE160p005a / Seminar / 3,993

Description:

Business event contents:

Modern epistemological theorizing has primarily been concerned with our ability to secure knowledge of reality as illustrated by the various attempts to offer an informative and systematic elucidation of this notion. One reason for this is that it has often been assumed that other epistemic achievements such as understanding are fundamentally a matter of knowing certain truths. However, recent developments in epistemology, philosophy of language and philosophy of science, cast doubt on that assumption and several philosophers have come to think of understanding - be it linguistic, empirical or moral - as a cognitive standing that needs to be addressed for its own sake, the question of its nature acquiring thereby a central place. This seminar will explore key philosophical questions pertaining to the nature of understanding with the aim to familiarise students with the main problems related to this issue. Particular attention will be given to distinctions that can be drawn between different types of understanding and to the way they might relate to one another.

Event Physical Chemistry I for the Life Sciences
07VLCHE154.1 / Course / 2,197

Description:

Business event contents:

The two-hour lecture covers the foundation of thermodynamics. It focuses on the equations of state of ideal gases, main laws of thermodynamics, work, heat, thermodynamic state variables and chemical potential. Building on these fundamentals, phase transformations and phase diagrams, mixtures, colligative properties and chemical reactions in equilibrium are discussed. Special attention is paid to topics of particular relevance to the life sciences, such as energy conversion in chemical reactions, interpretation and significance of free enthalpy and osmosis.

Event Thin Films Technology: From Fundamentals to Oxide Electronics
07VUKR1208.1 / Lecture with Practical Exercises / 2,892

Description:

Business event contents:

A lab visit visit will be organized and students will participate to the design of thin films with atomic precision.

General description of the leading deposition routes including physical and chemical vapor deposition techniques (PVD and CVD) as well as so called "wet techniques" (e.g. spin coating and spray pyrolysis).

Growth modes and processes.

Part of the course discusses vacuum technologies.

Fundamental characterization techniques for application-relevant thin films as well as state of the art approaches for in situ and ex-situ determination of the structural, chemical and ferroic (ferromagnetic and ferroelectric) properties of films: (XRD for thin films, RHEED, EDX, scanning probe microscopy techniques, laser-optical characterization and many more)

Epitaxy for the advanced design and characterization of high quality thin films for energy efficient oxide electronics.

Types of ferroic order, multiferroics, multifunctional oxide materials, epitaxial strain related effects, oxide thin film based devices and examples.

Regular discussions on preselected scientific literature and mini-seminars will be organized.

Event HB Vorlesung: "Behold, I have put my words in your mouth" - Prophets and Prophecy in the Hebrew Bible
01VL14SV035 / Course / 193

Description:

Business event contents:

In der Hebräischen Bibel nehmen Propheten und Prophetinnen eine wichtige Funktion ein. Sie sind Mittler zwischen Mensch und Gott, sie sind politische Akteure, und sie reflektieren die Vielfalt religiösen Denkens im antiken Israel. Das Korpus der prophetischen Literatur deckt historisch und in seiner literarischen Orientierung beinahe die gesamte Geschichte Israels ab. Im Wechselspiel mit anderen biblischen Genres erhellt es das Verhältnis von Gott, Volk, Land und Welt. Es deutet auf Fragen der Theologie des Alten Testaments, zeigt Identitätsverhandlungen und Selbstreflexionen des Volkes Israel an und äussert Kritik wie auch Hoffnung.

In dieser Veranstaltung sollen die historische und literarische Anlage biblischer Prophetie, deren geistesgeschichtlicher Ort und die bis heute fortdauernde theologische Bedeutung von Propheten und Prophetie näher in den Blick genommen werden. Dies geschieht sowohl anhand von vertieften Auseinandersetzungen mit ausgewählten wichtigen Passagen der Hebräischen Bibel, die Israels Propheten und Prophetinnen in repräsentativer Weise abbilden, als auch in vergleichenden und abstrahierenden Überlegungen über Prophetie und den Umgang mit prophetischer Literatur.

Notes:

Die Veranstaltung findet in deutscher Sprache statt. Primär- und Sekundärquellen werden auf Deutsch oder Englisch und - soweit erforderlich - in Originalsprache mit Übersetzung zur Verfügung gestellt.

Während der Reading Week vom 12.-16.10.2026 finden keine Lehrveranstaltungen an der TRF statt.

Course Materials:

Es wird darum gebeten, zu jeder Sitzung eine Bibel in deutscher Übersetzung mitzubringen, nach Möglichkeit in der Übersetzung der Zürcher Bibel, der Lutherbibel oder der Elberfelder Bibel. Auf Rückfrage kann eine Bibel zur Verfügung gestellt werden.

Event Ganz Oben: wie man über Vermögen, Eliten und Macht forscht
06SE600-516a / Seminar / 3,391

Description:

Business event contents:

Seit Beginn des 21. Jahrhunderts sind die Vermögenskonzentration, die Zusammensetzung der Eliten und die Ausübung von Macht nicht nur Gegenstand öffentlicher und politischer Debatten, sondern auch Forschungsgebiete, die sich in einem Umbruch befinden und stark von Interdisziplinarität geprägt sind (für ein Beispiel aus der Schweiz, dessen Bekanntheit jedoch weit über die Landesgrenzen hinausreicht, siehe die umfangreiche Webseite der «Observatoire suisse des élites OBELIS» and der Universität Lausanne). Im Rahmen dieses Seminars werden wir die verschiedenen qualitativen und quantitativen Methoden, theoretische Ansätze und Quellen diskutieren, die mit der Untersuchung dieser Fragestellungen verbunden sind, wobei wir insbesondere den Dialog und die Berührungspunkte zwischen den Geschichtswissenschaften und den Sozialwissenschaften (insbesondere Soziologie und Wirtschaftswissenschaften) in den Vordergrund stellen werden. Auf der Grundlage dieser ersten Literaturrecherche wird jede/r Seminarteilnehmer/in eine individuelle Arbeit zu einem bestimmten Bereich und Zeitraum (von der Antike bis zur Gegenwart) entwickeln. Diese verschiedenen methodologischen/historiografischen Untersuchungen können gegebenenfalls als Grundlage für die Ausarbeitung von quellenbasierten Forschungsarbeiten im Rahmen anderer Seminare oder für die Erstellung einer Masterarbeit dienen.

Notes:

Leistungsnachweis: Portfolio Lösung. Herbstsemester 2026: Vorbereitung von zwei vorläufigen Forschungsskizzen/Quellendossiers (25% der Gesamtnote).

Frühlingssemester 2027: Vorbereitung und Verfassen einer Seminararbeit, basierend auf Sekundärliteratur (75% der Gesamtnote, Abgabedatum: 5. Mai 2027).

Event Kellers Cash. Ökonomien des Erzählwerks
06SE360-112b / Seminar / 1,555

Description:

Business event contents:

Geld regiert die Welt - zumindest Gottfried Kellers Welten. Sparsamkeit, wirtschaftliche Umsicht und nachhaltige Vermögensmehrung bilden das Ideal, an dem Keller seine Figuren misst und sie lustvoll scheitern lässt. Zugleich verfährt auch das Erzählen ökonomisch: Es investiert in die Darstellung gewerblicher Fehlentscheide, körperliche Arbeit hingegen gerät aus dem Blick und wird in ferne Weltregionen verlagert, die vom Erzählen ausgespart bleiben. So entstehen epistemische Ordnungen von Sichtbarkeit und Unsichtbarkeit, in denen erzählte Ökonomie und Erzählökonomie ineinandergreifen. Das Seminar untersucht anhand ausgewählter kürzerer Erzähltexte und Roman auszugsweise dieses Zusammenspiel. Diskutiert wird der zentrale Themenkomplex mithilfe relevanter literaturtheoretischer Paradigmen (Fiktionstheorie, Affekttheorie, New Economic Criticism, Figurentheorie, Praxeologie und Postcolonial Studies).

Notes:

Grundlegende Kenntnisse in der Erzähltextanalyse werden vorausgesetzt. Zur vorbereitenden Lektüre in dieser Hinsicht ist empfohlen: Matías Martínez, Michael Scheffel: Einführung in die Erzähltheorie. 12. Aufl. München 2025.

Event Zeitkonzepte aus einer literarischen Perspektive
06VL360-207a / Course / 3,082

Description:

Business event contents:

Schon unsere Alltagserfahrung trägt dazu bei, die Vorstellung der Zeit als eines kontinuierlich fortschreitenden Strahls zu hinterfragen. Wir alle wissen, dass Zeit gedehnt werden kann oder wie im Nu verfliegt. Diese Alltagsbeobachtung wurden von Philosophen seit jeher verwendet, um andere Zeitmodelle zu entwickeln und paradox anmutende Zeitvorstellungen wie die Zirkularität, die Nachträglichkeit, die Plötzlichkeit oder die Vorstellung einer stillstehenden Zeit zu diskutieren. In der Vorlesung soll der Zeittheorie jedoch nicht aus der Perspektive der Philosophie nachgegangen werden. Vielmehr steht die Frage im Zentrum, ob und wie auch die Literatur dazu beiträgt, Zeit zu formen und somit unseren Blick auf das rätselhafte Phänomen der Zeit zu schärfen. Den Ausgang der entsprechenden Beobachtungen bilden erzähltheoretische Observationen. Offensichtlich besteht eine grosse Funktion des Erzählens darin, mit Zeit zu spielen und andere Zeitmodelle zu erproben.

Course Materials: Auszüge aus der relevanten Sekundärliteratur werden vor Beginn der Vorlesung auf OLAT zur Verfügung gestellt.

Event Aktuelle Position der Literaturtheorie (mit Anwendungsbeispielen)
06SE360-530a / Seminar / 228

Description:

Business event contents:

Literaturtheorie auf der einen Seite, Textanalyse auf der anderen gehören zum Handwerkszeug von Profi-Leser*innen. Die professionelle Beschäftigung mit Literatur setzt eine kritische Distanz zum Gegenstand voraus, dem wir eben gerade nicht unmittelbar begegnen und bei der wir nicht einzig und allein auf unseren Geschmack oder den gesunden Menschenverstand vertrauen. Die Vermittlung übernimmt die Literaturtheorie unter durchaus sehr unterschiedlichen Aspekten: historisch, kulturwissenschaftlich, politisch, ästhetisch oder ethisch. Der Umgang mit solchen Theorien muss gelernt und trainiert werden. Sie sind darüber hinaus nicht einfach auf literarische Texte anwendbar. Die Anwendung setzt vielmehr Schritte der Operationalisierung voraus, die Theorie mit literarischen Darstellungsverfahren verbinden. In dem Seminar wird diese Verbindung auf der Basis zentraler Literaturtheorien am Beispiel ausgewählter Neuerscheinungen erarbeitet.

Notes:

Behandelt werden folgende Begriffe in theoretischer Perspektivierung: Analyse, Kritik, Gegenwart, Autor*innenschaft, Medialität, Materialität, Affektivität, Identität, Klasse, Ethnie, Körper, Geschlecht, Posthumanität, Ökonomie u.a.

Event Essen, trinken – und Sprache
06SE360-546a / Seminar / 854

Description:

Business event contents:

1. Beim Genuss eines Glases Weins oder einer Tasse Kaffee können wir versuchen, unsere Sinneseindrücke in Sprache zu übersetzen. Das ist nicht immer einfach, ist aber notwendig, um sich darüber unterhalten zu können.
 2. Essen ist offenbar eine hochgradig soziale Angelegenheit: Besonders gern essen wir mit anderen Menschen zusammen und plaudern dabei über Gott und die Welt. Manchmal fühlt sich dieses gemeinsame Essen aber auch sehr anstrengend an und wir bemühen uns, ja nichts falsch dabei zu machen.
 3. Alleine aus der Beschreibung der Gerichte auf einer Speisekarte sind wir in der Lage, das Restaurant einzuordnen und die Kosten für den Besuch abzuschätzen.
 4. "High Protein", "vegane Ernährung" oder "from nose to tail" sind Ausdrücke, die für gesellschaftliche Diskurse und Positionen stehen, die uns sympathisch oder unsympathisch erscheinen.
- Diese vier Aspekte zeigen die vielen Perspektiven auf den Zusammenhang von Sprache, Essen und Trinken. Im Seminar werden diese empirisch angegangen, aber auch theoretisch reflektiert, um etwas über grundlegenden Funktionen von Sprache zu erfahren: Um Nichtsprachliches kommunizierbar zu machen, Rituale zu strukturieren, Bewertungen zu ermöglichen oder Themen zu verhandeln.

Experiments are conducted on a total of 8 afternoons per semester and treat, for example, absorption spectroscopy, fluorescence quenching, NMR spectroscopy, calorimetry, viscosity, dipole moment measurement. The evaluation and statistical treatment of the measured data and the writing of laboratory reports is an important part of this lab course. For this purpose, demonstration hours are regularly offered.

Notes:

Usually one laboratory afternoon per week. At least one more day should be scheduled for evaluation and report. Prerequisite for the booking of CHE 211 is the successful completion of CHE 112; in case you completed CHE 173 (and need CHE 211 for the teaching diploma with 2nd subject chemistry), please contact the responsible lecturer

Event Surface and Interface Science

07VUCHE437.1 / Lecture with Practical Exercises / 2,833

Description:

Business event contents:

Surface and interface science plays a pivotal role in modern research, especially in nanoscience, where the properties of nanostructures are predominantly governed by their surfaces. This field underpins critical advancements in microelectronics, catalysis, corrosion science, and beyond. The term "surface science" refers to the field dedicated to comprehending surface nature. Contemporary surface and interface physics is closely intertwined with other research areas. It has evolved with contributions from other branches of physics and chemistry, and it delivers results

in key application fields, as well as in the advancement of experimental techniques and equipment. This lecture series explores the physics and chemistry of surfaces and interfaces, emphasizing their fundamental importance in understanding a wide range of phenomena.

Topics include the physical and electronic structures of surfaces, moleculesurface interactions, and the impact of these processes on various applications. Key techniques, such as electron diffraction, angle-resolved photoemission spectroscopy, scanning probe microscopy, and X-ray photoemission and absorption spectroscopy, will be discussed in depth. Their evolution to study surfaces and interfaces, including in "wet" conditions, highlights the interdisciplinary nature of this field, drawing from condensed matter physics, chemistry, and materials science. The course begins with an introduction to clean, well-defined surfaces, made accessible through advancements in ultra-high vacuum (UHV) technology. Students will explore surface-sensitive spectroscopic methods, the development of cutting-edge experimental tools, and adsorption processes, with a focus on their chemical and physical implications.

Real-world applications in semiconductor electronics, heterogeneous catalysis, nanotechnology, and electrochemistry will be examined, showcasing the transformative impact of surface science on these fields. As a practical component, students will have the opportunity to visit experimental laboratories where surface science technologies

are actively applied. The visit, organized at institutions such as EMPA, PSI, or UZH, provides hands-on exposure to cutting-edge research environments.

Event Der Syrienkonflikt: Konfliktanalyse
06SE615-003a / Seminar / 3,186

Description:

Business event contents:

Ziel des Seminars ist eine Vertiefung und Anwendung bereits erworbener Kenntnisse der Theorien der IB durch eine Analyse des Syrien-Konflikts aus unterschiedlichen theoretischen Perspektiven. Ausgewählte Theorien (z.B. neorealistische, neue liberale, neoinstitutionalistische, postmoderne und geopolitische) werden für theoriegeleitete wissenschaftlicher Konfliktanalysen angewandt. Aus Vergleich und Diskussion der unterschiedlichen Konfliktperspektiven werden Schlussfolgerungen abgeleitet: Zum einen in theoretischer Hinsicht (Vergleichen unterschiedlicher theoretischer Perspektiven hinsichtlich ihrer Grundannahmen über Akteure und Strukturen und ihrer Erklärungsmodelle internationaler Politik) sowie zum anderen hinsichtlich ihrer praktisch-politischen Handlungsimplikationen.

Course Materials: Bonacker, Thorsten 2008 (Hrsg.): Sozialwissenschaftliche Konflikttheorien. Eine Einführung. Wiesbaden: VS-Verlag. Event Research Colloquium: Labour Geography
07UEGEO511.9 / Colloquium / 3,456

Description:

Business event contents:

The Research Colloquium Labour Geography is aimed at Master's and PhD students who are writing their theses in the field of labour geography. It offers space for orientation in the subject and discussion of ideas, while also serving as a supportive framework for the development of one's own research concept.

In presentations, members of the working group and external researchers offer insights into their current research projects and scientific working methods. Other events include the joint reading and discussion of key texts in labour geography.

Notes:

The programme will be made available on the website of the research group «Labour Geography» before the start of the semester.

The courses take place in room Y25-K-22.

The Sustainable Development Goals (SDGs) (<https://sdgs.un.org/goals>) are a collection of 17 global goals interacting with each other, which are designed to be the blueprint to achieve a better and more sustainable future for all. The 2030 Agenda for SDGs is adopted by all United Nations Member States.

These SDGs are covered in this module: 5; 8 & 10

Event Die unauflösliche Ehe als mittelalterliches Gesellschafts- und Erlösungsprojekt
06SE600-514b / Seminar / 3,604

Description:

Business event contents:

Für viele Denker des Mittelalters waren Eheverbindungen die zentralen Bindeglieder, die den Zusammenhalt der Gesellschaft sicherten. Ab dem 11. Jahrhundert erhob die katholische Kirche die Ehe ausserdem zu einem Sakrament und verfocht zugleich ihre Unauflöslichkeit und die Lehre über das «debitum carnis» (Schuldigkeit des Fleisches) immer rigider. Die einheitliche Durchsetzung der damit verbundenen Gesetze in ganz Westeuropa wurde zu einer der wichtigsten Aufgaben der kirchlichen Gerichtsbarkeit.

Wir befassen uns mit Theorien und Praktiken eines gesellschaftspolitischen Projekts, das die Regulierung von Sexualität und Liebe als zentrales Instrument der Sicherung von Frieden und gesellschaftlicher Ordnung behandelte: Was bedeutete dies für die betroffenen Frauen und Männer? Welche Alternativen gab es zum Leben in der Ehe? Wie nutzten kirchliche Institutionen ihre Hoheit über die Ehe, um die Reichen und Mächtigen in Schranken zu weisen?

Event Arbeit im Mittelalter
06SE600-011a / Seminar / 3,590

Description:

Business event contents:

Neue Ansätze zur Geschichte der Arbeit im Mittelalter orientieren sich an Gegenwartsdebatten. Sie fragen, wie mittelalterliche Gesellschaften das Problem der Carearbeit lösten, ob sich Arbeit am Ende des Mittelalters aus Beziehungskontexten (des Hauses, der Herrschaft, des Dienstes) herauslöste, wieso sich Lohnarbeit und ein neues Arbeitsethos und Polemiken gegen selbstverschuldete Armut durchsetzen und warum sich die Sklaverei in den letzten Jahrhunderten des Mittelalters in Europa wieder stark ausbreitete. Wir versuchen innerhalb dieser Fragestellungen eigene kleine Forschungsprojekte zu entwickeln und diese an Quellenbeispielen umzusetzen.

Event Selbstorganisation Jugendlicher im Spannungsfeld von Marginalisierung und Teilhabe
06SE226p530a / Seminar / 2,685

Description:

Business event contents:

Abgesehen von Jugend als Lebenslage und Lebensphase kann «Jugend» auch als machtvolleres Konzept begriffen werden, durch das Jugendlichen in Abgrenzung zur Erwachsenenwelt eine tendenziell marginalisierte Position zugewiesen wird. Ebenfalls wird in der wissenschaftlichen Literatur immer wieder darauf hingewiesen, dass im Jugendalter Sozialisations- und Bildungsprozesse in Peergruppen sowie Erfahrungen von Zugehörigkeit, Anerkennung, Teilhabe und Autonomie bedeutsam sind. Vor dem Hintergrund von Marginalisierungstendenzen einerseits und Teilhabeansprüche Jugendlicher andererseits nehmen wir im Rahmen des Moduls das Phänomen der Selbstorganisation Jugendlicher in den Blick. Dabei setzen wir uns mit theoretischen Verständnissen von Selbstorganisation auseinander, betrachten unterschiedliche empirische Erscheinungsformen (z. B. im Kontext von Politik, Freizeit, Sport, Subkulturen, Bildung und Religion) und befassen uns mit deren Bedeutung im Kontext gesellschaftlicher Bedingungen. Ziel ist es, ein konzeptionell-analytisches Verständnis jugendlicher Selbstorganisation im Hinblick auf Sozialisations- und Bildungsprozesse sowie auf Erfahrungen von Zugehörigkeit, Anerkennung, Teilhabe und Autonomie zu entwickeln und deren Zusammenhang mit gesellschaftlichen Macht- und Ungleichheitsverhältnissen zu reflektieren. Darüber hinaus werden wissenschaftliche Kompetenzen vertieft, insbesondere im Umgang mit wissenschaftlicher Literatur, im differenzierten fachlichen Austausch mit anderen Studierenden und der Dozentin sowie im wissenschaftlichen Schreiben im Rahmen einer Seminararbeit.

Notes:

Die Studierenden entwickeln im Verlauf des Seminars eine eigenständige Fragestellung, anhand derer sie auf Grundlage der Seminarlektüre eine Seminararbeit verfassen. Der Schreibprozess wird didaktisch in die Seminarsitzungen integriert und die Studierenden dabei von der Dozentin sowie von ihren Peers begleitet und unterstützt.

Event Fachdidaktik Wirtschaft und Recht VII: Schülerbeurteilung und Projektbegleitung
06SE090WiRe7 / Seminar / 925

Description:

Business event contents:

Im ersten Teil der Lehrveranstaltung werden schriftliche und mündliche Prüfungen erstellt und anhand verschiedener Kriterien analysiert und reflektiert. Weitere Schwerpunkte sind Prüfungskorrektur und Notengebung, sowie die Durchführung mündlicher Prüfungen. In allen Themen sollen die Teilnehmer auf Fehlerquellen sensibilisiert werden und ihre eigenen (zum Teil impliziten) Beurteilungs- und Bewertungskriterien hinterfragen können. Im zweiten Teil der Lehrveranstaltung wird die Planung, Durchführung und Bewertung von Schülerprojektarbeiten (insbesondere Maturaarbeiten und selbständige Vertiefungsarbeiten) thematisiert. Es werden zudem kritische Aspekte der Projektbegleitung reflektiert und mögliche Interventionen anhand von praktischen Beispielen erarbeitet. Das Modul ist sehr praxisorientiert ausgerichtet. Von den Teilnehmern wird aktive Mitarbeit in den Diskussionen und in der Reflexion der Aufträge erwartet.
